Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

1. AUTHORITY, OPERATIONS AND REPORTING ENTITY

(a) Authority and operations

The Government of the Northwest Territories (the Government) operates under the authority of the *Northwest Territories Act* (Canada). The Government has an elected Legislative Assembly which authorizes all disbursements, advances, loans and investments unless specifically authorized by statute.

(b) Reporting entity

The Government prepares consolidated financial statements. They are presented in Section I of the Public Accounts and provide an accounting of the full nature and extent of the financial affairs and resources for which the Government is responsible. The reporting entity is defined in those statements. These financial statements have been prepared on a non-consolidated basis to show the operating results of the Government separate from the entities included in the consolidated financial statements.

These financial statements include the assets, liabilities and operating results of the Government and its revolving funds. Revolving funds are established by the Government to provide the required working capital to deliver goods and services to the general public and to Government departments.

The following related Territorial Crown Corporations, boards and agencies are included in these statements only to the extent of the Government's contributions to, or revenues from, them:

Aurora College

Divisional Educational Councils and District Education Authorities

Hospitals and Regional Health Boards

Northwest Territories Business Development and Investment Corporation

Northwest Territories Housing Corporation

Northwest Territories Human Rights Commission

Northwest Territories Hydro Corporation

Northwest Territories Opportunities Fund

Status of Women Council of the Northwest Territories

Tlicho Communities Services Agency

(c) Main Estimates

The main estimates are the appropriations approved by the Legislative Assembly. They represent the Government's original fiscal plan for the year and do not reflect Supplementary Appropriations.

The estimated supplementary requirements and the estimated appropriation authority lapse are included in the Main Estimates on the statement of operations and accumulated surplus. They are included for the purpose of comparing the actual operating surplus (deficit) to the estimated operating surplus (deficit).

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

2. SIGNIFICANT ACCOUNTING POLICIES

(a) Measurement Uncertainty

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires the Government to make estimates and assumptions that affect the amounts of assets, liabilities, revenues and expenses reported in the financial statements. By their nature, these estimates are subject to measurement uncertainty. The effect on the financial statements of changes to such estimates and assumptions in future periods could be significant, although, at the time of preparation of these statements, the Government believes the estimates and assumptions to be reasonable.

The more significant management estimates relate to employee future benefits, environmental liabilities, contingencies, revenue accruals, valuation allowances for accounts receivable and loans receivable, and amortization expense. Other estimates, such as the Canada Health Transfer and Canada Social Transfer payments and Corporate and Personal Income Tax revenue are based on estimates made by Canada's Department of Finance and are subject to adjustments in future years.

(b) Cash and cash equivalents

Cash and cash equivalents are comprised of bank account balances net of outstanding cheques and short-term highly liquid investments that are readily convertible to cash with a maturity date of 90 days or less from the date of acquisition.

(c) Portfolio investments

Portfolio investments are long-term investments in organizations that do not form part of the government reporting entity and are accounted for by the cost method. Such investments are normally in shares and bonds of the investee. When there has been a loss in value of a portfolio investment that is other than a temporary decline, the investment is written down to recognize the loss and is included as a component of investment income. Interest income is recorded on the accrual basis, dividend income is recognized as it is declared, and capital gains and losses are recognized when realized.

(d) Inventories

Inventories for resale consist of bulk fuels and liquor products. Bulk fuels are valued at the lower of weighted average cost and net realizable value. Liquor products are valued at the lower of cost and net realizable value. Other inventories are valued at the lower of cost, determined on a first in, first out basis and net replacement value.

(e) Prepaid expenses

Prepaid expenses are advance payments made prior to year end to meet April 1 deadlines or a portion of a payment, such as insurance or licensing fees, related to future years.

(f) Loans receivable

Loans receivable and advances are stated at the lower of cost and net recoverable value. Valuation allowances, which are recorded to reduce loans receivable, are based on past events, current conditions and all circumstances known at the date of the preparation of the financial statements. Valuation allowances are determined on an individual basis. Interest revenue is recorded on an accrual basis. Interest revenue is not accrued when the collectibility of either principal or interest is not reasonably assured.

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Investment in the Northwest Territories Hydro Corporation

The Northwest Territories Hydro Corporation and its subsidiaries are wholly owned and accountable to the Government, and provide utility services in the Northwest Territories. The net assets of the Corporations have been recorded at nominal value.

(h) Non-financial assets

Tangible capital and other non-financial assets are accounted for as assets by the Government as they can be used to provide government services in future periods. These assets do not normally provide resources to discharge the liabilities of the Government unless they are sold.

(i) Tangible capital assets and leases

Tangible capital assets are buildings, roads, equipment, etc. whose life extends beyond the fiscal year, original cost exceeds \$50 and are intended to be used on an ongoing basis for delivering programs and services. Individual assets less than \$50 are expensed when purchased. Tangible capital assets are recorded at cost, or where actual cost was not available, estimated current replacement cost converted back to the date of purchase by discounting current year dollars for inflation. Gifted and cost shared tangible capital assets from the Government of Canada are recorded at fair market value upon receipt, with the gifted or cost shared portion shown as a deferred capital contribution. This deferred capital contribution is amortized as revenue on the same basis as the related asset is amortized. Tangible capital assets, when placed in service are amortized on a straight line basis over their estimated useful life as follows:

Asset category	Amortization period
Land	Not amortized
Roads and bridges	40 years
Airstrips and aprons	40 years
Buildings	40 years
Ferries	25 years
Water/sewer works	15 - 25 years
Mainframe and software systems	5 - 10 years
Mobile and heavy equipment	7 - 15 years
Major equipment	5 - 15 years
Medical equipment	5 - 15 years
Leasehold improvements	Lesser of useful life or lease term plus renewal option

Estimates of the useful lives of tangible capital assets are reviewed on a regular basis and revised where appropriate. The remaining unamortized portion of a tangible capital asset may be extended beyond its original estimated useful life when the appropriateness of a change can be clearly demonstrated.

Tangible capital assets under construction or development are recorded as work in progress with no amortization until the asset is placed in service. Capital lease agreements are recorded as a liability and a corresponding asset based on the present value of any payments due. The present value is based on the specified rate or the government's borrowing rate at the time the obligation is incurred. Operating leases are charged to expenses. Works of art, historical treasures and crown lands are not recorded.

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(j) Pensions and other employee future benefits

All eligible employees participate in the Public Service Pension Plan administered by the Government of Canada. The Government's contributions are charged as an expense on a current year basis and represent the total pension obligations. The Government is not required under present legislation to make contributions with respect to actuarial deficiencies of the Public Service Pension Plan.

Pension benefits to Members of the Legislative Assembly and judges are reported on an actuarial basis. This is done to determine the current value of future entitlement and uses various estimates. When actual experience varies from estimates, the adjustments needed are amortized on a straight line basis over the estimated average remaining service lives of the contributors.

Under the terms and conditions of employment, government employees may earn non-pension benefits for resignation, severance and removal costs based on years of service. The benefits are paid upon resignation, retirement or death of an employee. The expected cost of providing these benefits is recognized as employees render service. Termination benefits are also recorded when employees are identified for lay-off. The cost of the benefits has been determined based on management's best estimates using expected compensation levels and employee leave credits.

(k) Contractual obligations and contingencies

The nature of the Government's activities requires entry into contracts that are significant in relation to its current financial position or that will materially affect the level of future expenses. Contractual obligations pertain to funding commitments for operating, commercial and residential leases, and capital projects. Contractual obligations are obligations of a government to others that will become liabilities in the future when the terms of those contracts or agreements are met.

The contingencies of the Government are potential liabilities, which may become actual liabilities when one or more future events occur or fail to occur. If the future event is considered likely to occur and is quantifiable, an estimated liability is accrued. If the occurrence of the confirming future event is likely but the amount of the liability cannot be reasonably estimated, the contingency is disclosed. If the occurrence of the confirming future event is not determinable, the contingency is disclosed.

(l) Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars using exchange rates at year-end. Foreign currency transactions are translated into Canadian dollars using rates in effect at the time the transactions were entered into. All exchange gains and losses are included in net income for the year according to the activities to which they relate.

(m) Projects on behalf of third parties

The Government undertakes projects for the Government of Canada, the Government of Nunavut and others. Where possible the Government receives accountable advances and any unexpended balances remaining at year end are recorded as current liabilities. Recoveries are accrued when expenses, as allowed under the project contract, exceed advances.

(n) Grant from the Government of Canada

The grant from the Government of Canada is calculated using a three-year moving average of personal and corporate income taxes (with a two year delay), fuel taxes, tobacco tax and alcoholic beverage revenues. In addition, changes in national average tax rates, population and growth in provincial, territorial and local government spending are considered in the funding calculation. The grant is estimated once for each fiscal year and is not revised.

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(o) Transfer payments

Government transfers for non-specified purposes are recognized as revenue in the period in which the events giving rise to the transfer occurred, as long as the transfer is authorized, eligibility criteria have been met and a reasonable estimate of the amount can be made. Transfers received before these criteria are fully met are recorded as deferred revenue. The Canada Health Transfer is determined by a formula that includes population and personal and corporate income taxes. Revisions to these variables result in prior year adjustments being included in current year revenues.

(p) Taxes and general revenues

Corporate and personal income tax revenue is recognized on an accrual basis. Taxes, under the *Income Tax Act*, are collected by the Government of Canada on behalf of the Government under a tax collection agreement. The Government of Canada remits these taxes monthly based on Canada's Department of Finance's estimates for the taxation year, which are periodically adjusted until the income tax assessments for that year are final. Income tax estimates, determined by the Government of Canada, combine actual assessments with an estimate that assumes that previous years' income tax allocation will be sustained and are subject to revisions in future years. Differences between current estimates and future actual amounts can be significant. Any such differences are recognized when the actual tax assessments are finalized.

Fuel, tobacco, payroll and property taxes are levied under the authority of the *Petroleum Products Tax Act*, the *Tobacco Tax Act*, the *Payroll Tax Act*, and the *Property Assessment and Taxation Act*, respectively. Fuel and Tobacco Tax revenues are recognized on an accrual basis, based on statements received from collectors. Payroll Tax is recognized on an accrual basis, based on revenue of the prior year. Property tax and school levies are assessed on a calendar year basis and are recognized in the fiscal year in which the billing occurs. Adjustments arising from reassessments are recorded in revenue in the year they are identified. All other revenues are recognized on an accrual basis.

(q) Expenses

Grants and contributions are recognized as expenses in the period in which the events giving rise to the grant or contribution occurred, as long as the grant or contribution is authorized, eligibility criteria have been met and a reasonable estimate of the amount can be made. All other expenses are recognized on an accrual basis.

(r) Environmental liabilities

Environmental liabilities consist of the estimated costs related to the management and remediation of environmentally contaminated sites. For contaminated sites, a liability is accrued and an expense recorded based on management's best estimates when the contamination occurs or when the Government becomes aware of the contamination and is obligated, or is likely obligated, to incur such costs. If the likelihood of the Government's obligation to incur these costs is either not determinable, or if an amount cannot be reasonably estimated, the contingency is disclosed in the notes to the financial statements.

(s) Recoveries of prior years' expenses

Recoveries of prior years' expenses and reversals of prior years' expense accruals are reported separately from other revenues on the statement of operations and accumulated surplus. Pursuant to the *Financial Administration Act*, these recoveries cannot be used to increase the amount appropriated for current year expenses.

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

3. CASH AND CASH EQUIVALENTS

(a) Investment Pool

The Government has a line of credit provided by a chartered bank, secured by the Consolidated Revenue Fund of the Government. There are no fixed repayment terms and the overdraft limits are negotiated over the year based on the forecasted cash flows and borrowing requirements of the Government. Interest is only charged when there is a net overdraft balance of the Government and its investment pool participants. The overdraft interest rate is based on prime and fluctuates during the year. Interest paid in 2012 by the investment pool was \$ nil (2011 - nil). The average borrowing rate during the year would have been 3.250% (2011 - 3.134%). As at March 31, 2012 the investment pool had no net overdraft balance (2011 - nil).

As of March 31, 2012, on a cash basis, the Government's share in the investment pool was a deficit of \$22,008 (2011 - \$47,954). When taking into account \$7,122 classified as in-trust and \$264 of outstanding items, the bank overdraft, on an accounting basis, becomes \$29,394. The Government's cash deficit related to the investment pool carried interest at a rate of 2.5% and \$561 was paid to it.

The surplus cash (deficit) of the Government is pooled with the surplus cash of certain Territorial Crown Corporations, and other public agencies. This investment pool is invested in a diversified portfolio of high grade, short and long term income producing assets.

Excluding designated investments, at March 31, 2012 the investment pool had total investments of \$115 (2011 - \$(1,372)). The eligible classes of securities, categories of issuers, limits and terms are approved under the Government's investment guidelines, *Financial Administration Act* and Investment Regulations. All short-term instruments, depending on the investment class, are rated R-1 Low or better from the Dominion Bond Rating Service Ltd. Investments are diversified, limiting them to a maximum of 10% to 50% of the total portfolio depending on the type of investment. There is no significant concentration in any one investment.

