1 INTRODUCTION

On behalf of De Beers Group of Companies, Diavik Diamond Mines (2012) Inc., Dominion Diamond Ekati Corporation, and the Government of the Northwest Territories, the NWT Bureau of Statistics conducted the 2014 NWT Survey of Mining Employees between August and October 2014. This was the second survey of all NWT diamond mine employees with the first one completed in 2009. The survey collected information on the demographic profile of mining employees, their experiences working at the mines, health and wellness, current community of residence, factors they consider when thinking about relocation, and barriers to moving to the Northwest Territories.

Of the 3,107 mining employees in the sampling frame, 2,578 responded for an overall response rate of 83%. Analysis and conclusions in this report refer to survey respondents only.

1.1 HIGHLIGHTS

- Compared to 2009, respondents were a little older in 2014, education levels improved and the proportion of Non-NWT residents increased. Further differences in demographic characteristics were evident when respondents were analyzed by residency group.
- The highest proportion of respondents had worked between 1 - 4 years at a NWT mine. Those employees working less than one year were more likely to be NWT residents than Non-NWT residents.
- Mining employees indicated that pay and benefits and liking their rotation were the two most important factors encouraging them to stay working at their current mine.
- One in every three mining employees were likely or very likely to look for another job in the next 12 months. The top three destinations for applying on another job were other NWT mines, the Alberta oil sands, and mining companies outside the NWT.
- As in 2009, of those NWT residents who were likely to leave the NWT in the next 12 months, cost of living was the main reason for considering a move.
- The main reason keeping Non-NWT residents from moving to the NWT was that they liked their home community, the same reason as five years ago.
- For those respondents who had never lived in the NWT, over 80% consider cost of housing and cost of utilities as major concerns when considering relocation to the NWT.

2 PROFILE OF NWT MINING EMPLOYEES

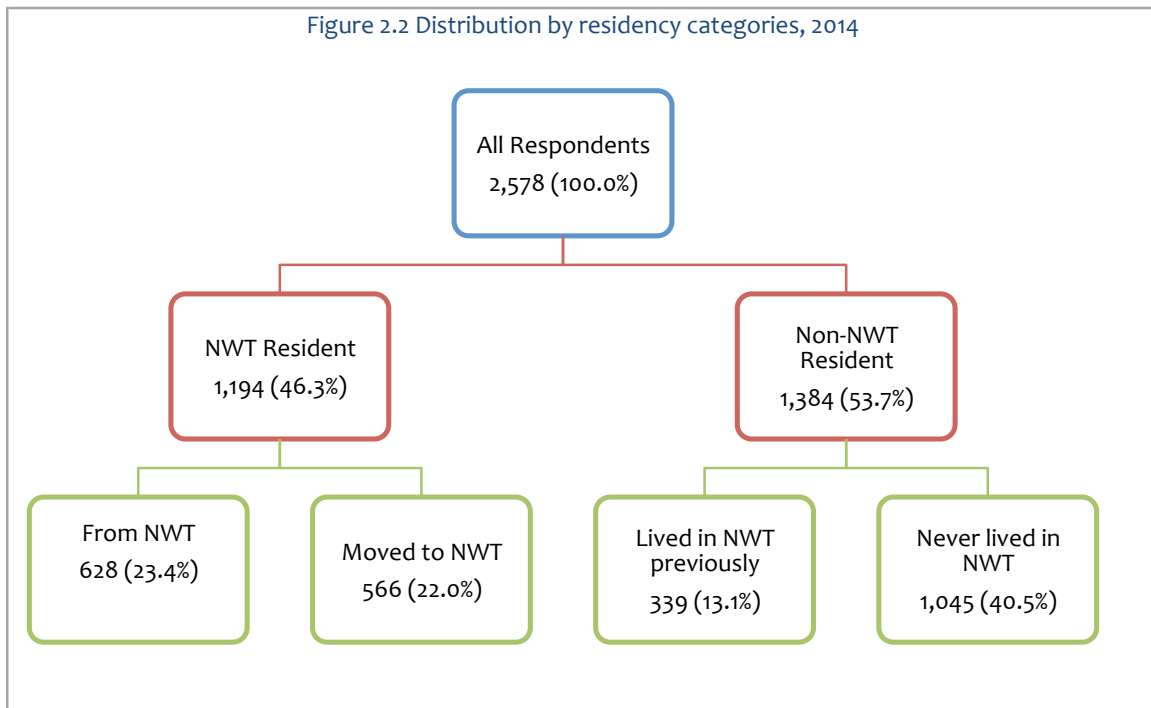

2.1 RESIDENCY

Among 2014 survey respondents, 46% were NWT residents while 54% resided in other regions. The Western region accounted for over a third of all respondents, and the majority of Non-NWT residents. Compared to 2009, the highest increase in the proportion of employees was among those living in the Atlantic and the Central regions.

