**1. AUTHORITY, OPERATIONS AND REPORTING ENTITY**

**(a) Authority and operations**

The Government of the Northwest Territories (the Government) operates under the authority of the *Northwest Territories Act* (Canada). The Government has an elected Legislative Assembly which authorizes all disbursements, advances, loans and investments unless specifically authorized by statute.

**(b) Reporting entity**

The Government prepares consolidated financial statements. They are presented in Section I of the Public Accounts and provide an accounting of the full nature and extent of the financial affairs and resources for which the Government is responsible. The consolidated reporting entity is defined in those statements. These financial statements have been prepared on a non-consolidated basis to show the operating results of the Government separate from the entities included in the consolidated financial statements.

These financial statements include the assets, liabilities and operating results of the Government and its revolving funds. Revolving funds are established by the Government to provide the required working capital to deliver goods and services to the general public and to Government departments.

The following related Government Territorial Crown Corporations, boards and agencies are included in these statements only to the extent of the Government's contributions to, or revenues from, them:

- Aurora College
- Divisional Educational Councils and District Education Authorities
- Hospitals and Regional Health Boards
- Northwest Territories Business Credit Corporation
- Northwest Territories Development Corporation
- Northwest Territories Housing Corporation
- Northwest Territories Power Corporation

Detailed financial information on revolving funds and Territorial Crown Corporations is included in Section III of the Public Accounts.

**(c) Main estimates**

The Main Estimates are the appropriations approved by the Legislative Assembly. They represent the Government's original fiscal plan for the year and do not reflect Supplementary Appropriations.

The estimated supplementary requirements and the estimated appropriation authority lapse are included in the Main Estimates on the statement of operations and surplus. They are included for the purpose of comparing the actual net operating revenue (expense) to the estimated net operating revenue (expense).

## 2. SIGNIFICANT ACCOUNTING POLICIES

### (a) Use of estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires the Government to make estimates and assumptions that affect the amounts of assets, liabilities, revenues and expenses reported in the financial statements. By their nature, these estimates are subject to measurement uncertainty. The effect on the financial statements of changes to such estimates and assumptions in future periods could be significant, although, at the time of preparation of these statements, the Government believes the estimates and assumptions to be reasonable.

Some of the more significant management estimates relate to employee future benefits, contingencies, revenue accruals and Students Loan Fund allowances for both forgivable and bad loans. Other estimates, such as Canada Health and Social Transfer payments and Corporate and Personal Income Tax revenue are based on estimates made by Canada's Department of Finance and are subject to adjustments in future years. Another significant estimate is the Grant from Canada, which incorporates estimates supplied by Statistics Canada and Canada's Department of Finance. Many of the statistical estimates are not finalized until three to seven years after the year end.

### (b) Short-term investments/designated cash and investments

Investments are valued at the lower of cost or market value. Interest income is recorded on the accrual basis, dividend income is recognized as it is received and capital gains and losses are recognized as incurred.

Investment in securities denominated in foreign currencies are translated into Canadian dollars at the prevailing exchange rate at year end. Foreign currency transactions during the year are translated into Canadian dollars at the exchange rate at the transaction date.

### (c) Inventories and prepaid expenses

Inventories for resale consist of bulk fuel and liquor products. Bulk fuels are valued at the lower of weighted average cost and net realizable value. Liquor products are valued at replacement cost. Other inventories are valued at the lower of cost, determined on a first in, first out basis and net replacement value.

Prepaid expenses are advance payments made prior to year end to meet April 1 deadlines.

### d) Loans receivable

Loans receivable and advances are stated at the lower of cost and net recoverable value.

Valuation allowances, which are recorded to reduce loans receivable, are based on past events, current conditions and all circumstances known at the date of the preparation of the financial statements. Interest revenue is recognized when earned. Interest revenue is not accrued when the collectibility of either principal or interest is not reasonably assured.

### (e) Investment in the Northwest Territories Power Corporation

The Government is a shareholder of the Northwest Territories Power Corporation, a Territorial Crown Corporation providing utility services to the Northwest Territories. The Government's share of the net assets of the Corporation has been recorded at a nominal value.

March 31, 2002

---

**2. SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(f) Tangible capital assets and leases**

Tangible capital assets are buildings, roads, equipment, etc. whose life extends beyond the fiscal year, original cost exceeds \$50,000 and are intended to be used on an ongoing basis for delivering services. Individual assets less than \$50,000 are expensed when purchased.

