Action Plan to Reduce Core Housing Need

My questions are for the Minister responsible for the Northwest Territories Housing Corporation.

In September 2017, the Northwest Territories Housing Corporation released a three-year action plan with the title “Towards Level Ground: Addressing Persistent Core Need in the Northwest Territories”. This plan responded to a 2016 Motion supported by regular Members that called for a comprehensive and fully-costed plan to reduce housing problems identified in the 2014 Community Survey. Please provide a report on the first two years of the action plan including how many households the Housing Corporation assisted and:

1. A breakdown of the type of assistance by action and/or initiative as detailed on page 11 of the action plan;
2. A breakdown of money spent on each of these actions and/or initiatives by fiscal year;
3. A projection of assistance by action or initiative as detailed on page 11 of the action plan along with a breakdown of money spent on each one for the current fiscal year; and,
4. A projection of how federal money under the National Housing Strategy will assist in meeting these measures in the current fiscal year.
