Capital Planning Process.....	B-1

INTRODUCTION

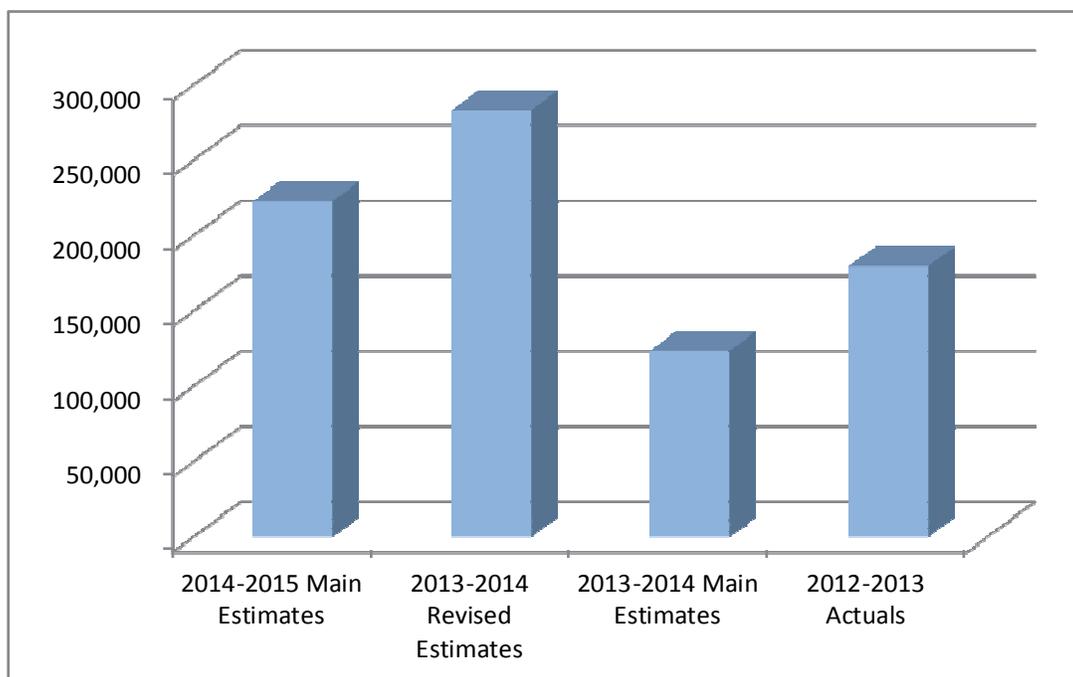

The Capital Estimates provide a summary, by department and activity, of infrastructure projects the Government is planning to invest in, or contribute towards, during the 2014-2015 fiscal year. The infrastructure investment authority is being requested only for the 2014-2015 year, therefore only those projects that require funding in 2014-2015 are included in the Activity Summaries.

The Legislative Assembly is being requested to appropriate funds at the departmental level, as detailed in the Capital Estimates, for infrastructure investment expenditures for the fiscal year ending March 31, 2015.

The approval of the Capital Estimates during the Fall Session of the Legislative Assembly allows for better planning for both the GNWT and contractors. This will allow the procurement process to begin sooner. Contractors can fit projects into their schedule, encouraging more bidders to be engaged leading to a greater level of interest and competition before contractors have already committed their resources for the summer construction season.

OFFICE OF THE COMPTROLLER GENERAL**Activity Description**

The Office of the Comptroller General is responsible for control of the administration of the consolidated revenue fund with respect to the receipt and payment of public money, accounting policy, the financial records of the GNWT, reporting responsibilities, financial analysis, advice and interpretation, internal auditing and related matters.

The Internal Audit Bureau provides an independent, objective assurance and consulting service to improve the GNWT's operations by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, internal controls and governance processes.

Accounting Services is responsible for the development of corporate accounting procedures and policies, administration and integrity of the government's financial information system, revenue, accounts receivable and accounts payable functions, making territorial power subsidy payments, management of the environmental liability fund, external financing reporting, and providing collections and credit granting functions.

The Financial Shared Services Division is responsible for providing a full suite of expenditure management services to the Departments of Finance, Executive, Human Resources and Aboriginal Affairs and Intergovernmental Relations.

OFFICE OF THE CHIEF INFORMATION OFFICER**Activity Description**

The Office of the Chief Information Officer (OCIO) is the lead for the development of an effective, comprehensive and current informatics strategy. The strategy guides the development, management and use of the government's information resources, in a manner that supports the government's strategic business goals and operational needs. The Division is also responsible for the coordination and oversight of the Canadian Radio & Telecommunications Commission (CRTC) and ensures representation before the CRTC on matters affecting both NWT residents and businesses.