About half of respondents had lived in their current community for 15 years or more, followed by those who had lived between 1 - 4 years (18%), 5 - 9 years (15%), 10 - 14 years (11%), and less than one year (5%).

For the purposes of this report, respondents were divided into two distinct residency groupings: NWT residents and Non-NWT residents. Figure 2.2 presents the distribution of the residency categories. NWT residents were further sub-divided into those from the NWT and those who moved to the NWT. Non-NWT residents were sub-divided into those who previously lived in the NWT and those who never lived in the NWT.

2.2 DEMOGRAPHICS

Of the 2,578 individuals who completed the 2014 survey, the majority (84%) were male. Those aged 25-54 years represented about 75% of respondents. The majority of respondents were married or in a common-law relationship. Approximately 30% of respondents were Aboriginal. Table 2.1 compares demographic characteristics of mining employees during the 2009 and 2014 surveys.

Table 2.1 Demographic characteristics, 2014 & 2009

	All Respondents			
	2014		2009	
	Total	%	Total	%
Total	2,578	100.0	1,705	100.0
Sex				
Male	2,156	83.6	1,419	83.2
Female	422	16.4	274	16.1
Not Stated	-	-	12	.7
Age Group				
18 to 24 years	146	5.7	96	5.6
25 to 34 years	664	25.8	424	24.9
35 to 44 years	611	23.7	446	26.2
45 to 54 years	668	25.9	489	28.7
55 years & older	467	18.1	239	14.0
Not Stated	22	.9	11	0.6
Marital Status				
Never married	538	20.9	353	20.7
Married or common-law	1,750	67.9	1,146	67.2
Separated or divorced	237	9.2	169	9.9
Widowed	23	.9	16	0.9
Not Stated	30	1.2	21	1.2
Residency				
NWT Residents	1,194	46.3	994	58.3
Non-NWT Residents	1,384	53.7	711	41.7

The proportion of female and Aboriginal employees was higher among NWT residents compared to Non-NWT residents. NWT resident mine employees tended to be younger, with the highest proportion among those aged 25-34 years old while those aged 45-54 years represented the highest proportion for Non-NWT residents.

While the number of employees increased considerably between the 2009 and the 2014 surveys, the overall gender, age, and marital status distribution of respondents is fairly comparable. However, when broken down by residency, we see that the number of Non-NWT resident mine employees almost doubled, compared to an increase by 20% among NWT resident employees.

The proportion of female employees from the NWT increased by 8 percentage points, while it increased by 4 percentage points among females who previously lived in the NWT. However there was a decrease in the proportion of females among those who moved to the NWT and among those who never lived in the NWT. In 2014, there was an increase in the proportion of those aged 45 years and above among NWT residents, while there was a decrease in the proportion of the same age group among Non-NWT residents.

2.3 EDUCATION

Overall, the majority of respondents had a high school diploma (27%) or a trades certificate or diploma (27%) as their highest level of education. In comparing NWT residents to Non-NWT residents, 23% of NWT residents had less than high school compared to 6% of Non-NWT residents. Correspondingly, Non-NWT residents had higher proportions of trades certificates or diplomas. Those who had relocated to the NWT specifically to work in the mining industry had the highest proportion of university degrees (33%). Figure 2.3 shows differences in the highest level of education attained by NWT-residents and non-residents.

The percentage of those with less than high school decreased in 2014 while the proportion of employees with high school diplomas increased. Although 27.6% of NWT resident employees had less than high school education, the overall education level of NWT resident mine employees have improved since 2009.

3 EMPLOYMENT CHARACTERISTICS

3.1 EMPLOYMENT HISTORY WITH NWT DIAMOND MINES

Of all respondents, 67% or 1,718 people worked directly for the mine and 33% or 851 people worked for contractors at the mine. The highest proportion (35%) of employees worked between 1 - 4 years at a NWT mine, while those who worked 15 years or more represented the least number of employees. Slightly more NWT residents than non-residents were hired within the previous 12 months. Higher proportions among NWT residents were also found among those who worked 10 years or more (Figure 3.1).

