SCHEDULE 3

DESIGN AND CONSTRUCTION SPECIFICATIONS

1. INTERPRETATION

1.1 Definitions

In this Schedule, in addition to the definitions set out in Schedule 1 [Definitions and Interpretation] of this Agreement:

“Authority Supplied End-Use Equipment” has the meaning set out in Section 7.7(i)(1)(A) of this Schedule;

“BMS” has the meaning set out in Section 7.5(a)(1)(B) of this Schedule;

“Category A ICT Equipment” has the meaning set out in Section 7.7(c)(4)(A) of this Schedule;

“Category B ICT Equipment” has the meaning set out in Section 7.7(c)(4)(B) of this Schedule;

“Category C ICT Equipment” has the meaning set out in Section 7.7(c)(4)(C) of this Schedule;

“Category D ICT Equipment” has the meaning set out in Section 7.7(c)(4)(D) of this Schedule;

“Category E ICT Equipment” has the meaning set out in Section 7.7(c)(4)(E) of this Schedule;

“Clinical Specifications” has the meaning set out in Section 2.3(a) of this Schedule;

“dBA” is a weighted sound pressure level within a space adjusted based on human hearing systems (e.g. less sensitive to low frequencies);

“Elevated Flooring” has the meaning set out in Section 6.10(b)(11)(A) of this Schedule;

“End User Administration” has the meaning set out in Section 7.7(c)(1)(A) of this Schedule;

“Evidence Based Design” has the meaning set out in Section 3.2 of this Schedule;

“ICT Systems and Equipment” has the meaning set out in Section 7.7(c)(2) of this Schedule;

“Indicative Design” has the meaning set out in Section 2.5(a) of this Schedule;

“Infrastructure” has the meaning set out in Section 7.7(c)(1)(B) of this Schedule;

“Integrate/Integrated/Integration” has the meaning set out in Section 7.7(c)(1)(C) of this Schedule;

“Interface” has the meaning set out in Section 7.7(c)(1)(D) of this Schedule;

“LEAN” means to a structured way of continuously exposing and solving problems to eliminate waste in systems that deliver value to customers;

“Master Site Plan” has the meaning set out in Section 4.1(a) of this Schedule;

“NBC” means the National Building Code of Canada;

“Patient Centred Care” has the meaning set out in Section 3.7(a)(2) of this Schedule;

“Project Co’s End-Use Equipment” has the meaning set out in Section 7.7(i)(1)(A) of this Schedule;

“Project Design Principles” has the meaning set out in Section 3.1(a) of this Schedule;

“Rehabilitation Services” has the meaning set out in Section 2.2(c) of this Schedule;

“Server” has the meaning set out in Section 7.7(c)(1)(E) of this Schedule;

“Service Level” has the meaning set out in Section 7.7(c)(1)(F) of this Schedule;

“Software” has the meaning set out in Section 7.7(c)(1)(G) of this Schedule;

“Support Services Building” has the meaning set out in Section 2.2(b) of this Schedule;

“System Lifecycle” has the meaning set out in Section 7.7(c)(1)(H) of this Schedule;

“Transcription Services” has the meaning set out in Section 2.2(d) of this Schedule; and

“Unallocated/Unassigned Space” means space in the Facility, in addition to the required shelled space, which is not defined for usage according to the functional program.

1.2 Interpretation

- (a) This Schedule is written as an output specification and defines what Project Co must achieve in the Design and Construction. Except as expressly stated otherwise, Project Co will carry out the Design and Construction as required and contemplated by each provision of this Schedule and its Appendices whether or not the provision is written as an obligation of Project Co or is stated in the imperative form.
- (b) Unless specifically noted otherwise, this Schedule 3 [Design and Construction Specifications], and all respective Appendices, refer only to the Design and Construction of brand new elements of the Facility, as required by the Design of Project Co, and the lifecycle requirements as described in Schedule 20 [Handback Requirements].
- (c) Where “cost effective”, “appropriate”, “sufficient”, “minimize” and related and similar terms are used, they are to be construed and interpreted in terms of whether they are cost effective, appropriate, sufficient, minimizing, etc. from the perspective of a prudent public owner of a major public hospital facility who balances capital costs against maintenance, operations, clinical efficiency and other non-capital costs over the life of the Facility.
- (d) Unless expressly stated otherwise, each reference to a standard in this document will be deemed to mean the latest version of that standard as of the Financial Submission Date.

1.3 Acronym List

- (a) AAS – Aluminum Association Standards
- (b) AAMA – American Architectural Manufacturers Association
- (c) ACI – American Concrete Institute
- (d) ADA – American Disabilities Act

- (e) ADL – Activities of Daily Living
- (f) AFDDR – Automated Fault Detection, Diagnosis and Reporting
- (g) ANSI - American National Standards Institute
- (h) ASHRAE - American Society of Heating, Refrigerating and Air-conditioning Engineers
- (i) ASME - American Society of Mechanical Engineers
- (j) ASPE - American Society of Plumbing Engineers
- (k) ASTM - American Society for Testing and Materials
- (l) AV – Audio Visual
- (m) AWCC – Association of Wall and Ceiling Contractors
- (n) AWMAC – Architectural Woodwork Manufacturers Association of Canada
- (o) AWPA – American Wood Preservers Association
- (p) AWWA – American Water Works Association
- (q) BICSI - Building Industry Consulting Services International
- (r) BMS - Building Management System
- (s) CaGBC – Canada Green Building Council
- (t) CCMC – Canadian Construction Materials Centre
- (u) CCT – Correlated Colour Temperature
- (v) CCTV – Closed Circuit Television
- (w) CEC – Canadian Electrical Code
- (x) CGA - Compressed Gas Association
- (y) CGSB – Canadian General Standards Board
- (z) CIS – Clinical Information Systems
- (aa) CISC – Canadian Institute of Steel Construction
- (bb) CMCA – Canadian Masonry Contractors Association
- (cc) CNLA – Canadian Nursery Landscape Association
- (dd) CPMA – Canadian Paint Manufacturers Association
- (ee) CPOE – Computerized Physician Order Entry
- (ff) CPTED - Crime Prevention Through Environmental Design

- (gg) CPU – Central Processing Unit
- (hh) CRI – Colour Rendering Index
- (ii) CSA - Canadian Standards Association
- (jj) CSDFMA – Canadian Steel Door and Frame Manufacturers Association
- (kk) CSSBI – Canadian Sheet Steel Building Institute
- (ll) CT – Computed Tomography
- (mm) DDC - Direct Digital Controls
- (nn) DHI – Door and Hardware Institute
- (oo) DCW – Domestic Cold Water
- (pp) DHW – Domestic Hot Water
- (qq) DISS - Diameter Index Safety System
- (rr) DSSS – Direct Sequence Spread Spectrum
- (ss) ED – Emergency Department
- (tt) EF – Entrance Facility Room
- (uu) EIA – Electronics Industry Alliance
- (vv) EMR – Electronic Medical Records
- (ww) EMT – Electric Metallic Tubing
- (xx) ePDU - Electronic Power Distribution Unit
- (yy) FACP – Fire Alarm Control Panel
- (zz) FGI – Facility Guidelines Institute
- (aaa) FPS – Frames Per Second
- (bbb) FSC – Forest Stewardship Council
- (ccc) GNWT – Government of the Northwest Territories
- (ddd) HD – High Definition
- (eee) HEPA - High Efficiency Particulate Air
- (fff) HIM – Health Information Management
- (ggg) HOA – Hand / Off / Auto
- (hhh) HP – Horsepower

- (iii) HVAC - Heating, Ventilating and Air-Conditioning
- (jjj) IAQ – Indoor Air Quality
- (kkk) ICT – Information and Communications Technology
- (III) ICU – Intensive Care Unit
- (mmm) ID - Identification
- (nnn) IEEE - Institute of Electrical and Electronic Engineers
- (ooo) IESNA – Illuminating Engineering Society of North America
- (ppp) IGMAC – Insulating Glass Manufacturers Association of Canada
- (qqq) IP – Internet Protocol
- (rrr) IPCC – Intergovernmental Panel on Climate Change
- (sss) IRC – Institute for Research in Construction
- (ttt) IT – Information Technology
- (uuu) KW – Kilowatt
- (vvv) KWH – Kilowatt hours
- (www) KVA – Kilovolt Ampere
- (xxx) LAN – Local Area Network
- (yyy) LCD – Liquid Crystal Display
- (zzz) LDRP – Labour Delivery Recovery and Post-Partum
- (aaaa) LED – Light Emitting Diode
- (bbbb) LEED – Leadership in Energy and Environmental Design
- (cccc) MAW – Maintenance / Administration Workstation
- (dddd) Mb – Megabit
- (eeee) MCP – Motor Circuit Protector
- (ffff) MDR – Medical Device Reprocessing
- (gggg) MAR – Medication Administration Records
- (hhhh) MH – Mental Health
- (iiii) MMCD – Master Municipal Construction Document
- (jjjj) MPI – Master Painters Institute

- (kkkk) NBC – National Building Code of Canada
- (llll) NCRP – National Council on Radiation Protection and Measurement
- (mmmm) NEC – National Energy Code of Canada
- (nnnn) NEMA - National Electrical Standards Association
- (oooo) NETA – InterNational Electrical Testing Association
- (pppp) NFC – National Fire Code of Canada
- (qqqq) NFPA - National Fire Protection Association
- (rrrr) NLGA – National Lumber Grades Authority
- (ssss) NPC – National Plumbing Code of Canada
- (tttt) NRC – National Research Council
- (uuuu) OEL – Occupational Exposure Limit
- (vvvv) OFDM – Orthogonal Frequency Division Multiplexing
- (wwww) OS&Y - Open Stem and Yoke
- (xxxx) PC – Personal Computer

2. GENERAL

2.1 Standards

- (a) Project Co will undertake the Design and Construction:
 - (1) in accordance with the standards (as amended, supplemented or replaced from time to time and referenced by GNWT) set out in this Schedule;

- (2) in accordance with the NBC (as amended, supplemented or replaced from time to time and referenced by GNWT) and all applicable Laws, including without limitation the *Safety Act* (Northwest Territories) and all applicable occupational health and safety requirements and codes of practice in the Northwest Territories;
 - (3) having regard for the concerns, needs and interests of:
 - (A) all persons who will be Facility Users;
 - (B) all Governmental Authorities; and
 - (C) the community.
 - (4) in accordance with Good Industry Practice; and
 - (5) to the same standard that an experienced, prudent and knowledgeable long term owner of a high quality health care facility in North America operated publicly would employ.
- (b) GNWT Good Building Practice for Northern Facilities, Third Edition, 2013 (updated March 20, 2013), as amended, supplemented or replaced from time to time;
- (1) GNWT Good Building Practice for Northern Facilities complements the standards and codes specified in this Schedule by providing overarching Design principles and referencing specific standards and codes that are appropriate for the design of facilities in the Northern climate of the Northwest Territories.
- (c) CSA Z8000-11: Canadian Health Care Facilities, as amended, supplemented or replaced from time to time;
- (1) CSA Z8000 complements the standards and codes specified in Schedule 3 by providing overarching Design principles and referencing specific standards and codes that are appropriate for healthcare facility design.
 - (2) Project Co will:
 - (A) utilize CSA Z8000, without limitation of the contents within unless noted otherwise, for the Design and Construction of the Facility.
 - (B) refer to CSA Z8000 for Design guidance to resolve issues not otherwise addressed in Schedule 3; and
 - (C) comply with:
 - (i) any minimum standards and codes referenced in CSA Z8000 (except for any minimum space requirements that may exceed or supersede that required by those standards and codes);
 - (ii) all infection control provisions set out in CSA Z8000; and
 - (iii) Section 7.8.8 (Accommodation of Bariatric Persons) of CSA Z8000.

- (D) not adhere to any requirements within CSA Z8000 for compliance with recognized sustainability programs (such as LEED), as this Project is not required to comply with the specific requirements of any such program, but sustainable and environmentally friendly building practices are still strongly encouraged during Construction of the Facility.
- (d) Without limiting Sections 2.1(a), 2.1(b), or 2.1(c) of this Schedule, Project Co will undertake the Design and Construction in compliance with all applicable standards (as amended, supplemented or replaced from time to time and referenced by GNWT), including without limitation:
- (1) ACI (American Concrete Institute)
 - (A) 315-99 Details and Detailing of Concrete Reinforcement
 - (B) 315R-04 Manual of Structural and Placing Drawings for Reinforced Concrete Structures
 - (2) ANSI / ASME (American National Standards Institute / American Society of Mechanical Engineers)
 - (A) A13.1 Visibility Standard (Pipe Labeling)
 - (B) B16 Piping Component Standards
 - (C) B31 Pressure Piping Code
 - (D) B36 Piping Standards
 - (E) MBG531-00 Metal Bar Grating Manual
 - (F) X358.1: Emergency Eyewash and Shower Equipment
 - (G) Section IX: Welding Qualifications
 - (H) Unfired Pressure Vessels
 - (3) ANSI / EIA (American National Standards Institute / Electronics Industries Alliance)
 - (A) 568-B.1 & 568-B.2 (CSA-0T529-M95) Commercial Building Telecommunications Cabling Standard – Parts 1 & 2
 - (B) 568-B3 (CSA-T529-M95) Commercial Building Telecommunications Cabling Standard – Part 3
 - (C) 569-B (CSA-T530) Commercial Building Standard for Telecommunications Pathways and Spaces
 - (D) 606A (CSA-T528) Administration Standard for Telecommunications Infrastructure of Commercial Buildings
 - (E) 607A (CSA-527) Commercial Grounding and Bonding Requirements for Telecommunications

- (F) ANSI/TIA/EIA 526-7 and ANSI/TIA/EIA 526-14 Standards for Optical Power Loss Measurement of Single Mode and Multimode Fibre Cable Plant
 - (G) ANSI/TIA/EIA – 606-A Administration Standard for the Telecommunications Infrastructure of Commercial Buildings
 - (H) ANSI/TIA/EIA – 607A (J-STD-607-A-2002) Commercial Building Grounding and Bonding Requirements for Telecommunications
 - (I) ANSI/TIA/EIA – 758-A Customer Owned Outside Plant Telecommunications Cabling Standard
- (4) ANSI / IESNA (American National Standards Institute / Illuminating Engineering Society of North America)
- (A) ANSI/IESNA RP 29-06 Lighting for Hospitals and Health Care Facilities (Whenever there is a conflict between this recommended practice and CSA Z317.5, meet the requirements of CSA Z317.5)
- (5) ANSI / TIA (American National Standards Institute / Telecommunications Industry Association)
- (A) ANSI/TIA-942-2 Telecommunications Infrastructure Standard for Data Centers
 - (B) ANSI/TIA-1179 Healthcare Facility Telecommunications Cabling Standard and all referenced documents
 - (C) ANSI/TIA TSB-162 Telecommunications Cabling Guidelines for Wireless Access Points
- (6) ASHRAE (American Society of Heating, Refrigeration and Air-Conditioning Engineers)
- (A) Handbooks: Fundamentals, Refrigeration, HVAC Systems and Equipment
 - (B) Design of Smoke Control Systems
 - (C) ASHRAE Guideline 12-2000 – Minimizing the Risk of Legionellosis Associated with Building Water Systems
 - (D) 52.2: Method of Testing General Ventilation Air-Cleaning Devices for Removal Efficiency by Particle Size
 - (E) 55: Thermal Environmental Conditions for Human Occupancy
 - (F) 62.1: Ventilation for Acceptable Air Quality
 - (G) 90.1: Energy Efficient Design for New Buildings (Lighting levels shall meet GNWT design targets, as per consultation with the Authority (500 lux in office areas for example, meant to counteract the longer winter hours in Yellowknife) and shall not be limited by this standard)

- (H) 111: Practices for Measurement, Testing, Adjusting and Balancing of Building HVAC Systems
 - (I) 129: Measuring Air Change Effectiveness
 - (J) 135: Data Communication Protocol for Building Automation and Control Network
 - (K) 170: Ventilation of Healthcare Facilities
- (7) ASPE (American Society of Plumbing Engineers)
- (A) Plumbing Engineering Design Handbook, Volumes 1 – 4
- (8) ASTM (American Society for Testing and Materials)
- (A) A36/A36M-12 Standard Specification for Carbon Structural Steel
 - (B) A47/A47M-99 (R2014) Standard Specification for Ferritic Malleable Iron Castings
 - (C) A53/A53M-12 Standard Specification for Pipe, Steel, Black and Hot Dipped, Zinc Coated Welded and Seamless
 - (D) A82/A82M-05 Standard Specification for Steel Wire, Plain, for Concrete Reinforcement
 - (E) A108-13 Standard Specification for Standard Steel Bar, Carbon and Alloy Cold Finished
 - (F) A123/A123M-13 Standard Specification for Zinc (Hot Dip Galvanized) Coatings on Iron and Steel Products
 - (G) A143/A143M-07 Standard Practice for Safeguarding Against Embrittlement of Hot-Dip Galvanized Structural Steel Products and Procedure for Detecting Embrittlement
 - (H) A185-06 Standard Specification for Steel Welded Wire Fabric
 - (I) A185/A185M-06 Standard Specification for Steel Welded Wire Reinforcement, Plain, for Concrete
 - (J) A193/A193M-12b Standard Specification for Alloy Steel and Stainless Steel Bolting for High Temperature or High Pressure Service and Other Special Purpose Applications
 - (K) A26-08 Standard Specification for Seamless and Welded Austenitic Stainless Steel Tubing for General Service
 - (L) A307-07b Standard Specification for Carbon Steel Bolts and Studs, 60,000 psi Tensile Strength
 - (M) A325-07a Standard Specification for Structural Bolts, Steel, Heat Treated, 120/105 ksi Minimum Tensile Strength

- (N) A325M-08 Standard Specification for High Strength Bolts for Structural Steel Joints (Metric)
- (O) A490M-04ae1 Standard Specification for High Strength Steel Bolts, Classes 10.9 and 10.9.3, for Structural Steel Joints (Metric)
- (P) A497/A497M-07 Standard Specification for Steel Welded Wire Reinforcement, Deformed, for Concrete
- (Q) A500/A500M-13 Standard Specification for Cold Formed Welded and Seamless Carbon Steel Structural Tubing in Rounds and Shapes
- (R) A501-07 Standard Specification for Hot Formed Welded and Seamless Carbon Steel Structural Tubing
- (S) A641/641M-09 Standard Specification for Zinc-Coated (Galvanized) Carbon Steel Wire
- (T) A653/A653M-11 Standard Specification for Sheet Steel, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvannealed) by the Hot Dip Process
- (U) A775/A775M-07b Standard Specification for Epoxy-Coated Steel Reinforcing Bars
- (V) A792/A792M-10 Standard Specification for Steel Sheet, 55% Aluminum Zinc Alloy Coated by the Hot Dip Process
- (W) B88 Copper Piping
- (X) B211-12e1 Standard Specification for Aluminum and Aluminum Alloy Bar, Rod, and Wire
- (Y) B241/B241M-12e1 Standard Specification for Aluminum and Aluminum Alloy Seamless Pipe and Seamless Extruded Tube
- (Z) B483/B483M-03 Standard Specification for Aluminum and Aluminum Alloy Drawn Tubes for General Purpose Applications
- (AA) C140/C140M-14 Standard Testing Methods for Concrete Masonry Units and Related Units
- (BB) C260/C260M-10a Standard Specification for Air-Entraining Admixtures for Concrete
- (CC) C309-11 Standard Specification for Liquid Membrane-Forming Compounds for Curing Concrete
- (DD) C330/C330M-09 Standard Specification for Lightweight Aggregates for Structural Concrete
- (EE) C426-07 Linear Drying Shrinkage of Concrete Masonry Units
- (FF) C494/C494M-13 Standard Specification for Chemical Aggregates for Concrete

- (GG) C568-03 Standard Specification for Limestone Dimension Stone
- (HH) C615-03 Standard Specification for Granite Dimension Stone
- (II) C503-05 Standard Specification for Marble Dimension Stone
- (JJ) C616-03 Standard Specification for Quartz-Based Dimension Stone
- (KK) C1017/C1017M-07 Standard Specification for Chemical Admixtures for Use in Producing Flowing Concrete
- (LL) D412-0.6a-(2013) Standard Test Methods for Vulcanized Rubber and Thermoplastic Elastomers – Tension
- (MM) D624-00-(2012) Standard Test Method for Tear Strength of Conventional Vulcanized Rubber and Thermoplastic Elastomer
- (NN) D1751-04-(2008) Standard Specification for Preformed Expansion Joint Filler for Concrete Paving and Structural Construction (Nonextruding and Resilient Bituminous Types)
- (OO) E917.24401-1 Life Cycle Cost Assessment Methodology
- (PP) E935-00e1 Standard Test Methods for Performance of Permanent Metal Railing Systems and Rails for Buildings
- (9) AWWA (American Wood Preservers' Association)

- (e) If more than one of the above standards is applicable, then the more stringent such standard will apply.
- (f) If Project Co wishes to make reference to a code or standard from a jurisdiction outside of Canada, then Project Co must first demonstrate to the Authority's satisfaction that such code or standard meets or exceeds the requirements of this Schedule.

2.2 Project Overview

A brief overview of the Project is set out below:

- (a) **Stanton Territorial Hospital:** The Stanton Territorial Hospital, which will be located on the Existing Hospital Lands of the Stanton Territorial Hospital in Yellowknife, NT, will include:
 - (1) a new Hospital Facility;
 - (2) surface and/or structured parking; and
 - (3) associated works.
- (b) **Stanton Territorial Hospital "Support Services Building":** Support Services to support the operation of the Stanton Territorial Hospital will be located in an integrated building or buildings, on the Existing Hospital Lands of the Stanton Territorial Hospital site in Yellowknife, NT.
- (c) **Stanton Territorial Hospital "Rehabilitation Services":** Rehabilitation Services to support the operation of the Stanton Territorial Hospital shall be provided by the Project Co., and will be located in leased space provided by the GNWT within Yellowknife, NT, or on the Existing Hospital Lands.
- (d) **Stanton Territorial Hospital "Transcription Services":** Transcription Services to support the operation of the Stanton Territorial Hospital shall be provided by the Project Co., and will be located in leased space provided by the GNWT within Yellowknife, NT, or on the Existing Hospital Lands.

2.3 Clinical Specifications

- (a) Clinical Specifications are set out in Appendix 3A [Clinical Specifications] (the "**Clinical Specifications**").
- (b) Project Co will design and construct the Facility:
 - (1) so that it accommodates all of the spaces, activities, functions, Design features and adjacencies described in the applicable Clinical Specifications; and
 - (2) in accordance with the requirements of the applicable Clinical Specifications, subject to any adjustments or refinements made in accordance with the Appendix 2B [User Consultation and Design Review].
- (c) Project Co. will not be responsible for the Design and Construction of the Medical Travel Office and Financial Services as listed in the Operational Support Services section of the Clinical Specifications. These items will remain in existing off-site locations.

2.4 Additional Rooms and Spaces

- (a) Notwithstanding anything in the Clinical Specifications, Project Co will design and construct the Facility to include all rooms and spaces as required to comply with the terms of this Agreement, including sufficient rooms and spaces as necessary for the operation and maintenance of the Facility and for Project Co to perform the Services in accordance with this Agreement.
- (b) **“Unallocated/Unassigned Space”**, as applicable, may be available to Project Co for a proposed healthcare-related use, subject to Authority approval. During the Term, a proposed use of **“Unallocated/Unassigned Space”**, and any associated impacts, will be considered in accordance with Schedule 6 [Changes, Minor Works and Innovation Proposals]. [NTD: If an acceptable healthcare-related use for **“Unallocated/Unassigned Space”** is included in a proponent’s proposal, the details of such use shall be set out in Appendix 2F [Proposal Extracts (Design and Construction)] and this Agreement will be modified as required.]
 - (1) **“Unallocated/Unassigned Space”** is to be developed to the same level as “shelled space”.
 - (A) Any perimeter boundary walls, whether exterior building shell or interior partition, of the **“Unallocated/Unassigned Space”** and “shelled space” must be completely constructed except as noted below:
 - (i) Faces of perimeter boundary walls directly exposed to the **“Unallocated/Unassigned Space”** or “shelled space” may be left in a gypsum board level 3 finish or similar, depending on the wall construction assembly.
 - (B) Ceiling assemblies, flooring finishes, and other finishes not mentioned above are not to be installed or constructed in **“Unallocated/Unassigned Space”** and “shelled space”.
 - (2) All building code and life safety requirements, as it relates to all architectural and engineering design, must be adhered to for **“Unallocated/Unassigned Space”** and “shelled space”.
 - (3) Space in the Existing Hospital intended for **“Unallocated/Unassigned Space”** or “shelled space”, as per the Design of Project Co, shall be demolished/adjusted as required to meet the specified requirements.

2.5 Indicative Design

- (a) The Authority’s architectural and engineering consultants undertook an Indicative Design for the Project (the **“Indicative Design”**). The Indicative Design was based on a preliminary draft of the Clinical Specifications and also reflects preliminary consultations with potential Facility users. Drawings describing the Indicative Design for the Facility have been made available to Project Co.
- (b) Project Co may use the Indicative Design as a basis for its Design, but the Authority makes no representation as to the accuracy or completeness of any aspect of the Indicative Design.
- (c) Appendix 3G [Gross Floor Areas] has been included to represent the gross floor areas of the Indicative Design.

- (d) Project Co will be completely responsible for all aspects of the Design and Construction, whether or not it uses all or any part of the Indicative Design, and Project Co will independently verify the accuracy of any information contained in or inferred from the Indicative Design if Project Co uses any of such information in its Design.

2.6 Phased Construction

- (a) Project Co, in undertaking the Design and Construction of the Facility, shall incorporate a phasing strategy that:
 - (1) maintains the existing functionality and operations of the Existing Hospital at all times;
 - (2) minimizes disruption to existing operations;
 - (3) maintains access by the public and staff to the Existing Hospital;
 - (4) places a priority on completion of the new Critical Care Area in the early phases of the Project; and
 - (5) places emphasis on Chemotherapy and Renal Dialysis being implemented as soon as practically possible.

2.7 Use of Wood

- (a) The use of wood finishes in patient care areas shall follow CSA Z8000-11, unless treatment of wood product can be proven to meet infection prevention and control requirements.
- (b) Wood may be used for structure, according to Section 6.6 Woods, Plastics and Composites (including Millwork) (Division 06) of this Schedule, and may be exposed in public areas, such as the main lobby, if treated for infection prevention and control requirements.

3. DESIGN GUIDELINES AND PRINCIPLES

3.1 Project Design Principles

- (a) Project Co will apply the Design principles described in Sections 3.2 to 3.10 of this Schedule (collectively, the “**Project Design Principles**”) in undertaking the Design. In addition to the descriptions of these principles in this Part 3, specific requirements related to these principles are included in Parts 4 to 8 of this Schedule.
- (b) The Project Design Principles are integrated principles and Project Co will apply them on an integrated basis throughout the Design and Construction.

3.2 Evidence Based Design

- (a) Project Co will apply Evidence Based Design methodologies in undertaking the Design.
- (b) **“Evidence Based Design”** means that decisions about the Design of the Facility will be based on credible research, information derived from comparable projects, and information about Authority operations, in order to achieve the best possible outcomes. The goal of Evidence Based Design is to deliver measurable improvements (for example in the Authority’s patient and workflow outcomes, productivity, economic performance, and customer satisfaction).

3.3 Site Development

- (a) Project Co will design the Facility to:
 - (1) have a distinctive architectural character, reflecting the Authority’s values and role as the major centre for health in Yellowknife and the region;
 - (2) support community access and include a visible main entry and lobby for the Facility and a direct access route to the Emergency Department main entry; and
 - (3) reflect logical planning and clarity of circulation.
- (b) Project Co will consider all Design decisions within the context of enhancing the Lands.
- (c) Project Co may, in consultation with the Authority, use portables to facilitate the transition of people and equipment during Construction, but all portables must be removed by the end of Construction.

3.4 Sustainability

- (a) In accordance with the provisions in Schedule 2 [Design and Construction Protocols], Project Co will Design the Facility:
 - (1) using Design methods, building materials, operational practices, energy and life cycle considerations that promote environmental quality, social benefits and economic vitality throughout the Construction and Operating Periods, including by minimizing the Authority’s operating costs (for example in relation to utilities);
 - (2) to give priority to efficient use of resources, protection of health and indoor environmental quality;
 - (3) to take advantage of efficiencies and innovations that may be possible through integration of systems to minimize operational costs for the Authority (for example in relation to utilities); and
 - (4) considering alternative sources of energy;
 - (5) exploring opportunities for recovering waste heat; and
 - (6) to apply a total systems approach to minimize energy consumption and incorporate energy consumption management techniques that are targeted to stabilize and optimize energy flows.

3.5 **Optimized Outcomes**

(a) Project Co will design the Facility:

- (1) to facilitate the delivery of efficient and effective workflow and processes to accommodate the care delivery and staffing model described within the Operational Plan posted in the online Stanton Territorial Hospital Project data room;
- (2) to reduce waste, within both clinical and non-clinical service delivery processes, allowing for efficient staffing, and minimizing 'sneaker time' for staff members as they perform their work;
- (3) to recognize the value to the Authority of LEAN healthcare (or equivalent methodologies) in supporting the delivery of Authority activities, and accordingly allow the findings from such methodologies to play a key role in influencing Design decisions;
- (4) to include ergonomic Design features throughout all spaces that specifically facilitate the physical activities of staff and patients, including, for example, appropriate millwork, lighting, lift devices, and patient assist or equipment maneuvering space; and
- (5) to support innovative and collaborative methods of working, to help incorporate the Authority's new and emerging technologies, to respond to diverse work styles (such as hoteling and job-sharing), and to optimize flexibility and space utilization. A key element to the development of an integrated workplace is the provision of physical environments that support varied workplace strategies. Accordingly, Project Co will design workplaces to:
 - (A) include standardized spaces, systems furniture and casework where appropriate;
 - (B) provide floor lay-outs that accommodate teams as well as individuals, and that support mobile employees who require flexibility and use portable technology; and
 - (C) consider co-location options, space saving strategies, and lay-outs and furniture that facilitate change.

3.6 **Adaptability, Flexibility and Expansion**

(a) Project Co will design the Facility:

- (1) to incorporate a Site plan and Facility Design that allows growth and expansion over a 5 to 50 year planning horizon, including ease of interconnection for clinical logistics and Facility systems functionality;
- (2) to meet the needs of patients, visitors, employees, physicians, volunteers, learners, researchers and teachers now and into the future;
- (3) to accommodate the rapid cycle of innovation and change to support development and implementation of new clinical and non-clinical work processes and technology change;

- (4) to accommodate program, service, work and equipment change with minimized utility infrastructure and Facility impact, including down time, and so that clinical areas are acuity adaptable;
 - (5) to support future expansion of components, and capacity as a whole, including planning zones for growth, loose fit Design to optimize functionality within a given floor area, and multi-use adaptable space;
 - (6) with an infrastructure that incorporates excess systems capacity and includes systems and components that support future expansion with minimized disruption and allows for upgrades in Authority technology or technological progression; and
 - (7) utilizing open planning to create soft zones responsive to rapid change and growth by use of modular fit out.
- (b) In addition to the general specifications of Section 3.6(a), Project Co will design the Stanton Territorial Hospital to include:
- (1) a future MRI, including appropriately designed clear access, plus structural capacity, for convenient delivery and installation of an MRI unit and adequate mechanical and electrical capacity to accommodate the MRI unit;
 - (2) placement of a future Extended Care Facility, as an independent building (with mechanical systems / heating plant and electrical systems / transformer separate from the main Facility and not included in the Design and Construction of this project), in the southern portion of the Lands as part of the Master Site Plan, including appropriate utility services (water and sanitary) connection points; and
 - (3) provisions for future shelled space of 730 m², to provide flexibility for changes in the delivery of medical services, as follows:
 - (A) Main priority is to allow for program growth, with the preferred adjacencies being renal/dialysis and ambulatory care.
 - (B) May be located in the Existing Hospital and is not required to be only in the new components of the Facility.
 - (C) 82.5 m² of which shall be allocated to the spaces denoted as future shelled space for the Renal Care Unit as per Section 3.6 Renal Care Unit of Appendix 3A [Clinical Specifications].
 - (D) Due to recent changes in Schedule 3A [Clinical Specifications] Attachment 2 Schedule of Accommodations, Project Co shall reduce the remaining shelled space from 647.5 m² (730 m² less Renal shelled space) as required to accommodate the required changes.
 - (i) Any remaining shelled space in excess of the 82.5 m² shelled space for Renal shall be adjacent to Ambulatory Care.

3.7 Environmental Quality

- (a) Project Co will design the Facility:
 - (1) to promote a healing and wellness environment for patients and their families. The environment will be welcoming for the community of users and provide calming spaces for patients and visitors;
 - (2) to promote and enhance Patient Centred Care. "**Patient Centred Care**" is a standard of care that emphasizes the individual needs of each patient and treats them with respect and dignity, enabling them to participate integrally in their own care process within an environment that recognizes and respects the essential role of the patient's family or supporters;
 - (3) to provide an environment that supports excellence and innovation in the delivery of safe, high quality healthcare and where employees, physicians and others can work together collaboratively in promoting health and wellness;
 - (4) to include elements that have been proven to create a therapeutic and low stress environment;
 - (5) to allow for easy orientation upon entering the Facility, and simple wayfinding as patients and visitors move through the Facility;
 - (6) to create a comfortable, functional environment for employees, physicians, patients, patients' families and others, by including, as tools for creating an environment that will support and distract patients of all ages and their families:
 - (A) design elements that minimize noise, maximize natural light while providing light control, and use natural materials;
 - (B) design features in the main entry/customer services area (non-clinical/non-patient areas) that introduce nature and living plant material in the form of a living wall and/or gardens that contribute to the air quality and provide a place of respite from the clinical areas. All living wall and/or gardens must be proven by Project Co to meet all infection prevention and control requirements;
 - (C) design elements that allow for maximum family interaction;
 - (D) design features such as sound and music, color, pattern, air quality, nature;
 - (E) design features such as art and aesthetic forms that reflect Northern cultures and community history and values, and incorporate the work of Northern artists; and
 - (F) design features that are sensitive to regional population diversity including Northern cultures.
 - (7) to utilize views to create a visually pleasing environment, including:
 - (A) design elements views of the exterior environment in all inpatient rooms, meeting rooms, staff lounges and similar locations;

- (B) maintaining existing views and encouraging new views where possible through the use of view corridors, and the creation of appropriate public spaces;
 - (C) situating Facility to utilize “near views” of public spaces, natural and landscaped areas on-Site and off-Site;
 - (D) considering on-Site views as well off-Site views at all stages of the Design process; and
 - (E) minimizing negative visuals such as blocking views and creating unwanted sun shadows.
- (8) taking into consideration a respective environmental wind and snow study, undertaken by Project Co.

3.8 **Standardization**

(a) Project Co will design the Facility:

- (1) to, wherever appropriate, apply standardization to reduce errors and improve quality of service delivery to assist caregivers in quickly accessing patients, equipment, room controls and plumbing fixtures within the following areas:
- (A) Exam/Treatment Room (General)
 - (B) Exam/Treatment Room (Bariatric)
 - (C) Exam/Treatment Room (Isolation)
 - (D) Procedure Room (Standard)
 - (E) Patient Washroom/Shower
 - (F) Patient Washroom/Tub
 - (G) Patient Washroom (Accessible)
 - (H) Patient Washroom (Bariatric)
 - (I) Washroom (Public)
 - (J) Clean Utility Room
 - (K) Soiled Utility Room
 - (L) Medication Room
 - (M) Automated Medication Management System Room
 - (N) Housekeeping Closet
 - (O) Nourishment or Kitchenette Alcove
 - (P) Staff Room

- (2) Applications of standardization shall include:
 - (A) orientation and relationships of staff to patient zones, placement of utilities;
 - (B) location and relationship of utilities, including but not limited to electricity, data, and gases to major pieces of equipment and patient care areas; and
 - (C) location of entrances, major equipment, equipment storage, millwork and casework, and hand hygiene stations.
- (3) Project Co. shall demonstrate achieved standardization as outlined in Schedule 2 [Design and Construction Protocols].
- (4) Project Co. shall identify any patient care and clinical support areas in which standardization cannot be achieved because of constraints of the Existing Hospital footprint.

3.9 Technology

- (a) Project Co will design the Facility to utilize technology to improve cost effectiveness, integrate services and achieve better health outcomes.
- (b) Not used.

3.10 Accessible Design

- (a) Project Co will incorporate the following philosophies in the Design to address barriers to equitable access to healthcare such as cultural diversity, physical capability and gender:
 - (1) Equitable use – the Design will be easy to use by people with diverse abilities;
 - (2) Flexibility in use – the Design will accommodate a wide range of individual preferences and abilities;
 - (3) Simple and intuitive – the Design will be easy to understand, regardless of the user’s experience, knowledge, language skills, or current concentration level;
 - (4) Perceptible information – the Design will communicate necessary information effectively to the user, regardless of ambient conditions or the user’s sensory abilities;
 - (5) Tolerance for error – the Design will minimize hazards and the adverse consequences of accidental or unintended actions;
 - (6) Low physical effort – the Design is capable of being used efficiently and comfortably and with a minimum of fatigue; and
 - (7) Size and space for approach and use – the Design will use provide appropriate size and space for approach, reach, manipulation, and use regardless of user’s body size, posture or mobility.
- (b) Project Co will demonstrate respect for the cultural values of Northern Peoples of the Northwest Territories and the Kitikmeot region of Nunavut by designing the Facility to:

- (1) incorporate visible representation of Northern culture into the Design of the Facility and Lands;
 - (2) include landscaping that incorporates cultural elements such as sculptures and indigenous plants used for traditional healing; and
 - (3) include language and names on major exterior and interior signage so as to reflect the cultures and be translated into local languages (and syllabics) as appropriate, referring to Appendix 3B [Wayfinding Guidelines].
- (c) Project Co will incorporate reference to Northern history and heritage into the Design for the Facility:
- (1) in a manner that demonstrates respect for the local history and heritage of Yellowknife and the Northwest Territories, as applicable; and
 - (2) to include Design elements and display opportunities that will:
 - (A) identify, reinforce and educate visitors to the Facility of the unique history and heritage of Yellowknife and the Northwest Territories; and
 - (B) provide opportunities for the Stanton Territorial Hospital to display local art and donations.

4. SITE DEVELOPMENT REQUIREMENTS

4.1 Master Planning

- (a) Project Co will develop and submit to the Authority a Master Site Plan (“**Master Site Plan**”) for the Lands, based on the master planning principles and site development requirements described in Section 3.3 and Sections 4.1 to 4.4.
- (b) The Master Site Plan will illustrate the site context and development opportunities to validate the Facility siting. Provide appropriate access, parking, loading and turning radii for refrigerated trailers and removable storage for Bio-Hazardous Waste to transport to, by private vendor, to Wainwright, Alberta.
- (c) The Master Site Plan will contemplate future expansion at the Lands. Project Co will locate the Facility and design the Master Site Plan to allow for:
 - (1) the future addition of an MRI unit, for which the future functional requirements have been listed in the Clinical Specifications; and
 - (2) a future Extended Care Facility, as an independent building (with mechanical systems / heating plant and electrical systems / transformer separate from the main Facility and not included in the Design and Construction of this project) in the southern portion of the Lands.
- (d) The Master Site Plan will:
 - (1) describe in detail the implementation of all phased development at the Lands;

- (2) ensure that each component of the Facility is an integrated part of the Lands, facilitating the delivery of clinical and non-clinical support services (for example through efficient physical links and service connections between buildings, enhancing the ability of these to function in a cohesive manner;
 - (3) indicate the access needed for replacing major components required for the Facility, as well as for adding major components at a future date;
 - (4) provide a site servicing, parking and traffic master plan of the Lands to accommodate the expansion capacity described in Section 4.1(c);
 - (5) illustrate the expansion areas described in Section 4.1(c); and
 - (6) provide for easy access to oil storage tanks, propane storage tanks, and biomass storage facility to accommodate safe and efficient delivery of all fuels.
- (e) The Master Site Plan for the Stanton Territorial Hospital will reflect the redevelopment of the Lands currently in use.
- (f) The Master Site Plan for the Stanton Territorial Hospital expansion will:
- (1) respect the existing landscape;
 - (2) plan for the reuse and integration of existing significant landscape features, including trees, shrubs, and large rock outcroppings;
 - (3) integrate the pedestrian pathways and emergency access routes;
 - (4) include direct and logical pedestrian connections between the surrounding existing pedestrian pathways and the main Facility entries;
 - (5) meet and match existing grades along the limits of Construction;
 - (6) be in accordance with local by-laws, including City of Yellowknife By-Law No. 3934; and
 - (7) maintain the existing Frame Lake Trail system to the east of the Lands. If portions of the trail system must be removed, they must be relocated as approved by the Minister and follow the requirements as outlined in City of Yellowknife By-Law No. 3934.

4.2 Site Design and Development

- (a) General
- (1) Minimize the impact of site development and Facility placement on adjacent neighbours and land uses. Preserve visual privacy and sunlight for adjacent properties and buildings, and include features that will give the Facility an appropriate identity in the overall community context.

- (2) The existing Walt Humphries mural at the entrance to the parking lot must be either:
 - (A) maintained and incorporated into the proposed Design; or
 - (B) relocated to an approved location by the Minister.
- (3) Retain as many existing trees, vegetation and natural rock outcroppings on the Lands as possible to reduce the impact of the Facility on its neighbourhood context and to contribute to the natural healing environment for patients, visitors and staff.
- (4) Minimize the adverse micro-climatic effects arising from the location and configuration of parking, walkways and building(s), including effects of Facility orientation on snow drifting and wind around mechanical equipment and around entrances for patient, staff and visitor comfort and safety. Undertake an environmental wind and snow study.
- (5) Provide smooth transitions between Facility green space and public sidewalks.
- (6) Reinforce the physical relation of the structures with the major streets and create a legible site layout and pattern to foster a strong sense of place and identity and to ease increased vehicular and pedestrian penetration of the Lands.
- (7) Design for maximum access to the Facility. Provide separate and distinct passenger-side drop-off areas at each of the main entrances to the Facility and the Emergency Department walk-in entrance.
- (8) Cover passenger-side drop-off areas at each of the main entrances to the Facility and the Emergency Department walk-in entrance.
- (9) Mitigate the nearby noise from adjacent roadways through the use of exterior glazing and other acoustic screening.
- (10) Create meaningful open spaces both urban and natural for the benefit of patients, visitors and staff of all ages which provide opportunities for recreation and contribute to a cohesive, healthy community; capitalize on opportunities for outdoor areas of respite and repose to aid in providing a healing environment.
- (11) Design landscape and circulation routes to have clear unobstructed views of surrounding areas for safety surveillance.
- (12) Common facilities and/or areas must be grouped so that each facility or area is automatically monitored by the constant presence of users of facilities or areas.
- (13) Screen from view from the street all refuse/recycling areas, shipping, loading or utility areas, satellite dishes, outdoor vents, mechanical equipment, transformers and other similar structures. Locate these visual screening items so that they also serve as noise screens for components that generate outdoor noise including transformers, mechanical equipment and shipping / loading areas. Design the enclosure of the outdoor refuse/recycling areas to coordinate with the overall design of the Lands.
- (14) Provide easy access to garbage and recycling bins, and contained such bins within roofed/walled enclosures, or screen them from public view.

(b) Pedestrian and Vehicular

- (1) Create a high-quality, vibrant, pedestrian-friendly environment, including by tying the sidewalks and pathways to existing sidewalks and pathways adjacent to the Lands, including the adjacent Frame Lake pathway.
- (2) Design for the functional separation of traffic for emergency vehicles, visitors, staff and service vehicles, and to minimize public and service vehicle traffic interference with ambulance and other emergency vehicle access to the Lands.
- (3) Integrate vehicular circulation with layout of pedestrian and bicycle zones throughout the Lands to provide visible connections, promote safe travel, and to minimize conflict between vehicles and other modes of travel. Pedestrian networks and access routes should take precedence over vehicular travel lanes. Design the driveways to provide connections between the surrounding roads and the main entrances to the Facility. Design vehicular service entrances so that they are integrated into the Facility Design with minimal visual impact.
- (4) Provide safe pedestrian crossings that are clearly designated using pavement markings and signage. In areas where a high volume of pedestrian crossings is expected, provide for changes in surface material (such as from asphalt to Portland cement, for example) or changes in grade to extend pedestrian networks across the roadway crossings.
- (5) Create access for the mobility impaired (including people with baby strollers) by providing paths of travel with a minimum clear width of 1.5 m connecting all open space areas.
- (6) Provide pedestrian routes that are fully accessible by the disabled community. The primary pedestrian systems, public open space, walkways and entrances to the Facility must be universally accessible to the physically challenged and be elderly friendly. Design features which segregate circulation / areas / uses for people with disabilities from typical public usage are discouraged, except where required due to reasons of safety or due to space limitations.
- (7) Provide curb-cuts or curb let-downs in appropriate locations to facilitate convenient and direct access from the parking space(s) to the Facility for people with disabilities.
- (8) Provide clear, direct pedestrian routes that are unimpeded by parked or moving vehicles.
- (9) Provide walking trails around the perimeter of the Lands and pedestrian access throughout the interior of the Lands. Surface of walking trails must be wheelchair accessible (e.g. compacted gravel, 'Fibar' type playground surfacing, engineered wood fiber, asphalt or of a material as deemed appropriate by the City of Yellowknife).
- (10) Use traffic calming measures (e.g. curb bulges) to minimize roadway pavement width at pedestrian crosswalks.
- (11) Pedestrian routes within and to/from parking facilities must be clearly delineated and logical in terms of directness.

- (12) Provide paving and landscape treatments to further identify and enhance the pedestrian movement.
 - (13) The pathway system will incorporate landscape treatments with trees and benches, lighting, and distinct paving where appropriate. The pathway system must also be wide enough for wheelchairs / scooters and will include a tactile strip for the visually impaired wherever possible.
 - (14) Integrate the adjacent Frame Lake Trail into the Lands design to provide safe access to the hospital as well as a safe route that bypasses the major traffic of the Lands.
 - (15) Minimize grade changes for drop curbs and raised crossings. Drop curbs aligned to pedestrian crossings.
 - (16) All walkways and other paved areas must have positive drainage to shed rain water quickly with minimum side slope gradients of 2%.
 - (17) Minor walkways must be at least 1.5 m (5ft.) wide.
 - (18) Major walkways must be wide enough to allow for two people walking side by side and someone passing (i.e. minimum 2.5 m (8.2ft.) wide).
 - (19) Provide lighting on all pathways, including pedestrian-scale lighting.
 - (20) Ensure safe and efficient access routes for fuel delivery vehicles, including turning radii as required.
- (c) Public Realm and Open Space
- (1) Design and construct the Facility with consideration for the legibility, quality and consistency of the overall treatment of the public realm, including public open space, pedestrian corridors and streets, to achieve the urban Design objective for a unified and attractive built environment.
 - (2) Provide a hierarchy of open spaces as follows:
 - (A) public open spaces;
 - (B) private open spaces;
 - (C) private and secure open space for the Mental Health Unit / Psychiatry Unit;
 - (D) private respite spaces for staff; and
 - (E) spaces that preserve the natural environment.
 - (3) Achieve segregation between different open spaces through landscape barriers such as fencing, walls, hedges, topography and planting.
 - (4) Situate building(s) so that they maximize the availability of sunlight in exterior and open spaces and areas of high pedestrian use. Maximize sunlight exposure for private and secure open spaces.

- (5) Situate building(s) so that they maximize the preservation of existing natural features and consider the integration of these elements into the overall Design.
- (d) Community Noise Protection
- (1) Orientate the Facility on the Lands so that the noise impact of emergency and service vehicles and new traffic routes will be minimized on the existing residential areas.
 - (2) Strategically locate and / or silence mechanical and electrical equipment, outside air intake and discharge openings and emergency generators' engine exhausts.
 - (3) Design and construct the Facility so that noise levels from mechanical and electrical equipment at the nearest residential property lines and within the patient spaces and offices do not exceed:
 - (A) 50 dBA at night; and
 - (B) 60 dBA during the day
 - (4) Ensure that electrical and mechanical noise levels in outdoor patient lounge areas and public sidewalks do not exceed 50 dBA.
- (e) Site Wayfinding and Exterior Signage
- (1) Provide site wayfinding and exterior signage in accordance with Appendix 3B [Wayfinding Guidelines].
 - (2) Provide a signage master plan for approval by the Authority.
 - (3) Arrange pedestrian pathways to ease wayfinding and create an amenable environment for pedestrians through the use of coordinated methods of wayfinding which inform people of routes through the Lands to specific building(s) and entries or to the major street and transit nodes. Encourage pedestrians to avoid unsafe vehicle roads by providing well-signed alternative pedestrian routes. Utilize paving patterns which can easily be differentiated from vehicular paving by pedestrians where they cross vehicular traffic to access the emergency department and main entrance.
 - (4) Provide visually connected pathways and integrated plazas to facilitate wayfinding.
 - (5) Provide external directional signage that:
 - (A) clearly identifies the Facility and its components including the emergency department, main entry drop off area, and public and staff parking;
 - (B) clearly indicates points of access for the public, parking areas and restrictions for various vehicle types and restrictions to 'after-hours' access; is well illuminated, backlit, reflective or high contrast and easily visible at night; and
 - (C) minimizes light spillage.

- (6) Wayfinding must start at the Lands property line with freestanding illuminated exterior signage located at each prominent site entry location. Supplement these entry signs with free standing signage structures located to give overall direction within the site. These illuminated exterior signs must have an overall site plan and have some weather protection for standing viewers.
 - (7) Locate site banner signs at strategic landscaped locations to advertise hospital events and fundraising campaigns.
 - (8) Overall site parking signage is required to follow consistent Design intent for the Lands.
 - (9) Provide all necessary exterior illuminated signage to direct traffic from the access streets. Design and construct such signage so that it is visible for drivers of vehicles to identify at a far enough distance so that they can safely slow down and follow the signage to enter the Facility and the parking areas.
- (f) Site Lighting
- (1) Provide lighting for public outdoor spaces and the adjacent private property to create an unobtrusive, human scale lighting concept, with a hierarchy of fixture types designed according to functional and security needs (including CPTED), and reflecting the hierarchy of pedestrian corridors.
 - (2) All exterior luminaires will be vandal resistant and LED fixtures.
 - (3) Site lighting shall enhance security camera coverage and shall not be glarey or detrimental to coverage.
 - (4) Lighting on pedestrian paths will illuminate not just the path but also the surrounding area adjacent to the path, particularly en route to transit connections.
 - (5) Provide lighting to facilitate ease and safety of pedestrian access to public transit.
- (g) Panic Duress
- (1) Provide a minimum of four panic duress stations in the parking areas that will have two-way communications with security and a LED blue flashing light on top.
- (h) Receptacles for Car Engine Heaters
- (1) Provide a duplex receptacle for every two parking stalls for car engine heaters except for the main parking lot.
- (i) Landscape
- (1) Provide landscape for the complete Lands that contributes to a livable, healthy and responsive community.
 - (2) Provide elements including therapeutic gardens, exterior rehabilitation areas, areas of refuge including covered seating, handrails along pathways and landscape features for the enjoyment of staff and visitors.
 - (3) Minimize grade changes for drop curbs and raised crossings. Drop curbs aligned to pedestrian crossings.

- (4) Provide streetscape treatments (e.g. street trees, boulevards and sidewalks) to City of Yellowknife guidelines and standards (as a minimum). Verify streetscape requirements with the local municipality. Reinforce and enhance an image of the City of Yellowknife, as applicable, through the preservation of mature vegetation.
 - (5) Provide landscape site plans for the complete Lands. Landscape plans to be prepared by a NWTALA (Northwest Territories Association of Landscape Architects) registered landscape architect, or other approved component of the CSLA (Canadian Society of Landscape Architects).
 - (6) Installation of the landscape to be supervised and approved by a NWTALA registered landscape architect (or other component association of the CSLA).
 - (7) Hose bibs to be spaced around the exterior of the Facility at entrance locations and 45m (150') on centre.
 - (8) Within the limit of disturbance, maximize the amount of landscape areas on the Lands and minimize the amount of impervious surfaces to increase the natural absorption rate of storm water, targeting a goal of 25% of the Lands to have soft landscape, including trees, shrubs, groundcover, and grass. Alternatively, untouched landscape of the Great Slave Lowland High Boreal Ecoregion within the limit of disturbance that has not been altered may be considered as part of the 25%.
 - (9) Maximize the amount of untouched, existing landscape to remain untouched, targeting a goal of 50% of the Lands to remain untouched, and remain as a native, untouched landscape of the Great Slave Lowland High Boreal Ecoregion.
 - (10) Preserve to the maximum extent possible, the existing natural landscape areas. Including the transplanting of existing trees as opposed to complete removal (with required root pruning, under the advisement of an ISA Certified Arborist), and the sowing of native seed stock from native plant stock on the Lands under the advisement of a qualified horticulturalist with specialization in Northern plants.
 - (11) See Sections 8.1(h) and 8.2 for detailed descriptions of planting and street furniture suggestions and requirements.
- (j) Site Safety Through Design
- (1) Public spaces will be distinguishable from private spaces. Design and locate symbolic barriers throughout the site. Symbolic barriers will include landscaping (such as changes in paving, vegetation or grade) and/or architectural features (such as low walls, bollards and raised planters) rather than continuous solid fences or walls.
 - (2) Design the exteriors of the site so that there are opportunities for people to easily view what is happening around them during the course of their everyday activities.
 - (3) Eliminate entrapment spots. Incorporate barriers that permit visual access without loss of privacy such as glazing in lobby doors and stairwells.

- (4) Promote the “eyes on the street” concept by using windows, doors, and activity generators such as seating or fountains. Windows will be visible from the street and not hidden by vegetation or other items.
- (5) Incorporate CPTED principles in the design of all exterior areas of the Lands.

4.3 **Parking**

(a) General

- (1) Project Co will provide parking for the Facility in accordance with the requirements of this Schedule and all applicable standards.

(b) Facility Specific Requirements

(1) For the Stanton Territorial Hospital

(A) Based on July 2013 Stanton Territorial Hospital Traffic and Parking Study which:

- (i) is based on Indicative Design; and
- (ii) does not include any requirements of the addition of shelled space for future growth.

(B) Provide 375 vehicle parking stalls as follows:

- (i) 226 powered stalls for physicians and staff, located directly adjacent to the main staff entrance;
- (ii) 59 stalls for clinic patients;
- (iii) 42 stalls for patient-visitors;
- (iv) 20 stalls for the Emergency Department;
- (v) 28 powered stalls for staff for Support Services;
- (vi) minimum of 38 (10% of 375 total parking stalls) shall be for disabled persons, located so that users can access entrances without crossing roadways; and
- (vii) provided that these numbers and the stall locations are subject to adjustment under the User Consultation and Design Review process.

(C) Outpatient Rehabilitation Services and/or Transcription Services may be integrated into the Facility based on the Design of Project Co, and if included:

- (i) provide 43 vehicle parking stalls (31 powered stalls for staff and 12 stalls for patients) for Outpatient Rehabilitation Services;
- (ii) provide 5 powered vehicle parking stalls for staff for Transcription Services; and

- (iii) provide increased parking stalls for disabled persons, located so that users can access entrances without crossing roadways, based on minimum of 10% of total additional stalls added for programs/services noted above.

(D) In addition to the parking stalls required above, provide:

- (i) 1 (one) transit bus stop within reasonable distance to the main entrance;
- (ii) drop off spaces and 1 taxi stand;
- (iii) 1 dedicated stall for police, adjacent to the Emergency Department;
- (iv) 2 Emergency Department patient drop off spaces;
- (v) any additional motorcycle parking stalls as may be required by the City of Yellowknife;
- (vi) secured and sheltered, long-term bicycle parking for 25 employee bicycles; and
- (vii) unsecured, short-term bicycle parking for 12 bicycles.

(c) Parking Stall Sizes

(1) Parking stalls will comply with the following:

- (A) minimum parking stall and drive aisle dimensions shall be designed to meet the minimums stated in the City of Yellowknife Zoning By-Laws, while:
 - (i) parking stall sizes are dependent on parking angles in degrees; and
 - (ii) pick up and drop off areas, minimum stall dimensions will be 6.0 m x 3.5 m.

(d) Structured Parking

- (1) Project Co may choose to provide structured parking (which may be either underground parking or a parkade).
- (2) Structured parking must blend into the Facility architecture and not impede views from the hospital public areas and patient rooms of the lake and natural landscape features.
- (3) Structured parking must not negatively impede traffic flows in/out of hospital property and provide safe access for users into the hospital.

- (4) The entry of structured parking must be located a sufficient distance from the public street to prevent parking queues from extending onto the street. At the exit of structured parking, a minimum distance of two car lengths must be provided between the exit and the street edge to accommodate cars waiting to enter the traffic stream.
 - (5) Unfinished ceilings, lights, pipes and related items must not be visible from a public street or public street sidewalk.
- (e) Parking Payment System
- (1) Project Co will design and construct structured and surface parking so as to accommodate future provision of a 'pay by space' parking system with payment machines ("pay devices") located both within parking areas and within the Facility so as to allow users to 'pay by space' and pay for time extensions without leaving the Facility:
 - (2) The design shall allow for installation of infrastructure access control systems, illuminated signage, and pay devices which will not require demolition to the structured and surface parking.
 - (3) Project Co will coordinate with the Authority consideration for infrastructure necessary to support pay devices in the following areas:
 - (A) the main Facility entrance;
 - (B) the main Emergency Department entrance;
 - (C) at 6 locations in the structured parking (if applicable), which will be confirmed through the user consultation process described in Appendix 2B [User Consultation and Design Review]; and
 - (D) at 6 locations in the surface parking (if applicable), which will be confirmed through the user consultation process described in Appendix 2B [User Consultation and Design Review].
- (f) Parking Design Principles
- (1) Noise attenuation must be provided on parking structure walls within 200 meters from residential developments.
 - (2) Walls and ceilings of parking structures must be painted to enhance or reflect light. The design and operation of parking facilities, both surface and multi-level, will create convenient and safe usage, including panic duress systems. Refer to Section 7.8.
 - (3) Design and construct a surface parking, parkade and/or underground parking in accordance with the following:
 - (A) provide structured parking that is capable of being secured and locked when not in use;
 - (B) provide adequate provision for ingress and egress to all parking spaces to ensure ease of mobility, ample maneuvering clearances, and safety of vehicles and pedestrians;

- (C) apply CPTED principles and the following principles:
 - (i) reduce opportunities for graffiti through the use anti-graffiti coatings;
 - (ii) ensure the interior is well-lit while minimizing light spillage into adjacent properties; and
 - (iii) where surface parking is situated between a building and an adjacent public street, provide trees between the building setback line and the adjacent public street.
 - (D) clearly mark all parking spaces as directed by the Authority;
 - (E) use wayfinding strategies, including signage, to allow each floor to be identifiable and to assist in orientation and ease of finding/identifying parking stalls;
 - (F) set parking lot layouts in an orderly and logical design to minimize confusion and excessive internal circulation;
 - (G) employee parking must not be located in visually remote areas of parking lots, behind blank walls, or within service or loading areas;
 - (H) in situations with little or no surface parking, the ground level parking areas in a parking structure must have sufficient height clearance to accommodate most light trucks and passenger vans; and
 - (I) all curb & gutter structures shall be designed with snow removal in mind. Parking lot and roadway geometry shall minimize irregular shapes that will be damaged easily during snow removal operations.
- (4) Provide all parking lots with the following landscape requirements:
- (A) screen surface parking by plant material, and where surface parking is behind building(s), screen such surface parking from adjacent properties with landscape planting or trellis strips;
 - (B) incorporate safety and security measures into the landscape design;
 - (C) surface parking must contribute to the continuity of the street landscaping edge without compromising the safety and security of the public inside the lot and on the public street;
 - (D) reduce the visual impacts of large surface parking lot areas by dividing the parking area into smaller parking lots defined at the boundaries by drive aisles, sidewalks, trees and landscape planting; plant shrubs and small trees to define circulation routes for pedestrians and vehicles; and
 - (E) multiple surface parking lots must provide a direct pedestrian pathway system through the parking area to provide convenient and safe pedestrian access between Facility entrances, parked cars, and sidewalks of adjoining streets.

(g) Bicycle Parking

- (1) Provide bicycle parking facilities that are at-grade, have uniform lighting and are safe and secure.
- (2) Provide secured, long term bicycle parking for employees. Such bicycle parking may be integrated into parking structures located close to Facility access points.
- (3) Provide unsecured, short-term bicycle parking in the form of bicycle racks located within 15 m of a principal Facility entry. Such bicycle parking must be situated in well-lit locations, clearly visible from principal Facility entries and/or public roads.
- (4) Bicycle racks must be made of sturdy, theft-resistant material and be secured to the floor or ground with tamper proof bolts. Design the bicycle racks so that they secure the bicycle frame, not the wheels, and allow both the frame and front wheel to be locked to the rack with a U-style lock.
- (5) Staff bike parking must be sheltered from the elements by including structures that are separate or integrated into the Facility Design by complimenting the styling of the Facility architecture and not impeding cycling, pedestrian or vehicular traffic patterns.

4.4 Site Infrastructure

(a) General

- (1) Project Co will provide, as necessary, adequate and reliable infrastructure, and necessary municipal services to the Facility's municipal off-site services infrastructure.
- (2) Project Co will not run municipal services and related infrastructure for the Facility under any other building(s) on the Lands, regardless whether these building(s) are existing or are to be newly constructed (as part of this Design and Construction or intended for the future). These services need to be easily accessible for any required maintenance.
- (3) Project Co will install appropriate connection points to facilitate the future Extended Care Facility in accordance with its Master Site Plan.
- (4) All works required for excavation, exposing, backfill and surface restoration of all proposed water, sanitary sewer and storm service connections, as well as the connection of each service to the municipal system, will be the responsibility of Project Co.

(b) Off-Site Services Infrastructure

(1) General

- (A) Design and construct all municipal off-site services, connections or upgrading of municipal systems as needed or as required by the City such that the off-site municipal infrastructure is adequate to support the Facility, to the satisfaction of the City and other governmental authorities. Refer to the applicable City documents for land development and municipal servicing engineering standards.

- (2) Potable Water – Off-Site
 - (A) The Facility requires two separate water system connections, including metering and backflow prevention.
 - (B) The primary connection point will be the existing services location to the Facility.
 - (C) The secondary supply routing will be extended in from the existing water main near the intersection of Byrne Road and Old Airport Road. The details pertaining to this connection to the City of Yellowknife-owned supply main must be acceptable to the City of Yellowknife Public Works and Engineering Department. This will include, at a minimum, backflow prevention, and possibly separate metering. The extent to which provision for on-site pumping from this secondary connection will be required (to suit either domestic demand or fire-fighting demand, or both), will be determined, in part, by the final Facility floor area and Facility height.
 - (D) Project Co will ensure that City access to municipal fire hydrants is not encumbered at any time. All existing hydrants must remain active during the Construction. Temporary Construction water will be provided by a new connection to the City's water system.
 - (E) Project Co will ensure that the flows required by the upgraded Facility will not exceed the capacity of the existing water supply infrastructure.
- (3) Sanitary Sewer – Off-Site
 - (A) The connection point for the sanitary sewer will be to the existing municipal sewer service, which is located at the south end of the Facility.
 - (B) Project Co will ensure that that the peak sanitary flow of the Facility will not exceed the capacity of the existing sanitary infrastructure.
- (4) Storm Drainage – Off-Site
 - (A) Project Co must employ on-site storm water management strategies which result in no net increase in peak storm water discharge rates up to the 100 year recurrence interval event. Project Co will design the Lands so that expected drainage flow capacity and direction meet City of Yellowknife requirements. Note that the City of Yellowknife does not have a storm drainage municipal system, with storm drainage typically handled by landscaping.
- (c) On-Site Services Infrastructure
 - (1) General
 - (A) Design and construct all on-site servicing to meet or exceed the design and quality requirements for the corresponding municipal off-site services, and to meet the needs of the Facility.

- (2) Sanitary Sewers – On-Site
 - (A) Provide sanitary sewers of a diameter, grade and depth to safely convey all effluent from the Facility. The sanitary sewer system will include the pipes, manholes and all other required appurtenances to comply with applicable municipal and provincial standards.

- (3) Storm Sewers and Drainage – On-Site
 - (A) Provide storm sewers, storm sewer management strategies and drainage network:
 - (i) of a size, grade and depth to safely manage and convey all storm water on-site to the receiving system;
 - (ii) which, at minimum, maintains the pre-Construction discharge rates after Facility completion;
 - (B) Provide an on-site storm water management system designed to maintain the pre-Construction discharge rates after Facility completion.
 - (C) Project Co will ensure that neighbouring properties are protected from flooding and nuisance runoff issues and existing municipal system capacities are not exceeded.

- (4) Watermain and Appurtenances – On-Site
 - (A) Provide two separate watermain systems at the Lands (watermain and ancillary components) from the municipal systems, each system capable of providing all required commercial/institutional demands and firefighting capacity and redundancy for the Facility. The extent to which provision for on-site pumping, from both primary and secondary off-site connection points, will be required (to suit either domestic demand or fire-fighting demand, or both), will be determined, in part, by the available system pressures, the final Facility floor area and Facility height.
 - (B) Fire-fighting volumetric demands are to be calculated using the Fire Underwriters Survey (FUS) method, unless alternates are otherwise approved by the municipal authorities.
 - (C) If required to meet the Fire Underwriters Survey fire flow demands, Project Co will provide back-up, permanent fire-fighting equipment.
 - (D) The watermain systems will include approved backflow preventers necessary to protect the municipal system and on-site Facility from contaminants based on the hazard level of the Facility.
 - (E) For the purposes of redundancy, one of the water services to the Facility will operate as a secondary connection to the municipal system. A looped on-site connection for the main is desired by the Authority.
 - (F) Both watermain services, from separate off-site connection points, are to converge into a common mechanical room, wherein metering and splitting off of fire suppression flows will occur.

- (G) The watermain services shall be designed with a recirculating line and pump to ensure water is always flowing to prevent freeze-up of the services.

(5) Road Works – On-Site

- (A) Design and construct for the Lands all roadways, including the pavement, curbs and gutters, sidewalks, walkways, signage, pavement markings, and traffic calming devices, that are handicapped accessible and wheel-chair friendly, and provide safe passage between parking areas, loading areas, emergency vehicle areas and drop off areas without requiring the driver to enter the municipal roadway. The minimum roadway surface width will be 9.0 metres.
- (B) All roadways will accommodate fire truck access in accordance with the requirements of the respective municipality's fire department or by municipal bylaw requirements.
- (C) Design vehicle for loading access to be WB23 B-Train. All other internal roadways must safely accommodate the typical fire truck in use by the City of Yellowknife.
- (D) Truck movements on the Lands will be designed such that loading bays are easily accessible, limiting the requirement for truck maneuvering into and out of loading bay areas.
- (E) All curb & gutter structures shall be designed with snow removal in mind. Parking lot and roadway geometry shall minimize irregular shapes that will be damaged easily during snow removal operations.

(6) Street Lighting – On-Site

- (A) Provide lighting on the Lands for roadways, walkways and parking areas to ensure safe vehicle and pedestrian traffic with respect to collisions, personal safety, and Facility access/egress. Lighting will be sympathetic to the Existing Hospital and future building(s) on the Lands, as well as all neighbouring properties. Wherever possible, all site lighting is to be 'dark skies' compliant, or sufficient enough to provide for safety, security, display and attraction of the Facility but arranged so that no direct rays of light are projected to adjacent properties or interfere with the effectiveness of any traffic control device.
- (B) Detailed on-site lighting specifications are carried elsewhere, under Section 7.6(l) of this Schedule.

5. BUILDING DESIGN REQUIREMENTS

5.1 Adaptability and Flexibility

- (a) Project Co will:
 - (1) locate permanent building elements, such as stairs, elevators and duct shafts, to minimize constraints on changes to the Facility;
 - (2) minimize interior columns for ease of planning and re-planning of care areas;

- (3) locate shear walls and/or bracing to allow flexibility to the program space for future improvements and modifications;
- (4) provide additional capacity in vertical (and horizontal) distribution shafts and plenums to accommodate 10% additional service system improvement;
- (5) accommodate the vertical and horizontal distribution of electrical and mechanical services to allow maintenance and changes to occur with the least disruption to clinical service delivery;
- (6) provide access points to building service systems in critical locations so that service disruption is minimized; and
- (7) in general, avoid cabling in the concrete slab. Provide a system or strategy such as "Elevated Flooring" (see Section 6.10(b)(11)) or overhead cable trays to allow for easy servicing to Telecommunication Equipment Rooms and medical equipment as per consultation with the Authority.

5.2 Expandability

- (a) Project Co will:
 - (1) provide primary circulation corridors that allow for expansion without increasing the complexity of the circulation system as a whole; and
 - (2) provide floor zoning that allows for expansion of programs or services, for example by locating administrative and other non-clinical 'soft' functions adjacent to clinical areas that are likely to need to expand.

5.3 Post Disaster Requirements

- (a) In undertaking the Design, Project Co will consider the need to protect the life and safety of all Facility occupants and the need for continuing services following catastrophic events such as earthquakes, severe weather, epidemics, chemical spill, disruption to service utilities and internal events such as fire. Particular attention should be paid to the Stanton Territorial Hospital facilities, generators, transformers and service connections.
- (b) Design and construct the Facility, generators, transformers and service connection structures, structural components, non-structural components, anchorages, and equipment to post disaster standards in accordance with the NBC.
- (c) If the Support Services Building is designed as a stand-alone building, Project Co will design and construct the structural components of the Support Services Building to post disaster standards in conformance with the NBC, and provision shall be made for emergency power. Other aspects of the Support Services Building design must meet the requirements for Normal Importance Category.
- (d) If structured parking (parkade) is designed as a stand-alone building, Project Co will design and construct the structured parking to meet the design requirements for a Normal Importance Category building as defined in the NBC. If structured parking (parkade) is designed as integral to the Facility, Project Co will design and construct the structured parking to meet the design requirements for a Post Disaster Importance Category building as defined in the NBC. This applies to all aspects of the Design, including structure, as noted in Sections 5.7 and 5.7(m).

- (e) Design and construct essential services servicing the Stanton Territorial Hospital, including the electrical system, steam, domestic water and medical gases, to post disaster standards as defined in the NBC. Locate these services in utilities enclosures that meet post disaster standards as defined in the NBC.
- (f) Design and construct Stanton Territorial Hospital so that it is capable of meeting its functional requirements (lights, power, water and sewer) for a minimum period of 72 hours following a natural disaster or other incident (except that additional storage tanks are not required for potable water – assume water will be pumped in).
- (g) See Section 5.8(g) for mechanical post disaster requirements.
- (h) See Sections 5.9(a)(2), 5.9(b)(10), and 5.9(b)(13) for electrical post disaster requirements.
- (i) Design and construct the Facility to support a Project Co supplied and installed roof-top emergency communications antennae tower, including all structural supports and fasteners, all electrical, lighting, and lightning grounding requirements, and all enclosures, entrances, ducting, pathways, and cabling between the communications tower antennae locations and the Emergency Operations Centre (the “EOC”) communication equipment room. The communications tower will be sized to support all Authority emergency communications antennae plus capacity for an additional antennae of each type as required by the Authority.
- (j) Project Co will design and construct the Facility so that it includes space that is capable of being used as an EOC during an emergency, as per Section 9.10 Other Staff Support Space of Appendix 3A [Clinical Specifications]. The EOC will:
 - (1) include a communication centre, a locked supply storage area, and a communication equipment room capable of supporting the communications tower systems and equipment;
 - (2) have all EOC equipment be powered from outlets on at least two separate circuits and be connected to vital power, with 30% of EOC lighting and power outlets connected to UPS power;
 - (3) have dedicated power outlets as follows:
 - (A) four power outlets for laptop computers;
 - (B) one power outlet for multifunction printer/photocopier/scanner;
 - (C) one power outlet for fax machine; and
 - (D) one power outlet for data projector.
 - (4) have telecommunication outlets supplied from two separate network rooms;
 - (5) have dedicated telecommunication outlets as follows:
 - (A) four data outlets for laptop computers (laptops should be able to access the Authority’s network as well as the external Internet in both a wireless and hardwired format);
 - (B) one data outlet for videoconferencing on wall-mounted display screen;

- (C) one cable outlet for wall-mounted display screen (to support viewing and monitoring of local, regional, provincial and national news);
 - (D) four regular telephone lines;
 - (E) one telephone line that will work in the event of sustained power failure;
 - (F) one teleconference phone line; and
 - (G) one fax machine phone line.
- (6) have two separate cable feeds from external antennae that will support satellite phone communications;
 - (7) be capable of supporting the emergency communication systems described in Section 5.3(j), including all required cabling, conduit paths and other infrastructure;
 - (8) be capable of supporting teleconferencing and videoconferencing;
 - (9) have 2 large whiteboards; and
 - (10) have 3 large status and information tackboards (one for contact numbers, one for resource status, and one for situational awareness map).

5.4 **Architecture**

(a) Building Form and Character

- (1) Project Co. will design the Facility with the following considerations for building form and character:
 - (A) General
 - (i) The Facility will be articulated, yet be detailed to ensure the building envelopes are robust.
 - (ii) Utilize glazing to optimize views and daylight penetration, and to reduce energy consumption.
 - (iii) Not used.
 - (B) Exterior Building Materials and Colour
 - (i) Exterior materials will include high quality durable finish materials and robust detailing.
 - (ii) Cladding materials may be architectural concrete, brick or stone masonry, glass, phenolic panels, metal cladding and wood.
 - (iii) Stucco, plaster and similar finishes will not be accepted as a building material.

- (C) Roof
 - (i) Roof top mechanical / electrical equipment to be enclosed within a mechanical penthouse, and incorporated in architectural elements, consistent in form, material, and detail with the rest of the Facility. Roof top mechanical / electrical equipment will be provided with noise attenuation.
 - (ii) Roof access shall be provided via a stairwell and penthouse.
 - (iii) Project Co will provide high parapets or guardrails to minimize the need for fall arrest anchors for operational staff. Locate at main roofs and other roof areas needing regular access for maintenance
- (b) Circulation
 - (1) Project Co. will design the Facility with the following considerations for building configuration and internal circulation:
 - (A) Building Entrances
 - (i) Major entries into the Facility from the exterior, such as the main entrance, Emergency Department walk-in entrance, and main staff entrance (as opposed to entries for services, etc) must be barrier-free and at grade, without stairs or ramps.
 - (ii) All direct entries into the Facility from the exterior will be protected from snow and rain by canopies or building overhangs. Weather protection must be implemented where Facility entrances front a sidewalk or open space. Weather protection must not extend into public street rights-of-way.
 - (iii) Ambulance Entrance Area, including an office/staging area, ambulance entrance vestibule, and a completely enclosed, climate controlled, drive-through ambulance garage, to be as noted within Appendix 3A [Clinical Specifications] and respective Attachment 2 Schedule of Accommodations.
 - (iv) Orient and design Facility entrances based on an environmental wind and snow study, undertaken by Project Co, to provide pedestrian comfort.
 - (v) Orient Facility generally to minimize wind induced by building(s).
 - (vi) Provide wind mitigating measures and areas that are protected from the wind so as to extend the seasonal duration of outdoor activities such as convalescing or socializing.
 - (vii) Entrance vestibules will provide complete transparency from the exterior, from the interior immediately in front of the vestibule, and from habited spaces adjacent to at least one long side of the vestibule.

- (viii) Entrance vestibules will be configured and sized in order to preserve the airlock effect for climate control.
 - (ix) Ensure a minimum 5 metre distance between the sets of doors to allow stretchers and wheelchairs to fit lengthwise into the vestibule. Provide a heated air curtain system over the exterior doors to control the temperature loss during winter months.
 - (x) Use sliding doors at all public entrances, except that where sliding doors are not feasible, use swinging doors. Use doors that can be activated by handicapped accessible push-button controls located on the inside and outside of both sets of doors or revolving doors with a swing door. Doors will be configured for push-pull manual operation in addition to automatic operation.
 - (xi) Entrance doors to the Emergency Department and doors to patient care areas will be sufficiently wide to allow access for stretchers surrounded by medical staff.
 - (xii) Pedestrian interest and comfort at entries will be provided through specifically designed seating, signage, lighting and features that signal the Facility's use.
 - (xiii) Provide wheelchair alcoves visible and accessible to the main entry vestibules. Provide easy access to wheelchairs/stretchers close to the entrance of the Facility.
 - (xiv) If the Facility has a large open entrance or atrium, the space must be acoustically treated to control excessive noise or sound reverberation that can prevent effective space communication, facilitate the spread of noise from the atrium to adjacent noise sensitive interior spaces and / or make spending time in the atrium uncomfortable. If this space is provided, views into adjacent patient rooms must also be protected.
 - (xv) Entryways and doors must be illuminated using light levels that are comfortable when entering and exiting.
- (B) Stairs
- (i) Locate exit stairs strategically for the convenience of staff moving between related clinical departments.
 - (ii) Locate exit stairs conveniently accessible from circulation routes.
 - (iii) Avoid stair locations that negatively impact future planning flexibility or constrain desirable views from patient care and staff work areas.
 - (iv) Provide day lighting and views from stairwells for orientation and amenity, and provide adequate lighting into stairwells for staff security at night.

- (v) Include convenience stairs located strategically to reduce dependence on elevator use.
- (vi) Provide metal convenience stairs to mezzanines in Equipment Maintenance.

(C) Corridors

- (i) Corridor widths will be a minimum of 2400 mm wide clear, except in office areas, where corridors will be a minimum of 1500 mm wide
- (ii) Corridors shall meet the requirements of CSA Z8000 and the NBC.
- (iii) All corridors shall be sized to accommodate the door widths required for each area.
- (iv) Provide convenient service access to the ceiling mechanical and electrical plenum above corridors. If ceiling tiles are used, provide the ceiling tile layout such that access to the plenum requiring a hoarded area in the corridor below will not reduce the clear corridor to less than half its original width.
- (v) Project Co will identify, for the approval of the Authority, alcoves for portable diagnostic imaging equipment, and install power and data outlets sufficient for such equipment. These alcoves would be in addition to the minimum 2400mm clear corridors.
- (vi) If a multi-storey atrium or lobby space is provided, views into adjacent patient rooms must be protected.

(D) Elevators

- (i) Elevator consultant is required for calculations and usage.

(c) Building Envelope

- (1) Project Co. will design the Facility with the following considerations for the building envelopes:
 - (A) Consult the GNWT Good Building Practice for Northern Facilities as recommended best practices.
 - (B) Utilize a building envelope professional (whose credentials as a building envelope professional are recognized by the Northwest Territories Association of Architects or the Association of Professional Engineers and Geoscientists of Northwest Territories) to advise on building envelope design and construction.
 - (C) Complete the design and construction so as to prevent the accumulation and stagnation of rain, snow, ice and dirt on the horizontal and vertical surfaces of the building envelopes appropriate for the climate the Facility is situated in.

- (D) Complete the design and construction so as to prevent both the ingress of exterior moisture and the trapping of condensation from infiltrating humid air within the envelope(s).
 - (E) Design exterior walls in accordance with the PERSIST (Pressure Equalized Rain Screen Insulated Structure Technique) as outlined in GNWT Good Building Practice for Northern Facilities as recommended best practices.
 - (F) Ensure that materials and systems of the wall and roof assemblies contribute to reducing heat gains and losses with minimal decline in performance over their expected lifespan.
 - (G) Ensure continuity of the air barrier; vapour barrier, thermal barrier and rain barrier across the entire envelope(s).
 - (H) Design building envelope details to avoid thermal bridging.
 - (I) Design building envelope details and select materials and systems with consideration of the existing envelope.
 - (J) Design building envelopes so that the inside of patient rooms exposed to noise from hospital related equipment, delivery / loading bays, emergency intake areas, and busy road traffic areas are exposed to noise levels less than 50 dBA from steady sources of noise such as HVAC equipment and transformers and to less than 60 dBA for noises associated with brief intermittent events (sirens, loading bay noise events).
- (d) Interior Walls and Partitions
- (1) Project Co. will design the Facility with the following considerations for the interior walls and partitions:
 - (A) Planning for acoustics shall follow the requirements of CSA Z8000.
 - (B) Use interior walls and partition systems that provide acoustic separations as required for the specific functions to be carried out in the spaces affected, and in accordance with the requirements of the Government of Alberta Infrastructure Technical Requirements for Healthcare Facilities "Blue Book" (2009), as modified by the Government of the Northwest Territories (August 11, 2011).
 - (C) Design and select interior walls and partitions, partition systems and interior finishes to comply with the following criteria as may be relevant for the particular or specific functions enclosed:
 - (i) cleaning, maintenance and infection prevention and control;
 - (ii) permanence and durability including impact resistance; and
 - (iii) low VOC emissions so as to minimize adverse impact on indoor air quality and indoor environmental quality.

- (D) Use a hospital application of a demountable partition system, manufacturer Teknion or similar, complying with the criteria in Section 5.4(d)(1) as required, as per Section 3.3 Collaborative Work Spaces in Appendix 3A [Clinical Specifications].
 - (E) Provide fittings, attachments and internal bracing/backup as required to accommodate and support wall mounted equipment.
 - (F) All interior partition walls to go from floor to underside of slab.
 - (G) In special areas such as Mental Health or Psychiatry Departments, construct the wall to suit the purposes unique to those areas in compliance with the CSA Z8000-11 requirements.
 - (H) Interior partition in airborne isolations rooms, ante rooms and pressurized rooms must be designed and constructed to meet the specific pressure requirements for such rooms. Refer to CSA Z8000-11.
- (e) Ceilings
- (1) Project Co. will design the Facility with the following considerations for the ceilings:
 - (A) Ceiling systems will comprise a major component of the acoustic or sound attenuation function as required in the spaces in which they are installed and will comply with the requirements of CSA Z8000 and Government of Alberta Infrastructure Technical Requirements for Healthcare Facilities “Blue Book”, as modified by the Government of the Northwest Territories (August 11, 2011).
 - (B) See Section 6.9(b)(6) for additional information.
 - (C) Ceiling height will not be less than 2700 mm above the finished floor in all areas.
 - (D) Ceiling heights will conform to the following:
 - (i) operating suites, x-ray rooms, and rooms with overhead patient gantry lifts (except inpatient rooms) to have a minimum ceiling heights listed in the CSA Z8000-11;
 - (ii) ceilings in rooms with equipment requiring specific clear heights will be based on specific equipment requirements; and
 - (iii) provide open ceilings in materiel management and facilities management with open work benches, machine shops, high utility shelving storage areas, and overhead hoists.
 - (E) For all areas in patient rooms requiring Safety Features, as outlined in Appendix 3A [Clinical Specifications], patient lift gantry and tracks will be surface mounted to ceiling.
 - (F) Suspended structure located for overhead equipment will be located above finished ceiling.

- (G) Infection Control for Ceilings:
 - (i) Ceilings in the Facility will comply with CSA Z8000-11: Canadian Health Care Facilities.
 - (ii) Ceilings in airborne isolation rooms and procedure rooms will be smooth, solid surface, non-perforated, and scrubable.
 - (iii) Penetrations must be properly sealed in airborne isolation rooms, procedure rooms and pressurized rooms to ensure the ceiling provides an effective air seal.
 - (iv) Ceilings in airborne isolations rooms, ante rooms and pressurized rooms must be designed and constructed to meet the specific pressure requirements for such rooms.
 - (v) In psychiatric secure rooms and psychiatric intensive care units, provide smooth, solid surface, non-perforated, scrubable, and high-impact resistant ceiling.
- (H) Virtual Skylight Ceiling Systems
 - (i) Provide virtual skylight ceiling systems in internal rooms that would provide a positive distraction for patients undergoing treatment; including “diagnostic imaging” patient imaging rooms for CT, Fluoroscopy, and Endoscopy, and treatment areas for Renal Care Units and Medical Day Care Units.
 - (ii) See Section 6.9(b)(4)(E) for additional information.
- (f) Floor Finishes
 - (1) Project Co. will design the Facility with the following considerations for the floor finishes:
 - (A) Project Co will provide flooring that is complementary and integral to the functional and aesthetic requirements of the interior space.
 - (B) Project Co will select floor finishes to suit types and concentration of pedestrian and/or vehicular/wheel traffic to be anticipated.
 - (C) Continuous cove base is required with all sheet flooring in all areas with the exception of carpeted offices, boardrooms, and conference rooms. Base height is minimum 150 mm.
 - (D) Project Co will design and select floor finishes complying with the following criteria:
 - (i) ergonomic comfort, cleaning, maintenance and infection prevention and control including the frequency and quality of joints and also including ease of replacement if and when required;
 - (ii) imperviousness to concentrations of moisture anticipated to be existing on the floors and for the duration of that moisture;

- (iii) permanence and durability and resistance to concentrated service traffic both pedestrian and vehicular;
 - (iv) low VOC emissions so as to minimize adverse impact on indoor air quality and indoor environmental quality; and
 - (v) compatibility of patterns and textures with the requirements for pedestrian safety and elderly friendly design.
- (E) Non-slip flooring will be used in all wet areas including: food service areas, central cleaning and sterilizing, wash and change rooms, bathing areas, patient washrooms, laundry, soiled utility and housekeeping rooms.
- (F) Patient shower floors will be slip resistant, slope to drain, and be flush-walk-in without ridges for water retention.
- (G) Infection Control for Floors:
- (i) Floors in patient care areas must be washable and able to withstand routine low level hospital disinfection
 - (ii) Penetrations must be properly sealed.
 - (iii) Floors in clinical areas must be seamless, have homogeneous heat welded seams, and integral bases.

5.5 Interior Environment

(a) Infection Control

(1) General

- (A) Design the Facility in compliance with all applicable infection control standards, including CSA Z8000.
- (B) Design the Facility to mitigate and prevent, where possible, the spread of infection including via contaminated surfaces and airborne pathogens.
- (C) Select appropriate materials and use simple detailing leading to quality workmanship and ease of accessibility for routine cleaning and maintenance.
- (D) Design the Facility to consider ease of infection prevention and control in future alterations, modifications and additions.

- (E) In addition to meeting the requirements of CSA Z317.2, design and construct the Facility to mitigate the spread of airborne infections during an outbreak by creating outbreak control zones as follows:
 - (i) design and construct a minimum of two adjacent inpatient units as a pandemic zone so that the mechanical ventilation systems will achieve negative pressure within the outbreak control zone relative to adjacent floor areas as described in Section 7.4 Heating, Ventilating and Air Conditioning (Division 23) of this Schedule.
- (2) Sinks and Hand Hygiene Stations
 - (A) Design the Facility in compliance with all applicable infection control standards, including CSA Z8000.
 - (B) Prepare a workflow pattern and risk assessment in collaboration with the Authority to address placement of handwash sinks and alcohol-based hand rub dispensers.
 - (C) Provide specialized scrub sinks in the following rooms or areas:
 - (i) the surgical suite, procedure rooms and all areas where invasive sterile procedures occur; and
 - (ii) other rooms or areas as indicated in the Clinical Specifications.
 - (D) Provide hand hygiene stations:
 - (i) at all entrances to the Facility so that visitors stop, take notice, and access them (stations will have at least four antiseptic hand rub dispensers mounted for convenient access for visitors); and
 - (ii) other rooms or areas as indicated in the Clinical Specifications.
- (3) Equipment & Storage
 - (A) Provide storage shelves that are:
 - (i) cleanable with Authority approved detergents and disinfectants;
 - (ii) not located under sinks;
 - (iii) minimum 200 mm above the floor to permit routine cleaning; and
 - (iv) 18-20" from ceiling to ensure adequate functioning of fire sprinklers, or provide bulkhead.
 - (B) If open shelving is provided for storage, the bottom shelf of such shelving will be a solid surface to prevent contamination from the floor.
- (4) See Section 5.4(e)(1)(G) for infection control for ceilings.
- (5) See Section 5.4(f)(1)(G) for infection control for floors.

- (6) Psychiatric Areas
 - (A) Design the Psychiatric Intensive Care Unit, Psychiatric Inpatient Unit and Emergency Seclusion Rooms to the requirements of CSA Z800 and all other applicable codes, standards, and legislation.
 - (B) Design all mental health units to have a non-institutional feel and the ability to put a unit in lock-down mode as necessary.
- (7) Pharmacy Areas
 - (A) Design the Pharmacy Areas in accordance with the requirements of USP 797 Guidebooks to Pharmaceutical Compounding – Sterile Preparations and the Canadian Society of Hospital Pharmacists Guidelines for the preparation of sterile products in pharmacies.
 - (B) Refer to the Equipment List for the requirements of the BioSafety Cabinet, Laminar Flow Hoods and other equipment in the Pharmacy Department.
- (b) Ergonomic Design
 - (1) Project Co will provide:
 - (A) detailed Design features, which expressly facilitate the physical activities of the staff and patients to increase their safety, efficiency and general well-being, and assist in eliminating ergonomic risk factors;
 - (B) for all inpatient care rooms (including washrooms) to accommodate lifting and transfer devices;
 - (C) ergonomic Design, consistent with good industry practice, of all work spaces including millwork, furniture, lighting, and finishes to eliminate strain and injury to health care workers; and
 - (D) adjustable work surfaces and shelves to allow for flexibility of use in nursing stations.
- (c) Colour
 - (1) Project Co will:
 - (A) provide departmental color palettes appropriate for the emotional and psychological needs of patients;
 - (B) provide natural color palettes that contribute to the creation of a healing environment;
 - (C) provide distribution of ambient full-spectral color within typical staff and patient environments; and
 - (D) avoid glare-creating finishes.

(d) Art Works

- (1) The Authority intends to procure various art works for display within the Facility. The Design will allow for the display of art work as follows:
 - (A) within Facility interior to allow wall surfaces for art display;
 - (B) in the exterior allow for sculpture to be placed at grade;
 - (C) from the public ceiling where ceiling heights are generous
 - (D) allow for the development of local community art projects to be included as part of Project Design; and
 - (E) provide specific corridors and display spaces for art for approval by the Authority.
- (2) Project Co will:
 - (A) design the Facility to support the Authority's art program by providing and identifying for the Authority effective and appropriate locations for major and minor art works throughout the Facility;
 - (B) coordinate the procurement and delivery (including timing of delivery), of art works with the Authority and install all art works procured by the Authority;
 - (C) provide lighting to enhance the display of all art works;
 - (D) provide all necessary structural support, seismic restraint, vandal-proof mounting and other protective measures required for particular art works; and
 - (E) consider the development of major public pathways with gallery alcoves having display systems that can accommodate specific maximum sizing. Making specific alcoves that fully enclose/protect artwork prevents vandalism while maintaining infection control & ease of cleaning.