The OCIO serves as the GNWT's senior authority on corporate activities associated with Information Systems (IS), Information Technology (IT) and the management of information (IM). The OCIO provides strategic and operational advice to the Informatics Policy Council (IPC), and ensures strategy and policy implementation is undertaken in a timely and consistent manner. Other activities include;

- Collaborate with departments on development of strategic and policy frameworks;
- Provide day-to-day guidance regarding strategy and policy implementation;
- Coordinate all corporate-level processes pertaining to the IM/IS/IT environment;
- Provide governance support for and coordinate the flow of information to the IPC.

This summary reflects the 2014-2015 planned expenditures of the NWT Housing Corporation for the Infrastructure Acquisition Plan. The financing for these expenditures includes funding from the Canada Mortgage and Housing Corporation and various other sources. This information is intended for review purposes only with contribution funding provided by the Government of the Northwest Territories, through the Corporation's sponsoring department, the Department of Finance.

FINANCE AND INFRASTRUCTURE SERVICES

Activity Description

The Finance and Infrastructure Services branch is comprised of the Finance and Administration Division; Infrastructures Services Division, Financial Planning Section, Information Services Section and Debt Repayment. Through these units, the branch manages and administers the NWT HC's financial services, capital planning, land acquisition and planning, information services, asset management and infrastructure delivery.

The Finance and Administration Division is responsible for the financial management and administrative functions of the Corporation, including financial support and advice to senior management and other stakeholders including the Local Housing Organizations. The Division provides accounting services such as monitoring and reporting on the financial position of the Corporation and the completion of year-end consolidated financial statements. It is responsible for the treasury function and for the mortgage and debt administration of the Corporation.

The Division provides the asset management function for the Corporation ensuring that over 2,700 owned assets are safeguarded. It supports the property management function of the market housing program and the administration of all leases for supplemental housing units and office space. The Division oversees the administration of the Social Housing and Affordable Housing funding agreements with our federal partner, the Canada Mortgage and Housing Corporation and various other third party agreements where the Corporation provides subsidy assistance and operation support to various non-profit housing organizations.

The Infrastructure Services Division is responsible for the overall development, design and procurement, planning and delivery of capital infrastructure projects in support of the NWT HC's rental and homeownership programs. This Division is also responsible for the planning, procurement, and administration of suitable land for the delivery of housing programs and services, and the security of NWT HC assets and mortgage interests. Infrastructure Services is also responsible for the maintenance management of the NWT HC's public housing portfolio in order to ensure its long-term sustainability. The Division provides technical assistance in the development of new housing programs and supports the District Offices in their delivery of the Contributing Assistance for Repairs and Enhancements (CARE) program where it works with private homeowners to determine their repair needs and develop scopes of work. Finally, Infrastructure Services is the NWT HC's lead on issues related to energy efficiency and new housing technologies.

The Financial Planning Section is responsible for the coordination of the development of plans for capital infrastructure and minor capital projects, corporate budget development, project and budget change management and variance analysis.

The Information Services Section utilizes the latest in information management tools and methodologies to support the business processes of the NWT HC and its community partners. The section develops NWT HC-specific information tools as well as system training, which are critical to the delivery of housing programming.

Debt Repayment is the responsibility of this branch, which refers to the payment of long-term debt to CMHC for the provision of rental housing. CMHC contributes to the servicing of this debt.

REGIONAL OPERATIONS

Activity Description

Regional Offices are responsible for the coordination and delivery of many of the Department's programs and services to community governments.

Regional staff provide advice and support to community governments on a range of issues. They advise community governments on governance, budgeting, debt recovery, financial reporting and other activities to support the use of sound management and financial practices. They also support communities in the development of community capital investment planning, project management and the operation and maintenance of community infrastructure and equipment.

Assistant Fire Marshals participate in training activities, local inspections and investigations.

Regional lands staff assist community governments with community land administration and planning activities and administer leases for Commissioner's lands.

COMMUNITY OPERATIONS

Activity Description

Community Operations coordinates many of the functions that support community governments. Program Management coordinates the work of the division, administers consumer, lottery, business and real estate agent licensing and responds to consumer complaints.

The Community Financial Services section coordinates financial advisory services to community governments to help promote their financial viability, good financial management and proper financial reporting practices.

The Community Governance section coordinates the Department's involvement in the implementation of Aboriginal land claims and self-government processes; provides advice on community governance issues at the request of community governments; and processes bylaws requiring Ministerial or Executive Council approval. The Chief Municipal Electoral Officer function provides advice and support related to community government elections.

The Financial Policy and Infrastructure Leveraging section analyzes fiscal policy related to supporting community governments and pursues options for accessing alternate sources of revenue for community governments. This section is also responsible for the coordination and implementation of various federal infrastructure funding programs.

The Capital Planning and Infrastructure section coordinates capital planning and infrastructure acquisition and provides technical advice and support regarding capital programs and infrastructure. This section is also responsible for completing remaining items on the MACA Capital Plan.