At March 31, 2012 the average term to maturity was 0 days (2011 - 0 days). The portfolio yield for the year remained steady at 1.20% (2011 - 0.46% to 1.20%). In 2012, the Government earned interest on short-term investments of \$172 (2011 - \$280).

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

3. CASH AND CASH EQUIVALENTS (continued)

(b) Designated Assets

The Government has the following assets which are designated for specific purposes under legislation and regulations as follows:

as follows.	2012 \$	2011 \$
Student Loan Fund:	J	Φ
Authorized limit for loans receivable* Less: Loans receivable balance	36,000 (36,115)	36,000 (34,628)
Funds designated for new loans	(115)	1,372
Environment Fund:		
Beverage Container Program net assets	1,624	1,181
Portfolio Investments for the Legislative Assembly Supplementary Retiring Allowance and Judges Supplemental Pension Plans:		
Marketable securities (market value \$24,896; 2011 - \$24,891) Money Market (market value approximates cost) Cash and other assets (market value approximates cost)	23,121 390 744	23,232 222 570
	24,255	24,024
	25,764	26,577

^{*} As at March 31, 2012 the authorized limit for student loans was exceeded by \$115. Subsequent to March 31 the Legislative Assembly approved an increase of \$4,000 to the authorized limit bringing the authorized limit to \$40,000 for the March 31, 2013 fiscal year and beyond.

Pursuant to the *Student Financial Assistance Act*, the assets of the Student Loan Fund are to be used to provide financial assistance to post-secondary students that meet certain eligibility criteria as prescribed in Regulations.

Pursuant to the *Waste Reduction and Recovery Act*, the assets of the Environment Fund are to be used for specified purposes as follows:

- (a) the establishment, operation and evaluation of programs in respect of the reduction or recovery of waste;
- (b) education programs related to the reduction or recovery of waste;
- (c) research and development activities related to the reduction or recovery of waste;
- (d) the appropriate disposal of a designated or prohibited material as waste;
- (e) expenses associated with the work of the advisory committee; or
- (f) other costs associated with programs, initiatives or activities in respect of the reduction or recovery of waste.

The investment portfolio, while forming part of the Consolidated Revenue Fund, is designated for the purpose of meeting the obligations of the Legislative Assembly Supplementary Retiring Allowance and Judges Supplemental Pension Plans (note 12). Supplementary Retiring Allowance Regulations restrict the investments to those permitted under the Pension Benefits Standards Act.

13. PENSIONS

(a) Plans description

The Government administers the following pension plans for Members of the Legislative Assembly (MLAs) and Territorial Court Judges.

Plan recipient	Name of plan	Funded status
MLAs	Legislative Assembly Retiring Allowance Plan (MLAs Regular)	Funded
MLAs	Legislative Assembly Supplemental Retiring Allowance Plan (MLAs Supplemental)	Non Funded
Judges	Judges Registered Plan (Judges Regular)	Funded
Judges	Judges Supplemental Pension Plan (Judges Supplemental)	Non Funded

The Regular Plans for both the MLAs and Judges are contributory defined benefit registered pension plans and are prefunded. The funds related to these plans are administered by independent trust companies.

The Supplemental plans for both the MLAs and Judges are non-contributory defined benefit pension plans and are unfunded; however, the Government has made a voluntary restriction on assets for the purposes of meeting the obligations of the Supplemental plans.

The Government is liable for all benefits. Benefits provided under all four plans are based on years of service and pensionable earnings.

(d) Pension expense

The components of pension expense include current period benefit cost, amortization of actuarial gains/losses and interest on average accrued benefit obligation net of the return on plan assets and contributions from plan members. The total pension expense is \$3,554 (2011 - \$2,610). The interest cost on the accrued benefit obligation was determined by applying the discount rate determined at the beginning of the period to the average value of the accrued benefit obligation for the period. The expected return on plan assets was determined by applying the assumed rate of return on plan assets to the average market-related value of assets for the period. The difference between the expected return on plan assets and the actual return on plan assets was a gain of \$155 (2011 - \$740). In addition to the above, the Government contributed \$30,599 (2011 - \$30,241) to the Public Service Superannuation Plan. The employees' contributions to this plan were \$15,345 (2011 - \$13,743).

(e) Changes to pension plans in the year

Legislative Amendments

Bill 2 came into effect on September 1, 2011. It amended both the Retiring Allowances Act and the Supplementary Retiring Allowances Act. The primary change contained in Bill 2 relates to the pension calculation by service. For Members that leave the Assembly after October 18, 2007, the method used to calculate pensions has changed. Previously, pensions were calculated separately for each position (e.g. MLA, Chairperson, Minister) that a Member held for at least one year. The amendments revise the calculation so there is just one calculation for all years of service, with earnings from each position combined for the purposes of the pension calculation by service.

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

(f) Valuation methods and assumptions used in valuing pension liability

Valuation date

Actuarial valuations were last completed for the Legislative Assembly and Judges plans as of April 1, 2008 and April 1, 2010, respectively. As the actuarial valuations for the plans were not valued as at the year-end, the MLA's plans were extrapolated to January 31, 2012 and the Judges' plans were extrapolated to March 31, 2012. The effective date of the next actuarial valuation for the Legislative Assembly plans is April 1, 2012.

Liability valuation method

The actuarial valuations were performed using the projected accrued benefit method. The valuations are based on a number of actuarial assumptions about matters such as mortality, service, withdrawal, earnings and interest rates. The assumptions are based on the Government's best estimates of expected long-term rates and short-term forecasts.

Asset valuation method

The asset valuation method, market-related value, for the MLA's plans is equal to a smoothed market value which spreads the difference between the actual and expected investment income over a four year period and is then adjusted for payments due to, and payable from, the pension plan. The fair market value of the MLA's regular plan is \$20,010 (2011 - \$20,958). The asset valuation method for the Judges' plans is market value. The market value of the Judges' regular plan is \$4,082 (2011 - \$4,214).

Actuarial gains and losses

Actuarial gains and losses occur when actual experience varies from estimates. The adjustments needed are amortized on a straight line basis over the estimated average remaining service lives of the contributors. The expected average remaining service lives of the contributors is 3 years for the MLA's plans and 5.9 years for the Judges' plans.

Lagislativa

Actuarial assumptions

Legislative	
Assembly plans	Judges' plans
6.0%	6.0%
3.0%	4.0%
3.0%	3.0%
6.0%	4.0%
	Assembly plans 6.0% 3.0% 3.0%

Retirement assumptions

- Members of Legislative Assembly at later of age 50, 4 years of service, and end of current session.
- Judges at the earlier of age 60 or when age plus service equals 80.

Notes to Non-Consolidated Financial Statements (unaudited)

(All figures in thousands of dollars)

14. OTHER EMPLOYEE FUTURE BENEFITS

In addition to pension benefits, the Government provides termination and removal benefits to its employees. This benefit plan is not pre-funded and thus has no assets, resulting in a plan deficit equal to the accrued benefit obligation. The expected payments during the next fiscal year are \$3,411 (2011 - \$2,950).

	2012 \$	2011 \$
Resignation and retirement	21,866	19,969
Removal	7,539	7,345
	29,405	27,314

15. DEFERRED CAPITAL CONTRIBUTIONS

Deferred capital contributions relate to the portion of a tangible capital asset that was gifted from or cost-shared with the Government of Canada. The most significant of these assets are roads and airports. The capital contributions are deferred and amortized to revenue over the same life as the related asset.

	2012 \$	2011 \$
Deferred capital contributions at beginning of year	288,826	254,927
Add: Assets gifted or cost shared during the year	17,316	47,165
Less: Amortization of capital contributions	(14,968)	(13,266)
Deferred capital contributions at end of year	291,174	288,826

16. PETROLEUM PRODUCTS STABILIZATION FUND

The Petroleum Products Stabilization Fund is included in the accumulated surplus. The purpose of the Fund is to stabilize the prices of petroleum products purchased, sold and distributed by the Government. The annual net profit or loss of the Petroleum Products Revolving Fund is charged to the Stabilization Fund. The accumulated surplus or deficit balance in the fund cannot exceed \$1,000.

	2012 \$	2011 \$
Surplus at beginning of the year	649	636
Add: Petroleum Products Stabilization Fund Net profit (loss) for the year	(281)	13
Surplus at end of the year	368	649

Chargeback of Services

The Government has 3 (2011 - 3) cost recovery service agreements with the Government of Nunavut for the provision of various corporate and program delivery services. The expenses on and costs recovered from these projects on behalf of the Government of Nunavut are estimated at \$3,313 for the fiscal year ended 2012 (2011 - \$2,826).

^{*} In addition to this amount, the Northwest Territories Housing Corporation (NWTHC) has mortgages payable to the Canada Mortgage and Housing Corporation (CMHC) under the Social Housing Agreement. The mortgages mature between the years 2026 and 2027, bearing interest ranging from 2.78% to 3.68% (2011 2.78% to 3.68%). These mortgages relate to assets held by NWTHC in trust for CMHC; therefore, these liabilities are not included in the above listing.

The Government has also provided a guarantee to the Canadian Blood Services and Canadian Blood Services Captive Insurance Company Ltd. to cover a share of potential claims made by users of the national blood supply. The Government's share is limited to the ratio of the Northwest Territories' population to the Canadian population.

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

19. CONTINGENCIES (continued)

(b) Environmental liabilities

The Government recognizes that there are costs related to the remediation of environmentally contaminated sites for which the Government is responsible. The Government has identified 139 (2011 - 136) sites as potentially requiring environmental remediation at March 31, 2012. Where an estimate could be determined for remediation costs a liability has been recorded and included as a component of accounts payable and accrued liabilities.

One of the 139 sites, Giant Mine, has been formally designated as contaminated under the *Environmental Protection Act* (NWT). In 2005, the Government recorded a liability for its share of the above ground remediation. The balance of the Government's share of the Giant Mine remediation liability at March 31, 2012 is \$20,207 (2011 - \$20,321).

There are 26 active or decommissioned landfill sites that are outside incorporated communities, and therefore are the responsibility of the Government. As at March 31, 2012, a liability in the amount of \$1,102 (2011 - \$1,092) has been recorded for these sites using the method required by the Public Sector Accounting Standards.

Of the remaining 112 sites, 15 are airports or airport strips or reserves, 19 are sewage lagoons, 12 are fuel tanks and 6 are highways, the majority of which have been investigated but are still awaiting full environmental assessments. Remediation costs for the sites that are known to be contaminated and the Government is obligated to remediate are currently estimated at \$22,879 (2011 - \$21,046).

The Government's ongoing efforts to assess the remaining sites may result in additional environmental liabilities. These liabilities will be recorded in the year in which they become known.

(c) Claims and litigation

There are a number of claims and pending and threatened litigation cases outstanding against the Government. In certain of these cases, pursuant to agreements negotiated prior to the division of the territories, the Governments of the Northwest Territories and Nunavut will jointly defend the suits. The cost of defending these actions and any damages that may eventually be awarded will be shared by the two Governments 55.66% and 44.34%, respectively. The Government has recorded an allowance for any claim or litigation where it is likely that there will be a future payment and a reasonable estimate of the loss can be made. The Government's maximum exposure for those claims and litigation for which the outcome is not determinable has been estimated at \$2,520. No provision for such claims has been made in these financial statements as it is not determinable that any future event will confirm that a liability has been incurred as at March 31.

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

20. RELATED PARTIES

Transactions with related parties and balances at year-end, not disclosed elsewhere in the financial statements, are disclosed in this note. During the year the Government provided grants and contributions to the following related parties.

	2012	2011
	\$	\$
Aurora College	33,024	31,343
Divisional Education Councils and District Education Authorities	162,326	141,919
Health and Social Services Authorities	240,734	233,139
Northwest Territories Hydro Corporation	1,895	152
Northwest Territories Power Corporation	14,247	11,436
Northwest Territories Energy Corporation	250	2,100
Northwest Territories Business Development and Investment Corporation	3,704	3,042
Northwest Territories Housing Corporation	63,307	59,851
Northwest Territories Human Rights Commission	237	250
Status of Women Council of the Northwest Territories	526	408
	520,250	483,640

The Government funds communities, boards and agencies and other organizations offering services to the public. These organizations operate independently of normal Government operations. The Government may be held responsible for any liabilities or deficits on behalf of boards and agencies. An estimate of the potential liability, if any, cannot be determined.

Under agreements with related boards and agencies, the Government provides services at cost or for a service fee where direct costs cannot be determined. The fees charged for indirect costs are not necessarily the cost of providing those services. Services provided included personnel, payroll, financial, procurement, accommodation, buildings and works, utilities, legal and interpretation services.

The Government receives dividend revenue in return for its investment in the Northwest Territories Power Corporation. Dividend revenue for the current year is \$ nil (2011 - \$nil).

