CHAPTER ONE
I N T R O D U C T I O N

The "Survey of Handicapped Persons" was initiated by the Health Care Plan, Department of Social Development in April, 1976, in the belief that planning for comprehensive services for the handicapped could occur only on a foundation of statistical information about the handicapped.

In order to obtain an overview of the situation, information was sought regarding handicapped persons residing in the Northwest Territories, as well as handicapped persons from the Northwest Territories residing in the provinces.

The information collected included the number of handicapped persons, their handicapping conditions, background information, present status, present needs, and anticipated future needs related to physical, mental, social, employment, residential, rehabilitative and special services.

The amount of data collected during the survey is beyond expectation. All of the statistical data has been included in this report, with the realization that some parts of it may prove of no value in the planning process. All of the data has been tallied and correlated by hand, and the reader will notice areas where human error has resulted in small imbalances in totals. As the material is used, it is hoped that the experience gained can be applied to refine further work of this nature to be undertaken in the Northwest Territories.

The mandate of the Health Care Plan in undertaking this survey was to present statistics regarding handicapped persons, not to recommend or develop programs for handicapped persons. It is the hope of the Health Care Plan that the statistical information included in this report will be analysed, and that it can be used to assist in the development of programs for handicapped persons.

CHAPTER TWO
THE SURVEY

SECTION I: OBJECTIVES

4

The immediate objective of the survey is to provide statistics regarding handicapped persons in the Northwest Territories. These statistics are required for a number of reasons:

- a) To demonstrate the need for comprehensive preventive services and health screening procedures, and to ascertain the kinds of such services which are required.
- b) To demonstrate the need for special medical, social, educational, vocational and rehabilitative services and facilities, and to ascertain the kinds of such services which are required.
- c) To observe the occurrence of handicapping and genetic conditions for epidemiological investigation of causative factors.

SECTION II: METHODOLOGY

For the purposes of the survey, a definition of a handicapped person was adopted. It is a definition which is commonly used in Canada, and which relates primarily to the individual's ability to function rather than purely to his diagnosis.

The definition of handicapped person is:

One who possesses a physical, mental, and/or emotional problem which is likely to be permanently disabling, to interfere with education, or to prevent full and open employment. Also, any person with a familial condition or a congenital malformation which is not disabling.

Before beginning the survey, an attempt was made to obtain all information available from any agency regarding handicapped persons. This involved collecting and compiling lists from the Chronic Disease Register, Health and Welfare Canada; the Department of Education and the Department of Social Development. The information received was used as baseline information upon which the survey was developed.

Other agencies concerned with the handicapped were contacted. These included the N.W.T. Mental Health Association, Canadian National Institute for the Blind, Canadian Coordinating Council on Deafness, Keewatin Association for Disabled Children, Canadian Rehabilitation Council for the Disabled.

The Survey consisted of two parts:

- a) The collection of information regarding handicapped persons residing in the Northwest Territories.
- b) The collection of information regarding handicapped persons from the Northwest Territories residing in the provinces.

The information was collected by surveyors employed by the Department of Social Development who travelled throughout the Northwest Territories and the provinces. The information was collected in person, to as great a degree as possible, from health and/or social workers, teachers or other knowledgeable persons in the communities in the Northwest Territories, and from professional staff in institutions in the provinces. A form was used by the surveyors as an interview guide (see Appendix I). Supporting documents explained the form: e.g. Guide to Handicapping Conditions (Appendix II), levels of institutional care (Appendix IV).

The form was loosely structured to allow the reporting agency to make comments pertinent to the individual regarding topics relating to general functioning without utilizing a lengthy questionnaire.

SECTION III: COMPILING AND CORRELATING THE INFORMATION

The information collected on the forms was transferred onto individual cards. Each piece of pertinent information was coded, including handicapping condition (Appendix II), background information (Appendix V), present status (Appendix VI) and future needs (Appendix VII).

Utilizing tally sheets, this information was entered into binders by code, broken down by community and region, diagnosis, and age group.

The information was then correlated on summary sheets which make up this report, and which reflect the status of handicapped persons in the Northwest Territories today.

CHAPTER THREE
THE RESULTS

SECTION I: SUMMARY OF INTERESTING STATISTICS

The chart which follows presents the number of handicapped persons, number of multiple diagnoses (ie. conditions occurring in individuals with more than one handicap), and the number of handicapping conditions by region, in the provinces and in total.

	Number of Handicapped Persons	Number of Multiple Diagnoses	Number of Handicapping Conditions
Baffin	296	95	391
Inuvik	213	96	308
Keewatin	272	87	359
Ft. Smith North	149	42	191
Ft. Smith South	520	227	747
N.W.T. Total	1450	547	1996
Southern Study	125	74	199
Total	1575	621	2195

The conditions most frequently reported are as follows:

	Number of Persons in N.W.T.	Number of Persons in South	TOTAL
Mental Retardation - (E1)	169	69	238
Character, Behavior, Intelligence Disorders -(E4)	185	12	197
Arthritis -(M1)	111	1	112
Bilateral Deafness - (G10)	86	20	106
Unilateral Blindness - (G6)	87	0	87
Obstructive Lung Disease - (I3)	81	1	82
Epilepsy -(F3)	72	9	81

Of the 1,575 handicapped persons reported from the N.W.T. and the South, 102 had conditions known to be congenital; 607 had received specialized medical services, usually in the South; 11 persons are confined to bed; 32 have eye prostheses; 82 have hearing aides.

Education: 23 persons have received post secondary school education, or special training related to their handicaps. 81 persons are receiving special education, 38 in the N.W.T. and 43 in the South. 81 persons in N.W.T. and 4 in the South require special education at this time.

Social: 40 persons in the N.W.T. are not accepted by their families or communities.

At present, 22 persons in the N.W.T. are receiving homemaker services. At the present, an additional 78 persons in the N.W.T. require homemaker services.