Tangible capital assets are recorded at cost, or where actual cost was not available, estimated current replacement cost converted back to date of purchase by discounting current year dollars for inflation. Gifted and cost shared tangible capital assets from Canada are recorded at fair market value upon receipt, with the gifted or cost shared portion shown as a deferred capital contribution. This deferred capital contribution is amortized as revenue on the same basis as the related asset is amortized. Tangible capital assets, when placed in service are amortized on straight line basis over their economic life based on the following guidelines:

Asset category	Amortization period
Land	Not amortized
Roads and bridges	40 years
Airstrips and aprons	40 years
Buildings	40 years
Ferries	25 years
Water/sewer works	25 years
Computers and software systems	5 - 10 years
Mobile and heavy equipment	7 - 15 years
Major equipment	5 - 15 years
Medical equipment	5 - 15 years
Leasehold improvements	Lease term plus renewal option

Tangible capital assets under construction or development are recorded as work in progress with no amortization until the asset is placed in service. Capital lease agreements are recorded as a liability and a corresponding asset based on the present value of any payments due. The present value is based on the specified rate or the government's borrowing rate at the time the obligation is incurred. Operating leases are charged to expenses. Works of art and historical treasures are not recorded.

**(g) Post employment benefits**

Employees participate in the Public Service Superannuation Plan administered by the Government of Canada. The Government contributes at a rate of 2.14 times (2001 - 2.14 times) the employee's contribution. The Government's contributions are charged as an expense on a current year basis and represents the total pension obligations. The Government is not required under present legislation to make contributions with respect to actuarial deficiencies of the Public Service Superannuation Plan.

Under the terms and conditions of employment, government employees may earn non-pension benefits for resignation, retirement and removal costs based on years of service. The benefits are paid upon resignation, retirement or death of an employee. The expected cost of providing these benefits is recognized as employees render service. Termination benefits are also recorded when employees are identified for lay-off. The cost of the benefits has been determined based on management's best estimates.

Pension benefits to Members of the Legislative Assembly and judges are reported on an actuarial basis. This is done to determine the current value of future entitlement and uses various estimates. When actual experience varies from estimates, the adjustments needed are amortized over the estimated average remaining service lives of the contributors.

March 31, 2002

---

**2. SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(h) Commitments and contingencies**

The nature of the Government's activities requires negotiation of contracts that are significant in relation to its current financial position or that will materially affect the level of future expenses. Contractual commitments pertain to operating, commercial and residential leases, capital projects, and operational funding commitments.

The contingencies of the Government are potential liabilities which may become actual liabilities when one or more future events occur or fail to occur. If the future event is likely to occur or fail to occur and is quantifiable, an estimated liability is accrued. If the likelihood is not determinable or the amount cannot be reasonably estimated, the contingency is disclosed. Contingent liabilities result from potential environmental contingencies or pending litigation and like items.

**(i) Grant from Canada**

The Grant from Canada is subject to the terms of the Formula Financing Agreement with Canada. The Grant entitlement is dependent on a number of variables, including population growth, the growth of provincial-local government spending, personal and corporate income tax revenues and other federal transfers.

The initial payments of the Grant are based on estimates of these variables, supplied by Statistics Canada, Canada's Department of Finance and the Government. Adjustments are made as final data becomes available which can take between three to seven years. These adjustments can be significant. Population figures are initially based on Statistics Canada's post-censal estimates, which are adjusted to census data every five years. All known changes to estimates, relating to current year and prior years, are recorded in the current year as revenue adjustments.

**(j) Projects for Canada, Nunavut and others**

The Government undertakes projects for Canada, Nunavut and others for which it receives accountable advances. Unexpended balances are recorded as current liabilities, and recoveries are accrued when expenses, as allowed under the project contract, exceed advances.

**(k) Taxes**

Income tax revenue is recognized on an accrual basis. Taxes, under the *Income Tax Act*, are collected by Canada on behalf of the Government under a tax collection agreement and are remitted to the Government monthly. The remittances are based on the Canada's Department of Finance's estimates for the taxation year, which are periodically adjusted until the income tax assessments for that year are final. Changes to personal and corporate income tax estimates can have a significant impact on the Grant from Canada.

Fuel, tobacco and payroll taxes are levied under the authority of the *Petroleum Products Tax Act*, the *Tobacco Tax Act* and the *Payroll Tax Act* respectively. Revenues are recognized on an accrual basis based on the statements received from collectors or employers. Adjustments from reassessments are recorded in revenue in the year they are identified. Property tax and school levies are assessed on a calendar year basis and are recognized on an accrual basis in the fiscal year in which the calendar year ends.