21. OVEREXPENDITURE

During the year 2 departments (2011 - 2) exceeded their vote for a total of \$592 (2011 - \$5,754). Overexpenditure of a vote contravenes subsection 32 of the Financial Administration Act which states that "No person shall incur an expenditure that causes the amount of the item set out in the Estimates on which the appropriation is based to be exceeded".

The voted items that were over expended in the current year are as follows:

Department of Transportation \$345 Department of Education, Culture & Employment \$247

Notes to Non-Consolidated Financial Statements (unaudited)

March 31, 2012

(All figures in thousands of dollars)

22. SUBSEQUENT EVENT

Subsequent to the year end, the Government approved and guaranteed long term borrowing for the Northwest Territories Power Corporation related to their issuance of \$25,000 in new debentures.

The Government entered into annual Water and Sewer Funding and Community Government Funding contribution agreements totaling \$57 million with community governments to assist them with provision of water and sewer services and municipal services, respectively.

23. COMPARATIVE FIGURES

Certain comparative figures have been reclassified to conform with the financial statement presentation adopted for the current year.

GOVERNMENT OF THE NORTHWEST TERRITORIES FOR THE YEAR ENDED MARCH 31, 2012

SECTION I

CONSOLIDATED FINANCIAL STATEMENTS

 $\label{thm:constraints} \textbf{Honourable J. Michael Miltenberger}$

Minister of Finance

THE HONOURABLE GEORGE L. TUCCARO COMMISSIONER OF THE NORTHWEST TERRITORIES

I have the honour to present the Public Accounts of the Northwest Territories in accordance with Sections 27 through 31 of the *Northwest Territories Act (Canada)*, R.S.C. 1985, c. N-27, and Sections 72 through 74 of the *Financial Administration Act*, R.S.N.W.T. 1988, c. F-4, for the fiscal year ended March 31, 2012.

Honourable J. Michael Miltenberger

Schedule B - Consolidated Schedule of Segmented Information	42

RESPONSIBILITY FOR FINANCIAL REPORTING

The preparation of the consolidated financial statements of the Government of the Northwest Territories, and related information contained in the Public Accounts, is the responsibility of the Government through the Office of the Comptroller General.

The consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP) for the public sector. Where GAAP permits alternative accounting methods, management has chosen those that are most appropriate. Where required, management's best estimates and judgment have been applied in the preparation of these financial statements.

The Government fulfills its accounting and reporting responsibilities, through the Office of the Comptroller General, by maintaining systems of financial management and internal control. The systems are continually enhanced and modified to provide timely and accurate information, to safeguard and control the Government's assets, and to ensure that all transactions are in accordance with the *Financial Administration Act*.

The Auditor General of Canada performs an annual audit on the consolidated financial statements in order to express an opinion as to whether the consolidated financial statements present fairly, in all material respects, the financial position of the Government, the change in its net financial debt, the results of its operations and its cash flows for the year. During the course of the audit, he also examines transactions that have come to his notice, to ensure they are, in all significant respects, within the statutory powers of the Government and those organizations included in the consolidation.

Warren St. Germaine Comptroller General

Government of the Northwest Territories

November 30, 2012

INDEPENDENT AUDITOR'S REPORT

To the Legislative Assembly of the Northwest Territories

Report on the Consolidated Financial Statements

I have audited the accompanying consolidated financial statements of the Government of the Northwest Territories, which comprise the consolidated statement of financial position as at 31 March 2012, and the consolidated statement of operations and accumulated surplus, consolidated statement of change in net debt and consolidated statement of cash flow for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Canadian public sector accounting standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express an opinion on these consolidated financial statements based on my audit. I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Opinion

In my opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Government of the Northwest Territories as at 31 March 2012, and the results of its operations, changes in its net debt, and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

Report on Other Legal and Regulatory Requirements

As required by the *Northwest Territories Act*, I report that, in my opinion, Canadian public sector accounting standards have been applied on a basis consistent with that of the preceding year.

Further, in my opinion, proper books of account have been kept by the Government of the Northwest Territories and the consolidated financial statements are in agreement therewith. In addition, the transactions of the Government of the Northwest Territories and of those organizations listed in note 1 to the consolidated financial statements that have come to my notice during my audit of the consolidated financial statements have, in all significant respects, been in accordance with the Government of the Northwest Territories' powers under the Northwest Territories Act and regulations, the Financial Administration Act of the Northwest Territories and regulations and the specific operating authorities disclosed in note 1 to the consolidated financial statements.

Michael Ferguson, FCA Auditor General of Canada

(All figures in thousands of dollars)

1. AUTHORITY AND OPERATIONS

(a) Authority and reporting entity

The Government of the Northwest Territories (the Government) operates under the authority of the *Northwest Territories Act* (Canada). The Government has an elected Legislative Assembly which authorizes all disbursements, advances, loans and investments unless specifically authorized by statute.

The consolidated financial statements have been prepared in accordance with the *Northwest Territories Act* (Canada) and the *Financial Administration Act* of the Northwest Territories. The consolidated financial statements present summary information and serve as a means for the Government to show its accountability for the resources, obligations and financial affairs for which it is responsible. The following chart lists the organizations comprising the Government reporting entity, how they are accounted for in the consolidated financial statements and their specific operating authority.

Public Agencies fully consolidated:

Education Act

Beaufort Delta Divisional Education Council

Commission scolaire francophone de division

Deh Cho Divisional Education Council

Dettah District Education Authority

Sahtu Divisional Education Council

South Slave Divisional Education Council

Yellowknife Catholic Schools District Education Authority

Yellowknife Education District No.1 District Education Authority

Aurora College Act

Aurora College

Hospital Insurance and Health and Social Services Administration Act

Beaufort Delta Health and Social Services Authority

Deh Cho Health and Social Services Authority

Fort Smith Health and Social Services Authority

Hay River Health and Social Services Authority

Sahtu Health and Social Services Authority

Stanton Territorial Health Authority

Yellowknife Health and Social Services Authority

Tlicho Community Services Agency Act

Tlicho Community Services Agency

Northwest Territories Business Development and Investment Corporation Act

Status of Women Council of the Northwest Territories

Government Business Enterprise consolidated on the modified equity basis:

Northwest Territories Hydro Corporation Act

Northwest Territories Hydro Corporation

Notes to Consolidated Financial Statements

March 31, 2012

(All figures in thousands of dollars)

1. AUTHORITY AND OPERATIONS (continued)

All organizations included in the Government reporting entity have a March 31 fiscal year-end with the exception of Aurora College, Divisional Education Councils and District Education Authorities, which have a fiscal year-end of June 30. Transactions of these educational organizations that have occurred during the period to March 31, 2012 and that significantly affect the consolidation have been recorded. Revolving funds are incorporated directly into the Government's accounts while trust assets administered by the Government on behalf of other parties (note 19) are excluded from the Government reporting entity. Revolving Funds are segments of the Government that are engaged in commercial activities, with undefined and non-lapsing expense appropriations.

(b) Budget

The consolidated budget figures are the appropriations approved by the Legislative Assembly and the approved budgets for the consolidated entities, adjusted to eliminate budgeted inter-entity revenues and expenses. They represent the Government's original consolidated fiscal plan for the year and do not reflect supplementary appropriations.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

These financial statements are prepared in accordance with Canadian public sector accounting standards.

(a) Measurement uncertainty

The preparation of financial statements in accordance with Canadian public sector accounting standards requires the Government to make estimates and assumptions that affect the amounts of assets, liabilities, revenues and expenses reported in the financial statements. By their nature, these estimates are subject to measurement uncertainty. The effect on the financial statements of changes to such estimates and assumptions in future periods could be significant, although, at the time of preparation of these statements, the Government believes the estimates and assumptions to be reasonable.

The more significant management estimates relate to employee future benefits, environmental liabilities, contingencies, revenue accruals, valuation allowances for accounts receivable and loans receivable, and amortization expense. Other estimates, such as the Canada Health Transfer and Canada Social Transfer payments and Corporate and Personal Income Tax revenue are based on estimates made by the Government of Canada's Department of Finance and are subject to adjustments in future years.

(b) Cash and cash equivalents

Cash and cash equivalents are comprised of bank account balances, net of outstanding cheques, and short-term highly liquid investments that are readily convertible to cash with a maturity date of 90 days or less from the date of acquisition.

(c) Portfolio investments

Portfolio investments are long-term investments in organizations that do not form part of the government reporting entity and are accounted for by the cost method. Such investments are normally in shares and bonds of the investee. When there has been a loss in value of a portfolio investment that is other than a temporary decline, the investment is written down to recognize the loss and it is included as a component of investment income. Interest income is recorded on the accrual basis, dividend income is recognized as it is declared, and capital gains and losses are recognized when realized.

Notes to Consolidated Financial Statements

March 31, 2012

(All figures in thousands of dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Inventories

Inventories for resale consist of bulk fuels, liquor products, and arts and crafts. Bulk fuels are valued at the lower of weighted average cost and net realizable value. Liquor products are valued at the lower of cost and net realizable value. Other inventories, including housing materials and supplies, are valued at the lower of cost, determined on a first in, first out basis, and net replacement value.

(e) Loans receivable

Loans receivable are stated at the lower of cost and net recoverable value. Valuation allowances, determined on an individual basis, are based on past events, current conditions and all circumstances known at the date of the preparation of the financial statements and are adjusted annually to reflect the current circumstances by recording write downs or recoveries, as appropriate. Interest revenue is recorded on an accrual basis. Interest revenue is not accrued when the collectibility of either principal or interest is not reasonably assured.

(f) Investment in Northwest Territories Hydro Corporation

The Northwest Territories Hydro Corporation ("the Corporation") and its subsidiaries are accountable to the Government, sell goods and services to the public, can contract in their own name and can maintain themselves without Government support. They are accounted for in these financial statements using the modified equity method. The Government reports only its investment in, and the consolidated net income of, the Corporation. Amounts receivable or payable from the Corporation are disclosed in the notes to these financial statements.

(g) Non-financial assets

Tangible capital and other non-financial assets are accounted for as assets by the Government as they can be used to provide government services in future periods. These assets do not normally provide resources to discharge the liabilities of the government unless they are sold.

(h) Tangible capital assets and leases

Tangible capital assets are buildings, roads, equipment, etc. whose life extends beyond the fiscal year, original cost exceeds \$50 and are intended to be used on an ongoing basis for delivering programs and services. Individual assets less than \$50 are expensed when purchased. Tangible capital assets are recorded at cost (including qualifying interest expense), or where actual cost was not available, estimated current replacement cost, discounted back to the acquisition date. Gifted and cost-shared tangible capital assets from the Government of Canada are recorded at their fair market value, upon receipt, with the gifted or cost-shared portion shown as a deferred capital contribution. This deferred capital contribution is amortized as revenue on the same basis as the related asset is amortized. Assets, when placed in service, are amortized on a straight-line basis over their estimated useful lives as follows:

Asset category	Amortization period
Land	Not amortized
Roads and bridges	40 years or less
Airstrips and aprons	40 years or less
Buildings	40 years or less
Ferries	25 years or less
Water/sewer works	15 - 25 years
Mainframe and software systems	5 - 10 years
Mobile and heavy equipment	7 - 15 years
Major equipment	5 - 15 years
Medical equipment	5 - 15 years
Leasehold improvements	Lesser of useful life or lease term plus renewal option

Notes to Consolidated Financial Statements

March 31, 2012

(All figures in thousands of dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(h) Tangible capital assets and leases (continued)

The estimate of the useful life of tangible capital assets is reviewed on a regular basis and revised where appropriate. The remaining unamortized portion of a tangible capital asset may be extended beyond its original estimated useful life when the appropriateness of such a change can be clearly demonstrated.

Tangible capital assets under construction or development are recorded as work in progress with no amortization until the asset is placed in service. Capital lease agreements are recorded as a liability and a corresponding asset based on the present value of any payments due. The present value is based on the specified rate or the lower of the implicit rate or the Government's borrowing rate at the time the obligation is incurred. Operating leases are charged to expenses. All intangibles, works of art, historical treasures and Crown lands are not recorded.

(i) Pensions and other employee future benefits

All eligible employees participate in the Public Service Pension Plan administered by the Government of Canada. The Government's contributions are charged as an expense on a current year basis and represent the total pension obligations. The Government is not required under present legislation to make contributions with respect to actuarial deficiencies of the Public Service Pension Plan.

Pension benefits to Members of the Legislative Assembly and judges are reported on an actuarial basis. This is done to determine the current value of future entitlement and uses various estimates. When actual experience varies from estimates, the adjustments are amortized on a straight-line basis over the estimated average remaining service lives of the contributors.

Under the terms and conditions of employment, government employees may earn non-pension benefits for resignation, severance and removal costs based on years of service. The benefits are paid upon resignation, retirement or death of an employee. The expected cost of providing these benefits is recognized as employees render service. Termination benefits are also recorded when employees are identified for lay-off. The cost of the benefits has been determined based on management's best estimates using expected compensation levels and employee leave credits.

(j) Contractual obligations and contingencies

The nature of the Government's activities requires entry into contracts that are significant in relation to its current financial position or that will materially affect the level of future expenses. Contractual obligations pertain to funding commitments for operating, commercial and residential leases, and capital projects. Contractual obligations are obligations of a government to others that will become liabilities in the future when the terms of those contracts or agreements are met.