Employees who worked at no other NWT diamond mining company besides their current mine represented 85% of respondents, while the remaining 15% had worked for at least one other NWT diamond mine during the past five years. Higher proportions of those who had worked at multiple NWT diamond mine were found among respondents from the NWT, those who previously lived in the NWT, Aboriginal employees, and those with less than a high school diploma as their highest level of education.

The main reasons cited for the change in employment between NWT diamond mines were career advancement, better pay and benefits, end of term or seasonal work, and lay-offs because of company downsizing or restructuring.

3.2 WORK SCHEDULES

Table 3.1 provides the distribution of employees by their work schedules. Overall, the majority of mining employees worked a two-week-in and two-week-out schedule. The percentage working this rotation was higher among Non-NWT residents compared to NWT residents.

Table 3.1 Current work schedules by residency, 2014

	Total		NWT Residents		Non-NWT Residents	
	No.	%	No.	%	No.	%
Total	2,578	100.0	1,194	100.0	1,384	100.0
Usual work schedule						
2 weeks in, 2 out	2,220	86.1	913	76.5	1,307	94.4
4 days in, 3 out	123	4.8	118	9.9	5	.4
Monday to Friday	158	6.1	151	12.6	7	.5
Other	64	2.5	7	.6	57	4.2
Not stated	13	.5	5	.4	8	.6

When asked to indicate their preferred work schedules, responses varied depending on the employees' current work schedule (Figure 3.3). Those on a two-week-in and two-week-out schedule were more likely to prefer their current schedule compared to other employees. Less than half of employees on a four-days-in and three-days-out schedule preferred that schedule. Nearly 150 persons or 5.7% preferred a three-week-in and three-week-out schedule.

3.3 OPPORTUNITIES FOR CAREER GROWTH

Opportunities for career growth can be an important factor in retaining experienced employees. As discussed in the employment section, career advancement was the main reason given for changing jobs between NWT diamond mines. In the 2014 survey, respondents were asked to indicate if they felt they had opportunities for career growth at their mine. Overall, the majority (62%) felt they had opportunities for career growth. Non-NWT residents were less likely to feel they had opportunities for career growth compared to NWT residents.

Across residency categories, the two main reasons cited for the lack of career growth opportunities was the absence of openings and that respondents were not interested in changing jobs (Figure 3.4). About 8% felt that they did not have opportunities due to either their ethnicity or favoritism and this response was evenly distributed among NWT and Non-NWT residents as well as Aboriginal and Non-Aboriginal respondents. In terms of differences, NWT residents were more likely to cite lack of experience and skills for not having opportunities for career growth, while some Non-NWT residents reported that they would not apply for senior positions because it would require them to relocate to the NWT.

Respondents were also asked if they felt they had equal access to career advancement as their co-workers. There was a consistent increase by age in the proportion of respondents who felt there was inequality in access to career advancement. For instance, almost half of employees aged 55 and over, compared to a quarter of employees aged 18-24 felt they did not have equal access to career advancement as their co-workers. Within the highest

educational attainment category, those with trades certificate/diploma (39%) and those with a college certificate (39%) had the highest proportion of respondents who said they did not have equal access to career advancement as their co-workers.

3.4 SATISFACTION WITH PAY AND BENEFITS

Slightly more than half of all respondents strongly agreed or agreed that their pay and benefits were competitive with similar jobs they might find in the NWT. However, differences emerged when comparing responses by residency categories. Employees who had moved to the NWT were most likely (67%) to indicate that pay and benefits were competitive, while only about half of respondents in the other residency categories strongly agreed or agreed to this statement.

When asked if their pay and benefits were competitive with similar jobs *outside* the NWT, only 39% of employees strongly agreed or agreed. Agreement levels were similar across the four residency sub-categories.

Mining employees were asked to indicate the most important thing encouraging them to stay working at their current mine. Overall, pay and benefits and that they liked their rotation were the two most common responses. The distribution of responses and order of importance, however, varied depending on respondents' residency category (*Figure 3.5*). Pay and benefits was the distinct first priority for staying at the mine for NWT residents. For employees from the NWT, family reasons were the second most important factor, while for those employees not living in the NWT, pay and benefits was second to the importance of liking the rotation.