Employment: 106 persons in the N.W.T. find employment a problem as a result of their handicaps. 1 person in the N.W.T. is attending a sheltered workshop, 4 in the South. 5 persons are receiving job skills training in the N.W.T.; 1 in the South. No persons are receiving special services with respect to employment related to their handicaps.

However, it is interesting to note that in the N.W.T., 43 persons require sheltered workshop at this time, 48 require job skills training, and 8 require services related to employment. In the immediate future, an additional 8 persons will require sheltered workshop, 5 will require job skills training, and 12 will require employment.

Other Services: Nine persons require services for the blind, 10 require services for the deaf. 69 persons in the N.W.T. require physiotherapy; 24 require occupational therapy; 20 persons require functional aids in the home. Forty-one persons in the N.W.T. are receiving psychiatric services, 75 persons in the N.W.T. presently require psychiatric services.

Institutional Care: Some care requirements of handicapped persons are as follows:

	Presently Receiving Care in the N.W.T.	Presently Require Care	Require Care in Immediate Future
Supervisory Care	30	15	34
Limited Personal Care	6	19	22
Intensive Personal Care	9	9	3
Long Term Supportive Care	17	11	1

SECTION II: SUMMARY OF STATISTICS - HANDICAPPING CONDITIONS

The following summary sheet presents the total number of handicapping conditions existing in each region in the Northwest Territories, and in people from the Northwest Territories residing in the provinces.

It is important to remember that these statistics do not always indicate the total number of handicapped persons, as some of the persons have more than one handicapping condition. This is reflected in the fact that there were 1575 handicapped persons identified, but there were 2195 handicapping conditions existing in those persons.

Appendix VIII contains further breakdown of the statistics regarding conditions by communities, and by age groups.

SECTION III: SUMMARY OF STATISTICS - BACKGROUND INFORMATION

Pertinent facts relating to the history of handicapped persons were noted and entered into this section. The information was only noted if it seemed significant to the case. Since there were no specific questions asked regarding background information, it is expected that the information reported in this section is numerically low.

Definitions of terminology used in this section follow:

A. BACKGROUND INFORMATION

1. Etiology:
 - a) congenital - condition present at birth.
 - b) acquired - condition resulting from a disease process. example - arthritis, tuberculosis.
 - c) accidental - condition resulting from an accident example - a shooting, a ski-doo accident.
2. Family History:
 - a) known - person interviewed was aware of other family member(s) who had the same or a related handicap, example - mental illness.
3. Education:
 - a) elementary - attained educational level less than high school.
 - b) secondary - attained high school level.
 - c) other - university or technical school, also refers to special training such as a school for the blind or deaf.
4. Occupation:
 - a) received training - has had training to prepare for a particular line of work; eg. typing, heavy equipment operator.
5. Medical History and Services Received:
 - a) date diagnosed - the date that diagnosis was made is known.
 - b) assessment made - medical assessment has been made.
 - c) treatment - has received specialized treatment usually in centres in the South.

Included in this section is a summary sheet presenting background information about handicapped persons by region, and from the South, and totals. Breakdown of the statistics by community and age group occurs in Appendix IX.

(c) treatment	140	74	96	74	188	572	35	

SECTION IV: SUMMARY OF STATISTICS - PRESENT STATUS

Information regarding the present status of handicapped persons was collected and entered in this section.

The "special services required" section refers to services which the handicapped person required at the time of the survey.

It is important to remember that the services required were identified by the reporting agency, and not by the handicapped person. Therefore, some of the services could be considered required by the agency and the handicapped person may not wish the service. Alternatively, the handicapped person may require a service of which the agency is not aware.

For this reason, this section can be used as a guide only. Services in communities cannot be rationalized on the basis of these statistics alone. Further investigation would be essential as a part of the planning.

Definitions of terminology used in this section follows:

B. PRESENT STATUS

1. Physical Health:
 - a) no handicap - condition does not interfere with or restrict person's physical level of functioning.
 - b) occasional handicap - condition interferes with physical functioning at irregular intervals, or for particular activities.
 - c) chronic handicap - condition constantly restricts activities and interferes with general level of functioning.
2. Mental Health:
 - a) no handicap - condition does not affect the person's mental functioning.
 - b) occasional handicap - condition affects person's mental functioning at intervals eg. bouts of depression.
 - c) chronic handicap - condition constantly interferes with person's mental functioning.
3. Ambulation:
 - a)
 - b) walking aids - ambulatory with cane, crutches or brace.
 - c) wheelchair - relies on a wheelchair for ambulation and/or is confined to a wheelchair.
4. Prosthesis:
 - a) eye - uses an artificial eye
 - b) limb - wears an appliance to replace an arm or leg.
 - c) hand or foot - wears an appliance to replace a hand or foot.
 - d) hearing aid - uses a hearing aid.
5. Medications:
 - a) none prescribed - on no medications
 - b) prescribed - is to take medications, but is not responsible for administering them to himself eg. an infant or child.
 - c) taken regularly - medication is prescribed and taken as recommended.
 - d) taken regularly with supervision - takes medication because someone reminds him.
 - e) taken unreliably - does not take medication as recommended.

6. Social:
 - a) refers to whether or not the individual is accepted as and seen as an integral part of his family and community.
7. Residential:
 - a) lives alone in community - maintains a separate residence.
 - b) lives with family or friends - "family" may include parents, husband/wife, and children, or relatives.
8. Occupation:
 - a) attending school
 - b) employed
 - c) handicap interfering with employment - person is unable to be employed in line of work for which he has received training or which he has followed in the past, due to the handicap.
 - d) unemployment due to other causes - handicap is not the reason person is unemployed. He may not be working because there are no jobs available, or because he chooses not to work.