(e) Wayfinding

- (1) Project Co will:
 - (A) provide a simple configuration of the Facility circulation systems and functions so that wayfinding is inherently easy;
 - (B) locate major destinations, such as department entrances, directly off of entry spaces and/or along primary circulation paths for easy access, make waiting areas as open as possible to circulation routes without requiring wayfinders to pass through waiting areas;
 - (C) provide significant recognizable, easily named and identified elements in key and easily found locations that can become 'meeting points' for patients and visitors;

- (D) design public elevator and stair lobbies and public circulation routes to be distinct from service routes and other non-public routes; and
 - (E) orient all building plan directories to reflect the direction from which they are viewed.
- (2) Project Co will provide all signage required for the Facility in accordance with the following:
- (A) design signage in consultation with the Authority such that the materials, colours, letter fonts, sizes and other aesthetic and functional considerations, such as Braille, conform to the overall wayfinding design system and are coordinated and consistent with those used for the STHA Patient Care Centre. Refer to Appendix 3B [Wayfinding Guidelines];
 - (B) materials for signs include aluminum, acrylic, vinyl, or stainless steel;
 - (C) provide a hierarchy of signage that identifies the range of use of the official languages (and syllabics) that are included in the regions which STHA services. Refer to Appendix 3B [Wayfinding Guidelines];
 - (D) signage will be highly visible (day and night), clear, concise, and well-differentiated from surrounding information, notices, advertising, etc.;
 - (E) signage will be resistant to graffiti and physical damage;
 - (F) use international symbols where and as applicable;
 - (G) provide signage that directs visitors to all patient destinations and all other departments and rooms within. Prioritize patient destinations over non-patient destinations;
 - (H) signage will incorporate art imagery, such as local scenery, to designate different departments and patient rooms;
 - (I) orient all important signs, including all patient destination signs, to be perpendicular to the line of patient travel on approach; and
 - (J) avoid multi-layered naming hierarchies and complex numbering systems.
- (3) Project Co will provide the following interior signage at the Facility:
- (A) building directories at all entrances, major corridor junctions and at elevator lobbies. They will include a plan of the Lands highlighting the Facility as well as floor level listings of departments;
 - (B) digital interactive kiosk signage system in lobby of the Facility;
 - (C) elevator signage and audio;
 - (D) elevator floor directories at all elevator lobbies. They will include floor level listing of departments;

- (E) room signage for all rooms. Room signage is to be of several types distinguishing room functions. Administrative space signage requires a pocket to insert specific information such as name of occupant. Room signage for utility rooms will be designed to be less evident than general room signage. Blade signs may be used to identify vending areas and waiting areas;
 - (F) door tags for all door frames;
 - (G) patient room signage and patient care department directories;
 - (H) overhead directional signage, which must either be suspended from a ceiling or bulkhead or be mounted directly over doors. No directional signage will be incorporated into flooring; and
 - (I) feature signs and information panels at various locations throughout the hospital (for example, signs to locate information desk).
- (4) Design internal directional signs to include:
- (A) a main directory, installed at or near the main public entrance to the Facility that indicates the Facility in relation to the overall Lands and the location of every area and department within the Facility that is accessible to the public;
 - (B) a continuous 'trail' of signage from the entrances to each of the reception/information points listed on the directories;
 - (C) installation of signage at each point at which a directional decision is required;
 - (D) consistent terminology;
 - (E) door signage to identify every space (e.g. rooms, alcoves, corridors and stairwells) in the Facility. Door signage will:
 - (i) be developed in consultation with the Authority;
 - (ii) be located in a consistent location for every space in the Facility;
 - (iii) indicate restrictions on entry and warn of hazards, including "Laser In Use" and "Radiology In Use" signage; and
 - (iv) not be obscured by the emergency systems and code blue system call.
- (5) Provide a room numbering system that is consistent with the following protocol:
- (A) rooms are numbered in a manner that reflects normal movement through the Facility;
 - (B) labelling anticipates a person attempting to follow numbering along corridors in sequence;

- (C) blocks of numbers are periodically skipped to allow for future expansion of the numbering system if rooms are added through renovations;
 - (D) each room and space requires a unique number for service reasons. It is important that room numbers be determined early in Design and maintained following occupancy. Follow the same numbering system on Design and Construction documentation for all disciplines (architectural, mechanical, electrical, etc.);
 - (E) in addition to each room, any space such as a patient cubicle, alcove, or recess of significant size must be numbered as a room. This identifies spaces for labelling of fire alarm, electrical, and data outlets and for ongoing maintenance purposes;
 - (F) the building(s) identification letters are followed by three or four digits, beginning with the first digit: 0 for basement rooms, 1 for ground floor, 2 for second floor, etc. on up the building floors. Four digits may be required in a large building due to the number of rooms on the floor, and if this is the case, the four digits will extend to all floors;
 - (G) if a room is only accessed from within another room, for example a large closet, the closet room number will be the room number in which it is located followed by a small letter a, b, c, etc. depending on the number of additional rooms that exist within the room;
 - (H) stair numbering will follow the sequence: building name first, then 1, 2, 3, 4 depending on the number of stairs (for example STHA1, STHA2, and STHA3);
 - (I) corridor numbering will follow the sequence: building name first, then two numbers. The first number identifies the floor, the second number identifies the corridor. For example, STHA 02, STHA 12, STHA 22, and STHA 32; and
 - (J) elevators will follow the sequence: Elevator 1, Elevator 2, and Elevator 3.
- (6) Donor Walls
- (A) Project Co will provide a space located in proximity to the main visitor entrance(s) of the Facility where the Authority may construct a feature to recognize donors, and other supporters of the Facility.
 - (B) Donor wall signage must be incorporated in the Facility lobby. The design will allow for changes to donors and additional donors to be added in an economical and convenient way.
- (7) See Section 4.2(e) for site wayfinding and exterior signage.

5.6 Commercial Opportunity

- (a) Project Co. may consider the provision of a commercial opportunity:
 - (1) At a convenient location by the main public entry area, to optimize staff and public access.

- (2) With services that are appropriate for a typical commercial retail food opportunity space of the size specified, including electrical and power, natural gas, low voltage communications, fire alarm, paging, phone, hot and cold water, sanitary drainage and grease trap and mechanical HVAC for the fit out to conveniently connect.
- (3) Provide for separate metering of electrical, natural gas and hot and cold water services.
- (4) Provide for appropriately sized ventilation, make-up air and exhausting that will include exhaust hoods for two deep style fryers for convenient venting from this commercial space to the roof.
- (5) Any commercial space provided must compliment healthcare objectives.

5.7 Structural Design

(a) Overview

- (1) The fundamental principle for the Facility is that the new Construction, including new parking structures, and any portion thereof be designed and constructed to sustain all live, dead, seismic and wind loads and other environmental effects in accordance with the accepted engineering practices and standards as prescribed in this Schedule.
- (b) Design the Facility, including all renovations, additions, expansions and standalone building(s), in accordance with the structural design standards set out below:
 - (1) Building structures will comply with the latest requirements of:
 - (A) the NBC with modifications and additions;
 - (B) the Alberta Infrastructure Technical Design Requirements for Health Care Facilities (The Blue Book), with GNWT modifications;
 - (C) the Good Building Practices for Northern Facilities Third Edition; and
 - (D) the Canadian Standards Association Z8000 and Z317.
 - (2) Reference the following to note the existing conditions:
 - (A) the Stanton Yellowknife Health Care structural drawings dated April 1985 created by Duthie, Newby, Weber and Associates Ltd. and all drawings noting renovations; and
 - (B) the Geotechnical Report provided by the Authority.

- (3) The Facility, new Construction, parking structures, and any portion thereof will conform to the requirements for the importance categories specified below. Project Co is to ensure that the post disaster requirements as per the NBC are met.

Table 1: Required Importance Category

Importance Category	Structure
Post Disaster	All new structures, including but not limited to:
	New Construction and Renovation (integral to the Facility, see Section 5.7(b)(3)(D))
	Support Services Building
	Parkade (integral to the Facility)
Normal	Existing Hospital (per the original design documents, see Section 5.7(b)(2)(A))
	Parkade (stand-alone)

- (A) Design requirements and design loads must be evaluated relative to the expected function of the specific structural element(s). Design requirements and loads contained in the NBC, as per the original design, and in this Schedule 3, will be increased where to required, to suit any specialized conditions.
- (B) Ensure all modifications to the existing structure, if any, do not compromise and that the impact to the existing structure is minimal. All applicable structural elements to be designed to the NBC with modifications and additions.
- (C) The structural systems and lateral stability of the Existing Hospital should not be compromised due to renovations, additions, or expansions, if any.
- (D) Any structural modifications to the original structure, if any, must conform to Post-Disaster Importance Category as required by the authority having jurisdiction and the Authority.
- (4) Ensure structure can support fall arrest and window washing equipment as required by the Authority.
- (c) Sustainable Design, Constructability, Life Cycle and Durability Design Principles
- (1) The Facility will meet or exceed the requirements of CSA S478 “Guideline on Durability of Buildings” for a Long Life Category Design Service Life (50 to 99 Years). This includes all primary structure and all secondary structure supporting cladding systems.

- (2) Design of the Facility structure and structural components to minimize effects of corrosion and deterioration due to environmental and use in accordance with the following:
 - (A) provide adequate concrete crack control joints, expansion/contraction joints and caulk exposed joints;
 - (B) provide concrete mixes proportioned to CSA A23-1/A23-2 durability requirements for exposure class;
 - (C) reinforce concrete for crack control and repair exposed cracks;
 - (D) chamfer corners of exposed concrete where possible;
 - (E) hot dip galvanize exterior exposed steel;
 - (F) provide embedded steel protection angles and skid plates for loading docks and garbage compactors and other corrosive environments;
 - (G) ensure existing structural elements do not show signs of deterioration or corrosion and repair as required and
 - (H) seal and/or use pressure treated wood products when in direct contact with concrete, masonry, exposed conditions.
 - (3) Where reasonably practicable and subject always to Section 5.7(c)(4) below, use locally sourced, sustainably harvested, and high recycled content materials.
 - (4) Ensure Design can be constructed in a cost effective manner in a remote and Northern environment.
 - (5) During preparation of the Lands and Construction, Project Co's structural engineer shall provide site reviews and oversee appropriate testing (by Project Co) to confirm that the general intent of the foundation, site preparation, and structural design are in general conformance with the contract documents.
- (d) Flexibility for Future Change Design Principles
- (1) Design the Facility to readily accommodate renovations for changes in occupant use, technology, equipment, medical techniques, communication and building services.
 - (2) Design the superstructure using a framing system that results in a minimum total thickness of floor or roof structure for the particular column/wall grid and provides maximum ceiling space flexibility for the placement of mechanical, electrical and medical services.
 - (3) If a multi-storey building addition is to be built, the new floor elevations should match the existing structure floor elevations and the thickness of the floor should allow for minimal disruption to mechanical and electrical systems. Any difference in elevation at the floors should have minimal impact on the structure and provide a smooth transition in staff, patient and public spaces.
 - (4) Place the lateral-load resisting elements in areas which are least likely to interfere with future program changes.

- (5) Accommodate the need for future access, and installation and removal of equipment.
 - (6) Design new slabs and walls to accommodate coring requirements due to future program changes, especially adjacent to the columns.
 - (7) Design new slab openings to accommodate future infills.
 - (8) Ensure structural provisions are included for the future MRI including, but not limited to, the design load and limitations for ferrous / non-ferrous materials, within the future MRI location and along expected entry route for installation of the future MRI as required. The expected route for future installation shall be defined on the floor plans.
 - (9) Gerber systems shall not be used for floors and roofs.
 - (10) Joists shall not be used for floors but are acceptable for use in roofs.
- (e) Building Type for New Construction
- (1) Structural building materials may either be combustible or non-combustible provided the applicable fire codes are met.
 - (2) Ensure column-free spaces are accommodated as required.
- (f) Substructure
- (1) All permanent structures will be founded on frost protected foundations
 - (2) The substructure must be designed to support vertical and horizontal loads imposed by the superstructure above, to conform to the recommendations stated in the Geotechnical Report and to meet the serviceability and strength requirements in the NBC.
 - (3) Foundations must be designed to limit settlement of the structure and differential settlement between components of the structure to within acceptable structural design limitations, but not exceed those specified in the Geotechnical Report.
 - (4) During Construction and while in use, the existing foundations must be protected against damage.
 - (5) Substructure design to conform to the Geotechnical Report provided by the Authority.
- (g) Coordination
- (1) The Existing Hospital, new Construction, parking structures and modifications to the Existing Hospital and any portion thereof must be coordinated with the architectural finishes to have adequate thickness, cover and reinforcing to satisfy the fire protection and durability requirements.
 - (2) All structural members must be coordinated with other disciplines to avoid utility interferences and to ensure adequate architectural headroom and clearances.

- (3) Coordinate structure with equipment and cast-in hardware. Provide adequate depth of slab depressions to avoid the need for ramps.

(h) Design Loads

- (1) Design new building(s) for the actual live loads anticipated and comply with the minimum live load requirements of the NBC or the minimum live loads listed below, whichever is greater:

Table 2: Minimum Specified Design Loads for New Construction

Use	Minimum Uniformly Distributed Load	Minimum Concentrated Load
Main Floor Live Load	4.8 kPa	9 kN
Above Main Floor Live Load	3.6 kPa	9 kN
Mechanical Room Live Load	7.2 kPa	9 kN
X-Ray Record Storage (if relocated)	14.0 kPa	9 kN
Health Records	7.2 kPa	~
Bariatric Patient Lifts	~	6 kN
Uplift on Roof Structure Due to Wind	1.0 kPa	~

- (2) Project Co is to ensure Existing Hospital loads are maintained. Refer to Existing Hospital structural drawings.
- (3) Design the structure for the anticipated concentrated loads (point loads) from equipment, fixtures, and machinery, whether floor, wall or ceiling-mounted.
- (4) Design the Facility for the actual superimposed dead loads and to comply with the minimum superimposed dead load requirements in the NBC.
- (5) Design roofs for the minimum snow, rain and wind loads required by the NBC, IPCC, and local building by-laws. Notwithstanding other requirements, the minimum live load for the design of roofs is to be 1.0 kPa in addition to uniformly superimposed dead load and concentrated loads due to machinery, equipment and features.
- (6) Modify existing structure accordingly if additional loads are imposed on it due to new Construction (i.e.: snow drift, etc.).

(i) Deflection Limitations

- (1) Design the structure to minimize the effects of deflection and long-term creep and shrinkage.

- (2) Design the structure to meet the maximum deflection requirements (as described in the CSA S16.1 "Limit State Design of Steel Structures" and CSA A23.3 "Design of Concrete Structures").
 - (3) In addition to the above design deflection limits, the structure must conform to specific deflection requirements for specialty equipment, as recommended by the supplier or manufacturer and the Authority.
 - (4) Notwithstanding the above deflection limits, the deformations of the structure under service loads must be compatible with the architectural finishes and cladding systems.
 - (5) Design the structure to conform to deflection and storey drift limitations noted in the NBC.
 - (6) Provide adequate deflection tracks for non-load bearing walls and other non-structural elements.
- (j) Vibration Limitations
- (1) Design the structural system to minimize the effects of floor vibration due to use, occupancy, and equipment. Vibration will be limited to acceptable levels for the use and occupancy of the floors.
 - (2) Floor system vibration characteristics will comply with Commentary D of the User's Guide – NBC.
 - (3) Floor structural system will be selected and designed to have a vibration acceleration maximum limit of 0.5%g with a damping ratio of 0.02 when and excitation force of 0.29 kN is applied.
 - (4) Machinery that could be a source of vibration will be mounted using vibration isolation techniques.
 - (5) Consult with the Authority about the locations of sensitive program space, equipment, and design the structure to support the equipment per the equipment specifications.
 - (A) In areas supporting sensitive equipment and occupancies, design the structure for the vibration limitations specified by the manufacturer of the specified equipment or required by the planned use and occupancy of the floor space and in-situ measurement verification of floor vibration characteristics is to be carried out where specified by the equipment manufacturer.

- (B) To verify compliance with the vibration requirements, an independent testing firm may be retained by the Authority. The testing firm will measure the vibration using instrumentation which may include transducers, accelerometers, signal-conditioning equipment, data recorders, and analysis systems. Measured vibration performance characteristics for the structure must meet the requirements set out in these specifications. The following table indicates acceptable vibration levels for various typical medical and non-medical Facility spaces:

Table 3: Acceptable Vibration Levels

Occupancy or Equipment Requirements	Vibrational Velocity (1)		Floor Stiffness KFn (2)
	µin/s	µm/s	Kips/in-sec
Mechanical rooms on an unoccupied floor above or below an occupied floor	4000	100	Not Applicable
Office areas, waiting rooms and corridors	8000	200	250-1500
Mechanical rooms on the same floor as an occupied area	1200	30	Not Applicable
Computer areas; patient care areas (daytime) – threshold of human perception	8000	200	500-3000
Operating rooms and critical work areas; bench microscopes up to 100x magnification	4000	100	1000-6000
Bench microscopes up to 400x magnification, optical and other precision balances; optical comparators	2000	50	2000-12000
Microsurgery, eye surgery; bench microscopes at magnification greater than 400x; optical equipment on isolation tables	1000	25	4000-25000
Magnetic resonance imagers	500	12	8000-50000
Mass spectrometers	250	6	16000-100000

(1) Value of constant velocity regions measured in one-third octave bands of frequency range 8 to 100 Hz. Based on ASHRAE, AISC and ISO Criteria.

(2) KFn depends on walker weight and gait. Ranges indicated reflect average to conservative designs. Average walker (150lbs, 75 steps/min). Conservative walker (185lbs, 100 steps/min).

- (k) Exposed Finished Concrete
 - (1) Prior to Construction, identify the various surfaces intended to have exposed concrete and clarify the proposed finish for each in the relevant Submittal.
- (l) Medical Equipment Supports
 - (1) Design and provide for support/anchorage of all supplied equipment and patient lifts. Medical equipment and patient lifts to be supported, anchored, and braced to resist gravity, operational, and seismic loads in a manner appropriate for the functional and service requirements for the specific equipment.
 - (2) Performance Criteria
 - (A) Where practical, design the supports for ceiling-mounted equipment, such as radiology gantries, to be universal so that the supports may be used for various types of equipment.
 - (B) Drilled insert-type anchors for medical equipment supports and anchorage are to be rated by the insert manufacturer for seismic and cyclic loading applications.
- (m) Parking Structures
 - (1) Project Co is to ensure parking structures conforms to CSA S413-07 "Parking Structures".
 - (2) All parking decks to be protected by a membrane meeting the requirements of CSA S413-07.
 - (3) Project Co is to provide quality control procedures conforming to applicable codes and standards.
 - (4) Project Co is to undertake all maintenance procedures outlined in applicable codes and standards.
 - (5) Project Co is to provide documentation confirming that all responsibilities given in the applicable codes and standards have been met.
 - (6) The structural design will take into consideration all issues presented in the applicable codes and standards.

5.8 Mechanical Systems Design

- (a) General - Project Co will provide mechanical systems that:
 - (1) are designed to all applicable codes and standards as listed in Section 2.1 Standards of this Schedule;
 - (2) are designed to provide a sustainable, energy efficient, healing, comfortable and productive environment for the Facility Users and meet the required environmental conditions for all equipment;

- (3) are located and designed to meet the requirements set out in the Alberta Blue Book (with GNWT revisions) from outdoor spaces / places of respite intended for staff / patient use; and from adjacent properties surrounding the Existing Hospital Lands;
- (4) minimize impact on the natural and physical environment, through energy efficiency, optimization of resource use, and simplification of the systems;
- (5) are configured and located in such a way to minimize disruption to clinical areas to perform maintenance and repairs;
- (6) are developed to provide reliability of continual operation. Adequate standby capacity and redundancy will be included in system design;
- (7) are vibration isolated to minimize noise and vibration through the structure or other components of the Facility;
- (8) incorporate flexibility and adaptability for future expansion without major disruption or alteration to the Facility operations or infrastructure. All systems will be designed and sized to suit the consumption and discharge needs of the Facility at peak operational requirements (including all retail occupancies filled), plus:
 - (A) the ability to increase the flow or capacity as follows:
 - (i) main distribution piping (domestic hot, cold and recirculation; sanitary; medical gases; hot water supply and return; chilled water/glycol supply and return) and ducting (supply, return and exhaust);
 - (ii) piping and ducting (mechanical rooms, shafts and corridors) serving Type I areas will accommodate an increase of at least 30% for future demand. Refer to CSA Z317.2 (Table 1) for area classifications; and
 - (iii) piping and ducting systems in main service lines (mechanical rooms, shafts and corridors) serving all areas not listed above will accommodate an increase of at least 10% for future demand.
 - (B) branch piping and ducting will be sized to meet the requirements of current demand except for piping/ducting expected to serve future MRI installation as per Section 4.1(c);
 - (C) air handling equipment, exhaust fans, and pumps will be sized for 10% additional capacity;
 - (D) designing the mechanical plant to allow for expansions of the heating plant, chilled water plant, and associated plumbing, piping, and equipment, for convenient expansion of the Facility per Section 4.1(c);

- (E) the design of piping, ductwork, heating/cooling coils, and air filters will meet the following minimum parameters:
 - (i) pipes will be sized within the ASHRAE Fundamentals (latest edition) upper and lower limits for fluid velocities and pressure drop;
 - (ii) hydronic velocity – maximum velocity based on pipe manufacturer’s recommendations;
 - (iii) supply and return ductwork will be sized within the ASHRAE Fundamentals (latest edition) upper and lower limits for duct air velocities and pressure drop. Duct velocity will be limited to achieve and acoustical design criteria of RC (N) 35 while not exceeding 15m/s;
 - (iv) heating/cooling coil face velocity – maximum velocity 2.5 m/s; and
 - (v) air filter face velocity – maximum velocity 2.5 m/s.
- (9) are as similar as possible between the Facility and the Support Services Building;
- (10) such that steam, water, glycol and other fluids used within mechanical systems are treated to prevent corrosion, algae growth, build-up of deposits, disease, bacteria and will prolong the equipment life.
- (b) All mechanical services installed within electrical, communication and UPS rooms will maintain a minimum clear height of 2000 mm above finished floor. Do not install any equipment requiring a water connection in the ceiling of these spaces. Do not route plumbing or hydronic distribution piping in the ceiling of these spaces. Avoid running plumbing drain pipes in the ceilings of these spaces wherever possible, and provide drain pans under all drainage piping that is located in the ceiling space.
- (c) Pipes, ducts and fittings will be insulated to conserve energy, prevent condensation, attenuate noise and prevent accidental burns.
- (d) Coordinate with the electrical specification for all mechanical systems that must maintain operation during an expected or unexpected shut down of the Facility electrical service. Where mechanical equipment and devices are required to be served by emergency power, provide UPS, vital, delayed vital, or conditional power as per standards in Section 7.6(e) Emergency Power.
- (e) Coordinate all mechanical systems with requirements of all equipment, whether supplied by Project Co or the Authority and provide all connections required from mechanical systems. Make allowances within the mechanical systems’ designs so all equipment can be removed or replaced without disrupting the operation of other equipment connected to the mechanical systems.
- (f) For all spaces designated for tenants, design all mechanical systems so the work required to modify the systems for the tenant fit-out will not affect the operation of the main Facility systems. See Section 5.6 Commercial Opportunity.

(g) Post-Disaster Design

- (1) Design all mechanical piping, equipment, and systems seismically in accordance with the requirements for NBC post disaster buildings, except that systems serving a standalone Support Services Building need only meet NBC seismic standards as a minimum requirement. This facility is to be designated as Class A-2 HCF as per CSA Z317.02
- (2) The following is a list of additional requirements that Project Co will comply with beyond the NBC minimum:
 - (A) The heating plants for the Facility will have two sources of energy each designed for post disaster, as defined by CSA Z317.2. If fuel is stored on site, the tank will be designed to operate for a minimum of 72 hours.
 - (B) The fuel storage system will also have sufficient capacity to supply fuel oil to the emergency generators (per Section 7.6 Electrical (Division 26)) for a minimum period of 72 hours. If the heating plant and generators use the same fuel, the generators must have separate tanks per applicable regulations, including CSA Z32. The generator tanks may receive makeup from a common main storage tank.
 - (C) Each fuel storage system will be complete with a fuel polishing system to ensure the stored fuel remains clean and available for its intended use at any time. Propane vaporizers must be provided on all exterior propane storage tanks.
 - (D) Boilers and pumping equipment will have sufficient redundancy to ensure the Facility continues to be operational after an event.
 - (E) Refer to Section 7.4(d)(1)(K) regarding heating, ventilation and air conditioning systems.
 - (F) Provide connections on the exterior face of the Facility as follows:
 - (i) a water inlet connection on the exterior of the Facility to allow for supply of water from a tanker truck. This water would serve the Facility's domestic needs as well as all utility water requirements. This includes all process loads and make-up water for heating and cooling systems. This excludes landscaping irrigation systems;
 - (ii) a separate holding tank for hazardous materials with separate connections for receiving hazardous materials from the decontamination shower in the Emergency Department. Design drain line so that sewage fumes do not discharge to outdoors when not connected.
 - (iii) inlet connections for fire water system as required;
 - (iv) provide heating and cooling water connection points at the exterior of the Facility for future connection to emergency backup systems (i.e. portable boilers or chillers). Configure the system to properly utilize this equipment with no modifications;

- (v) except as otherwise set out in this Section 5.8(g), all connections will be secure terminations (valved, capped and locked) to protect from tampering and vandalism; and
 - (vi) all connections will be located in service areas away from general circulation routes, and where they can be readily accessible by service vehicles.
- (h) The “shelled space” identified in the program, and any additional **“Unallocated/Unassigned Space”** associated with the Project Co Design, is to be fitted with temporary mechanical systems to meet building code requirements including, but not limited to, sprinklers, fire extinguishers and temporary heaters. Provide base building mechanical services appropriate for future fit out as prioritized expansion to renal/dialysis, ambulatory care, and obstetrics. Provide appropriate capacity into air handling units, heating systems, cooling systems, medical gases, etc.

5.9 Electrical Systems Design

- (a) Project Co will comply with the following design principles for electrical, communications and security systems.
- (1) All electrical systems, materials and equipment will be of a type and quality intended for use in a health care facility. Configure electrical systems to meet requirements of the identified program and patient care needs in an efficient manner, with optimal utilization of space, staff and equipment resources.
 - (2) Provide electrical systems that: allow the Authority to deliver the program described in the Clinical Specifications; and provide redundancy, protection, continuity of service, serviceability of equipment; and a comfortable and safe working environment for patients, visitors, and staff.
 - (3) Implement the latest proven technologies in the design of the electrical systems and equipment.
 - (4) Integrate systems where Integration provides efficiency, operational and cost advantage.
 - (5) All electrical, communication, security, medical and life safety systems will be fully compatible with existing Authority regional based systems. Provide all Infrastructure, Interfaces, modifications, programming, testing and commissioning to local and off-site systems to ensure that there is seamless Integration with remote facilities.
 - (6) Coordinate the design of network architectures and communication, security, clinical and building systems functionality with the Authority’s representatives. Obtain approval from the Authority prior to implementation.
 - (7) All head-end/Server equipment and applications will reside on the Authority’s network equipment which resides in the Main Communications Room (MCR) or Existing Data Centre, or as directed by the Authority. Workstations will be located as required for system operator use.

- (8) Incorporate into the Design and Construction the principle that change will be a constant and inevitable fact within the Facility. Completed electrical systems will permit change while minimizing the cost of change and the amount of interruption to the regular Facility activities.
 - (9) Utilize a combination of natural light, luminaries and controls to optimize daylight.
 - (10) Provide lighting schemes that support staff activities and provide enhance safety for staff, patients and visitors.
 - (11) Design lighting with the objective of creating a comfortable working environment and an environment conducive to healing and recovery.
 - (12) Include systems and equipment coordinated to provide synergy and reliable electrical performance for the various Facility functions.
- (b) Provide devices and systems to minimize the noise and vibrations of electrical equipment / components (transformers, luminaries, cables etc.) to below an acceptable level as required in a health care facility.
- (1) Locate electrical rooms and power distribution equipment in order to minimize the distances for feeder runs, to provide easy access for equipment moves and to avoid interference with other services and equipment. Where electrical equipment is located below grade, provide adequate protection against the risk of flooding.
 - (2) Install electrical systems and equipment in a fixed and permanent manner, seismically restrained to meet post-disaster building standards in accordance with the latest version of the NBC.
 - (3) Locate electrical equipment and feeder routes to minimize the risk to service continuity resulting from fire, flood, adverse weather, seismic events, Construction activities and vandalism.
 - (4) Incorporate energy management systems to minimize demand pressures on the building systems and minimize the anticipated increase to energy costs.
 - (5) Project Co will:
 - (A) design a completely new electrical service for the complex. Most of the existing electrical service equipment will be replaced with new distribution panelboards which will be fed from the new service. The existing utility transformer shall be removed after the transition to the new service is complete;
 - (B) design and construct the entire electrical system with adequate spare capacity to accommodate an increase in electrical demand by 25%. Size the emergency power generators, main normal power transformers, feeders and 600V and 208V switchgear accordingly;

- (C) provide adequate spare physical space in the main electrical room and configure the equipment provided to facilitate all electrical equipment in the main electrical room to be easily expanded by an additional 25% without replacement, relocation or major shutdown of the existing equipment. A major shutdown is defined as a switchboard or transfer switch power outage extending beyond 4 hours, or a main transformer outage exceeding 12 hours;
 - (D) provide 25% spare capacity for switchgear and panelboards by means of spare adjustable trip circuit breakers. Exact sizing of these spare circuit breakers will be confirmed by the Authority during design;
 - (E) provide spare capacity for a future MRI in addition to the 25% spare capacity; and
 - (F) Not used.
- (6) Provide adequate physical space to facilitate the installation of new feeders which will utilize the spare electrical capacity.
 - (A) Installation of new feeders will have minimal impact on the Facility.
 - (7) Plan installation of equipment to facilitate easy access to equipment which may require inspection or maintenance.
 - (8) Provide a complete essential electrical system which meets or exceeds the requirements of CSA Z32-09 and CSA C282-09.
 - (9) Provide electrical distribution schemes which are sized and configured to achieve service continuity in the event of equipment failure. Failure of any electrical equipment or feeder will not impair Facility operation or leave any patient treatment room or area of the Facility without at least one active light and one active receptacle.
 - (10) Install electrical systems and equipment in a fixed and permanent manner, seismically restrained to meet post-disaster building standards in accordance with the latest version of the NBC.
 - (11) Size and configure equipment to permit routine testing and servicing of power generation and distribution equipment with minimal loss of service continuity. All automatic transfer switches shall have closed transitions.
 - (12) Coordinate the electrical and systems design with other disciplines to support the service continuity and redundancy requirements for mechanical and building systems.
 - (13) Design and construct all systems with protection, grounding, isolation and control to address the functional requirements where they are located.
 - (14) Power throughout the Facility will comprise of a combination of 347/600V and 120/208V for all power, lighting and equipment loads.

- (15) Provide capacity in distribution equipment to serve any **“Unallocated/Unassigned Space”** or “shelled space” in the Facility. Allow 40watts/sq.m for lights and receptacles in these spaces with 50% of load on emergency power. Indicate on floor plans all assumed locations of future Vital and Conditional 120/208 volt panelboards that will serve these spaces. Indicate future panelboards such that no point in these spaces is more than 15 metres away to a Vital panelboard. Provide electrical services with sufficient panelboard and breaker capacity to serve these spaces. Indicate on drawings all provisions allowed for these spaces, including the transformers from which panels will be fed. Fire alarm system and egress lighting shall be installed in these spaces, along with one non-incandescent general lighting fixture equivalent to two T8 fluorescent lamps and one general purpose convenience receptacle for every 36 square meters of floor space or fraction thereof.

5.10 Food Services

- (a) Project Co will design and construct the Facility, including with sufficient space, equipment and infrastructure, to accommodate the food services described in the Clinical Specifications and in compliance with Appendix 2D [Equipment and Furniture] and the Equipment List.

6. FACILITY CONSTRUCTION SUBGROUP SPECIFICATIONS

6.1 NOT USED (Procurement and Contracting Requirements Division 00 & General Requirements Division 01 not part of Facility Construction Subgroup)

6.2 Existing Conditions (Division 02)

- (a) Refer to Schedule 2 [Design and Construction Protocols] regarding available site reports. An “Environmental Site Assessment (ESA) Phase 1” and a “Hazardous Materials Report” of the Existing Hospital and Existing Hospital Lands have been completed and the respective reports are available to Project Co. Project Co is responsible for all Hazardous Substances in, on or below the Existing Hospital Lands that were disclosed in or reasonably inferable from Disclosed Data disclosed prior to the Financial Submission Date. Project Co must address any such Hazardous Substances in accordance with all applicable Laws.
- (b) Refer to Schedule 2 [Design and Construction Protocols] regarding responsibilities and procedures for decommissioning of medical equipment (by the Authority) and building salvage material (by Project Co). Demolished building materials unfit for reuse, and not applicable to the clauses in Schedule 2, shall become Project Co’s property and shall be removed from the Lands. Selling, burning or burying materials on the Lands is not permitted.
- (c) Refer to Schedule 2 [Design and Construction Protocols] regarding responsibilities and procedures for “Survey and Monitoring” and “Control of Vibration”. Locations of spot elevations for “Survey and Monitoring” will be determined on the Lands, in consultation with the Authority, and must remain accessible at all times.

- (d) Extent of demolition of the Existing Hospital is as per Appendix 3F [Demolition and Related Work]. Demolition shall be in accordance with CSA S350 and NFPA 241. Demolition shall be performed by an experienced firm specialized in demolition work similar in material and extent of this Project. Project Co is not permitted to entirely demolish the Existing Hospital, and may demolish only to the extent that is required to facilitate renovations and additions included in their Design and as approved by the Authority.
- (e) Design temporary support structures required for demolition work and underpinning and other foundation supports necessary for the Project using a qualified and experienced professional engineer registered to practice in the Northwest Territories and Nunavut.
- (f) Maintain fire-protection facilities in service during demolition operations.

6.3 Concrete (Division 03)

- (a) Overriding Principles
 - (1) Design and construct cast in place, precast concrete, concrete block, core fills, grout, cementitious materials and formwork of appropriate properties for the intended use in accordance with the requirements of all applicable codes and specifications.
 - (2) Design for the applicable concrete exposure class and provide high sulphate resistant performance where applicable.
 - (3) Maximize the fly ash content of the mix.
 - (4) Use wood formwork for cast in place concrete.
 - (5) Aggregates are not to react with alkalis in the cement to an extent that results in excessive expansion of cast in place, precast concrete, concrete block, core fills, grout and cementitious materials.
 - (6) Cast in place, precast concrete, concrete block, core fills, grout, cementitious materials and formwork: designed and certified by a qualified and experienced professional engineer registered to practice in the Northwest Territories and Nunavut.
- (b) Quality Requirements
 - (1) Certified testing firm to test all cast in place, precast concrete, concrete block, core fills, grout and cementitious materials in accordance with the applicable codes and standards.
- (c) Performance Criteria
 - (1) Finish concrete floors with a smooth, dense, steel trowel finish with a Class F2 Flatness Classification in accordance with CSA A23.1/A23.2, except where more strict requirements are needed to suit the proposed occupancy or equipment that will be located in the space. Overlay toppings to level floors will not be used.
 - (2) Repair cracks and defective concrete in concrete structure to suit the required finish and long-term serviceability requirements of the structure.

- (3) Water proof all foundation walls for below-grade occupied spaces and crawl spaces to prevent groundwater ingress, including any below-grade structured parking. A perimeter draining system will be installed around the exterior of earth-retained foundations as per the geotechnical recommendations.
- (4) Exposed architectural concrete will comply with CSA A23.1/A23.2-09 to minimize honey combing or patching.
- (5) All concrete exposed in areas used by staff, patients or public will be architectural concrete.
- (6) Chamfer all corners on exposed concrete.
- (7) Provide vapour barrier under slabs-on-grade in the form of continuous, cross-linked, minimum 10 mil polyethylene sheet in accordance with the floor system and Geotechnical Report.
- (8) See Section 6.5(b)(4) for concrete topping on metal deck requirements.
- (9) Provide weeping tile as required to ensure proper drainage of the sub surface foundations and walls in accordance with the Geotechnical Report.
- (10) Use hot or cold weather cast in place, core fills, grout and cementitious materials placing and mixing methods when required.
- (11) Ensure parking structures utilize coated rebar and/or proper concrete cover and/or traffic membrane as per CSA S413-07 (R2012).
- (12) Conform to appropriate deflection criteria as per CSA A23.3-04 (R2010) "Design of Concrete Structures."
- (13) Ensure placement of expansion and contraction joints and sawcut under control joints where required.
- (14) Sealed concrete: Liquid applied floor hardener materials (concrete densifier): Water based, sodium silicate type, chemically reactive, permanent treatment, penetrating sealer and hardener, designated as CS (concrete, sealed); non-toxic, non-flammable, surface densification and anti-dusting treatment having less than 0 g/L VOC.
- (15) Provide reinforcement for all concrete and ensure proper crack control parameters are considered.
- (16) All concrete reinforcing to be adequately chaired, supported and spaced.

6.4 **Masonry (Division 04)**

(a) Basic Requirements

- (1) Masonry construction may be considered for exterior walls and walls systems where permanence of finishes, both visually and functionally, and ease of maintenance are primary considerations in the exterior fabric of the Facility.

- (2) Masonry construction may be considered for interior walls and wall systems when priorities include permanence and maintenance, sound transmission control, fire resistance and separation requirements and security.
 - (3) Design and construct loadbearing and non-loadbearing masonry of appropriate properties for the intended use in accordance with the requirements of all applicable codes and specifications.
 - (4) All masonry: designed and certified by a qualified and experienced professional engineer registered to practice in the Northwest Territories and Nunavut.
- (b) Quality Requirements
- (1) Certified testing firm to test all loadbearing masonry materials in accordance with the applicable codes and standards.
- (c) Concrete Masonry Units
- (1) Use hot or cold weather masonry placing and mixing methods when required.
 - (2) Concrete unit masonry may be considered for both independent exterior walls and in exterior wall systems as a structural backing to other finish materials or systems.
 - (3) Concrete unit masonry for interior applications may be considered as an integrally finished material, as a base for applied finish and as a structural backing to other finish systems.
 - (4) Unpainted concrete unit masonry will not be used as an exposed finish in clinical or public areas.
 - (5) Where concrete unit masonry is used as the exposed finish, all exposed corners will have rounded or chamfered corners.
 - (6) In special areas such as Mental Health / Psychiatry, construct the wall as required by Ministry of Health Standards for Hospital-Based Psychiatric Emergency Services: Observation Units.
 - (7) Masonry design and construction will comply with Canadian Masonry Contractors Association (CMCA) Masonry Practices Manual and all applicable standards.
- (d) Brick Masonry
- (1) Exterior wall systems comprising brick masonry as a finish veneer to concrete, concrete masonry or metal framing will be a rain-screen or cavity wall system.
 - (2) Brick masonry below grade for exterior applications is not permitted.
 - (3) Brick masonry in interior applications is to have integral finish and construction compatible with the Authority's infection prevention and control requirements.
- (e) Stone Masonry

- (1) Stone masonry may be considered as a finish veneer to concrete walls or concrete masonry walls. Exterior wall systems in such applications will be a rain screen or cavity wall system.
- (2) Stone will be sound, hard and durable, well-seasoned and of uniform strength, colour and texture, and free of quarry sap, flaws, seams, sand holes, iron pyrites or other mineral or organic defects.

6.5 Metals (Division 05)

(a) Basic Requirements

- (1) Structural steel, steel deck, and cold-formed steel stud design and construction may be considered for building elements and systems, where appropriate.
- (2) Structural components: designed and certified by a qualified and experienced professional engineer registered to practice in the Northwest Territories and Nunavut.

(b) Performance Criteria

- (1) Design structural steel, steel deck, and cold-formed steel stud systems to comply with the deflection and vibration criteria outlined in Section 5.7 (Structural Design).
- (2) Erection tolerances for steel construction will be in accordance with all applicable CSA standards.
- (3) For steel floor and roof construction, the deflection of steel beams, joists, and girders due to the wet weight of concrete topping slabs is to be considered. Topping slab thickness may have to vary to maintain floor levelness tolerances. The additional concrete ponding weight is to be considered in the design of the structure.
- (4) Concrete topping slabs will be finished with a smooth, dense, steel trowel finish in accordance with Section 6.3(c)(1). Design and construct concrete topping slabs on steel deck to control cracking and avoid random surface shrinkage cracking and radial cracking around re-entrant corners. Implement concrete construction and curing procedures to minimize cracking for concrete topping slabs on metal deck.
- (5) Steel floor / roof decking is to be wide rib profile for ease of attachment of current and future services, equipment, and fixtures using drilled insert expansion anchors into the bottom of the deck ribs.
- (6) Assembly of steel floor / roof decking plus the concrete topping slab thickness is to satisfy the requirements of a ULC-rated assembly meeting the NBC fire rating requirements. Spray on or applied fireproofing material is not to be used to achieve required assembly fire rating. Vertical and horizontal fire-resistance rated separations are to achieve their fire-resistance rating through the members of the separation construction assembly itself.
- (7) Apply fireproofing assembly to exposed structural steel floor or roof framing and supporting members to meet fire rating requirements. Building elements (structural and non-structural) susceptible to fire and subsequent damage are not

to be exposed and are to be protected within a respective fire-resistance rated construction assembly as required.

- (c) Structural Steel, Open Web Steel Joists (OWSJ) and Metal Deck
 - (1) Overriding Principles
 - (A) Design and construct structural steel, OWSJ, and metal deck of appropriate properties for the intended use in accordance with the requirements of all applicable codes and specifications.
 - (B) All structural steel, OWSJ, and metal deck to be designed by a qualified and experienced professional engineer registered to practice in the Northwest Territories.
 - (C) The design and inspection of steel fabrication, erection, connections and other components to be in accordance with NAPEG “Engineering and Geoscience Professions Act of the Northwest Territories”.
 - (2) Quality Requirements
 - (A) The organization undertaken to weld structural steel, OWSJ, and metal deck is to be fully approved by the Canadian Welding Bureau under the requirements of CSA-W47.1, Division 1 or 2 only. Division 3 qualification is not sufficient.
 - (B) The organization undertaken to perform weld inspections, materials and workmanship of structural steel, OWSJ, and metal deck is to be fully approved by the Canadian Welding Bureau under the requirements of CSA-W178.
 - (C) Material quality including sourcing and welding quality will be monitored by an independent testing agency.
 - (D) The specification for preparation and painting of structural steel components will conform to the Master Painters Institute (MPI) standards.
 - (3) Performance Criteria
 - (A) Design of OWSJ’s to include all bridging as required.
 - (B) Anchor bolts to conform to ASTM F1554.
 - (C) Ensure metal deck is Grade A with a minimum zinc coating designation of ZF075 as per ASTM A653/653M or galvanized as required for metal deck exposed to a humid environment.
 - (D) Use acoustical roof deck with acoustical insulation where required for sound absorption.
 - (E) Ensure galvanizing with zinc coating is as per CSA G164 or ASTM A792/A792M-08.

- (F) Clean all interior structural steel not to be finish painted and not exposed to industrial, corrosive or humid conditions by wire brushing and removing all rust, dirt, mill scale, weld splatter and all other extraneous material in accordance with SSPC specifications SP2 or SP7 before applying one-coat paint to all surfaces except those to be in contact with concrete.
 - (G) Clean all exterior structural steel that is to be finish painted and not exposed to industrial, corrosive or continually wet conditions by commercial blast in accordance with SSPC specifications SP3 or SP6 to ensure base steel is thoroughly cleaned of all rust, dirt, mill scale, weld splatter and all extraneous material followed by solvent cleaning before applying primer.
 - (H) Clean all exterior structural steel that is to be finish painted and not exposed to industrial, corrosive or continuously wet conditions by white blast in accordance with SSPC specifications SP5 or SP10 to ensure base steel is thoroughly cleaned of all rust, dirt, mill scale, weld splatter and all other extraneous material followed by solvent cleaning before applying primer.
 - (I) Clean all structural steel surfaces of all material which cannot be cleaned by chemical methods. Use necessary blast methods in accordance with SSPC specifications to ensure base steel is thoroughly cleaned.
- (d) Load Bearing Steel Studs
- (1) Overriding Principles
 - (A) Load bearing steel studs may be considered as a component of the exterior wall systems to support exterior wall finishes and form an integral part of the perimeter envelope.
 - (B) Load bearing steel studs may be part of the structural framing or may be independent of the principal structural system.
 - (2) Quality Requirements
 - (A) Design, detail and construct load bearing steel stud design and construction to comply with all applicable CSA standards.
 - (B) The steel stud manufacturer will be certified in accordance with CSSBI Standard 30M-06 and all applicable CSA standards.
 - (C) The steel stud fabricator and erector will be experienced in the type of work undertaken.
 - (D) Conform to the Association of Wall and Ceiling Contractor's Specification Standards Manual (AWCC).
 - (3) Performance Criteria
 - (A) Limit maximum deflection under specified wind loads to L/360 (L/720 for masonry veneers), unless a smaller maximum deflection is specifically required due to wall finishes.

- (B) Load bearing and non-load bearing steel studs to conform to deflection limits specified in the NBC or above noted, whichever is more stringent.
 - (C) Design components to accommodate erection tolerances of the structure.
 - (D) Design wind bearing stud end connections to accommodate floor/roof deflections and to ensure that studs are not loaded axially.
 - (E) Design steel studs to take into account the anchorage of other materials being supported including but not limited to: sub-girts supporting metal cladding and composite panels, soffit finishes and the provision of lateral support at window heads.
- (e) Steel Stairs and Ladders:
- (1) Stairs: designed and certified by a qualified and experienced professional engineer registered to practice in the Northwest Territories and Nunavut.
 - (2) Use only materials that are new, free from defects that would impair the strength, durability or appearance, and of the best commercial quality for the purposes specified. Steel shall be free from pitting, seam marks, roller marks, and other imperfections where exposed to view on finished units. Do not use steel sheet with variations in flatness exceeding those permitted by referenced standards for stretcher-levelled sheet.
 - (3) Carbon steel: Rolled steel sections and plate: In accordance with CSA G40.20/G40.21, Grade 300W; Hollow structural sections (HSS): In accordance with CSA G40.20/G40.21, Grade 350W, Class C; Reinforcing bars: In accordance with CAN3 G30.18, Grade 400W; Structural pipe: In accordance with ASTM A53, structural grade, untested pipe is acceptable for structural and architectural applications. Structural tubing: In accordance with ASTM A500, round shaped.
 - (4) Concrete materials: Normal weight, ready mixed concrete conforming to CSA A3000, and having minimum 20 MPa compressive strength at 28 days. Welded wire fabric: Minimum 150 x 150 MW9.1/9.1 conforming to ASTM A185.
 - (5) Floor plate: Steel safety plate meeting ASTM A786, 5 mm thickness, checkered pattern 45° to edge of steel plate, raised 28 mm x 8 mm elongated pips at 90° to each other, 22 mm offset x 45 mm on centre.
 - (6) Handrails and wall brackets: Tubular steel, 38 mm Ø pipe rail with rod and mounting flange.
 - (7) Non-slip rung finishes: Coat top of each rung with abrasive material metallurgically bonded to rung by a proprietary process.
 - (8) Fixed ladder extension safety post: Adjustable spring balanced safety post with adjustable mounting brackets to fit ladder-rung spacing. Ladder extension equipped with automatic self-lock when fully extended; upward and downward movement controlled by stainless steel spring balance mechanism.

- (f) Guardrails & Handrails
 - (1) Provide guardrails and handrails of minimum diameter 42 mm, required to resist design loads.
 - (2) All guardrails to be designed to their usage classification and per applicable codes.
 - (3) Provide a durable painted finish for steel guardrails.
 - (4) Provide a manufactured pre-finish for stainless steel or aluminum guardrails.
 - (5) Provide safety glass for glazed decorative railings. In exterior applications of guardrails, where a hazard exists, provide guardrails and handrails to conform to the requirements of NBC.
- (g) Guard Posts / Bollards
 - (1) Provide guard posts using extra heavy wall galvanized steel pipe. Set steel pipe bollards in concrete and fill with concrete plumb and true to line. Round off tops of concrete in pipe. Paint bollards bright yellow and affix strips of reflective tape.
 - (2) Locate guard posts at all locations, including but not limited to areas such as loading docks and material/equipment storage, where equipment such as forklifts and motorized pallet jacks may do damage to adjacent building components.

6.6 Wood, Plastics and Composites (including Millwork) (Division 06)

- (a) Wood – General
 - (1) The use of wood and plastic products is to be within the limitations of combustible content restrictions of the NBC for the specific occupancy classification of each building.
 - (2) Timber may be considered as acceptable product for building structure (e.g. Support Services Building).
 - (3) Do not use urea formaldehyde containing materials in the Facility.
 - (4) Provide rough carpentry, wood backing materials, backing boards for mechanical rooms and electrical/communication rooms, roof sheathing, copings, cant strips, finish carpentry and architectural woodwork, including but not limited to exterior fascias, cabinets, casework (excluding laboratory casework, which is included in Section 6.12 Furnishings (Division 12)), frames, paneling, ceiling battens, trim, installation of doors and hardware, and other wood-related products and applications as required for wood products exposed to view in finished interior and exterior installations.
 - (5) Use wood studs for non-load bearing framing in non-patient care areas, subject to approval from the authority having jurisdiction under the NBC. Wood studs will comply with applicable CSA standards for lumber. Wood framing design will be certified by a qualified and experienced professional engineer registered to practice in the Northwest Territories and Nunavut.

- (6) Provide solid polymer fabricated or stainless steel surfacing for:
 - (A) all counters that incorporate integral sinks; and
 - (B) other areas as required to create surfaces that provide antiseptic or clean characteristics, special or regular maintenance, and resistance to caustic action of chemicals or agents used by the Authority.
 - (7) Provide acrylic plastic products (or other products as approved by the Authority) as required for wall cladding, wall protection, corner protection, casework finishing, trims, ornamental elements, and other applications to achieve a quality of interior finish suitable for use by patients and staff.
 - (8) Prepare and propose to the Authority locations and types of all handrails, bumper guards, wall protection, and consult with the Authority to determine locations and types in accordance with Appendix 2B [User Consultation and Design Review].
 - (9) Non-loadbearing wood studs to conform to deflection limits established in Section 5.7(i) Deflection Limitations.
 - (10) Lumber to be grade stamped of an agency certified by the Canadian Lumber Standards Accredited Board.
 - (11) Preserved and fire treated lumber and engineered wood products to be certified by an approved treatment plant.
 - (12) Lumber and engineering wood products to be Forest Steward Council (FSC) certified. Submit listing of wood products and materials showing that they are in accordance with CSA-Z809.
 - (13) Use pressure treated wood for exterior wood in contact with soils and concrete. All exposed wood to be sealed for exposed conditions.
- (b) Structural and Engineered Wood Products
- (1) Structural timber framing, foundations, decking, sheathing and engineered wood products: designed and certified by a qualified and experienced professional engineer registered to practice in the Northwest Territories and Nunavut.
 - (2) The design and inspection of timber and engineered wood product fabrication, erection, connections and other components to be in accordance with NAPEG "Engineering and Geoscience Professions Act of the Northwest Territories".
 - (3) Provide blocking, squash blocks and continuous support for load bearing items.
 - (4) Ensure wood decking conforms to the NLGA Standard Grading Rules for Canadian Lumber.
 - (5) Install select grade where decking is exposed in finished structure and where specifically indicated.
 - (6) Ensure plywood, particleboard, OSB and wood based composite panels are in accordance with CSA and ANSI standards, FSC or SFI certified and urea-formaldehyde free.

- (7) Ensure structural composite lumber manufacturer plant is approved by the National Research Board for the laminated and glued veneer process.
 - (8) Ensure all structural composite lumber members supplied carry a stamp noting the name and plant number of the manufacturer, the grade, the National Research report number and quality control agency.
 - (9) Beams, headers and plates made of structural composite lumber to be laminated veneer lumber glued with waterproof adhesive under an approved process.
 - (10) Fabricate engineered wood products in an approved plant under the supervision of an approved inspection agency in accordance with the drawings, specifications and the reviewed shop drawings.
 - (11) Furnish all bracing, bridging, connectors, bearings, anchorages and framing where required.
 - (12) Ensure that all structural timber and connections will sustain any erection loadings that may occur with an adequate safety factor. All temporary bracing is to remain in place until framing is connected to the permanent lateral stability elements.
 - (13) Fabricator for trusses to show evidence of quality control program such as provided by regional wood truss associations or equivalent.
 - (14) All lumber used in the manufacture of trusses to have grade stamp clearly visible indicating conformance with NLGA.
 - (15) Ensure all structural engineered wood products supplied carry an authorized label indicating conformance with CSA-0122.
 - (16) Manufacture structural glue-laminated members in a plant certified by Canadian Standards Association Administrative Board as meeting the requirements of CSA-O177.
- (c) Wall Guards and Corner Guards, Handrails, Wall Protection, Door Edge and Door Frame Protection
- (1) Wall and Corner Guards
 - (A) Provide protection of walls and exposed wall corners at patient care areas, service areas, and other areas as required, to prevent damage due to impact from traffic such as stretchers, equipment and service vehicles.
 - (B) Select materials appropriate to the amount and degree of impact anticipated.
 - (2) Handrails
 - (A) Provide handrails in all corridors and patient care areas of an appropriate type for patient support.
 - (B) Select materials and shapes appropriate for the use, provide continuous uninterrupted supports.

- (3) Wall Protection
 - (A) Apply sheet wall protection to wall areas where the impact damage anticipated is of a larger area of wall than would be protected by bumper guards.
 - (B) Provide wood wall bumper guards in high traffic pedestrian areas.
 - (C) Provide wall splash back protection behind and surrounding hand sinks, scrub sinks and housekeeping sinks.
 - (D) Apply sheet wall protection to faces of doors where impact damage is anticipated. Use sheet wall protection that complements the installation of door edge and frame protection.
 - (E) Secure wall and corner guards to reinforcing and backing in the walls, such backing sufficient to withstand expected impact loads. Wall protection will be high impact and stain-resistant.
 - (F) Use wall protection handrails and corner guard products that are stain-resistant to pen marks, paint, and graffiti, and able to withstand commercial cleaners without fading or staining. Use products containing anti-microbial additives to retard mildew and bacterial growth.

- (4) Door Edge and Door Frame Protection
 - (A) Protect door edges and door frames in patient care areas from damage such as impact caused by the regular movement of stretchers and other wheeled vehicles.
 - (B) Protect door edges and door frames in clinical and service areas from damage such as impact caused by regular and non-regular service vehicles.
 - (C) Use bumper guards, crash rails, handrails, and corner guards that are high impact-resistant extrusion conforming to ASTM D4226 and with anti-microbial additive.

- (d) Finish Carpentry, Millwork and Architectural Woodwork
 - (1) Conform to Architectural Woodwork Manufacturer's Association of Canada (AWMAC) Quality Standards Manual for minimum "Custom Grade," and Door and Hardware Institute (DHI) standards for the design, fabrication, materials, installation, and workmanship of finish carpentry and architectural woodwork.
 - (2) For millwork and cabinets, seal all wood surfaces and edges with plastic laminate for infection control.
 - (3) Adhesives will be non-toxic, non-solvent glue to comply with AWMAC Quality Standards Manual, Canadian 'Eco-Logo' program, and CaGBC (Canada Green Building Council).
 - (4) Use marine-grade plywood substrate for countertops. Do not use fibreboard or particleboard.

6.7 Thermal and Moisture Protection (Division 07)

- (a) Thermal and Moisture Protection – General
 - (1) Design construction assemblies according to sound building envelope principles.
 - (2) Design construction assemblies to prevent the ingress of moisture or water vapour from the exterior through the building envelope and the passage of air through the building envelope from the interior spaces to the exterior and vice versa.
 - (3) Design construction assemblies to prevent the ingress of moisture through foundation walls below grade, both subject and not subject to hydrostatic pressure.
 - (4) Provide protection (such as insulation) to resist the transfer of heat through exterior walls and roofs to create comfortable, livable interior environments.
 - (5) Provide resistance to the propagation and spread of fire for exterior walls and interior walls designated as fire-resistance rated separations where appropriate.
- (b) Performance Criteria
 - (1) Dampproofing: not to be used as a means of prevention of moisture ingress.
 - (2) Waterproofing:
 - (A) Provide waterproofing to prevent moisture ingress to basement and crawlspaces below grade. This applies to structured parking, as well as other buildings.
 - (B) Use membrane waterproofing to prevent water ingress over suspended slabs and decks and associated walls over habitable spaces where water collection is anticipated.
 - (C) Use fluid-applied waterproofing for mechanical room floors.
 - (D) Provide waterproof membranes in exterior walls as part of the building envelope and integral with rain screen or cavity wall assemblies.
 - (E) Dam the floor under key mechanical equipment in the mechanical penthouse, mechanical rooms and mechanical shafts with a continuous curb and waterproofing to contain the water. Provide floor drains.
 - (3) Vapour barriers: Prevent water vapour transmission and condensation in wall assemblies, roofing assemblies, and under concrete slabs-on-grade within the Facility perimeter by means of a continuous torch-on vapour barrier membrane.
 - (4) Air barriers: Prevent air leakage caused by air pressure across the wall and roof assembly by means of air barrier assemblies. Provide air barrier assemblies that:
 - (A) limit air exfiltration and infiltration through materials of the assembly, joints in the assembly, joints in components of the wall assembly, and junctions with other building elements including the roof; and

- (B) prevent air leakage caused by air pressure across the wall and roof assembly, including interruptions to the integrity of wall and roof systems such as junctions with dissimilar constructions.

(5) Thermal Protection:

- (A) Provide rigid and semi-rigid thermal insulation as part of the building envelope to prevent the transfer of heat both from the interior to the exterior and vice versa, depending on seasonal conditions, and to resist the absorption of water.
- (B) Use thermal protection materials of a type and quality that will provide consistent environmental quality to enclosed spaces.
- (C) Use foamed plastic insulation that is CFC and HCFC free.
- (D) Minimum thermal resistance for walls required by GNWT Good Building Practice: RSI 5.6 (R31.8).
- (E) Use rigid insulation with concrete facing at exposed foundation walls.

(6) Cladding:

- (A) Design cladding to withstand all design loads and dead loads in accordance with NBC regulations, to maximum allowable deflection of 1/180th of span.
- (B) Design system to provide movement of components without causing buckling, failure of joint seals, undue stress of fasteners or other detrimental effects, when subjected to seasonal temperature ranges.
- (C) Design system to accommodate allowable structural tolerances.
- (D) Provide for positive drainage to exterior of condensation occurring within wall construction and water entering at joints in accordance with PERSIST pressure equalized rainscreen principles, which minimizes the passage of moisture past the cladding with pressure equalized compartments, intercepts any moisture that does get past the cladding with a continuous barrier, and dissipates the moisture into back to the exterior through adequate drainage. Careful consideration of cladding profiles, sills, overhangs and other vertical projections such as curtain wall mullions to reduce the amount of moisture deposited on the rainscreen cladding.
- (E) Design, assemble and secure system to building structure in a manner that will keep any stress on sealants within manufacturer's recommended tolerances.
- (F) Allowable tolerances: Maintain following erection tolerances:
 - (i) Maximum variation from plane: 10 mm in 10 m.
 - (ii) Maximum offset from true alignment between two adjacent members abutting end-to-end, in line: 0.75 mm.

(G) Cladding system and girt framing system: designed and certified by a qualified and experienced professional engineer registered to practice in the Northwest Territories and Nunavut.

(i) Cladding – Aluminum Metal Panels:

1) Formed aluminum panels: Tension levelled, aluminum sheet in accordance with ASTM B209 and ANSI H35.1 alloy designation 5052-H32 or 3003-H14; Thickness: Minimum 1.60 mm (0.063”) or thicker as required to meet design loads. Finish: Prefinished colour selected from manufacturer’s standard range using Duranar XL coatings.

(ii) Cladding – Insulated Metal Wall Panels:

1) Zinc galvanized sheet steel: Tension levelled, commercial steel (CS) designation, Type A, Grade 230 in accordance with ASTM A653 or ASTM A792 to manufacturer’s standard; Thickness: Provide sheet steel as required to meet design loads; Liner sheet: Minimum 0.46 mm; Exterior sheet: Minimum 0.61 mm; Galvanizing designation: Z275 or AZM 150 applied evenly to both sides

(iii) Cladding – Corrugated Metal:

1) Aluminum / zinc galvanized sheet steel cladding: Tension levelled, commercial steel (CS) designation, Type A, Grade 275 (40) in accordance with ASTM A792; Minimum thickness: 0.76 mm (0.030”) base metal thickness, or thicker as required to meet design loads; Galvanizing designation: AZM180 (AZ60), applied evenly to both sides; Acceptable materials: Dofasco Inc., Galvalume Plus with clear resin coating applied to both sides.

(iv) Cladding – Fibre Reinforced Cement Panels:

1) Panels: Prefinished, non-asbestos fiber-cement siding in accordance with ASTM C1186, Grade II, Type A, non-combustible in accordance with ASTM E136. Include trim and moulding in same material. Concealed fastening system.

(7) Roofing

(A) Comply with the Canadian Roofing Contractors Association latest standards and requirements for a five (5) year guarantee, as published in the CRCA manual. Perform roofing quality inspections as required by the CRCA to obtain 15 year CRCA warranty.

- (B) Comply with CRCA Roofing Specifications Manual “Acceptable Materials List,” including:
 - (i) Membrane for minimal sloped roofs – SBS modified (two-ply system); 250 torch on cap sheet, 180 base sheet, 12.7 non-combustible roof board, 2 layers type II rigid insulation (RSI 7.39/R-42), torch on air and vapour barrier, 12.7 mm fiberglass mat gypsum sheathing, structure.
 - (C) Use foamed plastic insulation that is CFC- and HCFC-free.
 - (D) Roofing systems will include:
 - (i) flashings and sheet metal;
 - (ii) thermal insulation;
 - (iii) roofing specialties and accessories required for completion;
 - (iv) interior access systems to roof areas;
 - (v) slip resistant, well-marked all weather walk ways;
 - (vi) fall protection; and
 - (vii) roof drainage, including overflow scuppers.
 - (E) Provide sheet metal flashings that divert water away from membrane flashing termination and protect the membrane from deterioration due to the exterior elements and mechanical damage. Provide flexible membrane subflashing continuously under the metal.
 - (F) Metal roofing systems, if used, will be complete with continuous waterproof membrane as part of the assembly and provide clear internal paths of drainage to allow any trapped moisture to drain to the exterior and avoid the staining of architectural finishes, forming of puddles, forming of icicles, and dripping on pedestrians.
 - (G) In designing the Facility, including any roof systems, ensure that entrance ways are protected from sliding snow and ice and that there are no accumulations of snow and ice in roof valleys.
- (8) Fire and Smoke Protection
- (A) Spray-applied cementitious fireproofing is not to be used to achieve a fire resistance rating. Vertical and horizontal fire-resistance rated separations are to achieve their fire-resistance rating through the members of the separation construction assembly itself.
 - (B) Integrate barriers into vertical and horizontal space separations to protect against the spread of fire and smoke. Building elements (structural and non-structural) susceptible to fire and subsequent damage are not to be exposed and are to be protected within a respective fire-resistance rated construction assembly as required.

- (C) Apply protection around penetrations through vertical and horizontal fire-resistance rated separations.
 - (D) Use firestopping and smoke seal systems that consist of asbestos-free materials and systems, capable of maintaining an effective barrier against flame, smoke, and gases.
 - (E) Use firestopping that:
 - (i) is compatible with substrates;
 - (ii) allows for movement caused by thermal cycles; and
 - (iii) prevents the transmission of vibrations from pipe, conduit or duct to structure and structure to pipe, conduit or duct.
 - (F) When more than one product is required for an assembly, use products that are compatible with one another and from the same manufacturer.
 - (G) Use fire stopping sealants and coatings that are silicone-based and guaranteed not to re-emulsify if subject to wetting or standing water. Do not use acrylic-based coatings and sealants.
- (9) Sealants
- (A) All sealants and sealant primers used on the interior of the Facility shall be low VOC where possible.
 - (B) Apply sealant materials to achieve:
 - (i) seals to the building envelope systems and around openings in the building envelope systems as required to prevent water ingress;
 - (ii) seals around and over cavities in or behind surface elements to allow effective infection prevention and control (note that sealant around door frames must include joints at bottom of door frames between floor finish and frames);
 - (iii) sealed joints between dissimilar or similar materials to allow a smooth or even transitions; and
 - (iv) sealed expansion or controls joints in the building envelope systems or structural systems to allow movement.
 - (C) Do not use unsealed joints in clinical areas.
 - (D) For the exterior; use sealants to completely and continuously fill joints between dissimilar and/or similar materials.
 - (E) For the interior; use sealants (at frames such as those at doors and windows), to completely fill joints between dissimilar materials using one component, acrylic emulsion, paintable type.

- (F) Use silicone caulking that is mildew-resistant and impervious to water for caulking washroom plumbing fixtures.
- (G) Use sealants with self-levelling properties for expansion and control joints in concrete floors using two-component epoxy urethane sealants.
- (H) Use non-sag sealants for exterior vertical expansion and control joints in masonry or wall cladding.
- (I) Use sealants that allow for minimum 25% movement in joint width.
- (J) In corridors and other traffic areas used by laundry carts, supply carts, material handling equipment etc., use traffic bearing type sealants suitable to support imposed load without deformation or failure.

6.8 Openings (Division 08)

(a) Basic Requirements

- (1) Except where wire glass is required in accordance with the NBC, construct interior windows, sidelights and glazing forming part of doors of tempered glass. For exterior glazing at doors and sidelights, use laminated glass.
- (2) Installation methods and locations for doors, frames and hardware to conform to the standards of the Door and Hardware Institute (DHI).
- (3) Doors
 - (A) Doors are to be sized, fabricated and installed to suit the intended function of spaces or rooms requiring acoustic or visual privacy, security, special HVAC requirements, fire-resistance rated separations or other closures.
 - (B) Size Requirements for Doors:
 - (i) Provide door openings of adequate width to suit the intended purpose of rooms on either side of the doors and allow the movement of people and equipment associated with those rooms.
 - (ii) No single door will have a width of less than 900 mm.
 - (iii) Provide double doors into rooms where large pieces of equipment will be moved in or out during the lifetime of the Facility and where such equipment cannot pass through a single 1200 mm wide opening.
 - (iv) ICU and Emergency Department room doors will be 3 panels wide sliding glass doors.
 - (v) Size door openings to accommodate movement of equipment.

- (vi) Size door openings to suit bariatric patient requirements for all patient rooms of medical / surgical units, ICU and other rooms identified in the Clinical Specifications for bariatric use. The minimum door opening size will be 1500 mm clear. Doors must have a large leaf and a small leaf. Provide a viewing window in the large door leaf, with an integral blind in the window unit, operable from both sides.
 - (vii) Provide double doors into corridors and major rooms to ease access where patients in beds or stretchers will be attended to or accompanied by a large number of medical staff and medical equipment.
 - (viii) Unless required otherwise, provide doors to patient care areas, including doors to water closets and change room cubicles with a minimum width of 900 mm.
 - (ix) Provide a minimum of 2150 mm high door or door leaf, unless specifically required for access to services or other purposes where height is restricted.
 - (x) Unless noted otherwise, interior doors serving areas requiring stretcher or bed access will be a minimum of 1220 mm wide, with swing doors (other than typical double doors) consisting of only one leaf. Paired doors in a corridor requiring stretcher access must swing in opposite directions, with the right-hand door swinging in the direction of travel.
 - (xi) Inpatient Isolation Rooms shall have a minimum of one 1500 mm wide door directly accessed off a corridor for transfer of beds and equipment.
 - (xii) Anteroom doors may be 915 mm wide, provided alternate door access to the treatment space is provided for patient and large equipment transfer.
- (C) Acoustic requirements for doors: comply with the minimum sound transmission ratings between spaces described in CSA Z8000 and Government of Alberta Infrastructure Technical Requirements for Healthcare Facilities “Blue Book”, as modified by GNWT. STC ratings of doors are to match that of the walls they are located within.
- (D) Provide patient rooms with hardware and frame that allows the doors to stay in an open position and facilitates casual observance of patients by the nursing staff.
- (E) For doors into or between major departments or activity areas through which cart, stretcher, or bed traffic is anticipated on a routine basis, provide automatic activation by an electronic device or manual push button, located to allow emergency access without the necessity to stop movement. For all other doors through which cart, stretcher, bed, or frequent patient or staff traffic is anticipated on a routine basis, provide appropriate hardware or automatic activation that allows the doors to stay in an open position.

- (F) Apply door sizes and designs consistently to rooms of similar use, location, and configuration.
- (G) Avoid doors swinging into corridors in a manner that may obstruct traffic flow or reduce the corridor width, except doors to psychiatric holding rooms or to spaces that are used infrequently and are not subject to occupancy such as small closets.
- (H) Doors may swing into patient bathrooms, provided they allow for ease of patient use, both on their own and assisted by staff. Equip such doors with appropriate hardware to allow the door to be opened out into the room in an emergency situation. Alternatively “barn type” sliding doors may be used for patient bathrooms.
- (I) Provide doors with appropriate hinges, edge protection, and face protection to minimize damage and resultant disruptive maintenance.
- (J) Finish doors and frames with a suitable finish that prevents dirt and fingerprint accumulation, and can be easily cleaned and disinfected.
- (K) Be consistent with the extent of glazing in a door, or the size and quantity of sidelights, and balance these between the nature of observation required and the privacy requirements of the occupants of the room. Where possible and appropriate, provide glazing in an adjacent sidelight rather than within the door itself.
- (L) Provide glazing in doors and sidelights in such a way that they allow patient observation and operational safety of the spaces they serve. Provide tempered glass in aluminum frame sliding doors. Sliding doors to be without floor tracks, and be provided with emergency swing breakout. Provide blinds or coverings suitable and appropriate for the level of privacy intended and required.
- (M) Provide doors and door frames with the capability to withstand the varying and high levels of humidity and impact that occur typically within a hospital and in specific rooms within a hospital, and maintain their inherent aesthetic and functional capacities.
- (N) Frames and anchors for door, sidelights, interior and exterior windows in Mental Health / Psychiatry Departments, and other areas as requested by the Authority, will be designed to withstand a heavy degree of impact while maintaining their aesthetic and functional capacities. Glazing of such components will be non- breakable and use hospital-type cut-away jambs.
- (O) In areas where security is considered paramount, including Mental Health / Psychiatry Departments and secure entrances, achieve safety and security with the appropriate location, configuration, materials, construction and detailing of doors and hardware as required by Ministry of Health Standards for Hospital-Based Psychiatric Emergency Services: Observation Units.

- (4) Not Used.
- (5) Exterior Windows
 - (A) Size, configure, and adequately construct windows to suit rooms that require daylight, views and/or natural ventilation.
 - (B) Window framing systems to be thermally-broken, designed based on principles of pressure equalized rain screen. Triple glazed, argon filled with low-e coating, fiberglass windows that meet the standards of acceptance of the GNWT.
 - (C) No operable windows (windows that may be opened and closed) are to be provided. Provide fixed windows only.
- (6) Interior Windows
 - (A) Provide 'borrowed light' through interior windows to occupied rooms that do not have exterior windows. The intent is to borrow light from areas that have windows and consequently create a more comfortable and less closed-in atmosphere.
 - (B) Provide 1000 mm wide interior windows, top of window frame to align with door frames in the same room, bottom of window frame would be at 1000 mm above finish floor level, in the following rooms:
 - (i) Intensive Care Unit/Telemetry Unit: provide a window in between adjacent inpatient (ICU) rooms, complete with integral blinds operable from either side to allow staff to see between rooms, and from the charting counters at corridor outside patient bedrooms;
 - (ii) Medical/Surgical Inpatient Rooms, Maternity, Newborn and Pediatric Inpatient Rooms, Psychiatric Inpatient Rooms: provide a viewing window from the corridor or nursing station;
 - (iii) Isolation Patient Rooms: provide a viewing window from the corridor or nursing station;
 - (iv) provide viewing windows between the Anteroom into the Isolation Patient Rooms; and
 - (v) in the Emergency Department from the Anteroom into the Decontamination Room.
 - (C) Coordinate glazing heights with adjacent wall protection, handrails, and other accessories to achieve functional and aesthetic cohesiveness.
- (b) Performance Criteria
 - (1) Hollow Metal Doors and Frames
 - (A) Materials and manufacture of hollow metal doors and frames will comply with the requirements of the Canadian Steel Door and Frame Manufacturer's Association (CSDFMA).

- (B) Provide interior metal doors in utility areas with:
 - (i) 1.5mm fully-welded hollow metal frames, except at fire separations where ULC listed hollow metal frames will be employed;
 - (ii) flush face construction; and
 - (iii) painted finish.
 - (C) Provide exterior metal doors with:
 - (i) insulated hollow metal;
 - (ii) thermally broken welded metal frames, 16-gauge (1.5mm) construction is recommended as a minimum, with 14-gauge for high traffic and high abuse areas;
 - (iii) flush face construction;
 - (iv) edge seams to correspond with door function and minimize maintenance needed; and
 - (v) prepared surfaces to receive painted finishes that resist corrosion from exposure to weather.
 - (D) Provide pressed metal frames with:
 - (i) fully welded construction;
 - (ii) thermally-broken door frames for exterior door;
 - (iii) anchors to each jamb to suit wall type and receive the frame; and
 - (iv) painted finish.
 - (E) Door Glazing
 - (i) For exterior hollow metal door glazing, use sealed units with warm edge, in thermally-broken frames to prevent heat loss.
 - (ii) For interior hollow metal door glazing, use tempered glass.
 - (F) Door hardware: combination of standard locks and electronically controlled access locks. See Appendix 3E [Door Operations Matrix].
- (2) Wood Doors
- (A) Wood doors: paint grade birch, sealed in accordance with CSA Z317.13 in patient areas. Interior glazing: tempered glass 5mm thick.

- (B) Wood doors will comply with all applicable standards, including the Quality Standards for Architectural Woodwork published by the Architectural Woodwork Manufacturer's Association of Canada (AWMAC).
- (C) Wood doors will have hardware and finishes that suit the intended function and aesthetics of the Facility.
- (D) Construct, finish, and install wood doors to minimize the requirement for maintenance and resulting disruption to Facility operations.
- (E) Provide wood doors in flush design, Architectural Grade quality (as defined in the AWMAC standards referred to above), solid particleboard core.
- (F) Provide fire-resistance rated doors with a homogeneous incombustible mineral core and AWMAC Quality Standards Option 5 blocking.
- (G) Install finish hardware securely to resist loosening over time. Fasten to solid wood backing, except where hardware is designed to be through-bolted.
- (H) Glue stiles, rails and faces to the core with Type II water-resistant adhesive to minimize de-lamination or disassembly as a result of moisture ingress.
- (I) Use B-Grade hardwood veneer with AWMAC No. 3 edge, finish to suit the intended use.
- (J) Do not use wood veneer-faced doors in critical care areas for reasons of cleanliness and infection prevention and control, unless suitably finished to mitigate such concerns.
- (K) In locations requiring radiation protection, line doors with lead and label such doors with lead thickness.

- (3) Aluminum Entrances and Storefronts
 - (A) Aluminum entrances and storefront framing and doors may form part of the exterior envelope of the Facility.
 - (B) Provide glazed interior partitions as appropriate to comply with the functions of the spaces as defined.
 - (C) Use aluminum doors within aluminum entrances and storefront.
 - (D) Use frames that are thermally-broken, flush glazed, aluminum sections, to accept insulating glass units.
 - (E) Incorporate in the frames drained and vented system (rain screen) with a complete air and vapour seal, allowing any moisture entering the frame to drain to the exterior and allowing air into the pressuring chamber.
 - (F) Use aluminum swing entrance doors that are heavy-duty commercial or institutional grade that may be automatically operated, motion-detector controlled.
 - (G) Apply aluminum finish for exposed aluminum surfaces. Finish will be permanent and resistant to corrosion caused by weather exposure and climate.

- (4) Specialty Doors
 - (A) Overhead Rolling Service Doors
 - (i) Restrain lateral movement of door curtain slats. Provide windlocks as required by door size or wind load requirements.
 - (ii) Provide interlocking flat slats, complete with bottom bar and contact type bottom astragal.
 - (iii) For manually operated doors, provide inside lift handle and locking bar or chain hoist. Motor operation may be provided on doors requiring constant usage. Chain operation will be by means of reduction gears and galvanized hand chain.
 - (iv) For fire doors, provide automatic closing device operated by fire door release device connected to fire alarm system.
 - (B) Overhead Rolling Grilles
 - (i) Provide grilles that allow visual access to secure areas.
 - (ii) Provide aluminum or steel guides that are: fabricated to withstand vertical and lateral loads; counterbalanced by helical torsion springs; and sound-deadened.
 - (iii) For manually operated closures, provide inside lift handle and locking bar or chain hoist. Motor operation may be provided on grilles requiring constant usage. Chain operation will be by means of reduction gears and heavy chrome plated hand chain.

- (C) Overhead Rolling Counter Shutters / Horizontal Sliding Grilles
 - (i) Provide shutter curtains fabricated with extruded aluminum, galvanized steel, or stainless steel interlocking flat slats, complete with guides of similar materials.
 - (ii) Provide closures that are manually operated and with locking capability.
- (D) Interior Aluminum Sliding Doors and Sidelights
 - (i) Provide interior glass sliding doors and sidelights without floor track, sliding and fixed panel(s) single glazed with 6 mm clear fully tempered float glass.
 - (ii) Interior sliding doors to have break-out capability to facilitate staff access to patient rooms.
 - (iii) Provide visual cues/glazing film in transparent glass panels as appropriate to prevent collisions.
 - (iv) Provide manual break-out capable 3 panel style interior glass sliding doors in the following patient rooms:
 - 1) Intensive Care Unit/Telemetry Unit;
 - 2) post-anaesthesia recovery enclosed patient bays; and
 - 3) enclosed exam rooms.
 - (v) Provide automatic break-out capable interior glass sliding doors, with card access and locking capability, in the following areas:
 - 1) patient isolation rooms, including vestibules, examination rooms and inpatient rooms; and
 - 2) Emergency Trauma / Resuscitation rooms.
 - (vi) Provide automatic break-out capable interior glass sliding doors with frosted glazing in the IPU Medication Rooms.
- (E) Automatic Sliding Doors
 - (i) Automatic sliding doors complete with break-away capability for exiting may be installed at main entrance, provided that the size and configuration of the entrance vestibule is designed such that both sets of doors will not be open at the same time.
 - (ii) Door equipment will accommodate medium to heavy pedestrian traffic and up to the following weights for active leaf doors: 100 kg for bi-part doors and 200 kg for single slide doors.
 - (iii) Provide door operators, including the motion and presence detection system, that are: capable of operating within the temperature ranges existing at the Facility; and unaffected by ambient light or ultrasonic interference.

- (iv) Provide energy-saving devices to reduce conditioned air loss.
- (F) Automatic Swing Doors
- (i) Use automatic swing doors for interior and exterior locations where appropriate, including the entrance vestibule, cross-corridor double-egress doors, entrances to departments and areas where stretchers and equipment are frequently wheeled, and doors to exterior spaces that are required to be handicapped accessible.
 - (ii) If used, provide directional motion sensor control device that are unaffected by ambient light or ultrasonic frequencies.
 - (iii) Equip all in-swing doors that are required exits with an emergency breakaway switch that internally cuts power to the operator. No external power switch allowed.
 - (iv) Implement longer hold-open times to accommodate the elderly and frail.
- (5) Aluminum Curtain Walls
- (A) Aluminum curtain walls will comply with all applicable standards, including the Aluminum Association Standards (AAS) and the American Architectural Manufacturers Association (AAMA) field testing specifications.
 - (B) Incorporate in the curtain wall framing a drained and vented system complete with air and vapour seal, allowing any water entering the framing/system and the glazing detail cavities to drain to the exterior and also allow air into the pressuring chamber.
 - (C) Provide curtain wall framing that incorporates a thermal-break.
 - (D) For exposed aluminum surfaces, provide a finish that is permanent and resistant to corrosion resulting from weather exposure and climate.
 - (E) Provide assemblies that resist local seismic conditions and 1-in-100 year climatic events (with a safety factor).
 - (F) Window wall framing relying on primary face seals is not allowed.
- (6) Aluminum Windows
- (A) Aluminum windows will comply with all applicable standards, including the Aluminum Association Standards (AAS) and the American Architectural Manufacturers Association (AAMA) field testing specifications.
 - (B) Incorporate in windows a drained and vented system complete with air and vapour seal, allowing any water entering the framing/system and the glazing detail cavities to drain to the exterior and also allow air into the pressuring chamber.

- (C) Provide windows that incorporate a thermal-break.
- (D) For exposed aluminum surfaces, provide a finish that is permanent and resistant to corrosion resulting from weather exposure and climate.
- (E) Provide assemblies that resist local seismic conditions and 1-in-100 year climatic events (with a safety factor).

(7) Skylights

- (A) Roof or skylight glazing may be provided where natural light is required in interior spaces to augment or complement interior ambient lighting.
- (B) Skylights will comply with all applicable standards. Design skylights to minimum tolerances, including the following:
 - (i) Thermal movement: Provide metal framed skylights that allow for thermal movements resulting from the following maximum change (range) in ambient and surface temperatures by preventing buckling, sealant failure, and other detrimental effects.
 - 1) Temperature change (range): 120 deg F (67 deg C), ambient; 180 deg F (100 deg C) material surfaces.
 - (ii) Air infiltration: Provide metal framed skylights with maximum air leakage of 0.06 cfm/sq. ft. (0.03 L/s per sq. m) of surface when tested according to ASTM E 283 at a minimum static air pressure differential of 6.24 lbf/sq. ft. (300 Pa).
 - (iii) Water penetration: Provide metal framed skylights that do not evidence water penetration when tested according to ASTM E 331 at a minimum differential static pressure of 20 percent of positive design wind load, but not less than 6.24 lbf/sq. ft. (300 Pa).
- (C) All skylights to be sealed double glazed in thermally-broken, internally drained rain screen type extruded aluminum frames. Plastic skylights are not to be used.
- (D) For exposed aluminum surfaces, provide a finish that is permanent and resistant to corrosion resulting from weather exposure and climate.

(8) Light Tubes

- (A) If light tubes are required for providing natural light to internal areas, provide a reflective light tube system that that will transmit the full range of natural light, ensuring a bright, clean and white light source.
- (B) Provide a daylight dimmer to control the level of light.
- (C) Coordinate the light tube solution with the other components of the ceiling design, including the artificial lighting, to provide an integrated design solution.

- (9) Roof Hatches
 - (A) Minimize use of roof hatch accesses. If roof hatches are used to provide access to the roof for maintenance:
 - (i) provide access ladders and ships ladders; and
 - (ii) the minimum hatch size will be 762 mm x 762 mm.
- (10) Entrance Mat Wells
 - (A) Provide a recessed, integrated mat well at major entrances with built in drainage.
- (11) Revolving Doors
 - (A) Provide a motorized revolving door as appropriate in lieu of vestibules to deal with the climatic elements.
 - (B) If used, revolving doors to be integrated with entrance mat well system.
 - (C) Provide a two leaf revolving door system to allow for breakaway stretcher access as required.
 - (D) Provide an adjacent small vestibule beside revolving door to allow for revolving door maintenance without impacting entry.
- (12) Glass and Glazing
 - (A) Glass and glazing will comply with all applicable standards, including the Insulating Glass Manufacturers Association of Canada (IGMAC) Guidelines and the Glazing Contractors Association (GCA) Glazing Systems Specifications Manual.
 - (B) Exterior and/or interior glass and glazing may be provided as integral components of the exterior envelope, interior partitions and screens, exterior and interior doors, handrail balustrades, skylights and decorative and ornamental glazing.
 - (C) Provide assemblies that resist local seismic conditions as a post-disaster building as defined in the NBC.
 - (D) Provide assemblies that resist 1-in-100 year climatic events (with a safety factor).
 - (E) Use laminated safety glass in single-glazed skylights, entry doors and sidelights, or as the inboard light of a double-glazed skylight. Single-glazed skylights are not to be used when separating interior and exterior environments.
 - (F) For the Mental Health / Psychiatric Unit and Psychiatric Intensive Care Unit inpatient rooms, provide glass and glazing that meets the requirements of the Ministry of Health Hospital-Based Psychiatric Emergency Services Standards.

- (G) Mirrors
 - (i) For full wall unframed mirrors, use 6 mm thick minimum float glass backed with electrolytically-applied copper plating. Grind smooth and polish all edges.
 - (ii) For wall mounted posture mirrors, use framed type; one piece, stainless steel channel frame with a No. 1 quality, 6 mm thick float glass mirror backed with electrolytically-applied copper plating. Back with galvanized steel.
- (13) Finish Hardware
 - (A) Finish hardware will comply with all applicable standards, including the quality standards of the Door and Hardware Institute (DHI).
 - (B) Provide all finish hardware from one supplier that is a member in good standing of the Door and Hardware Institute (DHI) and has in its employ one or more AHC (Architectural Hardware Consultant).
 - (C) Hardware will be integrated with the security requirements and coordinated with electrical wiring and power requirements.
 - (D) See Appendix 3E [Door Operations Matrix] for additional requirements.
 - (E) Select finishes to provide maximum longevity and preservation of the finish.
 - (F) Provide, where applicable, ULC-listed hardware for the required fire rating.
 - (G) Use heavy-duty commercial quality hardware; locksets and latchsets fully mortised type and lever handles of solid material.
 - (H) All doors with maglocks must have a key override on both sides of the door.
 - (I) For special areas, provide hardware to suit the purposes unique to those areas, as identified in the user consultation process as described in Appendix 2B [User Consultation and Design Review]. Hardware in the Mental Health / Psychiatry Department will comply with the Ministry of Health Standards for Hospital-Based Psychiatric Emergency Services: Observation Units.
 - (J) All hardware, including door strikes, in special areas such as Mental Health/Psychiatry, will be ligature resistant.
 - (K) In areas such as Maternity, Newborn, and Pediatric Inpatient Unit, where infant and child abduction is a possibility, provide hardware that can Interface with an electronic child abduction system. This system is to be confirmed with the Authority.

- (L) Keying
 - (i) Match existing keying system and hardware.
 - (ii) Supply and install ASSA key cylinders, or pre-approved cylinders of equivalent quality, 6 pin (factory pinned).
 - (iii) Implement a 4-level system.
 - (iv) Keying groups will be assigned by the Authority.
 - (v) New key fittings will be given to and controlled by the Authority.
 - (vi) Develop a keying schedule in consultation with the Authority
 - (vii) Turn over keys from factory to the Authority.
 - (viii) Supply four (4) keys for each lock cylinder.

6.9 Finishes (Division 09)

(a) Basic Requirements

- (1) Provide interior finishes that are capable of being maintained throughout the Operating Period to meet all infection prevention and control requirements as well as all those of all other applicable codes, standards and legislation.
- (2) In areas where finishes and systems of installation will occur and water is anticipated to be present as part of cleaning or other procedures, allow water to collect and exit without causing damage to the finishes or substrate.
- (3) For areas in which wear is a concern, such as areas with anticipated pedestrian or wheeled traffic, use durable finish materials able to withstand damage and easily replaceable in sections if damage does occur.
- (4) Give priority to infection prevention and control in the selection of finishes for all patient care areas. Acoustic characteristics of finish materials will also be a priority consideration.
- (5) Select the appearance of finishes and colours to create and promote a natural healing environment, prevent glare, and minimize artificial lighting requirements.
- (6) Select materials to promote sustainability by, for instance, having low-emissivity or comprising of renewable resources.
- (7) Select finish materials that do not use known carcinogenic material or chemicals in their manufacture or disposal. Consult the Green Guide for Healthcare Version 2.2.

(b) Performance Criteria

(1) Interior Wall Framing

- (A) Interior wall framing will comply with all applicable standards, including the Canadian Sheet Steel Building Institute Standards (CSSBI) and the Association of Wall and Ceiling Contractors (AWCC) Wall & Ceiling Specification Standards Manual for materials and workmanship for interior walls, including steel studs and furring and gypsum board ceiling suspension systems.
- (B) System design and components will meet seismic restraint requirements for a post-disaster building where applicable.
- (C) Use prefabricated non-load bearing steel studs for interior partitions and furring with no axial load other than its own weight, the weight of attached finishes, and lateral loads of interior pressure differences and seismic loads.
- (D) Construct steel stud framing to accommodate electrical, plumbing and other services in the partition cavity, and to support fixtures, wall cabinets, medical equipment and other such wall-mounted items. Provide reinforcement and backing throughout.
- (E) Consider in design, the differences in air pressure that may result on opposite sides of the wall or partition due to factors such as wind and other lateral pressures, stack effects, or mechanically-induced air pressurization.
- (F) Coordinate with all supplied equipment to confirm location of wall mounts for equipment and furnishings. Provide backing for handrails, grab-bars, wall protection and other similar items. Identify areas for mounting artwork and other display items that would require backing and confirm with the Authority.

(2) Gypsum Board

- (A) Gypsum board will comply with all applicable standards, including the Association of Wall and Ceiling Contractors (AWCC) Wall & Ceiling Specification Standards Manual.
- (B) Gypsum board will be no less than 16 mm in thickness.
- (C) Use glass-mat faced gypsum board throughout interior. Glass-mat faced gypsum board requires a level 5 finish (skim coating).
- (D) Use cementitious backer board (tile backer board) behind ceramic wall tile in showers or other wet areas.
- (E) Provide abuse-resistant gypsum board or glass mat faced gypsum board in corridors with heavy patient, cart or equipment traffic, to be located on the bottom 1200mm of the corridor wall, in order to increase resistance to abrasion, indentation and penetration of interior walls.

- (F) Use glass mat surfaced gypsum sheathing board wherever exterior gypsum sheathing is required at exterior walls.
- (G) Provide airborne sound insulation for gypsum board/steel stud assembly to close off air leaks and flanking paths by which noise can go around the assembly. Make assemblies airtight. Do not locate back to back recessed wall fixtures such as cabinets or electrical, telephone and television outlets and medical gas outlets, which perforate the gypsum board surface. In addition, carefully cut any opening for fixtures to the proper size and appropriately seal piping penetration. Seal conduit/duct/piping penetrations with tape and fill at the plenum barrier. Make the entire perimeter of a sound insulating assembly airtight to prevent sound flanking. Use an acoustic caulking compound or acoustical sealant to seal between the assembly and all dissimilar surfaces (including at window mullions) in accordance with the recommendations of an acoustic consultant.
- (H) Ceilings will be fastened to suspended metal framing systems. 16mm glass mat faced gypsum board will be employed throughout, except that glass mat Type 'X' board will be used at scheduled wall and floor fire separations.

(3) Ceramic Tilework

- (A) Ceramic tilework will comply with all applicable standards, including the Terrazzo Tile and Marble Association of Canada (TTMAC) Specification Guide 093000 Tile Installation Manual.
- (B) In order to reduce opportunities for the spread of infection, avoid use of ceramic tile in interior applications at patient and other clinical areas, and if used limit to no more than 10% of such applications.
- (C) For installations on wet and exterior surfaces, use floor tiles that have the following static coefficients of friction as per the American Society for Testing and Materials International (ASTM):
 - (i) Level surfaces: Not less than 0.50 for wet and dry conditions.
 - (ii) Stair treads: Not less than 0.60 for wet and dry conditions.
 - (iii) Ramp surfaces: Not less than 0.60 for wet and dry conditions.
- (D) For exterior installations, provide frost-resistant exterior tiles with a moisture absorption rating of 3.0% or less.
- (E) Provide control joints and expansion joints in conformance with the recommendations of the TTMAC Tile Installation Manual.
- (F) Provide a waterproof membrane under ceramic floor and wall tile in showers and other wet areas. The membrane will be trowel-applied, built-up, liquid-applied or sheet-applied.

- (G) Provide crack isolation membranes to resist crack transmission from the substrate due to lateral movement; design for use in thin-set applications of tile over a cracked substrate. Use elastomeric sheets or trowel-applied materials suitable for subsequent bonding of ceramic tile.
- (H) Set ceramic tile with latex modified mortar and grout with epoxy grout.

(4) Ceilings

(A) Acoustic Tile Ceilings

- (i) Corridor areas and public type areas would have hospital grade accessible finishes which provide access to ceiling spaces for mechanical or electrical access.
- (ii) Acoustic ceiling tiles in metal suspension system will be used in at least the following locations:
 - 1) hallways;
 - 2) offices, meeting rooms;
 - 3) common lobby, admitting areas;
 - 4) waiting areas;
 - 5) quiet rooms;
 - 6) staff sleep rooms;
 - 7) medication rooms;
 - 8) coffee/gift shops;
 - 9) patient rooms;
 - 10) examination rooms;
 - 11) soiled, clean and storage rooms;
 - 12) patient and staff lounges; and
 - 13) other areas requiring a non-institutional finish.
- (iii) Acoustic panel: Non-directional, fissured pattern, imperial dimension white ceiling panel, trim edge detail (square) to fit a standard 15/16" T-bar grid panel size.
- (iv) Install acoustic ceiling tiles in the suspension system that comply with the minimum sound transmission ratings between spaces described in CSA Z8000 and Government of Alberta Infrastructure Technical Requirements for Healthcare Facilities "Blue Book", as modified by GNWT, and provide the levels of sound attenuation required to suit the intended function of the room.

- (v) Provide accessibility to the ceiling spaces where access is required to mechanical, electrical or other service systems.
- (vi) Special surface-treated ceiling tiles, such as mylar, vinyl-faced or metal-faced tiles, may be used where maintenance and ease of cleaning are priorities as well as the accessibility and acoustic requirements.
- (vii) Provide acoustical panels that are appropriate for the normal occupancy condition range of 15°C - 29°C and maximum 70% relative humidity. When the service use temperature and relative humidity are expected to exceed these ranges, consider use of acoustical units specifically designed for such applications.
- (viii) Use tiles with scratch-resistant surfaces in any area where lay-in ceiling panels frequently need to be removed for plenum access.
- (ix) For ceilings installed in food preparation areas, use acoustic panels capable of being cleaned without undue wear on the panel.
- (x) In the operating rooms, provide a gasketed, smooth, prefinished, metal panel t-bar ceiling system for easy access to the plenum, with an integrated ceiling solution for mechanical, electrical, overhead boom and surgical lighting systems. Provide this ceiling solution in high humidity areas.