As another way of measuring employee satisfaction, respondents were asked if they would advise a friend to apply for a job at their current mining company. Overall, 66% strongly agreed or agreed that they would do so. A higher proportion of NWT residents (76%) compared to non-residents (58%) strongly agreed or agreed, a difference of about 18 percent points.

3.5 POSSIBLE EMPLOYMENT DESTINATIONS

Respondents were asked to indicate the likelihood of looking for a job outside their current mine in the following 12 months. One in every three mine employees indicated they were very likely or likely to look for another job. The proportion of employees that were likely to look for a job was higher among Non-NWT residents than NWT residents.

The likelihood of looking for a job outside the current mining company increased with higher levels of education. Proportions of those likely to look for a job progressively increased from 23% among employees with less than high school to 37% among those with a university degree.

If respondents were to apply for a job outside their current mine, the three most cited destinations were other NWT mines (30%), the Alberta oil sands (25%), and other mining companies outside the NWT (19%). NWT residents were likely to look for a job at another NWT mine, while Non-NWT residents said they would likely go for an Alberta oil sands company or a mining company outside the NWT.

4 HEALTH AND WELLNESS

4.1 USE OF HEALTH SERVICES

NWT diamond mines offer Employee Assistance Programs (EAP) to their employees. These are services offered to employees to help them and their families overcome problems. Among all respondents, 15% had used EAP, 10% stated that they needed it but did not use it, while 75% stated they did not need the services. EAP use was higher among female employees, Aboriginal employees, and those with less than high school education. It is noteworthy that the same groups that had the highest use of EAP also had the highest proportions of respondents who indicated they needed the service but did not use it.

Those who never lived in the NWT had the lowest proportions of respondents who used EAP (Figure 4.1). The proportion of those who needed EAP but did not use it was higher among respondents from the NWT.

Respondents were also asked if they had used other counseling and support programs (besides EAP) during the time they had worked for the mine. A slightly higher proportion of NWT residents (10%) had used the services compared to non-residents (7%). The proportion of those who did not use the support programs but needed them was similarly higher among NWT residents (11%) compared to Non-NWT residents (5%). Differences in the use of the support services between female and male respondents, as well as across age groups were minimal. Those who completed less than high school had the highest use, while those with a university degree had the least use of the support programs.

4.2 USE OF FACILITIES

Overall, among respondents who normally work at the mine site, 76% had used fitness facilities while learning centers and cultural spaces were used by 26% and 19%, respectively. The use of fitness facilities was slightly higher among female respondents, those aged 25-34 years, and those with a university degree. Those who never lived in the NWT (70%) had the lowest use of fitness facilities among residency categories. The proportion that used the learning center was slightly higher among those who previously lived in the NWT (30%), females and Aboriginal respondents. The use of the cultural space was slightly higher among the 18-24 year olds, female and Aboriginal respondents. Respondents from the NWT (25%) had the highest, while those who never lived in the NWT (15%) had the lowest use of the cultural space.

4.3 HEALTHY FOOD OPTIONS

Among respondents who normally work at the mine site, 88% said healthy food options were available on site. There was minimal variation across gender, age groups, ethnicity, and level of education attained.

5 RELOCATION CONSIDERATIONS

5.1 RELOCATION CONSIDERATIONS FOR NWT RESIDENTS

Depending on their residency category, mining employees provided insight into some of the factors they consider when making decisions on where to live. One in five of the 2014 survey respondents had moved to the NWT. This group of employees responded to questions regarding factors that influenced their decisions to move to the NWT.

Similar to 2009, the availability of work and competitive pay and benefits was the main reason for moving to the NWT for around half of the respondents. Moving for Northern experiences and adventures decreased in 2014 compared to 2009.

In 2014, the distribution of reasons for relocating to the NWT differed depending on whether the employee relocated to the NWT to work specifically in the mining industry or if they relocated for reasons other than work in the mining industry. The top three reasons for those who relocated to work specifically in the mining industry were the availability of work, competitive pay and benefits, and moving as part of company policy. For those who

relocated for reasons other than work in the mining industry, the top three reasons were the availability of work, northern experiences and adventure, and their spouses' employment.