SPECIAL SERVICES:

- A. Psychiatric - refers to counselling, recommendations for treatment and regular follow-up by a psychiatrist. PLEASE NOTE - unless a person was hospitalized, he would be seen by a psychiatrist only when the doctor visited the community. Active, day-to-day follow-up and supervision would be carried out by the nurse in the community, following the psychiatrist's recommendation for care.
- B. Special Education - includes psychological assessment.
 - generally refers to those services not usually available in a normal classroom setting or services which the Department of Education does not consider within its scope to provide.
 - difficult to classify, as facilities vary greatly from one school to another.
- C. Physiotherapy - includes treatments such as exercises and inhalation therapy focussing on maintaining or improving physical functioning. In the settlements, day-to-day physiotherapy service is carried out by the nurses.
- D. Occupational Therapy - includes two aspects:
 - i) Activities geared toward passing time in a constructive and stimulating way eg. crafts.
 - ii) Activities geared toward teaching a person to carry out daily living activities within limitations imposed by his handicap. example: teaching a woman in a wheelchair ways to manage her housework.
- E. Special Appliances - generally refers to aids to ambulation and comfort. eg. a wheelchair.
- F. Functional Aids in Home - adaptations or changes to the home and/or furnishings which would enable a handicapped person to function better eg. a ramp up to the door, lowered counter tops.
- G. Homemaker Services - provision for someone to go into a home on a regular basis, to assist with day to day chores eg. chopping wood, getting water, preparing meals, doing laundry, grocery shopping. This person would not be expected to carry out nursing care, or perform major housecleaning jobs.

- H. Services for the Blind - includes those services available only in southern locales, such as the training given at a school for the blind learning to read braille. Also includes services applicable to the home - community setting eg. provision of a white cane, a seeing eye dog, records, books in braille, etc.
- I. Services for the Deaf - as in the above, includes the services available at schools for the deaf, and services applicable to the home community eg. hearing aids.
- J. Sheltered Workshop - designed for people whose handicap makes them unable or unwilling to find employment in the regular job market. A workshop would provide an environment where people could be trained in useful activities geared to maximizing their potential and preparing them for entry into the job market.
- K. Job-Skills Training - designed for people whose handicap makes them unable to pursue their regular line of work, or which has prevented them from receiving training. It is expected that with appropriate training or retraining, these people could secure employment and be fully functional members of society.
- L. Employment - no special requirements for training; they require the availability of a job. Usually, if a person requires a Sheltered Workshop or Job Skills Training Service now, he will require employment in the future.

The following summary sheet presents information regarding present status by region and from the south, and in total. Further breakdown by community and age group exists in Appendix X.

SECTION V: SUMMARY OF STATISTICS - FUTURE NEEDS

This section reflects an attempt to predict needs which are not presently in existence but which could arise within the immediate future.

The warning expressed in the preceding chapter applies to this chapter as well. The future needs were identified by the reporting agencies without the voice of the handicapped person being heard. Since many of the resource persons were unfamiliar with the art of "crystal-ball gazing" and may never have considered the possibility of services not existent in the community, it is likely that this section is under reported.

Definitions regarding future services required are the same as those included in the preceding chapter.

The summary sheet which follows presents information regarding future needs by region and from the south, and in total. Further breakdown by community and age group exists in Appendix XI.

CHAPTER FOUR
CONSIDERATIONS FOR
MAINTAINING STATISTICAL INFORMATION
REGARDING HANDICAPPED PERSONS

The information collected in this survey will require constant updating if it is to be kept current. As this report is being written some of the information is one year old, and is due for review.

If the information is to be considered relevant for planning in future years, it is essential that a mechanism be established to review and revise the information at regular time intervals.

Preliminary discussions have been held between the Health Care Plan and the N.W.T. Region, Health and Welfare Canada, regarding the possibility of combining some information systems.

It is recommended that all departments concerned with the provision of services to handicapped persons in the Northwest Territories should agree upon a single information system for handicapped persons, the kind of information required, the method of obtaining the information, and the method of processing and distributing information.

It is recognized that some departments require information specific to that department. Every attempt should be made, however, to have one central body collecting information so that field staff will not be required to provide duplicate information to several departments.

It is suggested that the agency reporting the handicapped person originally should be contacted to update the information on that case.

The sharing of information should be on the basis of statistical data, keeping in mind the need to preserve the confidential nature of information pertaining to a specific individual.

In addition to updating existing materials, there is a need to develop a system to obtain new information and to report new cases. For example, the birth registration form, with minor changes, could prove to be a valuable input document.

The Health Care Plan urges those departments involved in the provision of services for handicapped persons to develop an integrated approach. The total lifestyle of the handicapped person must be considered rather than fragmenting the handicapped to fit into service areas. It is vital to the happiness of the handicapped person that health, social functioning, education, rehabilitation, recreation, and employment be viewed as cohesive parts of the whole person. Services must be designed for the person, not for the agency.

APPENDIX I
QUESTIONNAIRE FORM

APPENDIX II
GUIDE TO
HANDICAPPING CONDITIONS

HANDICAPPING CONDITIONSSECTION: DIAGNOSISA. INFECTIVE & PARASITIC DISEASES

1. Tuberculosis - only those with residual, permanent disability
2. Poliomyelitis - residual paralysis
3. Encephalitis - residual effects

B. NEOPLASMS

1. Residual effects of operable tumours
2. Neoplastic diseases of the marrow - leukemias, Hodgkin's Disease or lymphatic glands, reticulosis, myelomas, etc.
3. Severe cosmetic neoplasms - haemangioma, naevi, port wine stain, etc.
4. Other

C. ALLERGIC, ENDOCRINE, METABOLIC, NUTRITIONAL

1. Asthma - severe chronic
2. Allergies - severe chronic
3. Endocrine Disorders - cretinism, diabetes, glandular dysfunction, etc.
4. Coeliac disease
5. Cystic Fibrosis
6. Inborn errors of metabolism - glycogen disease, phenylketonuria, Hurler's Syndrome, gout, etc.
7. Other

D. DISEASE OF BLOOD AND BLOOD FORMING ORGANS

1. Bleeding disorders - hemophilia
2. Anemia - hereditary, such as: thalassemia, sickle cell
3. Agammaglobulinemia
4. Other

