

**LEGISLATIVE ASSEMBLY OF THE
NORTHWEST TERRITORIES
10TH ASSEMBLY, 1ST SESSION**

TABLED DOCUMENT NO. 7-84(1)

TABLED ON FEBRUARY 6, 1984

November 2, 1981

Department of Supply & Services
Government of the N.W.T.
Frobisher Bay, N.W.T.

Attention: Dave Fox

Re: Beach Gas Pump

During our Council meeting of October 12, 1981, it was agreed that the Hamlet is facing a major problem concerning the facilities for hunters to get provision of gas from the present gas pump location

It is hereby requested that an additional gas pump be installed on the beach close by the filling pipe; and by doing so providing adequate accessibility especially in spring and summer time.

Your assistance in informing us of the proper procedures to complete this instalment before the end of June 1982 would be greatly appreciated.

We are awaiting your prompt reply acknowledging the present request and we remain,

Yours truly,

J. Enooya,
Mayor

Att: copy of motion

cc. Regional Superintendent
Dept. of Local Government

Dear Mr. Enooya,

This is in answer to your letter concerning the installation of an additional gas pump on the beach close to the filling pipe line. The approximate costs of such an undertaking would be as follows:

- | | |
|-------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| 1) cost of installed dispenser | \$ 5,000.00 |
| 2) cost of 2" diameter pipe line adjacent to the fill lines from tank farm to beach site approx. 1/4 mile in length completely installed. | 80,000.00 |
| 3) cost of attendant to control usage and pump gas. | 10,000.00 |

Total \$95,000.00

The re-supply fill line could not be used unless there was a holding tank facility (approx. \$60,000.00) along with the dispenser at your proposed site. Furthermore it would not make sense to pump gas from 2 locations (tank farm and your site) because there is no road access to your proposed site.

If a beach site in town was chosen where there is road access you could eliminate the pipe line, however, another vehicle would be required (\$35,000.00 in addition to a \$60,000.00 holding tank facility). We certainly could not use the existing vehicle now used for fuel deliveries because of the problems with contamination in delivering more than one type of product in one vehicle.

The P.O.L. section is not prepared to undertake your request because we do not have the necessary capital money, however, we felt you should be aware of the costs.

It is hoped this information provides you with better insight as to the requirements of your request. If I can be of further assistance please feel free to contact me.

Yours truly,

W. Hirsch