ASSET MANAGEMENT

Activity Description

The Asset Management activity includes the planning, design, construction, and operation and maintenance of buildings and works throughout the Northwest Territories on behalf of the GNWT. Regional offices manage the delivery of maintenance and project management services, ensuring that client needs are met and facility life cycle costs are minimized. Headquarters supports the regions by providing facility planning, technical expertise for program and design standards, facility evaluations and commissioning, granular materials planning and coordination, project management support, and technical support for safe drinking water initiatives

Asset Management coordinates the government's capital planning process, the planning, acquisition and management of general purpose office space and leases, and manages the disposal of surplus GNWT real property assets.

The Asset Management activity supports public safety through the enforcement of codes and standards set by government legislation covering electrical, elevator, boiler and pressure vessel and gas installations.

The Risk Management and Safety Program manages the Deferred Maintenance Initiative. This initiative is focused on assessing the condition of key GNWT building infrastructure and identifying and undertaking remedial work to ensure that buildings continue to be safe for occupancy, and to ensure that critical deferred maintenance items are addressed to maximize the useful life of these assets.

Through its maintenance activities, PWS plays a large role in helping achieve GNWT-wide energy efficiency and sustainability goals. This includes helping the GNWT reduce its energy costs, its dependency on fuel oil and its greenhouse gas emissions. For existing government facilities, PWS undertakes the following energy management activities:

- Energy consumption analysis and benchmarking,
- detailed energy audits, and
- inspection of electrical and mechanical systems are part of the energy management for existing facilities.

For new government facilities, PWS adheres to the EcoEnergy Validation Program Protocol to maximize energy conservation and savings up front prior to construction. Additionally, all new GNWT facilities are to follow the department's guidelines for Good Building Practice for Northern Facilities, which it created and maintains, in order to ensure energy conservation and sustainability.

TECHNOLOGY SERVICE CENTRE

Activity Description

The Technology Service Centre division (TSC) provides Information Technology (IT) services and support to GNWT departments and the Deh Cho and Sahtu Health Authorities. It is responsible for the government network, the electronic lifeline interconnecting government offices, schools and health care facilities in all 33 communities that makes electronic communication, on-line access to vital government systems and the Internet possible. In addition, it maintains the government's e-mail system, servers and data storage infrastructure used in the delivery of critical government programs as well as providing desktop/laptop support and website hosting.

The TSC manages the government's primary GNWT Data Centre in Yellowknife which provides a reliable and secure environment for maintaining the IT infrastructure used in delivering the GNWT's corporate information systems like PeopleSoft HR and SAM. The Data Centre maintained in the Stuart M. Hodgson Building provides secondary/backup site functions and there are two smaller data centres maintained in Fort Smith and Inuvik.

All employee calls for assistance are handled through the Service or Help Desk function. The Help Desk is an information and assistance resource that troubleshoots employee problems with computers, software, corporate systems and network connectivity. The information gained through these interactions in resolving technical problems, identifying user preferences and gauging employee satisfaction are valuable and essential to helping the TSC enhance the services and support through ongoing quality and process improvement.

PETROLEUM PRODUCTS DIVISION**Activity Description**

The Petroleum Products Division (PPD) manages the purchase, transport, and storage of petroleum products in NWT communities that are not served by the private sector. The products are sold to residents of the 16 communities through local contractors who are paid a commission. PPD also provides fuel delivery and maintenance services to NWT Power Corporation tank farm facilities in 20 communities.

PPD financial and administrative headquarters, with responsibilities for credit, invoicing, collections and financial planning, are located in Fort Simpson. The Fuel services group oversees operations in the communities and manages local delivery contractors, determines re-supply quantities, provides quality control, capital standards and planning as well as environmental management.

The PWS Asset Maintenance group within PPD manages the operations, maintenance and disposal of GNWT goods and buildings throughout the Nahendeh Region, and when requested supports community governments in the management of their infrastructure responsibilities.

HEALTH SERVICES PROGRAMS

Activity Description

Health services to eligible northern residents in areas such as inpatient and outpatient services, public health and chronic care are provided through the Department and Authorities. Pursuant to the *Hospital Insurance and Health and Social Services Administration Act*, Health and Social Services Authorities are established to operate, manage and control facilities, programs and services.

Hospital Services

- funding to Authorities to provide primary, secondary and emergency care in NWT hospitals
- funding for insured hospital services to NWT residents outside the NWT

NWT Health Centres

- funding to Authorities to provide residents with primary care or “first contact” care through a system of health centers located throughout the NWT

Physician Services

- funding to Authorities to provide insured physician services inside the NWT
- funding for insured physician services to NWT residents outside the NWT

Medical equipment under \$50,000

- funding for medical equipment under \$50,000

COMMUNITY PROGRAMS

Activity Description

The **Territorial Social Programs Division** provides programming including child and family services, mental health and addictions, and the Office of the Public Guardian. Aspects of these programs are governed by the *Child and Family Services Act*, the *Adoption Act*, the *Mental Health Act*, and the *Public Guardian and the Trusteeship Act*. Services within these program areas are primarily delivered by Health and Social Service Authorities. The division's role involves setting standards, monitoring performance, and providing support to front line staff, supervisors, and managers.