5.2 LIKELIHOOD OF LEAVING THE NWT BY CURRENT RESIDENTS

Similar to the 2009 survey results, the proportion of current residents who indicated that they were very likely or likely to consider moving from the NWT in the following 12 months was higher among those who relocated to the NWT than those who are from the NWT. However, this proportion dropped from 45% in 2009, to 40% in 2014. The drop was most notable among those who relocated to the NWT.

Little variation was seen between gender, age, and ethnicity in terms of moving from the NWT. However, those with a trades certificate or diploma and those with a university degree were more likely to consider moving from the NWT.

For those employees indicating they were likely to move, 44% chose cost of living as the main reason, followed by those wanting to be closer to family (12%). There was little variation for reasons why they may leave between respondents from the NWT and those who moved to the NWT.

5.3 RELOCATION CONSIDERATIONS FOR NON-NWT RESIDENTS

Non-NWT residents were asked to indicate if certain factors were a major concern, minor concern, or not a concern to them if they were to consider relocating to the NWT. Over 80% had major concerns with the cost of housing and utilities. For those who had never lived in the NWT, 75% were concerned with the distance from extended family and just over 70% felt the cost of food would be an issue. Further, the cost of transportation, availability of goods & services and spouse's employment & education were also major concerns. Generally, those who had never lived in the NWT had more major concerns than those who had previously lived in the NWT.

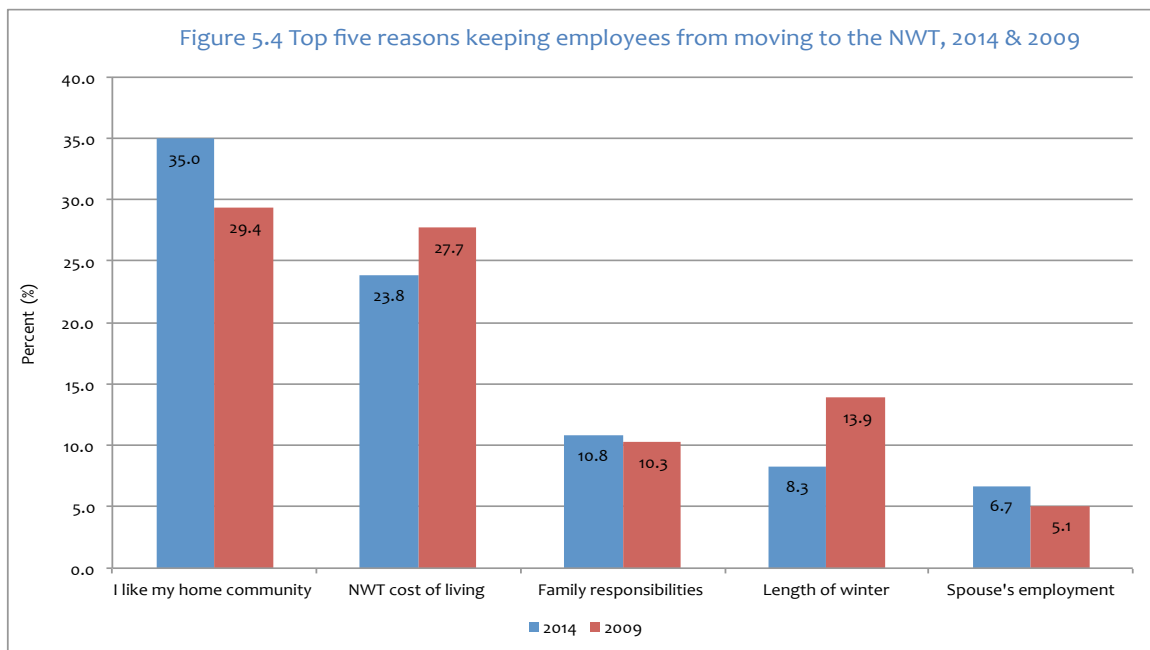

A comparison with the 2009 survey shows that the cost of housing, cost of utilities, cost of transportation and distance from extended family remain major concerns for mining employees when considering relocation to the NWT. Cultural activities, educational

opportunities, and recreational opportunities are still minor concerns for the majority of respondents.

Similar to the 2009 survey, liking their home community followed by the cost of living in the NWT were the top two factors keeping respondents from moving to the NWT (Figure 5.4). These two reasons were cited across gender, age groups, marital status, levels of education, and among those who owned their homes. For those who rented, the cost of living and liking their community were equally important factors.