The contingencies of the Government are potential liabilities which may become actual liabilities when one or more future events occur or fail to occur. If the future event is considered likely to occur and is quantifiable, an estimated liability is accrued. If the occurrence of the confirming future event is likely but the amount of the liability cannot be reasonably estimated, the contingency is disclosed. If the occurrence of the confirming future event is not determinable, the contingency is disclosed.

(k) Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars using exchange rates at year-end. Foreign currency transactions are translated into Canadian dollars using rates in effect at the time the transactions were entered into. All exchange gains and losses are included in net income for the year according to the activities to which they relate.

Notes to Consolidated Financial Statements

March 31, 2012

(All figures in thousands of dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(I) Projects on behalf of third parties

The Government undertakes projects for the Government of Canada, the Government of Nunavut and others. Where possible, the Government receives accountable advances and any unexpended balances remaining at year-end are recorded as liabilities. Recoveries are accrued when expenses, as allowed under the project contract, exceed advances.

(m) Grant from the Government of Canada

The Grant from the Government of Canada is calculated as the Gross Expenditure Base, offset by eligible revenues, which are a three-year moving average, lagged two years, of personal and corporate income taxes, fuel taxes, tobacco tax, payroll tax, and alcoholic beverage revenues at national average tax rates, and a revenue block of other own-source revenues. Population growth rates and growth in provincial/local government spending are variables used to determine the Gross Expenditure Base. The Grant is calculated once for each fiscal year and is not revised, with all payments flowing to the Government prior to the end of the fiscal year.

(n) Transfer payments

Government transfers are recognized as revenue in the period in which the events giving rise to the transfer occurred, as long as the transfer is authorized, eligibility criteria have been met and a reasonable estimate of the amount can be made. Transfers received before these criteria are fully met are recorded as deferred revenue.

(o) Taxes and general revenues

Corporate and Personal Income tax revenue is recognized on an accrual basis. Taxes, under the *Income Tax Act*, are collected by the Government of Canada on behalf of the Government under a tax collection agreement. The Government of Canada remits these taxes monthly based on Canada's Department of Finance's estimates for the taxation year, which are periodically adjusted until the income tax assessments for that year are final. Income tax estimates, determined by the Government of Canada, combine actual assessments with an estimate that assumes that previous years' income tax allocations will be sustained and are subject to revisions in future years. Differences between current estimates and future actual amounts can be significant. Any such differences are recognized when the actual tax assessments are finalized.

Fuel, tobacco, payroll and property taxes are levied under the authority of the *Petroleum Products Tax Act*, the *Tobacco Tax Act*, the *Payroll Tax Act*, and the *Property Assessment and Taxation Act*, respectively. Fuel and tobacco tax revenues are recognized on an accrual basis, based on statements received from collectors. Payroll tax is recognized on an accrual basis, based on revenue of the prior year. Property tax and school levies are assessed on a calendar year basis and are recognized in the fiscal year in which the billing occurs. Adjustments arising from reassessments are recorded in revenue in the year they are identified. All other revenues are recognized on an accrual basis.

(p) Expenses

Grants and contributions are recognized as expenses in the period in which the events giving rise to the grant or contribution occurred, as long as the grant or contribution is authorized, eligibility criteria have been met and a reasonable estimate of the amount can be made. All other expenses are recognized on an accrual basis.

Notes to Consolidated Financial Statements

March 31, 2012

(All figures in thousands of dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(q) Environmental liabilities

Environmental liabilities consist of the estimated costs related to the management and remediation of environmentally contaminated sites. For contaminated sites, a liability is accrued and an expense recorded based on management's best estimates when the contamination occurs or when the Government becomes aware of the contamination and is obligated, or is likely obligated, to incur such costs. If the likelihood of the Government's obligation to incur these costs is either not determinable, or if an amount cannot be reasonably estimated, the contingency is disclosed in the notes to the financial statements.

(r) Recoveries of prior years' expenses

Recoveries of prior years' expenses and reversal of prior years' expense accruals are reported separately from other revenues on the consolidated statement of operations and accumulated surplus. Pursuant to the *Financial Administration Act*, these recoveries cannot be used to increase the amount appropriated for current year expenses.

(s) Segmented information

The Government reports on segments on the basis of the accountability relationships of its operations. Segmented information is disclosed in Schedule B. Segments are identified by the nature of an entity's operations and the accountability relationship that a group of similar entities has with the Government.

Government departments are identified as one segment to reflect the direct accountability relationship for financial reporting and budgeting between departments, their respective Ministers and the Legislative assembly. There are no significant allocations of revenues or expenses between segments.

Entities considered Government Business Enterprises for financial reporting purposes are identified as another segment since the nature of their operations is substantially different from the Government and the other entities within the Government Reporting Entity.

Other Public Agencies within the Government Reporting Entity represent another segment. These agencies are typically associated with a particular Government department and have a formalized reporting relationship to that department. For example, Health and Social Services Authorities have an accountability relationship to the Minister of Health and Social Services as well as to their respective board members. The agencies in this segment operate on a not-for-profit basis and assist the Government in delivering its programs and services and in achieving its priorities.

(t) Future accounting changes

The Public Sector Accounting Board (PSAB) approved Section PS 3410, Government Transfers in March 2011 which revises and replaces the existing standard. The new standard requires a recipient to recognize a transfer in revenue when it has been authorized and the recipient has met all eligibility criteria set by the transferor, unless the transfer creates a liability for the recipient. In some cases a liability may exist because the transfer stipulations direct the use of the funds for specific purposes. In other cases, a liability may exist because the transfer stipulations and the actions and communications of the recipient government direct the use of the funds for specified purposes. In both of these cases, revenue would be recognized as the liability is settled. The same accounting principles would apply to all types of transfers. The new standard is effective for fiscal years beginning on or after April 1, 2012. The new standard may be applied retroactively or prospectively. The Government has not yet assessed the impact of this new section, but recognizes that there may be a material impact.

Notes to Consolidated Financial Statements

March 31, 2012

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(t) Future accounting changes (continued)

The Public Sector Accounting Board (PSAB) approved Section 3510, Tax Revenue in February 2010. The new standard is effective for fiscal years beginning on or after April 1, 2012. The new standard provides guidance on how to account for tax concessions and transfers made through the tax system. The impact of this standard will change how the Government accounts for some items, either now grossing up the tax revenue or netting what was previously grossed up. The net impact to the Government's annual deficit or surplus will be nil.

3. CASH AND CASH EQUIVALENTS

	2012	2011
	\$	\$
Cash	44,359	111,774
Short-term investments	23,416	5,759
	67,775	117,533

Cash and cash equivalents include investments in a diversified portfolio of high grade, short-term income producing assets. The portfolio yield for the year-ended March 31, 2012 varied from 0.001% to 1.60% (2011 - 0.001% to 2.00%). The eligible classes of securities, categories of issuers, limits and terms are approved under the Government's investment guidelines. All instruments, depending on the investment class, are rated R-2 High or better from the Dominion Bond Rating Service. Investments are diversified by limiting them, depending on the type of investment, to a maximum of 10% to 50% of the total portfolio. There is no significant concentration in any one investment. The average term to maturity, as at March 31, 2012, is 53 days (2011 - 1 day).

4. PORTFOLIO INVESTMENTS

	2012	2011
	\$	\$
Marketable securities (market value \$55,790; 2011 - \$76,096)	54,606	74,299
Miscellaneous investments	119	104
	54,725	74,403

2012

5. DESIGNATED AND RESTRICTED ASSETS

Designated and restricted assets are included in cash and cash equivalents and portfolio investments.

Designated assets

Pursuant to the *Student Financial Assistance Act*, the assets of the Student Loan Fund are to be used to provide financial assistance to post-secondary students that meet certain eligibility criteria as prescribed in Regulations.

Notes to Consolidated Financial Statements

March 31, 2012

(All figures in thousands of dollars)

5. DESIGNATED AND RESTRICTED ASSETS (continued)

Pursuant to the *Waste Reduction and Recovery Act*, the assets of the Environment Fund are to be used for specified purposes as follows:

- (a) the establishment, operation and evaluation of programs in respect of the reduction or recovery of waste;
- (b) education programs related to the reduction or recovery of waste;
- (c) research and development activities related to the reduction or recovery of waste;
- (d) the appropriate disposal of a designated or prohibited material as waste;
- (e) expenses associated with the work of the advisory committee; or
- (f) other costs associated with programs, initiatives or activities in respect of the reduction or recovery of waste.

Portfolio investments, while forming part of the Consolidated Revenue Fund, are designated for purposes of meeting the obligations of the Legislative Assembly Supplemental Retiring Allowance and Judges Supplemental Pension Plans (note 16). Supplementary Retiring Allowance Regulations restrict the investments to those permitted under the Pension Benefits Standards Act. The remainder consists of investments from public agencies listed in note 1(a).

Pursuant to section 27 of the *Northwest Territories Business Development and Investment Corporation Act*, and its Regulations, the Northwest Territories Business Development and Investment Corporation (BDIC) is required to establish a Loan and Investments Fund for its lending and investing activities. Subsection 4(2) of the Program, Projects and Services Continuation Regulations (the Regulations) specifies that a Loans and Bonds Fund will be used to record the lending operations. Subsection 19(2) requires that a Venture Investment Fund be used to record the venture investment operations. Furthermore, under subsection 18(2), the BDIC is obligated to maintain a Capital Fund and Subsidy Fund.

In addition to these funds, the BDIC is required, under subsections 18(6) and 19(5) of the Regulations, to establish a Capital Reserve Fund and a Venture Reserve Fund, respectively. The BDIC will continue to deposit to these reserve funds an amount equal to 10% of each capital or venture investment made. The BDIC may use these reserve funds for further investment or financing for its subsidiaries and venture investments through approved drawdowns.

9. INVESTMENT IN NORTHWEST TERRITORIES HYDRO CORPORATION (continued)

Contractual obligations and contingencies

The Corporation's approved capital plan, including estimated costs to complete capital projects in progress, as at March 31, 2012, was \$22,860 (2011 - \$37,849).

The Corporation has an agreement to purchase natural gas to produce electricity in Inuvik. In September 2011 the Corporation was notified by the supplier that the gas supply in the Inuvik Gas Reservoir was limited and unlikely to last to the end of the contract period. NT Hydro reduced its consumption of natural gas in a good faith attempt to extend the supply of gas to the residents of Inuvik so that alternative gas supplies could be pursued. For the period of January through March 2012 generation was curtailed to 10% with gas and the remainder produced by the backup diesel plant.

The Corporation agreed to forgo its legal remedies for the supplier's inability to supply its full obligations as outlined in the agreement on the basis that the supplier agreed to not enforce the minimum purchase clause within that agreement or any damages against NT Hydro for not consuming gas.

The Corporation was named as a co-defendant in a 2005 lawsuit arising out of an all-terrain vehicle accident. It is management's estimate that no significant loss to the corporation will result from this claim. In the event that the claim is not settled in favour of the Corporation, the Corporation has insurance which may cover all or a portion of the settlement cost.

10. SHORT TERM LOANS

Short-term loans of \$134,941 (2011 - nil) incurred interest at an average rate of 1.07% (2011 - nil). Interest paid in 2012 was \$29 (2011 - nil).

14. CAPITAL LEASE OBLIGATIONS (continued)

Interest expense related to capital lease obligations for the year was \$784 (2011 - \$994), at an implicit average interest rate of 8.98% (2011 - 9.94%). Capital lease obligations (expiring between 2013 and 2023) are based upon contractual minimum lease obligations for the leases in effect as of March 31, 2012.

Interest expense on long-term debt, included in operations and maintenance expenses, was \$12,032 (2011 - \$7,152). Real return bonds for the Deh Cho Bridge includes financing costs of \$10,161 (2011 - \$8,546) that were capitalized after a reduction for interest earned of \$259 (2011 - \$476). The financing costs are comprised of interest of \$5,627 (2011 - \$5,480) and CPI adjustment of \$4,793 (2011 - \$3,542).

Debt Authority

The Government has the authority to borrow, pursuant to subsection 20(2) of the *Northwest Territories Act*, within a borrowing limit authorized by the Government of Canada. The Government's borrowing limit was increased to \$800 million by Order in Council P.C. 2012-279, dated March 8, 2012. The Federal Regulations to define "borrowing" for purposes of the *Northwest Territories Act* have not been finalized. The 2012 table below now includes capital lease obligations, and NWT Housing Corporation guarantees to reflect the anticipated changes to the definition of "borrowing" based on correspondence between the Government and the Department of Finance, Canada.

16. PENSIONS

March 31, 2012

a) Plans description

The Government administers the following pension plans for Members of the Legislative Assembly (MLAs) and Territorial Court Judges. The Government is liable for all benefits. Benefits provided under all five plans are based on years of service and pensionable earnings.