(B) Hard Ceilings

- (i) Construct hard ceilings of 16 mm glass mat gypsum board where fire rating is not required. In fire rated rooms use type X glass mat faced gypsum board thickness to be determined by the rating required by the NBC. Finish hard ceilings as per the paint specifications outlined below. Skim coating required for all glass mat faced gypsum board. Provide hard ceilings for the following rooms:
 - 1) housekeeping and utility rooms;
 - 2) washrooms and shower rooms;
 - 3) procedure rooms and any other rooms where invasive procedures may be performed;
 - 4) sterile supply rooms;
 - 5) other areas where infection prevention and control may be an issue;
 - 6) air borne isolation and protective isolation rooms and anterooms; and
 - 7) other areas where infection prevention and control may be an issue.

- (C) In special areas such as Mental Health / Psychiatry, construct the ceiling in accordance with Ministry of Health Standards for Hospital-Based Psychiatric Emergency Services: Observation Units.
- (D) Access Panels
 - (i) Where hard ceilings are used, provide access panels to allow for mechanical and electrical servicing in the ceiling.
 - (ii) Access panels to be prefinished.
- (E) Ceiling Virtual Skylights
 - (i) Create photographic views of the natural landscape or sky view in the ceiling mounted in a rectilinear luminous sky ceiling type system.
 - (ii) Provide the luminous panels in a suspended ceiling grid system, with back lighting.
 - (iii) Integrate the ceiling virtual skylight system with the adjacent ceiling areas to create a calming distraction for patients lying on treatment tables.
 - (iv) Luminous panel surfaces to be smooth to facilitate cleaning.
- (5) Flooring
 - (A) All Rooms Except Wet Rooms:
 - (i) Use solid homogeneous sheet flooring unless specified otherwise.
 - (ii) Resilient flooring with integral cove base, homogeneous sheet flooring with heat weld joints, minimum thickness to be determined by usage environment and application. Flooring thickness and adhesive shall be appropriate for equipment/bed traffic where required.
 - (iii) Provide continuous coved bases 150 mm high, straight cut, finished with prefinished aluminum trim.
 - (iv) Use water soluble, low odour flooring adhesive.
 - (v) Where there is no existing product to butt against, finish edging finish with vinyl finishing strip as per manufacturers' specifications.
 - (vi) Finish flooring with high speed buffing as per manufacturers' specification. Do not apply sealer or wax.

- (vii) A rubber cove base may be applied in lieu of a continuous cove base in non-clinical administrative areas, except:
 - 1) in any enclosed room that contains a plumbing fixture;
or
 - 2) within 3 meters of a plumbing fixture located in a corridor or open area.

- (B) Wet Rooms
 - (i) Use slip-resistant solid sheet flooring (or an equivalent product approved in advance by the Authority) for all wet rooms.
 - (ii) Hot weld all joint seams.
 - (iii) Form coved bases 150 mm high, straight cut, finished with clear silicone caulking. Do not cap.
 - (iv) Use solvent based, low odour flooring adhesive.
 - (v) Hot weld new flooring to existing floor product.
 - (vi) Finish flooring as per manufacturer's specification. Do not apply sealer or wax.

- (C) Stair Covering
 - (i) Use one piece treads and sheet risers with carborundum strip or an alternate designed for the visually impaired (product approved in advance by the Authority).
 - (ii) Use water soluble, low odour adhesive.

- (D) Comply with all applicable standards, including the following:
 - (i) Backed sheet vinyl flooring (used in areas as required by the Design of Project Co): Conforming to ASTM F1303 and the following:
 - 1) Type: II – Through Design Wear Layer
 - 2) Grade: 2
 - 3) Class: A – Non-Asbestos Fibrous Backing
 - 4) Total Thickness: nominal 2.5 mm

- (E) In selecting flooring materials, consider cleaning and maintenance, pedestrian and rolling traffic, acoustics, infection prevention and control, and aesthetics.

- (F) Where epoxy flooring is used in wet areas, use water and slip-resistant grade and prevent water or moisture transmission to the substrate. Terminate flooring at the walls in the form of 150 mm high flash coves.

- (G) Use heavy-duty materials for flooring on which wheeled or service vehicle traffic is anticipated and to which wear and damage may result.
- (H) Use permanent, heavy-duty integral materials such as seamless epoxy quartz flooring for flooring in areas subject to moisture and heat over extended periods of time.
- (I) Use suitable flooring in patient and staff areas where cart or stretcher traffic is expected or where cleaning on a regular or emergency basis is necessary.
- (J) Use water resistant and slip-resistant flooring in public, staff, and patient washrooms.
- (K) Consider resilient tile products for flooring in service corridors and service areas.
- (L) Use anti-static flooring material for telecommunication rooms.
- (M) Gymnasium Flooring
 - (i) Provide a resilient vinyl surface multipurpose sport flooring surface.
 - (ii) Vinyl to be 5 mm thick minimum for shock absorption.
 - (iii) Select products with exposed surface having anti-bacterial properties to prevent entry of gram-positive and gram-negative micro-organisms. Weld all seams. Provide integral cove bases.
 - (iv) Static coefficient of friction of 0.6 on level surfaces.
 - (v) Heat weld all seam joints.
 - (vi) Form cove bases 150 mm high, straight cut, finished with prefinished aluminum trim.
 - (vii) Use solvent based low odour flooring adhesive.
 - (viii) Finish flooring with high speed buffing as per manufacturers specification.
- (N) Seamless Quartz Epoxy Flooring
 - (i) Standard epoxy type floor with integral base products on floors subject to thermal shock, excessive moisture. Example locations: entrance ways, ambulance bays
 - (ii) Provide seamless epoxy flooring with 100% solids, zero VOC, solvent-free comprised of a two-component epoxy primer, a two-component epoxy resin and curing agent, coloured quartz aggregate broadcast into both primer and undercoat, and a high performance, UV-resistant two-component, clear epoxy sealer. Provide integral cove bases.

- (O) Carpets and Carpet Tiles
 - (i) The use of carpets and carpet tile is allowed only in non-clinical, non-wet areas, such as:
 - 1) single and multi-occupancy offices;
 - 2) open office and administrative areas;
 - 3) conference and meeting rooms; and
 - 4) other similar administrative areas.
 - (ii) Carpet will be considered in Design development for isolated non-patient and non-clinical areas. Rolled carpet with a cove base is one option, but it requires in-situ cleaning. PVC backed carpet tile, can be easily removed for maintenance and cleaning with minimal downtime to the area.
- (6) Acoustic Treatment
 - (A) Design and construct the Facility to comply with the minimum sound transmission ratings between spaces described in CSA Z8000 and Government of Alberta Infrastructure Technical Requirements for Healthcare Facilities “Blue Book”, as modified by GNWT.
 - (B) In addition, provide acoustic treatment where sound attenuation, soundproofing, or other sound control measures are necessary to create a healing environment for patients and a safe and comfortable environment for staff and where confidentiality is required.
 - (C) Sound control will include:
 - (i) attenuation of sound within public, patient and staff environments;
 - (ii) sound isolation between the exterior and interior spaces;
 - (iii) sound isolation between interior spaces within the Facility at both horizontal and vertical separations;
 - (iv) sound and vibration isolation of Facility service noises and sound isolation of Facility service rooms; and
 - (v) sound isolation as required for specialty rooms such as video-conferencing.
 - (D) Design partition and ceiling construction to provide approximately the same degree of sound control through each assembly. When a partition is used for sound isolation, extend the sound control construction from slab to slab.
 - (E) Optimum sound isolation requires that the integrity of gypsum board partitions and ceilings (mass) never be violated by vent or grille cut-outs or by recessed cabinets, light fixtures, etc.

- (F) Where penetrations are necessary, minimize placing them back- to-back and next to each other. Stagger electrical boxes and medical gas outlets, preferably by at least one stud space. Use mineral fibre insulation to seal joints around all cut-outs such as electrical, TV and telephone outlets, plumbing escutcheons, recessed cabinets, and bathtubs. Use non setting acoustical caulking to seal where the gaps are too small to insert mineral fibre insulation.
 - (G) Minimize constructions such as ducts, rigid conduits, or corridors that act as speaking tubes to transmit sound from one area to another. At common supply and return ducts, provide sound attenuation liners at the diffuser and/or grill to maintain assemblies' STC. Seal around conduit.
 - (H) Isolate structure-borne vibrations and sound with resilient mountings on vibrating equipment to minimize sound transfer to structural materials. Provide ducts, pipes, and conduits with resilient, non-rigid boots or flexible couplings where they leave vibrating equipment; isolate from the structure with resilient gaskets and sealant where they pass through walls, floors, or other building surfaces.
 - (I) Use acoustic screens, vibration isolators, and carefully selected exterior equipment to prevent exterior noise that neighbours may find offensive.
- (7) Painting and Protective Coatings
- (A) Low emitting materials, paints and coatings where possible; and as follows:
 - (i) Architectural paints, coatings and primers: low VOC.
 - (ii) Anti-corrosive and anti-rust: low VOC.
 - (iii) Clear wood finishes, floor coatings, stains and shellacs: low VOC.
 - (B) Walls, doors and shelving: Use eggshell or semi-gloss for all walls, doors and painted shelving.
 - (C) Door frames and metal doors: Use semi-gloss for all door frames and metal doors.
 - (D) Wood finish doors: Use clear coat interior rub varnish for all wood finish doors.
 - (E) Paint grade doors: Use semi-gloss for all paint grade doors.
 - (F) Ceilings: Use eggshell paint for all ceilings.
 - (G) Floors, concrete:
 - (i) Use a 2-component (base component A, curing agent B).
 - (ii) Use a primer if part of coating system.
 - (H) Paint painted patient care areas with a semi-gloss finish.

- (I) Conform to all applicable standards, including the material and workmanship requirements of Master Painters Institute (MPI) Architectural Painting Specification Manual.
 - (J) Use exterior paints of a quality designed to protect substrate materials from weather and climate conditions.
 - (K) Use exterior and interior finish materials with surface finishes, either as integral to the finish material or field-applied separately to the surface of the finish material.
 - (L) Treat exterior masonry materials such as brick and concrete block with water-repellent coatings to prevent water ingress into or through the material.
 - (M) Provide a special protective coating on exterior and interior materials that are subject to corrosion from exposure to moisture or other corrosive agents, and where painting is deemed to be insufficient protection. Materials requiring a special protective coating include exterior and interior structural, galvanized, and miscellaneous steel.
 - (N) Use paints with a minimal VOC level in patient, staff, and public interior areas.
 - (O) Use interior paint materials of a quality to withstand regular or repeated cleaning as the function of the area dictates.
 - (P) Paint handrails, doors, and frames with a contrasting colour from walls in consideration of the visually impaired.
 - (Q) Do not use materials containing lead and mercury.
 - (R) Seamless epoxy wall coatings: provide a two-component, high solids, zero or low VOC, solvent-free, epoxy glaze wall coating that is seamless and abrasion, chemical, and UV-resistant.
- (8) Vinyl / Acrylic Wall Covering (Wall Protection)
- (A) Vinyl / acrylic high impact rigid sheet, nominal 0.040" (1 mm) minimum thickness with colour-matched vinyl/acrylic trim for joint/transitions.
 - (B) Furnish complete packaged system containing all primers and adhesive. Use non water-based and non-hazardous primer and adhesive materials.
- (9) Dry Erase Wall Covering
- (A) Provide as required throughout the Facility pigmented gloss vinyl wall covering presentation surfaces for dry erase markers, 0.61 kg/sq.m, non-woven backing.
 - (B) Provide trim and other accessories including but not limited to wall covering trim of anodized aluminum, low profile trim, plastic marker dispensers, dry erase markers (set of 4 colours), low odour, and eraser, magnets, clearer, towels.

6.10 Specialties (Division 10)

(a) Basic Requirements

- (1) Provide specialty products manufactured for the specific purposes intended, and installed in strict accordance with the manufacturer's directions.

(b) Performance Criteria

(1) Tackboards and Whiteboards

- (A) Provide, as required in the Equipment List of Appendix 2D [Equipment and Furniture]:

- (i) tackboard surfaces that allow pin penetration of the surface materials and have reasonable resistance to deterioration; and
- (ii) whiteboard surfaces that allow use of felt-type writing instruments and allow erasing and cleaning with minimal effort. Use porcelain ceramic on steel surface, magnetic, scratch and abrasion-resistant and have maximum contrast, glare control, and reflectivity.

- (B) Provide tackboards and whiteboards with extruded aluminum frames, accessory trays, map rails and map hooks.

- (C) Use non-toxic, water based lamination adhesive for tackboards and whiteboards.

(2) Projection Screens

- (A) Provide, as required in the Equipment List of Appendix 2D [Equipment and Furniture]:

- (i) projection screens mounted from recesses in ceilings or wall mounted; and
- (ii) where appropriate, provide for motorized screens.

- (B) Provide supports and power as required to coordinate with mobile or fixed projector units, including ceiling mounted projectors.

- (C) Provide for trims and finishes compatible with the design of the rooms.

(3) Compartments and Cubicles

- (A) Provide compartments and cubicles including toilet partitions, change cubicles, shower partitions, and other compartments and cubicles requiring privacy and security.

- (B) Provide exposed surfaces that are permanent, water-resistant, corrosion-proof, and readily cleaned and maintained.

- (C) Secure partitions and standards to the floor or ceiling structure, and in a manner to resist lateral loading and impact.

- (D) For compartment/cubicle doors, use material matching the partitions and include permanent, purpose-made hardware. Design doors and hardware to provide barrier-free access.
 - (E) Where appropriate and approved by the Authority, curtain tracks and curtains may be used in lieu of doors.
 - (F) Provide a mirror in all change compartments.
- (4) Toilet Partitions
- (A) Galvannealed sheet metal will conform to ASTM A653 with minimum ZF001 (A01) zinc coating. Finish in polyester, baked enamel or powder coating.
 - (B) For stainless steel, use Type 304 conforming to ASTM A240 with No. 4 finish.
 - (C) For plastic laminate, use Grade 10/HGS GP50 scuff-resistant, high pressure laminate, conforming to NEMA LD-3.
 - (D) Avoid use of particleboard core partitions.
 - (E) For fibre-reinforced plastic (fibreglass), use a moisture resistant grade.
- (5) Change Cubicle Partitions (excluding mental health areas)
- (A) Where not adjacent to showers, change cubicle partitions will comply with the above requirements for toilet partitions.
- (6) Shower Partitions
- (A) Use solid phenolic laminated thick stock, factory-laminated with decorative finish both faces of core and conforming to CAN3-A172 or NEMA LD3.
- (7) Corner Guards and Bumper Rails
- (A) Provide stainless steel corner guards and bumper rails in infection control sensitive areas, including without limitation:
 - (i) the Medical Device Reprocessing Department;
 - (ii) surgical suite corridors;
 - (iii) sterile storage areas;
 - (iv) dietary areas; and
 - (v) other areas with high risk of impact from utility cart traffic.

- (B) Provide heavy duty steel corner guards and bumper rails in utility areas, including without limitation:
 - (i) the Materiel Management Storage, Loading Dock and Marshalling areas;
 - (ii) utility corridors with heavy utility cart and pallet jack traffic;
 - (iii) laundry areas; and
 - (iv) utility shop areas.

- (8) Metal Lockers
 - (A) Provide individual and shared storage facilities in designated staff and patient areas in the Facility based on expected staffing requirements as described and as appropriate for operation of the Facility. Such storage facilities may be metal lockers and metal locker systems of sizes, numbers, and groupings as determined in consultation with the Authority. Lockers will include a mix of full height, half size and purse lockers.
 - (B) For sheet metal, use galvanized steel conforming to ASTM A653 with ZF001 (A01) zinc coating.
 - (C) Lockers will be placed on minimum 150 mm high masonry bases finished with cove bases integral with the floor finish.
 - (D) Lockers will fit tightly below gypsum board bulkheads or be complete with sloped metal tops.
 - (E) Finish steel surfaces with polyester baked enamel or powder coating.
 - (F) All single, double, or multiple-tier metal lockers for staff use will have digital electronic locks, number plates and hanging hooks.

- (9) Storage Shelving Systems
 - (A) Provide storage systems for materials in designated storage areas.
 - (B) Adjustable shelving systems may be specifically manufactured for storage purposes, such as plywood or steel-slotted angle industrial shelving for bulk materials of plastic laminate-faced plywood for clean storage.
 - (C) For mobile storage systems, provide a high-density system designed to make maximum use of available space by eliminating need for access aisle for each run of shelving. Install and brace systems to resist seismic loads. The mobile storage system to be either power assisted or to be easily operable without undue required strength by any person.

(10) Washroom Accessories

- (A) Provide washroom accessories as specified in the Equipment List of Appendix 2D [Equipment and Furniture] and this Schedule 3 [Design and Construction Specifications] in all public, patient and staff washrooms as required in accordance with the applicable high quality hospital standards. Determine the type, size, and number of accessories and placement on walls with regard for the numbers and categories of users, in consultation with the Authority.
- (B) Install washroom accessories to allow cleaning and maintenance of the accessory and surrounding wall area.
- (C) Accessories with appropriate safety features will be selected for Mental Health / Psychiatry and other areas where there is increased risk of patient injury and in accordance with Ministry of Health Standards for Hospital-Based Psychiatric Emergency Services: Observation Units.
- (D) Recessed dispensers (such as those for paper towels, soap and waste receptacle) will not be used.
- (E) Use commercial grade accessories free from imperfections in manufacture and finish.
- (F) Use fittings with concealed fastening for security and discouragement of tampering.
- (G) Staff and public washroom accessories will include the following:
 - (i) soap dispensers;
 - (ii) toilet paper dispensers;
 - (iii) paper towel dispensers – “hands free” type;
 - (iv) paper towel disposals (garbage bins);
 - (v) mirrors;
 - (vi) barrier-free grab bars (with integral tactile grip finish);
 - (vii) coat hooks;
 - (viii) sanitary napkin dispensers;
 - (ix) sanitary napkin disposals;
 - (x) baby change table; and
 - (xi) utility shelf.
- (H) Patient washroom accessories will include the following:
 - (i) soap dispensers;

- (ii) toilet paper dispensers;
 - (iii) paper towel dispensers;
 - (iv) paper towel disposals (garbage bins);
 - (v) mirrors;
 - (vi) handicap grab bars (with integral tactile grip finish);
 - (vii) coat hooks;
 - (viii) and utility shelf.
- (I) Shower rooms or showers in washrooms will include the following accessories:
- (i) shower curtain and track or rod as appropriate;
 - (ii) handicap grab bars; and
 - (iii) fold-down shower seat.
- (11) Elevated Access Flooring
- (A) Provide an elevated access flooring system (“**Elevated Flooring**”) where appropriate and approved by the Authority.
 - (B) The Elevated Flooring assembly will consist of modular floor panels laid out on a grid system, supported by and secured to the under-structure. Panels will be supported by an adjustable pedestal base that positively located, engages and secures panels and that accommodates horizontal grid members as required.
 - (C) The Elevated Flooring is to facilitate electrical, communication and computer service lines and mechanical ducting, and may service various areas as air supply or return plenums in the cavity portion below, provided that it fully accommodates the functional uses it serves above. The area below the Elevated Flooring may be a pressurized area.
 - (D) Panels will be easily removable by one person with standard tools and a lifting device and will be interchangeable, except for cut-out panels. Cut-out panels will be interchangeable with solid panels.
- (12) Cubicle Curtains
- (A) Provide and install hospital cubicle privacy curtain panels, curtain hooks, ceiling mounted tracks, wall flanges, angle brackets, ceiling flanges, end stops, T plates, 4-way plates and all other accessories as required, in consultation with the Authority.
 - (B) Provide the number of cubicle curtains required to fully enclose the opening, with a minimum of three sets of curtain panels for each location.

- (C) Curtains will comply with CAN/ULC S109-03 Flame Tests of Flame Resistant Fabrics and Films.
 - (D) For cubicle tracks, use extruded, anodized aluminum, entirely enclosed except for the track guide.
 - (E) Use cubicle carriers composed of a non-binding, abrasion-resistant, nylon block supported from self-lubricating bearings by two nylon wheels with a free-moving plated swivel-hook assembly. Fit one end of each track with a removable end stop to permit simple carrier replacement. Use anodized aluminum splicing clamps. Use factory-curve tracks.
 - (F) Curtain and curtain track will be structurally supported.
 - (G) Provide cubicle curtains in the following locations:
 - (i) inpatient bedrooms and treatment bays in the General Medical and Surgical Inpatient Units, ICU / Telemetry Unit and Maternity Newborn and Pediatric Units;
 - (ii) the Emergency Department at stretcher, bed and chair bays, treatment areas, holding spaces, examination rooms, procedure rooms and trauma rooms;
 - (iii) the Cast Clinic at stretcher treatment bays;
 - (iv) Diagnostic Imaging at change cubicles;
 - (v) Ambulatory Clinics / Outpatient Procedural Care at change cubicles, treatment bays, procedure bays and examination rooms;
 - (vi) Surgery Day Care at stretcher bays;
 - (vii) Surgical Suite PARR bays and Pre-Operating holding bays;
 - (viii) Cardio Pulmonary Diagnostics at change cubicles and holter monitoring and stress test areas;
 - (ix) Therapy Services at change cubicles; and
 - (x) any other location identified in the Clinical Specifications.
- (13) Shower Curtains
- (A) Provide shower curtains and track in the following locations:
 - (i) General Medical and Surgical Unit at inpatient washrooms;
 - (ii) ICU/Telemetry / Unit at inpatient washrooms; and
 - (iii) Maternity Newborn and Pediatric Unit inpatient washrooms.

- (14) Privacy Glazed Partitions
 - (A) Provide fixed glazed partitions in open bed bays in accordance with the Clinical Specifications.
 - (B) Fixed glazed partitions to allow for enhanced patient acoustic privacy while allowing for visual supervisions by staff.
- (15) Folding Panel Partitions
 - (A) Provide folding panel partitions with acoustic seal for subdividing areas into separate rooms in accordance with the Clinical Specifications.
 - (B) Provide an access door in the folding panel partition, as per the Clinical Specifications, to allow access from room to room.
- (16) Inpatient Bed Headwalls
 - (A) Design the headwalls in consultation with the Authority.
 - (B) In private inpatient rooms, design the head wall adjacent to the inpatient bed:
 - (i) to allow for one oxygen connection, one medical air connection and one vacuum connection on each side of the bed, for a total of 6 medical gas outlets;
 - (ii) to meet or exceed all relevant CSA and ULC codes and regulations for the full range of requirements for an acuity adaptable direct patient care area and environment;
 - (iii) to provide all rails, accessories and backing required for mounting monitors, baskets, and other equipment as required,
 - (iv) to provide bed dock locators behind the bed,
 - (v) to allow for the required data, communication and electrical power outlets on both sides of the bed;
 - (vi) to provide one enhanced nurse call patient station with four call buttons including code blue; and
 - (vii) so that medical gases, service outlets, rails, equipment and accessories are provided in a horizontally configured modular system, which may be either a horizontal modular headwall strip or a complete wall unit.
 - (C) In bariatric rooms provide two headwalls that comply with the requirements, one behind the bariatric bed and the other on the opposite wall, in order to support a second inpatient bed during over capacity.
- (17) Mail Slots
 - (A) Provide mail slots that are a minimum of 25mm wide, 350mm high and 400mm deep, in locations identified in the Clinical Specifications.

6.11 Equipment (Division 11)

- (a) Refer to Section 7 Equipment Supply and Installation of Schedule 2 [Design and Construction Protocols] and the respective Appendix 2D [Equipment and Furniture].
- (b) Equipment Supports
 - (1) Provide equipment supports for equipment outlined in Appendix 2D [Equipment and Furniture], with proper backing and structural reinforcing as described in Section 5.3 Post Disaster Requirements.
- (c) Patient Lifts
 - (1) General: Design and construct the Facility to include patient lifts. Refer to Appendix 2D [Equipment and Furniture] and the Equipment List for responsibilities related to patient lift motors, carry bars, and chargers. Provide all equipment and components not specifically listed in the Equipment List as required to integrate the patient lift equipment into the Facility, including tracks and docking stations for all patient lifts. All patient lifts should be the type and weight requirements outlined in Appendix 3A [Clinical Specifications].
 - (2) Bariatric patient lifts: Design and construct the Facility to include ceiling-mounted X-Y gantry track patient lift systems, that have a patient load bearing capacity of 454 kg, at the inpatient room locations indicated as bariatric in Appendix 3A [Clinical Specifications]. Design and construct all bariatric patient lift systems so that any traverse will accommodate safe transfer of a bariatric patient by two Authority staff members.
 - (3) Non-bariatric / standard patient lifts: Design and construct the Facility to include non-bariatric patient lifts that have a patient load bearing capacity of 284 kg. Design and construct all non-bariatric patient lift systems so that any traverse will be manual and will accommodate safe transfer of a patient by one Authority staff member.
 - (4) Design and construct the Facility so that ceiling heights in all rooms containing patient lifts will accommodate patient mobility on lifts when using specialized ambulatory slings and carry bars and so that a patient's lower limbs will clear the edge of bed/stretcher/tub during seated transfers.
 - (5) Design and construct patient lift systems for all areas requiring Safety Features, as outlined in Appendix 3A [Clinical Specifications], according to Section 5.4(e)(1)(E) of this Schedule 3 [Design and Construction Specifications] and as per industry best practices.
 - (6) Undertake final design of all patient lift systems in consultation with the Authority and patient lift equipment suppliers.
- (d) Window Washing Systems
 - (1) Provide equipment or appropriate anchors to facilitate window washing.

(e) Loading Dock Equipment

- (1) Provide a loading dock that:
 - (A) at a minimum provides two loading bays, each with a pit style dock leveler, and one loading bay at grade, and meets the functional requirements of Appendix 3A [Clinical Specifications] for loading areas, marshalling and waste management;
 - (B) is designed to support Project Co's configuration of support services;
 - (C) is designed to support the operations of Project Co and the Authority;
 - (D) provides clear segregation for movement of clean and soiled items; and
 - (E) provides access stair and ramp access.
- (2) The loading dock will be an external covered area, with a 14' high overhead clearance.
- (3) Provide lighting over the loading dock to allow night time functionality.
- (4) The loading dock platform will be 1200mm higher than the truck bay.
- (5) Dock bumpers: Provide a dock bumper at each truck bay equipped with a built in dock leveler.
- (6) Dock leveler: Provide pit style dock levelers for the Facility at the loading dock area to facilitate deliveries.
 - (A) The dock leveler is to be a hydraulic style lift system, equipped with a push button remote control.
 - (B) Assume an operational maximum tilt of 10 degrees for the dock leveler, based on a 52" – 55" high truck bed.
 - (C) Provide each dock leveler with a minimum lifting capacity of 22,727 kg.

(f) Additional Truck Delivery Bay

- (1) Provide a truck delivery area that is additional to the loading dock, for the transport of cadavers to and from the Morgue.

(g) Scissor Lifts

- (1) Provide a permanent, hydraulic style scissor lift in the following locations:
 - (A) Equipment Depot Mezzanine;
 - (B) Equipment Maintenance Mezzanine;
 - (C) Materials Management; and
 - (D) Truck Delivery Bay.

- (2) The scissor lift will have the height extension required to reach to the mezzanines.
 - (3) Design the scissor lift to fit in the floor slab recess to ensure its platform is flush with the finished floor level.
 - (4) Each scissor lift will have the following features:
 - (A) a push button remote control;
 - (B) warning lights and sirens for use when the unit is in operation; and
 - (C) a swing gate to allow easy access to the platform.
 - (5) The scissor lift platform for the Truck Delivery Bay will be 1200mm x 2400mm with minimum lift capacity of 1000kg.
 - (6) The scissor lift platforms for the Equipment Depot Mezzanine and Equipment Maintenance Mezzanine will be 900mm x 1200mm with a lift capacity of 400kg.
- (h) Biohazardous Waste Refrigerated Storage Room
- (1) Provide biohazardous waste storage, as set out in the Clinical Specifications, that:
 - (A) has a floor drain and interceptor for spill containment;
 - (B) provides temperature containment in the room with prefabricated refrigeration panels, sized to suit;
 - (C) is an integrated packaged unit, complete with lighting, doors and hardware; and
 - (D) meets the hardware requirements set out in Appendix 3E [Door Operations Matrix].
- (i) Refrigerated Body Holding Room
- (1) Provide body holding storage, as set out in the Clinical Specifications, that:
 - (A) has a floor drain and interceptor for spill containment;
 - (B) has flush finished floor access to the body holding room, with recessed floor slab for floor insulation as required;
 - (C) accommodates the equipment designated for this room as set out in the Equipment List of Appendix 2D [Equipment and Furniture];
 - (D) provides temperature containment in the room with prefabricated refrigeration panels, sized to suit;
 - (E) is an integrated packaged unit, complete with lighting, doors and hardware; and

- (F) meets the hardware requirements set out in Appendix 3E [Door Operations Matrix].
- (j) Overhead Service Columns
 - (1) Provide, in consultation with the Authority, in the locations specified in the Clinical Specifications, overhead service columns as follows:
 - (A) coordinate the overhead service column placement in the room with other ceiling elements, including patient lift tracks, lights and diffusers;
 - (B) provide articulated service columns as required by Authority to ensure an adequate range of coverage and flexibility for the care of the patient; and
 - (C) determine the electrical services, medical gas outlets, accessories and equipment supports to be accommodated by the service column based on the information provided in this Schedule and its Appendices and the user consultation process.

6.12 Furnishings (Division 12)

- (a) Millwork, Modular Casework, Clinical Systems Furniture, and Systems Furniture
 - (1) Project Co will provide and install all millwork, modular casework, clinical systems furniture, systems furniture, and accessories as required to support the programs and functions described in the Clinical Specifications or as required to support the operation of the Facility.
 - (2) Project Co. may use millwork, modular casework, clinical systems furniture, and systems furniture interchangeably to satisfy the requirements of the Clinical Specifications and industry best practices. Submit an initial layout and configuration for review by the Authority.
 - (3) Project Co, in consultation with the Authority and during the user consultation process described in Appendix 2B [User Consultation and Design Review], will establish which option (millwork, modular casework, clinical systems furniture, or systems furniture) best meets the Authority's functional needs for each space and will achieve the most appropriate level of flexibility, re-configurability, serviceability, and reusability between all areas of the Facility.
 - (4) Millwork means custom fabricated wood or metal cabinetry and counter components and accessories that are installed with little or no modification. Millwork or casework may require mechanical, electrical power, and data service connections.
 - (A) Millwork or casework components can include, but are not limited to, work surfaces (such as counters and work benches) and storage (such as cabinetry, files, drawers, wardrobes, and cabinets).
 - (B) Without limitation, provide the following as millwork:
 - (i) kitchen and pantry counters, upper and lower cabinets, drawers and shelving;

- (ii) utility room counters, storage cabinetry and shelving;
 - (iii) patient room lockable wardrobes, including shelving, drawers, coat rods, counters and cabinets; locks will be digital electronic;
 - (iv) workroom counters and storage;
 - (v) security kiosks;
 - (vi) vanity counters containing sinks;
 - (vii) reception desks;
 - (viii) charting stations; and
 - (ix) central staff work areas.
- (5) Modular casework means a composition of factory produced, quickly installed parts that are easily replaceable, reconfigurable and interchangeable. Casework can be rearranged to change configuration or to include additional modules as needed.
- (A) Without limitation, provide the following as modular casework:
- (i) lab casework;
 - (ii) pharmacy casework;
 - (iii) medication room work surfaces, upper and lower cabinetry, shelving and storage components;
 - (iv) clinical, exam and treatment room counters, upper and lower cabinets, shelving and storage;
 - (v) housekeeping/special storage;
 - (vi) clean rooms; and
 - (vii) soiled rooms.
- (6) Clinical systems furniture means a factory produced, component system designed to be replaceable, reconfigurable, and interchangeable, and designed for specific use in health care facilities. Clinical systems furniture can be rearranged to change the configuration or to include additional modules and accessories as necessary. Clinical systems furniture requires electrical power and data service connections.
- (A) Without limitation, use clinical systems furniture for the following:
- (i) nursing workstations;
 - (ii) charting alcoves;
 - (iii) triage desks;

- (iv) unit clerk stations;
 - (v) team care stations;
 - (vi) registration cubicles;
 - (vii) adjustable height workstations;
 - (viii) reception desks; and
 - (ix) information desks.
- (B) Provide all accessories, storage, cabinetry, upper and lower shelving, keyboard trays and counters necessary to facilitate efficient healthcare/clinical operations and provide maximum adjustability and flexibility.
- (7) Systems furniture means a composition of factory-produced wall mounted or partition components that are easily reconfigurable and interchangeable. Systems furniture is designed for office or commercial use and includes accessories and attachments which complete its functionality. Systems furniture requires electrical power and data service connections.
- (A) Without limitation, use systems furniture for the following:
- (i) cubicle partitions;
 - (ii) reception desks;
 - (iii) information desks;
 - (iv) work/study carrels; and
 - (v) high density shelving.
- (b) Furniture
- (1) Furniture means loose or unattached items that can be rearranged to suit various activities and includes:
- (A) coffee tables and side tables;
 - (B) unattached seating (such as chairs and stools); and
 - (C) office desks.
- (2) All furniture and millwork supplied will the requirements outlined below:
- (A) Flexibility
- (i) Products must offer modular solutions that will enable flexibility and LEAN principles to be practiced. Furniture pieces will:
 - 1) allow for individualization;

- 2) possess the ability to be used in different applications or flex easily for future use (provide ease of adjustability); and
- 3) use non-handed solutions that work in multiple configurations, when possible.

(B) Durability

- (i) Activity, waiting, and dining room furniture will be engineered for high traffic use and durability within a healthcare environment.
- (ii) Patient room furniture will be designed in conjunction with healthcare professionals and facility residents and be tested to ensure durability, infection protection and control, and function.
- (iii) Furniture will conform to Upholstery Section under "Cleaning and Ease of Maintenance" for additional criteria related to durability.

(C) Construction

- (i) The quality and make of the product (its construction, finish materials, and maintenance requirements) will be suitable for long term use and be designed for intense performance.
- (ii) Products with sturdy, strong-engineered, replaceable components are preferred.
- (iii) Wood furniture should be avoided, particularly in clinical areas (such as patient rooms, waiting rooms, unit offices, nurses' stations, staff rooms, and conference rooms). Where utilized, wood pieces will be constructed of:
 - 1) Solid wood frames of kiln dried wood for added strength and long term durability.
 - 2) Frames capable of supporting varying weights and body types, and offering ease and reassurance to both patients and care providers.
 - 3) Wood completely coated over with an acceptable chemical resistant grade treatment.
 - 4) Plastic laminates can be used in place of real wood when a wood-look is desired.

(D) Seating

- (i) In waiting room and patient seating, steel tube construction and spring-seat construction are preferred.
- (ii) Seating with wall-saver legs or a wall-saver back design is preferred.

- (iii) Seating products with arms will include polyurethane arm caps rather than upholstered arm caps.
- (iv) See upholstered notes referenced throughout this document for information on upholstered seating products.
- (v) Seating should accommodate multiple users and continual 24 hours a day/7 days a week usage with warranties that ensure durability and longevity.
- (vi) Provide bariatric supported seating as well as typical healthcare seating with all seating made of sturdy construction and weighted to prevent tipping.

(E) Tables

- (i) For durability in waiting rooms and high traffic areas, horizontal table surfaces of solid surface material tops or plastic laminate are preferred.
- (ii) Wood completely coated over with an acceptable chemical resistant grade treatment can be used on vertical surfaces if plastic laminate is not available.
- (iii) Edges will feature an ergonomic profile for user comfort and be of durable material composition and construction.

(F) Workstations/Desks

- (i) Refer to individual specifications for material composition and finish information.
- (ii) When installed, two adjoining end panels of work surfaces will be leveled so work surfaces sit at the same height.
- (iii) Tackboard, if specified with desk and/or workstation, between hutch and worktop, will span from work surface top to underside of overhead cabinetry leaving no visible gaps, while, at the same time, managing task light wires, if specified with assembly.
- (iv) Front edge of keyboard platform will be set back from front edge of work surface and/or table.
- (v) All exposed work surface edges to have a rounded or waterfall edge.
- (vi) Any “smart” or “hardwired” furniture will be fully coordinated for proper circuitry and any other building requirements. Wire management to be hidden from view but accessible.

(G) Filing / Storage

- (i) Filing is for letter filing, unless specified otherwise. In order to maximize filing capacity, files will be set up for side-to-side filing.

- (ii) During installation, the conversion parts of the files will be left in the file to allow for front-to-back / side-to-side conversion at a later time.
 - (iii) Filing will be equipped with hanging frames and dividing bars at the time of installation.
 - (iv) At a minimum, two-drawer files will include a counter-balance package as recommended by the product manufacturer.
 - (v) Lockable storage will be keyed as per the Facility keying system. Keying schedule is to be determined with the Authority.
 - (vi) Handles to be ergonomic and ADA approved.
- (H) Cleaning and Ease of Maintenance
- (i) The size, shape, and design of the furniture will allow easy access for cleaning.
 - (ii) Materials, upholstery, and finishes will be capable of withstanding institutional grade detergents, cleaners, and disinfectants with no effect on the appearance, integrity, or life of the product. Selection will be based on the understanding of the principles of decontamination and maintenance requirements (able to withstand multiple applications of diluted disinfectants over time).
 - (iii) Manufacturers will need to provide detailed cleaning and disinfection guidelines prior to purchase along with a thorough listing of which cleaning products can be used on their products. Review instructions to ensure they are clear and cleanable with Authority approved detergents and disinfectants.
 - (iv) Other upholstered soft furnishings will have the following characteristics:
 - 1) Be seamless where possible or have double stitched seams, to prevent fluid penetration, located on the non-contact areas of the furniture or sealed.
 - 2) Upholstery detail to be minimal to allow for ease of cleaning and prevent build-up of material in fabric.
 - 3) Upholstered furniture in care areas will be covered with fabrics that are fluid-resistant, non-porous and can withstand cleaning with hospital grade disinfectants.
 - 4) Seating will have removable seat cushions within the field for cleanability and/or "clean-out" spaces between the seat and back and arms for lounge seating applications.

- 5) Seating will have removable upholstery covers for both the seat and back, if applicable. Attic stock of the removable upholstery covers will be ordered with the original purchase, in the amount of 5% of the total waiting room and patient room seating.
 - 6) Have high-density foam cores with a moisture barrier and resistance to mold.
- (v) Upholstery will:
- 1) be impermeable to water and quick-drying;
 - 2) be anti-microbial, and/or have anti-microbial inhibitor nanotechnology;
 - 3) have a good abrasion rating for areas of high-use and abuse (with a minimum to meet or exceed 100,000 DR (ASTM D4157- 02 Wyzenbeek Test Method);
 - 4) have a high-rating for color-fastness, exceeding 40 hours (AATCC Method 16A);
 - 5) have light-fastness for Northern demographic climates to avoid fading and discoloration;
 - 6) have stain-resistant treatments within the weaving process (avoid topical treatments that can wear over time);
 - 7) be latex-free;
 - 8) have low volatile organic compounds;
 - 9) contain no heavy metals;
 - 10) have no halogenated flame retardant materials or perfluorinated chemicals; and
 - 11) have limited use of polyvinyl chloride, avoiding use of polyvinyl chloride where possible.
- (l) Infection Prevention and Control
- (i) Organic finish substances (e.g. wood), which can be exposed to a liquid, and upholstered furnishings, will be avoided, or at least minimized, in areas where immune-compromised patients are present.
 - (ii) The use of impermeable upholstery (such as vinyl) is permitted in high-risk areas. High-risk applies to any areas specifically used by patients/residents/clients (including patient rooms and waiting rooms) and any area where a healthcare worker goes after providing direct patient care (including nursing station, staff lounge, report area, conference rooms and offices within patient care areas). Higher grade polyurethane fabrics are preferred (to avoid splitting), if they meet the requirements of the application.

- (iii) Durable, cleanable fabrics are appropriate in low risk areas. A low level of risk applies to any office areas where staff members are not providing direct patient care, or return to after providing direct patient care.

(J) Sustainability

- (i) Products will be GREENGUARD certified, and be designed to achieve reduced environment impact.
- (ii) If wood products are used, where possible, lumber will come from responsibly managed forests with FSC woods, with each piece utilized to its full capacity. Wood will have low formaldehyde emissions with little to no CFC's used in the production of the materials.

(K) Comfort, Ergonomics, and Safety

- (i) Waiting room furniture will be designed to promote comfort and long term durability.
- (ii) The product construction and design should avoid stress and fatigue to the patient.
- (iii) Seating will have the stability and engineering to assist the patient or visitor in entering and exiting the chair.
- (iv) All items of furniture (including tables) will be stable and will not move or tip over when touched by a person requiring support.
- (v) Furniture will not constitute a hazard for persons who have visual limitations and will be usable by persons with varying abilities and disabilities.
- (vi) Products will accommodate and facilitate comfort and well-being.
- (vii) Back support will be provided on seating pieces, through the use of a high or mid back, to provide adequate back support to various populations.
- (viii) A minimum of 20% of seating will be designed to meet bariatric requirements of 600 lbs.
- (ix) Task seating will be ergonomically correct with respect to the seat height and pan depth. Seating will be height adjustable, with height adjustable lumbar support to maintain correct body alignment, adjustable back rest tilt, adjustable seat pan depth, height, width, and swivel adjustable armrests. The seat pan will have a waterfall edge on the seat pan or a radius front seat cushion to avoid restriction of circulation to the lower legs. The overall dimensions will be appropriate for the vast majority of users. Task seating within the clinical areas should accommodate multiple users and continual 24 hours a day/7 days a week usage.

- (x) General meeting room seating will have a backrest recline function, be stackable, mobile, cleanable and durable.
 - (xi) Boardroom/conference room seating will be height adjustable, feature a backrest recline function, be mobile, cleanable and durable.
 - (xii) Waiting room seating will include armrests to aid sitting and standing and have a raised seat pan for hip and knee considerations.
 - (xiii) All behavioural areas will receive furniture that are not harmful or will not allow patients to injure themselves or others. Security and safety are the main concern.
- (L) Office and Workstation Allocation Guidelines
- (i) Single-user or multi-user workstations for computer, reading, and writing:
 - 1) Height: Allow leg clearance and movement under the work surface and keyboard to be placed at elbow height for most users (27- 1/4 inches, 692 mm). Work surface to have adjustability for varying heights.
 - 2) Depth: Allow room for keyboard, document holder between the keyboard and monitor and monitor positioned for comfortable viewing (30 inches, 760 mm). Additional depth may be required depending on the tasks completed at the workstation.
 - 3) Width: Accommodate keyboard and mouse, telephone, writing and reading areas (min. 27.6 inches, 700 mm). Additional width depending on tasks completed at the workstation.
 - (ii) Verify field measurements to ensure proper clearance for fitting items per the specifications and drawings.
- (M) Supplemental Standards and/or Guidelines:
- (i) In addition to the above listed features, furnishings will be designed and specified in accordance with all appropriate ergonomic design principles and best design practices of the Authority. Products will also meet minimum criteria set out in the NBC and in accordance with the Safety Act (Northwest Territories) and all applicable occupational health and safety requirements and codes of practice in the Northwest Territories.

- (ii) The Facility and its components must be accessible by people with different functional capacities including, children, the elderly, handicapped, and the disabled as defined in NBC. Apply “universal design” principles in the design and planning to ensure the furnishings are usable by all people without the need for specialized design or adaptation. Counters, desks, and work surfaces in non-office areas will include wheelchair access for both patients and the public.
 - (iii) Products, including foam and panel upholstery, will be fire retardant to meet applicable building code requirements.
 - (iv) In undertaking the design and construction of work stations, utilize best practices with regards to human comfort and ergonomics.
 - (N) Furniture List and Specifications
 - (i) The furniture is described in the Equipment List, in Appendix 2D [Equipment and Furniture], in generic terms and by a furniture identification number. Existing furniture that can potentially be reused and/or relocated has also been identified. The quantity column demonstrates the proposed number of identical items in a room. All room numbers, room names, and department names are the same or are derivatives of the Clinical Specifications.
 - (ii) Furniture pieces and layouts will follow the accessibility principles of the Facility as a whole. Refer to Accessible Design Section 3.10.
- (c) Laboratory Casework
 - (1) General Approach
 - (A) Provide laboratory casework:
 - (i) for the specific and particular functions to be performed by the casework;
 - (ii) to give the end users a good working ergonomic environment that is suited to their specific needs; and
 - (iii) with structural rigidity and chemical resistivity to withstand the service conditions for which they are exposed.
 - (B) All casework will be modular and consistent throughout the Facility. Combination of floor mounted casework and leg frame casework. Sit / stand capabilities to be determined specific to the user.
 - (C) All casework will be lockable and keyed to Facility standard.

- (D) Casework will be wood, metal and/or epoxy resin, selected to minimize cleaning and maintenance operations and maximize infection control capabilities. Refer to Section 6.6 Wood, Plastics and Composites (including Millwork) (Division 06) regarding use of wood.
 - (E) All epoxy resin material bench tops will be acid and heat resistant.
 - (F) Provide all lab benches with cabinets for approximately 50% of the length of the benches.
 - (G) Lab bench systems will hide and organize the supply of instrument tubing, gases, suction, valves, electrical and/or communication/data cables, outlets, boxes, and services that each department requires within a concealed service trough.
 - (H) Casework will comply with all applicable standards, including:
 - (i) at a minimum, the quality standards of the Architectural Woodwork Manufacturer's Association of Canada (AWMAC) for Premium Grade; and
 - (ii) the NBC, GNWT, and City of Yellowknife "barrier free" requirements.
 - (I) Use non-toxic, non-solvent adhesive glue complying with AWMAC Quality Standards Manual, and that of Canadian "Eco-Logo" program or equivalent, with a Total Volatile Organic Compounds (TVOC) emissive content of 20 gr/litre.
 - (J) Provide casework anchorage that complies with the seismic restraint requirements of NBC.
 - (K) Provide casework stabilization and securement to avoid or eliminate vibration from equipment such as centrifuges, etc.
 - (L) Steel for cabinet construction for laboratory casework will be levelled prime quality furniture grade cold rolled steel, with 0 to 12" (305mm) adjustable levelers.
- (2) Cabinets
- (A) Cabinet parts and sub-assemblies (doors, drawers, tracks and back panels) will be interchangeable in the field without requiring special tools. Doors and drawers will be interchangeable with like-sized cabinets. Cabinets will be constructed so that a standard height drawer can be removed and two ½ height drawers installed in its place. Likewise, a cupboard door or doors can be removed and replaced by a like-sized combination of drawers or vice versa. This interchangeability will permit rearrangement in the field of all components in addition to being able to relocate the entire cabinet, should changing needs dictate a revision in the layout of cabinets.
 - (B) Cabinet size to be manufacturer typical within a 6" (152mm) increment. Cabinet depth to be determined upon approved layout.

- (C) All cabinets are to be enclosed with lockable doors; hardware will be stainless steel.
- (D) Provide modesty panels where the back of the benches are exposed.

(3) Wood Laboratory Casework

- (A) Cabinetwork and framing system will be constructed of prime grade selected materials to conform to AWMAC Premium Grade; Flush Overlay Cabinet construction.
- (B) Fabricate cabinets and cases as self-contained modules and in accordance with the best practices of the wood laboratory furniture industry. Finish exterior and interior surfaces to allow for relocation without the need of additional finishing.
- (C) Assemble units with concealed fasteners, or glued and screwed construction, making each unit rigid and self-supporting for use interchangeably in an assembly or for single unit use.
- (D) Use epoxy resin counter/bench tops and splash backs, to be provided in minimum two different colours, black in microbiology and different for the remaining use.
- (E) Finish exposed wood surfaces with a polymerizing two-component catalytic conversion varnish system specially formulated for chemical reagent resistance. The individual components will be chemically compatible to assure perfect adhesion and a top quality, durable finish.
- (F) Upper cabinets to have tempered glazed doors, adjustable shelving, and sloped tops.

(4) Stainless Steel Casework

- (A) Fabricate from Type 316L, 18 gauge, No. 4 finish stainless steel.
- (B) Corners will be welded, ground, polished and crevice-free. Joints and welds will be polished to a uniform No. 4 satin finish. No filler or solders will be used. Straight lengths will be one-piece with all seams, including field joints, welded.
- (C) Sound-deaden tops and reinforce with waterproof plywood core, bonded to tops with waterproof contact cement. Seal underside of top (plywood core) with a waterproof finish. The front edges of the tops will be marine edge. Form splashback as an integral part of the tops, radiused where the splashback occurs in the top. Bond all splashbacks to plywood core, bonded the same as specified for the tops. Fabricate countertops, splashbacks, and front aprons out of one piece of stainless steel. Weld counter and sink assemblies into single units without seams or joints. Drill splashbacks, tops and sinks to receive plumbing and electrical fittings.

- (D) Form integral sinks with all-welded rounded corners, seamless construction with all traces of welding removed. Weld stainless steel sinks integrally into tops without seams or joints. Slope tops for sinks and adjacent drain boards to sinks. Provide sinks with drain outlets with removable stainless steel strainer. Stainless steel bench and or counter tops are required where staining or similar procedures are performed.

(5) Leg Frame Laboratory Casework System

- (A) The leg frame system will provide complete independent rigid support for all overhead shelving, undercounter suspended cabinets, service cover panels, countertops, sinks and fittings including all mechanical and electrical line work, as necessary to make the assembly operational.
- (B) The concept will permit the addition, relocation or removal of suspended base cabinets, the removal of the entire leg frame module including base cabinet and countertop, leaving intact the separate service strip with all its service fittings, service lines and cover panels as a finished operational component. The countertop height will be designed to be from desk to counter height adjustable without the addition of framing components.
- (C) Base framing modules on basic standard cabinet modules.
- (D) Steel frame will comprise vertical wall channels and independent self-contained pipe chase and leg sets which will allow for the removal and/or interchange of work surfaces, and suspended under-counter mounted cabinets and upper shelving. Determine pipe chase location in consultation with the Authority.
- (E) Fabricate system from prime quality furniture grade cold rolled steel. Form all components to create a rigid interlocking structure. All services will be fully accessible through removable cover panels, no special assembly tools are required. Bench legs to be fully adjustable. All legs will have leveler bolt. Suspended cabinets will be interchangeable and easily moved from workstation to workstation. Adjustable leg frame modules will be capable of adjusting countertop heights in 25 mm increments from 750 mm height up to 1100 mm height.
- (F) Finish for steel surfaces will be as specified above.

(6) Miscellaneous Accessories

- (A) Laboratory casework will include the following accessory items:
 - (i) countertops and splashbacks;
 - (ii) service fittings;
 - (iii) drying racks;
 - (iv) pegboards;
 - (v) acid storage cabinets;

- (vi) solvent storage cabinets;
- (vii) chemical/biohazard storage;
- (viii) flammable storage;
- (ix) fire cabinet for explosive storage;
- (x) glassware drying cabinets;
- (xi) framed sliding glass doors;
- (xii) sliding glass doors;
- (xiii) open storage units;
- (xiv) emergency eye wash;
- (xv) emergency shower head;
- (xvi) safety shower station;
- (xvii) bin cabinets;
- (xviii) file drawer cabinets;
- (xix) mobile cabinets;
- (xx) bin cabinets;
- (xxi) lighting;
- (xxii) computer / CPU holders;
- (xxiii) retractable keyboard trays;
- (xxiv) drawer slides/pullout writing boards;
- (xxv) filler and gables;
- (xxvi) standards and brackets, dividers, shelves;
- (xxvii) toe-kick ventilation grilles;
- (xxviii) 5" (127mm) aprons;
- (xxix) heavy-duty slides/fully extended runners;
- (xxx) hasp locks;
- (xxxi) casters; and
- (xxxii) lazy-susan inserts for corner units.

(d) Window Coverings

- (1) Provide window coverings as follows:
 - (A) all exterior windows are to receive shading devices providing privacy, sun and heat control, that are easy to clean and do not support or provide a surface that encourages spread of infectious disease (i.e. do not become electrostatically charged);
 - (B) roller shades are preferred for use on exterior windows; and
 - (C) all interior windows to receive blinds where privacy may be a concern, as identified by the Authority, with type of shade varying based on usage and occupant;
 - (D) provide motorized shade controls in atrium with sensors;
 - (E) manual controlled blinds to have breakaway cords; and
 - (F) conference and meeting rooms to have blackout capabilities along with shading characteristics.
- (2) Blinds will be selected to provide optimum privacy, sun and heat control, are easy to clean, are not prone to become electrostatically charged and their surface does not encourage the spread of infectious disease.
- (3) Window coverings will allow control of exterior light entering the room during daylight hours and provide privacy during daylight and non-daylight hours.
- (4) Provide black-out window coverings for all patient rooms in the ICU and provide motorized black-out window coverings in the operating rooms.
- (5) Where window coverings are required for black-out functions, provide materials, tracks, seals, and operation suited to that purpose.
- (6) Use window coverings manufactured from materials and mechanisms that minimize cleaning and maintenance operations and maximize infection prevention and control.
- (7) Horizontal venetian blinds are also discouraged other than for between-glass installation. Roller shades and vertical blinds are preferable.

(e) Window Shade Systems

- (1) Use manual and motorized roller shades with one piece extruded aluminum roller tube, extruded vinyl fabric spline, aluminum profile hem bars.
- (2) Install recessed in ceiling pockets, facilitating easy removal and replacement. Use galvanized or zinc-plated steel mounting brackets and non-corrosive fasteners.

- (3) Use shading fabric of non PVC coated fibreglass yarn and that:
 - (A) is waterproof, washable, rot-proof, flame-resistant, fungal and bacteria-resistant, colourfast to light, glare-reducing, and able to control heat gain and provide external visibility;
 - (B) conforms to CAN/CBSB-4.162-M, "Hospital Textiles - Flammability Performance Requirements"; and
 - (C) is tested in accordance with ASHRAE Standard 74073 for shading coefficient, fungal resistance in accordance with ASTM G21, and bacterial resistance.
 - (4) Audiovisual light blocking shades: Fabricated from black-out shade panel material, designed to eliminate all visible light gaps when shades are fully closed.
 - (5) Manual shade operation with continuous loop bead chain, clutch, cord tensioner and bracket lift operator.
 - (6) Motorized operation utilizing in-tube motor drive, externally located control wheels, and manual switch control.
- (f) Venetian-Type Blinds between Glazing
- (1) Provide integral blinds, with controls on both sides, in interior glazing windows in the following rooms:
 - (A) Intensive Care Unit / Telemetry Unit: In between adjacent patient rooms, and from the charting counters at corridor outside;
 - (B) Medical / Surgical Inpatient Rooms, Maternity, Newborn and Pediatric Inpatient Rooms, Psychiatric Inpatient Rooms: Viewing window from corridor or nursing station outside;
 - (C) Isolation Patient Rooms: Viewing window from corridor or nursing station outside;
 - (D) viewing windows between Ante Room into the Isolation Patient Rooms; and
 - (E) Emergency Department Ante Room into the Decontamination Room.
 - (2) In special areas such as the Mental Health / Psychiatry Department, construct windows with blinds suited to the purposes unique to those areas and in accordance with the Ministry of Health Standards for Hospital-Based Psychiatric Emergency Services: Observation Units.
 - (3) Provide black-out capable blinds for viewing windows between the scrub sinks and operating room in Ophthalmic Surgery.
 - (4) Blinds for the viewing windows between scrub sinks and procedure rooms will be motorized and remote operable.

- (5) Blinds will consist of tempered aluminum alloy slats uniformly spaced and 100% interlaced between cross-ladders on at least one tape. Use tapes with no special end rails required to attach the suspension members from the window opening to the blind.
 - (6) Use a hardware/window design that does not allow air movement from a room to adjacent rooms. Openings in the glazing plane are not allowed.
 - (7) The operator will be a specially constructed, permanent magnet capable of moving the blind assembly from a closed position in one direction to a closed position in the opposite direction.
- (g) Living Green Wall (Division 12)
- (1) Living wall system including but not limited to: support system mounted to structural wall; installation of growing medium; installation of aspects of water and irrigation system; installation of plant material; required hardware and accessories. All portions of the living wall system must be proven by Project Co to meet all infection prevention and control requirements.

6.13 Special Construction (Division 13)

- (a) Radiation Protection
- (1) Verify and comply with all applicable requirements of the National Council on Radiation Protection and Measurement (NCRP) as well as those of all other respective and necessary codes, standards and legislation.
 - (2) Provide radiation protection in walls, doors, floors, ceilings and windows as required and appropriate to protect staff and patients from x-ray, imaging digitizing, CT scanner, radiology, nuclear medicine radioactive storage decay and other rooms in the radiation protection shield.
 - (3) Provide radiation protection by incorporating lead sheet of appropriate weight and thickness into wall and door assemblies and leaded glass manufactured for radiation shielding purposes into window assemblies.
 - (4) Radiation shielding will be 9.75 kg/m^2 , not less than 0.9 mm lead to 2.1 m above the floor level as a minimum.
 - (5) For sheet lead, comply with ASTM B749 Standard Specification for Lead and Lead Alloy Strip, Sheet and Plate and meet or exceed Federal Specification QQL-201F Grade C.
 - (6) For lead-lined gypsum board, comply with ASTM C36 or and ASTM C1396/1396M, Type X.
 - (7) For lead glass, meet or exceed Federal Specification DD-G-451.
 - (8) For cassette transfer cabinets, meet or exceed MIL-C-3673 (DM) Radiation shielded.
 - (9) For radiation shielded doors, meet or exceed American National Standards Institute / National Woodworkers Manufacturers Association (ANSI / NWMA) Industry Standard for wood doors and NCRP Report #49.

- (10) Fabricate radiation-shielded doors using a single layer of sheet lead with wood core laminated on each side of the lead. Bond cores using poured lead dowels at edges.
 - (11) Fabricate radiation-shielded door frames with lead-lining.
 - (12) Lead glass or lead louvers occurring in radiation shielded doors will be equivalent rated to sheet lead in doors.
 - (13) For lead-laminated gypsum wallboard, use a single unpierced sheet of lead.
 - (14) For sheet lead applied directly to partition steel studs, provide a continuous and complete protective shield.
 - (15) Provide radiation shielding barriers, mobile or fixed, modular and transparent barriers to protect medical personnel by providing a full body shield. Provide units with distortion-free, lead-plastic windows.
- (b) Cooler and Freezer Rooms
- (1) Provide walk-in cooler and freezer rooms, with freezer room floors recessed into the slab for “flush” walk-in for new Construction. For the Existing Hospital, review existing capabilities. If condition exists whereby recessing is not possible, surface mounted will be accepted with appropriate ramp for access.
 - (2) Design room enclosure elements to accommodate movement in wall and structural movements without permanent distortion, damage to infills, racking of joints, breakage of seals, water penetration or glass breakage.
 - (3) Design temperatures for cooler and freezer rooms will be as follows:
 - (A) Cooler rooms: + 2°C to + 10°C
 - (B) Freezer rooms: -10°C to -25°C, with normal operation at + 4°C +/- ½°C
 - (4) Design floor, wall and ceiling panels to comply with ULC/ORD-C376 “Fire Growth of Foamed Plastic Insulated Building Panels in a Full-Scale Room Configuration”.
 - (5) Design floor, wall and ceiling panels with tongue and groove joints to achieve a maximum air leakage rate of 75 Pa°F 0.00 m³/h-m² and a water vapour permeance rate of 0.00 perms in accordance with ASTM E283 “Air Leakage Rate Testing” and ASTM E96” Water Vapour Permeance Rate Testing”.
 - (6) Design ceiling panels with internal reinforcing to provide a maximum deflection of 1/240 of span under uniform loading of 20 psf and to support refrigeration systems.
 - (7) Design room assembly to permit replacement of components.
 - (8) Allow for ceiling, piping, conduit and other interior dead loads imposed on the structure.

- (9) Provide components and accessories as follows:
- (A) Floor, wall and ceiling panels: Fabricated from commercial grade galvanized steel conforming to ASTM A526M with zinc coating to ASTM A525M, designation Z275, and finished on exposed surfaces with manufacturer's standard baked white enamel.
 - (B) Panel insulation: Foamed-in-place polyurethane.
 - (C) Doors: 915 mm x 2115 mm of same panel construction as panels, with soft perimeter gaskets, manufacturer's standard pre-wired light switch, dial thermometer, heavy duty door closer, spring loaded and self-closing hinges, latch, pull handles, kickplate and threshold plate. Furnish freezer doors with anti-condensate heater, heated vent and pre-wired sill.
 - (D) Provide self-supporting steel shelving racks in cooler rooms.
 - (E) Refrigeration system: Self-contained air cooled condensing units mounted on walk-in units, and forced-air evaporators mounted on interior of units. Capacities, air delivery and dimensions to manufacturer's design. The cooling units are to consist of minimum two separate units per room to provide full cooling capacity redundancy for servicing and maintenance.
 - (F) Lighting: CSA approved vapourproof box with standard incandescent light fixture pre-wired to switch on door frame.
 - (G) Alarms: Modulam MT, 1 local and remote to the BMS for each room.

6.14 Conveying Equipment (Division 14)

- (a) Basic Requirements for Elevators
- (1) Provide an elevator study to demonstrate the number, type and distribution of elevators required to service the Facility. Provide, as applicable, separate public elevators, service elevators, dedicated clean and soiled elevators from the MDR to the surgical suite, and patient transfer elevators, with redundancy, to allow smooth transport of the public to public visiting zones, patient transport between relevant departments, and back of house delivery of goods and services. Use good design practice, taking into consideration infection prevention and efficient flow.
 - (2) The elevator and systems will be designed to accommodate the requirements / needs of the Facility in a manner which contributes to the overall efficiency and effectiveness of the hospital operations.
 - (3) Elevator systems will be designed to ensure there is sufficient capacity to accommodate the wide range of user and functionality requirements, in a manner which satisfies expectations for safety, reliability, responsiveness, accessibility and operational efficiency.
 - (4) Provisions will be considered for persons with special mobility needs and other forms of disabilities, such as learning difficulties or mental disorders.

- (5) Elevators will support access provisions, for people and materials, to all functional areas. Elevator access to all building levels, including mechanical levels, will be provided by at least one elevator.
 - (6) Equipment provided will have a proven track record of at least five years field operation in Canada in similar environments and of similar configuration.
 - (7) Durable elevator cab finishes (including stainless steel fronts as well as hand and bumper rails) will be provided.
 - (8) Emergency power operation of elevators will be provided such that all elevators are fed with emergency power and they are all capable of operating simultaneously. Coordinate with electrical design & requirements.
 - (9) Elevators used for support services will be configured with platforms to accommodate easy movement of material carts. Requirements for transport of heavy equipment will be considered and accommodated by at least one elevator.
- (b) Performance Criteria for Elevators
- (1) Provide passenger and service elevators as required to meet the following performance requirements:
 - (A) Population: Provide elevators to serve the number of beds and total population expected in the Facility.
 - (B) For parking applications population will be based on 2 persons per vehicle and the assumption that the parking garage can completely turn over in a one (1) hour period. (i.e. total population = 2 persons x # of parking stalls x 2 (for in & out traffic)).
 - (C) Handling capacity: Passenger elevators will have a handling capacity of at least 12% of the total population for a peak 5 minute period. (Handling capacity refers to the number of passengers that are transported by the elevator for a certain period of time). Service elevators will be capable of transporting 4 full size ambulance stretcher per 100 beds, plus 12% of the staff population, in a peak 5 minute period.
 - (D) Interval: For adequate elevator service, an interval of 30 to 50 seconds is required for both passenger and service elevators. The interval is defined as the average time between an elevator leaving a floor and the next elevator returning to the floor.
 - (E) Waiting time: Average waiting time will not exceed 30 seconds. Maximum waiting time will not exceed 120 seconds. Waiting time will be measured from the moment elevator call is registered until an elevator arrives at the designated level.
 - (F) Load factor: All elevators will provide adequate service with a load factor below 40%. Load factor refers to the number of passengers transported by each elevator during one trip expressed as a percentage of the maximum number of passengers permitted by the Safety Code for Elevators and Escalators (CSA B44).

- (G) Service elevator cabs: Non-public elevators used to transport patients will be able to accommodate a bariatric bed, up to four staff, four IV pumps, portable ventilator, oxygen tanks and monitors and have enough space to allow for staff to carry out emergency procedures within the elevator.
- (2) Arrange the equipment such that there are no timers, dates, trip counters, or other counters that would shut down the equipment or change its operation.
- (c) Scope of Work for Elevators
 - (1) Supply and install elevators as required to meet the needs of the Facility. Provide all necessary components to make elevator systems fully operational and functional, whether or not specifically referenced in this outline specification.
 - (2) Provide all permits, labour, materials, products, equipment, services and all else necessary for the design, manufacture, delivery, installation and services required for a complete and fully functioning elevator system.
 - (3) Obtain and pay for design submission, registration, inspection and permit, as required (except for ownership and operating license), and make such tests as required by the safety authority prior to licensing.
 - (4) Codes, By-Laws, and Regulations
 - (A) Provide equipment and perform work in accordance with the latest edition of the B44 Safety Code for Elevators and any other code which may govern the installation.
 - (5) Training
 - (A) At the completion of the job, provide a training session for the Authority consisting of a review of the documentation.
 - (6) Programming
 - (A) Program the elevators to integrate with communication, networks, fire alarms, and other systems in the Facility, to the approval of the Authority.
 - (7) Barrier-Free Access
 - (A) Arrange the controls and fixtures to meet barrier-free access requirements of the B44 Safety Code for Elevators Appendix E (latest edition) and any other code which may govern the installation.
 - (8) Fixtures
 - (A) Provide a choice of fixtures from a third party supplier and the manufacturer's standard products.
 - (B) Provide buttons with LED illumination and stainless steel targets.

- (9) Operating Conditions
 - (A) Provide equipment that will operate normally when the machine room and hoistway temperature is between 5 and 35 degrees Celsius.
 - (B) Provide equipment that will operate normally when the power supply is within 10 percent of its rated voltage.
- (10) Seismic Requirements
 - (A) Comply with Section 8.4 (Elevator Safety Requirements for Local Seismic Risk Zone) of the B44 Safety Code for Elevators and any other code which may govern the installation.
- (11) Maintainability
 - (A) Arrange the equipment such that there are no timers, dates, trip counters, or other counters that would shut down the equipment or change its operation.
- (12) Equipment Summary
 - (A) Passenger elevators will, at a minimum, meet the requirements set out in the table below:

PASSENGER ELEVATORS	
NUMBER	TWO (2) OR MORE TO SUIT THE NEEDS OF THE FACILITY
TYPE	PASSENGER ELEVATORS
TYPE OF MACHINE	GEARLESS OVERHEAD TRACTION OR MACHINE ROOM LESS (MRL)
MACHINE ROOM LOCATION	OVERHEAD
ALTERNATIVE CONTROL ROOM LOCATION	ADJACENT TO TOP LANDING OR HOISTWAY OVERHEAD
DRIVE	AC VVVF
LOAD (CAPACITY)	MIN. 4000 LB. (1820 KG) TO SUIT THE PERFORMANCE REQUIREMENTS
CLASS OF LOADING	PASSENGER CLASSIFICATION AND CLASS A GENERAL FREIGHT LOADING
CAR SPEED	TO SATISFY THE PERFORMANCE REQUIREMENTS
OPERATION	GROUP SUPERVISORY SYSTEM; FULL SELECTIVE COLLECTIVE

CONTROL	MICROPROCESSOR
NUMBER OF STOPS	PROVIDE SERVICE TO ALL FLOORS TO SUIT THE FACILITY
OPENINGS	FRONT OPENINGS ONLY (DO NOT PROVIDE BOTH FRONT AND REAR OPENINGS)
HOISTWAY SIZE	TO SUIT THE EQUIPMENT
CAB INSIDE DIMENSIONS	MIN. 7'-8" (2340) W X 5'-5" (1650) D
HOISTWAY OVERHEAD CLEARANCE	TO SUIT THE EQUIPMENT
PIT DEPTH	TO SUIT THE EQUIPMENT
CAB HEIGHT	9'-0" (2745)
DOOR TYPE	CENTRE OPENING
DOOR SIZE	MIN. 4'-0" (1220) WIDE X 7'-0" (2134) HIGH
CAR OPERATING PANEL	TWO (2) PER CAR
CAR POSITION INDICATOR	TWO (2) PER CAR
IN-CAR RIDING LANTERNS	NONE
HALL BUTTONS	MIN ONE (1) RISER FOR UP TO THREE (3) CARS, IF GREATER THEN THREE (3) CARS THEN PROVIDE A MIN. OF TWO (2) RISERS
HALL LANTERNS	AT ALL LANDINGS
HALL POSITION INDICATORS	AT MAIN FLOOR LEVELS ONLY

- (B) Service elevators will at a minimum, meet the requirements set out in the table below:

PATIENT TRANSFER / SERVICE ELEVATORS	
NUMBER	GROUPS OF TWO (2) OR MORE TO SUIT THE NEEDS OF THE FACILITY
TYPE	PASSENGER / SERVICE ELEVATOR

TYPE OF MACHINE	GEARED OR GEARLESS OVERHEAD TRACTION
MACHINE ROOM LOCATION	DIRECTLY OVERHEAD THE HOISTWAY
DRIVE	AC VVVF
LOAD (CAPACITY)	MIN. 8000 LB. (3630 KG)
CLASS OF LOADING	PASSENGER CLASSIFICATION AND CLASS A GENERAL FREIGHT LOADING
CAR SPEED	TO SATISFY THE PERFORMANCE REQUIREMENTS
OPERATION	GROUP SUPERVISORY SYSTEM; FULL SELECTIVE COLLECTIVE
CONTROL	MICROPROCESSOR
NUMBER OF STOPS	PROVIDE SERVICE TO ALL FLOORS TO SUIT THE FACILITY. AT LEAST ONE (1) CAR WILL ALSO SERVICE ANY INTERSTITIAL OR MECHANICAL FLOOR LEVELS.
OPENINGS	FRONT ONLY OR FRONT AND REAR OPENINGS TO SUIT THE FACILITY
HOISTWAY SIZE	TO SUIT THE EQUIPMENT
CAB INSIDE DIMENSIONS	MIN. 7'-0" (2135) W X 10'-0" (3050) D
HOISTWAY OVERHEAD CLEARANCE	TO SUIT THE EQUIPMENT
PIT DEPTH	TO SUIT THE EQUIPMENT
CAB HEIGHT	9'-0" (2745)
DOOR TYPE	TWO SPEED CENTRE OPENING
DOOR SIZE	6'-0" (1830) WIDE X 7'-0" (2135) HIGH
CAR OPERATING PANEL	ONE (1) PER CAR IF FRONT OPENINGS ONLY OR TWO (2) PER CAR IF FRONT AND REAR OPENINGS ARE USED.
CAR POSITION INDICATOR	ONE (1) PER CAR IF FRONT OPENINGS ONLY OR TWO (2) PER CAR IF FRONT AND REAR OPENINGS ARE USED.
IN-CAR RIDING LANTERNS	NONE

HALL BUTTONS	MIN ONE (1) RISER FOR UP TO THREE (3) CARS, IF GREATER THEN THREE (3) CARS THEN PROVIDE A MIN. OF TWO (2) RISERS
HALL LANTERNS	AT ALL LANDINGS
HALL POSITION INDICATORS	AT MAIN FLOOR LEVELS ONLY

- (C) Dedicated surgical processing elevators (if provided) will at a minimum, meet the requirements set out in the table below:

DEDICATED SURGICAL PROCESSING ELEVATORS	
NUMBER	CLEAN (STERILE) AND DIRTY (SOILED) ELEVATORS AS APPLICABLE TO SUIT THE NEEDS OF THE FACILITY
TYPE	PASSENGER/SERVICE ELEVATOR
TYPE OF MACHINE	MACHINE ROOM LESS (MRL)
CONTROL ROOM LOCATION	ADJACENT TO TOP LANDING OR HOISTWAY OVERHEAD (LOCATED REMOTELY IF NECESSARY TO BE OUTSIDE OF STERILE AREAS)
DRIVE	AC VVVF
LOAD (CAPACITY)	MIN. 4500 LB. (2045 KG)
CLASS OF LOADING	PASSENGER CLASSIFICATION AND CLASS A GENERAL FREIGHT LOADING
CAR SPEED	TO SATISFY THE PERFORMANCE REQUIREMENTS
OPERATION	SIMPLEX; FULL SELECTIVE COLLECTIVE
CONTROL	MICROPROCESSOR
NUMBER OF STOPS	SURGICAL PROCESSING AND OPERATING ROOM LEVELS ONLY
OPENINGS	FRONT ONLY OR FRONT AND REAR OPENINGS TO SUIT THE FACILITY

HOISTWAY SIZE	TO SUIT THE EQUIPMENT
CAB INSIDE DIMENSIONS	MIN. 5'-8" (1725) W X 7'-11" (2415) D
HOISTWAY OVERHEAD CLEARANCE	TO SUIT THE EQUIPMENT
PIT DEPTH	TO SUIT THE EQUIPMENT
CAB HEIGHT	8'-0" (2440)
DOOR TYPE	TWO SPEED SIDE OPENING
DOOR SIZE	4'-0" (1220) WIDE X 7'-0" (2135) HIGH
CAR OPERATING PANEL	ONE (1) PER CAR IF FRONT OPENINGS ONLY OR TWO (2) PER CAR IF FRONT AND REAR OPENINGS ARE USED.
CAR POSITION INDICATOR	ONE (1) PER CAR IF FRONT OPENINGS ONLY OR TWO (2) PER CAR IF FRONT AND REAR OPENINGS ARE USED.
IN-CAR RIDING LANTERNS	NONE
HALL BUTTONS	ONE (1) RISER
HALL LANTERNS	AT ALL FLOORS
HALL POSITION INDICATORS	AT ALL FLOORS

- (D) Provide a gearless traction hoisting machine located within the hoistway.
- (E) Provide an automatic reset governor located in the hoistway that can be maintained from the car top. When the governor has tripped, arrange that it will be reset when the car is moved in the up direction and provide means to remotely activate the governor for testing purposes.
- (F) Provide an electronically released and monitored brake system, to permit momentary nudging of elevator within the hoistway under test or emergency conditions.
- (G) Provide a control room that allows full body access and permits maintenance and other work to be done with the control room door in the closed position.
- (H) Locate control room adjacent to the top of the elevator hoistway or remotely at roof level, immediately above, or in near proximity to elevator core if necessary.

- (13) Elevator Machine and/or Control Room Equipment — All Elevators
- (A) Provide a non-proprietary elevator control system that is microprocessor-based with sophisticated group dispatching capability.
 - (B) Provide a spring applied electric brake, held open by an electro-magnet actuated by the controller. Design the brake to automatically apply in event of interruption of power supply from any cause.
 - (C) Provide sound and vibration isolation pads such that there is no direct contact between the machine and the building structure.
 - (D) Provide an emergency brake to stop the elevator if it overspeeds or if it moves more than 500 mm (20") away from the floor with the doors open.
 - (E) Provide a solid state drive complete with isolation transformers, filters (to meet IEEE Standard 519-1992 for Special Applications), and isolation pads.
 - (F) Provide a digital velocity encoder on the motor, giving feedback to the controller on motor speed and position.
 - (G) Provide a microprocessor based controller consisting of relays, contactors, switches, capacitors, resistors, fuses, circuit breakers, overload relays, power supplies, circuit boards, static drive units, wiring terminal strips, and related components all enclosed in a cabinet with hinged door panels.
- (14) Hoistway Equipment – All Elevators
- (A) Provide entrances consisting of doors, frames, sills, sight guards, door hangers, tracks, interlocks, door closers, gibs, and all other equipment required for a complete installation. Provide entrance doors and frames finished in brushed stainless steel.
 - (B) Provide standard 'T' section steel guide rails for the car (and counterweight). Install guide rails using brackets fastened to the building structure. Clamp the guide rails to the bracket with clips arranged to prevent any horizontal movement of the rail. Join the rail sections using steel backing plates.
 - (C) Provide hoist ropes/belts of sufficient size and number to lift the load and ensure proper wearing qualities. Provide either steel ropes consisting of at least six strands wound around a hemp core centre or polyurethane coated belts with high-tensile-grade zinc-plated steel cords. Ensure that all the ropes for a particular elevator are from the same manufacturing run.
 - (D) Provide a counterweight to counterbalance the elevator for smooth and economical operation with cast iron or steel plate weights contained in a structural steel frame. Provide a counterweight equal to the weight of the elevator car plus between 40 and 50 percent of the rated capacity.
 - (E) Provide for the car (and counterweight) spring mounted roller guides located at the top and the bottom of the car (and counterweight frame).

- (F) Provide fascias from each hall sill to the entrance header below. Include express zones. Extend the fascias into the pit and the overhead.
 - (G) Provide a car frame constructed of steel channels and a platform constructed of steel channels with a wood or metal sub-floor. Isolate the frame and platform from one another so that there is no metal to metal contact in order to prevent the transmission of noise and vibration. Mount the elevator cab shell on the platform in alignment with the hoistway entrances. Isolate the cab from the car frame and platform.
- (15) Cab Equipment – All Elevators
- (A) For public / passenger elevators, provide factory standard cab interior finishes, raised plastic laminate cab wall panels, sectional suspended ceiling with LED Lighting, cab front & car door panels of stainless steel #4 brushed finish. 50 mm diameter stainless steel cylindrical handrails.
 - (B) For service and dedicated surgical processing elevators (if required) provide factory standard cab interior finishes, rigidized stainless steel 5WL cab wall panels, sectional suspended ceiling with fluorescent lighting and translucent panel diffusers, cab front & car door panels of stainless steel #4 brushed finish. 100 mm flat bar stainless steel handrails and 200 mm flat bar stainless steel bumper rails.
 - (C) Provide three dimensional type Infrared light beam type door detector edges that reliably detect carts, wheelchairs, etc. of varying heights and finishes, including chrome. The depth of the infrared zone will be field adjustable.
 - (D) Provide car doors, jambs, headers, hangers, tracks, door closers, gibs, electrical contacts, and all other equipment required for a complete installation.
 - (E) Provide swing return or applied faceplate car stations incorporating floor push buttons, door open and close buttons, an alarm button, and other fixtures required for normal operation. Provide for each floor button a call registered light and momentary audible tone. Provide a firefighters' emergency operation panel. Provide below the car station a locked service cabinet containing devices other than those used for normal operation. Engrave the car station with the elevator capacity, identification number, government installation number, and other markings required by code.
 - (F) For patient transfer / service elevators and dedicated surgical processing elevators (if required) provide door hold open push button in car operating panels.
 - (G) Provide a 110 V power outlet in each car in one of the car panels in a locked service cabinet
 - (H) Provide a digital (dot matrix or segmented) car position indicator located above each car station with a minimum 50 mm (2") high display.
 - (I) Do not install any certificates or licences in the cab.

- (J) Provide a voice announcer for each elevator with automatic verbal announcement of each floor at which the elevator stops. Provide a system that will handle a variety of other messages and indications as may be required by the Authority at a later date.
 - (K) Provide a two speed exhaust fan mounted in the cab top.
 - (L) Provide one set of cab protective pads for each group of elevators that cover all walls and the cab front return panel along with pad hooks. Provide pad hooks in each elevator.
 - (M) Provide a heavy duty closed loop door operator to open and close the car and hoistway doors simultaneously.
 - (N) Provide a hands-free two-way voice intercommunication / telephone system with a lobby rescue station and remote handset. Provide communication from each car enclosure to designated security station located in the Facility.
- (16) Hall Equipment – All Elevators
- (A) Provide hoistway access switches located in the entrance frame or in the hall door sight guard at the top and bottom landing for each elevator regardless of the elevator speed or floor to floor heights for the elevator.
 - (B) Provide in each hall station illuminating up and down push buttons (at terminal floors, provide only one button) located with their centreline 1070 mm ± 25 mm (42" ± 1") above the floor.
 - (C) Provide an elevator monitoring & command Interface (PC monitor) for monitoring and control of the elevators. Locate in each control or machine room or provide a centrally located system connected to all elevators as approved by the Authority.
- (17) Electric Wiring – All Elevators
- (A) Provide copper wiring to connect the equipment.
 - (B) Run the wire in metal conduit, duct or electrical metallic tubing.
 - (C) Provide travelling cable between car stations and the controller in the machine and/or control room.
 - (D) Provide at least eight (8) pair spare shielded wires and two (2) RG6 spare coaxial conductors in the travelling cable. This is in addition to the wiring required for the basic operation of the elevators.
 - (E) Provide at least ten percent spare wires in each travelling cable.
- (18) Operational Features and General Requirements – All Elevators
- (A) All public passenger and service elevators will serve all floors except interstitial floors or mechanical levels that are accessed infrequently.

- (B) Provide Firefighter's Emergency Operations Phase I & II, including remote/duplicate keyed switches.
- (C) Provide cab loadweighing device & operation for hall call bypass, anti- nuisance & overload.
- (D) Provide barrier free access in accordance with Appendix "E" of latest B44 Elevator Safety Code including voice announcers.
- (E) Provide restricted access via electronic card access for any elevators which provide access to mechanical levels including the roof and other secure access that should not be accessible to the general public.
- (F) Provide for installation of security cameras in the elevators. Install and wire the security cameras provided by another trade. Provide the required wiring in the travelling cable run between the car top and the controller as well as power to the car top for the camera.
- (G) Provide equipment and labour for installation of a card reader security system on the inside of each cab. Provide card readers in every elevator lobby at the hall call location of all staff and service elevators. Each staff or service elevator requires authentication by card reader prior to calling a cab at the hall call station. Provide the required wiring between the card reader and the elevator security box in the machine room along elevator controller connections and circuits for the security system (including floor tracking).
- (H) Provide independent service.
- (I) Provide emergency power operation of the elevators such that all elevators are fed with emergency power and are capable of operating simultaneously
- (J) Provide means to call elevators that provide access to interstitial, mechanical levels, etc. that may not be served by all elevators in a group. This will be by a separate call button, keyed switch or electronic access card reader as approved by the Authority.
- (K) For all elevators, provide medical emergency service operation (code blue) and priority service operation with activation means at all floors served and provisions for remote activation of these features. Provide code blue keyswitches in each cab and at each hall call location for elevator code-blue override.
- (L) For all elevators providing access to patient care areas, the elevator shall not operate when an infant abduction tag or patient tracking / wandering system tag is present in the elevator cab.
- (M) Each elevator cab shall be provided with a 802.11 wireless network access point to ensure full coverage of the Authority's wireless network. Provide all necessary wiring.
- (N) Each patient elevator cab shall be provided with a patient wandering system exciter point to ensure full coverage. Provide all necessary wiring.

(19) Operating Performance

- (A) Levelling : Arrange that the car stops within 3 mm (1/8") of the floor level.
- (B) Operating time: Adjust the equipment so that the operating time is 17.0 seconds or less (based on 4'0" wide two speed side opening doors and a speed of 150 fpm and travel of 4.5 m (14'- 9")). Measure the operating time from the time that the doors begin to close until they are 3/4 open at the next floor.
- (C) Ride quality: Arrange that the lateral acceleration (front to rear and side to side) measured during express runs is less than 150 mm/s/s (0.5 f/s/s) peak to peak.
- (D) Adjust the door equipment so that the noise level is less than 62 decibels during a full door open and door close operation. Measure the noise levels using a sound level meter set to the "A" scale for a fast response.
- (E) Arrange the machine room equipment so that the noise level with the elevator running is less than 80 decibels. Measure the noise levels using a sound level meter set to the "A" scale for a fast response.

(d) Pneumatic Tube System (Division 14)

(1) Overall System Description

- (A) Provide a fast and secure on-demand light material transport system for the Facility through a pneumatic tube system or air tube system.
- (B) The system is to be comprised of user stations, carriers to contain and transport light weight unit-load materials, and a strategically designed network of piping and traffic control devices to ensure optimal performance.
- (C) Provide pneumatic tube user stations as outlined in the Clinical Specifications. Each station is to be equipped with a control panel with a touch-screen display.
- (D) The system is to be a 6 inch (150 mm) pneumatic tube system.
- (E) Provide leak resistant carriers that are double lined, with a secure, lockable integral seal to transport fluid containers, including, but not limited to, IV bags, blood products, bodily fluid samples and other pharmaceutical products.

(2) Design of System

- (A) Provide a pneumatic tube study that outlines the capacity, anticipated wait times, and anticipated trip times of the pneumatic tube system. Maximum allowable trip time is 40 seconds. Outline the number of carriers proposed based on the clinical demands outlined in in the Clinical Specifications, for the Authority's approval. Outline the proposed training for users to ensure optimal performance of the system.

- (B) The noise of the blowers and transfer stations will be contained from patient care areas.
- (C) Ensure that the Support Services Building is equipped with a user station integral with the rest of the Facility if it is a separate physical structure.
- (D) Provide the ability to monitor the system from the management offices of the Facility.

(e) Not Used.

7. FACILITY SERVICES SUBGROUP SPECIFICATIONS

7.1 Mechanical Systems Design Principles

(a) See Section 5.8 “Mechanical Systems Design”.

7.2 Fire Suppression (Division 21)

(a) Fire Protection

(1) Basic Requirements

- (A) Provide all required fire protection for the Facility.
- (B) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.
- (C) Provide a sprinkler system and equipment that is designed for the applicable occupancy classification.
- (D) Provide a double check valve assembly on the sprinkler system take-off connection from the water supply. The assembly will be complete with OS&Y gate valves on both sides and tamper proof switches.
- (E) Provide a new fire pump system if required to meet the fire pressure and flow requirements. The existing fire pump may not be reused in the renovated design. Base the design on the lowest incoming pressure of the two water mains during peak summer operation.
- (F) Provide a fire pump with a transfer switch that is part of the fire pump controller. Mount the switch package in a separate mechanically attached enclosure that is approved by UL, ULC, FM and CSA and built to NFPA 20 standards for this application.
- (G) Provide a dry type sprinkler heads and / or a dry type sprinkler system in areas that may be subject to freezing temperatures.
- (H) Sprinkler heads in areas subject to vandalism will be vandal proof. This includes areas where psychiatric patients may be present and unsupervised.

- (I) Provide fire extinguishers complete with fully recessed cabinets. Each fire extinguisher will be located within the space it serves, and will be of appropriate size and hazard classification for that space. Do not use water extinguishers or other limited types. Coordinate fire extinguisher locations with the local authority having jurisdiction during design. Provide Type K extinguishers for any areas potentially containing grease and Type C in electrical rooms.
 - (J) Provide zone shut-off valves that are readily identifiable and accessible from the floor level, but not located in patient rooms. Zone valves will be located within the zone served.
 - (K) Provide fire department connections at a location that is approved by applicable authority having jurisdiction.
 - (L) All equipment located in the generator room, main electrical room and the main LAN room must be protected by a clean agent fire suppression system. No inert gas system will be allowed.
 - (M) All equipment located in the CT Scanner Room, Operating Rooms, Digital Imaging, and Auto-line in the Lab Services Area must be protected by a double interlocked pre-action with nitrogen charge type fire suppression system and pre-action sprinklers.
- (2) Performance Criteria
- (A) All equipment will be CSA, ULC or cUL approved.
 - (B) Equipment installation will comply with manufacturers' requirements.
 - (C) Fire protection systems and equipment will be installed, tested and certified by a qualified and licensed contractor, who is regularly engaged in such installations.

7.3 **Plumbing (Division 22)**

(a) Site Services

(1) Basic Requirements

- (A) Provide water, fire protection, propane, medical gas, sanitary, and storm services as required and sized to suit the usage needs of the Facility, plus the required additional capacity as per Section 4.1(c). Coordinate locations of these services with the requirements of Section 7.6 Electrical (Division 26).
- (2) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.

- (A) Water supply to the Facility will be by a combined domestic water / fire protection service. Provide two separate services for redundancy, complete with a separate water meter on each service. Calculate and submit to the authority having jurisdiction the estimated maximum flow requirement for the domestic water supply. Refer also to requirements listed in Section 7.6 Electrical (Division 26).
 - (B) Provide water and medical gas inlet connections on the exterior of the Facility as per Section 5.8(g)(2)(F).
 - (C) Provide a strainer, water meter, reduced pressure backflow preventer, filter, triplex variable speed domestic booster pump set, parallel pressure reducing valves and independent shut-off valve on the main water supply to the Facility. Provide a filtration/treatment system to address corrosion issues experienced in existing plumbing piping system.
 - (i) Installation will incorporate redundancy to maintain uninterrupted Facility operation while cleaning, repairing, or replacing devices.
 - (D) Provide subsurface drainage as required to alleviate water pressure exerted onto the bottom of foundations and/or floor slabs. Subsurface drainage will be sized and designed in accordance to the geotechnical conditions.
- (3) Performance Criteria
- (A) Water delivered to the Facility will meet the water quality requirements of all applicable standards and laws, including CSA Z317.1. Filter systems must be capable of operating at high turbidity levels.
 - (B) Any point of use filtration implemented will use stainless steel filter casings to minimize the occurrence of equipment failure and leaks.
 - (C) Provide utilities-commission approved meters for domestic water. The meters will be used to accurately measure water flow in all flow conditions.
 - (D) Water meter will have remote access capability for connection to the Facility automation system.
 - (E) All piping will be accessible. No in slab piping is permitted. No under slab piping is permitted except drains.
- (b) Domestic Hot Water Systems
- (1) Basic Requirements
- (A) Provide a domestic hot water system with sufficient capacity and recovery rate for the hot water requirements of the Facility, plus the required additional capacity as per Section 4.1(c).

- (2) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.
 - (A) The domestic hot water must be generated using indirect heaters from the central heating plant which will be piped such that during summer months domestic hot water is supplied by the biomass boiler system, which will be sized to accommodate the load at peak usage.
 - (B) A copper silver Ionization system shall be for the domestic hot water system to combat the potential of Legionella.
 - (C) Domestic hot water supply will be of adequate temperature to serve the needs of the Facility. Provide automatic mixing valves where the supply temperature at the fixture is required to be less than the system temperature.
 - (D) Locate thermostatic mixing valves serving plumbing fixtures as close as possible to the fixture it serves to minimize dead legs. Recirculate domestic hot water from the mixing valves.
 - (E) Design the domestic hot water system to prevent growth and spread of Legionella bacteria within the hot water generation plant, piping, fixtures, or any other component. Design methods shall include heat-based control and active treatment systems; eliminating dead-leg piping; and minimizing uncirculated piping by connecting the circulation system as close as possible to fixtures.
- (3) Performance Criteria
 - (A) Provide a hot water generating plant and hot water storage equipment to meet the requirements of CSA Z317.1.
 - (B) Recirculate domestic hot water from the distribution system(s) back to the generating equipment. Provide redundant domestic hot water recirculation pumps.
 - (C) Monitor hot water supply temperatures via the BMS and provide alarm outputs when the temperature exceeds or drops below the design setpoint range.
- (c) Plumbing Distribution Systems
 - (1) Basic Requirements
 - (A) All existing domestic piping (cold, hot and recirculation) must be removed and replaced though the course of the renovation. No existing piping is to remain.
 - (2) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.