Adult Continuing Care includes funding to Health and Social Services Authorities for long term care facilities, including group homes and residential care both inside and outside the NWT.

Community Social Services includes funding to Health and Social Services Authorities for community social service workers in the areas of prevention, assessment, early intervention, and counselling and treatment services related to children, youth and families. Funding is also provided for programs to enable individuals with special living requirements to stay in their homes as long as possible and services designed to assist living in the home.

COURT SERVICES

Activity Description

The NWT has four levels of court which collectively represent the judicial branch of government: Justice of the Peace Court, Territorial Court, Supreme Court and Court of Appeal. The courts are independent of the executive (GNWT departments/boards) and legislative (Legislative Assembly) branches of government. The **Court Services Division** is responsible for providing administrative support to the courts. These support services ensure courts are accessible, impartial and timely. The Division is also responsible for family law services including mediation and the Parenting After Separation Program.

CORRECTIONS

Activity Description

The **Corrections Service** provides safe custody and supervision of adult and youth offenders. This is achieved through the operation of correctional facilities and the supervision of offenders sentenced to community based orders such as conditional sentences and probation orders. The corrections service also delivers culturally relevant programs to support offender rehabilitation and reintegration, including wilderness camps and elder support.

LABOUR DEVELOPMENT AND STANDARDS

Activity Description

The **Labour Development and Standards Division** provides a range of programs and services related to career development, apprenticeship, employment preparation, training and development, and labour services.

Apprenticeship and Occupations – works closely with industry, Aurora College, the Interprovincial Red Seal program and other training institutions to provide training and certification in designated trades and occupations.

Labour and Career Development – works in partnership to coordinate labour market programming to expand employment opportunities in the North and increase participation in the workforce. It provides support to industry to ensure the scope and delivery of programs offered to meet regional needs. ECE Service Centres offer career counselling, needs assessment, education planning, workshops, resource libraries, career and labour market information and career fairs. The Division also provides immigration supports through the Canada-NWT Agreement on Territorial Nominees.

Employment Standards – administers the *Employment Standards Act* and investigates complaints from employees and employers regarding non-compliance with this legislation. Independent adjudicators make decisions on appeals filed under the Act.

Management and Program Support – negotiates and monitors training and employment provisions in socio-economic agreements; ensures management and administrative support in headquarters and regional offices. In addition to delivering apprenticeship and career and employment programs, regional offices are responsible for delivering income security and early childhood programs budgeted under separate activities.

Community - A community specific asset, such as, a school or water treatment plant.

Regional - Limited primarily to a specific region, such as a highway project.

Territorial - A territorial project , such as, park infrastructure, Stanton Hospital or Information Technology projects.

EDUCATION AND CULTURE

Activity Description

The **Early Childhood and School Services Division** provides direction, standards and supports as well as program and curriculum development for children from early childhood through to grade 12 completion.

Early Childhood Development Program – licenses, monitors and funds early childhood programs.

Instructional and Support Services – ensures teaching standards are maintained and conducts curriculum review, revision and replacement as required. It also supports school staff to implement department directives.

Aboriginal Language and Culture Based Education – ensures, through guidelines and contributions to education authorities, that education honours all forms of First Nation, Métis and Inuit traditional knowledge, ways of knowing, and worldview and promotes the cultures and languages of the First People of the NWT.

Inclusive Schooling – ensures, through guidelines and contributions, that all NWT students are entitled to access an education program in a regular instructional setting in their home community.

Minority Language Education and Instruction – ensures that French First Language, French Immersion and Core French programs are available and delivered in the NWT.

The **Education Operations and Development Division** supports, monitors and reviews operations and service delivery of education authorities responsible for Junior Kindergarten - 12 education; runs Public Library Services and deliver a range of program services related to literacy, adult and postsecondary education.

Education Operations and Development – ensures teacher and principal certification, provides education leadership development, and supports teachers through the Teachers' Qualification Service and by assisting with teacher recruitment and retention. The Division manages student records, systemic student assessments and reports on student achievement and Junior Kindergarten - 12 education system functioning.

Northwest Territories Teachers' Association (NWTTA) Professional Development Fund – is provided by the Department to support the professional development of teachers.

School Contributions – provides contributions to education authorities for the operation of NWT schools.

Public Library Services (PLS) – provides library services to meet the education, information and recreation needs of residents across the NWT. A central library collection is maintained with materials rotated to libraries across the NWT and mailed to residents in communities without libraries.

Adult and Postsecondary Education – supports the planning, research, development and evaluation of adult and postsecondary programs and services, including Aurora College, the NWT Literacy Strategy and Adult Literacy and Basic Education.