Plan recipient	Name of plan	Funded status
MLAs	Legislative Assembly Retiring Allowance Plan (MLAs Regular)	Funded
MLAs	Legislative Assembly Supplemental Retiring Allowance Plan (MLAs	Non Funded
	Supplemental)	
Judges	Judges Registered Plan (Judges Regular)	Funded
Judges	Judges Supplemental Pension Plan (Judges Supplemental)	Non Funded
Employees	Retirement Plan for Employees of the Hay River Health and Social	Funded
	Services Authority	

The Regular Plans for both the MLAs and Judges are contributory defined benefit registered pension plans and are pre-funded. The funds related to these plans are administered by independent trust companies. The Supplemental plans for both the MLAs and Judges are non-contributory defined benefit pension plans and are unfunded; however, the Government has made a voluntary restriction on assets for the purposes of meeting the obligations of the Supplemental plans (note 5). The average age of the 4 active members of the Judges' plans is 55. The assets of the Judges' plans consist of a diversified portfolio of Canadian and foreign equities and bonds. The average age of the 19 active members of the MLAs plans is 49. The assets of the MLAs plans consist of Canadian and foreign equities, and Canadian fixed income securities and bonds.

The Hay River Health and Social Services Authority has a defined benefit pension plan for its employees. Retirement occurs when the aggregate of a member's age plus years of service total 87, but not before age 56 or after age 61. The average age of the 207 plan members is 45 years. Plan assets consist primarily of Canadian and U.S. equities, bonds and mortgages.

The remaining government employees participate in Canada's Public Service Superannuation Plan (PSSP). Pension benefits within this plan accrue up to a maximum period of 35 years at a rate of two percent per year of pensionable service multiplied by the average of the best five consecutive years of earnings. PSSP benefits are coordinated with Canada/Quebec Pension Plan benefits and are indexed to inflation.

Pension liability (asset)	(4,243)	25,938	21,695

Included in the pension asset of \$2,878 (2011 - \$4,243) is a deficit for accounting purposes of the Hay River Health and Social Services Authority pension plan in the amount of \$950 (2011 - \$757). The Superintendent of Financial Institutions requires that all plans with a solvency ratio less than 100% file an actuarial valuation annually. The solvency shortfall for this plan is \$6,215 (2011 - \$4,972) and is required to be eliminated within 5 years under the *Pension Benefits Standards Act, 1985.* The values of the plan's assets and liabilities on a solvency basis are calculated as though the plan were wound up and settled on the valuation date of January 1, 2012.

(All figures in thousands of dollars)

16. PENSIONS (continued)

d) Pension expense

The components of pension expense include current period benefit cost, amortization of actuarial net (gains) / losses and interest on average accrued benefit obligation net of the return on plan assets and contributions from plan members. The total expense is \$5,909 (2011 - \$4,316). The interest cost on the accrued benefit obligation was determined by applying the discount rate determined at the beginning of the period to the average value of the accrued benefit obligation for the period. The expected return on plan assets was determined by applying the assumed rate of return on plan assets to the average market-related value of assets for the period. The difference between the expected and actual return on plan assets was a loss of \$105 (2011 - \$(1,541)).

In addition to the above, the Government contributed \$54,767 (2011 - \$53,816) to the Public Service Superannuation Plan. The employees' contributions to this plan were \$28,122 (2011 - \$25,121).

e) Changes to pension plans in the year

Legislative Amendments

Bill 2 came into effect on September 1, 2011. It amended both the *Retiring Allowances Act* and the *Supplementary Retiring Allowances Act*. The primary change contained in Bill 2 relates to the pension calculation by service. For Members that leave the Assembly after October 18, 2007, the method used to calculate pensions has changed. Previously, pensions were calculated separately for each position (e.g. MLA, Chairperson, Minister) that a Member held for at least one year. The amendments revise the calculation so there is just one calculation for all years of service, with earnings from each position combined for the purposes of the pension calculation by service. There were no changes to pension plans in 2011.

f) Valuation methods and assumptions used in valuing pension liability

Valuation date

Actuarial valuations were last completed for the Legislative Assembly and Judges' plans as of April 1, 2008 and April 1 2010, respectively. As the actuarial valuations were not valued as at the year-end, the Legislative Assembly plans were extrapolated to January 31, 2012 and the Judges' plans were extrapolated to March 31, 2012. The effective date of the next actuarial valuation for the Legislative Assembly plans is April 1, 2012. The actuarial valuation for the Retirement Plan for Employees of the Hay River Health and Social Services Authority was completed as at January 1, 2012, and the results were extrapolated to March 31, 2012.

Liability valuation method

The actuarial valuations were performed using the projected accrued benefit method. The valuations are based on a number of actuarial assumptions about matters such as mortality, service, withdrawal, earnings and interest rates. The assumptions are based on the Government's best estimates of expected long-term rates and short-term forecasts.

Asset valuation method

The asset valuation method, market-related value, for the MLA's plans is equal to a smoothed market value which spreads the difference between the actual and expected investment income over a four year period and is then adjusted for payments due to, and payable from, the pension plan. The fair market value of the MLA's regular plan is \$20,010 (2011 - \$20,958). The asset valuation method for the Judges' plans is market value. The market value of the regular Judges' plan is \$4,082 (2011 - \$4,214). The asset valuation method for the Retirement Plan for Employees of the Hay River Health and Social Services Authority is market-related value. The fair market value of its pension plan assets is \$24,427 (2011 - \$22,798).

Notes to Consolidated Financial Statements

March 31, 2012

(All figures in thousands of dollars)

16. PENSIONS (continued)

(f) Valuation methods and assumptions used in valuing pension liability (continued)

Actuarial gains and losses

Actuarial gains and losses occur when actual experience varies from estimates. The adjustments needed are amortized on a straight-line basis over the estimated average remaining service lives of the contributors. The estimated average remaining service lives of the contributors is 3.0 years (2011 - 4.0 years) for the MLA's plans, 5.9 years (2011 - 6.9 years) for the Judges' plans, and 8.0 years (2011 - 8.2 years) for the Hay River Health and Social Services Authority plan.

Actuarial assumptions	Hay River H&SS	MLA's plans	Judges'
	Authority plan		plans
Expected rate of return on plan assets	4.8%	6.0%	6.0%
Rate of compensation increase	2.8%	3.0%	4.0%
Annual inflation rate	2.3%	3.0%	3.0%
Discount rate	4.8%	6.0%	4.0%

Retirement assumptions

- Members of Legislative Assembly at the later of age 50, 4 years of service, and end of current session.
- Judges at the earlier of age 60 or when age plus service equals 80.
- Employees of the Hay River H&SS Authority may retire early at age 50. Normal retirement is at age 65.

17. OTHER EMPLOYEE FUTURE BENEFITS

In addition to pension benefits, the Government of the Northwest Territories provides termination and removal benefits to its employees. The cost of these benefits accrues either as employees render service or upon the occurrence of an event resulting in eligibility for benefits under the terms of the plan. This benefit plan is not prefunded and thus has no assets, resulting in a plan deficit equal to the accrued benefit obligation.

	2012 \$	2011 \$
Resignation and retirement	35,235	32,503
Removal	16,245	16,137
	51,480	48,640

Notes to Consolidated Financial Statements

March 31, 2012 (All figures in thousands of dollars)

18. DEFERRED CAPITAL CONTRIBUTIONS

Deferred capital contributions relate to the portion of a tangible capital asset that was gifted from or cost-shared with the Government of Canada. The most significant of these assets are roads and airports. The capital contributions are deferred and amortized to revenue over the same life as the related asset. Deferred capital contributions are reported as a reduction in arriving at net tangible capital assets (*Schedule A*).

	2012 \$	2011 \$
Deferred capital contributions at beginning of year	361,488	307,959
Add: Assets gifted or cost-shared during the year	33,063	71,879
Less: Amortization of capital contributions	(20,202)	(18,350)
Deferred capital contributions at end of year	374,349	361,488

19. TRUST ASSETS UNDER ADMINISTRATION

The Government administers trust assets on behalf of third parties, which are not included in the reported Government assets and liabilities. These consist of cash, term deposits, investments, real estate, and other sundry assets.

	2012	2011
		(Restated)
	\$	\$
Correctional institutions and other	406	380
Natural Resources - capital	304	301
Public Trustee	6,277	6,367
Territorial and Supreme Courts	656	1,790
Northwest Territories Hydro Corporation	-	2,043
Government of New Brunswick	6,793	8,417
Scholarship bequest - Beaufort Delta Divisional Education Council	252	250
Bequest - South Slave Divisional Education Council	79	80

Tangible capital asset projects in progress at year-end	2016	103,090	10,099	113,189
Commercial and residential leases	2022	30,995	61,492	92,487
Equipment leases	2016	1,488	1,716	3,204
Western Harvesters' Assistance Program	2013	63	-	63
		259,033	906,965	1,165,998

21.CONTINGENCIES

(a) Environmental liabilities

The Government recognizes that there are costs related to the remediation of environmentally contaminated sites for which the Government is responsible. The Government has identified 139 (2011 - 136) sites as potentially requiring environmental remediation at March 31, 2012. Where an estimate could be determined for remediation costs, a liability has been recorded and included as a component of accounts payable and accrued liabilities.

One of the 139 sites, Giant Mine, has been formally designated as contaminated under the *Environmental Protection Act* (NWT). In 2005, the Government recorded a liability for its share of the above ground remediation. The balance of the Government's share of the Giant Mine remediation liability at March 31, 2012 is \$20,207 (2011 - \$20,321).

There are 26 active or decommissioned landfill sites that are outside incorporated communities, and therefore are the responsibility of the Government. As at March 31, 2012, a liability in the amount of \$1,102 (2011 - \$1,092) has been recorded for these sites using the method required by the Public Sector Accounting Standards.

Of the remaining 112 sites, 15 are airports or airport strips or reserves, 19 are sewage lagoons, 12 are fuel tanks and 6 are highways, the majority of which have been investigated but are still awaiting full environmental assessments. Remediation costs for the sites that are known to be contaminated and the Government is obligated to remediate are currently estimated at \$22,879 (2011 - \$21,046).

The Government's ongoing efforts to assess the remaining sites may result in additional environmental liabilities. These liabilities will be recorded in the year in which they become known.

(b) Guarantees

The Government has guaranteed residential housing loans to banks totaling \$5,199 (2011 - \$5,452) and indemnified Canada Mortgage and Housing for third party loans totaling \$25,906 (2011 - \$27,529). In addition, the Government has provided a guarantee to the Canadian Blood Agency and Canadian Blood Services to cover a share of potential claims made by users of the national blood supply. The Government's percentage is limited to the ratio of the Northwest Territories' population to the Canadian population.

Notes to Consolidated Financial Statements

March 31, 2012

(All figures in thousands of dollars)

21. CONTINGENCIES (continued)

(b) Guarantees (continued)

The Northwest Territories Business Development and Investment Corporation (BDIC) has four outstanding loans to two Northern Community Futures organizations totaling \$913 (2011 - \$1,057). Loans provided by these two organizations may be assigned to the BDIC when impaired. If assigned, the BDIC would then write-off the Community Futures organization loan balance and would attempt to recuperate its loss. In 2012, no accounts were assigned to the BDIC (2011 - \$41).

The BDIC has four outstanding irrevocable standby letters of credit. The amounts of these letters of credit totaled \$2,250,000 and expire in 2012. Payment by the BDIC is due from these letters in the event that the applicants are in default of the underlying debt. To the extent that the BDIC has to pay out to third parties as a result of these agreements, these payments will be owed to the BDIC by the applicants. Each letter of credit is secured by promissory note, general security agreement, guarantee or collateral mortgage. During the year, the BDIC paid out \$100,000 to a third party and recorded the amount as a loan receivable and no amount has been recorded as a liability.

(c) Claims and litigation

There are a number of claims and pending and threatened litigation cases outstanding against the Government. In certain of these cases, pursuant to agreements negotiated prior to the division of the territories, the Governments of the Northwest Territories and Nunavut will jointly defend the suits. The cost of defending these actions and any damages that may eventually be awarded will be shared by the two Governments 55.66% and 44.34%, respectively. The Government has recorded an allowance for any claim or litigation where it is likely that there will be a future payment and a reasonable estimate of the loss can be made. The allowance is based upon estimates determined by the Government's legal experts experience or case law in similar circumstances. At year-end, the Government estimated the total claimed amount for which the outcome is not determinable has been estimated at \$2,520 (2011 - \$5,498). No provision for such claims has been made in these financial statements as it is not determinable, that any future event will confirm that a liability has been incurred as at March 31.

22. EXPENSES

	2012	2011	
	\$	\$	
Expenses by Object:			
Grants and contributions	186,297	198,344

All Divisional Education Councils in the NWT All District Education Authorities in the NWT

Tlicho Community Services Agency (education portion)

Health, social services and housing Department of Health and Social Services

All Health and Social Services Authorities in the NWT Tlicho Community Services Agency (health portion)

NWT Housing Corporation

Justice Department of Justice

General government Department of Aboriginal Affairs and Intergovernmental Relations

Department of Executive Department of Finance

Department of Human Resources

Legislative Assembly and statutory offices Legislative Assembly

NWT Human Rights Commission NWT Status of Women Council

23. RELATED PARTIES

Significant transactions with related parties and balances at year-end are disclosed separately in the financial statements and notes thereto.

