Appendix 7 - Policy for the Provision of Air Transportation  
Facilities and Services in the Yukon and Northwest  
Territories

Appendix 8 - Portable Nursing Station Design

APPENDIX 1

"National Objectives for Northern Canada"  
(approved by the Cabinet, Government of Canada, December 1970)

## APPENDIX 1

"National Objectives for Northern Canada"  
(approved by the Cabinet, Government of Canada, December, 1970)

The seven northern objectives are:

1. To further the evolution of government in the Northwest Territories

The objective is to establish effective and responsible political institutions so that northern residents have the means to regulate the quality of their own lives.

2. To provide for a higher standard of living, quality of life, and equality of opportunity for Northern residents by methods which are compatible with their own preferences and aspirations

The objective is to ensure that all people who live in the Northern territories have the same opportunities for a productive and satisfying life as are open to other Canadians. In particular, special efforts are to be made to improve the status of the native peoples.

3. To realize the potential contribution of the Northern Territories to the social and cultural development of Canada

The objective is to ensure that the unique cultural heritage of northern residents, particularly that of the native peoples, becomes an enduring part of Canadian culture and is respected in its own right.

4. To encourage viable economic development within the Northern Territories so as to realize their potential contribution to the national economy and the material well-being of Canadians

The objective is to ensure that the development of the economic potential of the Northern Territories serves both the interests of northern residents and of all Canadians and that development is sufficiently diversified so that growth becomes stable, sustained, and increasingly self-generating.

5. To maintain Canadian Sovereignty and security in the North

This objective is to ensure that Canadian economic, cultural, and other institutions remain under Canadian authority and that non-nationals active in the Northern territories abide by Canadian legislative and regulatory requirements.

6. To maintain and enhance the northern environment with due consideration to economic and social development

This objective is to ensure that the unique and delicate northern ecological-system is not irreparably damaged by a careless approach to economic development.

7. To develop fully the leisure and recreational opportunities in the northern territories

This objective is to ensure that parts of the Northern territories are retained for the possible recreational and leisure opportunities available to future generations of Canadians.

Policy for the Provision of Air Transportation  
Facilities and Services in the Yukon and Northwest Territories

Policy for the Provision of Air Transportation

Facilities and Services in the Yukon and Northwest Territories

A. GENERAL

B. CLASSIFICATION OF ARCTIC AIRPORTS

- Arctic A (Major)
- Arctic B (Area)
- Arctic C (Community)
- Arctic Seaplane Bases

C. MINIMUM STANDARDS FOR ARCTIC AIRPORT FACILITIES

1. Arctic A Major
2. Arctic B Area
3. Arctic C Community
4. Arctic Seaplane Bases

D. ARCTIC AIR ROUTE NAVIGATIONAL FACILITIES

E. PROVISION, OPERATION AND MAINTENANCE OF ARCTIC AIRPORT COMMUNICATION, AND METEOROLOGICAL FACILITIES

1. M.O.T. Responsibilities
2. Y.T./N.W.T. Responsibilities
3. D.O.E. Responsibilities

G. FINANCIAL RESPONSIBILITIES

1. M.O.T.
  - (a) Capital
  - (b) Operation and Maintenance      Arctic A
  - (c) Operation and Maintenance      Arctic B & C
  - (d) Revenue
2. D.I.N.A.
3. Territorial Governments

A. GENERAL

1. The Ministry of Transport shall provide and maintain adequate air transportation facilities to meet the public need in the Yukon and Northwest Territories in accordance with the criteria and standards outlined in the following policy.

B. CLASSIFICATION OF AIRPORTS

Arctic Airports shall be provided at communities in the Yukon and Northwest Territories classified in accordance with the following criteria: Note - the application of these criteria must of necessity be flexible due to changing circumstances such as resource exploration and exploitation, air service route structure, types of aircraft being used, acceptability of other means of transportation.

(1) Arctic "A" (Major) Airports

Those airports serving population centers which have the following characteristics:

- served by an air carrier on a regular scheduled basis
- no means of regular transportation other than air
- major distribution center
- strategic location
- a capital or regional administrative center
- an extensive continuing resource development role

(2) Arctic "B" (Area) Airports

Those airports serving population centers which have the following characteristics:

- a population of more than 400
- no means of regular transportation other than air
- served by a regular reliable air service
- a growing community
- an administrative center
- an active role in resource development

(3) Arctic "C" (Community) Airports

Those airports serving population centers which have the following characteristics:

- a population of more than 100
- no means of regular transportation other than air

(4) Arctic Seaplane Bases

Seaplane facilities will be provided where it is determined that such facilities are justified on the basis of economic and technical evaluations.

C. MINIMUM STANDARDS FOR AIRPORT FACILITIES

Air transportation facilities will be provided to the following standards to ensure communities in the Canadian Territories may be provided with reliable, regular and efficient air services:

14. Arctic A - (MAJOR) Airports - to be used by Boeing 737 and 727, Lockheed Electra and Hercules and similar turbine-engined aircraft operated on a regular basis.