- (A) Provide the plumbing systems to avoid disruption to the operation of the Facility during maintenance or repairs. Design the systems so that, as much as possible, Type I and Type II rooms do not need to be entered when performing these functions. All isolation, maintenance, balancing, and other service valves will be located in the corridor ceiling spaces and will be accessible. Refer to CSA Z317.2 for space Type definitions.
- (B) Distribute plumbing by means of risers to each floor area to a maximum of 1000 square meters of floor area. Provide isolation valves to each area.
- (C) All DHW and DCW piping to be installed with 45 degree elbows, not 90. This is a measure that has been deemed to be successful at minimizing the corrosion to copper piping caused by the aggressive water in Yellowknife.
- (D) Install back flow prevention devices to suit the CSA Z317.1 and American Water Works Association (AWWA) cross connection control standards. Assessment of the potential cross connection hazard shall be reviewed, such as hospital equipment, laboratory equipment, boiler feed water, kitchen equipment and any situation there is a potential for water contamination.
- (E) Incorporate flexibility in the system designs to accommodate future alterations and allow for future expansion in accordance with Section 4.1(c).
- (F) Label all systems clearly, including painting and labelling of all pipes, ceiling identification dots, valve tagging, and emergency valve identification signage.
- (G) Provide the water systems to ensure that water is supplied at the required pressures to all water outlets.
- (H) Provide a domestic water booster pumping system to meet water supply requirements. Base the design on the lowest incoming pressure of the two water mains during peak summer operation.
- (I) Provide durable materials to allow for 24 hour a day operation with minimal downtime. All potable water distribution systems are to be copper.
- (J) Provide all systems to meet the infection control requirements of the Facility.
- (K) The Project Co will provide either point of use or central reverse osmosis filtered water system for use where required by non-dialysis functions, such as laboratory equipment. If a central system is installed, it shall be provided as follows:
 - (i) include a single central water filtration package with continuously circulating distribution loop(s);
 - (ii) install distribution piping in accessible locations to allow replacement with minimal disruption of patient care areas; and

- (iii) provide piping and outlets that are suitable for use with both of the following systems: automated heat sterilization method; and a chemical sterilization method.
 - (L) Provide an independent reverse osmosis filtered water system for use in the MDR department, as follows:
 - (i) include a single central water filtration package with continuously circulating distribution loop(s);
 - (ii) install distribution piping in accessible locations to allow replacement with minimal disruption of patient care areas; and
 - (iii) provide piping and outlets that are suitable for use with both of the following systems: automated heat sterilization method; and a chemical sterilization method.
 - (M) Provide appropriate domestic water supply connections for portable reverse osmosis machines and hemodialysis units as follows:
 - (i) include all accessories needed to make the connection suitable for the intended use; to meet relevant codes and standards; and to meet the manufacturer's requirements for any connected equipment. This includes electrical outlets, point-of-use micron filtration, thermostatic mixing valves, and backflow preventers; and
 - (ii) provide water, sanitary sewer, and electrical connections, located at the headwall suitable for inpatient hemodialysis using portable reverse osmosis units in one medical/surgical unit inpatient pod and all ICU beds.
 - (N) Provide propane and fuel oil piping as needed for all uses within the Facility. Propane is to be connected to kitchen and laboratory loads, as well as all propane fired boilers and humidifiers.
 - (O) Provide plumbing connections to all medical and food services equipment provided by Project Co.
 - (P) Ensure the plumbing systems are designed to accommodate the requirements of commercial spaces. Make allowance within the base building systems for any future plumbing systems needed for future tenant fit-outs of the commercial spaces.
 - (Q) Ensure the domestic cold water, domestic hot water, and pure (reverse osmosis) water quality is within the required conditions of the applicable codes, standards, and manufacturer's recommendations for all equipment including medical device reprocessing.
 - (R) Ensure the instrument air quality is within the required conditions of the applicable codes, standards, and manufacturer's recommendations for all equipment including medical device reprocessing.
- (3) Performance Criteria

- (A) Insulate storm drainage, domestic water piping, and exposed p-traps throughout. Where piping and/or piping components are subject to freezing, provide insulation and thermostatically-controlled hydronic heat tracing. Ensure life-safety systems are not installed in locations subject to freezing.
 - (B) Provide flushing and disinfection of domestic water systems.
 - (C) Provide independent testing of piping systems once flushing and cleaning has been completed. Supply the testing reports to the Authority.
 - (D) All piping will be accessible. No in slab piping is permitted. No under slab piping is permitted except drains.
 - (E) Provide isolation valves for all plumbing services and clearly identify the location of all valves. Valves will be located at a minimum at each set of piping branches from the main distribution line, and at all locations where the branches serve group of rooms with similar uses. In Mental Health / Psychiatry Inpatient Units provide isolation valves within the public area in an easily accessible area to allow access without the need for a ladder.
- (d) Plumbing Fixtures
- (1) Basic Requirements
 - (A) Not used.
 - (B) Provide fixtures as described in the Clinical Specifications and as needed to comply with all applicable codes and regulations.
 - (C) All plumbing fixtures will be made of impervious, durable materials suitable for a hospital facility. Fixtures selected must have proven acceptable hospital performance from previous installations.
 - (D) Consult with the Authority on the selection of fixtures, and give particular attention to performance relative to infection prevention and control.
 - (E) Select all sink basin and faucet combinations to minimize the potential for splatter and contamination. Ensure the faucet does not discharge directly into the drain.
 - (F) Provide anti-splash, anti-aerosolizing, faucet fittings (i.e. laminar flow) that do not retain air. Provide gooseneck faucet fittings. Avoid low profile gooseneck faucet fittings.
 - (G) Sinks will be standalone wall hung type or have bowls integrally formed into countertops. Drop in or under mount style countertop sinks will not be used.
 - (H) Provide double or triple basin sinks where required.

- (I) Sinks will meet the requirements of CSA Z8000, including materials, size, construction, location, controls, backsplash, soap and lotion dispensers, and accessibility.
- (J) Provide stainless steel combination lavatory / toilet security fixtures where psychiatric patients may be present and unsupervised.
- (K) Barrier-free plumbing fixtures, fittings, and carriers to be provided where required will be suitable for use by bariatric users. Toilets not designated specifically for bariatric use will be wall mounted.
- (L) Select toilets that will reduce the spread of infection. The bowl must be designed to accommodate the flow of the flush valve. Toilet bowls will not splash or spray water onto the toilet rim or anywhere outside the toilet bowl and will be designed to minimize the aerosolization of the toilet contents.
- (M) Public toilets will consist of wall hung elongated bowls with an open front seat and electronic hands free flush valves with manual override.
- (N) Patient toilets will consist of wall hung elongated bowls, an open front seat and manual low flow (4.7Lpf) flush valves.
- (O) Intensive Care Unit and Isolation Room washroom will have a wall mounted cleaning and disinfecting appliance with water closet (Mieko Topline 30WC or an equal or better appliance). Appliance installation will be flush to the wall with a mounting frame. The appliance must have hot and cold water connections for a concealed disinfection drain pan washer with wall hung toilet mounted below. Water, drainage and sanitary vent piping to be installed in accordance with building codes and the manufacturer's recommendations.
- (P) Urinals will be wall-hung and low-consumption (0.5Lpf) with electronic hands-free flush valve operation.
- (Q) Washroom lavatory fixtures will be have electronic hands-free type faucets with single temperature discharge that can be adjusted and set to the desired temperature, except as follows:
 - (i) patient washroom lavatory fixtures will have a manual faucet with hot and cold supplies, with an anti-scald mixing valve.
- (R) Handwashing sinks or hand hygiene stations for nursing stations, patient care areas, examination rooms, food services, emergency room, soiled utility rooms and other similar function rooms will have electronic hands-free type faucets with gooseneck spouts and single temperature supply that can be adjusted and set to the desired temperature by maintenance staff. Basins will be adequately sized for proper washing and scrubbing of hands.
- (S) Scrub sinks will be dual basin stainless steel with integral backsplash and hands-free faucet and soap dispenser for hand hygiene, suitable for a user conducting surgery or other sterile procedures, and supplied as a proprietary equipment item by a medical equipment manufacturer.

- (T) For Labour, Delivery, Recovery and Postpartum Rooms with a birthing tub, the tub will be an acrylic or high density fiberglass tub. Provide a thermostatically controlled valve, fill spout and handles, hand held shower and grab bars.
- (U) Equipment cleaning sinks and other utility sinks will be made of stainless steel with blade handle faucets and gooseneck spout. Sinks will be large and deep to accommodate proper washing of equipment. Materials and piping will be suitable for the intended application of the sink.
- (V) Soiled utility rooms to have minimum of two wall mounted, cleaning and disinfecting appliance for bedpan washing (Meiko Topline 20 or an equal or better appliance). Provide required plumbing services per manufacturer's recommendations.
- (W) For pharmacy sinks in all areas including modular clean rooms, scrub rooms and ante rooms, and dispensary areas, provide a stainless steel sink with blade handle faucets and gooseneck spout. Stainless steel will be of an alloy suitable for the intended use.
- (X) For Laboratory sinks, including but not limited to nuclear medicine and bio-hazardous waste sinks, provide alloy material suitable for the intended use. Faucets will have blade handle with gooseneck spout. Sinks will be large and deep enough to accommodate the intended application.
- (Y) The Activities of Daily Living (ADL) kitchen sink will have an adjustable height counter to American Disabilities Act (ADA) standard height levels. Faucet to be ADA blade handles hot – cold with gooseneck swivel faucet. Drainage and water to meet adjustable heights.
- (Z) Showers and bathtubs will be provided with pressure balanced and high temperature limit shower valves, metal shower heads will be utilized. Shower bases will ensure that the water is contained within the shower area. Patient showers must be free of barriers with no lip between the washroom floor and shower.
- (AA) Interior emergency decontamination showers will be designed with a pull down type valve to supply tempered water from an overhead drench shower. Provide hot and cold isolation valves with freeze protection drainage for the exterior shower.
- (BB) Provide suitable quantities of janitors' sinks, hose bibs, eye wash stations, and drinking fountains with bottle fillers to provide sufficient service to the Facility.
 - (i) Non-freeze bibs will be provided around the Facility perimeter, at the loading dock area, in the garden areas and at the roof and have appropriate back flow prevention.
 - (ii) Eye wash stations will be complete with a water receptor and drain piping.

- (iii) Emergency showers and eye wash stations will be designed to supply tempered water within an acceptable timeframe in accordance with the ANSI guidelines.
 - (iv) Locate bottle fillers with water chillers in or near staff rooms, and as outlined in the Clinical Specifications.
 - (CC) Provide all appropriate services and connections to all equipment for patient care, laboratory and all other areas. Provide all accessories as needed.
- (2) Performance Criteria
 - (A) Provide accessible clean-outs for all sinks and lavatories above the flood-level rim of the sink.
 - (B) The following applies for all electronic sensor activated fixtures:
 - (i) all sensors will be hardwired and served by the
 - (ii) emergency power system so water is available during a power outage;
 - (iii) the duration of sensor faucet flow will be adjustable. All sensors will be able to operate for a minimum of 30 seconds without interruption of flow, to facilitate proper hand washing. Sensors will turn off automatically when hands are no longer in the sensor range; and
 - (iv) the domestic hot water recirculation system will be connected to the fixture's hot water supply immediately next to the fixture shut-off at the wall.
 - (C) Provide water hammer arresters at the cold water and hot water supply to each fixture or bank of fixtures served by a single branch.
 - (D) Automatic flush valves will also have a manual flush operator.
 - (E) If system pressure exceeds the acceptable delivery pressure, then provide pressure reducing valves with 100% redundancy. Place the valves in accessible locations.
 - (F) Provide stop valves at each hot and cold fixture connection.
- (e) Plumbing Drainage and Venting Systems
 - (1) Basic Requirements
 - (A) Not used.
 - (2) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.

- (A) Provide sanitary, storm, specialty drainage, and venting systems to avoid disruption to the operation of the Facility or interference with other services during operation and maintenance activities. Design the systems so that, as much as possible, Type I and Type II rooms do not need to be entered when performing these functions. Refer to CSA Z317.2 for space Type definitions.
- (B) Provide all drainage systems such that the system connects to the drainage services of the Lands, utilizing gravity drainage. No lift stations will be acceptable.
- (C) If pile foundations are used to support the structure, all underslab piping will be supported (hung) from the concrete slab above.
- (D) Hangers and rods will be of sufficient strength and be installed at intervals to carry the pipe and load and maintain the required slope. Hangers and rods will be corrosion resistant. Install light-weight fill above all piping that is supported (hung) from the concrete slab above.
- (E) Pumping systems for subsurface, storm, or sanitary drainage will include 100% redundancy (one redundant unit for each active unit) and related equipment will be supplied with emergency power.
- (F) The storm sump will have twin compartments (separate chambers for settling and pumping) and will be sized to prevent short cycling of the pump. Provide engineered packaged system(s) complete with controls and alarms including but not limited to high water level and pumps failure alarms. Provide local alarms annunciation with audible and visible alarms indication and remotely via the BMS.
- (G) All drainage and venting piping and fittings will be of a material suitable for the expected effluent. This includes but is not limited to dialysis systems and other specialty systems with acidic, high- temperature, or radioactive discharges. Drainage piping material will only be changed downstream a point where the hazardous property of the effluent is reduced so a different piping material is suitable:
 - (i) where the branch connects into a main drain line, such that the additional effluent flow dilutes the discharge; and
 - (ii) where a device is placed in-stream to reduce the hazard of the discharge, such as an acid neutralizer.
- (H) Piping will be cast iron in all areas with elevated temperature discharge is expected.
- (I) Provide drains suitable for discharge from dialysis machines at all locations where reverse osmosis water connections are provided, plus any locations designated for connection of portable dialysis machines.
- (J) Provide floor drains in all mechanical rooms and other rooms where water spillage from equipment or operations can be reasonably expected.

- (i) Provide drains for all devices that may discharge water, including but not limited to emergency showers, reverse osmosis systems, and backflow prevention devices.
 - (ii) Floor drains in patient care areas will be installed only as needed for the specific use of the room and as per CSA-Z317.1 and CSA-Z8000.
 - (iii) Ensure all equipment drain piping is terminated in floor drains.
 - (iv) Floor drains serving backflow preventers, sprinkler test points, or other devices will be sized to accommodate the discharge flow rate of the device.
- (K) Provide neutralizers, interceptors, and sediment buckets to intercept oil, grease, dirt, solids, and fuel where necessary.
- (i) Interceptors will be provided in accordance with the manufacturer's specifications.
 - (ii) Install plaster traps for casting sinks in well-ventilated closets or other service areas, so odours released during trap cleaning do not migrate beyond the immediate service area to other parts of the Facility.
 - (iii) Provide acid neutralizers at either the point of acid discharge to the drainage system or at the acid waste drainage system termination.
 - (iv) Provide a bio-hazard storage tank or tanks to contain radioactive waste from nuclear medicine sinks, bio-hazardous sinks and decontamination showers.
 - (v) Provide appropriate systems at all fuel storage tanks and filling stations to prevent fuel leakage beyond the designated containment area, in accordance with all applicable standards.
 - (vi) Provide grease interceptors to serve all sinks and floor drains in Food Services and Ware Washing areas. Run an independent drainage system sloped at a minimum 2%.
- (L) Provide automatic trap primers at drains that are subject to losing the trap seal, including infrequently used fixtures and p-traps in negatively pressurized rooms. Locate trap primers in a location where they can easily be accessed, inspected, and repaired.
- (M) Ensure the plumbing systems are designed to accommodate the requirements of commercial spaces. Make allowance within the base building systems for any future plumbing systems needed for future tenant fit-outs of the commercial spaces.
- (N) Provide liquid medical waste disposal system for Soiled Utility Rooms in Surgical Services. Units will be powered by tap water and safely empty canisters containing infectious liquid medical waste directly into the sanitary sewer with no pouring required.

- (O) Provide flushing rim type floor drains in all Mental Health / Psychiatry Secure Rooms.
- (f) Medical Gas Systems
- (1) Basic Requirements
 - (A) All existing medical gas piping, with the exception of medical vacuum, may be evaluated for reuse.
 - (B) Not used.
 - (C) Provide medical gases for the Facility as required by Appendix 3C [Medical Gas and Headwall Requirements] and CSA Z7396.1-12.
 - (D) The Existing Hospital utilizes two (2) oxygen concentrators to satisfy the pure oxygen requirements within the building. The Project Co may choose to incorporate this equipment into the Design of the Facility. Should the existing concentrators be reused in the existing location, an adequate cooling system must be provided.
 - (E) The Existing Hospital utilizes a duplex medical air system to satisfy the medical air requirements within the building. The Project Co may choose to incorporate this equipment into the Design of the Facility. The renovated system must meet the requirements of CSA Z7396.1-12.
 - (F) The Existing Hospital utilizes a new medical vacuum pump system to satisfy the medical vacuum requirements within the building. The equipment is new and the Project Co may choose to incorporate this equipment into the Design of the Facility. The renovated system must meet the requirements of CSA Z7396.1-12.
 - (2) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide all necessary temporary systems and components required to maintain continued service.
 - (A) Provide centralized backup manifold supply systems for the following medical gases: oxygen and medical air. Design the centralized bottle manifold supply with the oxygen concentrator/medical air compressor systems so that they will, when required, automatically switch to the spare bank of bottles (and that switching to the spare bank is alarmed at the master alarm).
 - (B) Provide centralized manifold supply systems for the following medical gases: nitrogen, nitrous oxide. Design the centralized duplex bottle manifold supply systems so that they will, when required, automatically switch to the spare bank of bottles (and that switching to the spare bank is alarmed at the master alarm).
 - (C) Include in the Facility an enclosed room with adequate space for the storage of medical gas bottles, including bottles of gases supplied by the centralized supply systems described above, all gases required for laboratory use, and bottles of the additional medical gases required.

- (i) Only medical gas valving and piping that is necessary for the installation of new bottles will be included in the bottle room.
 - (ii) Provide sufficient space for storage of enough medical gases so the Facility can maintain operational for the full post-disaster timeframe as per Section 5.8(g).
- (D) Provide new central medical air and medical vacuum systems with redundancy as required by CSA Z7396.1-12. Provide 'fail-safe' controls: all units will continue to run and maintain service in the event of failure of the electronic controls, without human intervention.
- (E) Connect new central medical air and medical vacuum systems and all oxygen concentrator systems to emergency power.
- (F) If the laboratories, MDR or any other non-clinical use requires a vacuum system or a medical air system, these systems will be independent from vacuum and medical air intended for patient use. Refer to the Clinical Specifications for laboratory requirements.
- (G) Each inpatient bed will have an oxygen outlet, a medical air outlet, and a vacuum inlet on each side of the bed.
- (H) Locate all medical gas outlets in a head wall system that incorporates medical gases, electrical and data outlets.
- (I) Provide medical gas service outlets as follows:
- (i) Provide recessed service outlet boxes designed for concealed piping and fabricated for straight insertion of secondary equipment.
 - (ii) Each recessed wall outlet will have a permanently marked, colour-coded non-interchangeable index system to prevent connection to the wrong gases. Provide a secondary check valve to maintain the line pressure if the primary valve is removed for maintenance.
 - (iii) Provide 2-part DISS type outlets for each medical gas. Each oxygen outlet will be complete with dial style integrated flow meter, adjustable knob for flow control, visual flow indicator, extra auxiliary port, and color coded labelling.
- (J) Provide connections to ceiling booms in operating rooms, procedure room and resuscitation room.
- (K) Provide a manually adjustable nitrogen regulators located in a wall panel in each room where nitrogen is used.
- (L) Provide a waste anaesthetic gas scavenging system for all points of anaesthetic gas use. Gas scavenging systems will be designed to applicable standards including CSA-Z7396.1-12.
- (M) All pipe and pipe fittings will be in accordance to ASTM 88, de-greased copper Type 'L'.

- (N) Ball type shut off valves will be UL labelled showing the appropriate gas service & pressure rating. Valves will swing out during installation and have a quarter turn from full open to close.
 - (O) Area zone shut off valves will be housed in a single box comprised of multiple shut off valves with tube extensions, lexan glass door with hinges and pull out opening ring. Provide pressure / vacuum gauges for each service.
 - (P) Provide medical gases to the LDRP washrooms as per Appendix 3C [Medical Gas and Headwall Requirements].
 - (Q) A central stationary plume scavenging system serving all operating rooms is not required. The Existing Hospital currently has local laser plume scavenging equipment in its operating rooms [Conmed System 5000 ESU with System 1200 Smoke Evacuator] which will be available for relocation by Project Co and continued use in any new operating rooms.
- (3) Performance Criteria
- (A) Provide the medical gas system so that there is a minimum of one zone shut off valve per programmed area.
 - (B) All medical gas valve stations are to be provided with backfeed capability.
 - (C) All medical gas piping, including in normally inaccessible areas (e.g. behind walls and boarded ceilings), will be clearly identified.
 - (D) All piping, valves and filters will be factory cleaned and capped or sealed to prevent contamination.
 - (E) Provide a future valved connection within each zone of all systems.
 - (F) Provide a local alarm panel for each zone. Local alarm panels may be combination valve box/alarm panel. Alarm panels will be connected to emergency power. Provide a master medical gas alarm panel to monitor all medical gas functions. Remote alarm annunciation will be provided at a location with 24 hour continuous monitoring by personnel. Provide an inter-connected status and alarm point and signal to the BMS.
 - (G) Within the plant operations and maintenance department, a master medical gas alarm panel shall be provided. Provide a second, fully redundant, master medical gas alarm panel, located within a 24 hour supervised area.
 - (H) Individually connect all alarm panels to the BMS. A single connection to the master alarm panel is acceptable, provided that the BMS can read alarms from all panels. Provide an alarm Interface signal to the BMS for critical alarms such as low or high pressure.

- (I) All medical gas systems will be certified in accordance with CSA standards by an independent and qualified testing agency. Supply the testing reports to the Authority.
- (J) All systems components requiring electrical power will be on emergency power.
- (K) The medical gas supply system will be for patient consumption only. If equipment and/or procedure(s) require instrument air, provide separate dedicated source equipment, piping, valving and monitoring to accommodate that application.

7.4 Heating, Ventilating and Air Conditioning (Division 23)

(a) Heating Plant:

- (1) Provide a heating plant to provide all necessary heating for the Facility and to meet the heating plant requirements of CSA Z317.2 for a Type A-2 HCF. Determine the design load and redundancy per the requirements of CSA Z317.2 and to ensure the heating plant has sufficient heating capacity to continue operations in Surgical Services (Component 4.0 of the Clinical Specifications) at all times of the year and heating required by building systems in a post disaster event.
- (2) Apply energy recovery systems to offset plant heating requirements. Provide analysis of energy savings, life-cycle costing, and maintenance concerns.
- (3) The Existing Hospital utilizes five (5) steam boilers to satisfy the heating and process loads within the building. Project Co may choose to convert these boilers to generate hot water and utilize them as part of the heating and/or humidification systems in the Facility. The steam boilers may not be used to provide heat to the Facility through converters.
- (4) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.
- (5) The renovated heating plant must incorporate a series of biomass hot water boilers, sized at a minimum of 50% of the full heating design load for the entire Facility, as well as propane/fuel oil boilers, sized to meet 100% of the full design load of the Facility. The biomass boilers must consist of a minimum of two boilers and be designed to operate efficiently to meet the domestic hot water load in the summer, meet the heating loads in the shoulder seasons and run at full capacity.
- (6) The design load of the Facility will be as defined by CSA Z317.2 and will include the full domestic hot water heating load. The heating plant to provide a minimum of 100% of the design load with the largest boiler out of service.
- (7) Designs for the biomass boiler system shall include wood pellet storage, conveyance, and an automatic ash removal system with storage. Site planning and biomass conveyance systems must allow for delivery of wood pellets by either a vacuum delivery truck or by B-train.

- (8) The wood pellet storage must be sufficient to supply the biomass boilers for a minimum of 72 hours when all biomass boilers are operating at 100% firing rate. Sizing of the biomass storage system must account for suction line position and maximum fill levels.

The fuel oil storage must be sufficient to supply the fuel oil boilers for a minimum of 72 hours when all fuel oil boilers are operating at 100% firing rate. Sizing of the fuel oil storage system must account for suction line position and maximum fill levels.

The generators are to be provided with a separate fuel storage system, capable of providing 72 hours of usable storage in reserve, considering suction line position and maximum fill levels. If the main fuel oil storage system feeds the generator storage system, the allowance for fuel oil for use in load tests, etc. may be accounted for in the main fuel oil storage tank, otherwise, it will need to be maintained in the generator fuel oil system.

The propane storage must be sufficient to supply the propane boilers for a minimum of 72 hours when all propane boilers are operating at 100% firing rate. Sizing of propane storage systems must account for suction line positioning and maximum fill levels.

Project Co must provide a minimum of 7 days of fuel storage, as per the requirements of the GNWT Good Building Practices for Northern Facilities. This requirement may be split between the three fuel types: biomass, fuel oil and propane.

Should the existing infrastructure be found to be insufficient, Project Co must provide the necessary upgrades to meet the technical requirements and to meet code.

The existing propane tank has been identified by the fire marshal as being too close to the Existing Hospital. The Project Co is required to evaluate the existing propane tank location and make modifications to develop a code compliant solution.

- (9) Each type of boiler must be able to serve any and all heating loads within the Facility.
- (10) The operation of the heating plant must be such that the biomass boilers are always enabled first to satisfy domestic hot water loads and will also serve as a secondary heat source for the Facility heating loads. The propane/fuel oil boilers will be used for satisfying peak loads, after the biomass boilers have reached full capacity.
- (11) The following loads must be fed from the central heating plant:
- (A) All envelope heating loads
 - (B) All reheat loads
 - (C) All outside air heating utilizing a glycol system
 - (D) Domestic hot water generated with indirect heaters

- (12) Design the heating plant to sufficiently meet the maximum design load for all systems served by the heating plant, as well as being capable of controlling and responding to periods of low usage.
 - (13) Provide heating and cooling water connection points at the exterior of the Facility for future connection to emergency backup systems (i.e. portable boilers or chillers). Configure the system to properly utilize this equipment with no modifications.
 - (14) The Existing Hospital utilizes a shell and tube heat exchangers to convert steam from the boilers into hot water to serve the building envelope and reheat loads, glycol to serve the Facility ventilation loads and domestic hot water. This strategy will not be accepted within the new Design. All Facility heating must be by hot water generated through the existing boilers (converted) or new hot water boilers.
 - (15) Provide separate standalone steam generators for all steam uses within the Facility. Provide separate steam generation systems for humidification and process loads.
 - (16) Ensure the feed water quality to steam generators is within the required conditions of the applicable codes, standards, and manufacturer's recommendations for both the generator and the downstream equipment. Steam quality must be condensate free and minimum 97% saturated vapour.
 - (17) Provide connections in the steam system near the point-of-use, which can be used to access the steam for quality measurement.
 - (18) Steam generators serving the MDR must be dual fuel.
 - (19) All existing boiler feed pumps, distribution pumps must be replaced as part of this renovation.
 - (20) Design pumps to operate at the system fluid temperature without vapour binding and cavitation. Pumps will be non- overloading in parallel or individual operation, and will operate within 25% of the midpoint of published maximum efficiency curve.
 - (21) Pump construction and installation will permit complete pump servicing without disrupting piping or motor connections.
 - (22) Provide main distribution pumps with variable frequency drives (VFDs) for motors greater than 5HP for energy savings under part-load conditions. Motor starters will be selected in accordance with the applicable Section within this Schedule.
- (b) Cooling Plant:
- (1) The Existing Hospital utilizes two (2) air cooled chillers to satisfy the cooling loads within the building. Project Co may choose to utilize these chillers in the Facility.
 - (2) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.

- (3) Design the cooling plant to meet the maximum design load as defined by CSA Z317.2 for all systems served by the cooling plant, as well as being capable of controlling and responding to periods of low usage.
 - (4) Provide equipment for all necessary cooling, including the required redundancy in the cooling systems as defined by CSA 317.2, and cooling required by Facility systems in a post disaster event. The redundancy of the cooling plant is to be beyond CSA Z317.2, in that it is to be designed to provide a minimum of 100% of the design day peak load for the entire Facility, as specified in CSA Z317.2, with the largest chiller out of service.
 - (5) Provide 100% outdoor air for free cooling as the first means of space cooling.
 - (6) Chillers will be rated in accordance with ARI 550/590-98. No absorption chillers may be used.
 - (7) Prime mover nameplate ratings for each circuit will not exceed 200 KW for groups A1, A2 or B1 refrigerants.
 - (8) Cooling towers performance will be certified in accordance with CTI (Cooling Tower Institute) Standard STD-201.
 - (9) Provide chillers and cooling towers for ease of operation, accessibility for maintenance, safety and appearance.
 - (10) Installation will comply with ASHRAE Guideline 12-2000 for Minimizing the Risk of Legionellosis Associated with Building Water Systems.
 - (11) Provide emergency power provisions to ensure that all Type 1 rooms are provided with cooling in the case of a power outage.
- (c) Space Heating and Cooling
- (1) Basic Requirements
 - (A) Provide all necessary space, ventilation and process heating for all building(s) on the Lands.
 - (B) Space heating capacity must be sufficient to meet the required high-end indoor design temperature per CSA-Z317.2-10.
 - (C) All heating elements must comply with CSA-Z317.2. Remove all noncompliant elements (i.e. finned tube radiation) and replace with a suitable alternative
 - (D) All existing piping to be reused must be thoroughly flushed and cleaned. All piping must be visually inspected prior to reuse. A representative sample of 10% of the elbows must be tested using destructive testing to determine adequate pipe wall thickness. Provide test results to the technical consultant for review.
 - (2) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.

- (A) Sources of heating and cooling that serve Type I and Type II spaces will be connected to the emergency power supply. Refer to CSA Z317.2 for space Type definitions.
 - (B) Provide air curtains to all vestibules adjacent to the exterior to prevent cold drafts from entering the adjacent occupied space.
 - (C) Insulate all piping, equipment and accessories in accordance with all applicable standards, including ASHRAE 90.1.
 - (D) Provide seismic mitigation and building separation devices for all piping that crosses buildings and/or utility corridors.
 - (E) Provide adequate expansion compensation for heating, cooling and steam piping.
 - (F) Location of anchors and guides, design of expansion compensation loops and selection of expansion compensation devices will be based on a thorough review of piping layout, and piping stress analysis.
 - (G) Ensure that no air within the air conditioning system, outside of the central air handling equipment, drops below its dewpoint temperature.
 - (H) Provide continuously available chilled water or condenser water systems, or air cooled condensers for all areas containing specialized medical equipment, walk in coolers, Server rooms and electrical rooms for managing continuous internal heat gains. Cooling and heat rejection for these critical loads may be served by the central cooling plant provided the system incorporates redundancy per CSA Z317.2 requirements and is connected to the delayed vital electrical system. Provide domestic water backup cooling on all water cooled essential loads. Design HVAC terminal components in conjunction with equipment location in order to mitigate unnecessary heat gain into the space.
 - (I) The crawlspace currently has a number of air cooled condensing units which reject heat from the year round cooling loads (body coolers, kitchen fridges, CT cooling and LAN and Server room). Should the contractor choose to retain this strategy, all equipment must be relocated into a fire rated room to satisfy the requirements set forth by the Fire Marshall. Provide adequate ventilation to the room to prevent heat buildup.
- (3) Performance Criteria
- (A) Install piping in an orderly manner (aligned with structural elements and at right angles). Slope piping to permit complete drainage of the system. Make allowances in all pipe sizing to provide flexibility for future renovations, in accordance with Section 4.1(c).
 - (B) Heating piping must be configured in a reverse return configuration. Direct return will not be acceptable.

- (C) Equipment and piping will be installed with adequate service space, access panels, and the ability to remove equipment for servicing or replacement. Locate services that require access for regular maintenance above non-critical spaces such as corridors to minimize or eliminate disruptions to the delivery of health care services.
 - (D) All high points in piping will be equipped with air removal devices such as air collection chambers and air vents.
 - (E) Provide isolation valves, unions, and bypass piping to allow for equipment isolation and removal without unduly affecting the system operation or major drain down.
 - (F) Provide ball valves at each side of all zone valves for ease of replacement.
 - (G) Provide balancing valves, flow-measuring devices, temperature and pressure sensors throughout the system to facilitate system balancing.
- (d) Ventilation
- (1) Basic Requirements
 - (A) Provide all necessary ventilation for the Facility.
 - (B) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.
 - (C) The existing air handling units may not be used. The equipment is beyond its useful service life and the Project Co may not incorporate this equipment into the Design of the Facility.
 - (D) Ventilation systems are to be designed to meet all requirements of CSA Z317.02, and 100% redundancy shall be provided for all areas so required by this standard.
 - (E) The air handling equipment for the Facility will be designed to provide 100% outdoor air capability at all times of the year to meet requirements of CSA Z317.2 during catastrophic events. Size heating and cooling equipment appropriately. Refer also to Section 7.4(d)(1)(K) of this Schedule.
 - (F) Design all surgical rooms to support invasive procedures as per applicable CSA Z317.02 guidelines. Operating rooms to incorporate air curtain and laminar flow air distribution system.
 - (G) In addition to the requirements of CSA Z317.2, design the ventilation systems so that all areas designated as outbreak control zones can operate to mitigate the spread of infections during an outbreak. A minimum of two adjacent inpatient units shall be operated as an outbreak control zone. The ventilation system will be capable of being:

- (i) easily converted into a negative pressure condition with respect to adjacent floor areas by proportionally changing the supply, return, and exhaust air ratio for all rooms within the zone; and
 - (ii) easily configured to ensure that no airborne infection can be re-circulated into any ventilation system from any outbreak control zone.
- (H) Provide an HVAC system that maintains appropriate pressure relationships between various areas of the Facility and provides necessary outdoor air quantity, air filtration, cleansing and exhaust to control the transmission of infection. Refer to applicable infection control standards and CSA Z317.2 for the relative pressurization and other minimum indoor air quality requirements for the Facility.
- (I) Provide HVAC systems with adequate backup capacity and equipment redundancy to ensure continuous Facility operations at all times.
- (J) Provide air handling units with sectional heating and cooling coils and manual isolation valves that will enable isolation and repairs to the damaged sections of coils without stoppage of the system.
- (K) Design and construct the Facility to comply with the requirements of CSA Z317.2 (Special Requirements for Heating, Ventilation & Air Conditioning Systems in Health Care Facilities) for a Class A-2 HCF (Health Care Facility), except as follows:
 - (i) Surgical Services (Component 4.0 of the Clinical Specifications) will have 100% redundant air handling unit systems, and will meet CSA Z317.2 for air change rates and will operate with continuous 100% outside air;
 - (ii) each of the air handling units serving the Medical / Surgical Inpatient Units in the Inpatient Services, as per the Clinical Specifications, will have interconnected air handling equipment to provide adequate redundancy. The redundancy for critical spaces being served will provide sufficient fresh air and filtration as outlined in CSA Z317.02;
 - (iii) all air handling equipment serving inpatient areas shall implement multiple fans or a fan wall within a single air handling unit cabinet; and
 - (iv) all air handling units must be located inside of a mechanical room. No outdoor units are permitted.
- (L) For the purposes of infection control during future renovations, provide a damper on each supply, return and exhaust duct main as it enters each unit and floor. Dampers are to be of sufficient quality to ensure minimal leakage of airflow. Provide an endswitch on each damper to ensure isolation has been achieved.

- (M) Provide air filtration in accordance with all applicable standards. All HVAC systems will perform such that any indoor contaminants are maintained at less than 50% of their occupational exposure limits (OELs). Provide MERV 15 and carbon filters on all air handlers serving Type 1 rooms to eliminate outside odors from forest fire smoke and diesel fumes.
 - (N) Provide dedicated supply air with HEPA filters for spaces as required by applicable standards.
 - (O) Design operating rooms as Type 1 – specialized rooms as described in CSA-Z317.2-10.
 - (P) Provide fans with variable frequency drives (VFDs) for energy savings under part-load conditions.
 - (Q) Air handling equipment will be factory-fabricated to ensure the highest construction standard.
 - (R) Provide vandal-proof HVAC fixtures in safe and seclusion rooms, and other areas where psychiatric patients may be present and unsupervised.
 - (S) Ensure the ventilation systems are designed to accommodate any additional ventilation supply needed for commercial spaces, to maintain proper pressurization throughout the Facility. Provide sufficient make up air for all NFPA-96 commercial exhaust hood systems. Make allowance within the base building systems for any future make-up air systems needed for future tenant fit-outs of the commercial spaces.
 - (T) Ensure the ventilation of residential dryers and range hoods exhaust air is ducted to the exterior. If the ducting exceeds the dryer's maximum allowable distance, provide a booster fan.
 - (U) Apply CSA-Z317.2-10 and ASHRAE standard 170-2008 for space pressurization and minimum air change rates. If the standards differ apply the most stringent requirement.
 - (V) Procedure Rooms that fall under CSA Z317.2 – Table 1 as Minor Surgical Procedure and Trauma Rooms, along with CSA Z8000 – Table 9.5 Items 20-22 will have a minimum of 20 air changes per hour notwithstanding that 15 air changes per hour is stipulated in these standards.
 - (W) Procedure Rooms, Isolation Rooms and the entire ICU Department shall be treated as an area of refuge. The air distribution system serving these areas must be suitable to maintain operation during a fire or other emergency.
- (2) Performance Criteria
- (A) Provide indoor air quality (IAQ) plans to meet the Project's IAQ requirements. All ventilation systems to be installed in full compliance with requirements of CSA Z317.13 Infection Control Procedures.

- (B) Incorporate a strategy to allow the installation and removal of major Facility equipment such as fans without disrupting hospital operations.
 - (C) Locate fans, common filters (e.g. HEPA), and other equipment in the central mechanical rooms. Allow for adequate clearance for service access.
 - (D) Provide exhaust systems with bag in–bag out filters and 100% redundancy for Isolation Room exhaust systems.
 - (E) Make allowances in duct sizing and equipment selections to provide flexibility for future changes in spaces. Refer to Section 4.1(c).
 - (F) Provide fresh air intakes, cooling coil drain pans, air handling units, duct mounted humidifiers, ductwork, and all other interconnected components to prevent moisture or contaminants from collecting within the system. Provide sufficient access panels to allow for inspection and cleaning.
 - (G) Fresh air intakes will be located to not entrain contaminants from outdoor sources including existing exhaust points of adjacent buildings. All intakes will be located in areas that are not accessible by the public and will not be located near exhaust air outlets. All outdoor air intakes are to incorporate downturn hoods as described in the Good Building Practices for Northern Facilities. All intakes are to incorporate motorized dampers installed at the exterior wall. Clearances to outdoor air intakes are, as far as possible, to meet those listed in CSA Z317.02.
 - (H) All supply, return, and exhaust air will be fully ducted to the space being served. Ceiling area may not be used as return air plenums.
 - (I) Insulate all ductwork to all applicable standards, including ASHRAE 90.1 and the National Energy Code of Canada for Buildings.
 - (J) Provide seismic mitigation and building separation devices for all ductwork that crossings buildings and/or utility corridors.
 - (K) No in-slab or under slab ductwork is permitted.
 - (L) All fire dampers installed throughout the Facility to be provided with adequately sized and suitably located duct access doors to allow maintainers to perform the annual drop tests required by CSA Z317.02.
 - (M) All ductwork to be cleaned as per CSA Z317.02, and have adequate access doors to enable regular cleaning of duct interiors during the lifespan of the Facility.
- (e) Exhaust Systems
- (1) Basic Requirements
 - (A) Design exhaust air discharges to ensure that there is no cross contamination with outdoor air intakes for the Existing Hospital and any new buildings on the Lands.

- (B) The Project Co is to perform a dispersion model to ensure no cross contamination.
- (2) The Existing Hospital will remain occupied at all times during the course of the Project. All modifications to the existing systems must be phased to ensure continuous service to all occupied spaces. Provide any temporary systems as required to maintain continued service.
- (A) Provide exhaust fans and locate them at the end of the exhaust ductwork systems. Ensure that the fans will be readily serviceable and are separated from spaces that house other mechanical equipment.
 - (B) Integrate the control of the exhaust systems with the ventilation supply air systems for spaces with differential pressure requirements from adjacent spaces.
 - (C) Provide an exhaust air system suitable for Type 1 rooms, the laboratory requirements, surgery rooms, morgue wall mounted autopsy station and any other special venting requirements as per CSA standards. These systems will be interlocked with the supply air systems.
 - (D) Provide commercial-grade NFPA-96 exhaust hood systems where commercial cooking operations will occur within a commercial space. Interlock the hood(s) with a make-up air system to ensure proper pressurization within the Facility is maintained.
 - (E) Provide exhaust systems at the emergency generators for radiator cooling and engine exhaust. Ensure exhaust termination points are located as per Good Building Practices for Northern Facilities so flue gases are not entrained in air intakes, operable windows, or any other building opening for the Facility or adjacent buildings.
 - (F) Make provisions in the Facility exterior for connections of portable negative pressurization ventilation units that are used during future Facility renovations. These connection points will be available for use without adversely affecting the building envelope. Provide sufficient connection points at the Facility exterior so all internal areas can be served by negative pressurization ventilation units.
- (3) Performance Criteria
- (A) Isolation Rooms and their associated washrooms will be provided with dedicated exhaust systems with 100% redundancy. HEPA filters will be provided in the exhaust ductwork in readily accessible locations for servicing.
 - (B) Biosafety cabinets will be provided with dedicated exhaust systems that are appropriate for their class and type. Where multiple cabinets are tied into a common system, a 100% redundant central exhaust system will be provided.
 - (C) Fume hoods and other smoke/fume generating process booths/space will be provided with dedicated exhaust systems that are corrosion/chemical resistant to the exhaust media.

- (i) Ensure all exhaust systems serving clean rooms, or the equipment within, are designed to comply with the most current version of USP 797.
 - (D) Provide dedicated exhaust systems as required for medical equipment. Provide central or built in systems for smoke evacuation in operations or procedures rooms. Do not use portable systems.
 - (E) All ductwork that exhausts humid air at or near saturation will be constructed of welded stainless steel of a suitable alloy, or of a material equally resilient to corrosion. All duct sections will be sloped to drain points and will be accessible for inspection and cleaning.
- (f) Metering Requirements for Energy Measurement and Verification
- (1) Provide meters on all services connecting to the Facility from an external infrastructure including but not limited to domestic water and electrical service.
 - (2) Provide all required meters, sensors, and trend logging equipment at end uses within the Facility to meet the energy monitoring requirements outlined in Appendix 2C [Energy and Carbon Emissions].
 - (3) All meters will be connected to an integrated energy management system to monitor, record, report, and analyze energy consumption. Coordinate electrical metering and the energy management system with the requirements of Section 7.6 Electrical (Division 26).
 - (4) Metering intervals will be fifteen minutes or less.
- (g) Sound Attenuation and Vibration Isolation
- (1) Provide all mechanical systems to prevent sound and vibration transmission between spaces, to prevent transmission from mechanical equipment to the spaces, and to minimize sound and vibration transmission to the outside of the Facility. Provide sound attenuation to limit sound levels in accordance with the Alberta Blue Book (with GNWT revisions).
 - (2) Systems will be provided with noise attenuation screening if the equipment or their exterior openings are located facing and within 200 meters of residential areas.
 - (3) Provide vibration isolation devices on all equipment with rotating components.
 - (4) All hung equipment will utilize spring isolators designed for the weight and vibration characteristics of the equipment.
 - (5) Provide flexible connections where needed to isolate mechanical equipment sound and vibration from ducting, piping and electrical wiring systems.
 - (6) Ensure duct silencers meet or exceed the requirements of the ductwork for cleanliness and inspection. All silencers, VAV box attenuators and acoustic insulation to be lined with rated film liners.
 - (7) Utilize fibre free internal insulation.

- (h) Testing, Adjusting, Balancing (TAB) and Commissioning (Cx)
 - (1) Without limiting Project Co's commissioning obligations under Section 12 (Commissioning) of Schedule 2 [Design and Construction Protocols], Project Co will:
 - (A) perform testing, adjusting, balancing and commissioning (TAB & Cx) of all mechanical equipment;
 - (B) integrate the TAB & Cx into the Project Construction and start-up schedules. Configure the TAB & Cx plan so it will support a phased occupancy of the Facility, if required by Construction conditions and approved by the Authority;
 - (C) utilize a quality assurance system throughout the TAB & Cx process to ensure that TAB & Cx has been performed to all equipment and systems requiring TAB & Cx;
 - (D) demonstrate the quality assurance system to the Authority prior to beginning TAB & Cx;
 - (E) ensure any Construction or installation errors are identified and remedied prior to the start of TAB & Cx functional testing;
 - (F) perform follow-up TAB & Cx services during each season over the first year of the Facility operation;
 - (G) make all TAB & Cx reports available to the Authority;
 - (H) the reports will identify how much additional capacity is available for in all systems, as required by Section 4.1(c); and
 - (I) retain complete records of all TAB & Cx data.

7.5 Integrated Automation (Division 25)

(a) Controls

(1) Basic Requirements

- (A) The Existing Hospital management system is a Johnson Controls Metasys system.
- (B) Provide a building management system (“**BMS**”) for the Facility that performs the following functions:
 - (i) automatically operates, monitors and manages the Facility’s mechanical systems to provide a high level of occupant comfort and maintains a healthy and productive environment without disruption to the delivery of clinical and patient treatment services;
 - (ii) provides an internet based means of external monitoring by the Authority, including all associated hardware and Software;
 - (iii) Interfaces with the Facility mechanical, electrical and communication systems and controls;
 - (iv) meters, trends and archives all data related to the flow of services into and out of the Facility, including domestic water, steam, condensate, medical oxygen, electricity and hot water and takes into account seasonal variations in flow rate;
 - (v) annunciates Facility and equipment alarms, including fire alarm, security alarms, freezer alarms, lab alarms, medical equipment alarms, lighting, UPS, emergency power systems, switchgear alarms, temperature and humidity setpoint deviation alarm;
 - (vi) monitors the status, temperature, humidity, and alarms for equipment including freezers, coolers, labs, and medical equipment; and
 - (vii) acquires and collates all data associated with energy measurement and verification as required by Section 7.4(f).
- (C) Design the controls systems to allow monitoring and operation of the Facility from a BMS location in the Facility, or from any location with appropriate security controls in place via an Integrated building management system over IP (BMS/IP).
- (D) The BMS will be a completely Integrated (front-end and back-end) Native BacNET DDC system.
- (E) The BMS will be non-proprietary and designed with open protocol.

- (F) The BMS will be provided as a complete package from one manufacturer, not a composite system from several. Proprietary systems may be Integrated into the BMS provided there are sufficient control points between the two systems to monitor and operate the system as required by these specifications, and to diagnose problems.
- (G) The BMS will optimize the system performance under all operating conditions to minimize Facility energy usage.
- (H) The BMS will accommodate future technological changes and the architecture of the BMS will permit expansion of the system for future renovations.
- (I) The BMS will be an independent system separate from the fire alarm and other control systems.
- (J) Provide airflow sensors at infectious control isolation dampers in ductwork to ensure isolation has been achieved.
- (K) Provide sensors to monitor outdoor air volumes, space CO2 levels, and other levels as required.
- (L) Provide continuously-operating sensors between all spaces requiring differential pressurization to monitor that the required pressure differential is in place. In addition to BMS alarms, provide local audio and visual alarms at the room entrance and also at the local monitoring station if applicable.
- (M) Provide particle counter sensors downstream of all HEPA filter installations.
- (N) Provide BMS complete with automated fault detection, diagnosis and reporting (AFDDR) Software. Configure and operate the AFDDR Software to ensure Facility systems remain continuously optimized, and the need for fault diagnosis by the Facility operator is minimized. AFDDR Software will provide customizable web-accessible reports available to the Authority.
- (O) Provide a separate physical network and any required network equipment for the BMS.
- (P) All system critical Server/head-end applications which the BMS relies upon will reside on the Authority's Server equipment. All Software systems, platforms and equipment will comply with the Authority's standards.
- (Q) BMS system to include all necessary devices and programming to provide automatic changeover to all backup systems with no unnecessary delays (systems switch over at Type 1 rooms, activation of standby boilers on failure of lead unit, etc.).

(b) Performance Criteria

- (1) Provide an independent control zone for each patient care room. For Type 3 spaces as defined in CSA Z317.2, zoning for HVAC systems will be based on occupancy, room location, room orientation and room heating and cooling loads.
- (2) Zone floor areas to provide control of smoke in a fire situation. Zone floor areas to ensure infection control for each of the care team stations.
- (3) Provide thermostats throughout the Facility as required. Mercury-containing components will not be permitted.
 - (A) Provide adjustable type thermostats in all patient rooms with temperature read out. The temperature range will be controlled by the BMS.
- (4) Provide local pressure control for each isolation room and anteroom. Provide a local annunciator panel located in the corridor outside each of these rooms.
- (5) All components will be designed to default to a safe position upon failure, and will be installed to ensure reliable operation at any failure situation.
- (6) The BMS will monitor, control, indicate alarms, and provide trending where applicable for all connected sensors and control points.
- (7) The BMS will be connected to emergency power and UPS to ensure continued availability during utility power disruptions.
- (8) The BMS will monitor critical alarms for essential building and life safety systems. Critical alarms include:
 - (A) fire alarm system for alarm, supervisory and trouble;
 - (B) all temperature alarms resulting from setpoint deviations;
 - (C) failure of any major HVAC or plumbing equipment;
 - (D) medical gas system high and low pressure alarms;
 - (E) all alarms relating to the fire protection system; and
 - (F) all alarms related to the emergency power generators and transfer switch control system.
- (9) The BMS documentation will include a detailed narrative description of the sequence of operation of each system.
- (10) User Interface will be graphical in nature with animated graphics to indicate equipment operation. Graphics will be grouped in systems and in departments.
- (11) The energy management system will be connected to the BMS. Provide sufficient meters to accurately distinguish between Targeted and Non-Targeted Energy loads, as defined in Appendix 2C [Energy].

- (12) Utilize BMS system to monitor pressurization of Construction areas by tying in sensors so it can be logged and tracked automatically during Construction.

7.6 Electrical (Division 26)

(a) Wiring Methods, Materials and Devices

(1) Basic Requirements

- (A) Use wiring methods, materials and devices that result in a safe, reliable and flexible electrical power, lighting control, communication, data and life safety system.
- (B) Install all wiring in a neat and secure manner so that it is protected from damage, is not in conflict with mechanical or architectural components and allows for future changes and additions.
- (C) Do not install conduit or wiring in floor slabs, except where it is impossible to supply the device from the ceiling, or specific approval has been granted by the Authority.
- (D) Branch circuits from panelboards will be routed to a large pullbox located in the ceiling space immediately above the panelboard for distribution through the above-ceiling service space.
- (E) Colour of power receptacles will be as follows:
 - (i) Normal power – WHITE
 - (ii) Essential power – RED
 - (iii) UPS power – GREY
 - (iv) Housekeeping – BLACK
- (F) All power receptacles will be identified with panel and circuit number. Colour of labelling will be in accordance with Authority colour coding standards as follows:
 - (i) Vital power - RED with WHITE text
 - (ii) Delayed vital power - BLUE with WHITE text
 - (iii) Conditional power - YELLOW with BLACK text
 - (iv) UPS - GREY with BLACK text
 - (v) Normal power - BLACK with WHITE text

- (G) Project Co will obtain approval from the Authority of the proposed classification of all patient care areas in the Facility per CSA Z32-09.
 - (i) The Authority will review these classifications and confirm the areas as basic, intermediate or critical care. Provide as a minimum the circuit and receptacle requirements identified in CSA Z32-09. Where this Schedule 3 identifies requirements beyond CSA Z32-09, comply with the requirements of this Schedule 3.

(2) Performance Criteria

- (A) Utilize non-alloyed copper for all conductors and all conducting components of electrical equipment, which form part of the Facility's wiring systems. Minimum conductor size will be #12AWG. Aluminum conductors installed in conduits may be used for feeders larger than #6AWG.
- (B) All conductors #10 AWG and larger will be stranded.
- (C) Project Co may use Teck cable in mechanical plant rooms and service rooms for connection to mechanical equipment. Teck cable will be installed in perpendicular runs and will be neatly strapped to dedicated cable support systems or tray. Do not support armored cabling from mechanical ducts, pipes or equipment. Where possible, Teck cable runs will be consolidated into common routes.
- (D) Each branch circuit will be provided with a dedicated neutral conductor.
- (E) Provide panelboards and feeders with double neutral(s) capacity where significant non-linear load(s) are anticipated for a data centre, the MCR and the LCRs.
- (F) Conceal all wiring and wiring support systems from public view except where approved by the Authority.
- (G) Separate all wiring for systems of different voltages and from different sources and do not run in common raceways. Maintain adequate shielding and separation between wiring for power and communication systems to prevent interference.
- (H) Provide hospital grade receptacles for all patient care areas. Receptacles in all other areas will be specification grade. Receptacles will be colour coded.
- (I) Utilize stainless steel cover plates for receptacles and switches. Grouped receptacles and switches will have a single cover plate for the whole group.

- (J) Design each room in the Facility such that receptacles and data outlets are distributed throughout the room as required to support functionality and convenient use of equipment by Facility Users and in accordance with Good Industry Practice and as required by other provisions of the Agreement. Provide sufficient quantities of receptacles and data outlets as required:
 - (i) to meet or exceed the requirements of CSA Z32-09; and
 - (ii) to support all of the systems and equipment to be installed or used in the Facility, including any additional power outlets required by other provisions of this Agreement; and as required by Good Industry Practice to provide convenience, flexibility of use and operational support throughout the Facility.
- (K) Unless otherwise requested by the Authority or elsewhere in this specification, provide emergency power per CSA Z32 requirements and for 75% of the receptacles within the Emergency Department. The remainder of the receptacles in the Emergency Department will be provided with conditional emergency power.
- (L) Allow a maximum connection of six general use receptacles to one 20 amp circuit.
- (M) Utilize 20 ampere branch circuit and receptacles throughout the facility except for system furniture and car heater receptacles. Use 15 ampere branch circuits for system furniture and car heater receptacles.
- (N) Utilize NEMA 5-20R 20Amp style receptacles for printers and copiers. Provide 20A rated dedicated circuits for each printer and copier.
- (O) Utilize NEMA 5-20R 20Amp style receptacles for housekeeping staggered on alternate sides of the hallways spaced a maximum of 10 meters apart. Provide 20A rated dedicated circuits for each area, to a maximum of 6 receptacles per circuit.
- (P) Provide duplex receptacles on a minimum of two walls in all offices. Provide two duplex receptacles in a single box at every workstation.
- (Q) Provide a minimum of one 20Amp circuit per four open office workstations.
- (R) Provide a minimum of one 20Amp circuit per two single person enclosed offices.
- (S) In each multi-occupancy office provide a minimum of one quadplex receptacle for each desk or workstation and a minimum of one duplex receptacle spaced every 3 meters of open wall space.
- (T) Each administration workstation will have a minimum of two duplex receptacles.
- (U) Provide a minimum of five duplex receptacles in each exam treatment room, two of which will be fed from vital power.

- (V) Provide a minimum of four duplex receptacles at each clean utility room, 50% of which will be fed from vital power and the remainder connected to conditional power.
- (W) In each care team station, provide one quadplex receptacle spaced 1 m on centre below work counters in knee space or above counter if no knee space is provided. 50% of these receptacles will be fed from vital power and the remainder connected to conditional power.
- (X) In each conference or meeting room provide a minimum of one duplex receptacle spaced every 3 meters of wall space and one duplex receptacle spaced a maximum every 1.5 meters above work counters. In addition, provide receptacles for all dedicated equipment such as microwaves, coffee makers, refrigerators, etc. At all locations with overhead projectors provide 20Amp 120 volt receptacle located at ceiling and provide one 27 mm conduit and pullstring to floor and/or wall outlet for the video signal to the projector. Provide a recessed floor box for under the table with a minimum of one duplex receptacle and two data jacks.
- (Y) Provide two duplex receptacles at each patient treatment bed or care location in patient care areas defined by CSA Z32-09 as "Basic Care Area", and connect one of the receptacles to vital power.
- (Z) Provide six duplex receptacles per patient care location in patient care areas defined by CSA Z32-09 as "Intermediate Care Area", and connect three of the receptacles to vital power.
- (AA) Provide eight duplex receptacles per patient care locations defined by CSA Z32-09 as "Critical Care Area", and connect 75% of these receptacles to vital power. Remainder of receptacles will be connected to conditional power.
- (BB) Provide one duplex receptacle for each electric bed where applicable in all patient care areas and connect to vital power.
- (CC) Provide a minimum of four duplex receptacles at each medication room, connect 50% of these receptacles to vital power.
- (DD) Provide one duplex receptacle for every 35 square meters, or portion thereof, of service, housekeeping and storage space. A minimum of one duplex receptacle will be provided per room.
- (EE) Provide special receptacles for fixed and moveable equipment as defined in the Equipment List.
- (FF) Provide each workbench in the biomedical technical work area with one 50A, 208V outlet, plus two dedicated 20A, 120V circuits each of which serves a six outlet power bar. One of the 20A circuits will be delayed vital power. Provide a recessed floor box in the centre of the room with a minimum of one duplex receptacle and two data jacks.
- (GG) Install approved fire stopping to maintain all fire separations and as required by local governmental authorities.

- (HH) Provide a duplex receptacle for every two parking stalls for car engine heaters except for the main parking lot. Feed these receptacles from dedicated panelboards complete with a network meter. Network these meters with the electrical metering system.

(b) Raceways

(1) Basic Requirements

- (A) Provide raceways for all wiring and cabling to support, protect and organize all wiring and cabling systems.
- (B) Design raceways to provide ease of access and install with capacity for expansion and change, consistent with the requirements of the equipment and systems that they serve.
- (C) Install all raceways in a neat and secure manner in such a way that they are protected from damage, are not in conflict with mechanical or architectural components and allow for future changes and additions.
- (D) Except as noted otherwise, install power wiring in EMT with steel couplings and connectors.
- (E) Install telecommunication outlets and building system wiring (unless otherwise required by applicable codes and standards) in EMT with steel couplings and connectors and/or cable trays. Install individual steel backboxes for all communication system devices. Conduits connecting to cable trays for communication system wiring will be mechanically connected, completed with grounding bushings.
- (F) EMT is to be surface mounted in service rooms and concealed in ceiling spaces and partition walls. Do not encase EMT in concrete. Use PVC conduit:
 - (i) for power wiring to lighting fixtures and receptacles located in the parkade; or
 - (ii) approved by the Authority as being necessary to achieve a concealed installation in finished spaces such as exposed concrete stairwells.
- (G) Minimum EMT conduit size is 21 mm (3/4"), except that minimum EMT conduit size for each communication or data outlet is 27 mm (1") – see Section 7.7 Communications (Division 27) for minimum cabling requirements for a telecommunication or data outlet.
- (H) Use flexible conduit for all final connections to vibrating equipment, such as transformers and motors.
- (I) Minimum flexible conduit size is 21 mm (3/4") and maximum length of any flexible conduit run is 1.5 metres.

- (J) Except as noted below, armored cable (BX) may be used only for final connections from concealed junction boxes to lighting fixtures on suspended ceilings. The maximum length of any individual piece of armored cable is 3.0 metres.
 - (K) Use rigid PVC conduits for the underground portion of services to lighting and power outlets located outside of a building.
 - (L) Install individual bonding conductor in each conduit and/or raceway.
 - (M) Raceways shall typically be concealed, however, surface raceways may be installed where required and approved by the Authority. Typical areas will include laboratory spaces, workbenches, nurse stations, and other areas where frequent changes in power and telecommunication outlets are likely.
 - (N) Armored cable (BX) may be provided for modular pre-fabrication of non-clinical electrical systems. Modular wiring will consist of pre-cut flexible wiring which will terminate at an easily located and accessible junction box above the ceiling. The junction box will be located in an adjacent room within 3m (horizontally) of the prefabricated unit. Excess lengths of armored cable will be neatly coiled up in the ceiling space to accommodate future changes. All wiring installed in walls will be vertical from device to ceiling space.
 - (O) Armored cable (BX) may be provided for receptacles and light switches for non-clinical administrative areas. All installation of armored cabling will be concealed and will originate from an easily located and accessible junction box mounted above the ceiling of the room it serves. This junction box will only serve one room, and will utilize conduit to home run its circuits back to a panelboard. Armored cable may be daisy-chained within a single wall, but will not extend (i) around a corner, or (ii) horizontally beyond 10 metres of its vertical drop from the junction box. There will be no excess armored cabling in the ceiling space and all wiring will be neatly strapped to the underside of slab, or onto dedicated wire management supports. Do not support armored cabling from mechanical ducts, pipes or equipment, or suspended ceiling systems.
- (2) All power outlet and telecommunication outlet back boxes will be a minimum 4" square welded steel type, equivalent to a Iberville 5200 series.
- (A) Provide cable trays for installation of all communication system wiring for data, telephone, public address and other such systems. Install cable trays from communication rooms and above most corridors. If cable trays pass through walls with fire resistance ratings, provide a non-removable ULC approved firestopping system similar to 'EZPath' raceway or 'Hilti Speedsleeve' of a quantity capable of accommodating the entire capacity of the cable tray. Follow clearances as dictated by CEC clause 12-2200(6) for all communication cabling cable trays.
 - (B) Cable tray will be aluminum or steel wire mesh or ladder type with manufactured fittings. Provide continuous #6AWG minimum bare copper bonding wire which is connected by split bolt to each length of the cable tray. Provide bare copper bonding jumper between the cable tray and every associated conduit to ensure continuous bond between tray and low tension raceways.

- (C) Identify all conduits, raceways, pull boxes, and junction boxes using painted colour bands. Colouring scheme will be determined by the Authority at a later date. Provide all power and communication systems with unique colours in accordance with the colouring scheme. Major colour to be 100 mm wide and minor colour to be 50 mm wide. Identify raceways with coloured bands (using either spray paint or coloured duct tape) at intervals of 6 m, plus at the point where the raceway enters a wall or floor (i.e. raceway is identified on both sides of a penetration to facilitate tracing of raceway). Colour-code all junction boxes using spray paint on the cover. Neatly identify the relevant system and circuit ID using permanent marker pen. Identify parallel conduit runs at common locations.
- (D) Indicate the location of conductors encased or embedded in concrete or masonry by conspicuous permanent markers set in the walls, floors, or ceilings. Markers will indicate each point at which buried conductors penetrate a wall. Markers will indicate encased or buried conductors every 10 meters and at each change in direction.

(3) Performance Criteria

- (A) Construct separate raceways or barriered raceways to isolate systems of different voltages and prevent magnetic interference to low voltage system conductors.
- (B) Design and install raceways without sharp edges or tight bends so that cables can be pulled in or laid in and removed without damage to the cables.
- (C) Provide all cable trays with minimum 50% spare capacity for the installation of future cables. If multiple raceways are required in a group, such as a duct bank or tray system interconnecting two or more major areas, provide matching empty raceway equal to a minimum of 50% of the capacity of the total installed group.
- (D) Provide a minimum of two spare 103 mm conduits with pullstrings from the main electrical room to each sub-distribution room.
- (E) Provide all duct banks with a minimum quantity of 50% spare conduits of the largest conduit size.
- (F) Install all conduits in finished areas within finished walls and above finished ceilings.

(c) Electrical Utilities

(1) Basic Requirements

- (A) Coordinate with the electric utility for service to the Lands. The Facility will be served by a utility owned transformer. The existing one will have to be replaced with a larger one. The minimum size of the utility transformer shall be 2500 kVA.

- (B) Coordinate with Northwestel Cable and provide fibre and cable TV services to the Lands. Consult with the Authority and provide redundant fibre and copper services to the new Main Communications Room (MCR).
 - (C) The main electrical room will be designed and constructed to facilitate future expansion with minimal disruption to Facility operation and continuity. The Facility will be constructed with all necessary infrastructure including spare capacity, spare circuit breakers, physical expansion space, ducts stubbed out from the building footprint and capped off for easy future extension, pull- pits, sleeves, housekeeping pads, wiring, controls, distribution routes, and ventilation as necessary to accommodate the future system expansion.
- (2) Performance Criteria
- (A) Design the electrical systems and equipment to comply with the NBC requirements for a post-disaster facility.
 - (B) Design the electrical and communication rooms to be accessible to authorized personnel only. Provide security measures as required by the Authority including access controls.
 - (C) Incorporate design features and practices to reduce arc flash hazards on electrical systems such that routine operations such as transfer switch operation, opening and closing distribution breakers, and inspection and maintenance activities will require (as defined in Z462) PPE Level 2. No activities will expose personnel to arc flash hazards which exceed the protection afforded by PPE Level 4. Label all electrical supply and distribution equipment down to panelboards, motor starters, and local disconnects with labels as specified by Z462. The arc flash study shall be redone after the actual transformers are delivered so that the actual transformer impedances are in the data set.
 - (D) Utilize technologies such as zone selective interlocking protection, limiting available fault current from transformers, maintenance mode settings of circuit breakers or providing remote control of switching and motorized racking devices.
 - (E) Prepare and submit to the Authority a detailed arc flash study signed and sealed by a professional and provide equipment labelling indicating available energy levels and level of PPE required when servicing the equipment.
 - (F) Provide a fully selective protection scheme for all of the 600 volt circuit breakers on all essential system distribution equipment immediately downstream of the transfer switches, for both utility and generator available fault currents. Additionally, all essential system 600 volt circuit breakers will be fully selective for circuit breaker sizes 150A and larger.
 - (G) Prepare and submit to the Authority a detailed distribution coordination study signed and sealed by a professional engineer.
- (d) Service Switchgear – Over 600 Volts – NOT USED

(e) Emergency Power

(1) Basic Requirements

- (A) Provide a Tier 2 emergency power generating plant comprising a minimum of two diesel powered generators. Generators will be located inside the Facility. The minimum size of each of the two generators shall be 1250 kW.
- (B) Generators will be capable of being installed and withdrawn from the Facility through the air discharge louvers with minimal deconstruction work being required.
- (C) Locate the generators to enable routine and emergency maintenance activities to be performed quickly and efficiently. Removal of the generators from the Lands will be simple and will not require disassembly of the Facility or systems, nor special lifting equipment.
- (D) Generators will not be located where they are subject to damage from vandalism, falling objects or debris, road traffic, fire, flood or adverse weather conditions.
- (E) Generator sizing will include the electrical system spare capacity per Section 5.9(b)(5). Upon loss of one generator, the remaining generator(s) will be capable of supplying the total future vital and delayed vital power systems peak load. The "future vital and delayed vital power system peak load" means peak demand load when the Facility has been constructed to include the future expansion capacity in Section 5.9(b)(5). The electrical system expansion criteria identified in Section 5.9(b)(5) pertains to load growth within the Facility only.
- (F) Spare space is required to accommodate future additional electrical distribution equipment necessary to serve the future site expansion identified in Section 4.1(c). Project Co will provide suitable physical space, ducts etc. required to accommodate the future additional electrical distribution equipment, but no additional electrical capacity is required to be provided for this expansion.

(2) Performance Criteria

- (A) Generators will be supplied by an established supplier of generators to healthcare facilities in NWT. The generator supplier will have a full service repair facility within 8 hours travel time (by road and sea) to the Site. Generator spares will be routinely stocked within the repair facility and will be available on Site within 24 hours.
- (B) The generators will normally operate in parallel and provide features including bumpless (closed transition) transfer operation, load sharing and base loading. It will be possible to use the Facility load as a base load for annual load testing of the generators.
- (C) The generator plant will be designed to minimize noise emissions. Provide high grade exhaust mufflers and other sound attenuation means, as necessary, to achieve a maximum sound level of 50 dBA measured at 7 m from the generator room in any horizontal plane.

- (D) Provide a generator exhaust system to discharge exhaust fumes in a manner that does not create an objectionable odour or noise issue to the Facility or neighbouring properties.
- (E) Provide a fuel system capable of supplying the maximum capacity of the emergency power plant at 100% load (including spare capacity) for a minimum of 72 hours.
- (F) Provide a dedicated load bank connection point for each generator which does not require the disconnection of existing cabling. The circuit breaker will automatically shunt trip the load bank upon loss of utility power to the Facility. Size the connection point for 100% of the capacity of the generator. This point shall be configured as that it can be used for a temporary generator. Provide isolation for the installed generator.
- (G) The essential electrical systems will include tie breakers from the main conditional distribution to each of the main vital and delayed vital distributions. Conditional power will be derived at 600V by means of an automatic transfer switch connected between the generator bus and normal power distributions.
- (H) For redundancy, the conditional power distribution throughout the Facility will include tie-breakers and be sized to provide power simultaneously to both the conditional load plus the larger of the vital or delayed vital loads in that locality.
- (I) Implement redundancy such that if an automatic transfer switch system fails, there is a manual means to restore power to the essential loads in the Facility. All transfer switches will have double sided bypass capability. Transfer switch mechanism will be capable of being withdrawn for servicing while the switch is in bypass mode.
- (J) Transfer switches will be contactor or power circuit breaker type and will be listed to UL1066 (30 cycle withstand rating at maximum available short circuit current) and will not require upstream circuit breakers for protection of the transfer switch.
- (K) Essential power branches will serve essential loads as defined by CSA Z32-09 and as required to meet the Clinical Specifications, including the following:
 - (i) Vital branch loads:
 - 1) Path of egress lighting.
 - 2) Exit signs.
 - 3) Stair and ramp lights.
 - 4) Receptacles and lights in service rooms.
 - 5) Medical gas alarm panels.
 - 6) Elevator cab and machine room lighting.
 - 7) Fire alarm and medical gas alarm systems.

- 8) Telecommunications systems.
 - 9) Public address systems.
 - 10) 50% of receptacles and lights in all patient care rooms.
 - 11) 50% of lights and outlets in care team stations.
 - 12) Nurse call system power supplies.
 - 13) Medical vacuum pumping systems.
 - 14) 50% of receptacles and lights in laboratories.
 - 15) Pharmacy dispensing areas.
 - 16) Equipment indicated on Equipment List.
 - 17) Emergency Department, 75% vital.
 - 18) ICU Department, 75% vital.
 - 19) Lab analyzers.
 - 20) Operating rooms and trauma rooms.
 - 21) Security systems.
 - 22) Medical fridges.
 - 23) Smoke fans.
 - 24) Nurse call systems.
 - 25) Patient wandering.
 - 26) Infant protection systems.
 - 27) Paging systems.
 - 28) Telemetry systems.
- (ii) Delayed vital branch loads:
- 1) Ventilation systems serving patient care rooms.
 - 2) Sump pumps and sewage ejector pumps.
 - 3) Medical air pumping systems.
 - 4) Fire pump and jockey pump if provided. (via integral transfer switch).
 - 5) Fume hoods.
 - 6) Essential heating, ventilation and plumbing systems.
 - 7) Radiology, ultrasound and CT scan equipment as per Equipment List and Clinical Specifications.

- 8) Alarmed freezers and refrigerators.
 - 9) Pneumatic tube system
 - 10) Automated dispensing cabinets for medication
 - 11) Food services freezers and refrigerators
 - 12) Retail services freezers and refrigerators.
- (iii) Conditional branch loads:
- 1) Per CSA Z32-09 Table 7.
 - 2) Food service equipment required to maintain food service during utility power outages.
 - 3) As required by other provisions of this Agreement.
- (L) The BMS will monitor and record emergency loads.
- (M) All elevators within the Facility will operate on emergency power.
- (f) Uninterruptible Power Supply (UPS) Systems
- (1) Basic Requirements
 - (A) Provide UPS power for all areas, equipment, and systems that require a continuous and uninterrupted source of power as per the requirements of this Schedule, Appendix 3A [Clinical Specifications], Appendix 2D [Equipment and Furniture], and for the following additional rooms, equipment and systems:
 - (i) Operating Rooms: Lighting and receptacles (receptacles for housekeeping and power tools are not included);
 - (ii) Care Hubs, Care Team, Collaboration Centres: Select lighting and receptacles;
 - (iii) switchboard;
 - (iv) Generator Room: Select lighting and receptacles;
 - (v) all equipment and systems located in Telecommunications Rooms including Equipment Racks as defined in 7.7.(g).(1).(K);
 - (vi) network equipment for the wired and wireless networks;
 - (vii) wireless access points;
 - (viii) wireless communications system;
 - (ix) nurse call system;
 - (x) public address system;

- (xi) RTLS system;
 - (xii) CCTV system;
 - (xiii) radio system;
 - (xiv) infant abduction system;
 - (xv) patient tracking / wandering system;
 - (xvi) equipment and asset tracking system;
 - (xvii) fire alarm system;
 - (xviii) physiological monitoring system;
 - (xix) staff communication system;
 - (xx) building management system (BMS);
 - (xxi) fixed panic system;
 - (xxii) access control systems;
 - (xxiii) intrusion detection system; and
 - (xxiv) emergency power plant control system.
- (B) Provide two centralized UPS systems, each with a static switch and a wrap-around bypass, within the main electrical room or other suitable space.
- (C) Do not provide small distributed, standalone UPS systems. All equipment shall be supplied from the centralized UPS systems.
- (D) Provide a UPS power sub-distribution system throughout the Facility. At a minimum provide one 42 circuit, 100 A, 120/208V UPS panelboard on each floor of the Facility. Provide additional panelboards as required to meet the requirements within this Section.
- (E) Provide an additional UPS system dedicated to the Operating Rooms, ICU beds and Emergency Department Trauma Rooms. The UPS will have a dedicated minimum capacity of 50kVA for the Operating Rooms and 20kVA for the ICU and Trauma Rooms. This UPS will be capable of running on batteries at full load for a minimum of 30 minutes. Coordinate with the Authority to determine which equipment is to be supplied with UPS power.
- (F) Provide this UPS to meet the requirements of Section 7.6(f)(2). Locate this UPS within the same fire compartment and within 25m of the OR suite.
- (2) Performance Criteria
- (A) The UPS system will be certified as suitable for post-disaster facility.

- (B) Connect UPS units to vital power.
 - (C) Each UPS system will have:
 - (i) external maintenance bypass switch for servicing; and
 - (ii) fully rated internal static bypass switch to bypass UPS in the event of UPS failure.
 - (D) Provide adequate batteries rated for a minimum of 15 minutes at full UPS capacity.
 - (E) Provide an audible warning in the OR Care Team Station, protection services, and switchboard to indicate that the UPS battery supply has less than ten minutes of power remaining. Provide adequate labelling.
 - (F) Provide monitoring of all alarm and trouble conditions of the UPS systems by the BMS.
 - (G) The UPS will be capable of providing adequate fault clearing current for a 100A circuit breaker without operation of the static bypass switch.
 - (H) The UPS utilization voltage will be 120V, however the UPS system may operate at 208V, 480V or 600V.
- (g) Distribution Equipment – 600 Volts and Below
- (1) Basic Requirements
 - (A) Provide electrical power transmission and distribution from the main sources of supply to meet all requirements of the Facility and the Clinical Specifications. Provide electrical equipment to establish a Facility distribution voltage of 600V.
 - (B) Provide one normal power main service transformers. Size the main transformers and distribution system such the transformer is capable of carrying the entire Facility load plus 50% spare capacity
 - (C) Provide rackable power circuit breakers for all circuit breakers upstream of the transfer switches. Provide portable motorized operators for these circuit breakers to reduce the arc flash exposure hazard.
 - (2) Performance Criteria
 - (A) Protect the main electrical room from ground water infiltration and separate it from plumbing and mechanical equipment. Provide raised housekeeping pads, drainage and sump pumps (on vital power) as required in electrical service areas to mitigate the risk of flooding. Design the electrical room to be readily accessible, secure, well ventilated and free of corrosive or explosive fumes, gases or any flammable material. Establish routes clear of obstruction to and from the electrical room which facilitate the addition and removal of the largest current and future components located within the room.

- (B) Locate major electrical equipment to minimize run length of feeders and branch circuits, and locate within the Facility so as to provide a clean, dry, safe, accessible installation protected from unauthorized access.
- (C) Locate and design electrical equipment for ease of maintenance and with due regard for future expansion and renovation.
- (D) Provide all circuit breakers 150A and larger with electronic trips and LSI field adjustable settings.
- (E) Provide a ground fault protection scheme such that ground faults are selective between the transformer and generator main circuit breakers and the downstream breakers sized 200A and larger.
- (F) Install 120/208V dry type transformers for small equipment loads in electrical rooms on concrete pads or suspend from structure. Install transformers so that removal can be facilitated without removal of any other equipment or conduit serving the room, except for luminaires.
- (G) All transformers will have copper windings and be rated minimum K-13. Provide areas with significant non-linear loads with transformers with a higher K-rating.
- (H) Rate all distribution devices to handle available fault duty at line terminals. Perform a computer generated fault study to ensure that all devices are properly rated. All circuit breakers 150A and larger will be fully selective.
- (I) Design and install protection equipment so that the initial electrical installation, future additions and modifications will be fully coordinated to isolate only the faulty portion of the system.
- (J) Select, configure, locate and install all components of transmission and distribution systems to minimize the transmission of noise, vibration or unwanted heat into other parts of the Facility.
- (K) Provide a networked digital metering system to monitor and record electrical loads and quality of power in the Facility. Provide, as a minimum, one for the main switchboard, the generator distribution panel, and one for each transfer switch. These meters shall provide maximum demand ratings.
- (L) Provide power factor correction equipment within the Facility to ensure the Facility's power factor does not fall below the threshold established for electrical utility surcharge. Coordinate capacitors with adjustable frequency drives and other harmonic generating equipment to avoid resonance conditions.
- (M) Provide dedicated transformation equipment for diagnostic imaging equipment as required by the imaging equipment vendors.
- (N) Provide circuit breaker type panelboards fully rated to handle calculated fault current level. Series rating of breakers and panelboards is not acceptable.

- (O) Construct flush mounted panelboards with two spare 53 mm conduits stubbed into an accessible location above the panel. Do not feed panelboard from below. All feeders must be routed down from the ceiling for top entry into the panelboard.
 - (P) Provide electronic grade panelboards to serve electronic equipment susceptible to electrical transients.
 - (Q) Install panelboards on the same floor as the loads they serve. Per CSA Z8000-11, all panelboards will be located in electrical service rooms.
 - (R) Do not daisy-chain the feeders to panelboard. All panelboard feeders must be dedicated.
 - (S) Components of the electrical distribution systems in any public, clinical, administrative or staff area will have long life expectancy without perceptible deterioration and a good appearance. Design and install so as to permit easy and complete cleaning.
 - (T) Provide individual enclosed motor starters for individual motors.
 - (U) Utilize motor control centers for groups of four or more motors that require individual motor starters.
 - (V) Motor starters will be combination of magnetic MCP (Motor Circuit Protector) type with integral control power transformers, Hand/Off/Auto (HOA) or Start/Stop control and at least two auxiliary contacts in addition to seal-in contacts. Provide "power on" and "running" LED type indicators on each motor starter.
 - (W) Provide combination starters for all motors 1/2 HP and larger that are not already controlled by adjustable frequency drive or include an integral control package. All motors of 1/2 HP or more will be 600 volt 3 phase.
 - (X) Provide voltage transient / surge protection for the main 600V and 120/208V switchgear loads and all other panels serving sensitive electrical loads including diagnostic equipment, lab equipment and adjustable frequency drives.
 - (Y) Locations of receptacles will comply with the requirements for each program area as described in the Clinical Specifications.
- (h) Metering
- (1) Basic Requirements
 - (A) Supply networked digital metering to provide detailed information about power quality and power consumption including peak demand at key points throughout the Facility. Key points include: automatic transfer switches, motor control centres, panelboards feeding mechanical equipment and power consumed by elevators and dedicated plug-load panelboards. Integrate information from all meters on a common Software platform residing on a dedicated electrical metering Server.

- (B) In addition to the above, provide metering as necessary to support the energy calculations required by Appendix 2C [Energy and Carbon Emissions].
 - (C) Integrate this metering to the site metering system and provide custom energy consumption reports as required by the Authority.
 - (D) Implement a networked metering system with terminals for maintenance and plant administration, and data transfer to the BMS.
 - (E) Connect electrical demand and consumption meters to the BMS.
 - (F) Design the digital metering system to be accessible from any Authority networked computer using appropriate Software.
 - (G) Provide to the Authority five Software licenses to enable access to the Facility metering system from remote Authority sites. These licenses will enable the Authority to access real time data, peak demand data, and to produce custom reports on energy consumption at the Facility.
 - (H) Provide monthly reports which summarize total electrical energy consumed by the regulated and non-regulated loads.
 - (I) Include trend logging equipment sensors to comply with and fulfill energy measurement and verification requirements. Logged information will not be overwritten and will be archived.
 - (J) Metering intervals will be 15 minutes or less.
 - (K) All metering information and records will be accessible to Authority personnel upon request.
- (2) Performance Criteria
- (A) Include metering displays at all distribution switchboards.
 - (B) Design the metering system network to store historical data and with the capability to generate user configurable electronic and printed reports on demand.
 - (C) Support the metering system by a backup power source(s), which ensures operation when the metered circuit is de-energized. The metering system will not be dependent on power from the metered circuit for its operation.
 - (D) The metering system will, at a minimum, provide the following information about each metered circuit: Phase-to-Phase Voltage (all phases), Line-to-Neutral Voltage (all phases), Phase Current (all phases and neutral), KW, KVA, Power Factor, KWH, VAR hours, maximum kW demand and maximum kVA demand.
 - (E) Utilize power quality type meters for monitoring harmonics and surges / sags. Provide power quality meters capable of monitoring harmonics on the normal, vital, delayed vital, conditional and UPS switchboards.

- (i) Grounding and Bonding
 - (1) Basic Requirements
 - (A) Provide grounding and bonding for all electrical equipment and systems in the Facility for the safety of people and for protection against damage to equipment or property in the case of a fault occurring in any of the equipment or systems. Install grounding and bonding as required by all applicable standards.
 - (B) Provide supplementary grounding per CSA Z32 in areas identified by the Authority as patient care areas.
 - (2) Performance Criteria
 - (A) Utilize non-alloyed copper for all conductors and all conducting components of electrical equipment which form part of the grounding and bonding systems in the Facility.
 - (B) Provide solid system grounding including conductors and bussing. Provide complete new main system ground to ensure suitability and longevity.
 - (C) Provide a minimum #12 copper bonding conductor in each and every conduit or raceway. Provide a #6 copper bonding conductor on each communications tray and ensure each section of the tray is securely bonded.
 - (D) Provide equipotential grounding systems and equipment for all patient care areas. Provide a #6 AWG copper bond from the panelboard to each room reference ground bus RRGB in each patient care area. RRGB will be located in a flush mounted enclosure, installed below the ceiling on the left hand side of the door upon entering the room. All branch circuits serving the patient care area will be routed through the RRGB enclosure. Provide a stainless steel cover over the enclosure with an identification label on it.
 - (E) Bond all exposed non-current carrying components of communication, radio or television equipment in patient care areas to ground using a properly sized equipment bonding conductor. Uniquely identify each bonding conductor at each end.
 - (F) Provide lightning protection. Complete a lightning protection study for the Facility to determine extent and means of lightning protection, with such study performed by a specialist in lightning protection work and signed and sealed by a professional engineer registered in the Northwest Territories and Nunavut.
- (j) Seismic Requirements for Electrical Systems
 - (1) Basic Requirements
 - (A) Provide seismic restraint for all electrical equipment and components of electrical systems. Design the electrical systems and its associated equipment to comply with the NBC for a post-disaster facility.

- (B) Provide seismic restraint systems and methods that facilitate ease of maintenance and ease of replacement and reconfiguration of electrical equipment and systems and other equipment and building components.
 - (C) Provide seismic restraint systems and methods that coordinate with the Facility's architecture and finishes. Wherever practicable, conceal components of seismic restraints from public view. Where concealment is not practicable, provide systems that complement the Facility's architecture and finishes.
- (2) Performance Criteria
- (A) Provide seismic support for all electrical equipment and components of electrical systems that have the potential to cause injury or damage during or following a seismic event.
 - (B) Use seismic restraint systems that are designed by a professional engineer, or, where an identified pre-designed standard restraint device or system exists for a particular item, that equipment may be used provided that written confirmation of its acceptability for the installation is provided by a professional engineer. Provide signed and sealed drawings as well as typewritten field reports from a professional seismic engineer. Obtain certification of the main electrical distribution equipment for "seismic withstand capability" and, to maintain the certification, anchor such equipment according to the manufacturer's instructions.
- (k) Power Quality
- (1) Basic Requirements
- (A) Establish and maintain an overall power quality which assures suitable conditions for operation of all electrical and electronic equipment throughout the Facility.
 - (B) Provide equipment and systems which assure that electrical equipment and systems will not be harmed or impaired either by external events or conditions, such as lightning and disturbances on the utility service, or by internal events or conditions generated within the Facility.
 - (C) Meet or exceed relevant standards for power quality where deemed necessary by the Authority and IEEE.
 - (D) Provide harmonic mitigation equipment, as necessary, to ensure that power quality meets or exceeds recommendations in IEEE, including standard 519. For the purposes of measuring the harmonic distortion, the "Point of Common Coupling" will be the incoming service from the utility transformer(s). As part of commissioning, confirm compliance to tables 10-2 and 10-3 of IEEE 519 by field measurements after Facility occupancy and under normal operating conditions.
 - (E) Provide individual harmonic filters ahead of and coordinated with variable speed drive for every motor greater than 7.5 HP.

(2) Performance Criteria

- (A) Provide equipment, such as filters, TVSS (Transient Voltage Surge Suppressor), etc, specifically designed to control and remove all adverse power quality conditions that could damage or impair function of sensitive electronic equipment used in the Facility. Adverse power quality conditions include voltage spikes, dips and droops, transients, harmonics, power factor and radio frequency interference.
- (B) Provide the ability to demonstrate to the Authority at any time that there are no potentially harmful power conditions present and that equipment intended to guard against such conditions is in proper working order.

(I) Lighting

(1) Basic Requirements

- (A) The lighting installed will meet the requirements of the Clinical Specifications.
- (B) Lighting systems will accommodate the needs of Facility staff, patients and visitors, and will support the visual tasks being performed and the desired appearance of the space.
- (C) Provide complete lighting solutions which align with the requirements and recommendations of Section 4 of IESNA-RP29-06. Illuminance levels and design criteria will be consistent with IESNA RP-29-06 Tables 3A and 3B.
- (D) Provide lighting controls with flexibility to adjust lighting to suit functions and activities and permit simple and Integrated control of lighting. Design controls to be easily operated and conveniently and appropriately located for each area and function. Include web-based programmable low voltage system to facilitate user program scheduling.
- (E) Lighting controls will comprise a significant part both of the energy management of the Facility and of the flexibility required to adjust lighting to suit functions and activities.
- (F) Provide luminaires which are easily maintainable (accessible components, quick change capability).
- (G) In patient treatment areas, related patient care support spaces, and anywhere the Authority would use chemical cleaning for infection control purposes, provide luminaires which minimize accumulation of dust and debris and which support the Authority's infection control policies and procedures. Provide and locate luminaires such that they are easily cleaned and of suitable construction to withstand chemical cleaning. The Authority's policies related to infection control will not apply to luminaries in administrative areas, non-patient care support spaces (stores, technical/service spaces, lobbies, cafeterias, stairwells etc.), public spaces, non-sterile corridors, and the Facility exterior.

- (H) An electrically powered "Laser In Use" sign will be located outside any room in which fixed laser equipment is anticipated to be used. The sign will be connected to an internally illuminated switch inside the room labeled "Laser". The switch will be interlocked with the laser equipment such that the equipment will not operate with the switch in the "off" position. Internal illumination of the switch will be on only when the "Laser in Use" sign is illuminated.
 - (I) An electrically powered "X-Ray In Use" sign will be located outside any room in which fixed x-ray equipment is anticipated to be used. The sign will be connected to an internally illuminated switch inside the room labeled "X-Ray". The switch will be interlocked with the x-ray equipment such that the equipment will not operate with the switch in the "off" position. Internal illumination of the switch will be on only when the "X-Ray In Use" sign is illuminated.
- (2) Performance Criteria
- (A) Provide luminaires that require minimal cleaning and permit practical and easy access and disassembly. All lighting components will be hospital grade.
 - (B) The use of LED lighting is encouraged. Use LED lighting for all exterior lighting, difficult to access interior lighting and dimmable lighting in boardrooms or for accent. Where LED is not used, utilize fluorescent lighting. The use of compact fluorescent lighting for decorative purposes will be kept to a minimum. Use high efficiency electronic fluorescent linear T8 and T5 lamps when possible. Do not use incandescent lighting unless otherwise indicated in this Schedule.
 - (C) Utilize premium grade quality luminaires with emphasis on energy efficiency (69 lumens/watt minimum) and high color rendition (.85 color rendering index minimum for fluorescent fixtures and .85 for metal halide lamps). Where achieving the energy efficiency specified in this Section is not feasible due to functional constraints imposed by the task being performed by the luminaire, the luminaire will be exempt from the energy efficiency requirement. Examples of luminaires that are exempt from the energy efficiency requirement include:
 - (i) wall sconces (used for night-time illumination);
 - (ii) medical procedure luminaires;
 - (iii) vandal resistant luminaires; and
 - (iv) task lighting.
 - (D) Lamps will have a colour temperature of 4100K. Provide high CRI/CCT (5000K) for telehealth applications.
 - (E) All exterior lighting will have a colour temperature of 4100K.
 - (F) Exterior lighting including street lighting, pathway, Facility perimeter and parkade will be low glare LED type with full cut off photometrics.

- (G) Utilize program start electronic ballasts for fluorescent lamps with a THD no greater than 10% and no more than 8% for third harmonic. Power factor will be .98 or greater and efficiency will be 90% or higher. Ballasts will be supplied by an established vendor with minimum 10 years history of serving the healthcare sector in North America, and manufactured in a Facility certified to ISO9002.
- (H) Minimize use of battery-operated unit emergency lighting. Battery-operated emergency lighting may be an acceptable alternative as a second level of emergency lighting in areas including inpatient areas, emergency power distribution rooms, and mechanical areas.
- (I) Connect lighting in critical care rooms to the UPS system.
- (J) Utilize low glare, recessed indirect LED or fluorescent luminaries
- (K) Specifically design to eliminate indirect glare in treatment rooms, offices, reception areas, care team stations and other areas where computer terminals and similar screens are available.
- (L) Design lighting in corridors to limit glare to patients being transported on stretchers.
- (M) Provide recessed, adjustable overbed patient exam lights, with a remote or a wand, located in the ceiling at the foot of the bed with the light direction toward the head of the bed. For a representative example, refer to <http://www.healthcare-lighting.com/assets/brochures/2012-cut-sheets/ceiling/ldr-led.pdf>. Refer to the Clinical Specifications for the required locations of such recessed, adjustable overbed patient exam lights.
- (N) Provide separate lighting control for each of the following areas within each patient room:
 - (i) entry (locate control at entry);
 - (ii) handwash sink (locate control at handwash sink);
 - (iii) recessed overbed patient exam lights and recessed adjustable patient exam lights (locate control at headwall);
 - (iv) patient reading light (locate control at headwall and via nurse call);
 - (v) patient area (locate 3-way lighting control at entry/headwall);
 - (vi) family area (locate 3-way lighting control at entry/family zone);
 - (vii) washroom (locate control at washroom); and
 - (viii) night lights (locate one switch at entry).
- (O) Provide two nightlights in patient rooms, one above toilet and the other along the walkway between the patient bed and washroom.

- (P) Design lighting in technology conference rooms and video conferencing facilities to maximize viewing of monitors and screens and provide suitable illumination of people being viewed.
- (Q) Provide special task lighting designed for the types of procedures conducted for rooms and areas where treatment is provided and rooms and areas where specialized analytical or diagnostic work is carried out.
- (R) Provide dimmable lighting in Medical Imaging Rooms and Radiology Reading Rooms.
- (S) Provide ceiling mounted articulated lighting with dimmable controls in all procedure, exam and treatment rooms. Confirm lighting requirements with the Authority.
- (T) Provide ceiling mounted double headed articulated surgical lighting with Integrated controls in the surgical suite and autopsy suite. Confirm lighting requirements with the Authority.
- (U) As architectural features, design lighting in main lobbies, waiting areas and the main entrance with high quality products aesthetically pleasing to the public and staff. Approval is required from the Authority.
- (V) Utilize vandal resistant and dark sky compliant exterior luminaires.
- (W) Utilize LED type exit signs.
- (X) Utilize lighting controls that comprise of a networked low voltage relay switching system with programmed on / off operation and local manual override capabilities for corridor lighting levels. Provide local control from care team stations and reception desks where applicable.
- (Y) Protect lighting controls from unauthorized operation when required to be located in areas accessible to the public.
- (Z) Design all lighting in public and administration areas to be capable of being switched from a central location.
- (AA) In open areas and common areas, zone and subdivide lighting to permit energy management and appropriate control and variation of light levels.
- (BB) Provide local lighting control for each treatment room. Each room will have 2 or more levels of illumination in addition to the off position unless specified otherwise. Lighting will support the clinical functions being performed.
- (CC) Integrate controls in technology conference rooms, videoconference rooms and meeting rooms with equipment controls and control stations in the room so as to permit the conference manager to vary the lighting as required for different activities. Provide a minimum of 2 levels of lighting control. If it is proposed that existing equipment is reused and cannot be integrated, contact the Authority to discuss options.