E. MENTAL, PSYCHONEUROTIC AND PERSONALITY DISORDERS

1. Mental Retardation
2. Psychotic Disorders
3. Autism
4. Severe character, Behaviour and Intelligence disorders, such as: learning defects, anti-social behavior, emotional problems.
5. Other

F. DISEASES OF THE NERVOUS SYSTEM

1. Late effects of meningitis, intracranial abscess and encephalitis
2. Cerebral Palsy
3. Epilepsy
4. Other diseases of the brain and spinal cord
5. Progressive muscular atrophy
6. Multiple Sclerosis
7. Paralysis of the Cranial or Peripheral Nerves
8. Peripheral Neuritis
9. Cerebral Vascular Accidents
10. Congenital Malformations - spina-bifida, meningocele, hydrocephalus, microcephaly, mal-development of brain, etc.
11. Seizures - of unknown etiology
12. Other

G. DISEASES OF SENSE ORGANS

- Eyes:
1. Severe refractive errors - 20/70 or less in both, corrected
 2. Strabismus (Squint)
 3. Cataract - severe, acquired, traumatic and congenital
 4. Glaucoma - congenital or acquired
 5. Other severe chronic diseases of the eye

Blindness

6. Unilateral
7. Bilateral - vision less than 20/200 in either eye
8. Congenital abnormalities of the eyes and eyelids

Ear:

Deafness - over 30 decibels

9. Unilateral
10. Bilateral
11. Congenital malformations of the ear
12. Other

H. DISEASES OF THE CIRCULATORY SYSTEM

1. Chronic rheumatic heart disease
2. Arteriosclerotic heart disease - handicapped due to agina pectoris or myocardial infraction
3. Congenital heart abnormalities
4. Congestive heart failure
5. Other acquired or congenital lesions of cardiovascular system
6. Other

I. DISEASES OF THE RESPIRATORY SYSTEM

1. Severe chronic bronchitis, asthma and emphysema
2. Bronchiectasis
3. Chronic obstructive lung disease
4. Other

J. DISEASES OF THE DIGESTIVE SYSTEM

1. Dental malformations and malocclusion - severe
- 2.
3. Congenital malformations of gastrointestinal tract - pyloric stenosis imperforate anus, atresias, Hirschsprung's Disease, etc.
4. Cleft palate or cleft lip
5. Other

K. DISEASES OF THE GENITO-URINARY SYSTEM

1. Kidney conditions - chronic nephritis, chronic infections
2. Undescended testicles - bilateral over 6 years
3. Congenital malformation of genito-urinary tract - hypospadias, polycystic disease, malformation of ureter or bladder
4. Other

L. DISEASES OF THE SKIN AND CELLULAR TISSUE

1. Congenital abnormalities - webbing of digits, ichthyosis, etc.
2. Severe chronic skin reactions
3. Other

M. DISEASE OF THE BONE AND ORGANS OF MOVEMENT

1. Arthritis - rheumatoid, osteoarthritis, etc.
2. Osteochondrosis - Legg's-Perthes disease, Osgood-Schlatter, etc.
3. Myopathies - muscular dystrophy, myasthenia-gravis, etc.
4. Abnormalities of the spine - scoliosis, hemivertebrae, etc.
5. Congenital malformations of bones and joints - club foot, dislocation of hip, polydactylia, etc.
6. Acquired malformations - residual effects of infection
7. Other

N. ANY CONGENITAL MALFORMATIONS NOT ALREADY COVERED

1. Birth Injuries - Any birth injuries resulting in permanent disability

O. BURNS

1. Severe residual scarring resulting in impairment of function or cosmetic disfigurement

P. ACCIDENTS

1. Residual effects resulting in impairment of function - head injuries, fractures, dislocations, traumatic amputations

Q. SPEECH DEFECTS

1. Articulation disorder - after 6 years of age - dyslalia
2. Stutters and Stammers - after 7 years of age -
3. Abnormal voice problems - dysphonia, nasality
4. Delayed speech and language development - after 3 years - aphasia
5. Speech problems secondary to: Cleft palate, Hearing Loss, Cerebral Palsy

R. ALCOHOLISM

APPENDIX III

CLASSIFICATION FORM
LEVELS OF FUNCTIONING
FOR THE
MENTALLY HANDICAPPED

The following definitions refer to 5 general levels of handicap in categories of : Supervision and Care, Motor Control, Specialization/Communication, Developmental Skills, Behavior. Assign the level (0-4) in each of the above categories which best describe the individual - "0" represents the normal adult/child. All descriptions will not apply, but choose the best overall description of the individual, e.g: an adult in a wheelchair with spina-bifida and ileostomy problems might receive a rating of 3-2-1-2-1, whereas a child in a special unit because of severe retardation may receive a rating of 1-1-3-3-2.

	LEVEL 4	LEVEL 3	LEVEL 2	LEVEL 1
SUPERVISION AND CARE	<u>Extensive medical and physical nursing care</u> eg: a) large hydrocephalus, b) immobile child requiring positioning for congestion and bed sores, c) heart defects d) aspirates when fed e) tube feedings.	Regular nursing with some medical - a) frequent convulsions b) physical care in all daily routines.	Some Medical nursing back-up necessary - a) check on chronic respiratory infections b) regular modification reviews.	Regular medications - such as laxatives, vitamin supplements
MOTOR CONTROL	<u>Motor control severely affected due to spasms or limpness</u> , eg: a) no head control, b) few spontaneous movements	<u>Head control with some spontaneous movement</u>	<u>Some purposeful movements</u> - some creeping, head and trunk control	Purposeful movement - a) head and trunk control, b) crawling, c) gross hand movements, batting, holding.
SOCIALIZATION/COMMUNICATION	<u>No consistent awareness</u> a) no spontaneous vocalizations apart from fear, hunger, pain, b) very little awareness apart from response to cuddling & sharp environmental changes.	Somewhat aware - a) focuses on moving objects, b) responds with smiles, c) squirming, d) some sound apart from Level 4	<u>Aware of surroundings & attends for short periods</u> - a) babbling b) relates to familiar people (squirms, smiles wants to be lifted)	a) responds to own name and simple requests b) speaks a few clear words c) social games, eg: pat-a-cake etc.
DEVELOPMENTAL SKILLS	<u>Difficult to feed</u>	<u>Assists when being fed</u> - a) sucks food, b) takes food from spoon, chews, c) opens mouth, d) enjoys baths	<u>Shows interest in self help</u> - a) attempts to help in feeding, b) holds spoon, c) plays in bath.	<u>Basic self help with assistance</u> a) feeds self with some mess, b) helps dressing, c) has partial bladder control (dry diaper)