**(l) Other revenues/deferred revenue**

Licenses, fees and permits are recorded on a cash basis. All other revenues are recorded on an accrual basis. Funding received for specified purposes is deferred until the related expenses are incurred.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(m) Expenses

Expenses are recorded on an accrual basis. The Government records expenses in the year in which the related goods and services are consumed. Government grants and contributions are accrued as expenses when paid or when the recipient has fulfilled the terms of the contractual agreement.

(n) Recoveries of prior years' expenses

Recoveries of prior years' expenses and reversals of prior years' expense accruals are reported separately from other revenues on the statement of operations and accumulated surplus. Pursuant to the *Financial Administration Act*, these recoveries cannot be used to increase the amount appropriated for current year expenses.

3. CASH

Cash	<b>\$ 103,700</b>	<b>\$ 1,166</b>

The Government also has a line of credit provided by the Chartered Banks. There are no fixed repayment terms and the overdraft limits are negotiated over the year based on the forecasted cash flows and borrowing requirements of the Government. The overdraft interest rate is based on prime and the collateral is on the Consolidated Revenue Fund of the Government. Interest is charged on the net balance of the Government and its pool participants. As at March 31, 2002 there is a net overdraft balance of \$17,880,000 (2001 - nil).

4. SHORT-TERM INVESTMENTS

The surplus cash of the Government is pooled with the surplus cash of certain Territorial Crown Corporations, boards and agencies. This investment pool is invested in a diversified portfolio of high grade, short and long term income producing assets.

At March 31, 2002 the investment pool had total investments of \$273 million (2001 - \$93 million). The Government's portion of this is \$234,707,000 (2001 - \$47,652,000). The eligible classes of securities, categories of issuers, limits and terms are approved under the Government's investment guidelines, Financial Administration Act and Investment Regulations. All short-term instruments, depending on the investment class, are rated R-1 Middle Low or better from the Dominion Bond Rating Service Ltd. Investments are diversified limiting them, depending on the type of investment, to a maximum of 5% to 50% of the total portfolio. There is no significant concentration in any one investment.

At March 31, 2002 the average term to maturity was 20 days. The portfolio yield for the year varied from 1.91% to 5.06%. In 2002 the Government earned interest on short-term investments of \$2,016,000 (2001 - \$765,000).

The expected payments due for Employee Future Benefits in the current year are \$1,935,000 (2001 - \$2,470,000).

The Government maintains the Legislative Assembly Retiring Allowances Fund and the Territorial Court Judges' Registered Pension Plan. Both plans are contributory defined benefit pension plans. These two pension plans are fully funded, consequently the Government has no liabilities as at March 31, 2002 (2001 - nil). The funds related to these plans are administered by independent trust companies. As well there are two supplementary plans known as the Legislative Assembly Supplementary Retiring Allowance and the Judges' Supplemental Pension Plan. These two plans are non-contributory defined benefit pension plans. The Government is liable for all benefits. Benefits provided under all four plans are based on service and/or earnings.

Actuarial valuations were completed for the Legislative Assembly and Judges' plans as of March 31, 2000 and April 1, 2001 respectively, using the projected benefit method prorated on service. The valuation is based on a number of actuarial assumptions about matters such as mortality, service, withdrawal, earnings and interest rates. The assumptions are based on the Government's best estimates of expected long-term rates and short-term forecasts. The actuarial valuations were extrapolated to March 31, 2002, if they were not valued at the balance sheet date.

**Pension Expense**

Pension expense for the Legislative Assembly Retiring Allowances Fund, the Territorial Court Judges' Registered Pension Plan, the Legislative Assembly Supplementary Retiring Allowance and Judges' Supplemental Pension Plan for the year totalled \$997,000 (2001 - \$1,375,000). The Government's contributions to the Public Service Superannuation Plan were \$16,272,000 (2001 - \$14,159,000).

**15. PETROLEUM PRODUCTS STABILIZATION FUND**

The Petroleum Products Stabilization Fund is included in the accumulated surplus. The purpose of the Fund is to stabilize the prices of petroleum products purchased, sold and distributed by the Government. The net revenues or expenses of the Petroleum Products Revolving Fund are charged to the Stabilization Fund. The accumulated surplus or deficit balance in the fund cannot exceed \$5,000,000.

**(a) Commissions Commitment**

The government has entered into fuel delivery contracts for 16 communities. Two contracts will expire in 2002, nine in 2003 and five in 2004. Under these contracts, fixed commission rates are paid. The value of this commitment is estimated at \$1,750,000.