- (DD) Provide manually operated lighting controls, where required, of a type which can be completely cleaned and disinfected without requiring any disassembly, and which will not deteriorate or be otherwise adversely affected by frequent cleaning and disinfection.
 - (EE) Install specifically rated lighting controls for the application/condition in locations where they may be subjected to excessive moisture or to chemicals that might cause deterioration.
 - (FF) Utilize occupancy sensors and daylight control systems to maintain light levels at appropriate levels based upon the occupancy of the room and the quantity of daylight. This will include dual technology occupancy sensors in offices, meeting rooms, restrooms, support spaces, and storage rooms and daylight control systems at perimeter rooms where daylight contribution is significant. Occupancy sensors will have manual override capability to enable full control by occupant.
 - (GG) Provide a time clock, photocell and contactors with HOA switch for control of Site lighting. Submit a control plan to the Authority for approval.
 - (HH) Interface the lighting control system with the BMS (read only) for the purpose of implementing energy management schemes.
- (m) Mechanical Equipment Connections
- (1) Basic Requirements
 - (A) Provide electrical power control and monitoring connections to all mechanical equipment as required for proper operation, protection and maintenance of the equipment. Materials and installation methods will result in safe, reliable and serviceable mechanical equipment and systems in the Facility.
 - (2) Performance Criteria
 - (A) Utilize institutional or industrial quality cables, connectors, conduit systems, fittings and hardware used to make connection to mechanical equipment so as to provide for high levels of reliability, durability and ease of maintenance of the equipment.
 - (B) Design connections made to motors and/or motor driven equipment or equipment with noticeable levels of vibration to accommodate the vibration.
 - (C) Design connections to mechanical equipment to easily permit removal and replacement of the equipment.
 - (D) Size motor control centres, main feeders to motor control centres, and mechanical distribution centres to accommodate the current mechanical equipment with an additional 50% spare capacity.
 - (E) Utilize motor control centres when four 3-phase motors that require a starter are located within 50 m of each other.

(n) Specialty Systems

(1) Basic Requirements

(A) Special electrical and communications systems are required in the Facility (as described in this Schedule) and form essential parts of the Facility. Provide power supply, specially conditioned power and communication conduits and other electrical operational support equipment to meet all requirements of these special electrical and electronic systems.

(2) Performance Criteria

(A) Utilize institutional or industrial quality cables, connectors, conduit systems, fittings and hardware to make connection to special equipment and to provide for high levels of reliability, durability and ease of maintenance of the equipment.

(B) Provide connections to special equipment that easily permit removal and replacement of the equipment.

(o) Clock System

(1) Basic Requirements

(A) Provide a synchronized clock system to assure accurate consistent time is available at key control and clinical spaces in the Facility.

(B) Supply master time controllers and all clocks by a recognized industry leader with all components by the same manufacturer.

(2) Performance Criteria

(A) Provide digital clocks (similar to existing) that can be synchronized and that will receive correction signals from the master clock. Provide UPS power to these clocks.

(B) Locate synchronized digital clocks in areas including:

(i) each patient care area including treatment rooms, patient rooms, care stations, patient therapy rooms, interview/consult rooms, medication rooms, locker rooms, imaging rooms and corridors;

(ii) conference rooms, meeting rooms, care team stations, staff lounges, family rooms, reception desks and staff work rooms; and

(iii) operating rooms, trauma rooms and procedure rooms.

(C) Digital clocks will display numerical values for hours, minutes and seconds, and will have the capability of displaying 12 or 24 hour time format. Displays will be highly visible and legible from a minimum 10 metres away.

- (D) Provide local satellite transmitters to provide signals to all clocks in the Facility where required.
- (p) Fire Alarm System
- (1) Basic Requirements
 - (A) Provide a fire alarm system for the Facility and ensure that that system meets or exceeds the requirements in this Section. If the Existing Hospital remains as part of the Facility, reuse as much as possible of the existing fire alarm system and expand this existing system into the new addition.
 - (B) Fire alarm system must be of a type that failed devices can be rapidly replaced and programmed by Facility operations and not require on-site presence of a manufacturer's representative.
 - (C) Provide a complete two-stage, supervised, 24 VDC fire detection and alarm system that includes addressable, intelligent, automatic and manual initiation devices and audio/visual alarm devices with voice evacuation capabilities. Alarm activation will be initiated by manual pull stations, smoke / heat detection, and fire sprinkler water flow devices. Alarm indication will consist of visual and combination visual/audible devices.
 - (2) Performance Criteria
 - (A) Install all fire alarm wiring in conduit. Provide fire rated cable where required by the NBC.
 - (B) Provide addressable smoke detectors as required, self-correcting type to maintain consistent sensitivity.
 - (C) All Facility addressable fire alarm devices, fire alarms and fire troubles will be incorporated on the Authority's network computers. Ensure that the Facility's fire alarm panel devices and internal trouble condition details print out on the Authority's network printers.
 - (D) Provide two-stage manual pull stations at all exit doors and entrances to exit stairs as required.
 - (E) Provide visual notification devices at all corridors, public spaces, staff and patient and toilets and common use spaces.
 - (F) Provide fire alarm speakers throughout the Facility as required. Speaker system will be available to announce alarm conditions and for use as emergency public address announcements.

Provide a telephone Interface to the fire alarm voice paging system from the main switchboard. Pre-programmed messages will be transmitted over the public address system to annunciate origin of alarm. Any program sources on the public address system will be muted while alarm messages are transmitted.

- (G) Use combination audible alarm and visual notification devices where applicable.
- (H) Include control devices and connection to close fire and smoke doors on activation of alarm condition.
- (I) Incorporate smoke control systems with control fans and dampers.
- (J) Provide a class A addressable loop for all detection circuits.
- (K) Provide isolation modules at each penetration of a fire wall within the fire alarm zone.
- (L) Fully Integrate the fire alarm system with the sprinkler system, BMS, HVAC system, elevator controls, access control system, nurse call, emergency generator plant, and public address systems.
- (M) The fire alarm system will Integrate with the radio system to automatically broadcast voice messages to all protection services radios. The voice message will relay the specific alarm message produced by the addressable fire alarm system. Provide all middleware and converters required to Interface the radio system with the fire alarm system.
- (N) Provide an active graphic annunciator to match the existing, complete with LCD display at the main reception area for the Facility, as required and approved by the local fire department.
- (O) Provide LED type indicators for remote indication that a heat and/or smoke detector has been activated in a lockable room (located outside room adjacent to door), in an elevator shaft (located at elevator lobby ceiling) or duct sensors that are not readily visible (located on ceiling or at visible location nearest to sensor installation).
- (P) In consultation with the Authority, provide remote annunciators at key locations throughout the Facility. At a minimum, these will include maintenance workshops, boiler house and security offices. This information shall also be displayed at the nursing stations on a small LCD display to match existing.
- (Q) Provide a central monitoring system located at the Facility security centre. This computer workstation will display a graphical representation of the Facility and will indicate the general origin of the fire alarm, trouble, supervisory condition or system event. Supplemental 'drill-down' detailed maps of each building and fire compartment will allow staff to identify the exact location.
- (R) Provide a fireman's handset from the fire alarm system to a location of the Authority's choosing, such that the fire alarm voice paging system is capable of performing as a redundant public address system.
- (S) Coordinate with the Authority to establish a secure backup of the fire alarm system event log.

- (T) Provide a fully functional supervisory fire alarm computer workstation in maintenance department.
 - (U) Provide a printer with each fire alarm workstation to generate a hard copy of the system's event log.
 - (V) Provide gel electrolyte type batteries with overcharge protection for FACP and all transponders. Provide solid state battery charger(s) with capacity to recharge entire battery system in 4 hours. Batteries will have enough capacity (with 25 percent spare time) to operate entire system (except magnetic door holders) in accordance with the NBC.
 - (W) Include transmission of alarm signal to remote emergency response centre approved by the Authority.
- (3) ICT Categorization
 - (A) Software and Server – ICT Category A
 - (B) Infrastructure – ICT Category A
 - (C) Interface – ICT Category A
 - (4) Interface Requirements
 - (A) Public Address System, Elevators, Building Management System, Nurse Call System, Staff Communication System, Intercommunication System, Access Controls, Telephone Equipment, Radio System, CCTV
 - (5) Systems Operation – Operating Period
 - (A) End User Administration – Project Co
 - (B) Systems Lifecycle – 25 years

7.7 **Communications (Division 27)**

- (a) Principles, Guidelines and Assumptions
 - (1) New Project Co Servers will be located within the new Main Communications Room (MCR). Any Authority supplied Server equipment will be located within the Authority's Existing Data Centre.
 - (2) The management of all the Authority's employees' and patients' information is the responsibility of the Authority.
 - (3) Except as expressly stated otherwise Project Co will be responsible for designing and constructing all required Infrastructure, Servers and Software required to support the communication systems to be included within the Facility.

- (4) The City of Yellowknife currently has radio equipment located in the Existing Hospital penthouse, and antennas/dishes on the penthouse roof, which they use for fire, ambulance and bylaw services. This equipment is currently being upgraded, with new equipment replacing old, and this work will be complete prior to start of new Construction for the Facility. If Project Co's Design modifies the Facility to a height that will impede communication paths from this existing equipment, including microwave transmissions between the Existing Hospital and the Yellowknife airport and between the Existing Hospital and the Yellowknife city hall, as well as UHF radio transmissions from the Existing Hospital to surrounding emergency response teams and vehicles, then Project Co. will coordinate with the City of Yellowknife and RCMP to provide a new tower location on the highest point of the Facility. This new tower may be combined with the Emergency Operations Centre tower, as noted in Sections 5.3(i) and 5.3(j) of this Schedule, to provide a single tower adequately designed to support both the Emergency Operations Centre and City of Yellowknife/RCMP communications.

(b) Basic Requirements

- (1) The communications systems in the Facility will be an extension of the Authority's communications systems, and must meet all of the Authority's standards at the time of procurement. Project Co will ensure that all new technology, systems, and equipment are fully compatible and seamlessly Interfaced with the existing systems and equipment used at the Authority.
- (2) All applications used in the Facility for clinical purposes will be provided by the Authority.
- (3) The communications systems will be proven technology for use in facilities similar to the Facility.
- (4) All communications systems Infrastructure and equipment provided by Project Co and not covered by existing Authority standards will be the latest proven version of the equipment at the time of procurement.
- (5) Communication systems utilized in the Facility consist of multiple tiers of technical Infrastructure and services applied in support of both clinical and non-clinical Authority services.

(c) ICT Systems and Equipment Categorization and Responsibilities

- (1) This Schedule sets out requirements for information technology and information management systems on a system by system basis. For each system, Construction Period and Operating Period responsibilities for Software and Server, Infrastructure and Interface with Authority systems are set out by category. The following definitions are used:
 - (A) **"End User Administration"** means the day to day end-user configuration required to effectively use an application, including set up of end-user devices, but does not limit the obligations of the party responsible for Software and Server Installation, Interfacing, Commissioning, Maintenance, Renewal or Replacement.
 - (B) **"Infrastructure"** means everything required to support an ICT System except for the required Software and Server(s);

- (C) **“Integrate”, “Integrated” and “Integration”** mean the combining of Software or hardware components or both into an overall system that must be able to physically connect via a standards based Interface to Authority systems if required to pass information, status, or extend system functionality.
 - (D) **“Interface”** means the physical Infrastructure, system components, Software application development, configuration, messaging standards, commissioning and testing necessary to perform data interchange between separate systems. Interfacing of systems will be provided to achieve the Integration of systems which supports the overall clinical, operational and technical functional requirements. For each ICT system required for the Facility, this Schedule sets out a non-exhaustive list of other systems with which the system must Interface with in order to achieve the technical, performance and functional requirements specified within this Schedule for the purposes of integrating into a complete system.
 - (E) **“Server”**: a Server is a computer that provides hosting services for one or more applications including also acting as a data repository. Servers typically have additional processing capacity, memory, and data storage availability than basic or home computers. These requests between clients and Servers are usually transported via standard TCP/IP network connectivity. Examples of Server roles within the Authority include: authentication Servers, application hosting, data repository Servers, web Servers, utility Servers, Facility operation and life safety Servers.
 - (F) **“Service Level”** means the Service Level requirements as defined by the Authority;
 - (G) **“Software”**: also known as applications, Software’s role is to execute computer based instructions resulting in defined outputs supporting the Authority’s end user’s business and clinical workflow requirements, including building control and life safety systems. Software is grouped into two general categories: application based Software and operating system Software (including operating and related utilities).
 - (H) **“System Lifecycle”** means the time periods from Facility completion following which Project Co is required to renew or replace the applicable ICT System and Equipment as set out in this Schedule and its Appendices.
- (2) A summary of responsibilities for **“ICT Systems and Equipment”**, including categorization of responsibility for Server (and all hardware) and Software, Infrastructure and Interface, and including Operating Period is included in Appendix 3D [Information Systems Responsibility Summary].
 - (3) Project Co will be responsible for integrating all ICT Systems and Equipment in accordance with Good Industry Practice with the overall Design of the Facility and will include such ICT Systems and Equipment as part of the Design development process.

- (4) Responsibilities for ICT Categories A, B, C, D and E are as follows:
- (A) **“Category A ICT Equipment”**
 - (i) Project Co will be responsible for Procurement, Delivery, Storage, Setup, Installation, Commissioning, Maintenance, Renewal and Replacement;
 - (B) **“Category B ICT Equipment”**
 - (i) Project Co will be responsible for Procurement, Delivery, Storage, Setup, Installation, Commissioning and Maintenance; and
 - (ii) the Authority will be responsible for Renewal and Replacement;
 - (C) **“Category C ICT Equipment”**
 - (i) the Authority will be responsible for Procurement, Delivery, Storage, Setup, Installation, Commissioning, Maintenance, Renewal and Replacement;
 - (D) **“Category D ICT Equipment”**
 - (i) Project Co will be responsible for Storage, Setup, Installation and Commissioning; and
 - (ii) the Authority will be responsible for Procurement, Delivery, Maintenance, Renewal and Replacement;
 - (E) **“Category E ICT Equipment”**
 - (i) Project Co will be responsible for Procurement, Delivery, Storage, Setup, Installation and Commissioning; and
 - (ii) the Authority will be responsible for Maintenance, Renewal and Replacement.
- (d) ICT Design and Construction Responsibility
- (1) System Design
 - (A) Project Co will design all ICT Systems and Equipment in conformance with the applicable industry telecommunications standards plus the Authority technical standards and Integration, Interfacing, performance and quality requirements as described in this Schedule and its Appendices. In the event of any conflict between standards, the more stringent requirement will apply.

(2) System Procurement

- (A) If a system procured for use in the Facility represents a net new addition to the overall Authority systems inventory, Project Co will ensure that any contract it enters into for that system includes provisions:
 - (i) permitting assignment of the contract to the Authority on the same terms and conditions as included in the contract between Project Co and the system vendor; and
 - (ii) allowing use of the system to be expanded beyond the Facility to other Authority sites provided the associated increase of scope charges are paid;
- (B) Project Co will ensure that all of its contracts for supply of ICT Systems and Equipment:
 - (i) have a defined Service Level commitment that supports the Authority Service Level expectation as detailed in this Schedule; and
 - (ii) have a privacy and security schedule that aligns with the Freedom of Information and Protection of Privacy Act / Personal Information Protection and Electronic Documents Act legislation as applicable;
- (C) Applications, Software modules and any related Software installed, operated or used by Project Co must not interfere with the operation or performance of, or reduce the security or privacy of, any Authority applications or equipment.

(3) System Development/Implementation

- (A) For development and implementation of all systems that will be Integrated with, or that Interface with the Authority's systems, Project Co will obtain approval from the Authority's ICT representative.

(e) Telecommunications Infrastructure

(1) Basic Requirements

- (A) Project Co will design Infrastructure and systems for high availability, performance and security that meets or exceeds the industry standard for use in and support of hospital applications.
- (B) The following network Infrastructure separation will be provided in the Facility:
 - (i) the Authority's network (data, voice, video);
 - (ii) patient monitoring systems;
 - (iii) the BMS;
 - (iv) nurse call system;

- (v) patient entertainment; and
 - (vi) security systems (Division 28).
- (C) Project Co will consult with the Authority and meet all of the Authority's policies and standards for all connections to the Authority's data, voice or video networks. The above list is indicative only and does not limit Project Co's obligation to provide all physical networks required for the Facility.
- (D) Provide systems which promote operational efficiency and Integrate systems where this Integration provides efficiency and operational and cost advantages.
- (E) The communications systems will accommodate all media types, including data, voice, video and public address.
- (F) Train the Authority's ICT specialist(s) on configuration/setup and testing of the communication systems equipment in the Facility.
- (2) Performance Criteria
- (A) IP Protocol will be used for data, voice, and video network based equipment.
 - (B) All network protocols will be IPV4 and IPV6 compatible.
 - (C) Project Co will maintain the manufacturer's warranties on all communications systems equipment and ensure that the warranties are assignable to the Authority.
 - (D) All communications systems equipment provided by Project Co will support all applications run generally by the Authority.
 - (E) All networked equipment provided by Project Co intended for Integration with Authority networks/systems will include any adapters necessary to Integrate with the Authority's IP based network.
 - (F) All technology systems must be approved through regular Authority processes.
 - (G) Provide outside plant cable Infrastructure via physically diverse and redundant pathways to support three (3) external service providers. Outside plant cable Infrastructure will be continuous and terminate within Entrance Facility Rooms within the new Facility. Project Co will terminate all outside plant fibre and copper cables as directed by the Authority.
- (3) Quality Requirements
- (A) Project Co will:
 - (i) use the latest technology for transferring, securing, and storing information available at the date of procurement of the communications system for the Facility;

- (ii) use equipment and materials that are certified and clearly sealed by CSA or ULC or other testing agency approved and accepted by the local inspection authorities; and
 - (iii) comply with all Appendices of this Schedule.
 - (B) In the event of a conflict between applicable industry standards, Authority standards, or this Schedule, the more stringent standard will apply.
- (f) Site Utilities / Access Provider
 - (1) Project Co will coordinate the Design of the Facility with the Authority's telecommunications service providers to achieve two physically diverse and redundant telecommunications entry Infrastructure to the Facility. The redundant services will not share a common duct bank or fire compartment before entry into two separate entrance facilities. Each duct bank will contain four (4) 103mm conduits.
 - (2) For service redundancy, the telecommunications services will originate from separate central offices selected by the Authority.
 - (3) The communications systems that will be Integrated or interoperate with Authority systems will be compatible with the systems of the Authority's service providers as of the date of installation of the systems and be designed to Integrate with the service providers' equipment and, as appropriate, to utilize the Authority's existing service agreements by extending them to the Facility.
- (g) Telecommunication Equipment Rooms
 - (1) Basic Requirements
 - (A) Project Co will provide Telecommunication Equipment Rooms to accommodate the telecommunications Infrastructure and equipment in accordance with Schedule 3 and EIA/TIA standards.
 - (B) "Telecommunication Equipment Room" includes the following room types: Existing Data Center, Entrance Facility Room (EF), Main Communications Room (MCR) and Local Communications Room (LCR).
 - (C) The Existing Server Room will remain within the hospital crawlspace area.
 - (D) Provide an MCR within the Facility and coordinate supporting electrical, mechanical and structural infrastructure to minimize the possibility of being adversely impacted by damaging events (including impact resulting from flood, fire, vandalism, electrical, mechanical or structural failure).
 - (E) Provide and size LCR spaces to accommodate the telecommunications requirements of the Facility, including all required equipment racks, cabling systems and all active and passive network equipment, devices and Infrastructure while adhering to TIA 569-B (CSA-T530) Commercial Building Standard for Telecommunications Pathways and Spaces requirements.

- (F) Entrance Facility Room (EF) – an entrance to a building for both public and private service cables including the entrance point of the building and continuing to the Entrance Room. The Entrance Facility Room accommodates the joining of inter and intra building telecommunications backbone facilities.
- (G) Provide one EF space designed to accommodate the two physically diverse, redundant telecommunications services to the Facility.
- (H) All Telecommunication Equipment Rooms must provide sufficient redundant cooling capacity to permit all racks to be fully populated with a total load of 3kW of conditioned power per rack.
- (I) All Telecommunication Equipment Rooms must provide a minimum of 3kW of fully redundant power from both the UPS and conditional power systems to each rack.
- (J) Telecommunications Equipment Rooms will only serve the floor they are located on and will minimize the distances for cable runs. They will provide easy access for equipment modifications and working space, and will avoid interference with other services and systems.
- (K) Equipment Racks
 - (i) All equipment racks will be provided with a minimum clearance of one (1) meter both in front and behind each rack.
 - (ii) All equipment racks will be four-post cabinet type.
 - (iii) All racks will be seismically anchored to the Telecommunication Equipment Room floor slab with methods approved by the rack manufacturer for such applications.
 - (iv) Each network core rack requires approximately 50 sq ft of floor space with a min distance of 1 meter from any electrical distribution panel.
 - (v) All equipment racks must meet industry standard specifications with front and rear door locks, 42U in size, width=19", depth=39.7", height=78.7".
 - (vi) Provide each rack with sufficient quantity of rack mounted electronic power distribution units (ePDU) to accommodate all rack mounted equipment. ePDU's will be designed for active switching AC power sources. The ePDU will monitor both power inputs and providing a fast switch transfer from 120/208V UPS power to Conditional power source without interruption.
- (h) Structured Cabling
 - (1) Basic requirements
 - (A) All structured cabling will be designed, installed and tested in accordance with EIA/TIA standards.

- (B) The cabling Infrastructure will be universal and support the networks and systems required in the Facility, including voice (VOIP and analog), data, video, and to allow all forms of end-use equipment.
- (C) This Schedule identifies the structured cabling required by the Authority for its own networks. Any cabling required by Project Co to support its own networks will be provided in addition to that identified as requirements for the Authority.
- (D) Project Co will cause:
 - (i) the cabling Infrastructure to be designed by an RCDD;
 - (ii) the RCDD to work with the Authority to complete the physical network design; and
 - (iii) the RCDD to provide, as necessary, a network plan which would include the following: all active network devices, non-Authority applications, all connecting End-Use Equipment and each separate network. Project Co will assist the Authority in the network plan by supplying all necessary information to the Authority about their Facility network. The Facility network equipment is to match the network equipment specified by the Authority.
- (E) Project Co will provide preliminary conceptual drawings of proposed telecommunications outlet locations in advance of the first detailed room review meetings with the Authority.
- (F) As part of the design process, provide detailed plans including risers, rack layouts, telecommunication equipment layout, Infrastructure, raceways, expansion space, and elevations of Telecommunication Equipment Room walls including layouts in each of the Telecommunication Equipment Rooms.
- (G) Create, in consultation with the Authority, an operational plan for the cable Infrastructure, including a management strategy and resource requirements for maintenance.
- (H) Project Co will test all cable Infrastructure in consultation with the Authority. Any cable not meeting the established TIA test criteria will be replaced by Project Co at no cost to the Authority.
- (I) Provide and install a complete structured cabling solution for the Facility in accordance with and all applicable TIA standards.
- (J) Provide separate physical Infrastructure for networks, in accordance in consultation with the Authority, as required for the telecommunications systems and equipment installed or used in the Facility.
- (K) In consultation with the Authority, design and provide physically diverse and redundant structured cabling pathways between the Existing Data Center, Entrance Facility Room (EF), Main Communications Room (MCR) and Local Communications Rooms (LCRs).

(L) Telecommunication Outlets and Data Drops

- (i) In this Schedule and its Appendices, the terms “telecommunication outlet”, “data outlet”, and “communications outlet” are used interchangeably. Notwithstanding any standard referenced in this Schedule, all such outlets included in the Facility will:
- 1) include a minimum of two data drops, with each “data drop” comprising a complete Category 6 structured cabling connection between the RJ45 outlet jack and the port on a network switch;
 - 2) have a minimum conduit size of 27mm;
 - 3) include a 4 port cover plate with RJ45 jacks as required to terminate the supplied cabling, plus blank filler plates on unused outlets;
 - 4) use Category 6 termination technique. No differentiation will be made between data and voice cables.
- (ii) All horizontal cables will be terminated on patch panel termination hardware located in LCR spaces.
- (iii) Provide a minimum of one unused data drop at each telecommunication outlet.
- (iv) Project Co will, in consultation with the Authority, assign each room and space in the Facility a work area data drop density (“High”, “Medium” or “Low”) in accordance with the ANSI/TIA-1179 Healthcare Facility Telecommunications Cabling Standard Table 1. Notwithstanding the quantities defined in ANSI/TIA-1179, Project Co will provide a minimum quantity of data drops as defined below:
- 1) No Data Rooms - no data outlets for the following TIA 1179 defined room types: ‘Janitor Closet’, ‘General Storage’ and ‘Locker Rooms / Shower Rooms’
 - 2) Low Density Work Area – provide 2 data drops;
 - 3) Medium Density Work Area - provide 8 data drops;
 - 4) High Density Work Area - provide 14 data drops.
- (v) Project Co will provide additional data drops in excess of the minimum quantity required by Section 7.7(h)(1)(L)(iv) as required:
- 1) to support all of the networks, systems and equipment (including the Equipment) to be installed or used in the Facility;
 - 2) by Good Industry Practice to provide convenience, flexibility or use and operational support throughout the Facility; and

- 3) to ensure there is one unused data drop for each telecommunications outlet, except for wireless access points.
- (vi) Project Co will design each room in the Facility such that data drops are distributed throughout the room as required to support clinical functionality and convenient use of equipment by Facility Users and in accordance with Good Industry Practice.
- (M) Project Co will co-locate, at each telecommunications outlet location, an appropriate number of power outlets.
 - (N) The Authority will provide equipment, for which Project Co will provide appropriate racks, UPS, power, cooling and connectivity in each Telecommunication Equipment Room.
 - (O) All conduit pathways will have spare capacity at least as per EIA/TIA standards
 - (P) All Telecommunication Equipment Rooms will have physical floor and wall space to accommodate such expansion. Provide adequate floor space to facilitate at least 2 expansion racks to be located adjacent to required racks.
 - (Q) Ceiling spaces will have telecommunication outlets for wireless network access points, information display systems, and other ceiling mounted digital devices. Coordinate locations with other design disciplines to avoid installation conflicts.
 - (R) Provide equipment and cabling labelling as per the Authority's existing standards and conventions.
 - (S) Provide floor telecommunications outlets and floor power to connect floor mounted self-registration systems, electronic directional systems and patient education kiosks, as approved by the Authority.
 - (T) Provide a data outlet for all public phones, minimum 1 per lobby area per department in the Facility.
 - (U) Provide 24 strands of single-mode and 24 strands of multi-mode OM4 fibre-optic backbone cabling between the MCR and each of the following Telecommunication Equipment Rooms:
 - (i) LCRs
 - (ii) EF
 - (iii) Existing Data Centre
 - (V) Fiber-optic cables will be terminated on LC fiber-optic termination patch panels housed within standard racks in the EF, MCR, LCR and Existing Server Room.

- (W) Provide 100 pairs of Cat5E backbone cabling between the MCR and each of the following Telecommunication Equipment Rooms:
 - (i) LCRs
 - (ii) EF
 - (iii) Existing Data Centre
 - (iv) Existing Main Communications Room
 - (X) Project Co will replace all existing cabling in renovated areas of the Existing Hospital with equivalent quantities of Category 6 cabling.
- (i) Equipment
- (1) Project Co's Equipment
 - (A) Provide end-use equipment and communications equipment to provide a fully operational Facility and that Project Co may require for its own use for the performance of its obligations under this Agreement ("**Project Co's End-Use Equipment**").
 - (B) Do not connect any of Project Co's End-Use Equipment to the Authority's network, both wired and wireless, without prior approval from the Authority. Project Co is responsible for paying any additional cost incurred by the Authority for Project Co's use of Project Co's End-Use Equipment on the Authority's network.
 - (C) The Authority will accommodate Project Co's End-Use Equipment that has been approved for connection to the Authority's network.
 - (D) Servers and related equipment for Project Co's End-Use Equipment will be located in the MCR. They will not be located in LCRs.
 - (E) Any wireless devices used by Project Co will not interfere with the Authority's wireless Infrastructure or devices.
 - (F) The Authority wishes to have a single communications Infrastructure but where required this Infrastructure may be physically separated with approval of the Authority.
 - (G) If Project Co elects to reside on the Authority's network, Project Co will conform to all Authority network, end-use standards and will be subject to the Authority's Total Cost of Ownership (TCO) model.
 - (2) Authority's End-Use Equipment
 - (A) The Authority will provide its own end-use equipment and clinical devices (collectively called the "**Authority Supplied End-Use Equipment**") including:
 - (i) computers and peripheral devices, desktop, laptop, point-of-care, tablet, handheld;

- (ii) Servers for the Authority's business and clinical applications;
- (iii) multifunction printers, photocopier, scanner, e-mail, fax;
- (iv) patient identification printers and readers; barcode, RFID;
- (v) clinical dictation devices;
- (vi) computerized registration equipment;
- (vii) computerized information kiosks;
- (viii) telephones, desktop, digital, multiline;
- (ix) telehealth conferencing equipment;
- (x) standard televisions and displays;
- (xi) audio-visual equipment for staff;
- (xii) audio-visual equipment for clinical applications;
- (xiii) computerized medication dispensing systems;
- (xiv) physiological monitoring devices;
- (xv) patient beds and smart beds;
- (xvi) digital signage systems;
- (xvii) digital way-finding systems;
- (xviii) patient entertainment equipment;
- (xix) patient education equipment;
- (xx) staff attendance systems;
- (xxi) Clinical Information System (CIS) Software and Servers:
 - 1) Registration;
 - 2) Scheduling;
 - 3) Health Information Management (HIM);
 - 4) Laboratory;
 - 5) Radiology;
 - 6) Pharmacy;
 - 7) Emergency Department (ED);
 - 8) Surgery;

- 9) Anaesthesia;
 - 10) Acute and Ambulatory Electronic Medical Records (EMR);
 - 11) Documentation;
 - 12) Computerized Physician Order Entry (CPOE);
 - 13) Medication Administration Records (MAR);
 - 14) Care Plans;
 - 15) Point of Care Medication Administration;
 - 16) Device Connectivity;
 - 17) Infusion Management;
 - 18) Smart Pump Programming;
 - 19) Documentation Imaging;
 - 20) Interfaces; and
 - 21) Interface Engine.
- (xxii) CIS hardware, device connectivity engines and adaptors to 3rd party equipment; and
- (xxiii) other technology equipment needed to support the Authority's clinical applications which are not identified in the Project Agreement documentation.
- (B) Project Co will:
- (i) include the installation of the Authority Supplied End-Use Equipment as part of the move-in schedule;
 - (ii) assist the Authority to define locations for the Authority Supplied End-Use Equipment;
 - (iii) provide adequate space, Infrastructure, power, and wired network data outlets for the Authority Supplied End-Use Equipment; and
 - (iv) provide jack number information on the Authority's cable information to the Authority to facilitate placement of the Authority Supplied End-Use Equipment.

- (j) Authority Network
 - (1) Basic Requirements
 - (A) For the Authority's network and patient monitoring network, the Authority will:
 - (i) provide to Project Co network switches for installation by Project Co;
 - (ii) complete all logical network design (excluding structured cabling) and network equipment programming and configuration; and
 - (iii) be responsible for all network management licensing.
 - (B) For the Authority's network and Patient Monitoring network, Project Co will:
 - (i) install all network switches and connect harness cabling; and
 - (ii) complete all physical network design and provide all structured cabling.
 - (C) For all other networks required in the Facility, Project Co will:
 - (i) provide all required network equipment, including network switches;
 - (ii) in consultation with the Authority, complete the logical network design and program and configure all network equipment;
 - (iii) be responsible for all network management licensing; and
 - (iv) locate network and other equipment in the MCR or LCRs.
 - (D) For all of the networks described above, Project Co will mount and connect all network switches, patch panels and patch cables and test all network equipment and cable Infrastructure per in consultation with the Authority.
 - (E) The Authority will provide and manage all firewalls, security and systems for connections to the Authority's networks.
 - (F) Project Co is responsible to provide and manage all firewalls, security and systems for connections to all networks in the Facility other than the Authority's network and patient monitoring network.
 - (G) Project Co will retain a vendor certified network engineer trained on Project Co's network equipment.
 - (H) Redundancy and security will be incorporated in all network designs.

(k) Authority Servers

(1) Basic Requirements

- (A) Authority Servers will be installed in the Existing Data Center by the Authority.
- (B) All Servers will align with Authority policies and operational procedures with regards to security and operations.
- (C) Servers will meet minimum “*Lights out*” requirements where all Servers will have remote access cards and data outlets for remote management and support.

(2) Performance Criteria

- (A) Each Server will require network and power redundancy by means of dual power supplies and dual network Interface cards installed in each Server.
- (B) Project Co will provide structured cabling Infrastructure to support each Server. Each power supply will be connected to separate redundant rack PDU’S and each network card would be connected to separate core routers in the MCR.
- (C) Project Co will provide the cable Infrastructure to support each Server.

(l) Project Co Servers

(1) Basic Requirements

- (A) All Servers must align with Authority policies and operational procedures with regards to security and operations in accordance with this Schedule and its Appendices. This includes aligning to the Authority operating system and hardware patching processes.
- (B) Servers must meet minimum “*Lights out*” requirements where all Servers must have remote access cards and data outlets for remote management and support.
- (C) Servers will be the latest technology, as of the date of installation and will Interface to the Ethernet network via a 1000Mb network Interface card.
- (D) All Servers deployed must align with the Authority’s standards for procuring equipment including hardware models, operating systems, Software licenses, and maintenance and contract agreements. All agreements must be maintained for the life cycle of the hardware and or application.
- (E) All Servers as well as the applications hosted on those Servers must be entered into the Authority’s change management database system as configuration items and dependencies identified and linked. All changes, incidents, and problems relating to said Servers and applications must be managed, monitored, and tracked using the Authority’s change, incident, and problem management processes.

(2) Performance Criteria

- (A) Each Server will require network and power redundancy by means of dual power supplies and dual network Interface cards installed in each Server. Each power supply will be connected to separate redundant rack PDU'S and each network card would be connected in consultation with the Authority.
- (B) All network attached Servers will include the installation and management of antivirus Software that aligns with the Authority's antivirus policies.
- (C) All network attached Servers will include the installation and management of enterprise data backup and retention Software that aligns with the Authority's backup and retention policies and procedures.
- (D) Hardware and Software configuration of Servers provided by Project Co must be reviewed and approved by the Authority.
- (E) Servers for the technology and communication systems will be Microsoft compliant (version acceptable to the Authority) and will be from a common manufacturer.

(m) Telephone Equipment

(1) Basic Requirements

- (A) Design and construct the Facility including Infrastructure to support the Authority's VoIP, satellite telephone, patient telephone, and public telephone systems.
- (B) Project Co may, at its cost, use the Authority phone system for its telecommunications needs. If Project Co intends to use the Authority phone system, Project Co will provide and, in consultation with the Authority, install additional capacity and functionality as required.

(2) Performance Criteria

- (A) Have a public telephone company provide and install pay phones in consultation with the Authority. Project Co will provide Infrastructure as required by the public telephone company to support equipment connectivity.
- (B) The Authority will provide patient telephone system equipment. Project Co will provide all required Infrastructure to support equipment connectivity.

(n) Cellular Services

(1) Basic Requirements

- (A) Project Co will provide Infrastructure required to support cellular antennae systems of the following cellular service providers: Northwestel and Bell.

- (B) Ensure that the system installed supports both cellular voice and data requirements. The system will function effectively in all areas of the Facility, including underground parking if applicable.
 - (C) Project Co will work with the Authority and the cellular service providers to coordinate a transfer of the contract to the Authority upon Service Commencement.
 - (D) At minimum provide the following Commercial and Emergency Response frequency bands via the DAS:
 - (i) Paging;
 - (ii) CELL Cellular/trunked mobile;
 - (iii) LTE Mobile Broadband Services;
 - (iv) Personal Communication Service (PCS);
 - (v) Advanced Wireless Services (AWS); and
 - (vi) Local Emergency Responder (Fire, Police and Ambulance).
 - (E) Provide -60dB signal strength throughout and at the perimeter of the Facility.
- (o) Wireless Networks
- (1) Basic Requirements
 - (A) The Existing Hospital currently has WiFi for telemetry equipment only and not for network use.
 - (B) In consultation with the Authority, design and install a complete and entirely new 802.11 wireless network Infrastructure within the Facility to provide seamless wireless coverage throughout all areas, including new Construction. Project Co will not install any other 802.11 wireless networks in the Facility without written approval of the Authority.
 - (C) Provide structured cabling outlets to support the Authority's wireless network in the Facility with sufficient wireless access point density to comply with TSB-162 (10m x 10m grid) layout.
 - (D) The Authority will procure, program and configure wireless access points and controllers and supply to Project Co for installation.
 - (E) Project Co will install all structured wiring, wireless access points, controllers, and test all cable Infrastructure and wireless system devices for the wireless network in consultation with the Authority. Install all network equipment in accordance with all applicable standards.

- (F) The wireless Infrastructure will service 802.11b (2.4Ghz DSSS), 802.11g (2.4Ghz OFDM), 802.11a (5Ghz OFDM), 802.11n Draft 2.0, or newer (5Ghz and 2.4Ghz MIMO), and 802.11ac wireless communications and data transfer requirements for access by wireless devices to data and voice services within the Facility and across the Authority, via the Authority WAN.
 - (G) Provide a complete structured cabling Infrastructure that will allow the installation of the complete wireless network. Project Co will install telecommunication outlets and access points in consultation with the Authority. Note that the patient monitoring wireless access points will be installed independently from the Authority wireless network.
 - (H) Assist the Authority in planning and testing for the wireless network.
 - (I) Provide WiFi heat maps for the Facility indicating the channel coverage, signal level, data rate and noise floor for 802.11 standard including 802.11b, 802.11g, 802.11a and 5GHz 802.11n wireless networks.
 - (J) Project Co will update the Authority's wireless management applications to include the Facility floor plans including wireless access point locations mapped to a floor plan with RF characteristics defined for structural composition which will include glass, concrete, wood, drywall, metal, and permanently mounted RF obstacles.
 - (K) The wireless network will provide 100% coverage that meets the latest performance requirements throughout the Facility including elevator cabs, mechanical spaces, service areas, and stairwells.
- (2) Performance Criteria
- (A) Work with the Authority in creating an operational plan for the wireless network complete with management strategy alerts notification and resource requirements for maintenance.
 - (B) Retain a RCDD certified network engineer with expertise and experience in working with the Authority approved equipment to design the wireless network.
 - (C) Each wireless access point will have a singular data drop terminated at a telecommunication outlet.
 - (D) Design the Facility to minimize RF interference to the wireless network. The resulting RF environment in the Facility must be consistent with the strictest specifications of the wireless end-use equipment.
 - (E) Provide adequate signal strength to the boundaries of the Facility / Lands.
- (p) Staff Communication System
- (1) Basic Requirements
 - (A) The Authority's wireless network will support a complete wireless staff to staff communication system.

- (B) The staff communication system will allow staff to initiate 2-way voice conversations from their staff communication system device to:
 - (i) other staff communication system devices; and
 - (ii) VoIP telephone.
 - (C) The staff communication system will allow staff to receive 2-way voice conversations into their staff communication system device from:
 - (i) other staff communication system devices;
 - (ii) VoIP telephone;
 - (iii) nurse call consoles;
 - (iv) patient stations;
 - (v) staff / duty station;
 - (vi) external telephone; and
 - (vii) duress / panic system.
 - (D) The Authority will provide all wireless end-use devices and centralized staff communication services.
 - (E) Project Co will ensure that all required systems Integrate with the staff communication system. At the Authority's discretion, some of the system Integration may be performed through the Authority's phone system.
 - (F) Project Co may use a different system for its own communication such as portable radios. Any such devices or system must not interfere with the Authority's wireless communication devices or systems or other devices or systems.
 - (G) The wireless system will function throughout 100% of the Facility, including elevator cabs, mechanical spaces, service areas, parkade, Facility exterior, stairwells, and parking lots.
- (2) Performance Requirements
- (A) Provide adequate space and power outlets for wireless device charging stations inside each department, taking in to account that charging units with multiple devices may cause signal concentrations that impact active unit performance. Sufficient spread of units must be maintained for both charging and storage areas so as not to impact operational performance of active units.
- (q) Real Time Location System (RTLS)
- (1) Basic Requirements
 - (A) The Authority has not selected a RTLS manufacturer and cannot confirm that this system will be provided in the future.

- (B) In consultation with the Authority, design and install WiFi based RTLS structured cabling Infrastructure for the Facility.
 - (C) The RTLS structured cabling Infrastructure will be designed to provide 100% coverage throughout the Facility including elevator cabs, mechanical spaces, service areas, and stairwells.
- (r) Public Address System
- (1) Basic Requirements
 - (A) Provide cable Infrastructure and equipment for a public address system in the Facility, including any parkade. This public address system is intended to be used for general and emergency voice paging. Other communications systems will be also used for routine communications between staff and patients.
 - (B) The public address system will be separate from and act independently of the fire alarm system paging system. Provide interconnects between the systems as required by all applicable regulatory standards or codes.
 - (C) Provide, in consultation with the Authority, Interface to the public address system from the telephone system. The public address system Integration will facilitate single-step dialing from a telephone handset directly to a paging zone. This will accommodate speed-dial functionality.
 - (D) Voice paging will typically be performed via a telephone located at the switchboard. In addition, provide a hard-wired backup microphone in a location to be advised by the Authority in the event the phone system fails. This backup microphone must be able to page the entire Facility.
 - (E) Generally, voice paging will be on an 'all-page' basis. Provide physical zoning of the public address system by department to enable each department to page itself, if so desired.
 - (F) The new public address system will be expanded to any existing areas renovated within the scope of the Project.
 - (2) Operational Requirements
 - (A) Provide complete speaker coverage throughout 100% of the Facility so that emergency voice pages can be heard everywhere in the Facility, including specifically situated speakers within each meeting room, on-call sleep areas, a remote parkade, and energy centre, with high intelligibility and low loss of articulation of consonants (%ALCONS).
 - (B) Provide sound levels as follows throughout the Facility:
 - (i) Normal voice paging: 60 dB minimum.
 - (ii) Voice paging sound levels will be at least 10 dB above ambient noise levels in mechanical rooms and similar locations.

- (C) Provide all equipment necessary for a fully operational public address system, including:
 - (i) paging amplifiers;
 - (ii) flush ceiling speakers in finished areas, with adjustable volume levels;
 - (iii) trumpet type speakers in mechanical and other high ambient locations;
 - (iv) microphone(s);
 - (v) mixers; and
 - (vi) telephone/network system Interfaces.
 - (D) Size amplifiers to handle total load plus 20% spare capacity.
 - (E) Provide telephone access for public address with a maximum delay of 1 second between accessing system and ability to transmit page.
- (s) Intercommunication System
- (1) Basic Requirements
 - (A) Local intercom systems are required at locked entrance doors that delivery personnel or the public will need access through, and at doors provided with access controls as identified in Appendix 3E [Door Operations Matrix].
 - (2) Quality Requirements
 - (A) The intercom systems will be an IP based system manufactured by recognized industry leaders in the intercom business.
 - (3) Performance Criteria
 - (A) Provide a video intercom system at all entrance locations as identified in Appendix 3E [Door Operations Matrix], in consultation with the Authority, and based on the Facility threat and risk assessment.
 - (B) Provide an intercom door-station at the entrance to each inpatient department. Each inpatient department will have master stations at each collaboration station and care hub. Calls from the door-station will be broadcast to each master station simultaneously, and may be answered from any of these locations. Any master station will be capable of releasing the inpatient entrance door.
 - (C) Coordinate the provision of intercom systems for all other areas with the Authority.

- (D) Door stations will be provided as follows:
 - (i) full colour surveillance camera with ability to pan and tilt;
 - (ii) hands-free full duplex audio capability;
 - (iii) push-to-talk/call buttons; and
 - (iv) vandal resistant and weatherproof where required.
 - (E) Master stations will be provided as follows:
 - (i) capable of being desk and wall mounted;
 - (ii) full colour display screen with ability to control pan and tilt of door station;
 - (iii) hands-free full duplex audio capability; and
 - (iv) capability to release to the secure entry door.
 - (F) Provide desk loud-speaking master station with handset at locations as determined in consultation with the Authority, including:
 - (i) each digital imaging control room; and
 - (ii) pharmacy dispensing area.
 - (G) Provide flush wall loud-speaking master station without handset at locations including:
 - (i) digital imaging rooms.
 - (H) Provide dedicated duplex voice intercom system between each seclusion room and the local nurse station. Nurse station will have the capability of turning the volume off, or up, as required. Intercom will be hands free in the seclusion room and will be ceiling mounted behind a guard.
- (t) Video Conferencing and Telehealth System
- (1) Basic Requirements
 - (A) The Authority will provide all videoconferencing systems.
 - (B) Project Co will provide supporting Infrastructure including power, telecommunication outlets, audio-video wiring, raceways, outlet boxes, structural requirements necessary to support the Authority's video conferencing requirements.
 - (C) Project Co will retain audio visual professionals with expertise and experience in the application, use and Integration of audio/video conferencing systems for the design, configuration and Integration of the required videoconference rooms and systems.

- (2) Performance Criteria
 - (A) Design and construct videoconference rooms and locate microphones, video cameras, video monitors, lighting systems and sound attenuation structures/materials to optimize the performance of the video conferencing systems. Follow recommendations described within Infocomm / BICSI AV Design Reference Manual - Latest Edition.
 - (B) Coordinate with the Authority for network access. Video conferencing systems will be configured in consultation with the Authority and adhere to the Authority security and quality of service requirements so not to negatively impact the Authority's network performance in any way.

- (u) Radio System
 - (1) Basic Requirements
 - (A) Provide a new 2-way, multi-channel digital radio system including all required Infrastructure and equipment to support the requirements of the Facility.
 - (B) Provide 20 portable 2-way radios with all required equipment to complete a fully working system.
 - (C) The 2-way radio system will be multi-channel and will meet or exceed the capabilities of the Authority's existing system.
 - (D) The radio system will not be reliant upon the Authority network for continued operation.
 - (E) Provide 100% coverage of the Facility Lands such that radios will work in all interior and exterior spaces/areas.
 - (2) Performance Criteria
 - (A) The radio system will facilitate communication between any Authority telephone and any radio channel.
 - (B) The radio system will be capable of sending text messages from the Dispatch Centre to individual radios and to groups of radios.
 - (C) The radio system will automatically broadcast pre-recorded voice messages from each of the fixed duress locations to all radios.

- (v) Patient Entertainment System
 - (1) Basic Requirements
 - (A) The patient entertainment system will provide patient, visitor, and staff television. The system will be administered after Facility completion under the direction of the Authority.

- (B) Project Co will be responsible for design and provision of the complete Infrastructure, system, and Interfaces necessary to support the system. Project Co will direct and procure services to provide a complete patient entertainment system.
- (C) The Authority will procure and deliver the IP TVs and wall mount brackets for the TVs to Project Co.
- (D) The patient entertainment system will consist of internet protocol based display units (television).
- (E) The patient entertainment and education system will both utilize the same display and audio. User controls for these systems will not necessarily be the same.
- (F) The patient entertainment system will operate over physical networks other than the Authority's network.
- (G) Project Co will be responsible for the complete system design and installation including entrance pathways, demarcation, and distribution. The Authority will be responsible for the ongoing cost of the TV (cable) service after service commencement.
- (H) Patient entertainment outlets will be installed at:
 - (i) each patient bed location, patient care area, and each patient use area in all patient use and patient care areas/rooms/units of the Facility including: General Medical / Surgical Inpatient, Intensive Care / Telemetry, Maternity, Psychiatric, Emergency, Ambulatory / Daycare, Clinics, Surgical Daycare, Outpatient Procedural Care, Cardio-Pulmonary, and Medical Imaging; and
 - (ii) each care team station, care hub, nurse station, staff lounge, waiting room, sunroom, main entrance/lobby area (3 outlets), cafeteria (two outlets), on call room, doctor sleeping room, physician lounge, teaching facility lounge, and sleeping rooms.
- (I) At patient entertainment locations other than inpatient bed locations, Authority staff will control the channels/programming via remote control and will be able to change program channels or television inputs for access to patient entertainment programming.
- (J) At patient bed locations, patients will control content including channels, programming, and volume via pillow speakers connected to the nurse call system.
- (K) At each patient location in all clinical areas:
 - (i) provide a patient entertainment outlet capable of receiving television programming, patient education resources, clinical applications, and internet access.

- (2) Quality Requirements
 - (A) The patient entertainment system will be manufactured by an industry leader and all components will be of that manufacturer.
- (3) Performance Criteria
 - (A) A patient entertainment outlet consists of a quadplex receptacle, one data outlet, and one coaxial cable. A patient entertainment outlet will serve a patient entertainment display, a patient education display, or a combined patient entertainment/education display. All cabling will be connected in the closest LCR.
 - (B) At each patient entertainment outlet location provide sufficient structural support and backing for a 55" display (TV) unit.
 - (C) Arrange for the installation and connection of TV service including the complete backbone, horizontal, and distribution connections throughout the Facility.
- (w) Patient Education System
 - (1) Basic Requirements
 - (A) The Authority intends to provide the application services, programs and electronic educational material that will be displayed via the Authority's network on televisions, patient entertainment displays, video conferencing equipment, information kiosks, tracking dashboards, and personal computers.
 - (B) Project Co will be responsible for design and provision of the complete Infrastructure, system, and Interfaces necessary to support the education system.
 - (C) The patient entertainment and education system will both utilize the same display, audio, and control features.
 - (D) The Authority will provide the head-end components for the patient education system on the Authority's Servers.
 - (2) Performance Criteria
 - (A) At patient education locations other than inpatient bed locations, Authority staff will control the channels/programming via remote control and will be able to change program channels or television inputs for access to patient education programming.
 - (B) At inpatient bed locations, patients will control content and volume via pillow speakers connected to the nurse call system.

- (x) Nurse Call Systems
 - (1) Basic Requirements
 - (A) The nurse call system will utilize the latest proven technology used in facilities similar to the Facility.
 - (B) The nurse call system in a smart hospital environment is a hub for Interfacing technologies and systems. Incorporate in the planning, design and installation the multiple virtual and physical Interfaces, and pathways that are required to support an Integrated patient centric system. Physical pathways, interconnections, and Interfacing are also required to support lighting, blind control, and control of the patient entertainment system from nurse call pillow speakers.
 - (C) Prior to designing and installing the nurse call system and as required by the Authority, coordinate the technical capabilities of the nurse call system, hardware Interface and Integration requirements, system layout, and functionality with the Authority and the Authority's clinical staff.
 - (D) Installation of the nurse call system will be to the satisfaction of the Authority including programming, configuration, Interfacing, testing and commissioning of the system.
 - (E) Train Authority staff on the nurse call system, with training schedule to be determined in consultation with the Authority.
 - (F) Provide a full feature audio and visual nurse call system with full duplex communications in any and all patient use and patient care areas/rooms/units of the Facility including: General Medical / Surgical Inpatient, Intensive Care / Telemetry, Maternity, Psychiatric, Emergency, Ambulatory / Daycare, Clinics, Surgical Daycare, Outpatient Procedural Care, Cardio-Pulmonary, and Medical Imaging.
 - (G) The nurse call system will be:
 - (i) the primary communication device for patients to contact staff in each clinical use and patient care area; and
 - (ii) the primary communication device for Authority staff to alert other staff that they need assistance in a clinical use or patient care area.
 - (2) Quality Requirements
 - (A) Comply with all applicable standards, including UL1069, CSA C22.2 and CSA Z32-09.
 - (3) Performance Criteria
 - (A) In consultation with the Authority, Interface the nurse call system with other systems in a seamless manner to achieve the Integrated functional requirements as determined in consultation with the Authority.

- (B) The nurse call system will be capable of Interface with the Authority's CIS to enable bi-directional communications and transfer of Admit Discharge Transfer (ADT) data.
- (C) Integrate the nurse call system with the Authority VoIP/telephone network and provide sufficient audio channels for use in mobile clinical workflow, in consultation with the Authority, for the requirements of the Facility. Provide all gateway Software and/or hardware required for this Integration.
- (D) The nurse call system will provide a full range of Software applications as offered by the nurse call vendors most current systems intended for use in large acute care facilities. The applications will include system administration and supervision, staff assignment and messaging, staff tracking and presence, workload and workflow management, and statistical reporting.
- (E) The nurse call system will allow the CIS to report from the nurse call system and pull data from the nurse call system for the purposes of reporting Admit Discharge Transfer (ADT) data.
- (F) All data points within the nurse call system will be capable of being retained for the purposes of reporting for a minimum two weeks.
- (G) Provide all network equipment for the nurse call system and Integrate this network, in consultation with the Authority, with other Facility networks.
- (H) Utilize standard Category 6 cabling and connectors for nurse call cabling as applicable.
- (I) Install nurse call terminal cabinets in LCRs as approved by the Authority. All nurse call network horizontal runs will be terminated on dedicated patch panels.
- (J) The nurse call system will annunciate on the wireless staff communication system (staff communication device, wireless phone devices, PDA's or phones) for near instant alarm response as a secondary alerting system. The nurse call system will operate seamlessly with the wireless staff communication devices and allow two-way VoIP communication into all patient locations.
- (K) The nurse call system will utilize VoIP communications between all major components including staff consoles, patient stations, staff stations and all telephones and staff communication devices.
- (L) At a minimum, provide a staff console in each clinical nursing area including care team stations, care hubs, nurse stations, reception, and administrative.
- (M) Staff consoles will be colour, touch screen, user configurable, allow multiple screens, soft key enabled, hands-free full duplex capability with handset for private conversations.

- (N) Staff consoles will have the capability to redirect all calls to other staff consoles on a manual, automatically scheduled basis, call escalation, or console failure.
- (O) Patient stations will be installed at each patient bed headwall location, patient care area, and each patient use area.
- (P) In each General Medical / Surgical Inpatient Room, provide the following:
 - (i) one patient station for each bed location;
 - (ii) one bath station with audio and pull cord capability; and
 - (iii) one pull/call cord station for each patient chair location.
- (Q) In each Procedure / Surgical Room, provide the following additional station:
 - (i) a four (4) button workflow station.
- (R) Patient stations will be individually programmable to allow multiple call classification and priority levels. Patient stations will be capable of connecting two nurse call cords or auxiliary alarm inputs. Provide the ability to disable any nurse call system input from any staff console.
- (S) Patient stations located in psychiatric areas will have a suitable physical barrier, or enclosure that enables staff to prohibit access to the patient station by the patient.
- (T) The nurse call patient station will fully Interface with the full range of smart bed call and audio functions by means of industry standard nurse call bed connector.
- (U) The nurse call system will provide an Interface such that the audio from the patient entertainment/education system will be connected and audible through pillow speakers and/or smart bed speakers.
- (V) The nurse call system will also provide an Interface such that the pillow speakers are capable of controlling patient headwall lighting, and up/down control of the patient room electric blind.
- (W) Provide nurse call cords for each patient station plus 10% spare. 25% of the call cords will be pillow speaker type, with the remainder being standard call cords.
- (X) Provide emergency pull cord stations at all patient bath rooms, shower rooms, and change room locations complete with audio and staff emergency alarms.
- (Y) Pull cords will be washable and compliant with the Authority's infection control policies.
- (Z) Psychiatric facilities will not have cords permanently attached to input devices.

- (AA) Provide multi-call classification dome light (minimum 4 LEDs) to annunciate staff presence, or calls in all rooms with nurse call devices. Locate dome lights in a manner that allow Authority staff the best possible view from the outside of the room where the nurse call device is located. Provide zone lights at all corridor intersections to direct and lead staff from anywhere within or outside the unit to the origin of the call.
- (BB) Provide a code blue system with code blue buttons at locations determined in consultation with the Authority including all clinical use area, patient care area, care team stations, care hubs, nurse stations, reception, administrative, and all patient therapy rooms, patient lounges, procedure rooms, exam rooms and inpatient rooms. Provide a code blue system that is Interfaced with the following systems: access control, Authority network, elevator controls and public address system.
- (CC) Provide a code blue system that achieves the following sequence of operation:
 - (i) Upon a code blue button activation, a priority call signal will be annunciated at the staff console, and a pop-up message will also be displayed on all switchboard workstations that will indicate the precise origin of the code blue call.
 - (ii) Provide dome / zone lights at all corridor intersections and elevator lobbies to direct and lead the code blue team from anywhere within or outside the unit to the origin of the code blue call.
 - (iii) A message will be automatically sent to all unit based staff communication and paging devices as directed and determined by the Authority.
 - (iv) Upon authentication of the code blue event by the unit clinical staff to the switchboard, a code blue signal will be manually initiated by the switchboard staff. The code blue signal will comprise a coded message on the public address system, and a text message which is sent to the code blue team's staff communication devices, and a pre-recorded message to be sent to the radio system.
 - (v) Switchboard staff will also activate an elevator homing command by way of keyswitch at the switchboard location.
 - (vi) Switchboard will also activate a pushbutton which confirms that the code blue event is genuine.
 - (vii) Each code blue team member will have the ability to recall any elevator from any elevator lobby by means of an elevator recall keyswitch. The code blue team will assume control of the elevator by means of a code blue keyswitch located inside each elevator cab.
 - (viii) Upon cancellation of the code blue call at the patient station, all systems will reset and resume normal operation.

(DD) Provide adequate staff / duty stations for each nurse call system to ensure that tones are heard throughout each department. Provide the capability to mute each staff / duty station.

(y) Middleware

- (1) Project Co shall provide all middleware Software and hardware Integration to provide system Interface requirements within their scope. Refer to Appendix 3D [Information Systems Responsibility Matrix] for a list of middleware system Interface connectivity requirements.
- (2) The middleware Software will be a commercial Software product that is proven for healthcare Integration applications in large acute care environments.
- (3) Consult with the Authority clinical staff and program the middleware system to meet the on-going workflow call routing requirements for Interface to all Project Co provided systems.
- (4) Provide web browser based middleware Software that can be accessed by Authority users simultaneously from any Authority workstation with the password authentication.
- (5) Provide training for Authority users in the use of the middleware Software.
- (6) Provide the Authority with customized reporting of middleware events on an as requested basis.
- (7) Record all middleware events in a database. Provide the Authority with electronic format data reports of all database event transactions for archival purposes each quarter (90 days).

7.8 **Electronic Safety and Security (Division 28)**

(a) General

- (1) Project Co will:
 - (A) utilize CPTED (Crime Prevention Through Environmental Design) principles along with workplace safety and security considerations;
 - (B) minimize the visibility of security devices in patient care areas to reinforce the therapeutic nature and residential qualities of treatment spaces. In interior and exterior public spaces such as lobbies, reception and waiting areas, rest areas, access and egress points, security devices may be visible;
 - (C) design the Facility and all outdoor areas with Facility Users safety and security in mind;
 - (D) ensure a safe environment for staff, patients and visitors by proper utilization of electronic access control, duress, video monitoring and intrusion detection systems; and
 - (E) provide a wireless patient wandering system installation for each inpatient unit.

- (2) Refer also to the summary included in Appendix 3D [Information Systems Responsibility Summary].
- (b) Electronic Security Systems
- (1) General
 - (A) Design, provide and install a security system to meet the Authority's security programs within a healthcare facility environment.
 - (B) Provide fully networked Integrated security systems to protect staff, patients, visitors and property. As part of this security management program, at a minimum, provide a closed circuit television system to view and record events, an access control system to restrict access to secure areas to authorized personnel only and to support the safe operation of psychiatric facilities, a patient/infant wandering system, an intrusion alarm detection systems to detect and report unauthorized entry into protected spaces, and Facility wide panic duress system (wired) to protect staff.
 - (C) Develop the security design based on the facility threat and risk assessment by a licensed security consultant.
 - (D) Project Co will be responsible for the initial programming of proximity cards. Project Co will locate all security devices and provide monitoring and alarm annunciation requirements to the satisfaction of the Authority.
 - (E) Project Co will provide control and monitoring for security systems from both a new Security Office in the new Facility and the present Security Office location in the Authority's existing Security Dispatch Centre. Project Co will be responsible for modifying the existing dispatch centre to accommodate new monitors, PCs, hardware and Software infrastructure and all electrical requirements.
 - (F) All electronic security systems will reside on a dedicated Security Systems network provided by Project Co. The Security Systems network will be fully accessible by the Authority via secure firewall connection to the Authority's network in order to allow the Authority the opportunity to control and monitor the status of security systems both locally and remotely.
 - (G) Electronic security systems will be scalable to allow for future additions and interconnections of many devices and subsystems from different manufacturers.
 - (H) The security system will incorporate commercial off-the-shelf equipment and proven designs from manufacturers regularly engaged in the production of models and types of equipment used in the security industry. Products will be quality control tested and verified for the intended operation prior to installation at site.
 - (I) All materials, including hardware and Software provided will be fully compatible with the Authority's head-end systems and the most current version or production model.

- (J) Electronic security systems will maintain dependability and reliability under all operational environmental conditions, capable of 24 hours per day, seven days per week continuous operation.
 - (K) Interconnect security systems to the fire alarm system and other systems as required by applicable codes and standards.
 - (L) Arrange meetings with the Authority to coordinate system design, interconnections and programming requirements to Integrate with the Authority's security systems.
 - (M) Train Authority staff on the use and operation of security systems and location of all security devices. Coordinate and schedule training with the Authority.
 - (N) Security systems Infrastructure must comply with the manufacturer's technical specifications and configuration requirements.
 - (O) All electronic security systems will meet all Authority privacy standards pertaining to storage and operation of devices. Provide all necessary documentation and completed privacy impact assessment (PIA) required to meet Authority privacy/confidentiality standards.
 - (P) Integrate the parking gate control system with the access control system for remote override.
 - (Q) Provide duress stations that are highly visible, illuminated, and accessible. Duress stations upon activation will annunciate locally by means of a minimum 90dBA siren, a xenon strobe, and will be supervised by protection services monitoring, and be Integrated with the CCTV system and radio system.
 - (R) Provide all areas of parking including the parkade with duress stations such that no location in the parkade is further than 30m from a duress station.
 - (S) Ensure that all areas of the Facility interior, including stairwells, are capable of being viewed with either PTZ or fixed CCTV. Coverage will be to a level that will allow facial identification. The term "facial identification" or "facial recognition" means capturing a target's face with CCTV cameras and providing images of 80 pixels per foot.
 - (T) For Facility exterior areas, including parking areas, provide a CCTV solution with 40 pixels per foot resolution.
- (c) Access Controls
- (1) Basic Requirements
 - (A) Provide a new access control system for the Facility.
 - (B) Provide new access control field devices, pathways, wiring, control panels, network equipment and all supporting Infrastructure.
 - (C) Not used.

- (D) The intent at the completion of capital works is that the new access control system in the Facility supports the entire Facility.
- (E) The new access control system will be backwards compatible with the Authority's existing system to allow for a phased transition to the new campus access control system. If the access control system is not backwards compatible to the Authority's existing system, then it will fully Integrate with and utilize the existing database of users, groups, events and schedules. Integration will be such that any change to one system will effect and cause the same change on the other system with no additional input or action.
- (F) The access control system will lock and unlock doors via time schedule and card readers utilizing proximity field effect technology to grant or restrict access to employees via a programmable classification system with sufficient capacity to handle at minimum 65,000 regional employees down to the field panel level, and operate over a standard TCP / IP Ethernet network.
- (G) Refer to Appendix 3E [Door Operations Matrix] for a schedule of doors required by the Authority, at a minimum, to be equipped with card access control.
- (H) All doors that require card access control will be equipped with:
 - (i) door position contacts/monitors,
 - (ii) request to exit sensors, hardware, or pushbuttons,
 - (iii) electric strikes or magnetic locks,
 - (iv) proximity card readers,
 - (v) Interface relays, and
 - (vi) power supplies.
- (I) Locking systems will be fail secure as a preference, or as required by code. The access control and monitoring system will be Integrated with the alarm Interface unit and event recorder providing graphic display of door position status and operating Interface for central locking / unlocking of doors.
- (J) The access control system will permit full control functionality from off-site and on-site workstations.
- (K) The access control system will Interface with the CCTV system such that when an alarm is initiated at an access controlled door all local CCTV cameras associated with the door are displayed at the local security workstation.
- (L) The access control system will Integrate with the infant/patient wandering system to prevent unauthorized egress.

(M) Interface requirements between the access control system and other systems are described in this Schedule and Appendix 3D [Information Systems Responsibility Summary].

(2) Performance Criteria

(A) Refer to Appendix 3E [Door Operations Matrix] for the high level description of functional intent for doors required to be provided with access control.

(B) All access controlled doors will be provided with keyed hardware, on both sides of the door if required, to override all access controls and allow passage through the door in either direction.

(C) All mag lock controlled doors will be able to be manually unsecured by means of a keyswitch which directly interrupts power to the doormag(s). A key override will be provided on each side of the door(s).

(D) All doors from the stairwells leading into the Facility will be equipped with proximity card access control.

(E) All seclusion rooms will require simultaneous operation of a local pushbutton and proximity card to enter the room. A single card reader inside the room will enable egress. Each seclusion room will have a remote release toggle switch and door locked/unlocked indicators at the local nurse station. All switches and indicators will be clearly labeled to indicate their function.

(F) All access control panels / field controllers will reside in LCRs.

(G) All access control panels will either have integral battery backup for 2 hour continual operation and be connected to vital power, or be connected to UPS power. Access controls and door hardware components required in Mental Health (MH) and other secure doors in the Facility which do not fail secure, will be provided battery backup for 60 minutes and UPS power. Determination of these battery backed secure doors will be made by the Authority during the Design phase.

(H) All remote power supplies serving access control components and door hardware will have battery backup for 2 hour continual operation, and these will be connected to vital power.

(I) Each access controlled door and its associated electrical door hardware components including door strikes, door mags and hold open devices will be supplied with individually fused, battery-backed circuits. Individual power supply units will not serve more than 8 doors, or more than 1 department, or multiple floors of the building(s), or an area greater than 2000m².

(J) All doors will have their hardware keyed to provide fail-safe mechanical override of the access control.

- (K) Card access system will utilize a file Server and allow multiple workstations to access this file Server for control and annunciation purposes. All alarms will be annunciated locally and at the Security Dispatch Centre (located off-site), and will allow concurrent remote monitoring capability both on and off-site.
- (L) Project Co will provide a user Interface at both the Security Dispatch Centre and local monitoring station that will provide the following functionality:
 - (i) presentation of access control system alarm locations superimposed on a Facility floor plan;
 - (ii) ability to configure and control each door, or monitored point;
 - (iii) alarm handling; and
 - (iv) real-time indication of door/device status.
- (M) Each access controlled door will have the capability to emit an audible tone/alarm signal to annunciate door held open and door forced open alarms. This tone will be adjustable in volume and will have a programmable option allowing the tone to be silenced or removed for door functionality as required on access or egress.
- (N) The access control system will function at the field controller level without connection to the PC host or gateway. All field controllers will be connected by TCP / IP using the structured cabling.
- (O) The access control system will have the capability to lock down departments or other areas identified by the Authority in the event of an emergency or per an established schedule on a door by door basis or global command. Determine and program final access control system configuration in consultation with the Authority.
- (P) The access control system will use dual technology (proximity and microchip) type readers and will be capable of reusing all existing cards presently distributed across the Authority. Volume level of the tones emitted by the card reader will be adjustable and will be suitable for quiet environments. Card readers will also have will have a silent operation capability.
- (Q) The access control system will be compatible with the Authority's existing systems to allow existing Authority cards to work on the system and allow new cards for the Facility to work on systems in the rest of the Authority's region. Provide base programming and coordination with the Authority.
- (R) Provide all necessary equipment, hardware, network Infrastructure and programming as required to establish interconnectivity and seamless Interface with the existing head-end equipment.

- (S) Provide one thousand (1000) blank HID Corporate 1000 proximity cards with smart technology for Authority staff. Consult with the Authority on card numbering sequence and format before ordering cards to ensure compatibility with existing cards and equipment.
- (T) Provide delayed egress operation and alarms at emergency exit doors; alarms to annunciate audibly locally and via the Integrated access system. See Appendix 3E [Door Operations Matrix].
- (U) Interconnect and Interface all electronically controlled doors for remote “lock & unlock” capability through the access control system on a door-by-door or global command basis.
- (V) Provide clear signage indicating entry procedures. Consult with the Authority for appropriate and acceptable wording.
- (W) All security alarms will be logged and archived. Logging system will be capable of external archiving/backup in order to extend the event info storage duration.
- (X) Access control system will provide canned reports and custom reporting capability as defined during consultation with the Authority.
- (Y) Provide interconnection access to the applicable control and reporting platform to security workstations located in the security offices.
- (Z) Provide a maintenance / administration workstation (MAW) PC complete with operating & application Software, monitor, keyboard, mouse and interconnection to the security system. Locate MAW in MCR data room, accessible to authorized personnel and Authority staff.
- (AA) Determine, in consultation with the Authority and per Appendix 3E [Door Operations Matrix], the location of access control doors and door alarms within the Facility. Provide card readers, locking hardware, request-to-exit devices, door closers, door position/alarm contacts with all associated mechanical and electric hardware and field devices, including power supplies for a fully operational system.
- (BB) Following consultation with the Authority, provide combination pin code/proximity card readers at all access/egress locations to/from all strictly controlled areas identified by the Authority, such as:
 - (i) ambulance entrance(s); and
 - (ii) ambulance patient transport locations.
- (CC) Combination pin code / proximity card readers will be fully Integrated into the Facility’s access control platform (stand-alone, non-Integrated pin pads are not acceptable). Combination pin code / proximity card readers will facilitate access by the following methods:
 - (i) pin code only;
 - (ii) card read only; and

- (iii) pin code and card read.
 - (DD) Provide pan / tilt colour video intercom communications between the secure side of main entry doors and reception / care stations in departments and areas that are strictly controlled. Provide momentary remote pushbutton operation to release main entry doors when activated by staff or security personnel. Integrate the video intercom system with the access control system as required.
 - (EE) All delayed-egress doors intended for emergency use only will be alarmed locally at the carehub and collaboration desk, and at the protection services monitoring stations via the access control system. Alarms will be silenced through use of a keyswitch that will be integral to the panic hardware.
 - (FF) In MH inpatient units, provide two access controlled doors between interior patient accessible areas and exterior unsecured space.
- (d) Fixed Panic System
- (1) Basic Requirements
 - (A) Provide a new fixed panic system for the Facility.
 - (B) Provide new fixed panic field devices, pathways, wiring, control panels, network equipment and all supporting Infrastructure.
 - (C) Not used.
 - (D) The intent at the completion of capital works is that the new fixed panic system in the Facility supports the entire Facility.
 - (E) The fixed panic system will provide staff with the ability to either discreetly or overtly initiate a call for assistance.
 - (F) The fixed panic system will indicate the exact location of the call on a local protection services office workstation, the Security Dispatch Centre, and transmit a message to the staff communication system.
 - (G) The access control system will be utilized for integrating the fixed panic system.
 - (2) Performance Criteria
 - (A) Fixed panic system buttons will be strategically located, suitably sized, clearly identified, suitable for application, and require key to reset.

- (B) Provide fixed panic system buttons for staff to initiate emergency assistance calls in areas of the Facility as determined in consultation with the Authority, including but not limited to:
- (i) main lobby reception/security kiosk;
 - (ii) each department nurse station and substation;
 - (iii) care/sub-care station reception desks;
 - (iv) medication rooms;
 - (v) pharmacy;
 - (vi) each interview room;
 - (vii) imaging exam rooms (including but not limited to general radiology, CT and ultrasound);
 - (viii) decontamination room;
 - (ix) all triage desks;
 - (x) trauma rooms;
 - (xi) parkade, parking lots and parkade booth (locate so that a button is within 30 meters of a person anywhere in the parking lot /parkade; parking lot duress alarms may be located on light poles);
 - (xii) gift shop;
 - (xiii) patient information desk;
 - (xiv) patient admitting;
 - (xv) in and outpatient clinics;
 - (xvi) cash offices;
 - (xvii) health records; and
 - (xviii) secure rooms.
- (C) Upon activation of a fixed panic button a signal will identify the exact location of the event while providing the name of the device that initiated the alarm on mapping Software located at the Security Dispatch Centre, specified care stations and Facility protection services offices, while simultaneously annunciating a voice message on security radios. A local audible and visual alarm will be annunciating so that it may be seen and heard by staff throughout certain areas as determined by the Authority during the duress system design.

- (D) The fixed panic system will Integrate with the access control system and intrusion detection system to activate alarm notifications on these systems. Provide all middleware and converters required to Interface the intrusion and access control systems with the fixed panic system.
 - (E) The fixed panic system will be hard-wired and supervised such that a trouble / error message will be reported to both Project Co and protection services.
 - (F) The entire fixed panic system will be supervised for the following:
 - (i) power loss;
 - (ii) system trouble;
 - (iii) communication loss; and
 - (iv) wiring and button (including short, ground fault, open circuit).
- (e) Intrusion Detection
- (1) Basic Requirements
 - (A) Provide a new intrusion detection system for the Facility.
 - (B) Provide new intrusion detection field devices, pathways, wiring, control panels, network equipment and all supporting Infrastructure.
 - (C) Not used.
 - (D) The intent at the completion of capital works is that the intrusion detection system in the Facility supports the entire Facility.
 - (E) Intrusion detection systems will be installed in all areas where protection of physical assets is deemed critical by the Authority.
 - (2) Performance Criteria
 - (A) The intrusion detection system(s) will utilize industry proven devices for intrusion alarm detection and reporting capable of 24 hours per day, seven days per week continuous operation, with a minimum of 8 hours battery backup operation in the event of power outages.
 - (B) Provide intrusion detection system(s) including alarm controllers, local keypads, motion sensors, shock sensors, glass break sensors, door contacts, strobes, sirens and other alarm initiating devices as needed for a reliable and fully operational system(s).
 - (C) Control each system with keypad(s) located inside the department or area being protected.

- (D) Local alarm controllers will be Integrated with the Authority's existing intrusion monitoring system which resides in the Security Dispatch Centre. The intrusion alarms will report to the access control system with its own phone line through a dedicated telephone line and be backed up over the LAN / WAN.
 - (E) Install intrusion detection systems in all areas where protection of physical assets is critical including:
 - (i) pharmacy and narcotics rooms;
 - (ii) office suites (human resources administration, etc);
 - (iii) health records storage;
 - (iv) stores (shipping/receiving);
 - (v) cash offices; and
 - (vi) areas designated as high risk by the Authority.
 - (F) Intrusion alarm system and all associated alarm panels must be compatible and remotely programmable from existing Authority system equipment.
 - (G) The intrusion alarm system will Integrate with the radio system to automatically broadcast voice messages to all protection services radios. The voice message will indicate the specific department area from which the call was initiated. Provide all middleware and converters required to Interface the radio system with the intrusion alarm system.
- (f) CCTV
- (1) Basic Requirements
 - (A) Provide a new CCTV system for the Facility.
 - (B) Provide new CCTV field devices, pathways, wiring, control panels, network equipment and all supporting Infrastructure.
 - (C) Not used.
 - (D) The intent at the completion of capital works is that the CCTV system in the Facility supports the entire Facility.
 - (E) Provide CCTV throughout the Facility, parkade and exterior areas for the purpose of viewing and recording video to enhance the level of security and assist Authority staff in providing a safe environment for patients, staff, visitors and the general public while protecting the physical assets. With respect to CCTV coverage of doors, provide as a minimum, CCTV in accordance with Appendix 3E [Door operations Matrix].

- (F) Project Co will post signage at the main entrances to the Facility. The signage as per Authority standards will notify the public that this area is under video surveillance. CCTV processes will be governed by the Public Surveillance System Privacy Guidelines.
 - (G) The system must be able to record clear images of individuals, which would allow distinction of gender, ethnicity and age category. System will provide recorded images of sufficient quality to be used as court evidence in Canada.
 - (H) Integrate all Authority CCTV cameras onto a single open architecture type platform.
 - (I) The CCTV system will allow web based access to all live recording images and all system programming from remote Authority sites.
 - (J) Interface requirements between the CCTV system and other systems are described in this Section and in other Sections.
- (2) Performance Criteria
- (A) System(s) will be a dedicated Software-based virtual matrix that Integrates to the existing Authority CCTV system using the structured cable plant for transmission and recording of images.
 - (B) Provide the appropriate encoding / decoding capability to support 2 way (video and control) communications with any and all CCTV camera, individually and/or in predetermined clusters via the Authority network.
 - (C) Provide video storage capacity for minimum of 30 days at 15 frames per second, minimum HD (1920 x 1080p) resolution. The CCTV system will have the option of recording each camera at various resolution levels and FPS depending on use and location, as well as by schedule or event. Provide file Servers, workstations, and optical storage devices and connect to network. The system will have activity detection and incorporate smart search capabilities. Playback speed will be capable at 5x normal rate. During alarm conditions, allow for higher recording rates.
 - (D) CCTV display and review system will be network-based client application allowing for authorized users to remotely view, control and manage all aspects of the CCTV system across the network. System will have network and web access for remote monitoring, using predefined user authentication.
 - (E) Display and review for all the cameras will be accessible through dual screen workstations located in the Security Office and Security Dispatch Centre. Provide CCTV workstations with all required operating and application Software, monitors, keyboard, mouse, joystick control with interconnection to security system network.

- (i) Indoor cameras will be fixed type, capable of facial recognition, colour, high-resolution, high sensitivity (day / night), smoke dome type with an auto iris and zoom capability. Mounting will be appropriate for the environment, unobtrusive, matching colour with hidden cabling. Fixed cameras will be vandal resistant wall mounted and/or mounted at protective locations and heights.
 - (ii) Outdoor cameras will be pan-tilt-zoom (PTZ) colour dome cameras, high resolution, capable of minimum 35x optical zoom, high-speed with low light day / night operation capability with 360 degrees rotation in less than 3 seconds. Domes will mount on poles, parapets and walls located to provide optimum unobstructed viewing of the area under surveillance. PTZ cameras will have the ability to mask portions of view through Software and remote programming.
 - (iii) Outdoor cameras will be complete with weatherproof housing and internal heater/ defroster / blower / wiper as required for suitable operation under varying environmental conditions.
 - (iv) Cameras will not be set up in private areas such as patient rooms, treatment rooms or clinical areas (unless specifically identified for use by clinical department staff), locker rooms or washrooms. Cameras will not be placed or reviewed for the purpose of observing work performance of employees.
 - (v) Provide a local CCTV system (without recording capability) for monitoring of Safe / Secure Rooms.
 - (vi) CCTV clinical activity monitors will be located out of public view as required to protect privacy.
 - (vii) Provide controller at security office to view and control all PTZ CCTV cameras.
 - (viii) Provide 2 workstations located at the Security Dispatch Centre complete with virtual matrix controller and 4x42" 1080p monitors. Integrate these monitors with the existing system to permit remote supervision of the Facility.
 - (ix) Provide megapixel cameras in consultation with Authority to capture appropriate identification footage.
 - (x) All entry and exit points to departments and associated areas require recorded video surveillance Integrated to the CCTV security system as identified in Appendix 3E [Door Operations Matrix]. Where required by the Authority, provide video monitors for department staff to monitor local CCTV cameras associated with the department.
- (F) Provide CCTV equipment to monitor and record the identity of all persons entering and exiting the Facility's main entrances, corridor / links and utilizing elevators in strictly controlled high risk departments and associated areas, as identified in consultation with the Authority.

- (G) Provide CCTV cameras at locations determined in consultation with the Authority, including:
 - (i) main entrances & exits to the Facility;
 - (ii) entrance and exit corridors to all departments;
 - (iii) public lobbies and waiting areas;
 - (iv) pharmacy and associated entry doors;
 - (v) narcotic vaults;
 - (vi) perinatal;
 - (vii) loading docks;
 - (viii) inside all elevators and elevator lobbies;
 - (ix) parkade entrances and exits, including stairwells, exterior locations and parkade levels for viewing parking areas;
 - (x) perimeter walkways and walkways connecting to other building(s) on-site;
 - (xi) public thoroughfares and walkways;
 - (xii) gift shops;
 - (xiii) cafeterias;
 - (xiv) cash offices or areas where cash is exchanged; and
 - (xv) all mental health and addiction services areas.
- (H) MH departments will include recorded and non-recorded (clinical) CCTV coverage.
- (I) MH non-recorded CCTV coverage will be monitored locally at the care hub. The non-recorded areas will include:
 - (i) any patient accessible common areas;
 - (ii) rooms not directly observable from the care team station;
 - (iii) interview / consultation rooms; and
 - (iv) secure rooms provide clinical activity camera coverage.
- (J) Emergency Department will include recorded and non-recorded (clinical) CCTV coverage. Areas in which CCTV is employed will have 100% CCTV coverage.

- (K) Emergency Department non-recorded CCTV coverage will be monitored locally at the care hub. The non-recorded areas will include seclusion rooms.
- (g) Patient and Infant Wandering Systems
- (1) Basic Requirements
 - (A) Provide a patient wandering control system for control of perimeter doors for each inpatient unit.
 - (B) For all elevators providing access to patient care areas, the elevator shall not operate when an infant abduction tag or patient wandering system tag is present in the elevator cab.
 - (C) Provide active RTLS tags, including ID bands/bracelets, infant specific and staff badges. Exact types to be confirmed during detailed Design phase with clinical stakeholders.
 - (D) Provide a quantity of tags as follows:
 - (i) 200 patient wandering tags
 - (ii) 100 infant abduction tags
 - (iii) 200 staff / companion tags
 - (E) The system must operate via a common Server..
 - (2) Performance Criteria
 - (A) At each inpatient department door, provide a patient wandering exciter array that will be Interfaced with the access control system such that a 'lock-down' of a door can be initiated automatically upon local detection of patient wandering or infant abduction tags.
 - (B) Provide a local keypad at each patient wandering exciter door for override by authorized staff members. Local override can also be accomplished by detection of a staff/companion tag at the same exciter door location.
 - (C) The patient wandering system will Interface with applicable elevators such that these elevators will not operate when an unaccompanied tagged patient is present in the elevator cab. The elevator inhibit feature will not operate when the patient is accompanied by an authorized companion or staff tag, or a keypad override is used.
 - (D) The system will incorporate latest encryption techniques to secure patient ID and location from public access.
 - (E) Provide a PC based application that will provide a presentation of patient locations by superimposing positional data on a Facility / Existing Hospital floor plan and providing patient tag based information.

- (F) Provide dedicated workstations at each inpatient unit care station and at the security monitoring station which can assign tags and annunciate alarm locations.
- (G) Each department utilizing the patient wandering system will be provided with a wireless patient tracking tag test device that audibly and visually indicates on a pass / fail basis the functionality and battery life of the patient tracking tag. The testing device will be a closed loop device / station that allows for full functional testing without activating the Facility / Existing Hospital patient tracking alarm system and will provide audit function as required.
- (H) All tags to report on battery status in real-time and be rechargeable.
- (I) Provide tags and battery types that last 6 months minimum based on average usage scenarios.
- (J) Patient and infant tags to provide real-time battery status feedback.

8. SITE, INFRASTRUCTURE, AND LANDSCAPE SUBGROUP SPECIFICATIONS

8.1 Exterior Improvements

- (a) Aggregate Base Courses
 - (1) Basic Requirements
 - (A) Utilize granular base for stability of surface treatment through freeze thaw cycles and for its ability to store rainwater. Base material to meet City of Yellowknife 20mm minus – select granular base, or approved equal.
 - (2) Performance Criteria
 - (A) Exceed limits defined by regional average freeze thaw cycles averaged over a twenty year period.
- (b) Asphalt Paving
 - (1) Basic Requirements
 - (A) Utilize asphalt paving in areas where vehicle traffic and snow clearing equipment require a smooth surface for travel.
 - (2) Performance Criteria
 - (A) Asphalt mix is to be suitable for use in climatic conditions found at the site. Asphalt will meet or exceed standard City of Yellowknife requirements.
 - (B) Pavement structure thicknesses will be as required by Project Co's geotechnical engineers, based on assessment of specific site conditions, but in no case will be less than 60mm.
- (c) Concrete Paving

- (1) Basic Requirements
 - (A) Utilize concrete paving in areas that require firm, long lasting hard surfaces for activities such as pedestrian pathways, loading docks and Facility entrances.
 - (B) Stamped concrete to be smooth finish and will not impede accessibility.
 - (C) Coloured concrete in contrasting grey and white tones is preferred treatment of displaying accessible routes.
 - (D) In areas with large expanses of concrete, pattern should be used. A combination of saw cuts and shades can be combined to create an abstract pattern, deriving from the surrounding native landscape.

- (d) Concrete Curb & Gutter
 - (1) Basic Requirements
 - (A) Utilize barrier face curb and gutter around parking area perimeter and adjacent to new road ways.
 - (2) Performance Criteria
 - (A) Curb and gutter will meet or exceed standard City of Yellowknife requirements.
 - (B) Avoid irregular geometry configurations and minimize projections and bulbs to minimize damage to curbs during snow removal operations.

- (e) Prevailing Winds
 - (1) Basic Requirements
 - (A) Protect pedestrians at Facility entrances and high activity pedestrian areas from the negative effects of the prevailing winds.
 - (2) Performance Criteria
 - (A) Design and install the landscape with trees, shrubs, hedges, fencing, walls or other elements to protect pedestrians from the north western winds in winter and other prevailing winds that would impede operation of doorways or create drafts into the Facility. Undertake an environmental wind and snow study.

- (f) Landscape Retention and Protection
- (1) Basic Requirements
- (A) Minimum 50% of the existing landscape is to be retained where it does not conflict with development or grading of the Lands. This includes areas of natural rock outcrops, ground covers, shrubs and trees. Areas of vegetation that will be retained must be protected during Construction.
 - (B) To reinforce the image of a well-established landscape, retention and incorporation of natural rock outcrops, ground covers, shrubs and trees must be incorporated into the development the Lands.
 - (C) To help mitigate cost of shipping larger caliper plants and to ensure plants are acclimated to local conditions, healthy plant material that is to be removed should be relocated to new green spaces surrounding the Facility. This includes spaces such as courtyards, therapeutic gardens, staff retreats, play areas, entrances etc.
- (2) Performance Criteria
- (A) Engage a certified arborist (licensed with the International Society of Arboriculture – ISA) to evaluate the existing trees to remain.
 - (B) Treat the retained trees as directed by the arborist and under the direct guidance of the arborist (e.g. root pruning, spiral pruning, watering, fertilizing).
 - (C) As trees are of smaller caliper in Northern landscapes, the importance of all existing trees, shrubs, and ground covers together as existing landscape ecosystems should be protected and preserved as outlined in the Canadian Nursery Landscape Association (CNLA). At a minimum orange snow fence on T-Bars 1.5m (5') high at outer limit of root zones.
 - (D) Trees, vegetation, ecosystems and landscapes that will be retained must be surrounded by protective fencing as defined by the CNLA.
 - (E) No excavation, storage of materials, parking, vehicular driving, preloading, or filling will occur within the critical protection zone of the landscapes being preserved.
 - (F) Tree replacement requirements:
 - (i) If a tree of over 300mm diameter at breast height is identified on-site, Project Co is encouraged to preserve the tree in its present location without damage to the root structure.
 - (ii) If it is deemed necessary to remove a tree of over 300mm diameter at breast height, standard arboriculture processes for tree compensation will be used. The standard process for tree compensation can be reviewed here: International Society of Arboriculture, Guide for Plant Appraisal 9th Edition, Council of Tree & Landscape Appraisers, 2000, or similar.

- (iii) Replacement trees will be specimen trees and must have a minimum caliper of 14 cm (5.9 in.) in diameter at breast height for deciduous trees, or 3.0 m ht. for coniferous trees.
 - (G) Provide tree wells and/or creative grading of the ground away from existing vegetation to remain. Where tree wells are to be constructed, the wells must be a minimum distance of 1.5 times the distance from the trunk of the tree to the drip line.
 - (g) Outdoor Art
 - (1) Basic Requirements
 - (A) The Master Site Plan will include areas for outdoor art/sculptures.
 - (2) Performance Criteria
 - (A) Provide areas for outdoor art.
 - (h) Trees, Shrubs and Groundcover
 - (1) Basic Requirements
 - (A) Provide plantings to support the landscape design by reinforcing spatial relationships and way-finding. The plant selection and placement will address micro-climates surrounding the Facility and mitigation of heating and cooling loads. Planting will shade and screen parking lots. Planting will provide habitat for birds and other animals.
 - (B) Provide landscape treatments for the complete Lands that contributes to the creation of a livable, healthy and responsive community.
 - (C) Use large caliper deciduous trees and evergreen trees that provide seasonal interest in association with ground covering shrub plantings. Use a variety of plant material to reflect seasonal change. Appropriate trees include: Black and White Spruce, Jack Pine, Paper Birch, Dwarf Birch, Tamarack, Trembling Aspen and Balsam Poplar.
 - (D) Use similar plant species to create a visual relationship with the surrounding natural character, create recognizable spaces, contribute to site orientation and create a strong sense of place, recognizing that a diversity of tree species may increase the survival ratio of new landscaping.
 - (E) Use of indigenous flora will be considered a priority, in terms of minimizing maintenance and expressing the local ecosystem and microclimates.
 - (i) Proponents shall refer to Appendix 1 – Plant Species List, as referenced from Ecosystem Classification Group, 2008, Ecological Regions of the Northwest Territories – Taiga Shield, Department of Environment and Natural Resources, Government of the Northwest Territories, Yellowknife, NT, Canada, viii+146pp.+insert map.

- (F) Landscape open space and setbacks to include existing trees that are of high quality, desirable species and appropriately situated.
- (2) Performance Criteria
- (A) All planting is to be per CNLA.
 - (B) Trees to be no smaller than 4.5 cm cal for deciduous shade trees, 2.0 m ht. for ornamental/understory trees and 1.0 m ht. for coniferous trees upon installation.
 - (i) The City of Yellowknife Zoning Bylaw No. 4404 planting sizes quoted in Part Seven Development Standards, 7.1 Rules Applicable to All Zones, (2) Landscaping Requirements, paragraph (f) shall be used as part of this project.
 - (C) Shrubs will be no smaller than #1 pot size upon installation.
 - (D) Plants must be grown in the container for a minimum of three months or have a well-established root system reaching the sides of the container to maintain a firm ball.
 - (E) Landscape treatment and circulation routes must be in accordance with Section 4.2(a)(10).
 - (F) To ensure safety and security, sightlines must be provided through any cluster of tall growing vegetation by keeping all under story plants to a maximum of 1.2 m (3.9 ft.) in height.
 - (G) 100% of the total numbers of plants on the Lands are to be native to the Yellowknife climate zone.
 - (i) Proponents shall refer to Appendix 1 – Plant Species List, as referenced from Ecosystem Classification Group, 2008, Ecological Regions of the Northwest Territories – Taiga Shield, Department of Environment and Natural Resources, Government of the Northwest Territories, Yellowknife, NT, Canada, viii+146pp.+insert map.
 - (H) Use some flowering and fruiting shrubs to promote natural avian habitat. Optional shrubs might include: Black Currant, Bog Rosemary, Crowberry, Ground Juniper, Labrador Tea, Mountain Cranberry, Prickly Wild Rose, Silverberry, Soapberry, and Willow.
 - (I) The trees on the Lands will be a combination of species to highlight the differences between sizes and textures of the native palate.
 - (J) Do not install any plants listed as poisonous to humans by the Canadian Government's 'Canadian Poisonous Plants Information System'.
 - (K) Group plants to minimize the use of water, chemicals and fossil fuel use for routine maintenance and to promote a healthy local ecosystem using sustainable measures.

- (L) Provide elements of healing gardens in the courtyards and close to Facility entries to stimulate senses of sight, smell and touch.
 - (M) Shrubbery within 2 m of walkways will not exceed 50 cm in height.
 - (N) Trees planted in narrow planting areas (e.g. 'street trees') between hard surfaces (e.g. curbs, sidewalks, roads, buildings) will have a continuous volume growing medium available to their roots along the length of the planting area (i.e. no tree pits). Minimum widths of planting areas to be 1.5 m, but wider planting areas are encouraged.
 - (O) Trees will be planted in areas that will provide root zone access to a volume of growing medium sufficient to support proper growth. This may include linear tree trenches, structural soil beneath pavement or other means necessary to provide ample growing medium. Provide soil volume per tree as follows:
 - (i) 5 cubic metres for small trees;
 - (ii) 10 cubic metres for a medium-sized tree; and
 - (iii) 20 cubic metres for a large tree.
- (i) Utility Visibility
- (1) Basic Requirements
 - (A) Locate refuse/recycling areas, shipping, loading or utility areas, satellite dishes, and other similar structures, such as outdoor vents, mechanical equipment, or transformers out of view from streets and from adjacent properties.
 - (B) In cases where the above items cannot be located out of view, they must be screened out of view from streets and from adjacent properties.
 - (C) Garbage and recycling bins must be easily accessible, and contained within roofed/walled enclosures or screened from public view and from adjacent properties.
 - (2) Performance Criteria
 - (A) Refuse/recycling areas, shipping, loading or utility areas, satellite dishes, and other similar structures, such as outdoor vents, mechanical equipment, or transformers must be screened out of view from streets and from adjacent properties using hedging, shrubs, trees, fencing or walls.
 - (B) Garbage and recycling bins must be easily accessible, and contained within roofed/walled enclosures, or screened from public view and from adjacent properties using hedging, shrubs, trees, fencing or walls.
 - (C) Bury electrical wires.