AGE GROUP 0-3

The following definitions refer to 5 general levels of handicap in categories of: Supervision and Care, Motor Control, Specialization/Communication, Developmental Skills, Behavior. Assign the level (0-4) in each of the above categories which best describe the individual - "0" represents the normal adult/child. All descriptions will not apply, but choose the best overall description of the individual, e.g: an adult in a wheelchair with spina-bifida and ileostomy problems might receive a rating of 3-2-1-2-1, whereas a child in a special unit because of severe retardation may receive a rating of 1-1-3-3-2.

	LEVEL 4	LEVEL 3	LEVEL 2	LEVEL 1
SUPERVISION AND CARE	<u>Extensive medical and physical care</u> - e.g. A) large hydrocephalus, b) immobile child requiring positioning for congestion & bed sores, c) heart defects d) aspirates when being fed c) tube feeding	<u>Regular nursing with some medical</u> - a) physical care in all daily routines.	<u>Some medical nursing back-up necessary</u> - a) check on chronic respiratory infection b) regular medication	<u>Minor ailments</u> - constipation, vitamin supplements, anti-convulsants
MOTOR CONTROL	<u>Motor Control severely affected due to spasms or limpness</u> - a) no head control, b) no spontaneous motor movements,	<u>Head & trunk control, limited purposeful movement in limbs</u> , e.g. a) creeping, batting toys, c) snuggles squirms & creeps	<u>Purposeful movement</u> a) effective crawling b) reaches for toys c) walks with assistance, d) pulls self up.	<u>Mobile</u> - a) manipulates toys, b) some fine motor co-ordination, c) walks (walker/cane acceptable)
SOCIALIZATION/ COMMUNICATION	<u>Impossible or extremely difficult to understand</u> A) no spontaneous vocalizations apart from fear hunger, pain, b) very little awareness apart from cuddling & sharp environmental change c) shows some awareness of surroundings, d) eyes follow in general way, motions	<u>Beginning awareness</u> a) responds to familiar person, b) notices changes in environment, c) babbles, d) uses gestures.	<u>Can with assistance make needs known</u> - a) responds to praise & censure, b) few clear words or gestures (bye-bye), c) initiates some interaction ("up"), d) responds to simple directions, e) social games, (pat-a-cake)	<u>Relates in familiar setting</u> - a) imitation b) one or two word sentences, c) follows direction, d) responds to & is aware of other children
DEVELOPMENTAL SKILLS	<u>Minimal self care</u> - a) may assist when being fed food, takes food from spoon, opens mouth, b) may enjoy a bath.	<u>Shows interest in self care</u> a) tries to hold spoon, or eats some finger foods, b) co-operates with dressing. c) plays in bath	<u>Basic self care with assistance</u> - e) eats with assistance, b) uses toilet when placed on it, c) helps dressing.	<u>Self care with assistance</u> - a) eats with some mess, b) early self dressing, c) routine toilet trained, d) helps in washing.

LEVELS OF HANDICAP

	LEVEL 4	LEVEL 3	LEVEL 2	LEVEL 1
SUPERVISION CARE	Extensive medical/physical nursing, eg. a) large hydrocephalus, b) immobile child requiring positioning for congestion bed sores.	<u>Regular nursing provision</u> eg: a) protection against self injury, b) brittle epileptic (uncontrolled) except for short periods.	<u>Some medical back-up necessary</u> a) protection against common danger b) medication supervised c) controlled epileptic d) regular skin care	<u>Minor medical</u> a) regular medicals b) skin care (D.S.)
MOTOR CONTROL	<u>Motor control severely affected</u> due to limpness or spasms a) few spontaneous movements b) could be in wheelchair but must be propped and pushed.	a) <u>Some mobility</u> - crawls or walks with assistance b) in wheelchair with functional movement (lower/upper limbs or head) needs transfer c) walks but sensory deficit makes unescorted travel difficult.	Generally mobile - a) walks alone but awkward or with cane/walker b) in wheelchair self propelled and self transfer c) blind but can travel in familiar terrain	General Motor control - may have hand/eyes coordination balance problems.
SOCIALIZATION/ COMMUNICATION	<u>Very difficult to understand or impossible</u> a) few spontaneous vocalizations apart from fear, hunger, pain. b) some awareness of environment apart from response to cuddling, and sharp environmental changes c) focuses on moving objects d) becomes excited before regular events	<u>Can with assistance make needs known</u> a) responds to praise & censure, b) has few clear words or gestures c) initiates interaction d) responds to other children e) responds to simple directions f) aware of surroundings but communication restricted.	<u>Relates in a familiar setting</u> a) communicates in short sentences b) follows most directions in a familiar setting c) can imitate d) interacts with children	<u>Functional concrete language</u> a) relates well in a familiar setting & can adapt with assistance b) can read social sight vocabulary (street signs etc.) c) can do simple math.
DEVELOPMENTAL SKILLS	<u>Minimal skills</u> -in terms of eating, toilet, dressing - helps with feeding bathing and dressing etc.	<u>Eating dressing, toileting feasible with practice but requires close supervision or assistance.</u> Generally in specialized program outside special school.	<u>Self care, generally accomplished with some supervision</u> (toileting, dressing feeding) Basic functional living skills, asks for directions crossing streets dusts table, generally in special school.	Self care sufficient - function living skills eg: a) shopping from a list, b) on the bus alone c) picks out own clothes d) generally in integrated or special class.
BEHAVIOUR	<u>Dangerous</u> towards self, others or property & as a result cannot be handled in any existing program	<u>Unacceptable or disruptive behaviour or lack of motivation.</u>	<u>Undesirable behaviour poor motivation.</u>	<u>No specific behaviour problem</u> a) though some inappropriate behaviour is evident