Runway - 6,000' x 150' paved or stabilized surface for year round use. Runways of a greater length will be provided based on a detailed evaluation of the operational and economic factors to accommodate the operation of a large aircraft. The maximum applicable clearway will be provided and declared.

Lighting - High intensity runway and approach lighting, lighted taxiways, visual approach slope indicators and threshold identification lights, either singly or in combination as will meet the operation requirements, rotating beacon, lighted wind socks.

- Approach Aids
    - Instrument Landing System (ILS)
    - non-directional beacon (NDB)
  - Navigation Aids
    - Very high frequency Omni range and distance measuring equipment (VOR/DME)
  - Passenger Aircraft and Airport Facilities
    - Passenger terminal building, airport access road
    - Paved or stabilized aircraft parking area and taxiway
    - Aviation fuel storage and dispensing facilities.
    - Airport Maintenance equipment, garages, and serving facilities.
  - Communication
  - Meteorological
    - Routine meteorological observing programmes, connection to dedicated meteorological circuit(s) to provide requisite information required for pre-flight planning and flight watch
2. Arctic "B" - (Area) Airports - to be used by F28, 748, F227, YS11 and similar turbine-engined aircraft operated on a regular air service.
- Runway
    - 5,000' x 150' gravel surface for year round use. A runway of lesser length

with a designated clearway\*\* may be acceptable where due to terrain restrictions 5,000' is uneconomical or where a suitable site is too remote from the community.

Lighting

- Runway and approach lighting, visual approach slope indicators and threshold identification lights, either singly or in a combination as will meet the operational requirements, rotating beacon, lighted winds socks.

Approach and Navigation Aids

- Non-directional beacon (NDB)

Passenger, Aircraft and Airport Facilities

- Passenger-cargo shelters, airport access road, aircraft parking area, aviation fuel storage and dispensing facilities, airport maintenance equipment, garages and servicing facilities.

Communications

- Air-ground and Point-to-point communications

Meteorological

- Meteorological observations on request, communications (radio or land-line) links through which requisite meteorological information for pre-flight planning\* can be obtained on request.

3. Arctic "C" - (Community) Airports - to be used by Twin Otter, Cessna 402, Aztec and similar STOL and light twin aircraft.
- Runway - 3,000' x 100' gravel surface for year round use. A runway of lesser length, with a designated clearway\*\* may be acceptable where due to terrain restrictions, 3,000' is uneconomical or the site is too remote from the community.
- Lighting - Runway and approach lighting, visual approach slope indicators, threshold identification lights, singly or in combination as will meet the operational requirements, rotating beacon, lighted wind socks.
- Approach and Navigation Aids - Non-directional beacon (NDB)
- Passenger and Aircraft Facilities - Passenger-cargo shelter, airport access road, aircraft parking apron, aviation fuel storage and dispensing facilities, airport maintenance equipment, garages and servicing facilities.
- Communications - Air-ground and point-to-point communications.

Meteorological

- Meteorological observations on request, communications (radio or land-line) links through which requisite meteorological information for pre-flight\* planning can be obtained on request.

\* Pre-flight planning includes actual weather reports for destination and significant enroute airports, forecasts of enroute meteorological conditions, terminal forecasts for destination and alternate(s) and relevant weather advisories.

\*\* When, by reason of the constraints mentioned, it is not practicable to provide the minimum standard length of runway at "B" and "C" airports, the maximum applicable clearway will be provided and declared, where it is practicable and economically feasible to do so. This will permit the air carrier, as required, to exploit load advantages accruing from the use of the clearway.

4. Arctic Seaplane Bases - A minimum standard to provide a safe and efficient operation commensurate with the type and frequency of seaplane service envisaged.

D. ARCTIC AIR ROUTE NAVIGATION FACILITIES

In addition to the VOR/DME to be installed at the Arctic "A" airports, VOR/DME shall be installed at strategically located "B" and "C" airports or other locations where the facility is required to upgrade the navigational information along major airways and air routes. At locations where VOR/DME is installed it may, where practicable, be sited to serve as an approach aid also.

Where VOR/DME is installed, it is intended that any existing NDBs shall remain in service and, where necessary, shall be upgraded to comply with MOT standards.