Notes to Consolidated Financial Statements

March 31, 2012

(All figures in thousands of dollars)

24. FAIR VALUE

The fair value of short-term financial instruments, including cash, short-term investments, accounts receivable, and short term loans, accounts payable and accrued liabilities approximate the carrying amounts due to their short terms to maturity.

The carrying value, at the lower of cost or net recoverable value, is estimated to be the fair value of loans receivable where there is an allowance associated with a loan. The carrying value of the loans receivable should not be seen as the realizable value on immediate settlement of these loans due to the uncertainty associated with such a settlement.

The fair value, and the methods of calculation and assumptions used, for the Government's other long-term financial instruments are as detailed below:

	20)12	2011		
	Carrying Amount \$	Fair Value \$	Carrying Amount \$	Fair Value \$	
Portfolio investments	54,725	57,044	74,403	76,096	
Loans receivable	62,689	62,689	95,027	92,900	
Due to the Government of Canada	131,917	126,700	162,935	158,045	
Capital lease obligations	7,482	7,562	9,485	14,563	
Long-term debt	198,123	200,794	324,671	323,755	

The fair value of publicly traded investments is based on quoted market prices. The estimated fair value for due to the Government of Canada, capital lease obligations and long-term debt is calculated by discounting the expected future cash flows at year-end using market interest rates for equivalent terms to maturity.

25. OVEREXPENDITURE

During the year, 2 departments (2011 - 2) exceeded their vote for a total of \$592 (2011 - \$5,754). Overexpenditure of a vote contravenes subsection 32 of the *Financial Administration Act* which states that "No person shall incur an expenditure that causes the amount of the item set out in the Estimates on which the appropriation is based to be exceeded".

The voted items that were over expended in the current year are as follows:

Department of Transportation \$345

Department of Education, Culture & Employment \$247

26. SUBSEQUENT EVENTS

Subsequent to the year-end, the Government approved and guaranteed long-term borrowing for the Northwest Territories Power Corporation related to their issuance of \$25,000 in new debentures.

The Government entered into annual Water and Sewer Funding and Community Government Funding contribution agreements totaling \$57 million with community governments to assist them with provision of water and sewer services and municipal services, respectively.

27. COMPARATIVE FIGURES

Certain comparative figures have been reclassified to conform with the financial statement presentation adopted for the current year.

Schedule A

Consolidated Schedule of Tangible Capital Assets

for the year ended March 31,

(All figures in thousands of dollars)

Annual surplus (deficit)	1,322	3,231	3,294	7,847	(1,465)	6,382	(2,368)

¹ The Northwest Territories Hydro Corporation is the only Government Business Enterprise for financial reporting purposes.

Includes adjustments to remove the effect of Government Business Enterprises accounted on the modified equity basis and entries to eliminate inter-entity balances to comply with generally accepted accounting principles of consolidated financial statements; for example, contributions by departments to boards and agencies are shown under Grant and contributions expense under the "Departments" column. The amounts received by the applicable board or agency (e.g. Health and Social Services Authority, Divisional Education Council) are shown under General revenue in the "Other Public Agencies" column. These amounts are eliminated upon consolidation to avoid double counting and result in significant amounts shown in the "Adjustments" column.

³ To conform with the appropriation process, departments' sales are shown as net of cost of sales and are converted to gross sales for consolidation purposes (via adjustments).

INTRODUCTION

The Public Accounts report the financial position and results of operations of the Government for a fiscal year. The Statement of Financial Position discloses the assets, liabilities, accumulated surplus or deficit, as well as the net debt or net financial resource position of the Government. The financial position of the Government is measured at a specific point in time (March 31 fiscal year end), whereas information relating to revenues and expenses encompasses the results for a fiscal year as disclosed in the Statement of Operations. It is important to note that the financial position of a Government is often quite different from the financial condition of the economy.

A research study conducted by the Canadian Institute of Chartered Accountants states:

The financial health of a Government is its financial health as measured by sustainability, vulnerability and flexibility, looked at in the context of the overall economic and financial environment. These terms are defined as follows:

- Sustainability: the degree to which a Government can maintain existing programs and meet existing creditor requirements without increasing the debt burden on the economy.
- Flexibility: the degree to which a Government can increase its financial resources to respond to rising commitments, by either expanding its revenues, or increasing its debt burden.
- Vulnerability: the degree to which a Government becomes dependent on, and therefore vulnerable to, sources of funding outside its control or influence, both domestic and international.

The information provided in the following pages is intended to assist readers of the Public Accounts in their assessment of the Government's financial health. It is important to note that the information contained within the Consolidated Financial Statements (Public Accounts – Section I) includes all Government-controlled organizations. Organizations included in the Government Reporting Entity are listed in Note 1 to the Consolidated Financial Statements.

GROSS DOMESTIC PRODUCT

Gross Domestic Product (GDP) represents the total unduplicated value of goods and services produced within the geographical boundaries of a country, province or territory, regardless of whether the factors of production involved are resident or non-resident. GDP is presented in chained dollars. Chained dollars are a real measure of GDP meaning pricing effects are excluded providing a direct comparison of the quantity of goods and services produced from year to year; GDP changes because the quantity of goods and services changes. Estimates of GDP are typically expressed at market prices, which includes the impact of taxes and subsidies in the estimate. The GDP estimates shown below are in chained 2007 dollars at market prices.

For the Northwest Territories (NWT), Statistics Canada estimated GDP was \$3,521 million for 2011, which represents a 5.5% decrease relative to the 2010 estimate of \$3,711 million. This decrease largely resulted from a decrease in carat production in the diamond mines and a decrease in capital investment (construction) in the 2011 calendar year.

Gross Domestic Product at Market Prices, calendar years 2010 and 2011 Canada, Provinces and Territories Chained (2007) Dollars (\$ in millions)

			Percent
	2011	2010	Change
Canada	1,628,295	1,587,558	2.6
Newfoundland and Labrador	28,912	28,058	3.0
Prince Edward Island	4,876	4,800	1.6
Nova Scotia	35,424	35,243	0.5
New Brunswick	28,922	28,928	0.0
Quebec	322,690	316,724	1.9

Northwest Territories	3,521	3,711	-5.1
Nunavut	1,716	1,640	4.6

Source: Statistics Canada

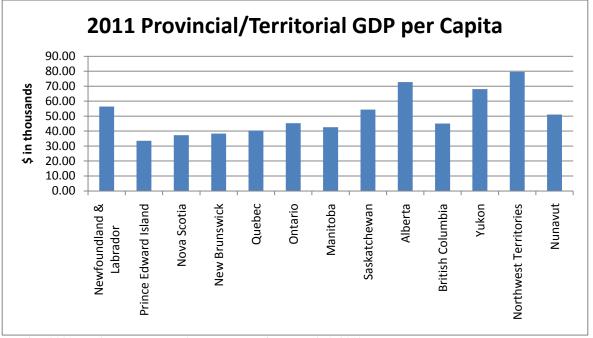

Prepared by NWT Bureau of Statistics

Note:

^{1.} Data will not sum to totals since chained dollars are not additive.

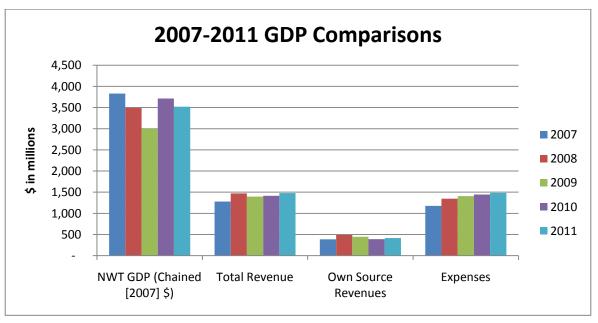

Based on 2011 population estimates of Statistics Canada as at July 1, 2012

The NWT still has one of the highest GDP per capita in Canada. This is an important indicator to note when considering GDP statistics since it is shows that while the NWT has a relatively small population our economy is still relatively larger than other jurisdictions.

* NWT GDP is based on a calendar year, while the balance of the information is based on the following March 31 fiscal year-ends. The 2011 figure for NWT GDP has been used for 2012 illustration purposes. Net income from the NWT Hydro Corporation and recoveries are included in GNWT own source revenues.

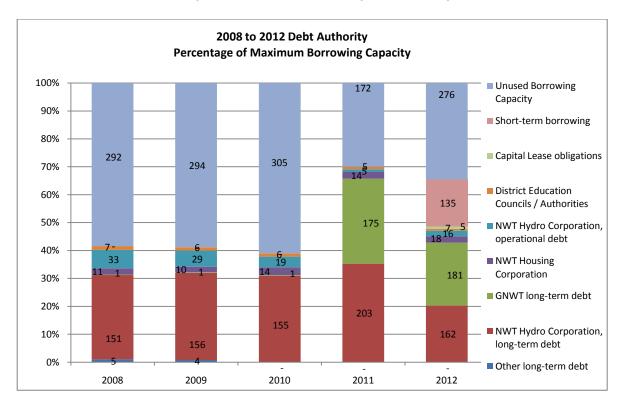

LONG-TERM DEBT BORROWING LIMITS

In April 2010 the Government of Canada, pursuant to subsection 20(2) of the *Northwest Territories Act*, temporarily increased the GNWT's borrowing limit to \$575 million from the \$500 million approved limit. On March 8, 2012, the Government of Canada permanently increased the GNWT's borrowing limit to \$800 million. A portion of the \$225 million increase was to offset items that were previously excluded from the definition of borrowing for the purposes of the limit (for example capital leases must now be included).

Pressures experienced due to the general state of the economy and the Government's desire to address infrastructure deficits within the Northwest Territories accelerated the Government's negotiation of an increase to the approved long-term borrowing limit with Canada. The revised borrowing limit referenced in the paragraph above was required to support long term planning for the Northwest Territories.

Consolidated debt, for purposes of the borrowing limit, includes the debts of all Government entities that are consolidated. The borrowings of the Northwest Territories Hydro Corporation (NTHC), while included in the calculation, are serviced through revenues generated by the NTHC, and therefore do not require the Government to fund the related interest expense or principal repayment.

In 2011 the debt associated with the Deh Cho Bridge was assumed by the GNWT and required to be included within GNWT long-term debt when calculating the borrowing limit.

The Government implemented a Fiscal Responsibility Policy in 2005 to guide borrowing decisions and allow flexibility in planning for its future infrastructure needs. Currently there are no plans to increase the debt level as the current Capital Plan only includes projects that will be fully funded by the Government's revenues; however as part of its fiscal management strategy the Government has obtained a credit rating of Aa1 from Moody's Investors Service to assist in decisions that may be required related to any future debt instruments that the Government may consider.

The NWT requires a significant investment in infrastructure. To ensure ongoing fiscal sustainability, but still allow for necessary investments required to address high priority infrastructure needs, the *Fiscal Responsibility Policy* establishes an ongoing approach to finance the Government's infrastructure investments and requires that at least 50% of the Government's annual infrastructure investment be financed by cash generated from operations. A maximum of 50% of the annual infrastructure investment may be financed by debt and annual debt servicing payments (principal and interest) cannot exceed 5% of total revenues. This requires the Government to plan for, budget, and realize sufficient operating surpluses on an ongoing basis to finance 50% of capital investments as well as meet debt servicing payments on the amounts borrowed.

The Policy makes the Government accountable for its level of borrowing with the establishment of performance criteria for debt management that ensure the total debt of the Government does not exceed the capacity of the Government to repay the debt as it becomes due.

The debt management criteria include the following:

Ratio: Government Debt to Revenue

i) From year to year, the ratio of total Government debt, excluding guaranteed debt, compared to non-consolidated revenue, in relation to provinces shall be in the lowest 4.

This ratio is an indicator of the increase in debt in proportion to the increase in revenue, where decreasing ratios are a positive indicator that the rate of increase in revenue is greater than the rate of increase in debt.

Ratio: Debt per Capita

ii) From year to year, the total debt per capita ratio, compared to provinces shall be in the lowest 5.

This ratio is a measure of the debt burden, on a per person basis, where a decreasing ratio is a positive indicator of a decreasing debt burden.

Debt Servicing Costs (interest), as a % of Revenue

iii) From year to year, debt servicing costs on Government debt, excluding amounts paid by Public Agencies, as a % of non-consolidated revenue, compared to other provinces and territories shall be in the lowest 4.

This ratio is a measure of the extent that Government revenues are being applied to debt charges, rather than to programs and services, or tax reduction.

Debt Servicing Payments, as a % of Revenue

iv) From year to year, payments on Government debt, excluding Public Agency debt service payments, as a percentage of non-consolidated revenue shall not exceed 5% of revenue.

This is a measure of the extent that Government revenues are being applied to debt charges and debt repayment, rather than on programs and services or to reducing taxes.