8.2 Landscape

- (a) Outdoor Open Space
 - (1) Basic Requirements
 - (A) Provide outdoor spaces in the Design of the Facility to accommodate activities.
 - (2) Performance Criteria
 - (A) Provide outdoor spaces in the Design of the Facility to accommodate activities, including:
 - (i) space and hard landscape elements conducive to healing and recovery that may be used as a component of physical and occupational therapy. If furnishings (benches, tables, chairs, waste receptacles) are included, these should be of appropriate design for those with physical challenges;
 - (ii) space which acts as the main entry of the Facility which will be fully accessible to the public with strong connections to the site and the neighbourhood;
 - (iii) space to accommodate semi-public/private activities; and
 - (iv) spaces for activities including patient/family visiting, staff breaks/retreats.
 - (B) Provide access to the outdoor spaces from the public areas of the hospital.
- (b) Therapeutic Gardens
 - (1) Basic Requirements
 - (A) In addition to general outdoor spaces, provide distinct, separate therapeutic gardens to accommodate programmed and unprogrammed activities, as follows:
 - (i) staff therapeutic garden, general therapeutic garden and a children's therapeutic garden (to include a variety of play options). If required, these spaces may be combined, but must have distinct and recognizable zones for the different uses they provide.
 - (2) Performance Criteria
 - (A) The general specifications in this Section 8.2(b)(2) will apply to all the therapeutic gardens.

- (B) Project Co will design the therapeutic gardens:
- (i) to provide a sense of control:
 - 1) provide a variety of spaces from which to choose;
 - 2) provide fixed furniture and mobile furniture; and
 - 3) promote a sense of security and safety.
 - (ii) to provide for social support:
 - 1) provide areas with seating to encourage conversation;
 - 2) provide areas of refuge; and
 - 3) provide areas for meditation, contemplation and reflection.
 - (iii) to provide for physical movement and exercise
 - 1) provide a variety of different activities;
 - 2) provide easy wayfinding;
 - 3) provide a variety of longer and shorter pathway loops for strolling and exercise;
 - 4) no pathway is to have dead ends;
 - 5) utilize walkway edging to prevent those using wheelchairs from rolling into planting beds;
 - 6) walkways will be a minimum 1.5m in width and will have a surface that accommodates patients with intravenous equipment, gurneys and wheelchairs or walkers;
 - 7) provide a minimum of one handrail between the entrance to any garden (from the interior of the Facility) and a seat for patients experiencing difficulties with strength or balance; and
 - 8) pavement expansion joints to be no more than 1/8" in width to prevent the wheels of IV poles getting caught and stuck.
 - (iv) to provide access to nature and positive distractions
 - 1) gardens are to be incorporated as an integral extension of the hospital interiors, linking its internal spaces to view vistas of the exterior greenspace;
 - 2) gardens are to be visible from at least one well-used interior area (unless otherwise noted below);
 - 3) incorporate visibility and visual interest both into and out of the garden;

- 4) provide adequate signage within the Facility to alert people of the gardens;
 - 5) gardens are to be fully accessible with automatic doors and low entry lips to facilitate wheelchair access;
 - 6) gardens are to be unlocked during daytime hours (as determined by hospital staff);
 - 7) provide artwork including 'found elements' of art that provide visual distraction;
 - 8) provide plant material that attracts birds and provides seasonal interest;
 - 9) design elements that stimulate the senses and create an atmosphere of peace, such as reflecting pools;
 - 10) provide visual relief and interest in vertical and horizontal dimensions;
 - 11) provide bright colours; and
 - 12) provide visual vistas of nature/landscape elements viewable to patients who are confined to their rooms.
- (v) to minimize intrusive stimuli:
- 1) gardens must have sheltered locations from the wind;
 - 2) provide some gathering/seating areas that are sheltered from the sun and rain;
 - 3) surfaces must reduce glare (e.g. integral coloured, stained/ tinted concrete);
 - 4) seating material to be constructed of warm, comfortable material that does not get excessively hot or cold (e.g. wood) and facilitates the shedding of water. Avoid the use of concrete, aluminum & steel seats;
 - 5) seating must be designed to accommodate the mobility challenged and include back and arm rests;
 - 6) take measures to reduce or cover up loud or repetitive man-made sounds (e.g. by providing running water);
 - 7) locate gardens to avoid unpleasant odours and smoke;
 - 8) design gardens to avoid bright lights;
 - 9) all selected plant material shall not cause serious harm to humans if ingested (eg. Red Baneberry, *Actaea rubra*);

- 10) all selected plant material shall take into consideration the plant location in relation to potential issues of contact dermatitis, rash or skin inflammation if handled (eg junipers, *Juniperus spp.*, roses, *Rosa spp.*);
 - 11) species that create high levels of pollen may be used; and
 - 12) the Authority reserves the right to reject proposed species at any time due to known adverse reactions to patients and staff.
- (vi) as gardens and not paved courtyards:
- 1) gardens are to be green, reflecting the surrounding native landscape, with a minimum ratio of planted areas to hard surface areas of 7:3. Higher ratio of plants and landscape features are acceptable;
 - 2) stimulate the senses of sight, sound, smell and touch, however, smells of an extraordinarily strong or offensive manner should be avoided;
 - 3) provide natural lighting and sounds;
 - 4) design with an emphasis on natural features such as plants, rocks, wood and water; and
 - 5) provide at least one hose bib in each therapeutic garden regardless of whether an automatic irrigation system is supplied as part of the design.
- (vii) to minimize ambiguity:
- 1) provide a well-defined and inviting garden entrance;
 - 2) provide a design that is easy to interpret by the majority of people; and
 - 3) avoid the use of abstract art; the use of art provided by local or regional artists is encouraged.
- (C) To supplement the general specifications identified above, the following Sections 8.2(b)(2)(D) to 8.2(b)(2)(F) set out specific requirements for each of the outdoor therapeutic gardens at the Facility.
- (D) Design the staff therapeutic garden so that it:
- (i) provides staff outdoor resting areas in close proximity to the Facility;
 - (ii) provides visual privacy from public and patient care areas so staff does not have to mingle with patients on their breaks;
 - (iii) is at least 100 m²;
 - (iv) has moveable furniture; and

- (v) includes tables and chairs, with seating for at least 15 people.
- (E) Design the general therapeutic garden / exterior social space at each wing to be accessible to the general population of the hospital including patients, staff and visitors. Each general therapeutic garden will:
- (i) be highly visible from a nursing station as well as well-populated areas of the Facility;
 - (ii) have continuous glazing to provide daylight to all spaces or circulation zones adjacent to the garden;
 - (iii) be at least 200 m²;
 - (iv) include tables and chairs, with seating for at least 20 people;
 - (v) include an integrated interpretive signage system;
 - (vi) respect Northern Aboriginal culture as follows:
 - 1) consult with Northern Aboriginal representatives, as designated by the Authority, during the design phase, the installation phase and the maintenance phase of the general therapeutic garden;
 - 2) incorporate cultural elements such as wood and rock sculpture and wood poles and indigenous plants used for traditional healing;
 - 3) provide some edible indigenous plants;
 - 4) provide a plaque acknowledging traditional Northern Aboriginal territory; and
 - 5) provide resting places that promote enjoyment and education of Northern Aboriginal culture.
 - (vii) reference local history and heritage by incorporating cultural and historical references to the local history and heritage of the local community (unique to the hospital).
- (F) Design the primary accessible play / outdoor recreational space to be accessible to the general population of the hospital including patients, staff and visitors. Each general therapeutic garden will:
- (i) be highly visible from a nursing station as well as well-populated areas of the Facility;
 - (ii) have continuous glazing to provide daylight to all spaces or circulation zones adjacent to the garden;
 - (iii) be at least 200 m²;
 - (iv) include tables and chairs, with seating for at least 20 people;

- (v) include an integrated interpretive signage system; and
 - (vi) include a variety of equipment to entertain a wide range of children of varying ages and abilities.
- (c) Site Slopes and Retaining Walls
- (1) Basic Requirements
 - (A) Site grading is to provide positive drainage throughout the Lands(except where required for storm water detention/retention).
 - (B) Site grading is to avoid over-steepened slopes on the Lands that cannot hold growing medium and plants.
 - (C) Retaining walls to be architecturally finished.
 - (2) Performance Criteria
 - (A) Minimum gradients (e.g. 2%) are required to avoid ponding throughout the Lands except where required for storm water detention/retention.
 - (B) Steep slopes are to be no steeper than 2:1 and finished with growing medium and plant material. Prohibit riprap on slopes.
 - (C) Slopes steeper than 2:1 are to be retained using architecturally-finished retaining walls (e.g. cast-in-place concrete, precast concrete). Prohibit gabion baskets and lockblock walls on the Lands.
- (d) Street Furniture
- (1) Basic Requirements
 - (A) Unify the exterior ground plane treatment through the use of common paving materials, tree grates, lighting and other landscape furniture items.
 - (B) Provide and coordinate design for street furniture, including benches provided at regular intervals for ease of use particularly for the infirm.
 - (C) Where possible use exterior steps and landscape features for the enjoyment of staff and visitors.
 - (D) Seating in public areas must: be ergonomically designed for a variety of people; be designed to allow a wheelchair to sit alongside fixed seating or, where tables are provided, to allow a wheelchair to pull up to each table; have a minimum of 5% with backrests; a minimum of 5% with armrests; and shed rain water.
 - (E) All outdoor lighting in therapeutic and staff gardens must be decorative and low level lighting features where gardens are visible from public indoor or patient rooms.

- (2) Performance Criteria
 - (A) Unify the ground plane treatment through the use of common paving materials, tree grates, lighting and other landscape furniture items.
 - (B) Seating areas with benches will be located throughout the Lands no more than 70 m apart from each other. Select products on the basis of safety, comfort, design and materials that relate to the Facility architecture and landscape design, durability and required maintenance.
 - (C) Select products for their suitability and durability in the climatic conditions found at the Lands.
 - (D) Utilize a variety of scales, locations and orientations of seating areas and site furnishings to cater to varied outdoor activities and varied experiences of the staff and visitors.

- (e) Existing Landscape Features
 - (1) Basic Requirements
 - (A) Existing landscape features should be retained and incorporated into the therapeutic gardens to a reasonable extent.
 - (B) Where it is not possible to retain a natural feature or planting area, attempts should be made to retain the existing plants with anticipation of transplanting and reusing the existing material in the new garden spaces.
 - (C) Existing landscape features should be utilized as part of the overall site conditions and be used in the design of outdoor features such as gardens and parking areas.

 - (2) Performance Criteria
 - (A) Existing landscape areas should maintain a native appearance when complete and compliment the surrounding environment.
 - (B) Therapeutic garden spaces should celebrate the native landscape palate and utilize a combination of local plant material and hard elements such as rock.
 - (C) Where existing landscape features are utilized in the development of gardens and parking areas, the transition between zones will be seamless.

0.0 Executive Summary

0.1 Introduction

The Stanton Territorial Health Authority (STHA) provides acute secondary, tertiary and other specialized health care services to residents of the Northwest Territories and Kitikmeot Region of Nunavut from a number of locations in Yellowknife. Stanton Territorial Hospital is the largest facility in the authority.

The Stanton Territorial Hospital opened in 1988. Technical renewal is considered a priority in terms of providing a safe and comfortable environment that meets applicable code requirements and standards; however, program renewal is also necessary for the delivery of services within the hospital and associated STHA facilities.

This Appendix 3A is the Clinical Specification. This document reflects the Functional Program delivered in conjunction with the Indicative Design, the 2013 Schematic Design Program and Planning Study. As such, it includes data that will directly and indirectly influence the design decisions, with the purpose of the document being to outline and describe overall Functional Planning Assumptions, and detailed spatial requirements required by the Stanton Territorial Hospital Authority to achieve the desired model of care. This document was adapted from the Program and Planning Study for the *Stanton Territorial Hospital Renewal Project: Functional Program* (Hayward and Associates LLC, March 2013).

The Clinical Specification is presented in three sections as follows:

- **Functional Program** (this document) includes the programs and services that are part of the Stanton Territorial Renewal Project — most of which will be located on the existing campus — along with the schedule of accommodation (in the Appendix).
- **Schedule of Accommodations** is a comprehensive listing of the space tables from each department.
- **Room Data Sheets** include detailed information on the rooms/areas addressed in the functional program. Each individual room or alcove is assigned a reference code that corresponds to the schedule of accommodation.

0.2 Organization of the Functional Program

Program Groupings and Facility Components

The functional groupings are organized into the ten sections of this report. The following descriptions of each grouping reflect elements of the Indicative Design:

- **Main Entry/Customer Service Centre (Section 1.0)** includes the main entrance/lobby, a newly organized Customer Service Centre, the Auxiliary Tuck Shop, and a new chapel/meditation room.
- **Diagnostic Services (Section 2.0)** —includes a newly-configured Diagnostic Centre with an outpatient intake area from which patients access the diagnostic imaging suite, a newly-organized cardiopulmonary/ ultrasound suite, or the outpatient specimen collection area; the laboratory and morgue are also addressed in this section as well as shared support space. A magnetic resonance imaging (MRI) area has also been planned for future expansion purposes, but is not included in the total space summary for Diagnostic Services.
- **Ambulatory Care Centre (Section 3.0)** —will include an Exam Treatment space, Medical Day Care Unit, and Renal Care Unit along with an Ambulatory Care Check-in area, Shared Procedure Rooms and Clinical Support Space. The three major components will be organized as follows:
 - **Outpatient Clinic.** A reconfigured Outpatient Clinic will provide flexible space for the permanent and visiting specialists and consolidate various outpatient clinics that are currently located throughout the hospital.
 - **Medical Day Care Unit.** A reorganized Medical Day Care Unit will include chemotherapy, intravenous (IV) therapy, and central venous catheter (CVC) care as well as outpatient antimicrobial therapy (OPAT) and minor procedures — thoracentesis, paracenteses, and liver biopsies.
 - **Renal Care Unit.** An integrated, territorial-wide renal care program will be established (including outpatient renal dialysis). Shelled-in spaces will be included to accommodate future program expansion.
- **Surgery and Special Procedures (Section 4.0).** A new Day Procedure Unit (DPU) will be developed adjacent to the Surgery Suite to provide efficient and coordinated pre-procedure preparation and post-procedure recovery for admit day of surgery (ADS), surgical day care (SDC), and patients undergoing endoscopies and other special procedures. **Outpatient Rehabilitation Centre (Section 5.0)** —will include physiotherapy, occupational therapy, speech language pathology, and audiology.
- **Critical Care Services (Section 6.0).** The Emergency Department (ED) and the Intensive Care Unit (ICU) will be operationally and physically integrated into a single critical care area on the first floor. Staff support space, as well as some clinical support space, will be shared between the ED and the new six-bed ICU. All patient care space will be designed for flexible use — particularly with the ability to flex for a lower level of care.
- **Inpatient Services (Section 7.0).** The renewed inpatient units are organized into general units and specialty units. Two 28-bed general units — Medical Unit and Surgical Unit— will be standardized to the extent possible to provide space that can flex for medical and surgical, patients. Specialty units will include the Obstetrics Unit, Pediatric Unit and General Psychiatry Unit.
- **Pharmacy (Section 8.0)** will be reconfigured and expanded.
- **Operational Support Services (Section 9.0)** includes an executive office suite for hospital administrative and corporate staff, and groups of offices/workstations for patient care administrative support, medical affairs, booking, and computer/information services staff space for financial services and medical travel continue to be located outside the hospital in leased space.

-
- **Facility Support Services (Section 10.0)** includes supply receiving and staging, housekeeping, the food service, medical device reprocessing, facility maintenance and operations, property and program services materials management (warehouse), laundry/linen service, biomedical engineering, computer/information services and record storage.

Document Organization

Each section generally includes the following information:

- An overview of the proposed program renewal
- Specific functional planning assumptions for each facility component within the section:
 - Description of the current situation
 - Planned scope of services
 - Hours of operation
 - Projected workload and key patient testing/treatment spaces
 - Projected staffing (headcount)
- Proposed facility reconfiguration and key spaces:
 - Facility reconfiguration concept
 - Patient access and circulation (or workflow)
 - Description of the major facility components and individual rooms/areas
 - Facility layout and design considerations
- Summary of space requirements:
 - Summary of future space need
 - Future flexibility

The schedule of accommodation is included as an Appendix and aligns with the ten functional groupings (report sections).

Additional detail on the service components (current and future state), workload and staffing projections, work flow, support services, and major equipment is provided in the operational plan.

0.3 Facility Planning Principles

The functional program and space requirements for the renewal of Stanton Territorial Hospital are based on the following key facility planning principles:

- **STH should be community-oriented, culturally sensitive, and focused on wellness.** In addition to its role as a territorial referral facility, the hospital should also be perceived as a “community centre” with a barrier-free main entrance and a welcoming reception area. All public and client care areas should be designed to provide easy access and simplified way finding to and from the main entrance. The use of natural light within the facility should be optimized (except as noted), with consideration for patient, staff and public areas. Finishes and furnishings should be selected for sound attenuation. The ambience and design should reflect the traditions and values of the local community.
- **The STH environment should be safe and secure.** The renewal of STH should facilitate customer and staff safety and infection control and the confidentiality of patient records and data should be strictly maintained. After-hours access by patients and visitors to the hospital will be restricted to the emergency department entrance such that the rest of the facility can be secured, while providing access to public elevators so that patients and visitors do not pass through the Emergency Department treatment areas, or through any other department. The reception and staff work areas throughout the facility should serve as control points to monitor access to clinical areas and access to administrative and building support spaces by patients and visitors should also be restricted. All waiting areas should be observable by a staff work or reception area. In particular, some areas within the General Psychiatry Unit will be secured and access to/from other inpatient units will be restricted as appropriate.

The availability of mechanical assistance for lifting patients and specialized facilities for bariatric patients will further promote patient and staff safety. Infection control will be improved with the ability to better isolate specific patients and separate clean and soiled materials. Moreover, the selection of interior building finishes and furnishings should be based on ease of cleaning and disinfection.

- **Advanced technology should be embraced to the extent possible.** Implementation of the electronic health record, use of enhanced telehealth technology to triage, diagnose, and treat patients remotely (as well as for communicating with specialty centres in the south), and increased automation in the laboratory, pharmacy, and other clinical support functions should be adopted when financially feasible. Wireless technology will be available for staff and customers and active and passive electronic monitoring systems will also be used within the facility.
- **Space should be multi-functional, flexible, and adaptable as programs, services, and technology evolve over time.** Programs and services that use similar resources — space, equipment, and staff — should be co-located to optimize their utilization as workloads ebb and flow: rooms used for patient examination, testing, or treatment are grouped together so they can be used by various medical specialties and testing modalities as medical practice, staffing roles and responsibilities, technology, and linkages to other health providers, change over the life of the facility; rooms that will be used infrequently (or on an episodic basis) should be designed and equipped for multiple uses; rooms and areas that accommodate similar functions should be identically sized and equipped to the extent possible — supported by the same processes and procedures across the territories; office and work areas that require staff and administrative support facilities should be arranged so they can efficiently share access to components such as reception, office equipment alcoves and washrooms.

In addition to the Main Entry Customer Service Area Washrooms, a set of Male and Female public washrooms, independent of any departments shall be located on each level, other than the main floor, and in close proximity to the public elevators.

Where rooms with planned with two sided access, the circulation shall not reduce net usable area required by program.

0.4 Application of CSA Z8000 and Special Patient Accommodations

The Canadian Standards Association (CSA) issued the Z8000-11 standard for Canadian Health Care Facilities in September 2011 — referred to as Z8000. Functional service requirements specified in Z8000 were considered a significant guide in the establishment of key space requirements, key relationships and dependences, and minimum room sizes for this Clinical Specification.

In the Schedule of Accommodation, the net square metres (NSM) for each room/area is consistent with CSA Z8000 minimum standards, with the exception of areas in which alternate sizing was required for achieving Indicative Design. In addition, relevant functional planning requirements pertaining to the number, size, and configuration of airborne isolation rooms (Clause 7.5.5), accommodations for bariatric persons (Clause 7.8.8), and secure/observation rooms and examination/safe rooms for mental health inpatients have been incorporated into this document. Specific assumptions include:

- **Airborne isolation rooms (AIRs)** are planned as follows:
 - Medical Unit and Surgical Unit — five AIR patient bedrooms are planned on each of these 28-bed units.
 - General Psychiatry Unit – One AIR patient bedroom is planned within the Inpatient Pod A.
 - Pediatric Unit — one AIR patient bedroom is planned.
 - Critical care services — one AIR high-dependency patient bedroom is planned for the Intensive Care Unit; and AIR exam/treatment room is co-located with the trauma/resuscitation room in the Acute Treatment area.
No AIR patient bedrooms will be provided in the Obstetrics Unit.
 - Facilities for protective isolation will not be provided at STH.
- **Accommodations for bariatric persons** will comply with Z8000 (Clause 7.8.8). Bariatric individuals have a body mass index of greater than 30 or a weight above 225 kg and generally need furnishings and equipment that can support their size and weight. They also require larger door openings for travel between individual spaces and more physical space for maneuvering (either via wheelchair, motorized scooter, or with staff assistance).

Bariatric patient bedrooms require a ceiling-mounted gantry patient lift and track system that extends to both sides of the bed. STH will not accommodate patients weighing over 453 kg. Specific requirements incorporated into this document include:

- Public areas — all lounges and waiting areas will accommodate at least one bariatric seat and one public bariatric washroom will be located on the first floor.
- Medical Unit and Surgical Unit — two bariatric patient bedrooms are planned on each of these 28-bed units.
- General Psychiatry Unit – One bariatric patient bedroom is planned within the Inpatient Pod A.
- Critical care services — the AIR exam/procedure room in the ED acute treatment area will also be equipped for a bariatric patient; also, the two-bay casting/suture room in the ED minor treatment area will be designed to flex to accommodate a single bariatric patient.
- Ambulatory Care Centre — two bariatric exam/treatment rooms will be located within the clinic space (one per each six exam room pod) and one of the two AIR procedure rooms will also be designed to accommodate a bariatric patient.
- Surgery suite — one operating room will be equipped with a ceiling-mounted patient lift and track system in compliance with Z8000.

-
- Other areas of the hospital — including diagnostic services and rehabilitation — will be designed and equipped to accommodate bariatric patients as suggested by Z8000 and approved by HSS.
 - **Seclusion and security.** CSA Z8000 outlines detailed technical requirements for safety and risk mitigation for mental health and addiction services (Clause 8.4.3) including specialized and acute inpatient care, psychiatric high acuity units, and outpatient services. In addition, an examination/safe room must be provided in an emergency department for patients presenting with psychosis, delirium, suicidal, or aggressive behavior. In addition to the Z8000 requirements, HSS has provided specific direction on the following types of accommodations:
 - Seclusion rooms — designed with full forensic, suicidal, and self-harm protection features for patients that are secured under the Mental Health Act and for temporary restraint when posing a significant risk of violence to staff or other occupants.
 - Security rooms — where patient egress is not restricted unless the zone is in temporary lock-down for the protection of the patient or building occupants, additional monitoring is provided, and self-harm design principles are applied.

Specific requirements incorporated into this document include:

- Medical Unit, Surgical Unit, and Pediatric Unit — two of the 20 standard patient bedrooms on each 28-bed unit will be equipped with security features as well as the procedure room on each unit.
- General Psychiatry Unit — all patient bedrooms on this 21-bed unit will be equipped with security features as well as the procedure room and seclusion rooms on the unit.
- Emergency department — one seclusion/safe treatment room is planned for the acute treatment area.

CSA Z8000 includes specific design and technical requirements for various functional services within a hospital. It is assumed that these must be considered during the design process along with infection prevention and control (Clause 7.5), occupational and health safety (Clause 7.6), safety and security (Clause 7.7), and accessibility (Clause 7.8). Design and technical requirements that do not specifically relate to the number and types of spaces required, key relationships and dependences, and minimum room sizes are not generally addressed in this document.

- **Outpatient Way finding Concept.** One goal of the renewed functional groupings is to simplify outpatient way finding at the Stanton Territorial Hospital by creating a limited number of potential “destinations” with simplified signage and minimal travel distances. Outpatients enter the facility via the hospital main entrance and immediately encounter the Customer Service Centre and associated amenities. At this point there will be three potential outpatient destinations:
 - **Diagnostic Centre**
 - **Ambulatory Care Centre**
 - **Day Procedure Unit**

Outpatients and visitors will also be directed to the Cafeteria.

0.5 Summary of Space Requirements

The component net square metres (CNSM) for each facility component — organized by the functional groupings/report sections and documented in the schedule of accommodation — is summarized in the following table along with an estimate of the component gross square metres (CGSM). The CGSM or potential “footprint” of each facility component is estimated using a net-to-gross space conversion factor. This

factor is used to estimate the amount of additional space required for internal circulation corridors, walls/partitions, the building structure, and small mechanical shafts.

Table 1 – Summary of the Schedule of Accommodation: Future Space Requirements for Program Renewal (2045)

**APPENDIX 3A

1.0 Main Entry & Customer Services

Overview of Program Renewal for Main Entry & Customer Services

As part of program renewal at Stanton Territorial Hospital (STH), a welcoming environment and user-friendly customer access will be provided for the various programs and services available at STH. The main hospital entrance and the associated customer amenities will be updated and customer services will be better centralized and/or coordinated from a Customer Service Centre to be located immediately inside the main hospital entrance.

Customer Service Centre: Functional Planning Assumptions

Current Situation

The current reception/registration area is located immediately inside the hospital main entrance with an adjacent public waiting area. Three registration cubicles, an office, and an area with office equipment is contiguous with the main reception/information desk. A second desk faces the back corridor that leads to outpatient services in the west wing, to the cafeteria in the east wing, and to the emergency department (ED) walk-in entrance at the north side of the hospital. This second desk is frequently occupied by the security officer, which is confusing to patients and visitors. Language/interpreter Services currently use several offices on the third floor.

Planned Scope of Services

Using a “hub and spoke” concept, the Customer Service Centre will be the first point of contact for patients and visitors as they enter the hospital — similar to a hotel reception desk. Customer Service Centre staff will either provide the requested service, “link” the customer via telecommunications to whomever can provide assistance, or escort the customer to the appropriate service location. Customer services will include patient registration and language/interpreter services as well as general information dissemination and assistance with way finding. The central switchboard/communications function for STH will also be provided at this location and a workstation for use by the security officer.

Hours of Operation

The primary hours of operation for the Customer Service Centre will be from 0730 to 2100 hours, Monday through Friday, and from 0800 to 2100 hours on Saturdays, Sundays, and holidays — consistent with the hours that the main hospital entrance will be open. The hours of operation for specific components are as follows:

- **Patient registration** will register all inpatients and outpatients presenting at the hospital. All ED patients will be registered in the ED as well as any other patients who need to be registered during the hours when the Customer Service Centre is not staffed. In addition to the Customer Service Centre, patients will also be registered at the Ambulatory Care Centre.
- **Switchboard/communications.** The switchboard will be staffed from 0730 to 2330, Monday to Friday, and from 0800 to 2330 on Saturdays, Sundays, and holidays. After hour incoming calls will go to an automated answering system with a forwarding option to the ED registration clerk if person-to-person communication is required.
- **Language/interpreter services.** A representative will be located in the Customer Service Centre from 0730 to 1530 hours, Monday to Friday (at a minimum) to be present during the busiest time of day.

- **Security** will continue to be provided 24-hour per day, 365 day per year. A security officer will generally be located at the main entrance/lobby area during the day shift; the security officer will work at the ED walk-in entrance during the hours when the main entrance door is locked.

Projected Workload

The projected number of patients registering for hospital services will be a reasonable indicator of the minimum level of activity in the main entry and the Customer Service Centre (CSC). The rise in clinical activity will also generate additional family members/escorts, visitors, and the public. However, it is assumed that the vast majority of patients will be pre-registered (via phone or Internet). The following table provides an estimate of the projected patient registration volume to 2045 based on the projected capacity for each clinical area. Emergency visits will be registered in the ED and are not provided in this table.

Table 2 – Projected Customer Service Centre Activity

Clinical Service	Unit of Measure	Projected			
		2020	2025	2030	2045
Diagnostic Imaging	Tests	22,656	23,199	23,959	25,680
Laboratory Specimen Collect	Visits	20,221	20,705	21,059	22,920
Cardiac Diagnostics	Visits	tbd	tbd	tbd	tbd
Respiratory Diagnostics	Visits	1,800	1,843	1,875	2,040
Medical Day Care	Visits	3,789	3,878	3,944	4,194
Clinic	Visits	24,191	24,770	25,194	27,420
Day Procedures Unit*	Visits	4,178	4,279	4,355	4,736
Subtotal (Outpatients)		76,835	78,674	80,386	86,990
Inpatients	Separations	5,433	5,569	5,673	6,163
Total		82,268	84,243	86,059	93,153

“tbd” = To be determined; data/projections not available.

** = Excludes “admit day of surgery” which are included with the inpatients.*

Projected Staffing

It is projected that seven staff (headcount) will work out of the Customer Service Centre during the day shift by 2045 as shown in the following table:

Table 3 – Projected Staffing (Headcount) for the Customer Service Centre

Position	Headcount by Shift		
	Day	Evening	Night
Supervisor (Patient Registration)	1	-	-
Patient Registration Clerk (Customer Service Centre)	2	1	-
Patient Registration Clerk (located in the ED)	-	-	-
Patient Registration Clerk (located in the ACC)	-	-	-
Language Services Interpreter	1	-	-
Switchboard Operator	1	1	-
Patient Care Coordinator	1	1	1
Security Officer (located in the ED after hours)	1	1	1
Total (Customer Service Centre-Based Staff)	7	4	2

The Territorial Support Network — which will be operated by the Territorial Services Network and based within close proximity to the patient care coordinator — will be staffed with a physician, an RN, and a secretary/clerk.

Main Entry & Customer Amenities: Functional Planning Assumptions

Current Situation

The main entrance to STH is located on the southeast side of the hospital with a drop-off drive and adjacent visitor and staff parking areas. A public lounge is positioned to the right of the main entrance with the entrance to the clinic to the left. The entrance corridor continues to the west, past the reception desk, to the public elevators and washrooms. Access to other areas of the first floor is via another corridor that encircles the registration area to the east. The Auxiliary Tuck Shop is located off this corridor across from the registration desk. Although the cafeteria is due west of the registration area, access to the cafeteria requires a circuitous route — around the registration area to the east wing, and past the corridor to the ED walk-in entrance, to the west wing. A chapel is located on the third floor with access from within the Medical Unit (3-West). The STH Foundation is currently located off-site on the first floor of the Diamond Plaza.

Planned Scope of Services

No change to the overall location or orientation of the existing hospital main entrance is anticipated unless it is necessary to implement other program renewal priorities. Specific customer amenities will include:

- **Main Entrance/Lobby** or “home base” for family members and friends to meet up with each other or for patients awaiting pick-up from the hospital.
- **Chapel/Meditation Room.** The chapel will be relocated from the third floor to the main entry area to provide a more accessible space for spiritual reflection, meditation, and quiet respite.
- **Auxiliary Tuck Shop.** The Auxiliary will continue to operate the Tuck Shop and its location should continue to be in a high-visibility area near the main entrance.
- **STH Foundation.** The STH Foundation currently operates an automated teller machine (ATM). A kiosk is planned in the hospital lobby for the STH Foundation which will be staffed during peak

patient/visitor traffic times. In addition, a Foundation office will be located at the Customer Service Centre. The ATM and the new STH Foundation kiosk should also be located in a high-visibility area.

- **Customer Service Centre** for patient registration and check-in and communication/reception services.
- **Med Response** call-centre will be located away from the public .

Hours of Operation

The primary hours of operation for the main hospital entrance will be from 0730 to 2100 hours, Monday through Friday, and from 0800 to 2100 hours on Saturdays, Sundays, and holidays. The Auxiliary Tuck Shop will maintain its current hours of operation although the specific hours of operation will be determined by the Auxiliary. It is also assumed that a STH Foundation representative will be available at the designated STH Foundation kiosk during the busiest and high-traffic hours of day.

Projected Staffing

The Auxiliary Tuck Shop will be staffed by two volunteers during the day and evening shift and a STH Foundation representative will generally be available in the main entrance/ lobby during the day.

Proposed Facility Reconfiguration and Key Spaces

Projected Staffing

The Customer Service Centre — to be located immediately inside the main hospital entrance — will provide one-stop-shopping for patients and visitors arriving at the hospital main entrance. With a welcoming “front door,” efficient and expedient customer services, and associated amenities, customers will develop a positive “first impression” as they begin their journey through the hospital.

Patient Access and Circulation

Unless bound for the ED, patients and visitors will access STH via the main hospital entrance (during the hours that it is open). They will either park their private vehicle and walk to the main entrance or be dropped-off directly at the main entrance. Direct admits and outpatients going to the Diagnostic Centre will present at the Customer Service Centre upon arrival during its regularly scheduled hours. Surgery patients and outpatients going to the Ambulatory Care Centre will proceed directly to the ambulatory care check-in area.

It is assumed that most patients will be pre-registered. If pre-registered, their identification will be checked and the appropriate point-of-service notified electronically. If not pre-registered, they will be registered into the hospital information system and the appropriate documentation will be generated. Volunteers will be available as “greeters” to assist with orientation and way finding and will direct patients and visitors to their desired destination.

Simple follow-up appointments will be scheduled by the registration clerk (post-appointment check-out). A telephone will be provided with a direct line to the booking office if a more complicated follow-up appointment is required. If a patient requires an interpreter, the language services representative will provide support and arrange for an appropriate interpreter. After hours, all patients will be directed to the ED walk-in entrance where they will be registered by the ED registration clerk. From the main entrance, patients and visitors may also wait in the visitor lounge, go to the Auxiliary Tuck Shop or the Chapel/ Meditation Room, use the ATM, visit the STH Foundation kiosk, or go to the cafeteria/vending area.

As a result of program renewal at STH, way finding will be simplified with a minimal number of destinations for patients and visitors upon arrival at the main hospital entrance. Admitted patients and their escorts will proceed to their designated inpatient unit. Visitors going to the inpatient units will use a public elevator to access the appropriate floor level (during designated visitor hours).

Specific outpatient destinations will be limited to the following:

- **Diagnostic Centre** will include a central intake area for outpatients requiring diagnostic imaging, ultrasound, cardiac diagnostics, respiratory testing/therapy, or laboratory specimen collection.
- **Ambulatory Care Centre** will include the Outpatient Clinic (to accommodate the permanent specialists, visiting specialists, and other hospital-based outpatient programs), Medical Day Care Unit (providing chemotherapy, intravenous or parenteral therapy, central venous catheter care, and wound care), and the Renal Care Unit.
- **Day Procedure Unit.** Outpatients requiring surgery or endoscopy will go to the Day Procedure Unit where they will be prepped/recovered for their procedure which will either be performed in the unit or in the adjacent surgery suite. Accompanying family members or visitors will be directed to a central family/visitor lounge or could return to the main entrance lobby. Patients admitted on the day of surgery would also check-in at the Day Procedure Unit.

Major Facility Components

As shown in the functional diagram, based on the indicative design, below, the main entry/customer services at STH will include four major functional components as follows:

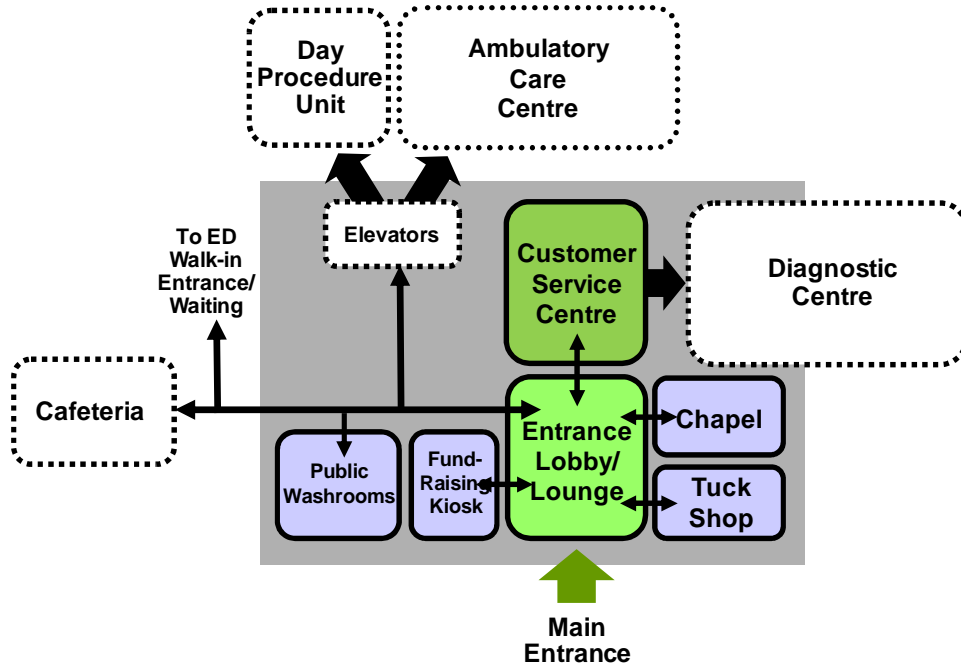

- **Main Entrance/Lobby**
- **Customer Service Centre**
- **Auxiliary Tuck Shop**
- **Chapel/Meditation room**

1.1 Main Entrance/Lobby

The main entrance is located on the main floor and should be easily-identifiable and welcoming. In addition to the entry vestibule, a patient/visitor lounge and associated amenities will be provided as follows:

- **Main Entrance Vestibule** to serve as the primary entrance for non-emergent ambulatory patients, family members, and visitors and with direct access to the Customer Service Centre.
- **Public Lobby/Lounge** with lounge-type seating for up to 30 persons and a window with view of the main entrance vestibule and drop-off/pick-up drive. An alcove for wall-mounted phones (e.g., taxi), an automated teller machine (ATM), and the STH Foundation kiosk or wall display — with a contiguous counter, stool, and cueing space — will also be located in this area. Includes space for 2 bariatric seats/wheelchairs. The public lounge shall include a breastfeeding room as per the CSA z-8000 recommendations.
- **Wheelchair alcove** with space for the temporary storage/holding of two wheelchairs (one standard and one bariatric). Accessible from the Customer Service Centre but out of view of the lounge.
- **Public washrooms** (male and female) that are wheelchair accessible.
- **Storage Room** for general storage including storage for personal items of patients who have been discharged but are awaiting flights.

**Diagram 1 – Main Entry & Customer Services
Major Facility Components and Functional Adjacencies**

1.2 Customer Service Centre

As the first point of contact for patients and visitors arriving at STH, this area should be easily-identifiable and welcoming. To the extent possible, the reception/concierge, registration/communication, and security workstations should be designed for flexible use depending on the staff assigned at any given time. Specific spaces to be provided as part of the Customer Service Centre include:

- **Reception/Concierge Desk** (counter-height) with space for two workstations open to the public (on-stage); one of the workstations will be staff by language services.
- **Registration/Communication Cubicles (2)** with a clerical workstation and 2 patient/visitor chairs. Requires direct access to an office equipment alcove.
- **Self-Registration Kiosk (2)** with queuing space and in view to entrance and lounge.
- **Workstation** for the switchboard operator (off-stage).
- **Office/Cubicle** for the patient registration supervisor (off-stage).
- **Security Office/Cubicle** positioned to allow a clear view of the main entrance and direct access to the lobby by the security officer who will monitor traffic to the elevators and ED.
- **Office** for the patient care coordinator.
- **Office** for the Foundation.
- **Med Response**, while categorized as part of the Customer Service Centre will be based off-stage with access to natural light and include a work area with 3 large workstations for electronic consultation and each equipped with up to 10 monitors, an alcove for office equipment, and a

physician office/consultation room with a PACS workstation for phone and/or telehealth consults as part of the Territorial Services Network.

- **Office Equipment Alcove** to provide space for a printer/copier, fax machine and other patient processing equipment and supplies; contiguous with the reception/registration workstations (off-stage).

1.3 Auxiliary Tuck Shop

This retail shop sells gifts and other amenities to patients, visitors, and staff. In addition to the display area and cashier counter, a contiguous storage room is required to storage inventory not yet displayed.

1.4 Chapel/Meditation Room

The existing chapel will be located on the main floor to improve its accessibility; the new space will be designed for non-denominational observance, spiritual reflection, or simply used by customers and staff for quiet respite. The chapel/meditation room will incorporate flexible seating with a raised altar/stage platform and will include a contiguous storage room for items used for multi-faith worship or celebration.

Facility Layout and Design Considerations

Key facility layout and design considerations pertaining the configuration of the main entry/customer services at STH are listed below:

- The main hospital entrance should be clearly visible to patients and visitors arriving on the site. Visual cues should be provided — such as a prominent portico — in addition to directional signage. The main entrance should be clearly differentiated from the ED walk-in and ambulance entrances. The hours that the main entrance is open should be clearly displayed with directions to the ED entrance for customers arriving after hours.
- The reception/concierge desk and self check-in kiosks should be immediately accessible upon entry through the main entrance vestibule.
- Convenient access to the cafeteria and the public elevators will be provided and the Customer Service Centre will also be accessible from the Emergency Department walk-in entrance.
- The main entrance/vestibule and patient/visitor lounge should be located to provide unobstructed visibility from the reception/concierge desk and the security desk.
- The Stanton Foundation Kiosk should be clearly visible by visitors arriving and circulating to other areas of the hospital as well as visible by patients waiting in the patient/visitor lounge.
- The Auxiliary Tuck Shop should be located to optimize its visibility from the patient/visitor lounge and main circulation corridor.
- The chapel/meditation room should be easily identifiable and accessible from the main entrance but away from major activity areas.
- All customer-facing staff assigned to the Customer Service Centre — whether at the reception/concierge desk, a registration/communication cubicle, or at the security desk — should be co-located to allow verbal and visual communication.
- The office equipment alcove will be shared by all Customer Service Centre staff and should be easily accessible from all workstations.

-
- A public access corridor should connect the main hospital entrance and Customer Service Centre, with the ED walk-in entrance and ED general waiting area.
 - Direct access from the main entrance and customer service area to the public elevators and the cafeteria/vending area is required; however, the main entrance and customer service area (public areas) should be securable from the remainder of the hospital so that public traffic can be controlled as required.

Summary of Space Requirements

Summary of Future Space Needs

A listing of required spaces is listed in the following tables. Corresponding room data sheets are provided under separate cover in *Stanton Territorial Hospital Renewal Project — Room Data Sheets* outline additional information on individual room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets. This information is intended to supplement the FF&E list, and the relevant codes and standards.

A total of 359.3 component gross square metres (CGSM) will be required for the main entry/customer services at STH by 2045 based on the net square metres (NSM) tabulated in the Schedule of Accommodation and using the following estimated net to gross space conversion factors. It should be noted that the actual component gross square metres or “footprint” of the main entry and customer services area will depend on the limitations of the existing building envelope and column/bay spacing, building expansion potential, and the efficiency of the architectural design.

**Table 4 – Main Entry & Customer Services
Summary of Future Space Requirements (2045)**

Facility Component	CNSM	Conversion Factor	CGSM
Main Entrance/Lobby	104.8	1.30	136.2
Customer Service Centre	111.7	1.30	116.6
Auxiliary Tuck Shop	23.9	1.30	31.1
Chapel/Meditation Room	36.0	1.30	46.8
Total	276.4	1.30	359.3

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
1.00	Main Entry/Customer Services					
1.01	MAIN ENTRANCE/LOBBY					
1.01.01	CSS-1	Main Entrance Vestibule	1	11	11	Main hospital entrance for patients/visitors who are ambulatory; size may vary based on architectural design.
1.01.03	CSS-2	Patient/Visitor Lounge	1	38.5	38.5	Direct view of drop-off/pick-up drive; includes space for two bariatric seats/wheelchairs.
1.01.05	---	ATM Alcove	1	1.9	1.9	Alcove adjacent to seating area.
1.01.06	---	Stanton Foundation Kiosk	1	4.6	4.6	Kiosk or wall display with contiguous counter, stool, queuing space, within direct view of public seating.
1.01.07	MEA-1	Wheelchair alcove	1	4.6	4.6	Accessible from Customer Service Centre but out of view of lounge.
1.01.08	WRS-4	Public Washroom (Female)	1	14.6	14.6	Includes entrance vestibule, two handwashing sinks, wheelchair accessible toilet stall and regular toilet stall.
1.01.09	WRs-4	Public Washroom (Male)	1	14.6	14.6	Includes entrance vestibule, two handwashing sinks, wheelchair accessible toilet stall and urinal.
1.01.10	CSS-7	Storage Room	1	5.6	5.6	General storage including storage for personal items of patients who have been discharged but are awaiting flights.
1.01.11	---	Breastfeeding Room	1	7.5	7.5	as per the CSA z-8000 recommendations.
SUBTOTAL		MAIN ENTRANCE/LOBBY			104.8	
1.02	CUSTOMER SERVICE CENTRE					
1.02.01	CSS-3	Reception/Concierge Desk	1	9	9	Immediately adjacent to main entrance vestibule; open reception desk with two staff workstations (one for language services).

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
1.02.02	CSS-4	Registration/Communication Cubicle	2	6	12	Semi-enclosed cubicle with desk and two patient/visitor chairs. Requires direct access to an office equipment alcove.
1.02.03	---	Self-Registration Kiosk	2	3.7	7.4	Free standing kiosk with queuing space for self check-in; in view to entrance and lounge.
1.02.04	WKS-2	Workstation	1	4.5	4.5	Semi-enclosed cubicle for switchboard operator.
1.02.05	WKS-5	Office/Cubicle	1	9.3	9.3	Office/cubicle for patient registration supervisor.
1.02.06	WKS-2	Workstation	1	3.7	3.7	Touchdown station for the Registration Assistant.
1.02.07	WKS-5	Office/Cubicle	1	9.3	9.3	Office/cubicle for security officer during daytime hours; view to main entrance/lounge must be provided.
1.02.08	OFF-1	Office (Standard)	1	9.3	9.3	Patient care coordinator, used 24/7 by shift supervisor; located near to the Emergency Department with convenient access to all patient care areas required.
1.02.09	WKS-1	Med Response	1	23	23	Includes 3 large workstations for electronic consultation, each equipped with up to 10 monitors; can be open to the office equipment alcove. Natural light desired.
1.02.10	OEQ-1	Med Response: Office Equipment Alcove	1	4	4	Printer/copier/fax machine and related equipment.
1.02.11	OFF-1	Med Response: Office/Consult Room	1	9.3	9.3	Physician office//teleconference.
1.02.12	OFF-1	Office (Standard)	1	9.3	9.3	Foundation office.
1.02.13	OEQ-2	Office Equipment Alcove	1	6	6	Printer/copier/fax and other related equipment.
SUBTOTAL		MAIN ENTRANCE/LOBBY			116.1	
1.03	AUXILIARY TUCK SHOP

SUBTOTAL		CHAPEL/MEDITATION ROOM		36		
TOTAL		Main Entry/Customer Services		280.8		

Future Flexibility

The functional program and schedule of accommodation for customer services at STH were prepared to optimize future flexibility and adaptability to accommodate changes in staffing patterns and technology through 2045. Specific opportunities include:

- The customer-facing workstations at the Customer Service Centre are planned to provide optimal flexibility depending on the services needed at any given time. Any of the workstations could be used by a registrar, volunteer, security officer, language services consultant/interpreter, customer communication with off-site services, or other customer service staff positions to be identified in the future.
- The patient/visitor lounge and the cafeteria could provide overflow waiting space for the Diagnostic Centre, Ambulatory Care Centre, or the Day Procedure Unit through the use of electronic devices to notify the patient, family member, or visitor when their presence is requested in a specific treatment area.

2.0 Diagnostic Services

Overview of Program Renewal for Diagnostic Services

Diagnostic services at Stanton Territorial Hospital (STH) include diagnostic imaging, cardiopulmonary services (cardiac diagnostics, respiratory diagnostics and respiratory therapy), and the laboratory. These services will be consolidated into a Diagnostic Centre directly adjacent to the Critical Care Services and easily accessible from the Ambulatory Care Centre. Using the Customer Service Centre as a single point of access for reception/registration, outpatients will be directed to a central Diagnostic Centre waiting area from which they will be escorted to decentralized sub-waiting or staging areas and/or the appropriate testing or treatment room when it is available.

Diagnostic Imaging: Functional Planning Assumptions

Current Situation

The diagnostic imaging department currently occupies 418 component gross square metres (CGSM) on the ground floor in the west wing. Existing procedure rooms include:

- General radiography rooms (2)
- Fluoroscopy room (also used for general radiography)
- Computed tomography (CT) room
- Mammography room
- Ultrasound rooms (2)

Some obstetrical ultrasound tests are performed on the inpatient obstetrics unit as part of the Northern Women's Health program. General radiography, ultrasound, and bone density testing are also provided at the Yellowknife Primary Care Centre and the program leader and booking clerk for the breast cancer screening program are located at the Diamond Plaza.

Planned Scope of Services

As a key component of the Diagnostic Centre, the diagnostic imaging service will support all clinical programs provided at STH and provide outpatient diagnostic imaging to the local community. As the territorial-referral facility, specialized examinations that cannot be accommodated in other hospitals and health centers in the Northwest Territories and Kitikmeot Region of Nunavut will also be performed at STH. Additionally, the breast cancer screening program will be housed at the hospital and perform all screening mammograms for its designated catchment area.

The STH-based radiologists will interpret all diagnostic examinations performed in the Northwest Territories and Kitikmeot and will provide a visiting service to Fort Smith, Hay River, and Inuvik (when fully staffed). The STH imaging service will also function as the administrative centre for the picture archiving and communications system (PACS) in the Northwest Territories and as the imaging technical resource centre for other healthcare facilities. The satellite imaging service at the Yellowknife Primary Care Centre will continue to provide general radiography, bone density, and ultrasound testing (as technologist resources become available).

Specific diagnostic imaging services will include:

- **General Radiography.** It is expected that the demand for general radiography exams will remain constant or decrease somewhat given the shift to using other modalities such as CT and ultrasound for diagnostic purposes. However, digitized radiographic images are expected to continue to be a cost-effective diagnostic tool.
- **Fluoroscopy.** There is expected to be a decreased demand for fluoroscopy exams due to the increased use of CT.
- **Computed Tomography (CT).** The use of CT has increased dramatically in North America over the last two decades although the use rate in the Northwest Territories is significantly less than the Canadian average. It is expected that the demand for CT services at STH will continue to increase toward the Canadian average.
- **Ultrasound.** STH currently provides abdominal, renal, pelvic, breast, thyroid, scrotal, leg veins, and obstetrical ultrasound and support of some biopsies. It is expected that the use of ultrasound testing will continue to increase in the future.
- **Mammography.** Screening and diagnostic mammography will continue to be provided as part of the breast health initiative — along with ultrasound and biopsy services — to expedite breast cancer screening, diagnosis, and treatment.
- **Magnetic Resonance Imaging (MRI).** STH may provide this service at some point in the future — i.e. through the use of either a permanent or mobile unit. A detailed space list for this future service can be found in the Appendices: Schedule of Accommodation, but this area has not been included in the overall CGSM summary for Diagnostic Services.

Hours of Operation

Diagnostic imaging services at STH will be provided from 0730 to 2000 hours, Monday through Friday, and from 0730 to 1600 hours on weekends and holidays although Saturday hours could be extended in the future. On-call response will be provided 24-7.

The satellite service at the Yellowknife Primary Care Centre will continue to operate from 0815 to 1615 hours, Monday to Friday. Bone density testing will be available on one half-day per week.

Projected Workload and Key Testing Spaces

The table below compares the current average diagnostic imaging procedures by modality with the projected procedures through 2045.

Table 5 – Projected Diagnostic Imaging Procedures by Modality

Procedures	Current	Projected			
	Average 2006-2010	2020	2025	2030	2045
General Radiography	17,951	19,268	19,730	20,067	21,840
Fluoroscopy	465	476	488	496	540
CT	3,537	5,452	5,583	5,678	6,160
Ultrasound	6,827	8,094	8,287	8,425	9,174
Mammography (Screening)	1,213	967	992	1,014	1,100
Mammography (Diagnostic)	1,150	615	631	644	699
Total	31,143	34,872	35,711	36,324	39,513

There is a sufficient number of diagnostic imaging procedure rooms today — with three radiography/fluoroscopy rooms, a CT room, a mammography room, and two ultrasound rooms — to accommodate the projected 2045 workload assuming that the existing imaging equipment will be replaced/upgraded over time. However, a potential future expansion zone for diagnostic imaging should be identified during block planning and schematic design development to accommodate new technologies.

Projected Staffing

The projected staffing (headcount) for diagnostic imaging services is shown in the table below. Although the breast cancer screening program leader and booking clerk are currently located off-site, an office is planned within the STH Diagnostic Centre and an additional workstation is included in the central administrative office suite as “placeholders.” It should be noted that several additional staff will be located remote from the main diagnostic imaging area as follows:

- Clerical supervisor and a diagnostic imaging clerk will be located at the Customer Service Centre.
- Dictatypist will be co-located with the health records transcriptionists.

Table 6 – Projected Staffing (Headcount) for Diagnostic Imaging

Position	Headcount by Shift		
	Day	Evening	Night
Radiologist	2	---	---
Tech Supervisor	1	---	---
Radiology Tech I	3	3	---
Mammography Tech (Screening and Diagnostic)	2	---	---
CT Tech	1	1	---
Sonographer	3	3	---
Clerk	1-2	0	---
PACS Coordinator	1	---	---
Manager (Diagnostic Imaging)	1	---	---
Total (Diagnostic Imaging Staff)	15-16	7	---

Cardiopulmonary Services: Functional Planning Assumptions

Current Situation

Cardiopulmonary services — including cardiac diagnostics, respiratory diagnostics, and respiratory therapy — are currently provided in several locations. Cardiac diagnostics are located as follows:

- Outpatient electrocardiograph (EKG) tests are performed in the laboratory on the ground floor (by laboratory staff); ED patient testing is performed in the ED, and inpatient testing is performed at the point-of-care with mobile units.
- Holter monitoring and cardiac stress tests are performed in a dedicated testing room in the medical day care area on the third floor.
- Vascular doppler tests are performed in the diagnostic imaging area on the ground floor.
- A pacemaker clinic is conducted at the Stanton Medical Centre.
- Adult echocardiograms are performed in the Medical Day Care Unit by Internal Medicine specialists and pediatric echocardiograms are performed at the Stanton Medical Clinic by the pediatric cardiology visiting specialist (with their own equipment).

Respiratory diagnostics and therapy are performed on the second floor adjacent to the surgery suite. The space consists of a three-room suite with an office, a respiratory diagnostic/therapy room, and a multipurpose room for equipment cleaning and storage.

Planned Scope of Services

As part of program renewal, cardiopulmonary services will be incorporated into the Diagnostic Centre on the ground floor along with diagnostic imaging services and outpatient specimen collection. Cardiac diagnostics will include electrocardiography (EKG) testing as well as exercise stress testing and Holter monitoring. Capacity will be available to perform additional cardiac diagnostic services such as mobile blood pressure

testing and a chest pain clinic. The pediatric cardiology team, however, will continue to provide pediatric echocardiography in the outpatient clinic during scheduled visits rather than in the Diagnostic Centre.

The respiratory diagnostics and therapy service will continue to provide diagnostic and therapeutic care to inpatients and outpatients with respiratory diseases, insufficiencies, failures, or other associated problems and conditions — but will be relocated to the ground floor and integrated into the Diagnostic Centre.

Specific cardiopulmonary services will include:

- **Electrocardiography testing (EKG or ECG).** All EKGs performed in the Northwest Territories will be read and recorded at STH regardless of where they are performed. Cardiac diagnostics staff will also perform all EKGs on adults and children, both inpatients and outpatients.
- **Echocardiography.** Adult echocardiograms will continue to be performed at STH by internal medicine specialists; pediatric echocardiograms will continue to be performed at the Stanton Medical Clinic by the pediatric cardiology visiting specialist (with their own equipment).
- **Holter monitoring.** Holter monitors — portable EKG devices that monitor a heart's electrical activity over time while the patient is outside the hospital — will be applied and removed by the cardiac diagnostics staff. An internal medicine physician will review the downloaded EKGs.
- **Exercise stress testing.** Facilities and equipment (e.g. treadmill and bicycle) will be provided within the Diagnostic Centre for the cardiac diagnostics staff to conduct stress testing. This equipment will also be scheduled by the respiratory therapy staff for respiratory exercise testing.
- **Mobile blood pressure testing** will be provided using a device that straps around the outpatient's waist to record blood pressure readings for 24 hours while the patient is outside the hospital.
- **Pacemaker clinic.** Initial and regular follow-up appointments, for patients who have had a permanent pacemaker inserted, will be conducted and managed by the nurse practitioner, supported by an internal medicine or cardiologist specialist.
- **Chest pain clinic.** This service provides rapid assessment and evaluation of patients with chest pain who present to the emergency department, but who do not require hospitalization, and who would benefit from early outpatient evaluation. Investigative tests may include an EKG, blood analyses, a chest x-ray, an exercise stress test, a CT scan, and/or endoscopy.
- **Respiratory diagnostics** will be performed — such as pulmonary functional testing (PFT), exercise-induced asthma testing, bronchoscopy, overnight testing on inpatients, and a variety of other tests.
- **Respiratory therapy** will be primarily focused on inpatients and performed at the point-of-care.

In addition to space for patient testing and consultations, the respiratory therapists working remotely on the inpatient units will require a central “home base” (for coordination and administration). Space will also be required for the storage, assembly, testing, and dispatch of clean equipment along with an area for soiled equipment holding, disassembly, and cleaning.

Hours of Operation

Cardiac and respiratory diagnostics and respiratory therapy will be provided as follows:

- Holter monitoring, stress testing, mobile blood pressure monitoring, and the pacemaker and chest pain clinics will be conducted from 0800 to 1600 hours, Monday to Friday.
- Scheduled outpatient EKGs, respiratory diagnostics, and chronic disease management will generally occur from 0800 to 1600 hours, Monday to Friday. Respiratory therapy and urgent respiratory diagnostics will be available from 0700 to 2300 hours, seven days per week and on-call after hours.

- EKG testing will generally be performed on inpatients from 0800 to 1600 hours, seven days per week with attending nurses performing EKGs after hours.

Projected Workload and Key Testing Spaces

The table below compares the current average cardiopulmonary diagnostic tests/visits by modality with the projected procedures through 2045.

Table 7 – Projected Cardiopulmonary Tests & Visits by Modality

Cardiopulmonary Tests/Visits	Current	Projected			
	Average 2006-2010	2020	2025	2030	2045
EKG Tests	5,246	7,887	8,076	8,214	8,940
Holter Monitor/Stress Tests	815	1,165	1,192	1,213	1,320
Pacemaker Visits	n/a	tbd	tbd	tbd	tbd
Mobile Blood Pressure Tests	---	tbd	tbd	tbd	tbd
Chest Pain Clinic Visits	---	tbd	tbd	tbd	tbd
Total (Cardiac)	6,061+	9,052+	9,268+	9,427+	10,260+
Respiratory Tests (Inpatient)	4,581	4,923	5,041	5,127	5,580
Respiratory Tests (Outpatient)	1,052	1,112	1,138	1,158	1,260
Respiratory Therapy (Inpatient)	9,050	9,740	9,973	10,144	11,040
Respiratory Therapy (Outpatient)	628	688	705	717	780
Total (Respiratory)	15,311	16,463	16,857	17,146	18,660

"n/a" = Data not available.

"tbd" = To be determined; data/projections not available.

Multi-purpose testing and procedure space is planned to accommodate the expected cardiopulmonary diagnostic workload through 2045. Most of these tests rely upon mobile equipment that can be transported from one exam/treatment room to another. The co-location of cardiac diagnostics with respiratory diagnostics and ultrasound will further enhance future flexibility and adaptability as the demand for these diagnostic modalities changes over time. Designated testing rooms will be provided for cardiac testing and pulmonary function testing along with a shared exercise/stress testing room (two bays with curtain closure). An additional multi-purpose testing room is also programmed that could provide future flexibility for cardiopulmonary services as well as ultrasound.

Projected Staffing

The projected staffing (headcount) for cardiopulmonary services is shown in the following table. There is also a cardiac diagnostics booking clerk who will be located with other hospital-based operational support staff in a central office suite elsewhere in the hospital.

Table 8 – Projected Staffing (Headcount) for Cardiopulmonary Services

Position	Headcount by Shift		
	Day	Evening	Night
Nurse Practitioner (Cardiac Diagnostics)	1	---	---
Cardiology Tech	2	---	---
Respiratory Therapist (Outpatient)	1	---	---
Respiratory Therapist (Inpatients)	2	1	---
Respiratory Therapist (Sleep Studies)	---	---	1
Total (Cardiopulmonary Staff)	6	1	1

Laboratory: Functional Planning Assumptions

Current Situation

The laboratory is currently located on the ground floor in the west wing. A total of 353 component gross square metres (CGSM) is occupied adjacent to the diagnostic imaging suite and across the corridor from outpatient rehabilitation. Space for outpatient specimen collection and testing includes a blood drawing area and specimen collection washroom as well as an EKG testing room — all of which are contiguous with the central accessioning area. Additional laboratory testing sections include the core laboratory (hematology and chemistry), microbiology (in an enclosed area), transfusion services; offices for the laboratory supervisor and the manager of laboratory/diagnostic imaging, and a staff washroom. The morgue is currently located to the west next to the emergency department and includes separate rooms for viewing, staff changing/washroom, and body holding.

Planned Scope of Services

The STH laboratory will continue to be the primary referral laboratory for specialized testing and the technical support center for all laboratory services in the Northwest Territories. Although healthcare facilities outside of STH provide a range of testing locally — from simple point-of-care testing in smaller health centres to standard testing at the larger facilities in Inuvik, Hay River, and Fort Smith — the STH laboratory will provide back-up testing to these health facilities when equipment breaks down, during equipment maintenance, and during staff shortages.

Laboratory personnel who work in the specimen collection and accessioning area will collect blood and urine specimens from outpatients presenting at the Diagnostic Centre. Specimens from inpatients and emergency patients will be collected at the point-of-care. All specimens will be received and processed for analysis including specimens referred-in from other health centres in the Northwest Territories and those to be prepared and packaged for transport to other laboratories for testing not performed at STH. STH will continue to be responsible for all testing of drinking water from community water supplies throughout the Northwest Territories.

Both outpatient specimen collection and electrocardiograph testing (EKGs) will be more closely integrated with the Diagnostic Centre. Upon check-in at the Customer Service Centre, outpatients will be directed to the waiting area until escorted by a laboratory assistant to the specimen collection area. EKGs will be performed in the cardiopulmonary/ultrasound suite by cardiac diagnostic staff. Outpatient specimen collection will also occur in the Outpatient Clinic (main floor) and will continue to be provided at the Yellowknife Primary Care Clinic. Laboratory testing performed at STH will include hematology, chemistry, microbiology, and transfusion services. Anatomical pathology will continue to be referred out with the exception of frozen sections preparation and analysis, which will be located in the surgical suite.

Hours of Operation

It is anticipated that the STH laboratory will expand its hours of operation in the future. The core laboratory will be staffed 24 hours per day; 365 days per year and microbiology will be staffed from 0700 to 1800 hours, 365 days per year (on-call after hours for urgent microbiology).

Outpatient specimen collection at the hospital will generally occur during the hours that the Customer Service Centre and Diagnostic Centre are staffed. Specimen collection will be provided at the Yellowknife Primary Care Centre from 0800 to 1600 hours, Monday to Friday.

Projected Workload

The table below compares the current average number of tests performed at STH (based on the most recent multi-year average utilization rate) to the projected tests through 2045. It does not account for repatriation of referred-out specimens from the Sahtu Health Region or for other specimens currently bypassing the STH laboratory. The number of outpatient visits for specimen collection is included in this table.

Table 9 – Projected Laboratory Tests

Laboratory Tests	Current	Projected			
	Average 2006-2010	2020	2025	2030	2045
Hematology	42,317	45,417	46,505	47,301	51,480
Chemistry	365,094	391,923	401,312	408,175	444,240
Transfusion Service	5,671	6,087	6,233	6,340	6,900
Microbiology	26,567	28,240	29,215	29,716	32,340
Other Tests	14,964	16,092	16,477	16,759	18,240
Total	454,613	487,759	499,742	508,291	553,200
Outpatient Specimen Collection	14,964	16,092	16,477	16,759	18,240

Projected Staffing

The projected staffing (headcount) for the laboratory is shown in the following table.

Table 10 – Projected Staffing (Headcount) for the Laboratory

Position	Headcount by Shift		
	Day	Evening	Night
Visiting Pathologist/Anatomical Pathology Tech	1	-	-
Laboratory Supervisor	2	1	-
Laboratory Assistant (Specimen Collect/Accession)	7	2	1
Tech II (Bacteriology)	1	-	-
Lab Tech (Bacteriology)	4	2	-
Tech II (Core Laboratory)	2	1	-
Lab Tech (Core Laboratory)	4	3	2
Quality Control Tech	2	-	-
Manager (Laboratory)	1	-	-
Total (Laboratory-Based Staff)	24	9	3
Laboratory Information System (LIS) Coordinator	2	-	-
Total (Facility-Based Staff)	26	-	-

Proposed Facility Reconfiguration and Key Spaces

Facility Reconfiguration Concept

The Diagnostic Centre will provide one-stop-shopping for most outpatient testing performed at STH. Along with the Ambulatory Care Centre and the Day Procedure Unit, the Diagnostic Centre will be one of a limited number of outpatient destinations at the hospital which will simplify outpatient way finding and stream line outpatient care delivery.

At the same time, discreet circulation patterns and holding/staging areas will be provided for emergency department patients and inpatients who may need to visit the Diagnostic Centre for tests that cannot be performed in the ED or on the inpatient unit with portable equipment.

As shown in the functional diagram on the following page, the Diagnostic Centre will be comprised of three “suites” that share a common outpatient waiting area — the diagnostic imaging suite, cardiopulmonary/ultrasound suite, and the specimen collection suite (outpatient lab). Common support space will be shared between all testing areas.

The central laboratory will be an off-stage production area with convenient access to the central specimen processing/accessioning area for receiving specimens from the ED, inpatient units, and the outpatient specimen collection suite. In addition, exterior access to the laboratory will be required for sending-out and receiving specimens from other facilities (with the designated entrance to be determined during schematic design).

Installation of a pneumatic tube system has been included as part of the technical renewal of the STH laboratory space and associated facility components.

Patient Access and Circulation

The majority of outpatients will already be pre-registered when they arrive at the main hospital entrance. They will check-in at the Customer Service Centre where their identification will be checked. The destination testing suite will also be notified of their arrival. Once check-in is completed (or registration), they will be directed to the Diagnostic Centre waiting area. From this shared waiting area, outpatients may be escorted to a sub-waiting area (if they need to gown and undergo pre-test preparation) or they will be taken directly to the designated testing or procedure room. Post-testing, outpatients may check-out at the Customer Service Centre (only if necessary) and depart via the hospital main entrance. Outpatients who require recovery may be moved to the Medical Day Care Unit until they are ready for discharge. Outpatient Clinic visits will be coordinated, to the extent possible, so that outpatients can undergo testing on the same visit.

ED patients and inpatients — arriving either in a wheelchair or on a stretcher — will be taken to an inpatient holding alcove until they are transported to the appropriate diagnostic imaging procedure room. Most ED patients and inpatients will require diagnostic imaging tests although some may also need to access the cardiopulmonary/ultrasound suite. Once their testing is completed, the ED or the inpatient unit will be notified to pick up the patient.

Major Facility Components

Diagnostic services at STH will include seven major functional areas as follows:

- **Outpatient Intake Area**
- **Diagnostic Imaging Suite**
- **Cardiopulmonary/Ultrasound Suite**
- **Outpatient Specimen Collection Suite**
- **Shared Support Space**
- **Laboratory**
- **Morgue**

2.1 Outpatient Intake Area

This is the first point of contact for outpatients once they have checked-in at the Customer Service Centre and will include common outpatient waiting area and patient washrooms as follows:

- **Diagnostic Centre Waiting Room** for outpatients (with their accompanying family members or escorts) who have checked-in at the Customer Service Centre and are waiting service in the Diagnostic Centre; a coat rack and a contiguous child play alcove will also be provided. A wall-mounted digital display monitor that is visible from the waiting area seating will show programmed educational messages and videos relating to health prevention and wellness, and items of community interest. This waiting area will provide seating for up to 30 people, including space for 2 wheelchairs and a bariatric seat.
- **Patient/visitor washrooms (2)**, male and female with wheelchair accessibility. To be easily accessible from the common waiting area.

2.2 Diagnostic Imaging Suite

This suite will include a patient reception and preparation area with a sub-waiting alcove, male and female patient changing/washrooms, and a discreet holding area for patients arriving in wheelchairs or on stretchers from the emergency department or from an inpatient unit. The major imaging procedure rooms — diagnostic radiography, fluoroscopy, CT, and mammography — and associated staff workstations and support space is also included in this suite as follows:

- **Patient Reception and Preparation Area** including a sub-waiting alcove with seating for four persons — directly adjacent to the staff work area — and male and female patient changing/washrooms.
- **Inpatient/ED Holding Alcove** that is not within view of the outpatient waiting area; discreet and convenient access will be provided from the emergency department as well as from inpatient units. Space provided can accommodate either a curtained cubicle for a stretcher, or a holding alcove for 2 wheelchairs. This alcove will be located adjacent to staff work areas and near DI imaging procedure rooms.
- **Staff work area** with workstations for each modality, dedicated offices/cubicles for the Clerical and DI tech supervisors and the PACS coordinator, an alcove for office equipment, and a hand hygiene sink.
- **Radiography suite** with two general radiographic procedure rooms, each with a contiguous control/workstation.
- **Fluoroscopy suite** with fluoroscopy procedure room — that could also perform routine radiography — and a contiguous control/workstation and a patient washroom.
- **CT suite** with a CT procedure room and a contiguous control/workstation and a patient washroom.
- **Mammography procedure room** with a contiguous control/workstation.
- **Radiologist office (2)** with PACS viewing stations and space for consultation with other providers.

2.3 Cardiopulmonary/Ultrasound Suite

This suite will include a patient recovery/preparation area with a sub-waiting alcove and a patient washroom. In addition to a central staff work area, flexible testing/procedure rooms will be provided — all of which will be equipped with mobile equipment — along with associated support space as follows:

- **Patient Recovery/Preparation** with a sub-waiting alcove with seating for four persons and a patient washroom — both directly adjacent to the staff work area.
- **Staff Work Area** with workstations for each modality, a dedicated office/cubicle for the cardiac nurse practitioner, an alcove for office equipment, and a hand hygiene sink. An additional touch-down workstation will be shared by the respiratory therapists assigned to the inpatient units.
- **Ultrasound Testing Rooms (2)** equipped with mobile ultrasound units.
- **Cardiac Exam/Testing Room** for electrocardiography (EKGs), echocardiography, Holter monitoring, etc., all of which are mobile units.
- **Respiratory Testing Room** for pulmonary function testing. This room will be negative pressure capable and could also accommodate a body box.
- **Testing Room (Multipurpose)** that could be used for remote monitoring/telehealth or accommodate future ultrasound, cardiac, or pulmonary function testing equipment.

- **Exercise/Stress Testing Room** that is enclosed with two treadmill bays (curtain enclosure) to be shared by cardiac and respiratory techs.
- **Physician Viewing Area.**
- **Patient washroom (2)** that are wheelchair accessible, with one located between the two ultrasound testing rooms and one central to the other testing rooms.

2.4 Outpatient Specimen Collection Suite

This area will include a patient reception/sub-waiting area along with a specimen collection work area, blood drawing cubicles and a specimen collection washroom as follows:

- **Patient Reception/Sub-Waiting Area** with seating for four persons directly adjacent to the specimen collection work area.
- **Specimen Collection Work Area** with a computer & label maker and a staff work area for preparing specimens to be transported to the laboratory accessioning area. Connected to the Laboratory Central Specimen Processing Area via a pass-through or pneumatic tube, and contiguous with the phlebotomy cubicles.
- **Blood Drawing Cubicle (3)** with phlebotomy chair and curtain closure and adjacent to the collection work area.
- **Patient Specimen Collection Washroom** that is wheelchair accessible with a pass-through cabinet to the staff work area.

2.5 Shared Support Space

This area will include spaces shared between the three Diagnostic Centre suites including clean and soiled utility rooms, an equipment storage room, and an alcove for staging mobile equipment. Other staff support spaces include a staff room, staff lockers alcove, staff washroom, a conference room, offices for the Diagnostic Centre manager and breast screening program leader, and workstations for the breast screening and booking clerk, as follows:

- **Clean Utility Room** for the storage of clean and sterile supplies and the storage, assembly, and testing of equipment (e.g., respiratory therapy).
- **Soiled Utility Room** for the temporary holding of soiled equipment for disassembly and cleaning, and/or the holding of items that will be removed for cleaning, reprocessing, or destruction.
- **Housekeeping Closet** to store a housekeeping cart, back-up supplies and mop for cleaning.
- **Equipment Storage Room** for the holding of equipment (primarily respiratory) ready for dispatch, and requires convenient access to the ICU, or can be located with the ICU
- **Mobile Equipment Alcove** for the staging of mobile equipment used both in the Diagnostic Centre or transported to other areas of the hospital. This alcove will include electrical support.
- **Office (2)** for the DI Centre managers (Diagnostic Imaging and Lab).
- **Office** for the breast screening program lead.
- **Workstations (2)** for the breast screening clerk and booking clerk.
- **Conference Room** with seating for eight to ten persons.

-
- **Staff Room** with a kitchenette, dining table, and six chairs.
 - **Staff Lockers Alcove** with 20 stacked purse/tote bag lockers for staff that do not have dedicated workstations.
 - **Staff washrooms (2)** with wheelchair accessibility.

2.6 Laboratory

The existing laboratory space consists of a large open area with several pieces of automated equipment — that provide quick turnaround for chemistry, hematology, and urinalysis — supported by designated areas for the highly manual testing for microbiology, and transfusion services. The microbiology equipment was recently upgraded. Although the central specimen accessioning/processing area requires expansion and reconfiguration, any further reconfiguration of the rest of the laboratory should be postponed as long as possible — pending block planning and the staging of technical renewal — given the rapid changes occurring in laboratory automation.

- **Central Specimen Processing Area** that includes 3 workstations: a receiving/sorting workstation for receiving, sorting and data entry and includes a computer, phone, label printer and printer/fax; a processing workstation for specimen centrifuging/aliquoting with two counter top centrifuges and one label printer; and a referral/sent out workstation for specimen packaging with a computer, printer, label printer and phone. This area also includes a shared support space with a floor mounted double-door refrigerator, a double sink, and supply storage for specimen processing, referral/send out and courier boxes.
- **Pneumatic Tube**
- **Microbiology Work Room** with an anteroom and work room.
- **Core Laboratory Space** for chemistry and hematology.
- **Transfusion Services**
- **Laboratory Support Space** with storage for refrigerator/freezer, 2 offices (one for lab supervisor and one for clerical supervisor), an office/workstation for lab information services, a central work area functioning as touchdown stations for lab staff, and a staff washroom that is wheelchair accessible.

The degree of automation in the future will have a significant impact on both the space and configuration of the laboratory — with a very large volume of tests performed on a single piece of equipment. Because of this, test volume and staffing are not generally used to determine the amount of space required for lab operations in automated areas. Automation is making tremendous strides — every year, more tests are available on automated analyzers, reducing the number of staff workstations needed in technical areas and giving laboratories the capability to perform esoteric tests that they could not provide in the past. Even in the highly manual sections of the laboratory, new technology is being developed to automate specific processes. For 2045 it is not expected that the footprint of the STH laboratory will need to be any larger.

As the referral centre for the Northwest Territories, the STH laboratory could potentially move outside the hospital at some point in the future — if supported by a Business Case — such that only a smaller specimen processing/accessioning area, rapid response laboratory, and transfusion services would need to be located within the hospital.

2.7 Morgue

The morgue is located on the main floor between the emergency department and the primary east-west corridor. Its current space includes a body preparation area, body holding refrigerators, a staff changing/washroom, and viewing area. The existing size and configuration of the morgue is generally adequate, however the viewing area will be enlarged and bariatric capability will be added to the body holding area. Off-stage access for body transport is required and public access to the viewing area is met with the location being near the service entrance, as follows:

- **Family Viewing Area** that is adjacent to the body holding area.
- **Morgue**
- **Body Holding Area** for holding up to 6 bodies including bariatric capability.
- **Family Washroom** for visitors of the Family Viewing Area that is adjacent to the Family Viewing Area.

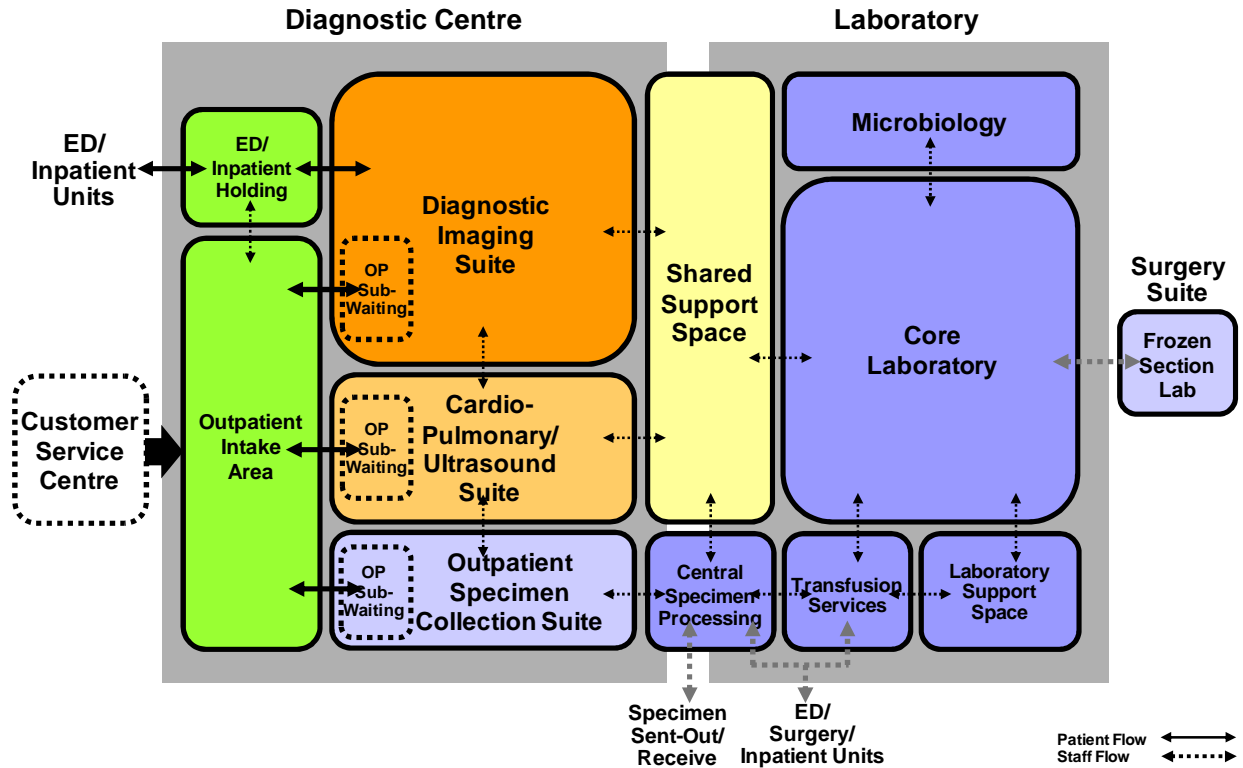

2.8 Magnetic resonance imaging (MRI)

Space to accommodate an MRI unit in the future has been planned and includes an anteroom/entry area with a hand hygiene sink and patient washroom along with the actual MRI suite (procedure room, control room, and equipment room), as follows:

- **Anteroom** area to manage patient transfers and to create an allowance for the gauss perimeter area.
- **Hand Hygiene Sink** that is contiguous with the anteroom.
- **Patient Washroom** that is wheelchair accessible.
- **MRI Suite** that includes the MRI procedure room with RF and magnetic shielding, a control room with a dedicated cooling system and automatic emergency backup, and an equipment room with a 3.0 Tesla magnet.

Note: Although the MRI area has been included in the Space List, it is not included in the total CGSM summary for Diagnostic Services, as it is an area that is planned for future expansion.

Diagram 2 – Major Facility Components and Functional Adjacencies for Diagnostic Services

Facility Layout and Design Considerations

Key facility layout and design considerations pertaining to the configuration of diagnostic services at STH are listed below:

- The Diagnostic Centre waiting area should be directly accessible from the Customer Service Centre with easy access to the three testing suites — diagnostic imaging suite, cardiopulmonary/ultrasound suite, and the outpatient specimen collection suite. This waiting area should be clearly identified as the intake area for the “Diagnostic Centre” and differentiated from the public lounge that is contiguous with the main entrance to the hospital.
- Convenient access to the Diagnostic Centre should also be provided from the Outpatient Clinic.
- Discreet access to the Diagnostic Centre — out of view of the outpatient waiting area — must be provided for inpatients and emergency patients arriving for testing.
- The central specimen processing area in the laboratory should be located at or near the entrance to be used by phlebotomists and/or other staff bringing specimens to the laboratory — to be determined during schematic design.

Summary of Space Requirements

Summary of Future Space Needs

A listing of required spaces is listed in the following tables. Corresponding room data sheets are provided under separate cover in *Stanton Territorial Hospital Renewal Project — Room Data Sheets* outline additional information on individual room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets. This information is intended to supplement the FF&E list, and the relevant codes and standards.

A total of 1,497.1 component gross square metres (CGSM) will be required for diagnostic services at STH by 2045 based on the net square metres (NSM) tabulated in the the Schedule of Accommodation and using the following estimated net to gross space conversion factors. It should be noted that the actual component gross square metres or “footprint” for diagnostic services will depend on the limitations of the existing building envelope and column/bay spacing, building expansion potential, and the efficiency of the architectural design.

Table 11 – Summary of Future Space Requirements for Diagnostic Services (2045)

Facility Component		CNSM	Conversion Factor	CGSM
2.1	Outpatient Intake Area	60.2	1.50	90.3
2.2	Diagnostic Imaging Suite	295.0	1.50	442.5
2.3	Cardiopulmonary/Ultrasound Suite	142.8	1.50	202.8
2.4	Outpatient Specimen Collection Suite	46.8	1.50	65.7
2.5	Shared Support Space	123.7	1.50	185.6
2.6	Laboratory	300	1.35	402.3
2.7	Morgue	64.0	1.35	86.4
Total		1,032.5	1.45	1,497.1
2.8	Magnetic Resonance Imaging (Future Expansion)	99.1	1.50	148.7

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
2.00	Diagnostic Services					
2.01	OUTPATIENT INTAKE AREA					
2.01.01	WTA-1	Diagnostics Centre Waiting Room: Waiting Area	1	46	46	Seating for up to 30 with 2 wheelchairs and a bariatric seat: educational display area and coat rack.
2.01.02	WTA-2	Diagnostics Centre Waiting Room: Child Play Area	1	5	5	Contiguous with the clinic waiting area; small alcove with child's table and chairs, books, and small toys for quiet play.
2.01.03	WRS-2	Patient/Visitor Washroom	2	4.6	9.2	Wheelchair accessible; male and female; could be eliminated if other facilities are available nearby.
SUBTOTAL	OUTPATIENT INTAKE AREA				60.2	
2.02	DIAGNOSTIC IMAGING SUITE					
2.02.01	WTA-1	Patient Reception and Preparation Area - Sub-Waiting Area	1	6	6	Seating for up to 4 persons, directly adjacent to staff work area.
2.02.02	DXS-1	Patient Reception and Preparation Area - Male Patient Changing/Washroom	1	12.6	12.6	Includes 2 changing cubicles, six full size lockers.
2.02.03	DXS-2	Patient Reception and Preparation Area - Female Patient Changing/Washroom	1	12.6	12.6	Includes 2 changing cubicles, six full size lockers.
2.02.04	EXT-4	Inpatient/ED Holding Alcove	2	7.5	15	Curtained cubicle for a stretcher or holding alcove for 2 wheelchairs, adjacent to staff work area and near DI imaging procedure rooms.
2.02.05	WKS-1	Staff Work Area: Clerical Workstation	2	3.7	7.4	Touch down stations for clerks responsible for film management and other duties.
2.02.06	WKS-1	Staff Work Area: Tech Workstation	3	3.7	11.1	Touch down stations for X-Ray, CT and mammography techs.
2.02.07	OFF-1	Staff Work Area: Office	1	9.3	9.3	Clerical supervisor.
2.02.08	WKS-5	Staff Work Area: Office/Cubicle	1	9.3	9.3	DI Tech supervisor.
2.02.09	WKS-4	Staff Work Area: Office/Cubicle	1	6.5	6.5	PACS coordinator.

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
2.02.10	OEQ-2	Staff Work Area: Office Equipment Alcove	1	6	6	Printer/copier/fax etc.
2.02.11	HHS-1	Hand Hygiene Sink	1	1	1	
2.02.12	---	Radiography Suite: Radiography Procedure Room	1	29	29	
2.02.13	---	Radiography Suite: Radiography Control/Workstation	1	7.5	7.5	
2.02.14	---	Radiography Suite: Radiography Procedure Room	1	29	29	
2.02.15	---	Radiography Suite: Radiography Control/Workstation	1	7.5	7.5	
2.02.16	---	Fluoroscopy Suite: Fluoroscopy Procedure Room	1	29	29	
2.02.17	---	Fluoroscopy Suite: Fluoroscopy Control/Workstation	1	7.5	7.5	Requires access from within the room and from the corridor.
2.02.18	WRS-2	Fluoroscopy Suite: Patient Washroom	1	4.6	4.6	Wheelchair accessible.
2.02.19	DXS-3	Mammography Procedure Room	1	14	14	
2.02.20	---	CT Suite: CT Procedure Room	1	40	40	
2.02.21	---	CT Suite: CT Control Room	1	11	11	
2.02.22	WRS-2	CT Suite: Patient Washroom	1	4.6	4.6	Wheelchair accessible. This washroom is to be contiguous with CT room.
2.02.23	OFF-1	Office (Radiologist)	2	9.3	18.6	Requires access from within the room and from the corridor.
SUBTOTAL		DIAGNOSTIC IMAGING SUITE			299.1

Future Flexibility

The functional program and schedule of accommodation for diagnostic services at STH were prepared to optimize future flexibility and adaptability to accommodate changes in medical practice, staffing patterns, technology, and linkages to other healthcare providers through 2045. Specific opportunities include:

- The four testing rooms planned for the cardiopulmonary/ultrasound suite are all interchangeable providing optimal flexibility depending on the type of mobile equipment to be used in the future. A central staff work area is also planned to be shared by cardiac, respiratory, and ultrasound staff.
- Similarly, the major procedure rooms with fixed equipment are aggregated in the diagnostic imaging suite and can be equipped for different modalities over time as required.
- MRI testing — planned in the future expansion phase — could be performed with a mobile unit as long as a building access point and docking area is identified during block planning and schematic design development.

A flexible time frame for renewal of the laboratory should be planned in light of its role as a territorial service and its evolving technology and automation. It should be noted that if the production components of the laboratory are located off-site at some point in the future, space will still need to be provided within STH for central specimen processing, rapid-response testing, and transfusion services.

3.0 Ambulatory Care Centre

Overview of Program Renewal for Ambulatory Services

As part of program renewal, ambulatory services will be consolidated, and will have convenient access from the main entry and Customer Service Centre, and to the Day Procedure Unit (DPU) (see Section 4.0 Surgery and Special Procedures). A new Ambulatory Care Centre (ACC) will include flexible clinic space to accommodate visiting specialists. Medical day care and the renal care program will also be incorporated into the ACC and share common check-in and clinical support space with the clinics whenever possible. Provider office space and/or workstations will be provided within the various ambulatory care areas.

Outpatient Clinic: Functional Planning Assumptions

Current Situation

Residents of the Northwest Territories can access specialists either in Yellowknife or at a travel clinic in their home community or region. Travel clinics are currently provided in Fort Simpson, Fort Smith, Hay River, Inuvik, and selected communities in Nunavut. Specialists are categorized into two groups: permanent specialists and visiting specialists. There are currently 10 permanent specialties and 10 visiting specialties.

Permanent specialists: Most of the specialists base their practices in a clinic environment with the exception of anesthesiology (based in the surgery suite), radiology (based in diagnostic imaging), and the Chief Public Health Officer (located at the Department of Health and Social Services). The psychiatrists are based at the hospital (inpatient unit) and within the community. The remaining specialists are based at clinics in three distinct locations in Yellowknife, all managed and operated by the Stanton Territorial Health Authority (STHA):

- **Stanton Medical Clinic** — located on the first floor of the hospital — provides office, exam, and procedure room space for the permanent specialists in general surgery, orthopedic surgery, obstetrics/gynecology, and pediatrics, and for visiting specialists in orthopedic back surgery, pediatric orthopedic surgery, pediatric cardiology, pediatric allergy, urology, and gynecologic oncology.
- **Stanton Medical Centre** — located less than a kilometer from the hospital — provides office, exam, and procedure room space for permanent specialists in internal medicine and otolaryngology, and for visiting specialists in oncology, nephrology, neurology, and rheumatology.
- **Stanton Eye Clinic** — located in downtown Yellowknife — provides office, exam, and procedure room space for the permanent specialist in ophthalmology.

Visiting specialists from the south see patients at both the Stanton Medical Clinic and the Stanton Medical Centre.

Outpatient clinics are provided at various locations throughout the hospital including:

- **Pre-admission clinic** — provided from the inpatient surgical unit on the second floor.
- **Northern Women's Health program** — provided from the obstetrics unit on the second floor — is a nurse practitioner led service with the goal of improving women's health.
- **Northern Options for Women** — provided from the inpatient surgical unit on the second floor — is a program dedicated to making reproductive choice and abortion services available to women in the Northwest Territories and Kitikmeot region of Nunavut.
- **Fracture clinic** — provided from the emergency department on the first floor.

-
- **Anticoagulation management clinic** — provided from the emergency department.
 - **Adult and pediatric follow-up clinics** — provided from various locations in the hospital (for adults) or from the inpatient pediatric unit (for pediatrics).
 - **Emergency department follow-up clinic** — provided from the emergency department.

Planned Scope of Services

As part of program renewal, both the permanent and the visiting specialists will see patients in one of two clinics in Yellowknife. The Permanent Specialists Clinic will consolidate the following permanent specialties: general surgery, orthopedic surgery, obstetrics/gynecology, pediatrics, internal medicine, and otolaryngology. The Outpatient Clinic will consolidate all the visiting specialties as well as all other outpatient clinics currently distributed throughout the hospital. These 2 clinics will be part of the Ambulatory Care of the hospital building. The objective is to achieve operational and space efficiencies as well as to facilitate and enhance collaboration among the caregivers.

The primary activities to be performed in the Outpatient Clinic will include:

- Initial consults on newly referred patients.
- Follow-up consults on patients previously seen in the clinic, returning from treatment provided elsewhere, or recently discharged from an inpatient unit at STH.

All diagnostic testing and minor treatments or procedures currently performed in existing clinics will be performed in either the Diagnostic Centre, Day Procedure Unit, or in one of the two procedure rooms to be provided as part of the Ambulatory Care Centre. At this time, it is assumed that the Stanton Eye Clinic will remain outside the hospital.

Hours of Operation

Permanent Specialists Clinic – will continue to schedule patients from 0800 to 1600 hours, Monday through Friday with a 45-minute lunch break.

Outpatient Clinic – will schedule patients from 0800 to 1600 hours, however the hours may vary depending on the specific clinic. Visiting specialists may see patients into the evening if needed to accommodate wait-lists between visits. Clinics may also expand to Saturdays in the future.

Projected Workload and Exam Room Requirements

Exam room requirements were calculated for both the permanent specialists and for the outpatient clinics and visiting specialists.