E. PROVISION, OPERATION AND MAINTENANCE OF ARCTIC AIRPORT

COMMUNICATION AND METEOROLOGICAL FACILITIES AND SERVICES

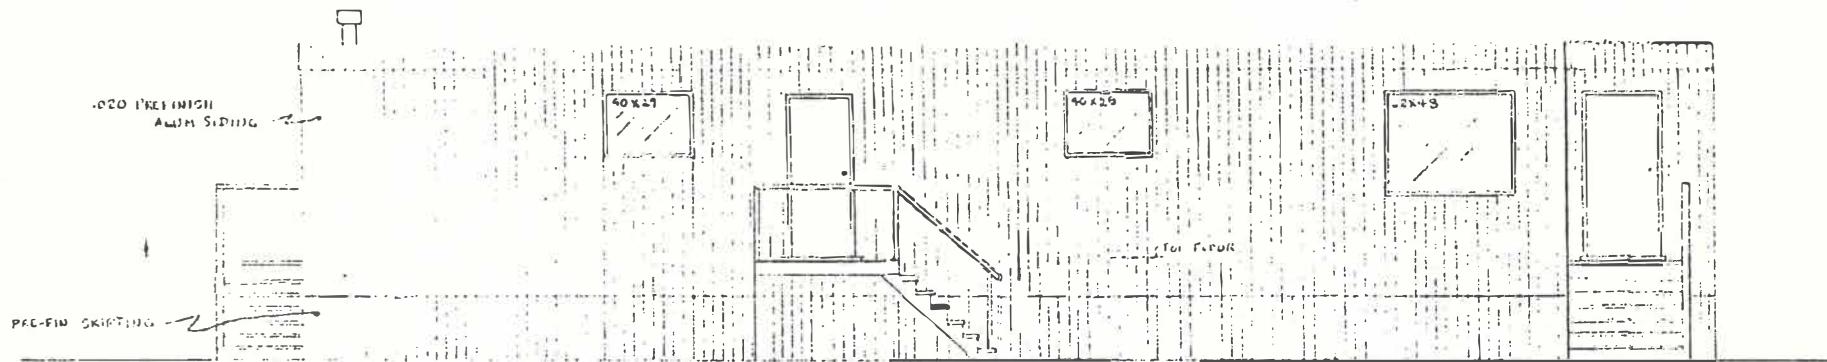

1. The Ministry of Transport shall be responsible to:
  - (a) Provide all air transportation facilities and equipment at all Arctic Airports in accordance with priorities and requirements established in consultation with Territorial Governments, Department of Indian and Northern Affairs and Department of the Environment.
  - (b) Operate and maintain all air transportation facilities and services at Arctic "A" airports.
  - (c) Inspect and maintain communications equipment at Arctic "B" and "C" airports.

- (d) Train and monitor communication operators and monitor communication standards at Arctic B and C airports.
  - (e) Define land requirements for airport development at A, B and C airports. Land for Arctic "A" airports and other airports and installations operated and maintained by the Ministry of Transport shall be transferred to MOT for administration and control.
  - (f) Provide technical advice and training services to Territorial Governments for the operation and maintenance of Arctic B and C airports to MOT standards.
  - (g) Provide, operate and maintain other specific airports, aeradio stations or other facilities and services to meet national or international requirements.
2. The Territorial Governments shall be responsible to:
- (a) Operate and maintain Arctic B and C airports in accordance with MOT standards.
  - (b) Operate communication and meteorological equipment at Arctic B and C airports in accordance with MOT standards
- and equipment fuel storage for the maintenance of Arctic B and C airport services where the equipment and facilities will be used for airport and community purposes jointly.

- (d) At Arctic B and C airports, provide staff housing as required.
  - (e) Operate aviation fuel storage and dispensing facilities where it is not practicable for industry to do so.
  - (f) In coordination with Department of Indian and Northern Affairs, provide and maintain land reservations for airport and other air transportation purposes.
3. The Department of the Environment shall be responsible to:
- (a) Provide, inspect and maintain meteorological equipment at Arctic B and C airports.
  - (b) Train and monitor weather observers and monitor meteorological standards at Arctic B and C airports.
  - (c) Operate essential facilities to meet national and international requirements.
- F. FINANCIAL RESPONSIBILITIES
1. The Ministry of Transport shall:
- (a) Fund the provision of all airport, air navigation, communications and meteorological facilities and equipment in the Air Transportation - Capital Expenditures Vote.

- (b) Fund the maintenance and operation of all air transportation facilities and services undertaken directly by the Ministry or by the Department of the Environment in support of these services in the Air Transportation - Operating Expenditures Vote.
  - (c) Fund the operation and maintenance of "B" and "C" Airports undertaken by the Territorial Governments in the Air Transportation - Grants and Contributions Vote.
  - (d) Levy aircraft landing fees and other charges as may be established from time to time.
2. The Department of Indian and Northern Affairs shall:
- Fund the provision of the joint community airport maintenance equipment, equipment garages, equipment fuel storage and handling facilities and staff housing in the Northern Development Program.
3. The Territorial Governments shall:
- Develop annually, in advance, the O & M budgets for "B" and "C" airports in consonance with responsibilities outlined at Para. E2 above. These budgets will be based on technical advice from MOT and will be approved by MOT for the funding in the Air Transportation - Grants and Contributions Vote.
- Levy and collect airport landing fees and other charges for services provided.