The **Culture and Heritage Division** has the responsibility to enhance the arts, cultures and heritage of the NWT in partnership with community, regional and national organizations. It also oversees the Aboriginal Languages Secretariat.

Culture and Heritage – provides supports to community museums, cultural, heritage and arts organizations, and individuals; manages archaeological site protection and archaeological research; participates in land use regulatory processes; administers the Geographical Names and Territorial Historic Sites Program and the NWT Archives and Museum Operations at the Prince of Wales Northern Heritage Centre (PWNHC).

The **Aboriginal Languages Secretariat** and **Francophone Affairs Secretariat** supports Official Languages in the NWT, including the provision of supports for Aboriginal language broadcasting in the NWT; fund Aboriginal governments to implement their Aboriginal language plans; manage Services de Territoires du Nord-Ouest (Services TNO) and ensure the coordination of services and communications in French across the GNWT.

AIRPORTS

Activity Description

The purpose of the Airports Program is to provide airport facilities and services and to encourage and support the provision of regular, safe, cost-effective and reliable air services. The Department is responsible for the maintenance, operation, and rehabilitation and upgrading of airports.

The Department operates 27 airports in the Northwest Territories, of which one is a Gateway hub, (Yellowknife), two are Regional hubs, (Norman Wells and Inuvik), and the remaining 24 are community airports. Connected with the Airports Program, the Department maintains a close watch over air transportation legislation, regulation and policy activities of other governments, overall trends in air transportation safety, costs, infrastructure technology development/change and opportunities for partnership to finance the improvement of airport infrastructure.

There are four areas of program support:

- Management
- Program Development
- Operations
- Facilities

MARINE

Activity Description

The purpose of the Marine Program is to provide safe and reliable ferry crossing services on the highway system. The Department is responsible for the planning, safety, operation and maintenance of the vessels and support facilities at the ferry crossings. The Department also provides comments and advice on other marine transportation initiatives.

The Department provides ferry services at four river crossings where the territorial all-weather highways traverse waterways. Connected with the Ferries Program, the Department maintains a close watch over federal marine legislation, regulation and policy activities.

There are three areas of program support:

- Management
- Maintenance and Refits
- Operations

HIGHWAYS

Activity Description

The purpose of the Highways Program is to provide highway facilities and to encourage and support the provision of safe, reliable and cost-effective inter-community travel and road transportation services. The Department is responsible for operating, maintaining, rehabilitating and upgrading all highway infrastructures.

The Department maintains 2,200 kilometers of all-weather highways and 1,425 kilometers of seasonal winter roads. The Highway system also includes over 95 bridges and 244 large diameter culverts and well over 3,000 small diameter culvert structures. Connected with the Highways Program, the Department monitors current trends in highway construction, engineering, safety, design and technology. The Department actively seeks new partnership opportunities with other governments and industry to finance the development of new highway infrastructure and to finance enhanced operations.

There are four key areas of program support:

- Management
- Winter Roads
- Infrastructure
- Operations

ROAD LICENSING AND SAFETY

Activity Description

The purpose of the Road Licensing & Safety Program is to ensure the protection of public safety and the environment in all areas related to the use of motor vehicle and commercial vehicles.

The Department is responsible for the testing, registration and inspection of all drivers and vehicles that use the Territorial transportation network. The Department establishes and enforces the Acts, Regulations and Safety Codes that apply to drivers and motor vehicles including commercial motor carriers throughout the Territory.

Connected with the Road Licensing & Safety Program, the Department ensures the safe operation of all commercial vehicles through transportation legislation, inspections, regulations and policy activities. The Program ensures compliance with national policies and initiatives. The Program researches trends in highway transportation safety, technology development, and future opportunities for partnerships to ensure regulatory harmonization, implementation of new ideas and ensuring all drivers and vehicles are safe to share the roadways.

There are three areas of program support:

- Management
- Driver & Vehicle Licensing Program
- Carrier & Inspections Program

ECONOMIC DIVERSIFICATION AND BUSINESS SUPPORT

Activity Description

The Economic Diversification and Business Support activity consists of Investment and Economic Analysis and Industrial Initiatives.

ITI encourages investment in the NWT by providing economic analysis, and regional market and economic data for both business and government. It supports informed decision-making by providing economic data, market intelligence, sector information, and opportunity studies. In conjunction with the NWT Business Development Investment Corporation (BDIC) and Community Futures Development Corporations, ITI provides business advice and access to investment capital. These activities are delivered through the **Investment and Economic Analysis Division** and **Regional Offices**, the NWT BDIC, and Community Futures organizations.

ITI Regional Offices supply program guidance, support, advice, and assistance at the community level. Regional representatives are experienced, knowledgeable and well networked with organizations, financial institutions, and government departments and agencies. ITI works with business associations such as the NWT Chamber of Commerce and the NWT Construction Association, as well as with professional associations, to promote the NWT as a place to work, invest and live.