A total of 20,819 annual visits are projected for the permanent specialists based on the expected number of physician full-time equivalents (FTE) needed in the community to be a Level III Trauma Centre (22 FTE). There are currently 15.0 FTE specialists for internal medicine, otolaryngology, general surgery, orthopedic surgery, obstetrics/gynecology, and pediatrics. The projected visits were based on the current average annual visits per permanent specialist FTE and adjusted for the increase in FTEs. The available “annual hours per each exam room” assumes that all exam rooms are scheduled 250 days per year, 6.5 hours per day at 90% utilization — allowing for a 10% scheduling inefficiency. Approximately five exam rooms will be required for the permanent specialists based on the calculations in the table on the following page. A decision was made to increase the exam room allocation to 6 to accommodate each specialty and/or to accommodate the potential addition of urology as a permanent specialty.

Table 12 – Exam Room Calculation for the Permanent Specialists

Permanent Specialty	Projected Physician FTEs	2045 Projected Visits	Estimated Average Minutes/ Visit	Required Annual Room Time (Hours)	Annual Hours/Each Exam Room	Exam Rooms Required
Ob-Gyn	4.0	2,488	40	1,659	1,625	1.0
General Surgery	4.0	4,556	20	1,519	1,625	0.9
Orthopedic Surgery	4.0	5,180	15	1,295	1,625	0.8
Pediatrics	4.0	3,236	40	2,157	1,625	1.3
Otolaryngology	2.0	2,075	15	519	1,625	0.3
Internal Medicine	4.0	3,284	30	1,642	1,625	1.0
Total	22.0	20,819	25	8,791	1,625	5.3 (6)

In addition to the projected visits for the permanent specialists, another 10,801 annual visits are projected for the visiting specialists and the outpatient clinics. The need for approximately six exam rooms was calculated based on the expected half-days per week and the target average visits per half-day, assuming 250 days per year of operation (outlined in the following table). Given the expected increase in ambulatory care clinics in the future, a decision was made to increase the exam room capacity to 8 (this will be achieved by converting standard consult rooms to full exam rooms).

Table 13 – Exam Room Calculation for the Visiting Specialists and Outpatient Clinics

Outpatient Clinic	2045 Projected Visits	Planned Clinic Half-Days/ Week	Planned Average Visits/ Half-day	Projected Average Visits/ Week	Exam Rooms Required
Pre-Admission Clinic	2,160	10	4.0	43.2	1.1
Northern Women's Health Program	1,926	10	4.5	38.5	0.9
Fracture Clinic	1,560	4	9.0	31.2	0.9
Anticoagulation Management	1,331	5	6.0	26.6	0.9
Pediatric Follow-Up	188	1	4.5	3.8	0.8
Visiting Specialists	3,127	6	12.0	62.5	0.9
Subtotal (in Clinic Area)	10,292	36	40.0	205.8	5.5 (6+2)
Northern Options for Women (DPU)	509	4	3.0	10.2	0.8
Total OP Clinics	10,801	40	43.0	216.0	6.3

Projected Staffing

The projected staffing (headcount) for the clinic-based staff – excluding the physicians – is shown in the table on the following page. The nurse practitioners (NPs) that support the permanent specialists have expertise in internal medicine, pediatrics, and orthopedic surgery. These practitioners will have office/cubicles in the Permanent Specialists Clinic. The orthopedic surgery nurse practitioner also covers the fracture clinic. The nurse practitioner who oversees the ED follow-up clinic will work in the Emergency Department when the clinic is not in session. The NP/RN who covers the Northern Options for Women program (four half-days/week) will have an office/cubicle in the Outpatient Clinic, but will perform consults and assist with the associated procedures in the Day Procedures Unit. A hospital-based pharmacist will oversee the

anticoagulation management clinic during the five, half-days per week that this clinic is held. Although not listed in the staffing table, two (2) offices for Ambulatory Care Centre managers will be located within the Ambulatory Care Centre.

Table 14 – Projected Staffing (Headcount) for the Outpatient Clinic

Subtotal (Outpatient Clinics)	7	-	-
Total (Clinic-Based Staff)	27	-	-

Equipment & Technology

Any diagnostic or treatment equipment used in the exam room or the procedure room will be portable. Major diagnostic tests and procedures will be performed in either the Diagnostic Centre, Day Procedures Unit, or in one of the two procedure rooms to be provided as part of the Ambulatory Care Centre. Although space will accommodate the use of paper charts, it is assumed that by 2045 all documentation will be electronic. However, no paper charts will be stored in the Ambulatory Care Centre, but will be stored in Health Records. Telehealth and videoconferencing technology will be increasingly used for initial screening, monitoring, and for patient follow-up as well as to provide clinical support and education for remote providers.

Medical Day Care Unit: Functional Planning Assumptions

Current Situation

The medical day care area is currently located on the third floor within the inpatient medical unit (3-East) and occupies 130 component gross square metres (CGSM). This space was originally designed for inpatient care — the equivalent of four inpatient bedrooms — and includes a treatment area (with four bays), an endoscopy procedure room, a cardiac stress testing room, a staff charting/work area, a small waiting area with three to four chairs, and a patient washroom. The existing treatment area is undersized with inadequate space between patient bays to minimize cross infection and provide appropriate visual and acoustical privacy. The congested waiting area allows waiting patients direct view of the endoscopy room and the patient washroom. The endoscopy room is also undersized and lacks negative pressure. There is inadequate storage overall, particularly for storing scopes or holding a stretcher. Cardiac stress testing and Holter monitoring have subsequently been moved down the hall to an inpatient bedroom.

Planned Scope of Services

Specific service components to be included in the reconfigured Medical Day Care Unit (MDCU) area:

- **Chemotherapy.** The MDCU will provide chemotherapy services (primarily infusions) under the direction of a visiting oncologist or local internist with chemotherapy expertise. This may be done virtually (by telephone and/or telehealth) and supplemented with monthly on-site visits. When on site, the oncologist will visit the MDCU to meet patients and consult with the staff (oncology consults will occur in the Outpatient Clinic). Intravenous chemotherapy preparations will be prepared in the pharmacy and delivered to the MDCU in time for the scheduled treatment.
- **IV therapy/OPAT.** Intravenous or parenteral therapy (IV therapy) will include a variety of procedures from blood and blood product administration to non-chemotherapy drug infusions. Outpatient antimicrobial therapy (OPAT) will also be provided within the MDCU (currently provided in the emergency department).
- **Central venous catheter care (CVC).** The MDCU nurses will be responsible for the care and management of patients with CVCs — catheters inserted in the arm or chest to give medicines, fluids, nutrients, or blood products via a large vein, over a long period of time, usually several weeks or more. CVC care will be provided in a procedure room in the ACC.
- **Minor procedures.** A number of minor procedures will be performed in one of the ACC procedure rooms including paracenteses, thoracenteses, and liver biopsies. Physicians will perform these procedures with support as required from MDCU nursing staff.
- **Wound care.** Registered nurses with wound care expertise will be based in the MDCU and provide wound care to both outpatients and inpatients. Outpatient wound care will be provided in a procedure room in the ACC.

The Cancer Patient Navigator, who supports cancer patients and their families throughout the hospital, will be relocated to an easily accessible location.

Hours of Operation

The MDCU will provide IV therapy/OPAT from 0800 to 1600 hours seven days per week. Chemotherapy, CVC care, minor procedures, and wound care will be provided from 0800 to 1600 hours, Monday to Friday.

Projected Workload and Key Treatment Spaces

The Medical Day Care Unit will provide its services to adults from all over the Northwest Territories and the Kitikmeot Region of Nunavut. The table on the following page compares the current five-year average visits/procedures with the projected visits/procedures through 2045.

By 2045, there will be an average of 12 patients per peak weekday receiving chemotherapy and IV therapy/OPAT at the MDCU with an average of 10 patients per day on the weekends. A total of six treatment bays (with recliner chairs) is planned to accommodate these patients — assuming that each chair will turn over twice during the shift. In addition, a procedure room will be provided for other procedures and CVC and wound care (contiguous with the Outpatient Clinic procedure room).

By 2045, there will be up to 15 patients per peak weekday receiving chemotherapy and IV therapy/OPAT at the MDCU with an average of 4-5 patients per day on the weekends. A total of six treatment spaces are planned to accommodate these patients, 4 treatment bays with recliner chairs and 2 treatment rooms that will accommodate either a recliner chair or a stretcher. It is assumed that each space will turn over 2 to 3 times during a weekday shift. In addition, a procedure room will be available in the ACC for other procedures and wound care. CVC care will be provided within the MDC in one of the treatment rooms.

Table 15 – Projected Medical Day Care Unit Visits/Procedures

MDCU Visits/Procedures	Current	Projected			
	Average 2006-2010	2020	2025	2030	2045
Chemo/IV Therapy	1,211	1,326	1,357	1,381	1,503
OPAT	1,825	1,970	2,017	2,051	2,233
CVC Care	358	379	388	394	429
Subtotal (in MDCU)	3,394	3,675	3,762	3,826	4,165
Other Procedures (Procedure Rm)	93	114	116	118	129
Wound Care (Procedure Rm)	---	---	---	---	---
Total	3,487	3,789	3,878	3,944	4,294

Projected Staffing

The projected staffing (headcount) for a MDCU with six treatment bays and a procedure room is shown in the table on the following page. Reception/registration will be provided by the Customer Service Centre for patients that have not been pre-registered. Scheduling will be provided by the centralized booking office staff.

Table 16 – Projected Staffing (Headcount) for the Medical Day Care Unit

Position	Headcount by Shift		
	Day	Evening	Night
Registered Nurse (OPAT)	1	---	---
Clinic Coordinator	1	---	---
Registered Nurse (Chemo/IV Therapy)	1	---	---
Registered Nurse (Wound Care) Based in MDC	1	---	---
Subtotal (in MDC)	4	---	---
Cancer Patient Navigator (Based in alternate location)	1	---	---
Total (Clinic-Based Staff)	5	---	---

Note: Cancer Patient Navigator does not need to be with this group, but needs an office.

The Wound Care Nurse would go to procedure area in Clinic, and would need supply storage for dressings, etc.

Renal Care Unit: Functional Planning Assumptions

Current Situation

The hemodialysis service is located on the second floor of the hospital. Four hemodialysis stations occupy the equivalent of two inpatient bedrooms. One of the stations is used for isolation and is dedicated for the exclusive use of one patient positive for Hepatitis B. A second hemodialysis unit for the Northwest Territories is located at the Hay River Hospital.

Planned Scope of Services

An integrated, territorial-wide renal care program will be established in Yellowknife and will be located at the Stanton Territorial Hospital. A nephrologist from Edmonton will continue to provide visiting specialty services

to the hospital with four visits per year. The nephrologist is responsible for the medical supervision and direction of the territorial-wide program, including hemodialysis, peritoneal dialysis, renal insufficiency, and surveillance. A territorial-wide renal registry will be established to assist the program in planning, organizing, and evaluating services.

The operational plan specifies that six outpatient hemodialysis stations are to be provided. In addition, one ICU patient room will be constructed hemodialysis capable. Teleconferencing will be utilized for regular patient reviews by the Stanton staff and the nephrologist. The staff will participate in monthly patient conferences or reviews by teleconference with the nephrologist from Edmonton.

Six additional outpatient hemodialysis stations are to be planned as shelled space, intended to provide some flexibility for the changes in the delivery of medial service in future years. Appropriate patient and staff support spaces to accommodate these future treatment stations will also be included. The shelled space must be designed and built for convenient future expansion, with all necessary services sized accordingly and brought to the edge of the shelled space. Expansion must not interfere with the operation of the currently planned six station renal unit.

Hours of Operation

The Renal Care Unit will operate from 0800 to 2000 hours, Monday to Friday, with hemodialysis provided up to 12 hours per day, seven days per week as required. Inpatient hemodialysis at STH will operate on an as needed basis.

Projected Workload

Projected utilization in the number of hemodialysis runs, based on the most recent two-year average run rate is provided in the following table. The average treatment is four hours. These projections should be used with caution, as projected activity based on current utilization is not a reliable predictor of the need for hemodialysis services (e.g. incidence and prevalence of end stage kidney disease in the future requiring dialysis). The movement toward peritoneal dialysis as the first option for renal patients will also impact future workload volumes.

Table 17 – Projected Hemodialysis Runs

Hemodialysis	Current	Projected			
	Average 2009-2010	2020	2025	2030	2045
Runs	1,059	1,137	1,163	1,183	1,288

Projected Staffing

All renal program staff will be located at the hospital and coverage of the inpatient units will be through outreach (renal nurses providing hemodialysis in the ICU when needed). Biomedical personnel and dietician resources associated with the renal program will be utilized to support both inpatient and outpatient hemodialysis. The projected staffing (headcount) for the renal care program is shown in the following table.

Table 18 – Projected Staffing (Headcount) for the Renal Care Program

Position	Headcount by Shift		
	Day	Evening	Night
Clinical Coordinator	1	---	---

Nurse Practitioner (Renal Insufficiency Clinic)	1	---	---
Registered Nurse (Hemodialysis)	2	---	---
Dietician (Hospital-based)	1	---	---
Biomedical Engineer (Hospital-based)	1	---	---
Total	6	---	---

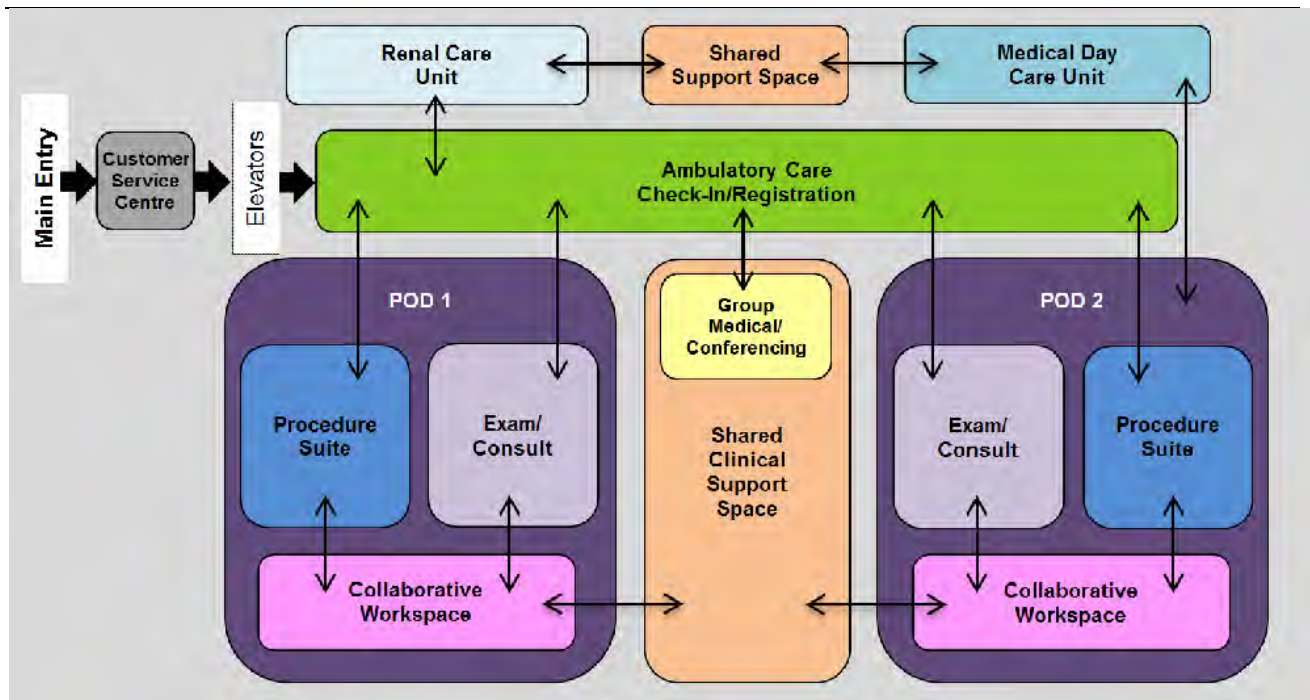

Proposed Facility Reconfiguration and Key Spaces

Facility Reconfiguration Concept

The renewed Ambulatory Care Centre (ACC) will provide one-stop shopping for most ambulatory care provided at STH. Along with the Day Procedure Unit and the Diagnostic Centre, the ACC will be one of a limited number of outpatient destinations at the hospital which will simplify outpatient way finding and streamline outpatient care delivery. At the same time, discreet circulation patterns and holding/staging space will be provide for inpatients who may need access to ambulatory care services (e.g. hemodialysis, procedure rooms).

As shown in the diagram following, the Ambulatory Care Centre will be comprised of four key areas – the Exam/Treatment Spaces, the Collaborative Work Spaces, Medical Day Care Unit, and the Renal Care Unit. A common ambulatory care check-in area will support these service areas. Shared support and clinical support space will be provided where feasible.

Diagram 3 – Ambulatory Care Centre Major Facility Components and Functional Adjacencies

Patient Access and Circulation

The majority of outpatients will already be pre-registered when they arrive at the main hospital entrance. They will be directed to the Ambulatory Care Reception where their identification will be checked or registered, if required. Once check-in is completed (or registration), they will be directed to the Outpatient Clinic waiting area or escorted to either the medical day care or renal care sub-waiting areas. Post-visit or treatment, outpatients will check-out at the respective area where their care was provided and depart via the elevators to the hospital main entrance. Diagnostic Centre visits will be coordinated, to the extent possible, so that outpatients can undergo testing on the same visit.

Inpatients — arriving either in a wheelchair or on a stretcher — will be taken to an inpatient holding alcove within the procedure suite until they are transported to the appropriate treatment area. Once their treatment is completed, the inpatient unit will be notified to pick up the patient.

Permanent Specialists patients will be booked by either Clinical Program Assistants or the Booking Office (to be determined) according to the nature and urgency of the visit – urgent, semi-urgent, elective, or via telehealth. Related visits and testing will be scheduled at the same time whenever possible. Either a new chart will be created or the patient's existing chart will be requested from Health Records and transported to the clinic on the day of the appointment.

Outpatients will be booked by the Booking Office using a referral form and scheduled according to the specific clinic booking criteria. Related visits and testing will be scheduled at the same time whenever possible. Either a new chart will be created or the patient's existing chart will be requested from Health Records and transported to the clinic on the day of the appointment.

Once at the Ambulatory Care Centre, clinic patients will be retrieved from the central waiting area by a clerk, program assistant, or nurse and taken to an intake alcove in each clinic for initial assessment - including vital signs, weight, etc., or directly to the exam/consult room. The patient will then be escorted to an exam,

consult, or procedure room along with his/her paper chart. Providers will also have access to the electronic medical record at workstations within each exam/consult/procedure room. Once the exam/consult/procedure is completed by the provider(s), the patient will receive discharge instructions as per clinic protocol. On exit, the patient may be requested to check-in with a program assistant or receptionist to book a simple follow-up appointment, or they may be given the booking office phone number to call if the follow-up appointment is more complex. If additional testing is required, the patient will be directed to the appropriate location within the hospital either before or after their clinic visit. After the provider documents his/her notes manually or electronically, the chart will be sent back to Health Records for filing.

Medical day care patients will be scheduled for an initial appointment with the nurse and/or physician in the MDCU. Outpatients will be seen in the MDCU and inpatients will be seen on the inpatient unit. Emergency department patients may be given their first treatment in the ED. Once a treatment protocol is confirmed, the information will be relayed to the booking office for subsequent scheduling.

Upon arrival at the Medical Day Care Unit, outpatients requiring chemotherapy, IV therapy, OPAT, or CVC care will be assigned to a treatment space – either in a recliner chair in one of the semi-enclosed treatment cubicles or in a recliner chair or stretcher in one of the two enclosed treatment rooms. CVC care will be provided as part of a scheduled infusion visit or as a separate discreet visit. Patients will be escorted to the Procedure Suite for wound care appointments or for any special procedures (e.g. thoracentesis, paracentesis). Outpatients will exit via the elevators through the main hospital entrance after their treatment is completed.

Likewise, outpatients arriving at the Renal Care Centre for hemodialysis will be assigned to one of five semi-enclosed treatment cubicles or the private treatment room. Renal insufficiency patients will meet with the Nurse Practitioner in the office/consult room.

Major Facility Components

As shown in the functional diagram on the previous page, the Ambulatory Care Centre will include eight major functional areas as follows:

- **Ambulatory Care Check-In Area**
- **Exam/Treatment Spaces**
- **Collaborative Work Spaces**
- **Shared Clinic Support Space**
- **Medical Day Care Unit**
- **Renal Care Unit**
- **Shared Support Space**

The Medical Day Care Unit and Renal Care Unit will share common clinical support space – clean/soiled utility rooms, equipment storage room, and staff facilities.

3.1 Ambulatory Care Check-in Area

This area will be the first point of contact for patients as they arrive to the Ambulatory Care Centre. A welcoming reception/check-in desk and comfortable waiting area will be provided along with washroom facilities.

- **Reception/Check-In Desk** immediately adjacent to the elevator lobby with an open reception desk with two staff workstations in view of the family/visitor lounge. Also includes an on-stage workstation for the Unit Clerk, a pneumatic tube and an office equipment alcove.
- **Self Check-In Kiosk** that is free-standing with queuing space for self check-in and in view of the registration/communication cubicles.
- **Waiting Area** that will primarily support ambulatory care waiting with seating for up to 30 patients/visitors (with two wheelchair/bariatric seats) and within view of the check-in desk. This includes for inclusion of a child play alcove.
- **Public Washrooms (2)** for male and female and each including an entry vestibule, two hand washing sinks, wheelchair accessible toilet and standard toilet stall for female and urinal for male.
- **Public Washroom** for family/bariatric use (unisex) and is wheelchair accessible.
- **Conference Room** with seating for 15-18 persons and teleconferencing capabilities; for patient education, family conferences, or ACC staff meetings. To be accessible near the entry to the clinic.

3.2 Exam/Treatment Spaces

This area includes a patient intake alcove and 2 exam/treatment pods. Pods need not be equal in size due to constraints of working with existing 3rd floor layout; for example, exam/treatment and office spaces might be allocated 60% - 40% between pods.

- **Patient Intake Alcove**
- **Exam/Treatment Pods (2)** that are easily accessible with good wayfinding from central waiting area and include the following:
 - **Exam/Consult Room (Standard) (9)** with point-of-care supply in each room. All rooms have access for patients off of public corridors and access for clinicians off of collaborative staff work areas.
 - **Exam/Treatment Room (Isolation)** that are negative pressure with bariatric capability. Also includes a contiguous personal protection and equipment alcove and an ensuite isolation washroom.
 - **Procedure Room (Isolation)** that is negative pressure. Pod 1's procedure room includes four-sided access and is equipped with a ceiling mounted gantry patient lift track for a bariatric patient and associated bariatric design and used for minor treatments and procedures. Pod 2's procedure room includes three-sided access for minor procedures and wound care and is located close to the Medical Day Care Unit. Both rooms include a contiguous patient washroom that is wheelchair accessible and a contiguous PPE prep alcove consisting of a hand hygiene sink, PPE organizer and hamper for soiled materials.
 - **Clean Utility Room** for storage of clean and sterile supplies.
 - **Soiled Utility Room** for temporary storage of supplies to be moved for cleaning, reprocessing, or disposal.
 - **Patient Washroom**

3.3 Collaborative Work Spaces

This area includes office spaces for the director, supervisor, coordinator and managers and two work area pods. Within each pod the proportion of treatment/exam space should be commensurate with the proportion

of office space (i.e. if a pod contains 60% of the exam/treatment space, it should contain about 60% of the office space as well)

- **Work Area – Pod No.1** that is accessible from Exam Pod No. 1 with privacy from the public. Includes a hospital application of a demountable partition system for flexible modular arrangement distribution of CPA's, RN's, NP's and Permanent and Visiting Specialists as teams and operations change. Includes the following spaces:
 - **Workstations (10)** for 4 Clinical Program Assistants, 3 RN's and 3 Visiting Specialists.
 - **Offices (14)** for 11 Physicians and 3 NP's.
 - **Hand Hygiene Sink** for the staff work area.
 - **Alcove** for office equipment.
- **Work Area – Pod No. 2** that is accessible from Exam Pod No. 2 with privacy from the public. Includes a hospital application of a demountable partition system for flexible modular arrangement distribution of CPA's, RN's, NP's and Permanent and Visiting Specialists as teams and operations change. Includes the following spaces:
 - **Workstations (11)** for 4 Clinical Program Assistants, 4 RN's and 3 Visiting Specialists.
 - **Offices (14)** for 10 Physicians and 4 NP's.
 - **Hand Hygiene Sink** for staff work area.
 - **Alcove** for office equipment.
- **Offices (5)** for the Clinical Coordinator, 2 Ambulatory Care Managers, a Medical Director and a Clinical Supervisor.

3.4 Shared Clinic Support Space

This area is shared by the exam/treatment spaces and includes the following:

- **Conference Room** with seating for 15-18 persons and is accessible near the entry to the clinic for group medical appointments and for staff meetings.
- **Medication Room** for medication preparation and storage. Includes a small Pyxis machine.
- **Housekeeping Closet** for the housekeeping cart, supplies and mop cleaning.
- **Equipment Storage Room** for the storing and staging of mobile equipment used in the clinics. Centrally located and easily accessible from each treatment pod.
- **Mobile Equipment Alcove (2)** for the temporary holding of stretchers, wheelchairs or mobile equipment.
- **Staff Room** with a kitchenette, dining table and 6 chairs.
- **Staff Locker Alcove** with 20 stacked purse/tote bag lockers for staff without dedicated workstations.
- **Staff Washroom (4)** that is wheelchair accessible.
- **Supply Storage** for dressings, etc. and storage used by the Wound Care Nurse.

3.5 Medical Day Care Unit

This treatment area is directly accessible from the Ambulatory Care Check-in and will include the following key spaces:

- **Reception/Staff Work Area** with 3 provider charting workstations for use by registered nurses (OPAT, Chemo/IV therapy and wound care). Also includes an office equipment alcove and a pneumatic tube.
- **Offices (2)** for the clinical coordinator and the cancer patient navigator.
- **Medical Day Care Sub-Waiting Area** with seating for up to four persons and a coat rack directly adjacent to the reception/staff work area.
- **Treatment Room (Recliner Chair) (2)** Enclosed negative pressure room with a recliner chair and includes a hand hygiene sink.
- **Patient Washroom** to accommodate negative pressure treatment room.
- **Treatment Cubicle (Recliner Chair) (4)** that are semi-enclosed with recliner chair and could be configured into 2 pods separated by staff work area. Curtains not included due to infection control issues.
- **Hand Hygiene Sink (2)** one between each two treatment cubicles.
- **Patient Washroom** to be shared and accessible between all 6 treatment rooms and is wheelchair accessible.
- **Mobile Equipment Alcove (4)** for the staging of wheelchairs/stretchers.

3.6 Renal Care Unit

This treatment area will be directly accessible from the Ambulatory Care Check-in and will include the following key spaces:

- **Reception/Staff Work Area** with three shared touch-down workstations for nursing staff and other providers, including 2 registered nurses (hemodialysis).
- **Offices (2)** for the clinical coordinator and nurse practitioner (renal insufficiency clinic)
- **Wheelchair Parking** area dedicated for wheelchairs and scooters brought in by the patients.
- **Treatment Cubicle (5)** that are flexible and semi-enclosed with recliner chair.
- **Hand Hygiene Sink (2)** one between each two to three treatment cubicles.
- **Patient Washroom** that is wheelchair accessible.
- **Treatment/Procedure Area** that includes a flexible private treatment room that is stretcher accessible with a patient washroom. This room can be used as a negative pressure exam/treatment room. Also includes a contiguous PPE prep alcove with a hand hygiene sink, personal protection and equipment organizer and container for soiled materials.
- **Nourishment Alcove** for the storage and preparation of patient snacks. Includes a sink, counter for coffeemaker and under counter refrigerator.
- **Mobile Equipment Alcove** for the holding of supply cart, wheelchair or stretcher.
- **Water Treatment Room** sized to provide treated water to future dialysis station in ICU.
- **Wheelchair Scale Alcove**

In addition, the following spaces will be shelled in for future expansion capability of the renal program:

- **Workstation** that is shared touchdown space for nursing staff and other providers.

-
- **Treatment Cubicle (5)** that are flexible and semi-enclosed with recliner chair.
 - **Hand Hygiene Sink (2)** one between each two to three treatment cubicles.
 - **Patient Washroom** that is wheelchair accessible.
 - **Isolation Treatment Room** with a contiguous PPE alcove and washroom. Can also be used as a negative pressure exam/treatment room and must be stretcher accessible.
 - **Mobile Equipment Alcove** for the holding of supply cart, wheelchair or stretcher.

3.7 Shared Support Space

This area is shared by the Medical Day Care and Renal Care Program and includes the following spaces:

- **Medication Room** for the preparation and storage of medications and includes a small Pyxis machine.
- **Clean Utility Room** for the storage of clean and sterile supplies.
- **Soiled Utility Room** for the temporary storage of supplies and equipment that will be removed for cleaning, reprocessing, or disposal.
- **Housekeeping Closet** to store a housekeeping cart and back-up supplies and for mop cleaning.
- **Equipment Storage Room** for the storage and staging of mobile equipment used in the clinics.
- **Staff Room** with a kitchenette, dining table, and seating for six persons.
- **Staff washroom** that is wheelchair accessible.

Facility Layout and Design Considerations

Key facility layout and design considerations pertaining to the configuration of the Ambulatory Care Centre at STH are listed below:

- Convenient access should be provided between the main hospital entrance and Customer Service Centre, the public elevators, and the ambulatory care check-in area.
- With the use of electronic, hand-held pagers, visitors would not need to stay in the Ambulatory Care Centre, and should be encouraged to utilize other common areas (cafeteria and other amenities).
- The shared clinical support spaces should be directly adjacent to those service areas sharing the space (MDCU and Renal).
- A combination of treatment cubicles and enclosed rooms in the MDCU will allow immune-suppressed chemotherapy patients to be separated from other IV therapy/OPAT patients if necessary.
- While single patient rooms will allow most treatments and consults to be performed on the inpatient units, when inpatients must be transferred to the ACC, convenient access should be provided. Inpatients will be transported via wheelchair or stretcher from the inpatient unit to the inpatient holding alcove in the Procedures Suite from which they will be moved to their designated treatment area. Upon completion of treatment, they will again wait in the inpatient holding alcove until they are moved back to their unit.
- Neither MDC or Renal patients shall pass through one area to get into the other.

-
- Access to natural daylight is required for both Renal and Medical Daycare.

Summary of Space Requirements

Summary of Future Space Needs

The schedule of accommodation for the renewed Ambulatory Care Centre is included in the Appendix. Corresponding room data sheets are provided under separate cover in the *Functional Program for the Stanton Territorial Hospital Renewal Project — Room Data Sheets*. Additional information on individual room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets.

A total of 1,826.1 component gross square meters (CGSM) will be required for the Ambulatory Care Centre by 2045 based on the net square meters (NSM) tabulated in the Schedule of Accommodation and using the following net to gross space conversion factors.

It should be noted that the actual component gross square meters or “footprint” of the Ambulatory Care Centre will depend on the limitations of the existing building envelope and column/bay spacing, building expansion potential, and the efficiency of the architectural design.

Table 19 – Summary of Future Space Requirements for Ambulatory Care Centre (2045)

Facility Component	CNSM	Conversion Factor	CGSM
3.1 Ambulatory Check-In Area	109.6	1.46	146.9
3.2 Exam/Treatment Spaces	345.7	1.46	504.7
3.3 Collaborative Work Spaces	356.8	1.46	520.9
3.4 Shared Clinic Support Spaces	108.7	1.50	163.1
3.5 Medical Day Care Unit	123.4	1.50	185.1
3.6 Renal Care Unit (including shelled space)	227.6	1.46	332.3
3.7 Shared Support Space	68.1	1.46	99.4
Total	1,339.9	1.47	1,952.4

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
3.00	Ambulatory Care Centre					
3.01	AMBULATORY CARE CHECK-IN CENTRE					
3.01.01	CSS-3	Reception: Check-in/Registration Desk	1	9	9	Immediately adjacent to elevator lobby; open reception desk with 2 staff workstations with view of family/visitor lounge.

Future Flexibility

The functional program and schedule of accommodation of the Ambulatory Care Centre were prepared to optimize future flexibility and adaptability. In particular, the design of two flexible exam/treatment pods will allow the space to accommodate various operational configurations day-to-day as well as changes in medical practice, staffing patterns, technology, and linkages to other healthcare providers through 2045 with minimal renovation. The shelled renal space will allow for flexibility for changes in the delivery of medical service in future years.

Each exam/treatment room, consult room, physician office and other provider workspaces will have computer workstations to accommodate electronic health record documentation and physician order entry.

4.0 Surgery and Special Procedures

Overview of Program Renewal for Surgery and Special Procedures

In addition to the procedures performed in the surgery suite, special procedures at Stanton Territorial Hospital (STH) include gastrointestinal (GI) endoscopies, cystoscopies, coloscopies and other gynecological procedures, therapeutic abortions (Northern Options for Women program), and other minor procedures.

As part of program renewal, a Day Procedure Unit will be developed to provide efficient and coordinated pre-procedure preparation and post-procedure recovery for admit day of surgery (ADS), surgical day care (SDC), and other patients undergoing special procedures. The new Day Procedure Unit will be integrated with the existing surgery suite.

Surgical Services: Functional Planning Assumptions

Current Situation

The surgery suite — including the operating rooms (ORs) and associated support space, the post-anesthesia recovery room (PARR), and the OR booking office — occupies a total of 489 component gross square metres (CGSM) on the north side of second floor. Although there are currently three ORs, only two ORs are staffed each day. There are also five PARR stretcher bays although only three are functional due to the unusual configuration of the room. The surgery suite was originally designed with an adjacent procedure room for Cesarean sections directly outside the sterile core and connected to the inpatient obstetrical unit. This room is currently used for storage.

A separate admit day of surgery and surgical day care area (ADS/SDC) occupies the equivalent of four inpatient rooms on the west side of the second floor between the surgery suite and the inpatient surgery unit. Ten minimally-sized stretcher cubicles, two patient washrooms, and a small nurse charting station are accommodated in 131 CGSM. This area is used for pre-surgical care for patients who are admitted the day of surgery and for pre- and post-surgical care for surgical day care patients (who will be discharged from the hospital the same day). The pre-admission clinic is also conducted from this space along with anesthetist interviewing. Approximately 30% of the current total ADS/SDC patients are admitted and, therefore, are transferred directly to the inpatient surgical unit from the PARR.

Planned Scope of Services

Stanton Territorial Hospital will continue to be the primary referral centre for surgery for the Northwest Territories and the Kitikmeot Region of Nunavut although surgical procedures requiring specialized expertise and equipment will be referred to specialty centres outside the Northwest Territories. The surgery suite will provide care to patients of all ages undergoing surgical or interventional procedures requiring a sterile environment and/or the support of an anesthetist. While the majority of procedures will be performed under general anesthetic, some of the procedures will be performed with spinal or epidural anesthesia, or nerve blocks, and the majority of cases will continue to be surgical day care.

The types of surgery performed in the surgery suite include general surgery, orthopedic surgery, ophthalmology, otolaryngology, urology, gynecology, and dental surgery as well as Caesarian Sections. Cystoscopies and pain procedures — currently performed in operating rooms — will be moved into a procedure room setting; therapeutic abortions will also be performed in a procedure room. Cataract procedures could be accommodated in a procedure room as well.

It is assumed that the pre-admission clinic will move to the new consolidated Ambulatory Care Centre and that the operating room booking clerks will be co-located with other booking clerks elsewhere in the hospital.

The post-anesthesia recovery room (PARR) is staffed by nurses who are responsible for monitoring vital signs; managing the surgical site, post-operative pain, and related symptoms; and providing more intensive care as required. Patients will be discharged from the PARR on order of the anesthetist.

The existing ADS/SDC function will be integrated with the Day Procedure Unit to provide a central patient intake, prep, and recovery area for surgery, procedural, and endoscopy services — including pre-surgical care to adults who are admitted the day of surgery and pre and post-surgical care to outpatients. Pediatric surgery patients will continue to be received, prepped, and recovered on the inpatient Pediatric Unit.

As part of program renewal, case carts will be used to deliver clean supplies and instruments to the surgery suite (and to remove soiled materials/instruments). The case carts will be transported to/from the surgery suite via a hospital elevator (off hours).

Hours of Operation

The operating rooms and post-anesthesia recovery area will continue to be staffed from 0730 to 1530 hours, Monday to Friday, with call-back after hours and on weekends. Planned closures for two weeks at Christmas, two weeks in March, and two weeks in August may continue in the future.

Projected Staffing

The projected staffing (headcount) for the surgery suite is shown in the table below.

Table 20 – Projected Staffing (Headcount) for the Surgery Suite

Position	Headcount by Shift		
	Day	Evening	Night
Anesthetist	3	---	---
Clinical Coordinator	1	---	---
Registered Nurse (First Assist)	3	---	---
Registered Nurse (Operating Room — Circulating)	3	---	---
Registered Nurse (Operating Room — Scrub)	3	---	---
Registered Nurse (Float)	1	---	---
Registered Nurse (PARR)	3	---	---
Anesthetic Aide	1	---	---
Operating Room Supply Coordinator	1	---	---
Total (Surgery Suite-Based Staff)	19	---	---

Projected Workload and Key Treatment Spaces

The table below compares the current three-year average surgery cases with the projected cases through 2045.

Table 21 – Projected Surgery Cases

Current	Projected
---------	-----------

Surgery/ Special Procedures	Average 2007-2010	2020	2025	2030	2045
Surgery Cases (Elective)	1,759	1,890	1,935	1,968	2,142
Surgery Cases (Urgent)	306	328	336	342	372
Total	2,065	2,218	2,271	2,310	2,514

Although there are currently three operating rooms at STH, only two are staffed regularly. By 2045, there will be an average of nine to ten surgical cases per day (assuming 46 weeks per year allowing for planned closures) which can be comfortably accommodated with three ORs. The current ORs have approximately 35.5 net square metres (NSM) of useable space which is less than the minimum recommended in CSA Z8000.

Special Procedures: Functional Planning Assumptions

Current Situation

Special procedures are currently provided in the following distinct area within the hospital:

- **Medical day care unit** is located on the east side of the third floor within the inpatient medical unit — endoscopies are performed in a procedure room that is undersized and lacks negative pressurization; minimally-sized stretcher bays for prep and recovery are shared with other medical day care patients.
- **Stanton Medical Clinic** is located on the first floor near the main hospital entrance — two procedure rooms are used for colposcopies, loop electrosurgical excision procedures (LEEPs), and minor surgery (lumps and bumps).
- **Surgery suite** — cystoscopies are performed in an operating room in the surgery suite.
- **Procedure room** next to the ADS/SDS unit — therapeutic abortions are performed in this former patient room as part of the Northern Options for Women program (NOW).

Planned Scope of Services

Endoscopies and other special procedures — including cystoscopies, colposcopies, LEEP, and therapeutic abortions — will be combined with the existing ADS/SDC functions into a new Day Procedure Unit (DPU). This will provide a central patient intake, prep, and recovery area for outpatients undergoing a surgical or special procedure as well as patients being admitted the day of surgery.

After the appropriate pre-surgery preparation, surgery patients will be transported to an operating room in the surgery suite and recover in the PARR (if general anesthesia is administered). They will then be transported back to the DPU for further recovery and to receive discharge instructions.

Endoscopies and other special procedures will be performed within the DPU along with the pre-procedure preparation and post-procedure recovery.

The daily workload for endoscopy will be divided into approximately one-third gastroscopies and two-thirds colonoscopies with procedures staggered to allow for equipment reprocessing and turnaround. Cystoscopies will be scheduled according to the visiting urologist's schedule (approximately once per month) and the

number of procedures performed in a day will depend in part on the ability to reprocess cystoscopies.

Hours of Operation

The Day Procedure Unit will be staffed from 0730 to 1550 hours, Monday through Friday, with the first case beginning at 0745 and a 30-minute break for lunch. Given the projected volume, cystoscopies will be performed on selected days per month. There will be no after-hours coverage for scope cleaning; scopes will be soaked and reprocessed the next day.

Projected Staffing

A multidisciplinary team will work in the Day Procedure Unit including permanent and visiting specialists, nurses, a unit clerk, scope processing tech, and students. The projected staffing (headcount) for the DPU is shown in the table below.

Table 22 – Projected Staffing (Headcount) for the Day Procedure Unit

Position	Headcount by Shift		
	Day	Evening	Night
Registered Nurse (Conscious Sedation)	1	-	-
Registered Nurse (GI Endoscopy)	1	-	-
Registered Nurse (Special Procedures)	1	-	-
Registered Nurse (Prep/Recovery)	3	3	-
Clinical Coordinator	1	-	-
Unit Clerk	1	-	-
Technician (Scope Reprocessing)	1	-	-
Total (Day Procedure Unit-Based Staff)	9	3	-

Projected Workload and Key Treatment Spaces

The table below compares the current three-year average workload that will occur in the new Day Procedure Unit with the projected workload through 2045.

Table 23 – Projected Day Procedure Unit Workload

Prep/Recovery/ Procedures	Current	Projected			
	Average 2007-2010	2020	2025	2030	2045

Admit Day of Surgery (ADS)	537	577	591	601	654
Surgical Day Care (SDC)	1,222	1,313	1,344	1,367	1,488
Subtotal (Prep/Recovery)	1,759	1,890	1,935	1,968	2,142
GI Endoscopies	1,730	1,856	1,900	1,932	2,104
Cystoscopies	299	341	349	355	386
Subtotal	2,029	2,197	2,249	2,287	2,490
Colposcopy	302	331	340	348	376
LEEP	23	25	26	26	28
Therapeutic Abortions	291	312	320	327	354
Subtotal	616	668	686	701	758
Total	4,404	4,755	4,870	4,956	5,390

By 2045, there will be an average of 22 patients per day in the DPU — three ADS patients (prep only), six SDC patients (prep/recovery), 10 GI endoscopy patients, and three patients undergoing other special procedures. Assuming that each prep/recovery bay is turned over at least twice during the day, a total of 10 stretcher bays should be sufficient.

Proposed Facility Reconfiguration and Key Spaces

Facility Reconfiguration Concept

The Day Procedure Unit will be located on the contiguous with the Surgery Suite to provide convenient access to the operating rooms for ADS/SDS patients. Pediatrics surgery patients will be prepped and recovered on the inpatient Pediatric Unit while other procedures on children will be performed in the multi-purpose procedure room within the Day Procedure Unit.

Patient Access and Circulation

Unless pre-admission is required, all patients will arrive the day of their procedure and check-in at the Customer Service Centre. They will then be directed (or escorted) to the Day Procedure Unit. Patients will be received by a nurse who will take them to a prep/recovery stretcher cubicle. At this point, the patient will change into a gown and the nurse will conduct a pre-procedure assessment. ADS/SDC patients will be interviewed by an anesthetist as well. Pre-surgical or pre-procedure preparation will be provided as appropriate.

ADS patients will be transported to an operating room (with their belongings sent to the inpatient surgical unit) and then moved to an inpatient bed after they are discharged from the post-anesthesia recovery room. Patients on stretchers will not be transported through the public corridors.

Outpatients undergoing surgery, endoscopy, or other special procedures will be transported to the appropriate procedure room — an operating room, endoscopy room, or multi-purpose procedure room — and brought back to the stretcher cubicle in the DPU after their procedure. Once their pain and symptoms have been managed and discharge instructions given, the patients will be discharged from the DPU and

escorted to the hospital main entrance (or Customer Service Centre if required) by a family member or support person. SDC patients will receive a follow-up phone call from a nurse within 24 hours of their discharge.

Family members and/or support persons accompanying outpatients undergoing surgery or special procedures will be directed to wait in the family/visitor lounge. If the patient has already been admitted, family members/support persons may wait in the patient's bedroom on the Surgery Unit.

Major Facility Components

As shown in the functional diagram on the following page, surgery and special procedures at STH will include the Surgery Suite and the Day Procedure Unit (with the scope processing suite) as follows:

4.1 Surgery Suite

Key priorities for renewal of the surgery suite — to accommodate program changes and the projected 2045 workload — include expansion/reconfiguration of the operating rooms and post-anesthesia recovery area (Stage I), enhancement of anesthesia and other staff support space, and the addition of a case cart staging area and a frozen section laboratory. The renewed surgery suite will require the following spaces:

- **Surgical Procedure Suite** consisting of 2 surgical procedure rooms that are sized and configured to comply with CSA Z8000 requirements with four-sided access and space for optional fixed imaging and control alcove. Also included is a surgical operating room (hybrid) per CSA Z8000 for hybrid operation/imaging procedure room, with contiguous control room and computer room. A sterile core is also a part of this suite, and requires 7.5 to 9.2 NSM per surgical procedure room exclusive of circulation. 3 scrub stations with a pair of two scrubs sink in each are located per operating/procedure room.
- **Clean Utility Room** for the storage of clean and sterile supplies.
- **Soiled Utility Room** for the temporary storage of supplies and equipment that will be removed for cleaning, reprocessing, or destruction.
- **Case Cart Support** that includes a clean case cart holding area for the staging of nine clean case carts, and a soiled case cart holding area for the temporary removal of nine soiled case carts until removal from surgery.
- **Anesthesia Support** with an equipment alcove to accommodate spare anesthesia machines, and an anesthesia office designed per CSA Z8000 that is accessible from the hallway within the surgery/day procedure zone.
- **Frozen Section Laboratory** that provides intra-operative analysis of surgical specimens by visiting pathologist and requiring telemedicine technology.
- **Equipment Storage Room** designed per CSA Z8000 for the storage of portable X-ray equipment, stretchers, warming devices, pumps, etc.
- **Pneumatic Tube**
- **Mobile Equipment Room** with electrical support for mobile equipment.
- **Housekeeping Closet** to store the housekeeping cart. Includes a floor-level and shelving for supplies.
- **Surgery Communication Centre** with two shared provider workstations, a dedicated workstation for the operating room supply coordinator, a private office for the clinical coordinator, an alcove for office equipment and a hand hygiene sink.

- **Patient Holding/Staging Cubicle** for the staging/holding of patients on stretchers arriving from an inpatient unit.
- **Post Anesthesia Recovery (Stage 1)** consisting of 4 stretcher cubicles with curtain enclosure, 1 stretcher cubicle with an airborne isolation and anteroom, a soiled holding alcove for the storage of a soiled linen cart and waste bins, a clean supply/medication alcove for medication storage and preparation/storage of clean supplies and 3 hand hygiene sinks shared between each three to four stretcher cubicles. Also included are 2 provider charting workstations for providers working in the preparation/recovery area, and a patient washroom.
- **Male Staff Lockers/Changing Area** with an entry vestibule, a coat rack/boot storage, a staff washroom, a staff washroom with shower stall, a hand hygiene sink in addition to the staff washrooms and 10 full width lockers.
- **Female Staff Lockers/Changing area** with an entry vestibule, a coat rack/boot storage, a staff washroom, a staff washroom with a shower stall, a hand hygiene sink in addition to the staff washrooms and 20 full width lockers.
- **Staff Lounge** to be located contiguous with the staff lockers/changing rooms. The existing room size and configuration will be maintained.

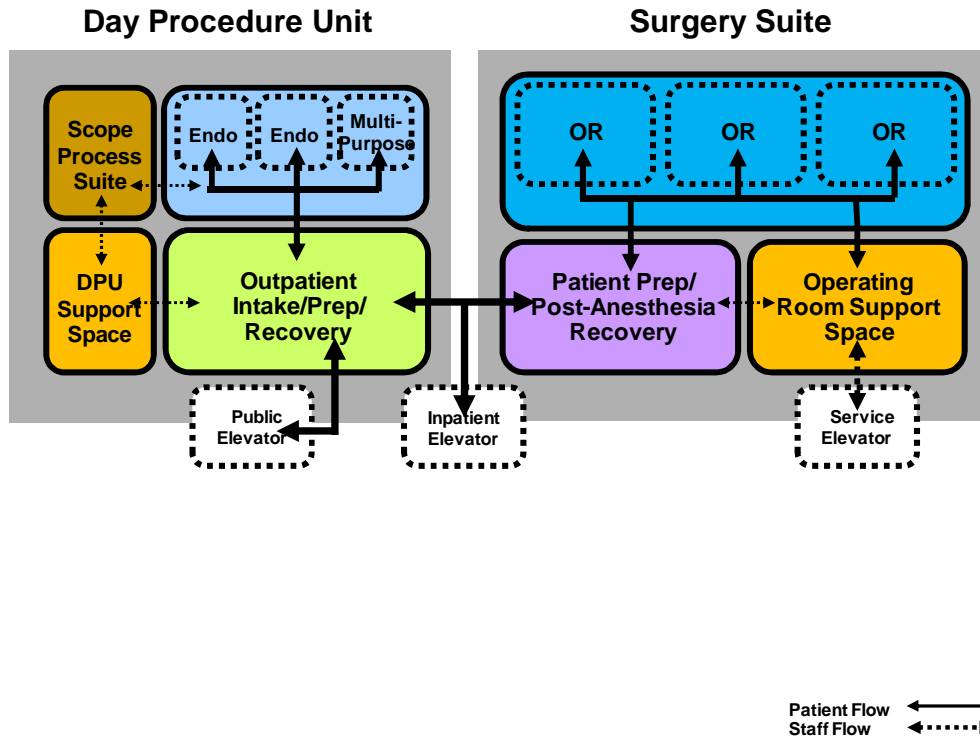

4.2 Day Procedure Unit.

This distinct area will be adjacent to the Surgery Suite and will include a reception/staff work area, patient sub-waiting alcove, a patient intake alcove, three procedure rooms, the patient prep/recovery area, and associated support space as follows:

- **Reception/Staff Work Area** consisting of a family/visitor lounge to primarily support the Day Procedure unit and Surgery family waiting area and also used for outpatient sub waiting area. Seating for up to 20 people with two wheelchair/bariatric seats and within view of the reception/staff work area. A clinical workstation is included that also function as reception and requires direct view into the waiting area. Also included are 3 provider charting workstations for providers working in DPU, a semi-enclosed physician dictation cubicle, a private office for the clinical coordinator, an office equipment alcove and a hand hygiene sink.
- **Pneumatic Tube**
- **Outpatient Sub-Waiting Area** with seating for six persons and a coat rack/alcove directly adjacent to the reception/staff work area.
- **Patient Intake Alcove** to accommodate an initial assessment of height/weight, vital signs, injections, etc. with a hand hygiene sink.
- **Procedure Room (2)** for GI endoscopies with four-sided access and connecting both procedure rooms with door access.
- **Scope Storage Room** that is accessible from both endoscopy rooms and a pass through cabinet opening onto internal circulation. The scope reprocessing suite has been relocated within medical device reprocessing.
- **Procedure Room (Multipurpose)** for cystoscopies and other adult and pediatric procedures. Includes four-sided access and will accommodate the NOW procedures.
- **NOW Waiting Area**
- **3 Bay Recovery Area** that is equipped with chairs and a minimum of 7' wide. Used for NOW patients and for other patients who do not require access to a stretcher (e.g. cystoscopies and cataract surgeries).

-
- **Office Workstation** to accommodate the NOW program.
 - **Patient Washroom (2)** where one is contiguous with the multipurpose procedure room and the other is adjacent to the two GI endoscopy procedure rooms. Both washrooms are wheelchair accessible.
 - **Mobile Equipment Alcove** for the storage of a stretcher or mobile equipment and includes electrical support.
 - **Patient Intake/Prep/Recovery Area (Stage 2)** consisting of 12 stretcher cubicles with curtain enclosure that are semi-enclosed to provide acoustical separation between cubicles, a stretcher room with a negative pressure stretcher bay and ensuite washroom, 2 patient washrooms that are wheelchair accessible and 3 hand hygiene sinks shared between each three to four stretcher cubicles. The 3 stretchers for the NOW program will not be separated. This area also includes 2 staff charting workstations for providers working in the prep/recovery area and a nourishment alcove to serve snacks to patients waiting to be discharged.
 - **Clean Utility Room** for the storage of clean and sterile supplies.
 - **Soiled Utility Room** for the temporary storage of supplies and equipment that will be removed for cleaning, reprocessing, or destruction.
 - **Medication Room** for the preparation and storage of medications with a dedicated Pyxis machine for the DPU.
 - **Equipment Storage Room** for the staging of mobile equipment. Could be located elsewhere on the floor or combined with another functional component.
 - **Housekeeping Closet** to store the housekeeping cart. Includes a floor level sink and shelving for supplies.
 - **Staff Room** with a kitchenette, dining table, and four to six chairs.
 - **Staff Locker Alcove** with 20 stacked purse/tote bag lockers for staff that do not have dedicated workstations.
 - **Staff Washroom** that is wheelchair accessible.

**Diagram 4 – Surgery and Special Procedures
Major Facility Components and Functional Adjacencies**

Facility Layout and Design Considerations

Key facility layout and design considerations pertaining to the configuration of surgery and special procedures are listed below:

- The entrance to the Day Procedure Unit should be easily recognizable.
- An internal corridor should be provided to transport the admit day of surgery and surgical day care patients on stretchers between the Day Procedure Unit and the surgery suite.
- Family members and/or support persons accompanying outpatients undergoing surgery or special procedures will be directed to wait in the family/visitor lounge. The use of hand-held beepers to alert family members or support persons when the patient's procedure has been completed should be considered to encourage those waiting to also go to the cafeteria, chapel/meditation room, or Tuck Shop. If the patient has already been admitted, family members/support persons may wait in the patient's bedroom on the Surgery Unit.
- Direct access, segregated from public circulation, between the Surgery Suite and the Obstetrics Inpatient Unit is required to facilitate stretcher access for emergency C-sections.

Specific comments relative to the internal configuration of spaces within the Day Procedure Unit include:

- Outpatients in the sub-waiting area should not be able to see into any of the procedure rooms or patient washrooms.
- The scope processing suite should be adjacent to the procedure rooms to minimize travel throughout the unit with scopes.

Specific comments relative to the internal configuration of spaces within the surgery suite include:

- Operating room staff must enter the lockers/changing areas from a public corridor and proceed into the staff lounge and sub-sterile core after they have gowned.
- The post-anesthesia recovery area (Stage I) should be conveniently located to provide direct access to/from the operating rooms — via the sub-sterile core — as well as convenient access to/from the Day Procedure Unit patient intake/prep/recovery area (Stage II) without travel through a public corridor.
- In a situation where the MDR is located above or below the Surgical Suite, case carts will be used to deliver clean supplies and instruments to the surgery suite (and to remove soiled materials/instruments). The case carts will be transported to/from the surgery suite via dedicated Clean (sterile) and Dirty (soiled) lifts. The Clean lift will go from the Sterile Stores area of MDR to the Sterile Core in the Surgical Suite. The Soiled lift will go from the Soiled Case Cart Holding Room in the Surgical Suite to the Work Area on the dirty side of the MDR. If the MDR and the Surgical Suite are located on the same floor, the same principles will apply. There must be a dedicated direct connection from the Sterile Stores area of MDR into the Sterile Core in the Surgical Suite, and another from the Soiled Case Cart Holding Room in the Surgical Suite into to the Work Area on the dirty side of the MDR.
- The MDR and Surgical suite shall be serviced by a dedicated corridor or dedicated Surgical Processing Elevators described in Schedule 3. If the components are located as per the indicative design they are to be served with dumbwaiters as per Schedule 3.

Summary of Space Requirements

Summary of Future Space Requirements

The schedule of accommodation for the renewed Surgery and Special Procedures areas is included on the following pages. Additional information on individual room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets.

Table 24 – Summary of Future Space Requirements for Surgery and Special Procedures (2045)

Facility Component	CNSM	Conversion Factor	CGSM
4.1 Surgery Suite	480.6	1.60	769.0
4.2 Day Procedure Unit	427.8	1.55	663.1
Total	908.4	1.58	1,432.1

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
4.00	Surgery and Special Procedures					
4.01	SURGERY SUITE					
4.01.01	PRC-3	Surgical Procedure Room	2	38	76	Per CSA Z8000 for four-sided access procedure room; includes space for optional fixed imaging and control alcove. Standard Surgical Procedure Rooms shall be of the same size and same-handed orientation. Provide Lift.
4.01.02	PRC-4	Surgical Operating Room (Hybrid)	1	70	70	Per CSA Z8000 for hybrid operation/imaging procedure room. Provide Lift.
4.01.03	---	Control Room	1	14	14	Contiguous with hybrid operating room.
4.01.04	---	Computer Room	1	10	10	Contiguous with hybrid operating room.
4.01.05	ORS-10	Sterile Core	1	27.9	27.9	Requires 7.5 to 9.2 NSM per surgical procedure room exclusive of circulation.
4.01.06	ORS-9	Scrub Station (2 sinks)	3	1.6	4.8	Pair of two scrub sinks per operating/procedure room.
4.01.07	CLU-1	Clean Utility Room	1	11	11	Storage of clean and sterile supplies.
4.01.08	SLU-1	Soiled Utility Room	1	12	12	Temporary storage of supplies and equipment to be removed for cleaning, reprocessing or disposal.
4.01.09	ORS-1	Clean Case Cart Holding	1	10.8	10.8	Staging of nine clean case carts.
4.01.10	ORS-2	Soiled Case Cart Holding	1	10.8	10.8	Temporary removal of nine soiled case carts until removal from surgery.
4.01.11	MEA-2	Anesthesia Support Equipment Alcove	1	2	2	To accommodate spare anesthesia machine.
4.01.12	ORS-4	Anesthesia Office	1	9.3	9.3	Per CSAZ8000. Should be accessible from hallway within surgery/day procedure zone.
4.01.13	ORS-5	Frozen Section Laboratory	1	7.4	7.4	To provide intra-operative analysis of surgical specimens by visiting pathologist: required telemedicine technology. Requires access from both the sub sterile corridor and general staff circulation.

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
4.01.14	STO-1	Equipment Storage Room	1	14	14	Per CSA Z8000: storage of portable X-ray equipment, stretchers, warming devices, pumps etc.
4.01.15	PNT-1	Pneumatic Tube	1	2	2	
4.01.16	MEA-2	Mobile Equipment Room	1	4.6	4.6	For mobile equipment with electrical support.
4.01.17	HSK-1	Housekeeping Closet	1	7	7	Housekeeping cart, floor-level sink, shelving for supplies.
4.01.18	WKS-1	Surgery Communication Centre: Provider Charting Workstation	2	3.7	7.4	Touchdown stations for providers working in surgery suite.
4.01.19	WKS-2	Surgery Communication Centre: Clinical Coordinator Workstation	1	9.3	9.3	Private office for Clinical Coordinator.
4.01.20	WKS-2	Surgery Communication Centre: Operating Room Supply Coordinator	1	4.5	4.5	Dedicated workstation.
4.01.21	OEQ-1	Surgery Communication Centre: Office Equipment Alcove	1	4	4	Printer/copier/fax machine and other related equipment.
4.01.22	HHS-1	Surgery Communication Centre: Hand Hygiene Sink	1	1	1	
4.01.23	EXT-4	Patient Holding/Staging Cubicle	1	7.5	7.5	Staging/holding of patients on stretchers arriving from an inpatient unit.
4.01.24	WKS-1	Post Anesthesia Recovery (Stage 1): Provider Charting Workstation	2	3.7	7.4	Touchdown stations for providers working in the prep/recovery area.
4.01.25	HHS-1	Post Anesthesia Recovery (Stage 1): Hand Hygiene Sink	3	1	3	One shared between each three to four stretcher cubicles.

Future Flexibility

The functional program and schedule of accommodation for Surgery and Special Procedures were prepared to optimize future flexibility and adaptability to accommodate changes in medical practice, staffing patterns, technology, and linkages to other healthcare providers through 2045. In particular, the aggregation of procedure rooms with the surgical operating rooms — will provide optimal future flexibility to accommodate new procedures and equipment.

5.0 Outpatient Rehabilitation Centre

Overview of Program Renewal for Outpatient Rehabilitation

Clinical services that will be located outside the hospital include the outpatient rehabilitation and the Stanton Eye Clinic. Currently located in downtown Yellowknife, the Stanton Eye Clinic is not addressed in this report (outside the scope of the functional planning study).

Outpatient Rehabilitation Centre: Functional Planning Assumptions

Current Situation

Outpatient rehabilitation includes physiotherapy, occupational therapy, speech language pathology, and audiology. Outpatient physiotherapy and occupational therapy are provided in the east wing of the first floor at STH. Speech language pathology and audiology are provided from the Stanton Medical Centre located less than a kilometer from the hospital.

Planned Scope of Services

It is assumed that all outpatient rehabilitation services — including physiotherapy, occupational therapy, speech language pathology, and audiology — will be consolidated into an Outpatient Rehabilitation Centre located outside of the hospital. Specific services will include:

Physiotherapy. Physiotherapists will provide direct care (assessment, diagnosis, treatment), monitor the delivery of treatment delegated to clients, family, or other health providers, and act as an educational resource to family and other healthcare professionals. The physiotherapists work with patients of all ages with a wide range of acute and chronic problems involving the musculoskeletal, neurological, pulmonary, and cardiovascular systems. Community outreach will also be provided.

Occupational therapy. Occupational therapists will provide diagnostic, intervention, treatment, preventative, educational, counseling and referral services to patients whose health and/or function is affected by developmental, cognitive, physical, and mental health challenges. Outpatient services include adult and pediatric therapy and community outreach.

Speech language pathology (SLP). Services will include the assessment and intervention for adults with neurological, cardiovascular, and psychiatric disabilities including dementia. As part of the school program, the therapists assist students to overcome and prevent communications problems in speech, language, voice, fluency, and feeding/ swallowing.

Audiology will provide early detection, prevention and rehabilitation of hearing loss as well as assessment of balance disorders.

Hours of Operation

The Outpatient Rehabilitation Centre will operate from 0800 to 1600 hours, Monday through Friday although extended hours will be considered as the workload grows.

Projected Workload

Projected utilization by modality for outpatient rehabilitation is provided in the following table:

Table 25 – Projected Outpatient Rehabilitation Workload

Attendances	Current	Projected			
	Average 2006-2010	2020	2025	2030	2045
Physiotherapy	8,840	9,475	9,702	9,868	10,740
Occupational Therapy	2,802	3,017	3,090	3,142	3,420
Speech Language Pathology	2,839	3,070	3,144	3,198	3,480
Audiology	1,193	1,270	1,301	1,323	1,440
Total	15,674	16,832	17,237	17,531	19,090

Projected Staffing

The projected staffing (headcount) for the Outpatient Rehabilitation Centre is shown in the following table.

Table 26 – Projected Staffing (Headcount) for Outpatient Rehabilitation

Position	Headcount by Shift		
	Day	Evening	Night
Child Development Team Coordinator	1	---	---
Family Liaison	1	---	---
Family Counselor	1	---	---

Subtotal (Audiology)	3	---	---
Reception/Registration Clerk	1	---	---
Total (Outpatient Rehabilitation Centre)	38	---	---

Proposed Facility Reconfiguration and Key Spaces

Facility Reconfiguration Concept

It is assumed that assessment and treatment space for physiotherapy, occupational therapy, speech language pathology, and audiology will be consolidated in a single location — the Outpatient Rehabilitation Centre — with a single patient intake area, and related staff workstations and support space. The Outpatient Rehabilitation Centre does not need to be located within the hospital and could benefit from a more easily accessible location for outpatients who may not be very ambulatory and who will have recurrent visits.

5.1 Outpatient Rehabilitation Centre

Major Facility Components

The outpatient rehabilitation centre for the STH will be located in an off-site leased space, and will include the following components:

- **Patient Reception/Staging Area** that includes a waiting area with seating for up to 20 people with two wheelchair/bariatric seats and is directly adjacent to the staff work area. This area also includes records and office storage space, an office equipment alcove, a reception/clerical workstation, a child play alcove and a patient washroom with change table.
- **Staff Work Area** for use by the physiotherapy and occupational therapy groups. Includes a 8 provider charting workstations for physiotherapists and 9 provider charting workstations for occupational therapists, 2 clerical workstations for program assistants and an office equipment alcove.
- **Offices (4)** for the outpatient rehabilitation centre manager, and three supervisors (OT, PT, SLP).
- **Consult Room** shared occupational therapists and physiotherapists.
- **Exam/Treatment Room (2)** that are private and include plinths (treatment beds).
- **Physical Therapy Treatment Cubicles (11)** where 7 of the cubicles are standard and 4 are for bariatric use.
- **Chartering Stations (2)**
- **Open Treatment Gym** consisting of an open area with plinths, parallel bars, stairs, and wall-mounted and floor-mounted exercise equipment. Includes island with double utility sink, ice machine and chartering workstation.
- **Equipment Alcove** used for modality carts; opens off gym.
- **Hand Hygiene Sink (2)** that are easily accessible from the gym and treatment cubicles.
- **Equipment Storage Room (Gym)** that is contiguous with the open treatment gym. Used to store walkers, crutches, braces, etc.

-
- **Whirlpool Room** with a portable whirlpool bath and wax bath.
 - **Occupational Therapy Activity Room** with 3 large cubicles, an upper extremity station and a work counter with utility sink. Includes room for mobile equipment.
 - **Occupational Therapy Workshop** located adjacent to the occupational therapy activity room. Includes a work counter with utility sink, a grinder, a fume hood (for work with glues and solvents) and a hazardous goods cabinet.
 - **Small Pediatric Exam/Treatment Room** that is private for use by pediatric patients.
 - **Viewing Console** that is contiguous with the viewing window into both pediatric rooms.
 - **Large Pediatric Treatment Room** that includes gross motor activity and suspension equipment.
 - **Hand Hygiene Sink (2)** that are easily accessible from the occupational therapy work areas.
 - **Patient Washrooms (2)** that are wheelchair accessible and for use by all rehab components.
 - **Equipment Storage Room (OT Pediatric)** that is contiguous with the large pediatric treatment room.
 - **Equipment Storage Room (OT Adult)** that is located near the OT activity and exam rooms with access to off-site storage in warehouse. For the storage of soft goods.
 - **Equipment Storage Room (OT Adult)** for ADL equipment and access to off-site storage in warehouse.
 - **Provider Work Area** for use by the SLP and audiology groups. Includes 7 off-stage workstations per speech language pathologist, 2 off-stage workstations per audiologist, 1 off-stage workstation for the SLP program assistant, 1 off-stage workstation for the hearing aid practitioner and an office equipment alcove.
 - **SLP/Audiology Testing Suite** that includes an audiology sound booth with 2 rooms and a mini sound booth that includes a station for the operator, a workstation for hearing aid fitting, a viewing window and a hand hygiene sink. Also includes a multi-purpose testing room with ABR (no electrical interference), VNG, a hand hygiene sink, a workstation and space for a future mini sound booth.
 - **Audiology Workshop** for hearing aid fitting. Located near the audiology testing suite and includes a hand hygiene sink.
 - **Consult/Assessment Room (4)** that are shared by the speech language pathologists, audiologists and the child development team for individual consults and team/family conferences. Includes telehealth capability.
 - **Viewing Console** that is contiguous with the viewing window into two of the consult assessment rooms.
 - **Equipment Storage Room (SLP/Audio.)** located in the SLP/Audiology zone.
 - **Staff Work Area** that includes a semi-enclosed workstation for the child development team coordinator, a semi-enclosed workstation for the fetal alcohol spectrum disorders (FASD) family liaison and a workstation shared by the family counselor, social worker and neuropsychologist.
 - **Housekeeping Closet** to store the housekeeping cart, supplies and mop cleaning.
 - **Equipment Storage Room** for travelling equipment.
 - **Clean Utility Room** for the storage of clean and sterile supplies and the capability to be subdivided. Also used for the temporary staging of supplies and equipment.
 - **Soiled Utility Room** for the temporary storage of supplies to be moved for cleaning, reprocessing or disposal.

-
- **Laundry Room** that includes a washer, dryer, utility sink, and storage shelving.
 - **Conference Room** with seating for 12 persons and telehealth capability.
 - **Staff Room** that includes a kitchenette, dining table and 6 chairs.
 - **Staff Coat & Boots (33)** area that could be broken into several areas.
 - **Staff Washrooms (2)** that are wheelchair accessible.

Summary of Space Requirements

Summary of Future Space Needs

A listing of required spaces is listed in the following table. Corresponding room data sheets are provided under separate cover in *Stanton Territorial Hospital Renewal Project – Room Data Sheets* outline additional information on individual room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets. This information is intended to supplement the FF&E list, and the relevant codes and standards.

A total of 908.4 net square metres (NSM) will be required for the Outpatient Rehabilitation Centre by 2045 based on areas tabulated in the schedule of accommodation and using a net to gross space conversion factor of 1.40. It should be noted that the actual component gross square metres or “footprint” will depend on the limitations of the planned location and whether the space will be leased or newly-constructed.

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
5.01.01	WTA-1	Patient Reception/Staging Area: Waiting Area	1	31	31	Seating for up to 20 persons with two wheelchair/bariatric seats; directly adjacent to the staff work area.

6.0 Critical Care Services

Overview of Program Renewal for Critical Care Services

Critical care services at Stanton Territorial Hospital (STH) include the Emergency Department and the Intensive Care Unit. The integration and consolidation of these services in a single location is proposed as part of program renewal — resulting in improved quality of care and optimal utilization of resources. Comprehensive critical care will focus on the level of care that an individual patient requires rather than on the specific beds and treatment spaces. Critically-ill patients may be physiologically unstable — requiring continuous, coordinated physician, nursing, and respiratory care — or at risk for physiologic decompensation and in need of constant monitoring and prompt intervention by the critical care team to prevent adverse occurrences.

Emergency Department: Functional Planning Assumptions

Current Situation

The emergency department (ED) is located on the north side of the main floor and occupies 350 component gross square metres (CGSM). There is a covered access drive for patients arriving by ambulance with an entrance leading directly to the trauma room. A separate drop-off drive with several parking spaces is provided for the walk-in entrance that leads to the triage station and waiting area and connects to the public corridor system within the hospital. In addition to the trauma room (with two treatment bays), there is a large minor treatment room (with two bays and two chairs), four exam/treatment rooms, and a stretcher bay for observation/holding. One of the exam/treatment rooms is equipped for gynecology exams, one is designed as a seclusion room, and one is designed as an isolation room. An eye room is located across the hall near the central elevator bank. Access to diagnostic imaging is via the public corridor past the ED waiting area. The triage desk, waiting area, staff workstations, and most treatment areas are undersized and inappropriately configured. There is also a heliport on the site which is no longer used.

Planned Scope of Services

The emergency department at Stanton Territorial Hospital will continue to be the territorial referral center for the Northwest Territories and the Kitikmeot Region of Nunavut. As part of the Territorial Services Network, the ED staff based at STH will provide telephone consultation and medical oversight to clinical providers in rural and remote communities and to the Medevac service. The Stanton Territorial Hospital ED is planned to accommodate Level III trauma as per the Trauma Association of Canada (TAC) accreditation guidelines, having a central role in the territories for both adult and pediatric trauma. Care will be provided for ill or injured patients requiring immediate, emergent, or urgent assessment and treatment. The special needs of children, victims of sexual assault, and individuals with mental health issues will also be accommodated. As part of the critical care service component, the ED staff will arrange for transport of critically-ill patients and participate in the hospital's Code Blue response. Several current services will be moved out of the ED to other outpatient areas — including the fracture/cast clinic, outpatient antimicrobial therapy (OPAT), and anticoagulation management.

Specific service components will include:

- **Outpatient Triage.** A nurse or physician will conduct a clinical assessment according to the Canadian Triage and Acuity Scale (CTAS) to determine the time and sequence in which patients should be seen in the ED as follows:

-
- CTAS I – immediate
 - CTAS II – within 15 minutes
 - CTAS V – within 120 minutes
 - CTAS III – within 30 minutes
 - CTAS IV – within 60 minutes

For CTAS III patients (excluding cardiac and mental health presentations), a diagnostic work-up and/or early treatment may be initiated as part of triage (rapid assessment) to assist in expediting the streaming of the patient to the appropriate treatment location or discharge.

- **Trauma/resuscitation.** CTAS Level I and selected CTAS Level II patients arriving at the ED will be moved directly to the trauma/resuscitation area. These acutely-ill or injured patients will receive full resuscitation, assessment, stabilization, and appropriate disposition (admission or transfer) on a 24-hour basis.
- **Acute treatment.** Patients designated as CTAS Level II and III — typically patients presenting to the ED with a recent injury or who have taken suddenly or seriously ill — will be directed to the acute treatment area which will provide specialized multidisciplinary assessment, provisional diagnosis, treatment planning and implementation, and appropriate disposition of emergency patients on a 24-hour basis.
- **Minor treatment.** Patients designated as CTAS IV and V will be directed to the minor treatment area. Patients undergoing specialized diagnostic imaging procedures may also be transported to this area for recovery.
- **Observation.** Patients with a provisional diagnosis and with the potential to be discharged following 12 to 24 hours of treatment and/or observation will be directed to the observation area.

Emergency consults and guidance will also be provided via telehealth to remote communities to enable highly-specialized critical care staff to monitor critical care patients at various remote locations and to provide continuous support and expertise to the clinical staff providing care to these remote patients.

Hours of Operation

The ED will continue to operate 24 hours per day, 365 days per year. Access to other areas of the hospital by family members and visitors will be restricted during evening and night-time hours and on weekends.

Projected Workload and Key Treatment Spaces

The table below compares the current ED visits by CTAS level with the projected visits through 2045. Over the five-year period from 2006 through 2010 there were an average of 5,827 annual visits that were recorded as “undefined.” For planning purposes, these visits were distributed among the five CTAS categories.

Table 27 – Projected Emergency Department Visits by CTAS Acuity Level

ED Visits	Current	Projected			
	Average 2006-2010	2020	2025	2030	2045
CTAS I	34	53	54	55	60
CTAS II	857	1,323	1,355	1,378	1,500
CTAS III	4,939	7,650	7,914	8,049	8,760
CTAS IV	6,073	9,528	9,756	9,923	10,800
CTAS V	799	1,270	1,301	1,323	1,440
Undefined	5,827	---	---	---	---
Total	18,529	19,824	20,380	20,728	22,560

By 2045, there will be an average of 62 patients per day arriving at the STH ED. However, given that arrivals to the ED are a random occurrence, it is projected that there could be up to 77 patients on a peak day — assuming a 25% increase based on a variation of the Poisson distribution formula. Of the projected peak daily patients, up to six patients (7%) may be transported immediately to the trauma/resuscitation area, 30 patients (39%) will be directed to the acute treatment area, and 41 patients (54%) will be directed to the minor treatment area. The distribution of the peak daily patients by shift is estimated as follows:

- 50% of the CTAS Level III peak daily visits will occur on the busiest eight-hour shift for the acute treatment area (typically late afternoon to late evening)
- 75% of the CTAS Level IV and V peak daily visits will occur on the busiest eight-hour shift for the minor treatment area (typically noon to early evening)

It should be noted that the estimate for projected visits are generous — most likely for the CTAS IV and V visits — since some of these will be redirected to other outpatient areas. For example, ED follow-up visits will be redirected to the outpatient clinic, antimicrobial therapy to the medical day care area, and anticoagulation management to primary care providers.

The recommended number of treatment spaces for each treatment area is summarized in the following table along with related planning assumptions.

Table 28 – Calculated ED Treatment Spaces Based on 2045 Peak Daily Workload

Type of Treatment Space	Number of Spaces	Comments
Trauma/Resuscitation Bay	2	CTAS Level I and II patients; two bays planned regardless of workload scenario.
Acute Treatment Room	4 to 5	CTAS Level III patients; assumes that 50% of the peak daily workload occurs during the busiest eight-hour shift with an average room turnover time of 150 minutes.
Minor Treatment Room/Bay	4 to 5	CTAS Level IV patients; assumes that 75% of the peak daily workload occurs during the busiest eight-hour shift with an average room turnover time of 75 minutes.
Observation Room/Bay	4 to 6	Flex space is planned to accommodate both ED observation/holding and high-dependency patients.

Projected Staffing

A multidisciplinary team of emergency room physicians, specialists, and registered nurses will provide direct patient care in the emergency department. In addition to the staff based in the ED, specialty physicians and other allied health providers will be on-call 24/7 as required. In addition to registering all ED patients, the registration clerk will register other patients during the evening and weekend hours when the Customer Service Centre is not staffed. The projected unit-based and facility-based staffing (headcount) is shown in the table on the following page.

The Territorial Support Network — which will be operated by the Territorial Services Network and based at the STH — will be staffed with a physician, an RN, and a secretary/clerk and located in close proximity to the patient care coordinator.

Table 29 – Projected Staffing (Headcount) for the Emergency Department

Position	Headcount by Shift		
	Day	Evening	Night
Emergency Room Physician	2	2	1
Clinical Coordinator (Shared with ICU)	1	-	-
Nurse Practitioner	1	-	-
Registered Nurse	4	4	3
Licensed Practical Nurse	1	1	-
Registration Clerk (ED-based)	1	1	1
Unit Clerk (Shared with the ICU)	1	1	-
Subtotal (Unit-Based Staff)	11	9	5
Respiratory Therapist	1	1	1
Clinical Pharmacist	1	1	1
Social Worker	1	1	1
Interpreter	1	1	1
Subtotal (Facility-Based Staff)	4	4	4
Total (Headcount by Shift)	15	12	9

Intensive Care Unit: Functional Planning Assumptions

Current Situation

The Intensive Care Unit (ICU) is currently located on the third floor across from the medical unit nursing station (3-West). The existing ICU currently occupies 99 component gross square metres (CGSM) or the equivalent of three inpatient bedrooms. The unit is inadequately sized to accommodate the four beds (curtained cubicles), staff, and equipment necessary to deliver care to critically-ill patients. There is also inadequate space for family members and visitors and no isolation capacity.

Planned Scope of Services

The Intensive Care Unit will provide care for patients who require advanced or prolonged respiratory support alone or basic respiratory support combined with support for at least two organ systems. The ICU will also provide care for high-dependency patients who require more intensive observation or intervention than that provided on a general inpatient unit — including post-operative care and “step-down” care. The ICU will also

provide care for children requiring critical care pending transfer to a higher level of care. As a closed unit, the ICU will be overseen and medically managed by physicians with specialized expertise and the nurses working in the unit will be certified in critical care nursing. The ICU will also be the monitoring centre for telemetry within the hospital and will provide Code Blue response. In addition, the ICU will provide oversight and outreach service to other healthcare facilities throughout the Territories.

Specific service components will include:

- **Intensive care.** Intensive care requires highly-skilled and highly-technical resources to provide 24/7 monitoring and care to critically ill patients including the capacity to resuscitate and stabilize. Nursing care will be provided on a 1:1 or 1:2 nurse to patient ratio and directed by specialists and other physicians with specialty training. Monitoring will be provided 24-7. Respiratory therapists will be critical members of the care team. Diagnostic imaging, laboratory and cardiac diagnostics must be available.
- **High-dependency care.** Patients not requiring intensive care, but requiring more care than provided on a general medical or surgical unit, and a nurse to patient ratio of 1:2 or 1:3 will be placed in this area. A high-dependency bed may also be used for the clinical observation/holding of an ED patient to determine his/her response to treatment before a decision is made to admit.

STH will not provide neonatal or pediatric intensive care, however facilities, equipment, and critical care expertise will be available to resuscitate, stabilize, and provide care for critically ill children until such time as they can be transferred to a higher level of care outside of the Territories. Neonatal high-dependency care (less than 28 days of age) will be provided in a designated area on the obstetrics unit while pediatric high-dependency care will be provided in the ICU within the critical care area on the main floor.

All patients who are on telemetry within STH — whereby they are monitored wirelessly while moving around within the transmitting range on a specific nursing unit — will be monitored within the critical care area on the main floor.

As part of the Territorial Service Network, the critical care outreach or rapid response team will also provide critical care expertise beyond the walls of the ICU. This team may be called to service anywhere in the hospital to assist in the care of a patient who becomes critically ill regardless of their location. The outreach team may also provide outreach using an “eICU” or “virtual ICU” model. This model enables highly-specialized critical care personnel at STH to monitor critical care patients at various remote locations throughout the territories and provide continuous support and expertise to clinical personnel providing care to these patients with real-time “telepresence” — including the review of clinical documentation and medical images, monitoring of vital signs, and use of digital stethoscopes and high-quality video cameras.

Hours of Operation

The Intensive Care Unit will continue to operate 24 hours per day, 365 days per year.

Projected Bed Needs

The following table summarizes the projected bed need through 2045 assuming a 65% occupancy rate. The intensive care bed projections were generally based on the total projected patients days for all clinical services (excluding newborn days). The need for two high-dependency beds to be shared with the ED for holding/clinical decision-making or observation is predicted.

Table 30 – Comparison of Current and Projected Critical Care Beds

ED Visits	Current	Projected			
	Funded Beds	2020	2025	2030	2045
Critical Care	4	3	3	3	4
High-Dependency	---	2	2	2	2
Total	4	5	5	5	6

Projected Staffing

A multidisciplinary team of specialists, nurse practitioners, registered nurses, and respiratory therapists will provide direct care in the Intensive Care Unit. Other allied health providers will be consulted as required.

The projected unit-based and facility-based staffing (headcount) for a six-bed unit with four intensive care beds and two high-dependency beds is shown on the following table:

Position	Headcount by Shift		
	Day	Evening	Night
Medical Director (Medical Internist)	1	-	-
Nurse Practitioner	1	-	-
Registered Nurse (ICU)	4	4	4
Register Nurse (ICU/High-Dependency Float)	1	1	1
Unit Clerk (Shared with the ED)	1	1	-
Subtotal (Unit-Based Staff)	8	6	5
Manager	1	-	-
Respiratory Therapist	1	1	1
Clinical Pharmacist	1	1	1
Social Worker	1	1	1
Dietician	1	-	-
Interpreter	1	1	1
Subtotal (Facility-Based Staff)	6	4	4
Total (Headcount by Shift)	14	10	9

Proposed Facility Reconfiguration and Key Spaces

Facility Reconfiguration Concept

The ED and the ICU will be operationally and physically integrated into a single critical care area on the main floor of STH. All patient care space will be designed for flexible use — particularly with the ability to flex for a lower level of care. Although a staff work area and a small amount of core support space is planned for the six-bed ICU, some spaces will be shared with the ED — such as the lab accessioning alcove, equipment

storage, and housekeeping room. Staff support space will also be shared between the two areas.

Patient Access and Circulation

Patients will arrive either via ambulance (on a stretcher), brought to the ED by the Royal Canadian Mounted Police (RCMP), or will be ambulatory and arrive by private vehicle. Patients arriving by ambulance will be taken directly to the acute treatment area — most likely to trauma/resuscitation room. Patients escorted by the RCMP will be taken directly to the acute treatment area. All other patients will check-in with the unit clerk at the registration desk. Patients requiring immediate attention will be referred directly to the triage nurse while all others will be directed to the general waiting area. Patients taken directly to the trauma/resuscitation room — such as CTAS I and II — will be registered by the unit clerk as soon as information is available (from their escort, from personal belongings, etc.).

Waiting patients will be taken to either the acute treatment area or to the minor treatment area based on their acuity. CTAS II and III patients will be taken to the acute treatment area while CTAS IV and V will generally be treated in the minor treatment area. Patients in either the acute treatment area or the minor treatment area may need to be transported to the diagnostic imaging suite for testing.

Patients with mental health issues will be processed as other ED patients; if they are exhibiting aggressive behavior, they will be taken to the seclusion/secure patient room in the acute treatment area and the quick response team from the inpatient psychiatric unit will be consulted.

Patients will be referred to the Intensive Care Unit from the ED, an inpatient unit, a specialist clinic, or an outlying healthcare facility. The Medical Director will make the decision as to who is transferred in and out of the ICU. Patients admitted to the ICU will be registered by an admitting clerk. ICU patients may be transferred to an inpatient unit, discharged home, or transferred to another healthcare facility.

ED patients with a medical or surgical provisional diagnosis and with the potential for discharge following 12 to 24 hours of treatment and/or observation will be held in the four-bay Clinical Decision Unit (CDU) within the acute treatment area or transferred to a high-dependency bed in the ICU.

Major Facility Components

As shown in the functional diagram on the following page, critical care services at STH will include five major functional areas as follows:

- **Outpatient Triage Area**
- **Minor Treatment Area**
- **Acute Treatment Area**
- **Intensive Care Unit**
- **Shared Staff Support Space**

6.1 Outpatient Triage Area

As the first point of contact for patients presenting to the Emergency Department, the patient intake/triage area will include dedicated entrances for patients arriving on stretchers (via ambulance) and for ambulatory (walk-in patients) arriving by private vehicle. In addition to the triage/registration area, a waiting area and associated family/visitor amenities will be provided as follows:

- **Ambulance Entrance Area** for patients arriving via ambulance with weather protection and direct access to the acute care area — includes an ambulance entrance vestibule and an ambulance

garage designed per CSA Z8000. An office/staging area for the police and EMS staff is also planned adjacent to the ambulance entrance.

- **Walk-in Entrance Vestibule** to serve as the primary ED entrance for ambulatory patients and family members or visitors with direct access to the patient intake/triage area.
- **Decontamination Room** with an exterior entry door as well as an internal door into the ED corridor.
- **Mobile Equipment Alcove** for the temporary storage or staging of wheelchairs, stretchers, or other mobile equipment. Accessible from the walk-in entrance and triage workstation but out of view of the general waiting area.
- **Triage/Registration Area** with workstations for the registration clerk, triage nurse, and the security guard and/or police along with the triage assessment room, a small triage sub-waiting area, and a patient washroom.
- **General Waiting Area** with a family/visitor lounge for seating up to 20 people including space for two wheelchairs, a bariatric seat, an amenity station and coat rack. A child play alcove is contiguous with the waiting area as well as an alcove with 2 phone/communications carrel for private phone conversations and/or recharging of handheld communications devices.
- **Family Consultation/Bereavement Room** to facilitate private consultations or to provide a private space for grieving. Located adjacent to the general waiting area.
- **Public Washroom (2)** adjacent to the general waiting area with wheelchair accessibility.

6.2 Minor Treatment Area

CTAS IV and V patients will be escorted to this area when a treatment space is available. In addition to the exam/treatment spaces, a sub-waiting waiting area, reception/staff work area, and associated support space will be provided as follows:

- **Reception/Staff Work Area** with 2 provider charting workstations, a physician dictation/consult private alcove, a hand hygiene sink and an alcove for office equipment.
- **Minor Treatment Sub-Waiting Area** with seating for four persons directly adjacent to the staff work area.
- **Exam/Treatment Rooms (3)** to be used for general exams and minor treatment.
- **Psychiatric Exam/Consult Room** located close to the triage station with soft furnishings.
- **Suture/Casting Room** consisting of a flexible, multi-purpose space with two treatment bays, a suture cart, and a sink with a plaster trap but capable of being used for exams, other minor treatment, and/or patient holding. This room could also be designed to accommodate a bariatric patient with a ceiling-mounted patient lift track.
- **Patient washroom** that is located central to the exam/treatment spaces and wheelchair accessible.

6.3 Acute Treatment Area

The acute treatment area will include a trauma/resuscitation room (CTAS I and II patients primarily), general and specialty exam/treatment rooms (CTAS II patients primarily), and a seclusion/secure patient room. In addition to the exam/treatment spaces, the central communications centre (hub) for critical care services will be located in this area along with associated support space as follows:

- **Communication Centre** including 1 workstation for the unit clerk, 4 provider charting workstations, a private physician dictation alcove with a PACS workstation, a hand hygiene sink, and an alcove for office equipment.
- **Pneumatic Tube**
- **Trauma/Resuscitation Room** consisting of an enclosed AIR room with sliding doors and 2 treatment bays, shared touchdown workstations, a medication/supply storage area and ceiling lift. This room will be negative pressure capable. Provide sliding glass doors to separate the two bays.
- **Mobile Equipment Alcove** adjacent to the trauma/resuscitation room.
- **Exam/Treatment Rooms (2)** to be used for general exams/treatment. Could also be used for pediatrics and/or disruptive patients.
- **Airborne Isolation Suite** with an exam/treatment room (isolation) equipped with a ceiling lift for bariatric patients, a contiguous patient washroom/shower, and an anteroom with a hand hygiene sink, personal protection and equipment (PPE) organizer, and hamper for soiled materials.
- **Clinical Decision Unit (CDU)** with four stretcher cubicles with curtain closure for holding patients for clinical observation to determine their response to treatment before a decision is made to admit. Includes a hand hygiene sink.
- **Ob-Gyn Exam Suite** with a private exam/treatment room (with ob-gyn table) and a contiguous patient washroom.
- **Exam/Treatment Room (EENT)** with an exam chair, slit lamp and specialized equipment for eye, ear, nose, and throat exam and treatment.
- **Seclusion Suite** with seclusion/safe treatment room designed for mental health safety and risk mitigation with an observation window with one-way glass, a floor-mounted bed with restraint capabilities, and a contiguous patient washroom.
- **Patient Washrooms (2)** centrally located to the other exam/treatment spaces and CDU with wheelchair accessibility.
- **Clean Utility Room** for the storage of clean and sterile supplies and shared with the minor treatment area.
- **Soiled Utility Room** for the temporary storage of supplies and equipment that will be removed for cleaning, reprocessing, or disposal. To be shared with the minor treatment area.
- **Mobile Equipment Alcove** for the temporary storage or staging of wheelchairs, stretchers, or other mobile equipment.
- **Medication Room** for the medication preparation and the storage of medications in a large Pyxis machine, locked storage for narcotics, and in a refrigerator/freezer — to be shared with the minor treatment area and centrally located.
- **Lab Accessioning Alcove** adjacent to the medication room for the storage of specimen collection supplies and temporary holding of specimens for laboratory pick-up.
- **Equipment Storage Room** to be shared with ICU for the staging and storage of patient care equipment. Also used for testing of respiratory equipment and includes medical air, oxygen, etc.
- **Housekeeping Closet** to store the housekeeping cart and back-up supplies and for mop cleaning — to be shared with the ICU.

6.4 Intensive Care Unit

This unit will include three critical care cubicles and two high-dependency/flex patient rooms with ensuite washrooms/showers. A staff work area and associated support space will be provided as follows:

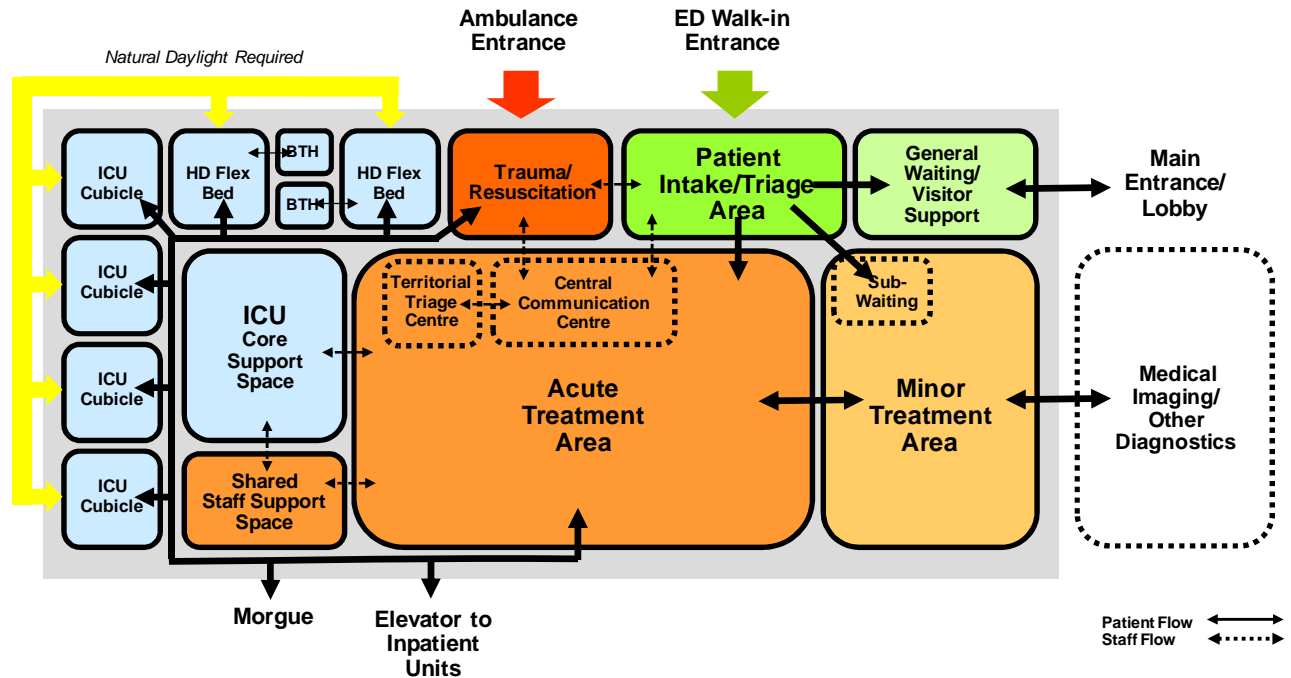

- **Staff Work Area** with three provider charting workstations, an office for the clinical coordinator, a private physician dictation/consult alcove (with PACS), hand hygiene sink, and an alcove for office equipment.
- **Pneumatic Tube**
- **Critical Care Bedroom Suite** consisting of 4 critical care cubicles that includes staff charting, a hand hygiene sink, supply alcove, ensuite washrooms and surface mounted ceiling lift accessible from either side of the bed and extending from bed to all washroom fixtures. One patient room to include rough-in for future dialysis capability.
- **High-Dependency Bedroom Suite** including 1 bedroom with surface mounted ceiling lift accessible from either side of the bed and extending from bed to all washroom fixtures and a roll-in washroom/shower.
- **Airborne Isolation Room (AIR) Bedroom** including 1 bedroom with surface mounted ceiling lift accessible from either side of the bed and extending from bed to all washroom fixtures, a vestibule with a hand hygiene sink, personal protection and equipment (PPE) organizer and hamper for soiled materials, and a washroom/shower.
- **Nourishment Alcove** for the storage and preparation of patient meals and snacks — to be shared with the ED when required.
- **Clean Utility Room** for the storage of clean and sterile supplies.
- **Soiled Utility Room** for the temporary storage of supplies and equipment until removed for cleaning, reprocessing, or destruction.
- **Staff Washroom** that is wheelchair accessible.
- **Patient Washroom/Shower** that is central to intensive care cubicles.
- **Mobile Equipment Alcove** for the temporary storage or staging of wheelchairs, stretchers, or other mobile equipment.