	LEVEL 4	LEVEL 3	LEVEL 2	LEVEL 1
SUPERVISION CARE	<u>Extensive medical/physical care.</u> Supervision and total care required due to multiple physical difficulties, eg: a) body rigidity b) fragility requiring positioning for congestion/bed sores.	<u>Regular medical nursing provision required</u> due to multiple physical disabilities eg: a) supervision of staff in transferring patients, b) ileostomy/colostomy supervision c) protection against self injury d) brittle epileptic.	<u>Some degree of nursing and medical back-up required</u> a) supervision of meds. b) protection against common danger c) regular skin care.	<u>Minor physical treatments carried out mainly by individual, eg. skin care regular meds.</u>
MOTOR CONTROL	<u>Motor control severely affected</u> due to spasms or limpness - a) few spontaneous movements, b) could be in wheelchair but must be propped and pushed	<u>Some mobility</u> - a) in wheelchair with functional movement (lower/upper limbs & head), needs transfer, b) crawls or walks with assistance, c) walks but sensory deficit makes unescorted travel difficult	<u>Generally mobile</u> - a) walks alone but awkward or with cane/ walker, b) in wheelchair is self propelled & self transfer, c) blind but can travel familiar terrain, d) gross or fine motor coordination difficulties eg: C.P.	<u>General Motor control</u> - may have hand/eye coordination difficulties or some balance problems.
SOCIALIZATION/ COMMUNICATION	<u>Very difficult or impossible to understand</u> a) few spontaneous vocalizations apart from fear, hunger pain, b) some awareness of environmental changes, c) focuses on moving objects d) becomes excited before regular event	<u>Can with assistance make needs known</u> a) has some clear words, gestures or signals b) understands some	<u>Relates to others well in a familiar setting</u> a) communicates in short sentences, b) adapts to new situations with assistance, c) understands most directions with practice d) reads social sight words, can write name.	Good concrete language but with conceptual/abstract difficulties. Varied spontaneous languages. Good conversational skills. Can read & write simple English & do simple math.
DEVELOPMENTAL SKILLS	<u>Minimal skills in terms of dressing, eating, toileting, could help with feeding, dressing, etc.</u>	<u>Feeds dresses and toilets self with assistance</u> or close supervision. Could be in structured recreational or occupational day program.	<u>Self care with some supervision or special architectural assist</u> Basic homemaking & vocational skills with practice.	<u>Self help generally sufficient</u> Community residential and vocational skills with practice but needs some assisting with budgeting & time management.
BEHAVIOUR	<u>Dangerous</u> towards self others or property & as a result cannot be handled in any existing program.	<u>Unacceptable or disruptive behavior</u> or complete lack of motivation.	<u>Undesirable behaviour, poor motivation</u>	<u>No specific behaviour problem</u> although some inappropriate behaviour is evident.
				AGES 19 - 59

APPENDIX IV
GUIDE TO LEVELS OF CARE

LEVEL 1. SUPERVISORY CARE

This level of care may be provided in a room-and-board situation for clients who, in addition to full maintenance and laundry service, required some guidance or supervision with activities of daily living.

To be eligible for Supervisory Care, clients would have to meet either the physical or mental criteria but not necessarily both.

PHYSICAL STATUS

This level of care is for clients who show frailty due to normal aging or who have some physical disability which only slightly impairs their ability to care for themselves.

EMOTIONAL AND MENTAL STATUS

Clients with minor mental deterioration such as some forgetfulness due to age or clients who at one time have under-gone psychiatric treatment but who only require minor supervision can be accommodated at this level.

MOBILITY

Clients may be ambulant or ambulant with mechanical aids; for example, walker, cane or crutches.

CARE REQUIRED

Meals - The client is capable of receiving meals in the dining room but may require tray service during a brief illness. The client may require special dietary service of a simple nature (such as diabetic pureed, salt poor, low fat, or bland diet).

Personal Care and Hygiene - Clients at this level should require only minor supervision in personal care; such as supervision with bathing, grooming (hair care, dental hygiene, nail care, etc.) and dressing. The client should be capable of attending his toilet care although regularity of this function may have to be supervised.

Health Care Supervision - Generally the client is capable of taking any prescribed medications; however, in certain instances supervision may be required due to forgetfulness of the client. Staff will initiate referrals to client's family physician when required and will maintain contact with responsible agency.

LEVEL 2. LIMITED PERSONAL CARE

This level of care is for clients who show slowing down in physical and/or mental faculties and because of this deterioration require supervision and some assistance with activities of daily living.

PHYSICAL STATUS

Clients in this category show evidence of advanced aging or they are persons of all age groups who need assistance because of disabilities resulting from a chronic ailment (e.g. arthritis, multiple sclerosis, Parkinson's Disease or similar diseases.). This level of care is only required when the disease is not too advanced and the disability is mild.

EMOTIONAL AND MENTAL STATUS

Clients in this category will include those who are mildly confused and require more supervision than is normally given in a home providing supervisory care.

In the case of clients with more advanced senile changes or residual psychiatric symptoms, accommodation at this level should be restricted to clients who require assistance in dressing and hygiene; the home would be expected to tolerate and supervise mildly disturbed behavior causing minor disruption of home life, while on the other hand, clients who display a tendency to wander away or who habitually disrupt the home life cannot be safely accommodated on such limited staff time.