Investment and Economic Analysis leads the development of programs and initiatives in support of the NWT's **Traditional Economy**. Specific programs support arts and fine crafts, agriculture, fisheries, trapping and commercial game harvesting. Staff in Regional Offices implement the traditional economy programming.

This Division is also the GNWT lead on **Trade Matters** including involvement with discussions on the Agreement on Internal Trade, Pacific Northwest Economic Region, Comprehensive and Economic Trade Agreement with the European Union. It is also responsible for the administration of the GNWT Business Incentive Policy (BIP), the GNWT Contracts Registry and Reporting System, which promote business opportunities for contracting with the GNWT.

Industrial Initiatives leads the negotiation of GNWT socio-economic agreements (SEAs) with industry, and monitors industrial activities in coordination with communities and industry. Industrial Initiatives provides expert GNWT socio-economic impact analysis during the environmental assessment of non-renewable resource development projects in the NWT, monitors implementation of SEAs, manages the annual publication of GNWT reports required under the SEAs, and coordinates research in best practices for NWT benefits from present and future initiatives.

CORPORATE MANAGEMENT

Activity Description

The Corporate Management activity provides overall management, strategic planning, communication, and leadership to the Department's divisions and regions. Divisions and Units within this activity enable the Department to respond effectively to the environmental and resource management priorities of NWT residents.

The Corporate Management activity is carried out through Directorate, the Policy and Strategic Planning Division, Finance and Administration, and the Field Support Unit.

Directorate provides overall leadership, management, and strategic planning for the Department.

Policy and Strategic Planning provides policy, legislative, strategic planning, coordination, and communications and media relations expertise to lead associated initiatives or provide support to the Department to make informed decisions on environmental and resource management issues.

The **Field Support Unit** provides regional and divisional support on activities related to traditional knowledge, Aboriginal relations, licensing, compliance, public education, and employee training.

Finance and Administration provides financial management and administrative services to the departments. These services include providing advice to senior managers on financial management, financial control, contracts and contributions.

This activity also includes **Corporate Costs**, which capture Department-wide specific costs such as lease payments, and vehicle and building maintenance.

Information management, records management and geomatics services are provided through Informatics Shared Services housed in the Department of Lands.

WILDLIFE

Activity Description

The Wildlife Division is responsible for the stewardship of wildlife resources. Wildlife initiatives assess and monitor wildlife populations, habitat, species at risk, wildlife health, and biodiversity. Wildlife also coordinates initiatives to address impacts on wildlife from human activity. Functions include developing legislation, strategies, management plans and programs to support the conservation and management of wildlife resources, participating in environmental assessment and review process, preparing public information materials on wildlife conservation and management, biodiversity and reducing wildlife/human conflicts, undertaking compliance activities and administering the sport fishery.

Wildlife programs and services are delivered by regional and headquarters wildlife staff. Regional wildlife staff work closely with wildlife co-management boards to co-ordinate wildlife research and monitoring programs. Regional and headquarters wildlife staff undertake wildlife surveys and involve communities in these activities. Regional and headquarters staff also participate in the development of management plans. Headquarters wildlife staff help co-ordinate and provide expertise to assist regional staff in wildlife research and monitoring programs. Headquarters wildlife staff liaise with national and international wildlife activities and co-ordinate NWT-wide programs, such as biodiversity monitoring, major legislative reviews (e.g. *Wildlife Act*), species at risk programs, wildlife health studies, wildlife best management practices, wildlife cumulative effects studies, wildlife databases, and wildlife study publications. All wildlife and sport fishing compliance programs are delivered by regional renewable resource officers

WILDLIFE

Project Listing

Name	Description	Asset Location	Asset Classification	Type Indicator
Patrol Boat	22 foot boat with a 4 stroke motor	Norman Wells	Community	TCA
Warehouse Complex Upgrades	Mid-Life upgrades	Tuktoyaktuk	Community	TCA
Regional Laboratory	Construction of a 150m ² Level 2 Laboratory (secure storage and work space)	Fort Simpson	Regional	TCA

Asset Location - Community where the asset is located. Various if not located in a specific community, such as, a highway project.
 Asset Classification - Who benefits from this asset?

Community - A community specific asset, such as, a school or water treatment plant.

Regional - Limited primarily to a specific region, such as a highway project.

Territorial - A territorial project, such as, park infrastructure, Stanton Hospital or Information Technology projects.

FOREST MANAGEMENT

Activity Description

Forest Management initiatives provide for the stewardship of NWT forests through sustainable management of forest resources and forest fire management.

Sustainable forest management is ensured through the collection of information on the state of forest resources; forest management planning; monitoring of forest health and changes to forest landscapes; regulation of forest practices and planning; and, compliance and reporting.

Sustainable forest management includes collaboration with Wildlife, Land and Water and Environment Divisions on issues of climate change, biomass energy and Greenhouse Gas Strategy support, biodiversity and critical wildlife management concerns and decision processes of management planning at the landscape level.