For those who previously lived in the NWT, the cost of living was the main reason preventing respondents from relocating to the NWT. For those who never lived in the NWT, liking their community was the main reason for not wanting to move to the NWT.

Between the 2009 and the 2014 surveys, there was an increase in the proportion of respondents for whom liking their community was the main reason for not relocating to the NWT, while the proportion that indicated NWT cost of living decreased (Figure 5.4).

6 SUMMARY

The 2014 Survey of NWT Mining Employees provided information on key demographic characteristics, employment experiences, health and wellness issues, as well as factors influencing decisions to relocate to the NWT. Responses varied depending on residency, particularly for demographic and employment characteristics.

Retention of current employees is critical to any organization. With nearly 15% having worked at multiple mines in the NWT during the past 5 years, there is competition for mining employees. In addition, respondents know that there are employment options with other mines and Alberta oil sand companies. One third of employees are likely or very likely to seek employment outside their current mine in the next year. While pay and benefits were the main reasons for recruitment to the NWT and retention at their current mine, respondents do not perceive their compensation to be competitive with similar jobs outside the NWT; about 57% perceive them to be competitive within the NWT.

Cost of living continues to be of major concern for Non-NWT residents and the reason NWT residents would most likely consider a move from the NWT in the next 12 months. The main reasons keeping most Non-NWT residents from moving to the NWT was that they liked their home community, followed by the cost of living in the NWT.

8 APPENDICES

APPENDIX A: METHODOLOGY

The NWT Bureau of Statistics in conjunction with De Beers Group of Companies, Diavik Diamond Mines (2012) Inc., Dominion Diamond Ekati Corporation, and three departments within the GNWT developed the 2014 NWT Survey of Mining Employees. Each of the three diamond mining companies provided the frame for the survey based on a current employee listing including contractor employees. The survey was a census of all current NWT diamond mine employees.

Working with mine representatives, NWT Bureau of Statistics staff traveled to the three mine sites to deliver the survey between August 5 and October 2, 2014. The survey was self-administered; that is, the mine employees read and filled out the survey individually. The role of the Bureau of Statistics staff was to introduce the survey and respond to any questions. The same survey administration procedures used at the mine sites were applied when surveys were completed with mine employees working from the respective Yellowknife offices.

Data entry was completed directly from questionnaires to a database prepared by the NWT Bureau of Statistics. Computer assisted edits were performed to check for data entry errors and logical inconsistencies among responses. Non-NWT residents who did not indicate their residency sub-category were considered to have never lived in the NWT.

Statistical tables were prepared using the Statistical Package for the Social Sciences (SPSS). Values of less than 4 were suppressed to protect the confidentiality of respondents.

Ineligible employees were removed from the frame. Ineligible employees included persons no longer working for the mining company or on long-term leave during the survey operations. In total, 2,578 persons responded to the survey, yielding a response rate of 83%.

APPENDIX B: SURVEY QUESTIONNAIRE

2014 NWT SURVEY OF MINING EMPLOYEES

Instructions

Please read each question carefully. Put a mark in the box or boxes that match your answer.

Unless otherwise indicated, please mark only ONE answer per question and then proceed to the next question.

Please note that some answers require you to “skip” to another question or section in the survey. These are indicated by a blue arrow and instructions on where to proceed.

If you need assistance with the survey, please do not hesitate to contact the on-site Bureau of Statistics representative.

Thank you very much for your participation.

All information collected in this survey will be kept confidential and used only for statistical and information purposes and is protected by the *Access to Information and Protection of Privacy Act*.

A. BACKGROUND INFORMATION

To begin this survey, we would like to ask you a few questions about yourself.

A1. Are you male or female?