Debt Servicing Payments as a % of 3-year moving GDP average

v) Given the volatility of GDP in the NWT, a 3-year moving average GDP shall be used.

From year to year, debt-servicing payments, excluding Public Agency debt, as a % of the 3-year moving GDP average, compared to debt servicing payments of provinces shall be in the lowest 4.

This ratio is a measure of debt growth in relation to economic growth, where ideally, economic growth exceeds the growth rate of public debt. A decreasing ratio reflects a consistent improvement in financial position.

Net Debt per Capita

vi) From year to year, non-consolidated net debt per capita, compared to provinces shall be in the lowest 5.

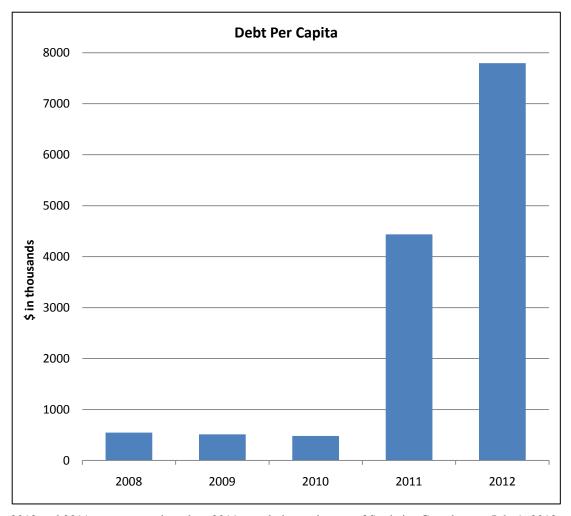

This ratio is a measure of the excess of liabilities over financial assets.

The GNWT policy on borrowing and performance measurement criteria, for management of debt, will be reviewed and updated annually. Annual reports are tabled in the Legislative Assembly.

DEBT PER CAPITA

The following chart depicts the debt per capita with respect to the entire debt load that the GNWT is directly responsible for. This debt is comprised of short and long-term borrowing, but excludes the borrowings of the NWT Opportunity Fund and the NWT Hydro Corporation. At March 31, 2012, long-term debt was \$198.1 million (2011 - \$324.7 million), with short-term borrowings of \$135 million.

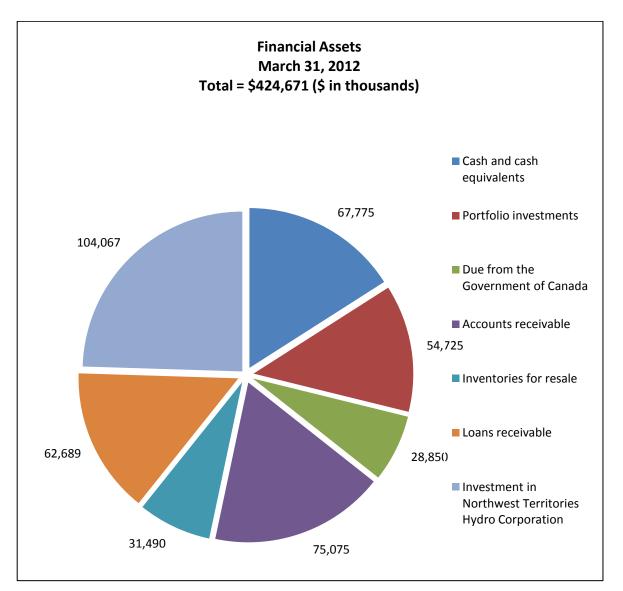

2012 and 2011 amounts are based on 2011 population estimates of Statistics Canada as at July 1, 2012

As disclosed on the previous page, the GNWT assumed the debt associated with the Deh Cho Bridge on April 1, 2010, significantly increasing the debt load for 2011 and subsequent fiscal years. In addition the GWNT required significant short term borrowing at the 2012 year end of \$134 million dollars. This debt was repaid shortly after the yearend, however its existence at year causes a significant spike in debt per capita.

FINANCIAL POSITION

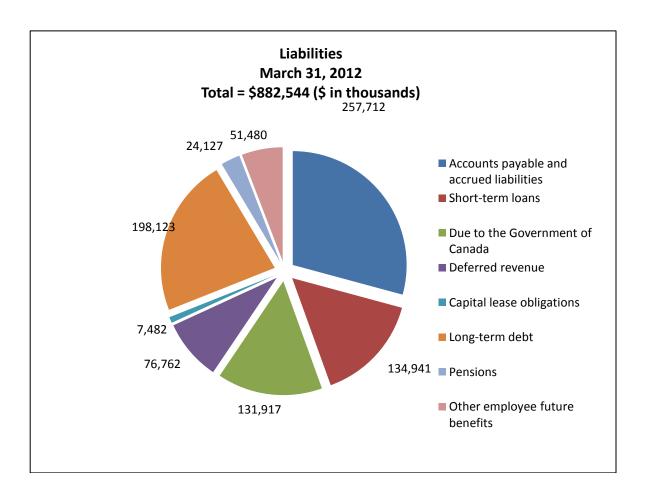

The above graph illustrates the composition of the Government's financial assets.

Approximately 16% of the GNWT's financial assets are cash. The balance is convertible to cash over time, varying from relatively short-term investments and inventory for resale to longer term loans receivable. The value of the investment in the Northwest Territories Hydro Corporation is not available "for sale" and as such is not available to discharge the GNWT's liabilities at any point in the foreseeable future. The balance of the financial assets will, over time, contribute to the GNWT's ability to discharge its liabilities as depicted on the following page. The significant gap between the financial assets of the GNWT and its liabilities indicate that some of its future revenues will be required to meet it's obligations.

FINANCIAL POSITION (Continued)

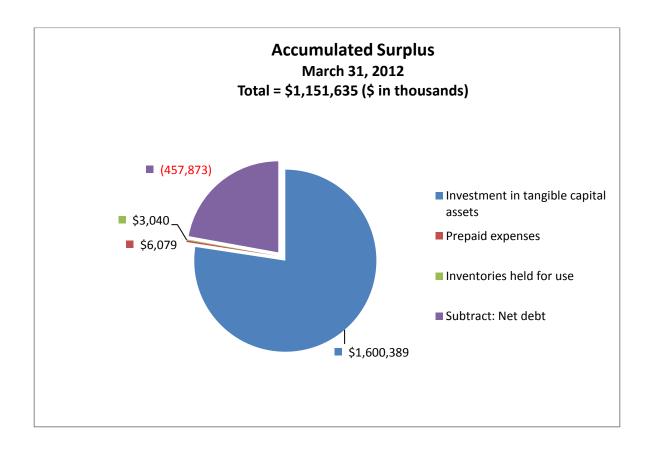

The above graph illustrates the composition of the Government's liabilities.

The GNWT presently has approximately \$425 million in financial assets available to discharge its liabilities of approximately \$883 million. Many of the liabilities are not due in the short-term and will be discharged at a later date with a combination of longer term financial assets that provide cash at a later date and cash/accounts receivable that will be generated over future years through normal government operations and future generation of revenues.

FINANCIAL POSITION (continued)

The Government is in a net debt position (depicted above as a negative). This negative amount is subtracted from the Government's accumulated investment in Non-financial Assets (tangible capital assets/prepaid expenses/inventories held for use) to produce the accumulated surplus balance at the end of the year. An important measure of the flexibility of a Government is the level of financial assets available to meet current and future obligations, as well as its flexibility to absorb any budgeted annual deficit without moving to an accumulated deficit position.

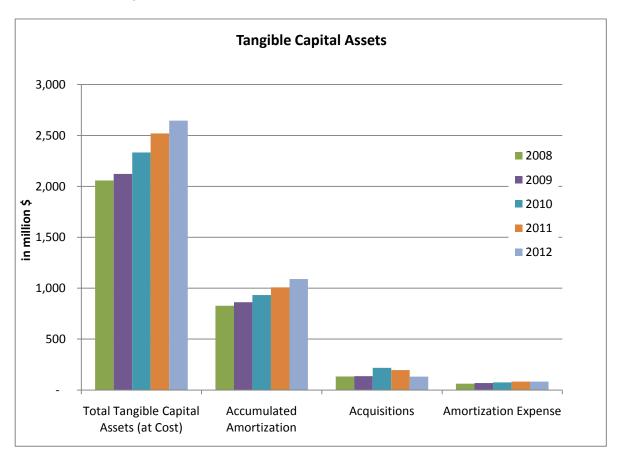

A net debt, or net financial resource, position is not a direct reflection of cash available, but rather an indication of sources where cash will or will not become available to meet current and future obligations.

TANGIBLE CAPITAL ASSETS

Tangible capital assets include assets purchased or constructed by the Government and assets that were fully or partially contributed to the GNWT by Canada or other parties.

The GNWT records tangible capital assets as non-financial assets on its Statement of Financial Position within the Public Accounts. Under this policy, assets valued at \$50,000 or more are capitalized and then expensed as amortization in Statement of Operations with the Public Accounts based on their average useful life.

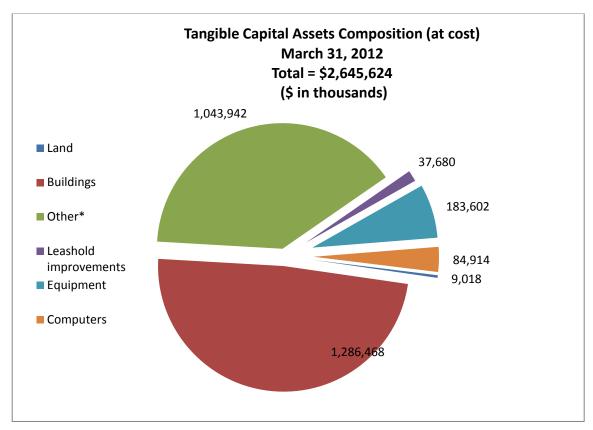

Tangible capital assets (at cost) do not include any adjustments for any contribution that may have been received to offset its cost... For further details regarding tangible capital assets, please refer to Schedule A to the Consolidated Financial Statements in Section I of the Public Accounts.

The Government plans its capital expenditures to ensure that existing tangible capital assets are replaced or expanded in a timely manner in conjunction with the Government's direction, priorities and fiscal strategy. Tangible capital asset investments are focused on addressing the continued health and safety of NWT residents, the extension of the useful life of existing assets, and providing for program growth.

TANGIBLE CAPITAL ASSETS (continued)

^{*} Includes roads, bridges, airstrips & aprons, and water/sewer works

The GNWT is currently investing in tangible capital assets at a level that represents between 50% and 60% of the estimated investment needed for replacement and growth. In the 2012 fiscal year, the Government spent \$185 million to acquire or construct tangible capital assets (2011 - \$292 million).

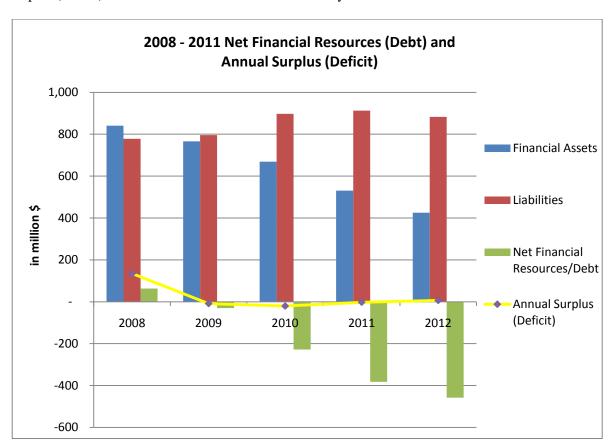

ANNUAL SURPLUS (DEFICIT) AND NET FINANCIAL RESOURCES (DEBT)

Net financial resources are the financial resources remaining after being reduced by all liabilities of the Government. Net debt results when there is an excess of liabilities over financial assets. The Government is in a net debt position; liabilities exceeded financial assets at the fiscal year end. Over the years, the Government's net financial resources (debt) have fluctuated with the annual surplus as depicted in the graph below.

Net debt continued to increase during the 2012 fiscal year, in part as a result of continued significant investments in infrastructure (see previous page). Amounts spent on tangible capital assets result in a corresponding decrease in cash and other financial assets used to make such investments which in turn results in an increase in net debt.

The graph below illustrates the Government's net financial resources (debt) position and annual surplus (deficit) at the end of each of the last five fiscal years.

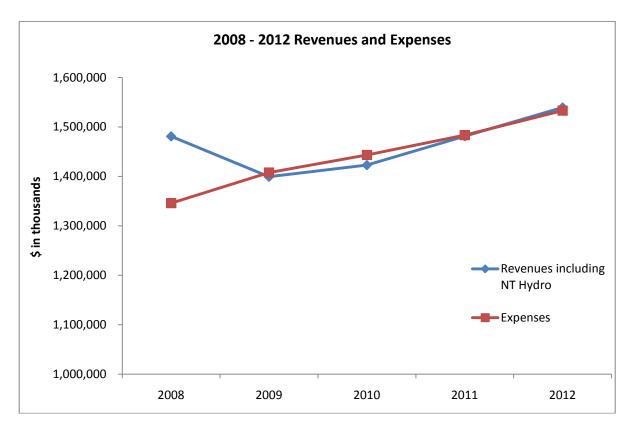

Net financial resources (debt) are a good indicator of a Government's ability to meet its existing financial obligations.

