1985/86 LOCAL/NORTHERN INVOLVEMENT REPORT SUMMARY

Introduction

Attached is the Department of Public Works and Highways first annual Local/Northern Involvement Report Summary. Starting in July 1985, for contracts greater than \$20,000 in value, the Department has required contractors to submit forms detailing the local/northern involvement planned for and actually achieved on these contracts.

The attached Local/Northern Involvement Report Summary is a compilation of the individual reports received from the various contractors. The tables actually cover only the second half of the 1985/86 fiscal year as the Department's reporting system for contractors was initiated in July 1985.

For the 1985/86 fiscal year, there were about 200 contracts over \$20,000 that would have required reports had the reporting system been in place for the entire year. The attached summary report covers 74 contracts or about 37% of all of the DPW&H's contracts over \$20,000.

The total percentage of local/northern involvement as reported by contractors in 1985/86 and summarized in the attached tables was about 70%. For the 1986/87 fiscal year, our report will cover the entire year. The local/northern percentages are expected to continue to be encouraging.