- Male Female

A2. How old are you? (**Mark ONE only**)

- 18 – 24 years
 25 – 34 years
 35 – 44 years
 45 – 54 years
 55 years & older

A3. What is your current marital status? (**Mark ONE only**)

- 1 Never married
 2 Married or common-law
 3 Separated or divorced
 4 Widowed

A4. What is the highest level of schooling you have completed through school or upgrading? (**Mark ONE only**)

- 1 Less than high school 4 College certificate or diploma
 2 High school diploma 5 University degree
 3 Trades certificate or diploma

A5. What is your ethnicity? **(Mark ONE only)**

1 Aboriginal

2 Non-Aboriginal

A6. Who currently lives with you in your home? Do not include anyone who is away at school or who is only staying with you temporarily. **(Mark ALL that apply)**

1 Spouse or common law partner

2 Children  **How old are they?** a) _____

3 Parents b) _____

4 Grandparents c) _____

5 Brothers or sisters d) _____

6 Unrelated roommate(s) e) _____

7 Other (Specify): _____

A7. Do you have any other dependants that do not live with you? Dependants are people you support financially on a regular basis. **(Mark ONE only)**

1 Yes

2 No

A8. Do you own or rent your home? **(Mark ONE only)**

1 Own

2 Rent

B. EMPLOYMENT

B1. Which of the following categories best describes your **usual** work schedule? **(Mark ONE only)**

- 1 Two weeks in, two weeks out 3 Monday to Friday
2 Four days in, three days out 4 Other (Specify): _____

B2. What would be your **preferred** work schedule? **(Mark ONE only)**

- 1 Two weeks in, two weeks out 3 Monday to Friday
2 Four days in, three days out 4 Other (Specify): _____

B3. How long have you worked with a northern mine such as Ekati, Diavik, or Snap Lake? **(Mark ONE only)**

- 1 Less than 1 year 4 10 - 14 years
2 1 - 4 years 5 15 years or more
3 5 - 9 years

B4. Besides this mine, which other NWT mines have you worked at during the **past 5 years?** **(Mark ALL that apply)**

- 1 Ekati
2 Snap Lake
3 Diavik
4 No other NWT mine  **(Skip to B6)**
5 Other (Specify)_____

B5. What is the main reason you left the previous mine? **(Mark ONE only)**

- 1 Career advancement
- 2 Better pay and benefits
- 3 Improved job stability
- 4 Laid off because of company downsizing or restructuring
- 5 End of seasonal work/ Term ended
- 6 Company terminated my employment (fired)
- 7 Other (Specify)_____

B6. Do you feel you have opportunities for career growth within this mine? **(Mark ONE only)**

1 Yes

2 No

Why not? **(Mark ONE only)**

- 1 I don't have the skills
- 2 I don't have enough experience
- 3 There are no openings
- 4 I am not interested in changing jobs
- 5 Other (Specify)_____

B7. Please indicate if you agree or disagree with the following statements; **(Mark ONE only per question)**

	<i>Strongly Agree</i>	<i>Agree</i>	<i>Undecided</i>	<i>Disagree</i>	<i>Strongly Disagree</i>
a. I have equal access to career advancement as my co-workers	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
b. My pay and benefits are competitive with similar jobs I might find in the NWT	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
c. My pay and benefits are competitive with similar jobs I might find outside the NWT	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
d. I would advise a friend to apply for a job at this mine	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>

B8. What is the most important thing encouraging you to stay working at this mine? **(Mark ONE only)**

- 1 Pay and benefits
- 2 Job satisfaction
- 3 Family reasons
- 4 Spouse's employment
- 5 Relationship with co-workers
- 6 Job stability
- 7 I like the rotation
- 8 Professional development opportunities
- 9 Other (Specify) _____

B9. If you were to look for a job outside this mine, where would you most likely apply? **(Mark ONE only)**

- 1 Another NWT mine
- 2 A mining company outside NWT
- 3 An Alberta oil sands company
- 4 A non-mining company within the NWT
- 5 A non-mining company outside the NWT
- 6 Another contractor providing service at the mine site
- 7 Other (Specify) _____

B10. In the next 12 months, how likely are you to look for a job outside this mine? **(Mark ONE only)**

- 1 Very unlikely
- 2 Somewhat unlikely
- 3 Not sure
- 4 Somewhat likely
- 5 Very likely

B11. Do you work **(Mark ONE only)**

- 1 Directly for the mine
- 2 For a contractor at the mine

C. HEALTH AND WELLNESS

C1. During the time you have been working for this mine, have you used the Employee Assistance Programs (counseling and other supports) offered by your employer? **(Mark ONE only)**

Yes

No, but I needed it

No, I did not need it

C2. Besides the Employee Assistance Programs, have you used any other counseling or support programs during the time you have been working for this mine? **(Mark ONE only)**