Development of sustainable community forest economies is supported with appropriate consideration of the sustainable management of forest resources, community interests and aspirations, and recognizing the need for forest-based development that not only builds economic stability within communities, but is also culturally acceptable. Access to forest resources in the NWT recognizes Aboriginal rights and interests and is influenced by Interim Measures Agreements and Comprehensive Land Claim Agreements.

Forest fire management is achieved through prevention, preparedness and forest fire response. Using the best science, technology and effective use of available fire response resources, forest fire management provides for the protection of people, property and other values at risk from forest fire. Working in collaboration with the Wildlife Division, forest management assesses forest landscapes, natural disturbance patterns and current wildfire activity to develop and implement wildland fire management plans which recognize the ecological role of fire on the landscape while endeavouring to limit catastrophic levels of impacts on natural areas. Developing an increased capacity of individuals, communities, industry and others to take responsibility for reducing fire hazards and forest fires is also a priority.

ENVIRONMENT

Activity Description

The Environment Division works to maintain a high quality environment for the benefit of current and future generations.

The Environmental Protection section works to prevent and reduce the impact of human activities on the natural environment by providing information, advice, and programs in the areas of contaminated sites, hazardous substances, hazardous waste management, and air quality. The priorities of Environmental Protection are mandated through two key pieces of legislation: the *Environmental Protection Act*, and the *Pesticide Act*.

The Waste Reduction and Management section works to prevent and reduce the impact of human activities on the natural environment by developing, implementing, and administering programs and policies in solid waste management, waste prevention, reduction, reuse and recycling. The priorities of this section are mandated under the *Environmental Protection Act* and the *Waste Reduction and Recovery Act*.

The Climate Change Programs (CCP) section coordinates the GNWT's response to climate change by developing strategies and activities to control and inventory greenhouse gas emissions, identifying climate change impacts, increasing awareness of climate change, and adapting to a changing climate. Working with the Arctic Energy Alliance, the CCP section encourages energy conservation and the use of energy efficient technologies and alternative energy sources.

The Environment Division has the lead on the implementation of the GNWT Science Agenda. The Senior Science Advisor provides expertise, leadership, and vision across the GNWT as a champion for excellence in scholarship and research. The Advisor is responsible for promoting collaborative research priorities and themes relevant to the GNWT and northerners, engaging research partners in science policy development, encouraging investment in research and promoting major research initiatives.

GLOSSARY

GLOSSARY

Activity	A division of a Program.
Capital Projects	Projects established for the purchase or construction of tangible capital assets.
Deferred Maintenance	Deferred Maintenance is the practice of postponing prudent but non-essential maintenance and/or repairs to capital infrastructure in order to save costs in the present. In the GNWT, maintenance competes for funding with other programs and is often deferred because appropriations are not available or were redirected to other higher priorities projects.
Department	Organizational entity established by Cabinet to deliver programs and services within a specified mandate.
Infrastructure	The permanent facilities and organization structure in place for the purpose of delivering government programs.
Infrastructure Contribution	A contribution made to a third party by the GNWT to purchase, construct, develop or acquire a Tangible Capital Asset, where the risks and rewards incident to ownership are retained by the third party.
Large Capital Asset	A Tangible Capital Asset with a total project cost of at least \$400,000.
Small Capital Asset	A Tangible Capital Asset with a total project cost of less than \$400,000, but greater than \$50,000.
Tangible Capital Asset	<p>A non-financial asset having physical substance that is acquired, constructed, developed and:</p> <ul style="list-style-type: none">• is held for use in the production or supply of goods, delivery of services or program outputs;• has a useful life extending beyond one fiscal year and is intended to be used on a continuing basis;• is intended to be used on a continuing basis;• is not intended for resale in the ordinary course of operations; and• cost is equal to, or greater than, \$50,000 <p>The major categories of tangible capital assets are:</p> <ul style="list-style-type: none">• Land (other than land acquired at no cost to the government);• Roads;• Bridges;• Ferries;• Airstrips and Aprons;• Buildings;• Water and Sewer Works;• Mainframe and software systems;• Leasehold Improvements;• Mobile and Heavy Equipment;• Major Medical Equipment; and;• Other Major Equipment.

Capital Planning Process

Capital Planning Process

The capital planning process is based on a government-wide approach.

The capital planning process provides for one Government of the Northwest Territories capital investment target with all Departmental projects competing for available funding. Projects are prioritized on a government-wide basis according to specified ranking criteria.

As of April 1, 2007, the Department of Municipal and Community Affairs (MACA) has implemented the New Deal for NWT Community Governments. As part of this initiative, Community Governments are provided with responsibility for planning, managing and owning their Community Public Infrastructure. Beginning in the 2007-2008 fiscal year, Municipal and Community Affairs has flowed infrastructure funding through a Capital Formula to Community Governments. As Community Governments retain the risks and rewards incident to ownership of the assets, this funding is recorded as Infrastructure Contributions and is not part of the Government of the Northwest Territories' estimates for the acquisition of tangible capital assets.