**(b) Chargeback of Services**

The Government has 13 (2001 - 10) cost recovery service agreements with the Government of Nunavut for the provision of various corporate and program delivery services. The expenses on and costs recovered from these projects on behalf of Nunavut are estimated at \$10,820,000 (2001 - \$9,397,000) for the fiscal year 2002-2003.

**18. CONTINGENCIES**

**(a) Contingent liabilities**

The Government is contingently liable for the following:

	(thousands of dollars)
Debentures issued by the Northwest Territories Power Corporation, maturing from 2009 to 2026	\$ 97,421
Loans payable by the Northwest Territories Housing Corporation	27,754
Loans payable by the Northwest Territories Power Corporation	28,000
Guaranteed operating lines of credit	17,820
Guaranteed residential housing loans	2,615
Uninsured loss	1,948
	<hr/>
	<b>\$ 175,558</b>

**(b) Environmental restoration costs**

As circumstances and funding have permitted, the Government has been addressing the problem of environmental liabilities. In a number of departments, this process has consisted of identifying sites of potential liability and remediating the sites as necessary.

The Government has identified 472 sites in, or in close proximity to communities, where environmental liabilities may exist. Of these, 176 sites have been assessed. To date 73 of the 176 sites have been remediated or it has been determined no liability exists. Other assessed sites either have remediation plans in place or are undergoing further study.

Of the total sites identified, 123 are active fuel caches managed by the Department of Resources, Wildlife and Economic Development that are located a distance from communities. Many of these caches, because of their remoteness and the small number of drums involved (with the potential for only limited local contamination), have not yet been formally assessed. As these sites are re-supplied, each is assessed for liabilities. In addition, the Department currently has 63 inactive fuel caches where there are no drums stored.

The Government will continue with its program of site inspection, assessment and remediation on an ongoing basis. In those cases where the cost of remediating sites is quantifiable, an estimated liability is accrued. As at March 31, 2002, cost estimates of sufficient accuracy are not yet available to predict future costs, if any, of restoration, consequently, no liabilities have been accrued.

**18. CONTINGENCIES (continued)**

**(c) Guarantees**

The Government has guaranteed operating lines of credit for Sirius Diamonds Ltd. to a maximum of \$10,000,000; Arslanian Cutting Works (NWT) Ltd. to a maximum of \$9,200,000 and Deton'Cho Diamonds Inc. to a maximum of \$5,000,000 subject to terms of the guarantee agreements which may require specific approval for future advances. The current balances of the operating lines of credit are \$7,990,000; \$7,230,000; and \$2,600,000 respectively. Subsequent to March 31, 2002 the guarantee for \$2,600,000 was called by the bank. The Government is negotiating recovery.

The Government has provided a guarantee to the Canadian Blood Agency and Canadian Blood Services to cover a share of potential claims made by users of the national blood supply. The Government's share is limited to the percentage the Northwest Territories' population is of the total Canadian population.

**(d) Grant, Transfer Payments and Taxes**

Grant, transfer payments and taxes are inter-related. As detailed in note 2(i) and note 2(k), year-to-year fluctuations in corporate and personal income tax revenue, can have a significant impact on the grant and transfer payments from Canada.

Furthermore, income tax determined by Canada combines actual assessments with an estimate that assumes that previous years' income tax levels will be sustained. If tax revenue is not sustained, the future tax revenue will decrease and the grant and transfer payments will increase, albeit at a somewhat smaller amount.

It is not known, with any certainty, if the current levels of corporate income tax revenue will be sustained. Differences between current estimates and actual tax revenues, if any, will be recognized when the actual assessments are finalized over the next three to five years.

**19. RELATED PARTIES**

Transactions with related parties and balances at year-end, not disclosed elsewhere in the financial statements, are disclosed in this note. During the year the Government made grants and contributions to the following related parties.

**19. RELATED PARTIES (continued)**

The Government funds communities, boards and agencies and other organizations offering services to the public. These organizations operate independently of normal Government operations. The Government may be held responsible for any liabilities or deficits on behalf of these boards and agencies. An estimate of the potential liability, if any, cannot be determined.

Under agreements with related boards and agencies, the Government provides services at cost or for a service fee where direct costs cannot be determined. The fees charged for indirect costs are not necessarily the cost of providing those services. Services provided included personnel, payroll, financial, procurement, accommodation, buildings and works, utilities, legal and interpretation services. Direct costs of \$71,925,000 (2001- \$58,780,000) were incurred and recovered from related parties.

The Government of the Northwest Territories receives dividend revenue in return for its investment in the Northwest Territories Power Corporation. Dividend revenue for the current year is \$4,000,000 (2001 - \$4,068,000).