MOBILITY

Clients may be ambulant, ambulant with mechanical aids, or independent at wheel chair (that is, able to safely get in and out of a wheel chair independently and propel the wheel chair themselves.)

CARE REQUIRED

Meals - The client is capable of feeding himself; however, he may require assistance with the preparation of his food (e.g. cutting food, buttering bread, etc.) Because of unacceptable eating habits that the client may have, he may require some special attention.

Personal Care and Hygiene - Clients at this level will require actual assistance with bathing, grooming (hair care, dental hygiene, nail care, etc.), and dressing. A client may require assistance with his toilet care, an episode of incontinence may occur but only rarely.

Health Care Supervision - Generally the client is capable of taking any prescribed medication; however, because of his physical or mental state, supervision may be required. The client may require periodical referrals to other health agencies and may need some assistance to ensure that recommended services are obtained.

Clients may require services designed to resocialize or reactivate them to maintain maximum functioning.

LEVEL 3. INTENSIVE PERSONAL OR NURSING CARE

This level of care is usually associated with the client having an advanced physical or mental illness that is reasonably stabilized and which is not expected to deteriorate in the near future barring the occurrence of an additional disease or accident. This care, while carried out under the supervision of a registered nurse (Reg.N.) or a Registered Psychiatric Nurse (R.P.N.) and directed by the client's personal physician usually is rendered by staff aides who mainly have been trained on the job.

PHYSICAL STATUS

Clients in this category either show evidence of aging changes combined with chronic disease or they are persons of all ages who need assistance because of the advanced stage of their chronic illness (for example, arthritis, multiple sclerosis, Parkinson's disease, or similar diseases).

EMOTIONAL AND MENTAL STATUS

This level of care will include clients suffering from varying degrees of mental deterioration resulting from senility, mental retardation or psychiatric disorders but will exclude clients having characteristic of serious mental or emotional problems who might be harmful to themselves, harmful or threatening to others, or destructive of property. The client may require close supervision for restlessness or a tendency to wander occasionally.

MOBILITY

Ambulant, semi-ambulant, wheelchair, chair or bed-fast.

CARE REQUIRED

Meals - Special diets and tray services are common; clients will require varying degrees of assistance with feeding. However, this level of care will exclude clients with conditions necessitating the taking of nutrition requirements other than by mouth (for example, nasal gastric tube feeding, intravenous, etc.) or those with physical difficulty in swallowing who are in danger of food or drink passing into the air passages.

CARE REQUIRED (continued)

Health Care Supervision - The client is fully or partly dependent in regard to self care. In addition, he may require professional nursing but only as an adjunct to personal care. This level of care would include bathing, bed positioning, grooming, feeding, dressing, administration of drugs, care of incontinent persons, sterile dressings and other sterile procedures (eg. catheter care, injections other than intravenous, etc.) and simple exercises, but does not include such procedures as intravenous and oxygen therapy on a regular or continuous basis. In most cases clients will require the administration of prescribed medication and periodic medical or psychiatric reviews.

Clients may require simple rehabilitation measures designed to reactivate or maintain the highest possible level of function.

LEVEL 4 LONG-TERM RESTORATIVE OR PALLIATIVE CARE

This level of care is for persons of all ages who do not require acute hospital care and treatment but do require regular and continuous medical attention, highly skilled technical nursing, provided under appropriate supervision on a 24 hour basis and, in addition, special techniques for the improvement or maintenance of function. Patients at this level require initial and continuing medical assessment involving investigation and diagnosis for which appropriate facilities must be readily available. The aims of treatment are to control the disease process, to achieve maximum recovery of function, to prevent further disability, to retard deterioration, and to alleviate pain and distress.

There are three classifications of care at this level which are as follows:

SPECIALIZED SUPERVISORY CARE

This is for persons with advanced Mental deterioration characterized by wandering tendencies, uncooperative or aggressive behavior and generally disruptive influences, who require specialized care on a 24 hour basis. These persons are likely to have physical conditions which require continuing medical supervision.

SUPPORTIVE CARE

This is for persons with advanced chronic illnesses or disabilities who require skilled nursing care on a 24 hour basis under medical supervision, and specialized techniques to arrest or retard deterioration.

RESTORATIVE CARE

For persons with chronic illnesses or disabilities, whose general condition is such that they could not withstand an intensive and vigorous rehabilitation program, but who can benefit from a slower paced restorative regime designed to improve functional ability to the extent that they can be cared for at home or at a lower level of care accommodation.

It is considered that level 4 care, Specialized, Supervisory Care, could be provided in a separate unit. However, Levels 4(b) and (c) could be provided in the same unit as the same facilities, personnel and programs are required, the only difference being that persons in the (c) category would be expected to improve while those in the (b) category would require continuous treatment to maintain them at the same level or retard deterioration.

LEVEL 4. LONG-TERM RESTORATIVE OR PALLIATIVE CARE (continued)

PHYSICAL STATUS

Patients at this level are at an advanced stage of a long-term illness or a disabling condition.

They require continuous medical supervision and are subject to acute episodes of the chronic disease or secondary complications which may require active hospital treatment. Their general condition is such that they may not tolerate an intensive rehabilitation program but will require special techniques or a slower paced restoration regime the aims of which will be to achieve improvement in function, to arrest or retard deterioration, and to alleviate distress.

EMOTIONAL AND MENTAL STATUS

Many persons with long-term illnesses and disabling conditions will have emotional problems requiring attention and some from time to time will require the services of a consultant psychiatrist.

Persons whose primary disability is mental deterioration from any cause may exhibit wandering tendencies, unco-operative behavior, and generally disruptive influences. These patients require care or supervision on a 24 hour basis by specially trained staff and may be accommodated at this level in special units. Activation therapies would be an important aspect of behavior control.