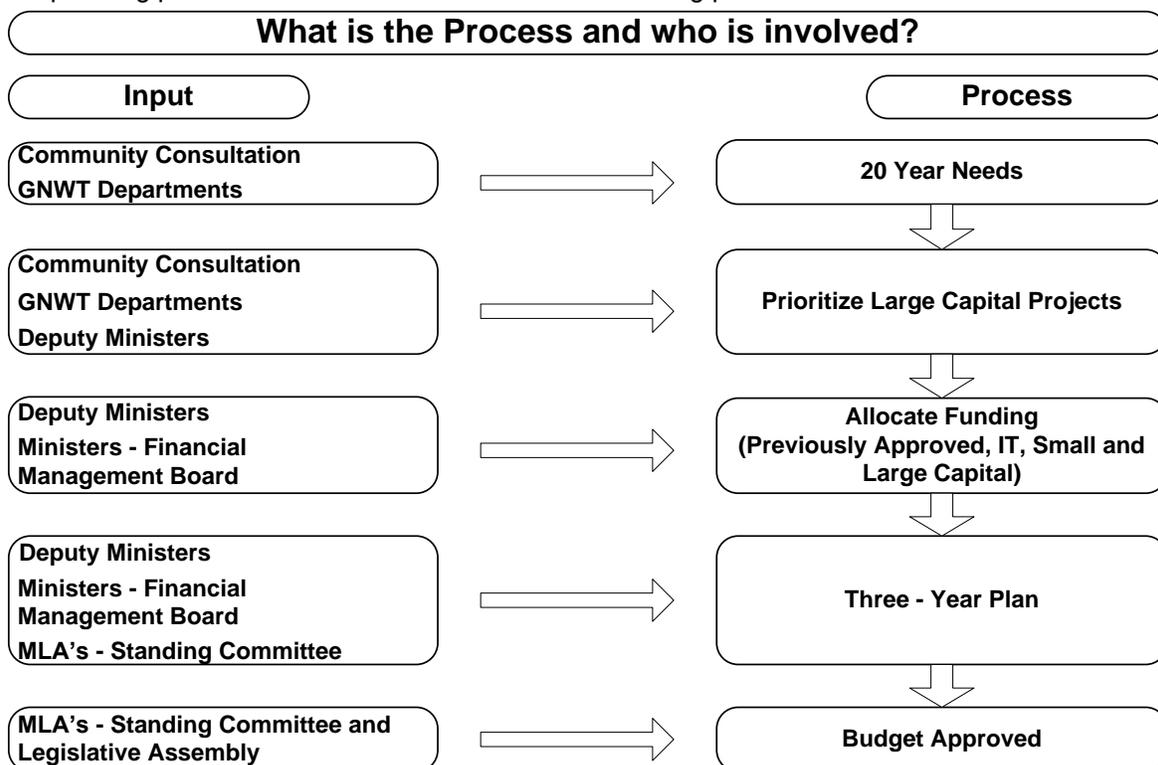

The primary criteria for ranking projects in order of priority are:

1. Protection of People;
2. Protection of Assets;
3. Protection of Environment;
4. Financial Investment; and,
5. Program Needs or Requirement.

Secondary criteria are used to further assess the urgency of projects, within each of the primary criteria. The secondary criteria are as follows:

1. Direct Impact Scale – how many impacted?
2. Severity of Impact – what is the impact?
3. Urgency – how soon is it needed?
4. Mitigation – what else can be done?

The capital planning process can be summarized from the following process chart:

Capital Planning Process

Community Consultations

As seen from the capital planning process chart, the community consultation is an important element of the capital planning process.

Departments typically conduct community consultations prior to the start of the capital planning process on an annual basis. To better address community needs, an enhanced community consultation process was adopted in 2006 for the 2007-08 capital planning process. This enhanced process to be undertaken every two years, includes visits to each NWT community by GNWT representatives to explain the capital planning process. The objectives of these visits are to:

- coordinate consultation between departments and the communities;
- ensure communities understood the information provided and the processes involved in developing the three-year plan; and,
- ensure communities concerns are heard and responded to.

In the years where the more extensive community consultation process is not planned, departments will continue to consult with their respective stakeholders, as appropriate, but with a focus on updating their existing capital needs.

Regardless of the approach undertaken in any year, the community consultation process adheres to the following general objectives:

1. Communities will be consulted annually on their capital needs;
2. If required or requested, explanations on the allocation of resources for capital investment, and the application of priority criteria, along with the political and other influences on the process, will be provided; and,
3. Direct feedback on the consultations will be provided, including feedback to communities on the inclusion or exclusion of community projects in the capital plan or capital needs assessment and a follow-up meeting with the communities to explain the capital plan and disposition of their proposed projects, if requested.