Yes

No, but I needed it

No, I did not need it

C3. Do you normally work at the mine site? **(Mark ONE only)**

Yes

No  **(Skip to Section D)**

C4. Are healthy food options available at your mining site? **(Mark ONE only)**

Yes

No

C5. Have you used the cultural space at your mine site? **(Mark ONE only)**

Yes

No

I did not know a cultural space was available

C6. Have you used the fitness facilities at your mine site? **(Mark ONE only)**

₁ Yes

₂ No

C7. Have you used the learning center at your mine site for furthering your education or to complete professional development programs? **(Mark ONE only)**

₁ Yes

₂ No

D. LIFE IN YOUR COMMUNITY

Next, we would like to get some information about your home community, meaning the city, town or village where you currently live.

D1. How long have you lived in your home community? **(Mark ONE only)**

₁ Less than one year

₄ 10 – 14 years

₂ 1 – 4 years

₅ 15 years or more

₃ 5 – 9 years

D2. In which region do you currently live? **(Mark ONE only)**

₁ Western Region (British Columbia, Alberta, Saskatchewan or Manitoba)

₂ Central Region (Quebec or Ontario)

₃ Atlantic Region (New Brunswick, Nova Scotia, P.E.I. or Newfoundland & Labrador)

₄ Northern Region (Nunavut or Yukon)

₅ Northwest Territories  **(Skip to Section E)**

D3. Have you ever lived in the Northwest Territories? **(Mark ONE only)**

1 Yes

2 No  **(Skip to D6)**

D4. Why did you leave the Northwest Territories? **(Mark ALL that apply)**

1 Time for a change

2 Tired of the weather

3 Want to be closer to family

4 Cost of living

5 Greater educational opportunities

6 Career advancement

7 Job for spouse

8 Availability of direct flights to mine

9 Other (Specify): _____

D5. How many years did you live in the Northwest Territories before moving?

_____ Years

D6. For each of the following factors, please indicate if this would be a major concern, a minor concern or not a concern if you were considering a move to the Northwest Territories. **(Mark ONE only per question)**

	Major concern	Minor concern	Not a concern
a. Cost of housing	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>
b. Cost of transportation	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>
c. Cost of utilities	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>
d. Cost of food	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>
e. Educational opportunities	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>
f. Recreational opportunities	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>
g. Availability of goods and services	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>
h. Cultural activities (arts; entertainment; theatre, etc.)	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>
i. Distance from extended family/friends	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>
j. Spouse's employment or education	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>

D7. What is the main reason keeping you from moving to the Northwest Territories? **(Mark ONE only)**

- | | |
|--|---|
| 1 <input type="checkbox"/> My spouse's employment | 5 <input type="checkbox"/> Length of winter |
| 2 <input type="checkbox"/> Family responsibilities | 6 <input type="checkbox"/> I like my home community |
| 3 <input type="checkbox"/> Cost of living in the NWT | 7 <input type="checkbox"/> Home ownership |
| 4 <input type="checkbox"/> Cost of relocation | 8 <input type="checkbox"/> Other (Specify): _____ |

SKIP TO SECTION F

E. EMPLOYEES CURRENTLY LIVING IN THE NORTHWEST TERRITORIES

The following questions are for employees who currently reside in the NWT.

E1. Did you move to the Northwest Territories to work in the **mining industry**? *(Mark ONE only)*

1 Yes

2 No

3 I am from the NWT  *(Skip to E3)*

E2. What was your main reason for moving to the Northwest Territories? *(Mark ONE only)*

1 Competitive pay and benefits

2 Availability of work

3 Had to move as part of company policy

4 Change in rotational schedule

5 Northern experiences and adventures

6 My spouse's employment

7 Other (Specify): _____

E3. Should the opportunity arise, how likely are you to consider a move from the Northwest Territories in the next 12 months? *(Mark ONE only)*

1 Very Likely

2 Likely

3 Unlikely  *(Skip to Section F)*

4 Very Unlikely  *(Skip to Section F)*

E4. What is your main reason for considering a move from the NWT in the next 12 months? **(Mark ONE only)**

- 1 Time for a change
- 2 Tired of the weather
- 3 Want to be closer to family
- 4 Cost of living
- 5 Retirement
- 6 Post-secondary education
- 7 Job opportunities
- 8 Other (Specify): _____

F. ADDITIONAL COMMENTS

F1. Any other comments?