Many patients in this category will have diseases of other body systems which will require medical supervision and treatment. The association of such diseases with the necessity of high drug dosage to control behavior problems will require skilled nursing care on a 24 hour basis together with close medical supervision.

MOBILITY

Patients whose primary disability is mental deterioration may be fully ambulant. Almost all other patients at this level will be bed-fast, bed-and-chair fast, or semi-ambulant with the use of aids including wheel chairs. The aims of restoration programs for all patients at level 4 would be to increase or maintain ambulation skills.

CARE REQUIRED

Meals - Some patients at this level would be capable of eating in the dining room but some will require tray service and some will need varying degrees of assistance with feeding. Some patients with mechanical difficulties in swallowing and who are in danger of aspiration will require skilled feeding under R.N. supervision. Tube feeding may be required in certain cases. Special dietary services will frequently be needed.

Health Care Supervision - Care at this level is under continuing medical supervision. Services of a wide range of medical specialists may be required from time to time. The range of personal care required will be from moderate to complete dependency in the activities of daily living.

The range of nursing care required will be from regular (which includes bathing, positioning, skin, bowel and bladder care, sterile dressing, administration of medications, etc.) to skilled technical nursing such as that required for intravenous or oxygen therapy, to specialized psychiatric nursing. Special techniques to improve or maintain functional ability and to retard deterioration will be required. Social, recreational, and diversional therapy will also be required to improve or retain social and emotional well-being.

LEVEL 5. INTENSIVE REHABILITATION

This level of care is for persons with physical disabilities resulting from injuries, illnesses, or congenital conditions who require active, aggressive rehabilitation provided by a team of rehabilitation personnel under the direction of or by consultation with a specialist in physical medicine. It is designed to restore or improve functional ability. Maximum benefits from this intensive rehabilitation can usually be expected within a relatively short time (usually within three months). The patient may be discharged fully restored or enabled to function better in employment situations or in activities of daily living or, if the patient is not restored to independent self-care, he may be transferred to a home-care program, to another level-of-care accommodation, or to Level 4 care for a more relaxed and prolonged continuing restorative program.

PHYSICAL STATUS

Patients may have varying degrees of physical disability which materially affect their level of independence. They may have other diseases which require investigation and treatment.

EMOTIONAL AND MENTAL STATUS

Patients at this level could be expected to have emotional problems as the result of their physical disability and some may require active psychiatric treatment along with physical restoration. Some persons with psychiatric illnesses may also require intensive rehabilitation for a physical problem.

MOBILITY

Patients at this level will have all ranges of mobility from complete dependence on mechanical aids to fully independent ambulation.

CARE REQUIRED

All care of patients at this level must be directed towards teaching or enabling the patient to care for himself independently. Special devices and assistance may be required with any or all of the activities of daily living as the patient gradually acquires skills and techniques in self-help.

APPENDIX V
GUIDE TO BACKGROUND INFORMATION

A. Background Information**1. Etiology**

- a) congenital
- b) acquired
- c) accidental

2. Family History

- a) known

3. Education

- a) elementary
- b) secondary
- c) other

4. Occupation

- a) received training

5. Medical History and Services Received

- a) date diagnosed
- b) assessment made
- c) treatment

APPENDIX VI
GUIDE TO PRESENT STATUS

B. Present Status

1. Physical Health
 - a) no handicap
 - b) occasional handicap
 - c) chronic handicap
2. Mental Health
 - a) no handicap
 - b) occasional handicap
 - c) chronic handicap
3. Ambulation
 - a) without assistance
 - b) walking aids, e.g. cane, crutches, braces
 - c) wheelchair
 - d) confined to bed
4. Prosthesis
 - a) eye
 - b) limb
 - c) hand or foot
 - d) hearing aid
5. Medications
 - a) none prescribed
 - b) prescribed
 - c) taken regularly
 - d) taken regularly with supervision
 - e) taken unreliably
6. Social
 - a) accepted by family and community
 - b) not accepted by family and community
7. Residential
 - a) lives alone in community
 - b) lives with family or friends in the community
 - c) living outside N.W.T.
8. Occupation
 - a) attending school
 - b) employed
 - c) handicap interfering with employment
 - d) unemployed due to other causes
9. Special Services Being Received
 - a) Psychiatric
 - b) Special Education Services
 - c) Physiotherapy
 - d) Occupational Therapy
 - e) Special Appliances
 - f) Functional Aids in home
 - g) Homemaker Service
 - h) Services for the Blind
 - i) Services for the Deaf
 - j) Sheltered Workshop
 - k) Job Skills Training
 - l) Employment
 - m) Institute Care
- L1 Supervisory Care
- L2 Limited Personal or Nursing Care
- L3 Intensive Personal or Nursing Care
- L4 Long Term Restorative or Palliative Care
 - a) Specialized Supervisory Care
 - b) Supportive Care
 - c) Restorative Care
- L5
 - a) Intensive Rehabilitation
 - b) Speech Therapy
 - c) Hearing
 - d) Visual
 - e) Psychological
 - f) Special Education
 - g) Physiotherapy
 - h) Occupational Therapy

10. Special Services Required
 - a) Psychiatric
 - b) Special Education Services
 - c) Physiotherapy
 - d) Occupational Therapy
 - e) Special Appliances
 - f) Functional Aids in home
 - g) Homemaker Services
 - h) Services for the Blind
 - i) Services for the Deaf
 - j) Sheltered Workshop
 - k) Job Skills Training
 - l) Employment
 - m) Institute Care
 - L1 Supervisory Care
 - L2 Limited Personal Care
 - L3 Intensive Personal Care
 - L4 Long Term Restorative or Palliative Care
 - a) Specialized Supervisory Care
 - b) Supportive Care
 - c) Restorative Care
 - L5
 - a) Intensive Rehabilitation
 - b) Speech Therapy
 - c) Hearing
 - d) Visual
 - e) Psychological
 - f) Special Education
 - g) Physiotherapy
 - h) Occupational Therapy