In the near term, the Government may have to fund tangible capital assets with debt and this will further impact our net financial position. With so many variables in the calculation of our net financial position, a prediction of an increase or decrease in our net financial resources cannot be made without an in-depth analysis. Net financial resources or debt positions are affected by dramatic changes in revenues or expenses. Long-term debt and the Government's net debt position will increase if revenues do not keep pace with, or exceed, the cost of Government operations.

REVENUES AND EXPENSES

^{*} Revenues depicted above include recoveries of prior year expenditures and net income of the NWT Hydro Corporation.

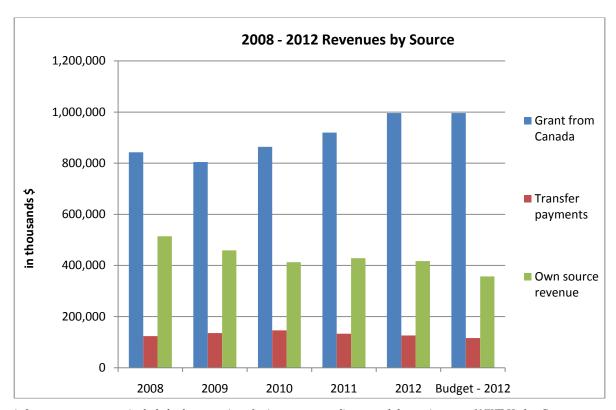

The GNWT funds government programs and services through a combination of transfers from the federal government and own-source revenues. In order to assess the long-term sustainability of the present level of services, various key indicators are monitored on an ongoing basis, including the following:

- Growth rates of revenues and expenditures;
- Changes in the net debt ratio; and
- Impacts of one-time (or non-recurring) events.

The most significant factor that contributes to revenues being more unpredictable than expenses in any given year is the volatility in corporate income tax. Since April 1, 2007, the Grant from Canada has been calculated based on an equally-weighted three-year moving average of data that is lagged two years. As a result, changes in underlying variables, such as corporate income tax, do not lead to a corresponding impact (up or down) on the Grant from Canada until the second, third and fourth years following the year of the change to the input in question. For example, in the event of a revenue shortfall in corporate income tax, the resulting positive offset on the Grant from Canada would occur one-third each in the second, third and fourth years following the year in which the shortfall took place.

REVENUES BY SOURCE

^{*} Own source revenues include both recoveries of prior year expenditures and the net income of NWT Hydro Corp.

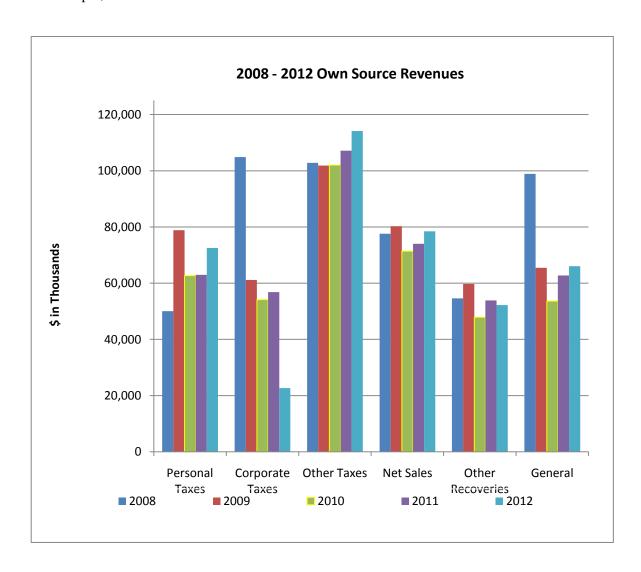

Since 2007 when the current funding structure was implemented the GNWT's revenues from the Formula Financing Grant from Canada increased slightly from 59% to 62% of total revenues. The Grant from Canada is an annual formula-based calculation whereby the NWT's Grant equals the difference between its Gross Expenditure Base (proxy for expenditure requirements) and a measure of revenue capacity known as Eligible Revenues.

Major own-source revenues, such as corporate and personal income tax, tobacco tax, fuel tax, and payroll tax, have remained consistent at approximately 30% of total revenues. Other transfer payments revenues are approximately 9% of total revenues. Although the NWT has a vast reserve of non-renewable resources, it does not currently share in the revenue produced by those resources (royalties, etc). The intended result of ongoing tri-party negotiations between Canada, the GNWT and NWT Aboriginal Governments is the sharing of those resource revenues.

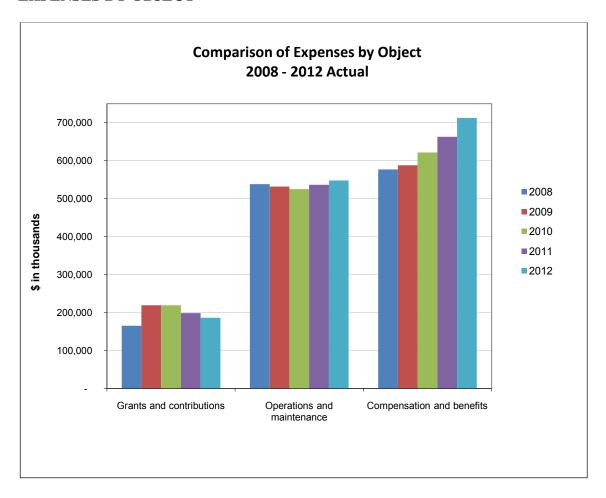

REVENUES BY SOURCE (continued)

With the exception of corporate income tax, other own-source revenues have proven to be fairly consistent over the years. Corporate income tax revenue is dependent upon a small base of significant taxpayers that accounts for the volatile nature of this tax revenue. Canada bases estimates of corporate income tax on the latest actual prior year tax revenue information available; for example; 2010 estimates were based on 2008 actual collections.

EXPENSES BY OBJECT

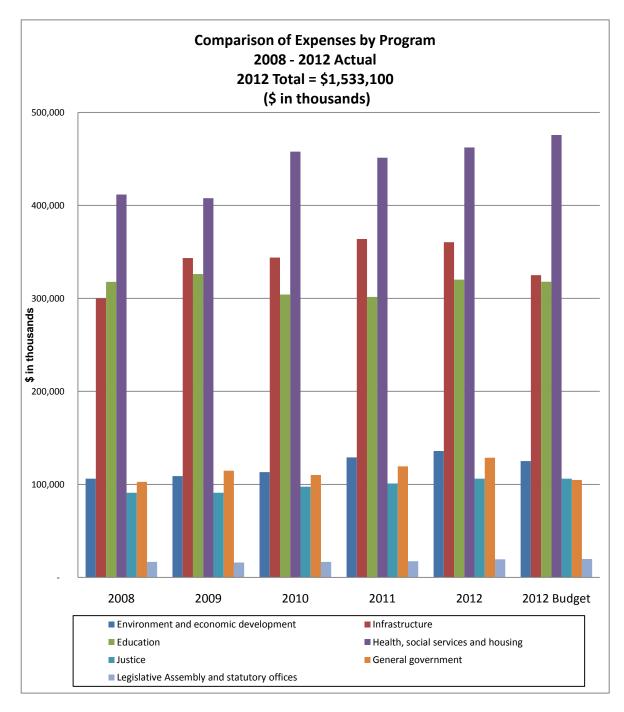

The above graph provides information on the consolidated government operations. Grants and contributions from the GNWT to boards and agencies consolidated in Section I of the Public Accounts are reported under the operations and maintenance and compensation and benefits categories to better reflect the nature of the final expense types that will result. This classification does not change the way that these Government organizations are funded as many of our social and educational programs are funded by contributions from the GNWT. Many components of these funding agreements with boards and agencies are really fixed costs incurred by the recipients and as the major (or sole) provider of funds, the Government cannot vary the funding without affecting the level of output by these boards and agencies. In Section II of the Public Accounts, one can see that approximately 51% of the Government's total expenses flow as Grants and Contributions to third parties.

In addition lease and other commitments, which are disclosed in the notes to the consolidated financial statements (Public Accounts – Section I), are long-term fixed costs over which there is no discretion to be exercised in the short-term.

The Government is also vulnerable to inflation as it is an important factor when negotiating compensation and benefits. Not only are the direct wages of the Government vulnerable to this, but wage costs comprise a significant factor in determining the amount of grants and contributions given out to third parties, whether they are consolidated within the Public Accounts or not.

EXPENSES BY PROGRAM

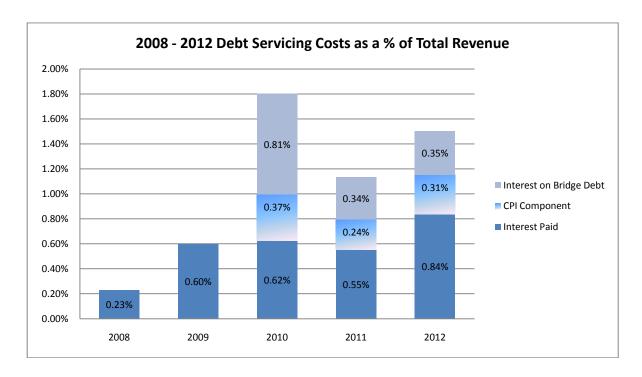

The Government spends the majority of its budget on social programs (education, health, support to community Governments, justice and housing), with the remaining budget allocated to infrastructure, natural resources and economic development. Any additional resources to improve a service often have to be made at the expense of other important needs. Balancing a budget entails not only controlling expenses but also finding the most effective and efficient mix of programs.

DEBT SERVICING COSTS

As shown on the graph below, the GNWT is in the enviable position of having to expend less than 2% of its total revenues to service its debt load, including financing costs paid to service the Deh Cho Bridge debt. The financing costs are comprised of interest expense and an adjustment for inflation based on the consumer price index (CPI). The various components related to the Deh Cho Bridge are disclosed within the graph.

The Government's *Fiscal Responsibility Policy* requires the ratio cited above to be one of the parameters reported on to ensure that any new debt we assume does not affect our long-term sustainability. Under the *Fiscal Responsibility Policy*, payments on Government debt must not exceed 5% of revenues.

CONCLUSION

As described in the Introduction, the Canadian Institute of Chartered Accountants has suggested that a Government's financial health should be measured in terms of sustainability, flexibility and vulnerability. The preceding measures have attempted to illustrate how the GNWT's fiscal health measures up from this standpoint. This suggests the following conclusions:

Sustainability – at the end of the 2011-2012 fiscal year the GNWT had a net debt of \$458 million compared to net debt of \$382 million at the end of the prior year. This deterioration of our financial position is manageable in the context of our revenue stream of \$1.5 billion. The net debt represents 30.5%, or approximately 16 weeks of revenue. At March 31, 2012, the GNWT's long-term debt was \$ 198.1 million (excluding the debt of the NWT Hydro Corporation and the NWT Opportunities Fund) or 13.2% of the GNWT's revenues for the year and less than 6% of GDP.

Flexibility – pertains to the GNWT's ability to increase its financial resources. The GNWT's own-source revenues decreased from 28.9% of total revenue in 2011 to 27.1% in 2012; income tax revenue is the major source of any fluctuation. The majority of revenue comes from the Grant from the Government of Canada (Formula Financing arrangement). The GNWT does not have access to resource royalty revenues as the Government of Canada controls all NWT subsurface resources. The GNWT and the Government of Canada have entered into devolution negotiations that include resource revenue sharing; however the monetary impact and timeframe for completion of a final agreement are currently uncertain. The GNWT has a federally imposed limit on its borrowing of \$800 million. Although the GNWT is currently well under its debt authority limit, \$800 million represents only 52.2% of 2011-2012 expenses, or 27 weeks of operations.

The GNWT's flexibility to increase its financial resources is currently limited. The lack of access to resource revenues combined with very little room, if any, to increase taxes and still remain competitive with the other provinces and territories makes a significant increase in own source revenues unlikely in the short term. The limit on the borrowing capacity as set by the Government of Canada precludes the use of debt to increase financial resources; as well, an increase in debt would at best provide short term flexibility.

Vulnerability – this is a measure of how dependent a Government is on sources of funding outside its control or influence. To assess the GNWT's vulnerability, it is not necessary to look further than the Government's limited own-source revenues and the volatility related to corporate and personal income taxes. The formula determining the Territorial Formula Financing Grant is established in federal legislation and will remain in effect until March 31, 2014. At the December 2011 Finance Ministers' Meeting, the federal Finance Minister committed to renewing the current Territorial Formula Financing for an additional five years, until the 2018/2019 fiscal year.

In summary, the GNWT is financially stable at this point in time, but it has limited flexibility to raise new revenues and it continues to be very vulnerable to federal control over changes to its future revenues.