6.5 Shared Staff Support Space

This area will be shared between the ED and the ICU and include a staff room, staff washrooms, staff lockers/changing area, a conference room, and an office for the Clinical Coordinator as follows:

- **Office** for the manager of critical care services.
- **Office** for the clinical coordinator who oversees the day-to-day operations of the ED and ICU.
- **Conference Room** with seating for eight to ten people.
- **Staff Room** with a kitchenette, dining table, and six chairs.
- **Staff washrooms (2)**

**Diagram 5 – Critical Care Services
Major Facility Components and Functional Adjacencies**

Equipment & Technology

The operations of the critical care services will rely heavily on the use of advanced technologies all of which need an enabling wireless infrastructure to be incorporated into the renewal of STH. These include:

- Clinical information systems
- Intranet and Internet access
- Electronic health record
- Digital imaging and viewing stations

Facility Layout and Design Considerations

Key facility layout and design considerations pertaining to the configuration of critical care services at STH are listed below:

- Clear and separate traffic flows should be provided for ambulance traffic and for public traffic as they access the STH ED with appropriate signage and visual cues to prevent the public from using the ambulance entrance. A covered area with a drive-through ambulance bay should be planned to minimize congestion and potential accidents.
- The entrance to the decontamination room should be provided from the covered ambulance entry with dual access into the ambulance entrance corridor.

-
- Both the ambulance and walk-in entrances should be weather-protected and visible from the triage/reception area. Ideally, the work area for the reception clerk and the triage nurse should physically connect to the communications centre in the acute treatment area since there will be a single receptionist/unit clerk between both areas. This will also allow other ED staff to quickly assist the triage nurse in the contiguous triage assessment room, when required.
 - Ambulance traffic and patients arriving on stretchers — or being transported to other areas of the hospital on stretchers — should not be visible from the walk-in entrance or general waiting area.
 - The general waiting area should be located to provide unobstructed visibility from the triage/registration area.
 - The family consult/bereavement room should be accessible from both the general waiting area, trauma/resuscitation room and other acute treatment spaces with discreet access/egress.
 - The ICU staff work area should be centrally located to allow visualization of the four critical care cubicles and access/egress to the two high-dependency/flex patient bedrooms.
 - Convenient access to the ICU critical care cubicles and high-dependency/flex rooms should be provided from the ED acute care area.
 - The ED acute treatment and minor treatment areas should be physically connected to allow staff to circulate between the two areas.
 - The trauma/resuscitation room should be equipped with a ceiling-mounted lift to accommodate a bariatric patient.
 - One of the high-dependency patient bedrooms should be equipped to provide dialysis capability.
 - The clean and soiled utility rooms should be centrally located to the respective patient treatment spaces that they support. In particular, the soiled utility room in the ICU should be directly accessible from the four critical care cubicles to facilitate the transfer of bedpans for washing/disposal.
 - The shared staff support spaces should be easily accessible from the ED and ICU but away from the patient care areas.
 - Ideally, the Acute Treatment Area and the Minor Treatment Area should be co-located such that the clean and soiled utility rooms could be shared.
 - The ED Central Communication Centre and the Territorial Support Network should be co-located but each with separate, dedicated space.
 - Convenient but discreet access between the ED acute treatment and minor treatment areas and the diagnostic imaging suite is required so that ED patients on stretchers do not traverse other clinical areas of the ED and are not seen by the public.
 - Access from the ED walk-in entrance and general waiting area to the main hospital lobby, cafeteria, and elevators is required for family members and friends accompanying ED patients.
 - The Ambulance Garage shall be a completely enclosed, climate controlled drive-through garage.
 - The ICU shall have discrete public access that does not require travel through the Emergency Department Treatment Spaces.

Summary of Space Requirements

Summary of Future Space Requirements

The schedule of accommodation for critical care services is included in the Appendix. Corresponding room data sheets are provided under separate cover in the *Functional Program for the Stanton Territorial Hospital Renewal Project – Room Data Sheets*. Additional information on individual room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets.

A total of 1,450.6 component gross square metres (CGSM) will be required for critical care services at STH by 2045 based on the net square metres (NSM) tabulated in the **the Schedule of Accommodation** and using the following estimated net to gross space conversion factors. It should be noted that the actual component gross square metres or “footprint” of the critical care services will depend on the limitations of the existing building envelope and column/bay spacing, building expansion potential, and the efficiency of the architectural design.

Diagram 6 – Summary of Future Space Requirements for Critical Care Services (2045)

Facility Component	CNSM	Conversion Factor	CGSM
6.1 Patient Intake/Triage Area	215.8	1.60	345.3
6.2 Minor Treatment Area	88.2	1.60	141.1
6.3 Acute Treatment Area	297.4	1.60	475.8
6.4 Intensive Care Unit	260.1	1.55	403.2
6.5 Shared Staff Support Space	54.8	1.55	84.9
Total	916.3	1.59	1,450.4

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
6.00	Critical Care Services					
6.01	OUTPATIENT TRIAGE AREA					
6.01.01	---	Ambulance Entrance Area: Ambulance Garage	1	80	80	Sized to accommodate a minimum of two ambulances, with minimum area as per CSA Z8000. To be a completely enclosed, heated, drive-through garage, with services and drainage to allow washdown (including adequate hose-bib connections), and planned to accommodate mass-triage.
6.01.02	EMG-1	Ambulance Entrance Area: Ambulance Entrance Vestibule	1	11	11	Entrance for patients on stretchers arriving by ambulance with access to the triage area.
6.01.03	OFF-1	Ambulance Entrance Area: Office/Staging Area	1	9.3	9.3	For use by police and EMS staff; adjacent to ambulance entrance. Includes firearm storage
6.01.04	EMG-2	Walk-In Entrance Vestibule	1	7	7	Main ED entrance for patients/visitors who are ambulatory.
6.01.05	EMG-3	Decontamination Room	1	10	10	Enclosed room exhausted to exterior - Serviced w/ water, deluge shower, eye wash station - Hamper for containment of bio hazardous items/garments – Direct access from Ambulance Garage
6.01.06	MEA-1	Mobile Equipment Alcove	1	4.6	4.6	Accessible from the walk-in entrance and triage workstation but out of view of general waiting area; for staging of wheel-chairs/stretchers primarily.
6.01.07	WTA-1	Triage/Registration Area: Isolated Triage Sub-Waiting Area	1	6	6	Space for two chairs and a bariatric wheelchair; adjacent to the triage/exam room, for contact isolation of people waiting
6.01.08	WKS-2	Triage/Registration Area: Registration/Unit Clerk Workstation	1	4.5	4.5	Immediately adjacent to the walk-in and ambulance entrances and contiguous with the triage workstation.
6.01.09	OEQ-2	Triage/Registration Area: Office Equipment Alcove	1	6	6	Printer/copier/fax machine and other related equipment.

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
6.01.10	WKS-1	Triage/Registration Area: Security/Police Workstation	1	9.3	9.3	Office/cubicle for 1 to 2 security officers and monitors; view to ED entry doors, waiting area and exam room corridors must be provided.
6.01.11	WKS-1	Triage/Registration Area: Triage Workstation	1	3.7	3.7	Immediately adjacent to the walk-in and ambulance entrances with passage to the acute treatment area; computer workstation and storage for triage supplies.
6.01.12	EXT-1	Triage/Registration Area: Triage Assessment Room	1	12	12	Contiguous with the triage workstation.
6.01.13	WRS-2	Triage/Registration Area: Patient Washroom	1	4.6	4.6	Contiguous with the triage assessment room; may be used for urine specimen collection; wheelchair accessible.

Future Flexibility

The functional program and schedule of accommodation for critical care services at STH were prepared to optimize future flexibility and adaptability to accommodate changes in medical practice, staffing patterns, technology, and linkages to other healthcare providers through 2045. Specific opportunities include:

- Configuration of the ED acute treatment and minor treatment spaces to flex to a higher or lower level of care depending on the patient acuity on any given day.
- Use of the two ICU high-dependency beds — and the critical care cubicles if not occupied — to flex between inpatient care and ED observation/holding to avoid patient admission.
- The two-bay suture/casting room in the ED minor treatment area could accommodate a single bariatric patient (CTAS III, IV, or V) as could one of the trauma/resuscitation bays in the ED acute care area.

7.0 Inpatient Services

Current Situation

Stanton Territorial Hospital (STH) was designed with inpatient beds on the second and third floors with the beds configured into three units per floor — west, south, and east units. On the second floor, the north end of the floor is occupied by the surgery suite and on the third floor this area is generally configured as office space.

The west and east units have a similar facility layout with a central core area surrounded by a mix of private and semiprivate patient rooms. The private patient rooms typically have a shower as part of the ensuite washroom whereby the semiprivate rooms have only a washroom. The central core typically includes a central staff work area, medication room, clean and soiled utility rooms, staff room, and staff washroom. A patient/visitor lounge is located at the end of each wing.

The pediatric and psychiatric units (south units) are configured with a large central activity room across from the nursing station. In the Pediatric Unit, this space was originally designed as a circular-shaped play room — with an enclosed balcony and adjacent office, kitchenette, washroom, and storage room — most of this area is currently use for storage. On the psychiatry unit, this space is used as a patient lounge/activity area and also includes a kitchenette. Both units vary slightly in the placement of patient shower/tub rooms and other unique spaces.

The inpatient beds are configured into the following six nursing units:

- **2-West** houses surgery patients with ten funded beds. Private rooms are provided for all ten patients even though six patients are housed in rooms originally designed as semiprivate. Two of the patient rooms (a private and a semiprivate) are currently used for dialysis and two other semiprivate rooms are used as a surgery waiting room and a treatment room. There is also a ten-bay surgical day care unit that occupies the equivalent space of four semiprivate rooms.
- **2-South** houses the pediatric unit with ten funded beds. This unit was originally designed with five private rooms, two semiprivate rooms, and two six-bassinet nurseries (each the equivalent of two patient rooms). Two of the private rooms are currently used as offices. There are also three private isolation rooms (no windows) with ensuite washrooms/baths.
- **2-East** houses obstetrics/gynecology (ob-gyn) patients with 17 funded beds. There are two larger birthing rooms, five private rooms, and five semiprivate rooms. Two labor rooms (without windows) and a newborn nursery are also provided.
- **3-West** houses an extended care unit with 12 funded beds. Although this unit was originally designed for 20 beds (with ten privates and five semiprivate), private rooms are generally provided today given the reduced census. Four private patient rooms on the north side of the unit are currently used as offices. Unlike the other medical/surgical units, this unit has a large patient lounge/activity area and the central core is configured differently.
- **3-South** houses psychiatric patients with ten funded beds (five private bedrooms, two semiprivate bedrooms, and one seclusion room).
- **3-East** houses general medical patients with 20 funded beds (four privates and eight semiprivate). An additional two-bed room is used for palliative care. In addition, there is four-bed intensive care unit (ICU) that occupies the equivalent of three semiprivate rooms on the south side. Medical day care is provided at the north end of the unit and occupies the equivalent of four semiprivate rooms.

Future Bed Needs

Detailed data on the projected separations, patient days, average census, and occupancy assumptions by clinical service is provided in the operational plan. A total of 102 inpatient beds are planned as part of the renewal project. Future bed need by service — to be accommodated at STH through 2045 — is summarized in the table below:

Table 31 – Projected Bed Need by Service

Service	Current	Projected			
	Funded Beds	2020	2025	2030	2045
Medicine	20	25	25	26	29
Surgery	10	17	17	17	19
Pediatrics	10	8	8	8	10
Obstetrics/Gynecology	17	14	14	14	15
Subtotal	57	64	64	65	73
General Psychiatry	8	12	13	13	15
PICU	---	6	6	6	6
Seclusion	2	2	2	2	2
Subtotal (Psych)	10	20	21	21	23
Critical Care	4	3	3	3	4
High-Dependency	---	2	2	2	2
Subtotal (ICU)	4	5	5	5	6
Extended Care	12	To be transitioned off-site by 2045			
Total	83	89	90	91	102

Hours of Operation

The inpatient units will continue to be staffed 24 hour per day, seven days per week, 365 days per year.

Key Inpatient Service Configuration Changes

Key changes to the configuration of inpatient services to be implemented by 2045 include:

- A new intensive care unit will be created on the main floor contiguous with the emergency department and include four critical care beds and two high-dependency beds (see Section 6.0: Critical Care Services).
- The existing nursery will be replaced with two special care nursery beds in private infant care rooms.
- Extended care beds will be transitioned off-site as the medical/psychiatry census grows. The timing will be depend on the availability of extended care beds outside the hospital and the demand for medical/surgical beds at STH over time.

Program Renewal Assumptions

Based on the projected bed need for 2045 and the desire to comply with the CSA Z8000 standards, the renewed inpatient beds at STH will be organized into the following nursing units:

- Two flexible, generic 28-bed units focused on the following patient populations:
 - Medical Unit — 28 beds
 - Surgical Unit — 28 beds
- General Psychiatry Unit — 21 bed unit with 2 seclusion rooms organized into the following pods:
 - Pod A – 8 standard mental health inpatient bedrooms with medical capability
 - Pod B – 8 standard mental health inpatient bedrooms
 - Pod C – 5 standard mental health inpatient bedrooms with ability to expand/contract in and out of the lockdown zone. Two of these beds are flex to accommodate special populations such as adolescent holding.
- Obstetrical Unit — 6 labor/delivery/recovery beds, 2 standard patient bedrooms for antepartum area and care by parent, 2 flex rooms for use by either OBS patients or low acuity special care infants, and a special care nursery with two private infant care rooms.
- Pediatric Unit — 7 standard inpatient bedrooms (2 of which are equipped with safety features as per HSS) and 1 airborne isolation room (AIR).

The following facility planning principles should be considered in the renewal of inpatient services at STH inpatient units:

- All patient beds will be accommodated in private patient bedrooms.
- The layout of the inpatient units should be similar and the overall nursing unit configuration should facilitate changing staffing models depending on patient needs and acuity, census fluctuations, and periods of staff shortages. The overall design should also optimize sight lines between providers and patients as well as between providers.
- The patient bedrooms should be configured and equipped similarly (to the extent possible) to enhance future operational flexibility.
- The core support spaces — central staff work area, medication room, clean and soiled utility rooms — should also be standardized.
- The central staff work area on each unit will accommodate the needs of medical residents and students as well as nursing and allied health providers.
- Telehealth technologies will be used to provide continuous outreach consultation to support health providers caring for acute patients in local communities or pending transfer to STH as part of the Territorial Services Network, as well as for family support. The procedure room and multipurpose room on each generic inpatient unit should be designed to accommodate telehealth technology.
- Aboriginal wellness and other cultural activities and/or rituals will be provided as a STHA-wide program (resources and infrastructure provided within and/or outside of the hospital) with unit-specific therapeutic programs as well as support to individual patients or families in the hospital upon request.

While a key objective is to standardize the patient bedrooms as they are renewed, the needs of special patient populations should also be accommodated with an adequate number of isolation rooms, seclusion/secure rooms, and bariatric friendly patient rooms and washrooms/bathing facilities.

Bed Configuration and Major Facility Components: Generic Units

Generic Units

The space allocation and facility layout for the two generic units — Medical Unit and Surgical Unit — will all be the same. Each 28-bed unit will include patient bedrooms and core support space.

- **Patient bedrooms.** All patient accommodations will be in private rooms. Of the total 28 rooms, there will be 20 standard patient bedrooms, five airborne isolation bedrooms (AIRs), and two bariatric patient bedrooms. One of the bariatric rooms on each unit will also be equipped to provide airborne isolation. Two of the standard patient bedrooms on the Medical Unit and Surgical Unit will be equipped with safety features (per as per section 0.4 of this document):
 - **Standard Patient Bedroom (20)** with an entry vestibule (with charting surface), supply alcove, and en suite washroom/shower (roll-in). A continuous handrail from the patient bed to the washroom shall be provided. A PPE station shall be provided exterior and adjacent to the entry to each room. For the Medical and Surgical Units, 2 of the standard patient bedrooms will be equipped with security features as per section 0.4 of this document. 2 of the standard patient rooms will be interconnected for accommodating families when necessary. Surface mounted ceiling lifts accessible from either side of the bed and extending from bed to the toilet are required.
 - **Isolation Patient Bedroom (5)** designed as an airborne isolation room (AIR) with separate family and staff zones, an anteroom/vestibule (with charting surface), supply alcove, and en suite washroom/shower (roll-in). A continuous handrail from the patient bed to the washroom shall be provided. A PPE station shall be provided exterior and adjacent to the entry to each room. Surface mounted ceiling lifts accessible from either side of the bed and extending from bed the toilet are required.
 - **Bariatric Patient Bedrooms (3)** with separate family and staff zones, an entry vestibule (with charting surface), supply alcove, and an en suite washroom/shower (roll-in); one of the two bariatric patient bedrooms will also be equipped to provide airborne isolation. A continuous handrail from the patient bed to the washroom shall be provided. A PPE station shall be provided exterior and adjacent to the entry to each room. The Medical Unit will have 2 bariatric patient bedrooms, while the Surgical Unit will have 1 bariatric patient bedroom and 1 inpatient rehab space. Gantry ceiling lift systems required.

Core support space includes administrative and clinical support space along with staff amenities to support the 28 patients on the unit as follows:

- **Central Staff Work Area** with four shared provider touch-down workstations for the nursing and allied health staff, a dedicated workstation for the unit clerk, private office for the clinical coordinator, an alcove for office equipment, a pneumatic tube and a hand hygiene sink. The Central Work area shall have the ability to observe the main public entry into the unit and the corridors to patient areas.
- **Quiet Staff Work Conference Room (1)** located near to the Central Staff Work Area
- **Waiting Area** that accommodates four people.
- **Office** for the unit manager.
- **Staff Room** with a kitchenette, small dining table, and seating for six persons.
- **Staff Locker Alcove** with 20 stacked purse/tote bag lockers for staff that do not have dedicated workstations.
- **Staff Washroom** that is wheelchair accessible.

-
- **Clean Utility Room (2)** for the storage of clean and sterile supplies.
 - **Soiled Utility Room (2)** for the temporary storage of supplies and equipment that will be removed for cleaning, reprocessing, or destruction.
 - **Medication Room** for the preparation and storage of medications used on the unit. Includes a large Pyxis machine and is in close proximity to the staff nursing work area.
 - **Mobile Equipment Room (2)** consisting of an enclosed room with space for 1 small pyxis machine and mobile equipment storage to be located appropriately in the unit to minimize walking distances.
 - **Medical Equipment Room (2)** consisting of an enclosed room. Medical Equipment Storage to be located appropriately in the unit to minimize walking distances.
 - **Nourishment Alcove (2)** for the storage and preparation of patient meals and snacks.
 - **Equipment Storage Room** that is contiguous with the multipurpose room.
 - **Housekeeping Closet** to store a housekeeping cart and back-up supplies and for mop cleaning. Includes a floor-level sink.

Additional patient and family support spaces to be provided on each generic unit include:

- **Multipurpose Room** for patient rehabilitation and other patient/family activities (equipped for video conferencing and telehealth).
- **Patient/Public Washroom** that is wheelchair accessible.
- **Patient Washroom/Tub** for assisted bathing.
- **Patient Washroom** that is contiguous with the procedure room and wheelchair accessible.
- **Procedure Room** for patient treatment or procedures that cannot be accommodated in the patient bedroom; to be equipped for telehealth and also with security features per HHS's direction during design development.
- **Pyxis Room (2)** that is enclosed for 1 small pyxis machine to be located appropriately in the unit to minimize walking distances.

7.1 Medical Unit

Planned Scope of Services

The Medical Unit, as part of the hospital's overall medical service, will provide inpatient care to adults presenting with a variety of acute medical conditions including but not limited to cardiac and cardiovascular disease, diabetes/endocrine disorders, stroke/neurological disease, respiratory disease, and infectious disease. It will also accommodate telemetry monitoring, isolation technique, and bariatric care.

The focus of the unit will be acute episodic illness or acute exacerbation of chronic disease. Physician services will be provided through a shared-care model between medical internists and hospitalists supported by other consulting specialists. Clinical pathways will be used for common medical conditions to guide treatment and expected length of stay, and comprehensive interdisciplinary discharge planning will be conducted to minimize alternate level of care (ALC) patients and days on the unit.

Specialized palliative care will be provided to individuals who cannot be accommodated in community palliative care facilities due to requirements for extensive pain and symptom management.

In addition, complex long-term ventilation will be provided to individuals with ventilator and/or other physiological needs beyond that provided in a community setting. This may be on an extended but temporary

basis until community care is feasible.

While the flexible use of beds on the unit is expected, specific groups of patients may be aggregated to optimize staff expertise and enhance patient safety — such as palliative care, geriatric assessment, specialized convalescent care, or complex long-term ventilation.

Proposed Staffing

Staffing on the Medical Unit will be delivered by a multidisciplinary team with the staff mix and numbers based on general industry standards. Medical residents, medical students, and other health science students will participate in clinical activities on the unit.

Staff working on the Medical Unit will include unit-based staff as well as hospital-based staff who provide services to various patient care areas within the hospital. The proposed unit-based staffing (headcount) for the 28-bed Medical Unit is shown below:

Table 32 – Projected Staffing (Headcount) for the Medical Unit

Position	Headcount by Shift		
	Day	Evening	Night
Manager	1	---	---
Clinical Coordinator	1	---	---
Registered Nurse	4	4	2
Licensed Practical Nurse	2	2	2
Unit Clerk	1	---	---
Physiotherapist	1	---	---
Total (Headcount by Shift)	10	6	4

Up to six additional hospital-based staff could be present on the Medical Unit at any given time (day shift primarily) — including a clinical pharmacist, rehabilitation assistant, social worker, dietician, respiratory therapist, and a discharge planner.

7.2 Surgical Unit

Planned Scope of Services

The Surgical Unit, as part of the hospital's overall surgical service, will provide pre-operative and post-operative inpatient care to adults undergoing a variety of surgical procedures including general surgery, orthopedic surgery, ophthalmology, otolaryngology (ENT), urology, gynecology and dental procedures.

Patients may also be admitted to the Surgical Unit for surgical assessment without undergoing a surgical procedure, or they may be admitted for post-operative care following a surgical procedure performed in the south. Pediatric surgical care will be provided on the Pediatric Unit. Obstetrical patients will be admitted to the surgical unit for antenatal or postpartum care when the four LDRPs on the Obstetrical Unit are occupied. The unit will also accommodate telemetry monitoring, isolation technique, and bariatric care.

Proposed Staffing

Staffing on the Surgical Unit will be delivered by a multidisciplinary team with the staff mix and numbers based on general industry standards. Medical residents, medical students, and other health science students will participate in clinical activities on the unit.

Staff working on the Surgical Unit will include unit-based staff as well as hospital-based staff who provide services to various patient care areas within the hospital. The proposed unit-based staffing (headcount) for the 28-bed Surgical Unit is shown below:

Table 33 – Projected Staffing (Headcount) for the Surgical Unit

Position	Headcount by Shift		
	Day	Evening	Night
Manager	1	-	-
Clinical Coordinator	1	-	-
Registered Nurse	4	4	2
Licensed Practical Nurse	2	2	2
Unit Clerk	1	-	-
Physiotherapist	1	-	-
Total (Headcount by Shift)	10	6	4

Up to six additional hospital-based staff could be present on the Surgical Unit at any given time (day shift primarily) — including a clinical pharmacist, rehabilitation assistant, social worker, dietician, respiratory therapist, and a discharge planner.

The Surgical Unit will continue operations during planned closures of the surgical suite, providing pre- and postoperative inpatient care to unscheduled urgent or emergency patients and accommodating obstetrical or other off-service patients.

7.3 General Psychiatry Unit

Planned Scope of Services

The General Psychiatry Unit will provide inpatient care to adults presenting with mental health issues, including patients with low-risk psychiatric conditions as well as individuals certified as mentally incompetent under the Mental Health Act requiring locked-down services. This 21 bed unit will be organized into three pods; two 8-bed mental health inpatient pods (Pod A and B) and one 5-bed mental health inpatient pod (Pod C) that will have the ability to expand or contract from the remainder of the general psychiatry beds if lock-down is required. The 5-bed Pod C will have dedicated patient support spaces and the ability to use two beds to accommodate special populations such as adolescent holding. Pod A will be equipped with medical capabilities for future flexibility in service delivery, and will have one AIR and one bariatric equipped rooms. All three pods will share appropriate staff support spaces. Two seclusion rooms will be available to isolate and monitor at-risk patients, one to be shared between Pod A and B and one dedicated to Pod C.

Hospitalists supported by specialists as required will provide physician services. A hospital-based psychiatrist will direct the medical care of psychiatric patients on the unit (and in the hospital). Clinical pathways/protocols will be used when available to guide treatment and expected length of stay.

Comprehensive interdisciplinary discharge planning will be conducted to expedite discharge and minimize alternate level of care (ALC) patients and days on the unit.

Specific service components include:

- **General psychiatric inpatient care.** The general inpatient program will be provided for individuals with mental illness who do not require close observation and/or seclusion/lock-down accommodation. Specialized programming will be provided in a general ward environment for a number of low risk mental health populations or conditions.
- **Medical detoxification.** Protocols will be developed and utilized by unit staff providing care to patients requiring medical detox including specific protocols for psychiatric patients exhibiting symptoms related to dual diagnosis. Detox patients will be grouped into an designated area of the unit and cared for by interested and experienced staff in order to ensure patient and staff safety and maximized care outcomes.
- **Geriatric assessment.** The General Psychiatry Unit will provide a multidimensional, multidisciplinary, and diagnostic approach designed to collect data and information on the medical, psychosocial, and functional capabilities and limitations of elderly acute patients including those exhibiting dementia (psychogeriatrics).
- **Specialized convalescent** care will be provided to individuals requiring resources at an intensity level greater or beyond that available in the community (e.g. extensive rehabilitation).

Proposed Staffing

Staffing on the General Psychiatry Unit will be delivered by a multidisciplinary team with the staff mix and numbers based on general industry standards. Medical residents, medical students, and other health science students will participate in clinical activities on the unit.

Staff working on the General Psychiatry Unit will include unit-based staff as well as hospital-based staff who provide services to various patient care areas within the hospital. The proposed unit-based staffing (headcount) for the 21-bed Unit is shown below:

Table 34 – Projected Staffing (Headcount) for the General Psychiatry Unit

Position	Headcount by Shift		
	Day	Evening	Night
Psychiatrist	1		
Manager	1	-	-
Clinical Coordinator	1	-	-
Registered Nurse /Registered Psychiatric Nurse	7	7	5
Nurse Practitioner/MHA Counselor/Social Worker	1		
Licensed Practical Nurse	2	2	2
Unit Clerk	1	-	-
Recreation Therapist or Rehab Assistant	1	-	-
Security Officer	1	1	1
Total (Headcount by Shift)	16	10	8
<i>Note: Staff from the previously planned PICU unit have been combined in this table (1 psychiatrist, 1 nurse practitioner, 3 registered nurses (day, evening and night) and 1 security</i>			

<i>officer (day, evening and night).</i>
--

Up to six additional hospital-based staff could be present on the General Psychiatry Unit at any given time (day shift primarily) — including a clinical pharmacist, social worker, dietician, occupational therapist, and a discharge planner.

Bed Configuration and Major Facility Components

As with the generic units, the major facility components for the General Psychiatry Unit include the patient bedrooms and core support space.

Patient bedrooms. All patient accommodations will be in private rooms. There will be 21 mental health patient bedrooms organized into three separate pods as follows:

- **Pod A**
 - **Mental Health Inpatient Bedroom (8)** including washroom/shower, supply alcove and equipped with medical capabilities (anti-ligature and hidden/locked medical gas panels). Placement of the washroom must not obscure view of patient room or create hiding places. One mental health inpatient bedroom equipped with AIR capabilities and one equipped with bariatric requirements, including anteroom, family zone and staff zone and no ceiling lifts.
- **Pod B**
 - **Mental Health Inpatient Bedroom (8)** including washroom/shower and supply alcove. Placement of the washroom must not obscure view of patient room or create hiding places.
- **Pod C (including dedicated patient support spaces)**
 - **Mental Health Inpatient Bedroom (5)** including washroom/shower and supply alcove. Placement of the washroom must not obscure view of patient room or create hiding places. Two rooms are flex to accommodate special populations such as adolescent holding. This pod requires ability to expand/contract in and out of lockdown zone.
 - **Security Workstation** for security officer assigned to the unit; includes lockable storage.
 - **Clinical Touchdown Station (2)** for providers working within the pod.
 - **Hand Hygiene Sink (2).** One sink per clinical touchdown station.
 - **Medication Room** for medication preparation and storage; includes a pyxis machine.
 - **Mobile Equipment Alcove** for the holding/docking of mobile equipment with electrical support.
 - **Dining/Activity/Lounge** for patients. Includes kitchenette and storage room.
 - **Individual Consult/Therapy Space** that accommodates three people with soft seating. Requires two exits.
 - **Seclusion Room** with correctional-style toiled and sleeping pad.

Core support space includes administrative and clinical support space along with staff amenities to support the patients on the General Psychiatry Unit as follows:

- **Reception Area**
 - **Clerical Workstation (2).** One for the unit clerk and one flex touchdown station.
 - **Office Equipment Alcove** with a fax/copier/printer and other related equipment.
 - **Waiting Area** that accommodates up to four people.

-
- **Public Washroom** adjacent to the waiting area.
 - **Firearm locker** – should be built-in in a secure location directly outside of the unit, for police to store their gun when required before entering the unit.
 - **Staff Support**
 - **Private Office (3)** for the clinical coordinator, psychiatry manager and psychiatrist. Requires two exits.
 - **Clinical Touchdown Workstations (3)** that are unassigned for the providers working on the unit. Located throughout the unit.
 - **Hand Hygiene Sink (3).** One sink per clinical touchdown workstation.
 - **Report/Conference Room** for unassigned private meeting space; supports decentralized workstation model.
 - **Pneumatic Tube**
 - **Staff Room/Lounge** with a kitchenette, dining table and 12 chairs.
 - **Staff Lockers Alcove** with 20 stacked purse/tote bag lockers for staff without dedicated workstations.
 - **Staff Washroom (2)** that is wheelchair accessible.
 - **Patient Support**
 - **Clean Utility Room** for storage of clean and sterile supplies.
 - **Soiled Utility Room** for temporary storage of supplies and equipment to be removed for cleaning, reprocessing or disposal.
 - **Medication Room** for medication preparation and storage. Includes large pyxis machine.
 - **Mobile Equipment Room** for mobile equipment storage; to be located appropriately in the unit to minimize walking distance.
 - **General Storage** including shelving.
 - **Housekeeping Closet** for staging of housekeeping cart and mop cleaning. Includes floor-level sink.
 - **Patient Laundry Room** with residential washer/dryer.
 - **Dining Room/Lounge** that accommodates large group dining up to 15 people, barrier free. Includes dining area (chairs, tables), kitchenette and lockable cupboard for food and supplies.
 - **Patient Washroom.** 2 piece, barrier free contiguous with the dining room.
 - **Activity Room** for patient/family activities and fitness.
 - **Storage Room** shared between the dining room/lounge and activity room.
 - **Group Therapy Room/Family Education.** Accommodates up to 8 people and telehealth capable.
 - **Observation Room** including audio equipment, one way windows and adjacency to the group therapy room.
 - **Individual Consult/Therapy Space** that accommodates up to three people with soft seating and two exits.
 - **Patient Alcove (2).** Seating nook for patients; includes a bench and provides views to the outside.

-
- **Seclusion Room** with correctional style toilet and pad.
 - **Procedure Room** equipped with safety features per HHS direction and telehealth capable.
 - **Secure Outdoor Space** with secure lighting and seating.
 - **Personal Storage** for patients belongings as required while staying on the unit. Secured, and accessible by staff.

7.4 Psychiatric Intensive Care Unit

This unit has been removed.

7.5 Obstetrics Unit

Planned Scope of Services

The Obstetrics Unit will remain on 2-East and continue to provide a full range of inpatient perinatal services — including assessment/triage, antepartum care, labor and delivery, postpartum, and neonatal care. Facilities and expertise will be available to resuscitate, stabilize, and care for at-risk women or critically ill newborns until they are transferred to a higher level of care. Women and/or neonates transferred to healthcare facilities in the south for specialized care may be readmitted to the unit prior to final discharge to their home communities.

The Obstetrics Unit will adopt a family-centered care philosophy, which should be translated into the architectural and interior design.

Outpatient services — specifically the Northern Women's Health program — will move from the Obstetrics Unit to the Outpatient Clinic (See Ambulatory Care Centre).

Specific service components include:

- **Assessment and triage.** Patients will typically be seen and evaluated in an assessment room, however they may be taken directly to an LDRP room if in active labour. The assessment is to determine if the patient is truly in labour or if there are any other obstetric-related complications. The process of assessment/triage can result in the patient being sent home (e.g. false labour), admitted to an LDRP room for the labour to progress, to an antenatal room for non-labour related care, or to the surgical suite for an elective C-section (admit day of surgery). The process will not always lead to an immediate admission or release. It may take several hours of observation to rule out active labour, fetal or maternal distress, or other diagnoses before the disposition decision can be made. If the decision is made to admit the patient, this is where the admission data and information will be completed by patient registration staff. This area will also be used for after-hour outpatient fetal monitoring.
- **Labour and delivery.** Care for women in labour and childbirth will be provided in LDRP rooms. LDRP is a maternity care approach that provides labour, delivery, recovery, and postpartum care for mothers and their newborns in a single room. Rooms must include facilities for care of the infant during delivery and after birth. Such rooms also include facilities for mother-baby care for the entire length of stay. The LDRP area will be resourced to accommodate low to higher risk births. Planned births are restricted to women at 34 weeks gestation or more, however the unit will be prepared for high-risk births at less than 34 weeks. Both vaginal and C-section deliveries will be accommodated although C-section procedures will be performed in the Surgical Suite.
- **Antenatal/postpartum care.** The unit will provide antenatal and post-partum care within the availability of the LDRPs (as available) or in the other available general ward /flex rooms within the unit.
- **Special care nursery care.** Normal newborns will room in with their mothers after birth and during their stay in the hospital. However, for some infants, specialized care and/or treatments are ordered requiring the infant to spend time away from the mother in a specialized treatment environment. Separation of mother and baby will also occur when at neonate is at risk and requires specialized care and observation prior to transfer to a higher level of care. In addition, accommodation and

specialized care is required for infants returning from other hospitals. This Special Care Nursery will be designed to ensure separation between infants and to maximize parent and family involvement in the child's care.

Approximately 800 annual births are projected for 2045 which represents significant growth from the 600 annual births experienced in FY 2010/11.

Projected Bed Needs

As shown in the table below, over 800 annual births are projected by 2045. It is assumed that a modified single-room maternity model will be in place — with labor, delivery, recovery, and post-partum care occurring in the same (LDRP) room. General ward beds will be provided for overflow postpartum patients when the LDR/LDRP rooms are at capacity; for longer stays associated with Caesarian sections; and for antenatal care. Newborns will generally room-in with the mother.

Six (6) LDRP rooms are planned along with two (2) antepartum rooms, and two (2) flex rooms that can be shared with the Pediatric Unit. The expected occupancy for obstetrics is 75%. In addition, a 2-room special care nursery is planned with one of these rooms capable of flexing to a general patient room if necessary (has bathroom).

Table 35 – Comparison of Current and Projected Obstetrics Beds and Births

Service	FY 2010/11	Projected			
	Funded Beds	2020	2025	2030	2045
LDR/LDRP	4	6	6	6	6
Postpartum/Gynecology	13	0	0	0	0
Postpartum/Antepartum/Flex	-	4	4	4	4
Special Care Nursery	-	2	2	2	2
Total (Headcount by Shift)	17	12	12	12	12
Births	600	721	741	757	819

Proposed Staffing

A multidisciplinary team will deliver care on the Obstetrics Unit, with the staff mix and numbers based on general industry standards. Medical residents, medical students, and other health science students will participate in clinical activities on the unit.

Staff working on the Obstetrics Unit will include unit-based staff as well as hospital-based staff who provide services to various patient-care areas within the hospital. The proposed unit-based staffing (headcount) for the 12-bed Obstetrics Unit is shown in the following table.

Table 36 – Projected Staffing (Headcount) for the Obstetrics Unit

Position	Headcount by Shift		
	Day	Evening	Night
Clinical Coordinator	1	---	---
Registered Nurse (LDRP/Triage/Assess)	2	2	2
Registered Nurse (General Ward/Flex)	1	1	---
Registered Nurse (Special Care Nursery/Float)	1	1	1
Unit Clerk	1	---	---
Total (Headcount by Shift)	6	4	3

Up to five additional hospital-based staff could be present on the Obstetrics Unit at any given time (day shift primarily) — including a clinical pharmacist, physiotherapist, social worker, dietician, and a discharge planner.

Proposed Bed Configuration

To achieve the projected number of beds for 2045, the following potential reconfiguration options should be considered during schematic design:

- Create six (6) new LDRP rooms with soaker tub in the bathroom.
- Create two (2) new general ward units with bathroom and shower that may be used for antepartum care or as parenting rooms. They also may be used as post-partum overflow if needed.
- Create two (2) new general ward units with bathroom and shower that will be used as flex beds for either Obstetrics or Pediatrics.
- Create a Special Care Nursery suite with two (2) single patient rooms. One room to have a bathroom with shower that can also be flexed to general ward care if needed. A satellite staff station will be directly adjacent to the infant care rooms with direct visibility into the rooms.

This results in a total of six (6) LDRPs, four (4) general ward rooms, and two (2) special care nursery rooms.

Major Facility Components

The Obstetrics Unit includes a birthing suite, standard patient bedrooms, a special care nursery and support space.

- **Birthing Suite** that includes 6 LDRP rooms each with an en suite washroom, a soaker tub, a supply/equipment alcove. This suite also includes an assessment/procedure room with 2 stretchers each with a curtain enclosure, and a patient washroom that is wheelchair accessible.
- **Standard Patient bedrooms (4)** where 2 of the rooms are to be used for antepartum care and care by patient, and 2 rooms to be used as flex rooms by either OBS patients or low acuity special care infants. All rooms include entry vestibule, an en suite roll-in washroom/shower and a supply alcove.
- **Special Care Nursery:**
 - **Infant Care Rooms (2)** that are private with bassinette area, family zone, infant treatment table and supply alcove.

-
- **Staff Work Area** with a counter, hand hygiene sink, and supply storage – shared between the two private infant care rooms with direct visibility.
 - **Infant Resuscitation Room** that is interconnected with the two private infant care rooms.
 - **Family Washroom** located adjacent to the infant care rooms. Includes a shower and is wheelchair accessible.
 - **Procedure Room** to be shared with and adjacent to the Pediatric Unit. Includes a contiguous washroom.
 - **Patient and Family Support Space:**
 - **Family/Visitor Lounge** for mothers and infants to interact with other family members and visitors. Seating for up to 6 people and located adjacent to the entrance of the Obstetrics Unit.
 - **Patient/Public Washroom** for general use by patients and family with toilet and sink only.
 - **Support Space:**
 - **Central Staff Work Area** with three (3) shared provider touch-down workstations for the care providers, a dedicated workstation (1) for the unit clerk, a private office for the clinical coordinator, an alcove for office equipment, a hand hygiene sink and a pneumatic tube.
 - **Office** for the Maternal/Child manager and to be shared with the Pediatric Unit.
 - **Medication Room** for the preparation and storage of medications used on the unit. Includes a Pyxis machine.
 - **Mobile Equipment Alcove** (with electrical support) for the temporary holding/docking of mobile equipment used on the unit.
 - **Nourishment Alcove** for the storage and preparation of patient meals and snacks.
 - **Housekeeping Closet** to store a housekeeping cart and back-up supplies and for mop cleaning. Includes a floor-level sink.
 - **Clean Utility Room** for the storage of clean and sterile supplies.
 - **Soiled Utility Room** for the temporary storage of supplies and equipment that will be removed for cleaning, reprocessing, or destruction.
 - **Equipment Storage Room** for the storage of portable equipment used on the unit.
 - **Staff Room** with a kitchenette, small dining table, and seating for six persons. Not shared with the Pediatric Unit.
 - **Staff Locker Alcove** with 20 stacked purse/tote bag lockers for staff that do not have dedicated workstations. Not shared with the Pediatric Unit.
 - **Staff Washroom** that is wheelchair accessible.
 - **Conference Room** with seating for up to 12 persons to be shared with the Pediatric Unit.

Facility Layout and Design Considerations

Specific facility layout and design considerations related to the Obstetrics Unit include:

- Appropriate space will be needed to accommodate a large Pyxis machine — either within an expanded medication room or by providing an adjacent alcove for the Pyxis machine.

- The staff room, staff lockers alcove, and a staff washroom should be grouped together in a discrete area (off-stage).
- The family/visitor lounge should be positioned such that its access and activity can be monitored from the central staff work area.
- All patient bedrooms — including the LDRP rooms and the high-dependency infant room and infant resuscitation room — require special sound attenuation.
- Direct access, segregated from public circulation, between the Surgery Suite and the Obstetrics Inpatient Unit is required to facilitate stretcher access for emergency C-sections.

7.6 Pediatric Unit

Planned Scope of Services

The Pediatric Unit will continue to provide inpatient services to children and adolescents under the age of 18 years reflecting a philosophy of family-centered care. Patients may be relatively stable to critically ill with unpredictable outcomes and be admitted for medical, surgical, or psychiatric conditions (psychiatric patients ages 15 and under). Pediatric surgical day care patients will be prepared for surgery, recovered, and discharged from the Pediatric Unit. The unit will also accommodate children repatriated to STH following care in the south. When required, children in foster care may be admitted to provide urgent caregiver respite.

Critically ill infants may be cared for in the special care nursery on the Obstetrics Unit. Older children will be cared for in the Intensive Care Unit, where facilities and expertise will be available to resuscitate, stabilize, and/or care for these children pending transfer to higher levels of care.

Outpatient services other than surgical day care — such as pediatric follow-up and minor procedures will occur in the Outpatient Clinic (See Ambulatory Care Centre).

The Pediatric Unit — currently occupying 2-South — will be resized to provide more efficient space utilization and enhanced operational flexibility.

Projected Bed Needs

A total of 8 beds are planned for the Pediatric Unit with an additional 2 flex beds available on the Obstetrics Unit. The target 2045 bed need is shown in the table below — assuming an average length of stay of 4.7 days, an average census of 5.7 patients, and an occupancy rate of 65%.

Table 37 – Comparison of Current and Projected Pediatric Beds

FY2010/11	Projected			
Funded Beds	2020	2025	2030	2045
10	8	8	8	9

Proposed Staffing

Staff working on the Pediatric Unit will include unit-based staff as well as hospital-based staff who provide services to various patient care areas within the hospital. The proposed unit-based staffing (headcount) for the 8-bed Pediatric Unit is shown below:

Table 38 – Projected Staffing (Headcount) for the Pediatric Unit

Position	Headcount by Shift		
	Day	Evening	Night
Clinical Coordinator	1	-	-
Registered Nurse	2	2	2
Unit Clerk	1	-	-
Total (Headcount by Shift)	4	2	2

Up to six additional hospital-based staff could be present on the Pediatric Unit at any given time (day shift primarily) — including a clinical pharmacist, physiotherapist, occupational therapist, social worker, dietician, respiratory therapist, and a discharge planner.

Proposed Bed Configuration

The average daily census is projected to be 5.7 patients in 2045. Eight (8) patient rooms on the Pediatric Unit with an additional two (2) flex rooms available on the Obstetrics Unit should accommodate variation in the pediatric census and accommodate surges in activity.

Major Facility Components

The Pediatric Unit includes patient bedrooms and core support space.

Patient bedrooms. Patient bedrooms will be designed as a standard private patient bedroom (one-bed), or as a single-bed airborne isolation rooms (AIR). Two of the standard private patient bedrooms will be equipped with security features per HHS's direction during design development, as follows:

- **Standard Inpatient Bedrooms (8)** where 2 bedrooms will be equipped with safety features and 1 will be designed as an Airborne Isolation Room (AIR). All bedrooms include entry vestibule, a roll-in washroom/shower, and supply alcove. A surface mounted ceiling lift accessible from either side of the bed and extending from bed to all washroom fixtures will be installed in one standard Pediatric bedroom, and on AIR Pediatric bedroom. The AIR bedroom will include its own family zone and staff zone.

Patient and Family Support Space:

- **Patient/Public Washroom** for general use by patients and family with toilet and sink only. Wheelchair accessible.
- **Patient Washroom/Tub** for assisted bathing.
- **Multipurpose Room** for use as a family lounge, play room, rehabilitation and/or telehealth.
- **Laundry Room** with a washer/dryer.

Support Space:

- **Central Staff Work Area** with two (2) shared provider touch-down workstations for the care providers, a dedicated workstation (1) for the unit clerk, a private office for the clinical coordinator, an alcove for office equipment, a hand hygiene sink and a pneumatic tube.
- **Medication Room** for the preparation and storage of medications used on the unit. Includes a Pyxis machine.
- **Mobile Equipment Alcove** (with electrical support) for the temporary holding/docking of mobile equipment used on the unit.
- **Nourishment Alcove** for the storage and preparation of patient meals and snacks.
- **Housekeeping Closet** to store a housekeeping cart and back-up supplies and for mop cleaning. Includes a floor-level sink.
- **Clean Utility Room** for the storage of clean and sterile supplies.
- **Soiled Utility Room** for the temporary storage of supplies and equipment that will be removed for cleaning, reprocessing, or destruction.
- **Equipment Storage Room** for the storage of portable equipment used on the unit.
- **Staff Room** with a kitchenette, small dining table, and seating 6 persons. Not shared with the Obstetrics Unit.
- **Staff Locker Alcove** with 20 stacked purse/tote bag lockers for staff that do not have dedicated workstations. Not shared with the Obstetrics Unit.
- **Staff Washroom** that is wheelchair accessible.

Summary of Space Requirements

Summary of Future Space Needs

The schedule of accommodation for the renewed inpatient services is included in the Appendix. Corresponding room data sheets are provided under separate cover in the *Functional Program for the Stanton Territorial Hospital Renewal Project — Room Data Sheets*. Additional information on individual room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets.

A total of 6,376.1 component gross square metres (CGSM) will be required for the two generic units and three specialty units based on the net square metres (NSM) tabulated in the the Schedule of Accommodation and using the following net to gross space conversion factors.

It should be noted that the actual component gross square metres or “footprint” of each inpatient unit will depend on the limitations of the existing building envelope and column/bay spacing, building expansion potential, and the efficiency of the architectural design.

Table 39 – Summary of Future Space Requirements for Inpatient Services (2045)

Facility Component		CNSM	Conversion Factor	CGSM
7.1	Medical Unit	1,078.0	1.55	1,670.9
7.2	Surgical Unit	1,078.0	1.55	1,670.9
7.3	General Psychiatry Unit	962.9	1.55	1,492.5
7.4	Psychiatric Intensive Care Unit (unit removed)	0.0	1.55	0.0
7.5	Obstetrics Unit	607.3	1.55	941.3
7.6	Pediatric Unit	387.4	1.55	600.5
Total		4,113.6	1.55	6,376.1

Facility Layout and Design Considerations

Specific facility layout and design considerations related to the inpatient units include:

- All patient bedrooms — including the LDRP rooms and the infant care rooms — require special sound attenuation.
- One of the patient bedrooms on the Medical Unit should be equipped to provide dialysis (when required).
- The staff room, staff lockers alcove, and staff washroom on each unit should be grouped together in a discrete area (off-stage).
- The family/visitor lounge on the Obstetrics Unit should be positioned such that its access and activity can be monitored from the central staff work area.
- The patient dining/lounge/activity area within Pod C of the General Psychiatry Unit should be positioned such that its access and activity can be monitored from staff work areas.
- The maternal/child health manager office and staff support space will be shared between the Obstetrics Unit and the Pediatric Unit and should, therefore, be positioned for convenient access by the staff on both units.

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
7.00	Inpatient Services					
7.01	MEDICAL UNIT					
7.01.01	WKS-2	Central Staff Work Area: Clerical Workstation	1	4.5	4.5	Unit clerk.
7.01.02		Waiting Area	1	6	6	Accommodates 4 people
7.01.03	WRS-2	Public Washroom	1	4.6	4.6	Wheelchair accessible, adjacent to waiting area.
7.01.04	WKS-2	Central Staff Work Area: Coordinator Workstation	1	9.3	9.3	Private office for Clinical Coordinator.
7.01.05	WKS-1	Central Staff Work Area: Shared Workstation	4	3.7	14.8	Touch-down workstations for providers working on the unit.
7.01.06	OEQ-2	Central Staff Work Area: Office Equipment Alcove	1	6	6	Fax/copier/printer and other related equipment.
7.01.07	HHS-1	Central Staff Work Area: Hand Hygiene Sink	1	1	1	
7.01.08		Central Staff Work Area: Pneumatic Tube	1	2	2	
7.01.09	OFF-1	Office (standard)	1	9.3	9.3	Manager (Medicine).
7.01.10	KTC-2	Staff Room	1	20	20	Kitchenette, dining table, and six chairs.
7.01.11	LKR-1	Staff Lockers Alcove	1	5.6	5.6	20 stacked purse/tote bag lockers for staff without dedicated workstation.
7.01.12	WRS-2	Staff Washroom	1	4.6	4.6	Wheelchair accessible.
7.01.13	CLU-1	Clean Utility Room	2	11	22	Storage of clean and sterile supplies. To be located appropriately in the unit to minimize walking distances.
7.01.14	SLU-1	Soiled Utility Room	2	12	24	Temporary storage of supplies and equipment to be removed for cleaning, reprocessing, or disposal. To be located appropriately in the unit to minimize walking distances.

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
7.01.15	MED-1	Medication Room	2	12	24	Medication preparation and storage; includes a large Pyxis machine. To be located appropriately in the unit to minimize walking distances.
7.01.16	MEA-2	Mobile Equipment Alcove	2	2.5	5	To be located appropriately in the unit to minimize walking distances.
7.01.17	KTC-1	Nourishment Alcove	2	4	8	Storage and preparation of patient snacks. To be located appropriately in the unit to minimize walking distances.
7.01.18	STO-1	Equipment Storage Room	1	6	6	Contiguous with the multi-purpose room.
7.01.19	HSK-1	Housekeeping Closet	1	7	7	Staging of housekeeping cart and mop cleaning; floor-level sink.
7.01.20	MTP-1	Multipurpose Room	1	28	28	For patient/family activities; also used for telehealth.
7.01.21	WRB-2	Patient Washroom Tub	1	16	16	For assisted bathing. Patient Lift required.
7.01.22	WRS-2	Patient Washroom	1	4.6	4.6	Contiguous with the procedure room.
7.01.23	PRC-1	Procedure Room	1	16.5	16.5	Also used for telehealth. Gantry ceiling lift systems required.
7.01.24	BDR-1	Standard Patient Bedroom (One Bed): Bedroom	18	15	270	Standard Bedrooms; Connect 2 bedrooms on each floor with door; continuous handrail from bed to washroom. Surface mounted ceiling lift accessible from either side of the bed and extending from bed to toilet required.
7.01.25	---	Standard Patient Bedroom (One Bed): Vestibule	18	5	90

Future Flexibility

The proposed inpatient units are separated into general units and specialty units. It is assumed that the design of the general units — the Medical Unit, the Surgical Unit, and the General Psychiatry/Medical Unit— would be fairly generic such that the beds could flex for medical, surgical, or dual-diagnosis general psychiatric patients to accommodate fluctuations in census. The core support space of all three units is identically sized and should be configured and equipped similarly.

8.0 Pharmacy

Overview of Program Renewal for the Pharmacy

The pharmacy will continue to be responsible for drug distribution and clinical pharmacy services at Stanton Territorial Hospital (STH) and will purchase and distribute vaccines to the southern region of the Northwest Territories.

Pharmacy: Functional Planning Assumptions

Current Situation

The pharmacy occupies 105 component gross square metres (CGSM) in the west wing of the main floor. In addition to the core pharmacy area, the current space includes a small entry/meeting area with a Pyxis machine (night cupboard), a compounding room, a narcotics vault, storage area, and an office for the pharmacist. There is no formal receiving/breakout area — with direct access from the hospital loading dock/staging area — and the central production area is undersized. However, convenient access is provided to the emergency department and the elevators to the inpatient units. A Pyxis machine is located in each inpatient unit and two are located in the emergency department (one large machine and one smaller machine in the trauma/resuscitation area).

Planned Scope of Services

The pharmacy will continue to be responsible for drug distribution and clinical pharmacy services as follows.

- **Drug distribution.** The pharmacy is responsible for ordering and dispensing all drugs and pharmaceuticals used throughout the hospital and will continue to be supported by a computerized pharmacy information system. Once a medication is prescribed by a physician (via electronic order entry) a patient profile will be created to track the ordered medication and identify allergies and/or adverse drug interactions. Medication administration in the patient care areas will be supported using a point-of-use, unit-dose delivery system (Pyxis), ward stock, and narcotic inventories. Medication administration records (MAR) will be electronically generated and used by nursing staff when administering medications. Pharmacy staff will prepare all special medications used in the hospital — such as chemotherapy infusions, total parenteral nutrition (TPN), and other special intravenous (IV) solutions.
- **Clinical pharmacy.** Pharmacists will provide clinical pharmacy services to all clinical areas — including medication reconciliation, prescribing advice, and patient counseling — and will also participate in the anticoagulation management service.

Hours of Operation

The pharmacy will be staffed from 0800 hours to 1600 hours, seven days per week; pharmacists and pharmacy technicians will be on-call after hours.

Projected Staffing

The projected staffing (headcount) for the pharmacy is shown in the table below.

Table 40 – Projected Staffing (Headcount) for the Pharmacy

Position	Headcount by Shift		
	Day	Evening	Night
Manager (Pharmacist)	1	-	-
Pharmacist (Drug Distribution — Weekends)	1	-	-
Pharmacist (Clinical Pharmacy)	4	-	-
Pharmacy Technician	4	-	-
Total (Headcount)	10	-	-

Proposed Facility Reconfiguration and Key Spaces

Facility Reconfiguration Concept

The pharmacy should remain in the west wing of the main floor. This location provides for service access for drug deliveries and staging as well as convenient access to critical care services, the outpatient clinic, and the main elevators that lead to the inpatient units and surgery suite.

8.1 Pharmacy

Major Facility Components and Work Flow

As shown in the functional diagram on the following page, the pharmacy will include the following key spaces:

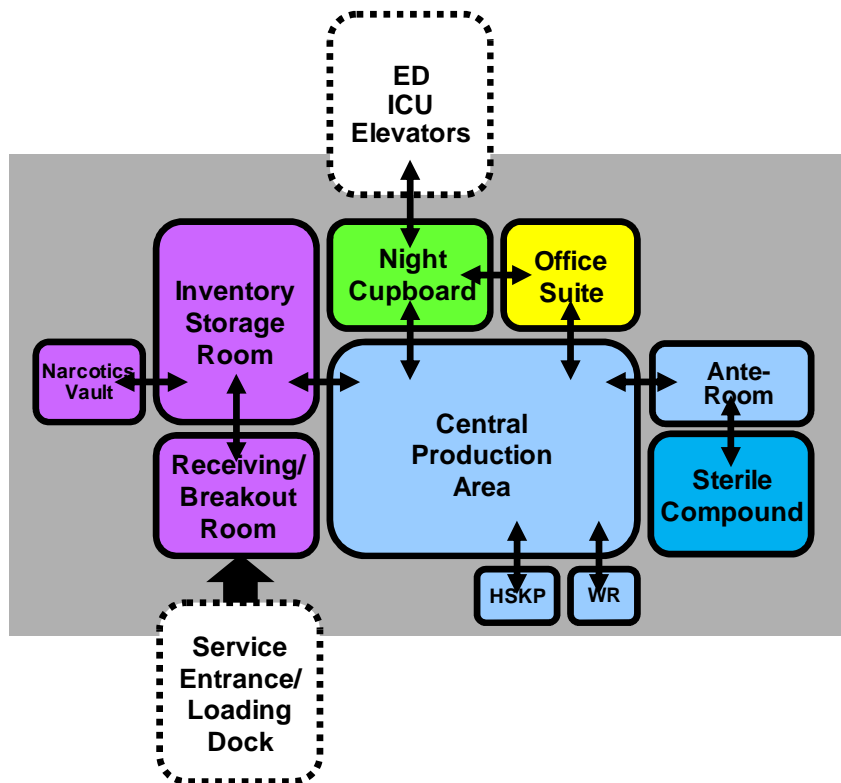

- **Receiving and Breakout Room.** Incoming supplies — delivered to the STH loading dock/service entrance — will be transported directly to a dedicated pharmacy receiving and breakout room where they will be inspected, scanned, and reconciled with purchase orders. Items will be removed from shipping containers and the packing materials either discarded or stored for recycling. This room includes a workstation with computer, printer, label printer, carts/shelving and container recycling/trash bins. Direct access should also be provided from this room to the pharmacy inventory storage room.
- **Purchasing Workstation** for drug information resources.
- **Inventory Storage Room** for storage of drugs, packaging materials and includes two refrigerator/freezers. Should be a secured space containing a predetermined amount of inventory for the hospital. The storage of narcotics and controlled substances must meet Territorial and/or Federal requirements. Will include 60 linear metres of moveable high density shelving and fixed shelving for general storage; fixed shelving will consist of ten, 3 inch wide shelving units that are 5 shelves high and equipped with small bins.
- **Narcotics Vault** to provide secure (alarmed) storage room for narcotics and controlled substances.
- **Central Production Area** is where active stock is kept, unit-doses are prepared, and replenishment carts are stocked. Includes 4 workstations, unit-dose packaging equipment, 2 refrigerators/freezers, 4 computers, 2 printers, 2 label printers, emergency eye wash and a hand hygiene sink.
- **Sterile Compounding/Preparation Area** will include an entry vestibule and 4 separate work rooms — each with its own separate anteroom — for the preparation of sterile products using a laminar flow

hood and chemotherapy using a biological safety cabinet in compliance with CSA Z8000 and Canadian Pharmacists Association (CPhA) standards for occupational health and safety regulations.

- **Night Cupboard** that includes a Pyxis machine, refrigerator and additional secured storage (as required) for patient medications to be accessed after hours when they are not available in a specific patient care area. Should be located near to the Medical Inpatient Unit, and be accessible by all Inpatient Units.
- **Office Suite** with 1 office for the pharmacy manager, 2 workstations for pharmacy staff and a conference room with seating for 8-10 people with teleconferencing capabilities.
- **Staff Washroom** with wheelchair accessibility and accessible from within the pharmacy area.
- **Pneumatic Tube**
- **Housekeeping Closet** for storing the housekeeping cart and includes a floor-level sink and shelving for supplies. Must be accessible from outside corridor.

Additional secure refrigerator storage for anti-virals (pandemic-ready) will be provided in the materials management warehouse.

**Diagram 7 – Central Pharmacy
Major Facility Components and Functional Adjacencies**

Facility Layout and Design Considerations

Key facility layout and design considerations pertaining to the configuration of the central pharmacy are listed below:

- The central pharmacy will not be accessed by outpatients, visitors, or the public. Clinical pharmacy consults with outpatients and families will occur in the Outpatient Clinic; consults with staff will occur throughout the hospital — generally at the point of service.
- The night cupboard includes a Pyxis machine, refrigerator and additional secured storage (as required) for patient medications to be accessed after hours when they are not available in a specific patient care area. It should be located centrally to all Inpatient Units, Critical Care and Pharmacy, and near to the Medical Inpatient Unit.
-
- An alarm system should be provided to monitor the pharmacy peripheral doors and internal secure areas such as the narcotics vault. Drug storage areas should be independently securable.
- Provisions should be made for the safe storage of narcotics and controlled substances, quarantine drugs and hazardous drugs, flammables, and combustibles. Requirements for the handling and storage of narcotics and controlled substances are addressed in federal regulations, Canadian Pharmacists Association (CPhA) standards, and occupational health and safety regulations.
- Pharmacy refrigerators should be calibrated and alarmed either independently or centrally monitored as part of a total building security system; back-up refrigerators should be available in case of overstock or failure.
- Visual monitoring (glazing) should be provided between the sterile and chemotherapy preparation rooms, anterooms, and entry vestibule and adjacent pharmacy spaces for safety.
- Biological safety cabinets and other vented safety cabinets or hoods must be vented in accordance with CSA-Z317.2-10.
- Space provided for order entry, preparation, and distribution of pharmaceuticals must adhere to all relevant CPhA standards and guidelines.

Summary of Space Requirements

Summary of Future Space Needs

The schedule of accommodation for the central pharmacy is included in the Appendix. Corresponding room data sheets are provided under separate cover in the *Functional Program for the Stanton Territorial Hospital Renewal Project — Room Data Sheets*. Additional information on individual room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets.

A total of 330.7 component gross square metres (CGSM) will be required for the pharmacy by 2045 based on a total of 254.4 net square metres (NSM) tabulated in the the Schedule of Accommodation and using a net to gross space conversion factor of 1.30. It should be noted that the actual component gross square metres or “footprint” of the pharmacy will depend on the limitations of the existing building envelope and column/bay spacing, building expansion potential, and the efficiency of the architectural design.

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
8.00	Pharmacy					
8.01	PHARMACY					
8.01.01	PHM-1	Receiving and Breakout Room	1	12	12	Includes workstation with computer, printer, label printer, carts/shelving, and container recycling/trash bins.
8.01.02	OFF-1	Purchasing Workstation	1	9.3	9.3	Workstation and drug information resources; outpatient consulting to be performed in outpatient clinic or elsewhere in hospital.
8.01.03	PHM-2	Inventory Storage Room	1	22	22	Storage of drugs, packaging materials (bottles, vials, plastic medication bags, and office supplies); two refrigerator/ freezers. Will require 60 linear metres of moveable high density shelving and 10 three inch wide shelving units, 5 shelves high, that are fixed for general storage and include small bins.
8.01.04	PHM-3	Narcotics Vault	1	10	10	Secure (alarmed) room for drug storage.
8.01.05	PHM-4	Central Production Area	1	72	72	Four workstations, unit-dose packaging equipment, two refrigerators/ freezers, four computers, two printers, two label printers, emergency eye wash, and hand hygiene sink.
8.01.06	PHM-5	Sterile Compounding/Preparation Area: Entry Vestibule (Gowning)	1	10	10	Includes gowning supplies, soiled linen hamper, emergency eyewash, and hand hygiene sink.
8.01.07	PHM-6	Sterile Compounding/Preparation Area: Sterile Ante Area- ISO 8 - USP 797	1	30	30	Includes workstation, utility/supply carts; automatic door and a refrigerated pass-through to sterile prep and central production area; glazing should be provided to allow visual monitoring from adjacent pharmacy spaces for safety.
8.01.08	PHM-7	Sterile Compounding/Preparation Area: Sterile Preparation Room	1	10	10	Includes laminar flow hood/workstation and hand hygiene sink; refrigerated pass-through to sterile prep ante area is required. Postive pressure re-

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
8.01.09	PHM-8	Sterile Compounding/Preparation Area: Chemotherapy Prep Anteroom - ISO 7	1	10	10	Includes workstation and hand hygiene sink; refrigerated pass-through to chemotherapy prep room is required.
8.01.10	PHM-9	Sterile Compounding/Preparation Area: Chemotherapy Prep Room - ISO 7	1	10	10	Includes biosafety cabinet/workstation, and utility/storage carts; automated door and refrigerated pass-through to chemotherapy prep anteroom; glazing should be provided to allow visual monitoring from adjacent pharmacy spaces for safety. Negative Pressure Required.
8.01.11	PHM-10	Night Cupboard	1	10	10	Includes a Pyxis machine, refrigerator and additional secured storage (as required) for patient medications to be accessed after hours when they are not available in a specific patient care area. It should be located centrally to all Inpatient Units, Critical Care and Pharmacy, and near to the Medical Inpatient Unit.
8.01.12	OFF-1	Office Suite: Office (Standard)	1	9.3	9.3	Pharmacy manager.

8.01.17	HSK-1	Housekeeping Closet	1	4.6	4.6	Housekeeping cart, floor-level sink, and shelving for supplies. Accessible from outside corridor.
SUBTOTAL		PHARMACY			254.4	
TOTAL		Pharmacy			254.4	

Future Flexibility

The functional program and schedule of accommodation for the pharmacy were prepared based on the current CSA Z8000 standards. During schematic design, an emphasis should be placed on optimizing future flexibility and adaptability to accommodate changes in technology and automation through 2045. The central production area should be designed as a flexible, open area that can accommodate modular workstations or be reconfigured with automated, floor-mounted equipment in the future. Creative options for sharing the entry vestibule and anterooms for the sterile and chemotherapy preparation/compounding areas should also be considered.

Also, because the Extended Care Unit will eventually be relocated outside the hospital, an interim solution should be considered for preparing its multi-day “blister packs”— such as contracting this specific service to a retail pharmacy — in lieu of providing space which may not be needed once the extended care patients are no longer housed on-site.

By 2045, it is assumed that the STH pharmacy will either use an automated storage and dispensing system for pre-packaged unit-dose oral solids and liquids or will purchase pre-packaged doses. Interim expansion of the pharmacy production area should provide a large, open area that can flexibly accommodate both modular, manual workstations (short-term) or automated floor-mounted and/or table-top equipment (long-term).

9.0 Operational Support Services

Overview of Program Renewal for Operational Support Services

Operational support services to be located at Stanton Territorial Hospital (STH) include corporate services, hospital administration and support staff, allied health, medical affairs, medical travel, booking, health records, information and computer services, volunteers, and the breast cancer screening program. It is assumed at this time that financial services will remain off-site in leased space. In addition, health records, allied health, and volunteers are addressed in this section as well as other staff support space.

Administration and Staff Support: Functional Planning Assumptions

Current Situation

Operational support services addressed in this document are currently located both within the hospital — often fragmented — and outside the hospital as follows:

- Personnel who have corporate responsibilities within the Stanton Territorial Health Authority as well as other administrative and corporate support staff who play a critical role in the day-to-day operations of the hospital are currently located on the third floor of the hospital with the exception of the Medical Director and the Director of Medical Clinics and Services who both have offices on the first floor.
- Most of the front-line managers are currently located near their respective areas of responsibility.
- Medical affairs is located on the first floor of the hospital in a suite with five offices and a storage room that is adjacent to the main entrance/lobby.
- Workstations for transcriptionists are located in several areas at the hospital including two offices near health records on the third floor and one office in diagnostic imaging on the first floor.
- Computer services currently uses two offices on the third floor of the hospital (across from the elevators).
- The financial services and medical travel staff are currently located in leased space on the second floor of the Centre Ice Building (less than a kilometer from the hospital).
- The breast cancer screening program is based partially in the diagnostic imaging department at the hospital (technologist and program clerk) and partially in leased space on the first floor of the Diamond Plaza Building (program leader and booking clerk).

Planned Scope of Services

A central administrative office suite is planned to accommodate most of the administrative staff who require dedicated offices/workstations within the hospital — supported by one or more other “clusters” of offices within the hospital as required. The objective is to provide a flexible administrative work area where offices and workstations can be reassigned over time as staff positions and responsibilities change. A mix of private and shared offices, dedicated cubicles and open workstations, and open “touch-down” workstations for visiting or mobile staff is planned, along with shared support space.

Space will also be developed within the hospital to support Aboriginal/cultural services with the capacity to support cultural/kinship visits. Space for Aboriginal wellness — with a focus on healing practices, northern food, and traditional medicine — will be developed off-site as resources are made available.

Specific functional planning assumptions include:

- **Corporate services.** Personnel with corporate responsibilities within the Stanton Territorial Health Authority will be consolidated in an office suite within the hospital. Specific staff include the Chief Executive Officer, four directors, Coordinator for Communications Policy and Planning, Manager of Quality and Risk Management, and associated executive assistants.
- **Medical affairs** staff will continue to be responsible for physician contract administration, credentialing, and billing along with recruiting and managing the budget for physician services. The Medical Affairs Officers could either be co-located with other operational support services or located near the Provider Office Suite (see *Section 3.0 Ambulatory Care Centre*).
- **Patient care administrative support staff** include the front-line managers, infection control/occupational health, the safety (IC/OHS) coordinator, patient care coordinators, clinical education coordinator, and Aboriginal/cultural services. Specific planning assumptions include:
 - **Front-line managers.** Dedicated offices for front-line managers will continue to be located near their respective areas of responsibility — including the managers of maternal/child, critical care, medicine, surgery, psychiatry, information services, and clinical services. The managers, supervisors, and clinical coordinators for pharmacy, laboratory/diagnostic imaging, and facilities management should have dedicated offices within or near their respective departments.
 - **Infection control (IC) and occupational health and safety (OHS).** The IC/OHS coordinator will have dedicated office in the central office suite with access to an exam/consult room in the Ambulatory Care Centre (e.g., staff immunizations).
 - **Patient care coordinators (PCCs)** ensure that the patients' physical, emotional, psychosocial, spiritual and educational needs are met and are responsible for managing all hospital functions after regular business hours. The PCCs — with one assigned on each shift, seven days per week — will share an office.
 - **Staff education and development** will focus their on-site activity on mandatory education and “just in time” education and training particularly for nursing staff. An office within the hospital is planned for the Clinical Education Coordinator along with access to a classroom/conference room and secure storage space for audio-visual equipment. Occasional access to a touch-down or shared workstation will be required for nurse mentors and for proctoring examinations. All other general and/or scheduled staff education and training will occur in designated conference/classroom space within the hospital — including a large conference/classroom, smaller conference room, and a computer training laboratory.
 - **Aboriginal/cultural services** will provide cultural/kinship visits and language/interpreter services within the hospital. A language/cultural services representative will be located in the Customer Service Centre. A shared office will be provided in the central administrative office suite for the coordinator of the Aboriginal wellness program and the supervisor of the language/cultural workers. Other staff will share workstations throughout the hospital at the point of service or use a touch-down workstation in the central administrative office suite.
- **Medical travel.** The medical travel function will continue to be located off-site where it will be responsible for coordination of all aspects of medical travel provided by the Government of the Northwest Territories.
- **Booking office.** Trained clerical staff will schedule all elective patient procedures and appointments. Unit clerks or reception/registration clerks will perform simple bookings and arrange follow-up visits at the point of service or at the Customer Service Centre. Dedicated booking clerks will perform more complex bookings following established booking protocols. The booking clerks should be consolidated in a single location.

- **Transcription services** staff will be consolidated in a single location.
- **Breast cancer screening program** administrative staff will be relocated to the hospital; an shared office is planned for the breast cancer screening program leader and booking clerk within the Diagnostic Centre.
- **Computer/information services** will continue to plan, purchase, install, and maintain all communications and telecommunications equipment used in the STHA as well as maintain the network infrastructure. It will provide project management, develop small databases, support and maintain the STHA website, and conduct information system audits and investigate unauthorized computer use. All staff will be co-located in a single area within the hospital.
- **Financial services** will be responsible for financial planning, financial analysis and reporting, internal control and audit functions, accounts payable/receivable, treasury/cashier functions, and financial monitoring and administration of contracts and contribution agreements. It is assumed that financial services staff will remain outside the hospital in leased space.

Hours of Operation

General hours of operation for the central administrative office suite and other administrative office clusters will be from 0800 to 1600 hours, Monday to Friday. Access to the patient care coordinator office will be 24 hours per day, seven days per week.

Projected Staffing

The projected staffing (headcount) for administrative and operational support staff who require offices/workstations is shown in the following table.

Table 41 – Projected Staffing (Headcount) for Operational and Support Staff

		Headcount by Shift		
		Day	Evening	Night
<i>Corporate Services</i>	Chief Executive Officer	1	-	-
	Director (Operations, Patient Care, Medical Clinics)	3	-	-

	Total (Computer/Information Services)	6	-	-	
	Grand Total (Operational Support Staff)	49	1	1	

Health Records: Functional Planning Assumptions

Current Situation

Health records currently occupies 123 component gross square metres (CGSM) on the north side of the third floor. The space consists of a general work area (with a reception area, eight workstations, and active file storage), a sound-proofed office for the transcriptionist, a physician office/mail room (physician dictation, incomplete charts, and hospitalist test results), and a supervisor's office (with charts pending audit or transcription). There is additional space for record storage in the basement.

Planned Scope of Services

Specific service components within health records include: transcription; coding and abstracting; release of information; deficiency review and record close-out, and filing after discharge; audits; and statistical reporting and analysis.

The health records service will continue to be responsible for maintaining patient records and transcribing caregiver dictation to ensure that the information relating to a patient's care and treatment is complete. Information in the patient record will also continue to be provided to third parties — in accordance with the Access to Information and Protection of Privacy Act — and health information will be abstracted for clinical and operational activity reports as required.

Touch-down workstations are planned for hospitalists and other physicians to facilitate their review of their patients' health records and record completion. The touch-down workstations could be replaced at some point in the future with hand-held, wireless devices.

It is anticipated that paperless documentation, coding at the point of care, on-line abstracting and reporting, and voice recognition technology will have a significant impact on the health records service in the future. At such point in time, there may no longer be a need for the health records function to be located within the hospital. However, as part of STH facility renewal, space will continue to be provided for active hard-copy patient records which will need to be easily accessible to clinicians and health records staff until full electronic documentation is achieved. Hospital-based and off-site storage of archived records will also be required as part of the transition strategy.

Hours of Operation

General hours of operation for the health records service will be 7.5 hours per day, Monday to Friday with reduced hours during the Christmas holiday season. After hours, the patient care coordinators will be responsible for retrieving old charts and transporting them to the emergency department (ED) or inpatient units as required.

Projected Staffing

The projected health records staffing (headcount) is shown in the following table. The impact of the shift to an electronic health record on future staffing — and the timing — is difficult to estimate at this time. The current headcount is assumed as the status quo for facility planning purposes. However, the transcriptionist could be located outside the hospital.

Table 42 – Projected Staffing (Headcount) for Health Records

Position	Headcount by Shift		
	Day	Evening	Night
Manager (Information Services)	1	-	-
Supervisor (Health Information)	1	-	-
Health Records Tech	7	-	-
Health Records Clerk	2	-	-
Transcriptionist	6	-	-
Total (Health Records Staff)	17	-	-

Volunteers: Functional Planning Assumptions

Current Situation

Although a volunteer program previously existed at STH, there is no formal volunteer program today other than those volunteers that are part of the Auxiliary or the STH Foundation.

Planned Scope of Services

A volunteer program will be reestablished at the hospital providing volunteers with the opportunity to serve in a number of areas including:

- General greeting and way finding (Customer Service Centre)
- Emergency department
- Obstetrics inpatient unit
- Pediatric inpatient unit
- Psychiatric inpatient unit
- Medical day care area (chemotherapy)
- Surgery/day procedure area
- Pastoral visiting

Hours of Operation

Although the hours of operation of the volunteer program are yet to be determined, it is expected the volunteers will be at the hospital during the busier times of day and at a minimum from Monday to Friday in the morning and afternoon. Volunteer availability will also be a major consideration in determining the hours of service.

Projected Staffing

Given the size of STH, there could be over 200 individuals registered with the volunteer program (although most would be working limited hours). In addition, a full-time or part-time coordinator would be required. The proposed staffing model suggests a potential number of individuals (headcount) that may be working in the hospital during a typical weekday.

Table 43 – Projected Staffing (Headcount) for Volunteers

Position	Headcount by Shift		
	Day	Evening	Night
Volunteer Coordinator	1	-	-
General Greeting/Way finding (Main entrance)	2	-	-
Emergency Department	1	1	-
Obstetrics/Pediatrics/Psychiatric Units	-	1	-
Medical Day Care Unit (Chemotherapy)	1	-	-
Surgery/Day Procedure Unit	1	-	-
Pastoral Visiting (Chapel/Meditation Room)	1	-	-
Total (Volunteers)	7	2	-

Allied Health: Functional Planning Assumptions

Current Situation

Allied health providers at STH include occupational therapy, physiotherapy, social work, dietetics, and discharge planning. Social work and discharge planning offices are currently located on the third floor, while an office for the dietician is located on the main floor. Office space is provided for rehabilitation staff on the third floor as well as within the main rehabilitation treatment space on the main floor. Rehabilitation and dietetics are the only services that currently offer both inpatient and outpatient services.

Planned Scope of Services

Allied health providers will continue to be members of interdisciplinary teams practicing in a number of areas throughout the hospital. It is assumed that outpatient rehabilitation — currently occupying a significant amount of space in the east wing of the main floor — will be relocated outside the hospital. Allied health staff will use touch-down stations as necessary at the point of service. However, a “home base” office will be provided for the dietitians, social workers, and inpatient rehabilitation staff.

Functional planning assumptions relative to specific services are as follows:

- **Occupational therapy** will be integrated into the pediatric and psychiatric inpatient units. Occupational therapists may also have a role in the pre-admission and emergency follow-up clinics as well as other adult and pediatric clinics. All outpatient and community-based occupational therapy will be provided outside the hospital.
- **Physiotherapy** will be integrated into the medicine, surgery, obstetrics/gynecology, and pediatric inpatient units as well as in the emergency department and intensive care unit. Physiotherapists may also have a role in the pre-admission and emergency follow-up clinics as well as other adult and pediatric clinics. All outpatient and community-based physiotherapy will be provided outside the hospital.
- **Social work** will be integrated into the medicine, surgery, obstetrics/gynecology, and pediatric inpatient units as well as in the emergency department and intensive care unit. Social workers may also have a role in the Northern Women’s Health program, Northern Options for Women, and/or other outpatient clinics. The Yellowknife Health and Social Services Authority (YHSSA) will provide outpatient social work.
- **Dieticians**, like the physiotherapists and social workers, will be integrated into the medicine, surgery, obstetrics/gynecology, and pediatrics inpatient units as well as in the emergency department and intensive care unit. Dieticians may also have a role in the Northern Women’s Health Program and other adult and pediatric clinics. The dieticians will provide some one-on-one outpatient services and may conduct this service from their offices or as a scheduled appointment in the clinic area.
- **Discharge planning** will be integrated into the medicine, surgery, obstetrics/gynecology, and pediatric inpatient units.

Hours of Operation

General hours of operation for the hospital-based allied health staff will be from 0800 to 1600 hours, Monday to Friday, although a social worker will be on-call after hours.

Projected Staffing

The projected staffing (headcount) for allied health staff who will be working throughout the hospital has been incorporated into the functional programs for the individual service components. The total number of allied health providers (headcount) working in the hospital on a typical weekday is summarized as follows:

- Occupational therapists (3)
- Physiotherapists (3)
- Rehabilitation assistants (2)
- Social workers (2)
- Dieticians (2)
- Discharge planner (1)

Shared touch-down stations — to be used by allied health and other facility-based providers — are planned as part of the renewal of the core space on each inpatient unit. In addition, a multi-purpose room is planned for each inpatient unit that can be used for therapy that cannot be performed in the patient bedroom or hallway.

The following “home base” offices are planned for specific allied health services as follows:

- Shared office for the dietitians with convenient access to the Ambulatory Care.
- Shared office for the rehabilitation staff — physiotherapists, occupational therapists, and recreational therapist — with convenient access to an elevator to the inpatient units.
- Shared office for the social workers with access to all patient care areas of the hospital.

These offices should either be located in the central administrative office suite or in a “cluster” with other patient care administrative support offices.

Proposed Facility Reconfiguration and Key Spaces

Facility Reconfiguration Concept

A central administrative office suite is planned to consolidate the offices and workstations for most administrative and support staff who will be located within the hospital. Medical travel and the booking office could also be incorporated into this suite or clustered elsewhere in the hospital. Ideally, health records should be clustered with information and computer services. It is assumed that financial services will remain outside the hospital in leased space. All staff offices and workstations are sized according to the current GNWT standards based on the occupant’s position and responsibilities.

Staff washrooms should be planned to appropriately support the clustering of Operational Support Services.

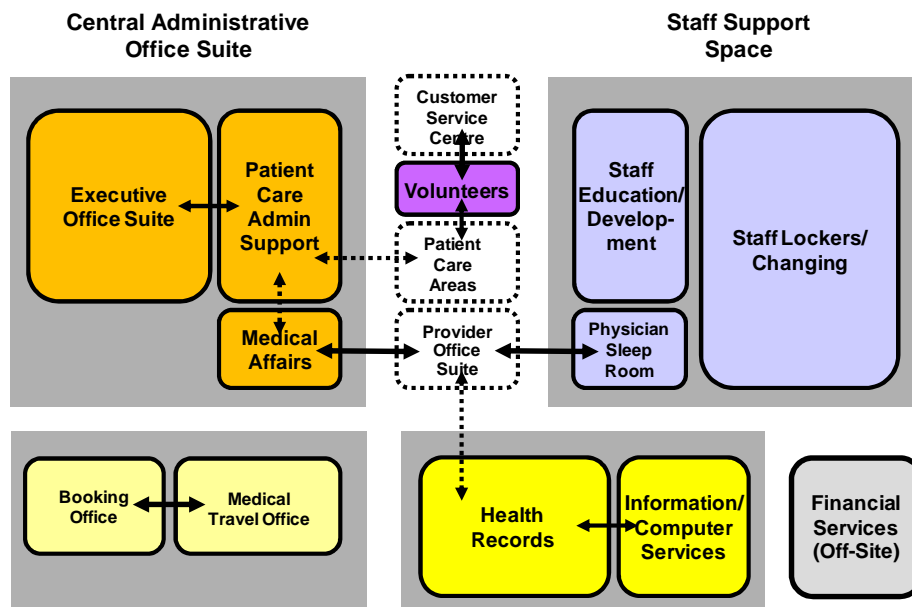

Major Facility Components

As shown in the functional diagram on the following page, operational support will include the following key functional components:

- **Executive Office Suite**
- **Patient Care Administrative Support**

- **Medical Affairs**
- **Booking Office**
- **Health Records**
- **Information/Computer Services**
- **Volunteers**
- **Other Staff Support Space**
- **Medical Travel Office (*located in off-site leased space*)**
- **Financial Services (*located in off-site leased space*)**

**Diagram 8 – Operational Support Services
Major Facility Components and Functional Adjacencies**

9.1 Executive Office Suite

The executive office suite will include executive offices and core support space:

- **Reception/Waiting Area** with seating for four persons, a coat rack and located adjacent to the reception/clerical staff workstations.
- **Workstations (4)** for a receptionist and 3 corporate executive assistants (within view of the suite entry and reception/waiting area).
- **Conference Room** with seating for eight to ten persons and teleconferencing capabilities.
- **Conference Room/Board Room** with seating for 20 to 25 persons and teleconferencing capabilities.
- **Office (Executive)** for the Chief Executive Officer.
- **Office (Director) (4)** for the Directors of operations, patient care, medical clinics and finance.

-
- **Workstation** for the coordinator of communications, policy and planning.
 - **Office (Standard)** for the manager of quality and risk management.
 - **Office Equipment Alcove** to provide space for a printer/copier/fax machine and associated office supplies.
 - **Kitchenette** with modular cabinetry, a sink, under-counter refrigerator, microwave oven, and a coffee maker.
 - **Staff Washroom** that is wheelchair accessible.

9.2 Patient Care Administrative Support

Offices and workstations for patient care administrative support staff will include:

- **Office (Standard)** for the IC/OHS coordinator. Includes a sink and small refrigerator.
- **Office (Standard)** that is shared with workstations for the two dietitians.
- **Office (Standard)** that is shared with workstations for the two social workers.
- **Office (Standard)** for the clinical education coordinator and co-located with the staff education facilities.
- **Office (Standard)** that is shared with workstations for the Aboriginal wellness coordinator and language/cultural services supervisor. Includes storage cabinet for educational materials.
- **Office** that is used as the “home base” office with 4 touchdown stations for the physiotherapists, occupational therapists and recreation therapist. Located on the surgical IP unit.
- **Workstation (2)** for clerks assisting the clinical education coordinator. Co-located with staff education facilities.
- **Workstation (2)** with partially-enclosed touch-down workstations for visiting staff. Co-located with staff education facilities.
- **Workstation** for the discharge planner.
- **Staff Washroom** that is wheelchair accessible.

9.3 Medical Affairs

Offices and workstations for the medical affairs staff include:

- **Office (Standard)** for the Senior Medical Affairs Officer.
- **Cubicles (2)** for the Medical Affairs Officers.
- **Office Equipment Alcove** for a printer/copier/fax machine and related equipment. To be shared between the customer service centre, medical affairs and booking office.
- **Kitchenette** consisting of a semi-enclosed alcove with sink/cabinetry, under counter refrigerator and microwave. To be shared with customer service centre, medical affairs and booking office.

9.4 Medical Travel Office

This function is currently located in leased space and will remain off-site. The following spaces are planned.

- **Office (Standard)** for the Medical Travel Manager.
- **Office/Cubicle** for the Medical Travel Coordinator.
- **Workstation** for the Senior Analyst.
- **Workstations (3)** for the Medical Travel Officers.

9.5 Booking Office

The booking office consists of:

- **Workstations (Carrel) (4)**

9.6 Health Records

Facility renewal of the health records service must be considered in light of its transition to an electronic environment (with limited hard-copy record storage and maintenance). Flexible space should be planned that can be adapted to another use at some point in the future. Specific spaces required prior to full-electronic conversion include:

- **Office (Standard) (2)** for the Manager and the Health Information Supervisor.
- **General Work Area** to include a reception area, 7 workstation for technicians, 3 clerical workstations, and active file storage. Also includes 610 linear metres of high density moveable shelving and 40 linear metres of fixed shelving for records in process and an office equipment alcove.
- **Physician Office/Records Room** to be used for physician dictation, holding of incomplete charts, and access to touch-down workstations for test results.
- **Archive Record Storage** to be located in the new Support Services Building.

9.7 Transcriptionist

This service will be re-located in off-site in leased space and will include:

- **Cubicles (6)** for use by the transcriptionists.
- **Office Equipment Alcove**
- **Kitchenette**

9.8 Information/Computer Services

This space should be co-located and could be located anywhere within the hospital although ideally be located near health records. Additional Information/Computer Services space is also planned for the Support Services Building. The following spaces are planned for the hospital:

-
- **Cubicles (2)** for the technical analysts.
 - **Benchspace and Storage** to be used as a work and storage area for the analysts.
 - **Server Room** that includes a touchdown station.

9.9 Volunteers

An office and a lounge for the volunteers is planned as follows:

- **Office (Standard)** for the volunteer coordinator.
- **Volunteer Lounge** that includes lockers and seating. No kitchen is included.

9.10 Other Staff Support Space

This area includes space for staff education and development, centralized male and female staff lockers/changing rooms and associated staff washrooms/showers (for staff that are not provided with lockers within their respective departments), and a physician sleep room. Specific spaces include:

- **Staff Education and Development** space includes:
 - **Conference Room** with seating for eight to ten persons.
 - **Conference/Classroom** with seating for up to 30 persons (designed with a folding partition to allow division into two smaller conference rooms as required). Includes video conference capability. This space will be used as the Emergency Operations Centre.
 - **Computer Laboratory** with eight to 12 computer workstations arranged in classroom style.
 - **Storage Room** for use by the computer laboratory for training materials.
 - **Staff Washroom (2)** to be used by conference room users.
 - **Storage Room/Equipment Alcove** to store audio/video equipment and contiguous with the large conference/classroom. Includes printer/copier/fax machine and other related equipment and supply storage.

Staff Education and Development Spaces should be clustered together, with convenient public access.

- **Female Staff Lockers/Changing Room** with an entry vestibule, 5 semi-enclosed changing cubicles with privacy curtains, and 180 full-width lockers.
- **Female Staff Washroom/Shower Area** that includes an entry vestibule, 3 handwashing sinks, 2 standard toilet stalls, 1 special toilet stall with wheelchair accessibility and 2 shower stalls.
- **Male Staff Lockers/Changing Room** with an entry vestibule, 2 semi-enclosed changing cubicles with privacy curtains and 90 full-width lockers.
- **Male Staff Washroom/Shower Area** that includes an entry vestibule, 2 handwashing sinks, 2 urinals, 1 special toilet stall with wheelchair accessibility and 2 shower stalls.
- **Physician Sleep Room** that consists of a quiet bedroom with a bed/cot and washroom/shower that is wheelchair accessible and contiguous with the bedroom.

Staff Support Lockers/Change Rooms should be located with convenient access close to the Staff Entry and Staff Parking.

9.11 Financial Services

Space has also been included in the Schedule of Accommodation for the financial services offices and workstations which are presumed to remain off-site in leased space:

- **Office (Standard) (2)** for the Controller/Finance and Budgeting/Forecasting Managers.
- **Office/Cubicle** for the Supervisor of Financial Operations.
- **Workstations (10)** with 2 dedicated for accounts payable, 3 for accounts receivable, 1 for accounting, 1 for collections, 2 for medical travel, and 1 for the finance clerk.

Facility Layout and Design Considerations

Key facility layout and design considerations pertaining the configuration of the operational support services at STH are listed below:

- Access to the server room (information/computer services) must be barrier free.
- The medical affairs staff offices/cubicles and the physician sleep room could be located within the Provider Office Suite.
- The health records transcription clerks could be located anywhere.
- The male and female lockers/changing areas should ideally be located on the main floor away from patient and public traffic. Access to the lockers/changing areas will be electronically controlled.
- Although the volunteers will be assisting at the main entrance/lobby area and Customer Service Centre, they will also need convenient access to all patient care areas.

Summary of Space Requirements

Summary of Future Space Needs

The schedule of accommodation for operational support services is included in the Appendix. Corresponding room data sheets are provided under separate cover in the *Functional Program for the Stanton Territorial Hospital Renewal Project – Room Data Sheets*. Additional information on individual room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets.

A total of 1,445.34 component gross square metres (CGSM) will be required for operational support services by the STHA by 2045 based on the net square metres (NSM) tabulated in the schedule of accommodation and using the following net to gross space conversion factors. It should be noted that the actual component gross square metres or “footprint” of the various operational support services will depend on the limitations of the existing building envelope and column/bay spacing, expansion potential, and the efficiency of the architectural design.

Financial services will require an additional 96.1 CGSM and medical travel will require 48.1 CGSM outside the hospital assuming they both remain in leased space.

**Table 44 – Operational Support Services
Summary of Future Space Requirements (2045)**

Facility Component	CNSM	Conversion Factor	CGSM
--------------------	------	-------------------	------

Executive Office Suite	173.8	1.30	225.9
Patient Care Administrative Support	91.7	1.30	119.2
Medical Affairs	30.6	1.30	39.8
Booking Office	14.8	1.30	19.2
Health Records	154.3	1.30	200.6
Information/Computer Services	60.5	1.30	78.7
Volunteers	25.1	1.30	32.6
Other Staff Support Space	414.2	1.30	538.5
Subtotal (Hospital-Based)	965.0	1.30	1,254.5
Medical Travel Office (located off-site in leased space)	-	1.30	-
Transcriptionist (re-located off-site in leased space)	35.9	1.3	46.7
Financial Services (located off-site in leased space)	-	1.30	-
Total	1,000.9	1.30	1,301.2

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
9.00	Operational Support Services					
9.01	EXECUTIVE OFFICE					
9.01.01	WTA-1	Reception/Waiting Area	1	6	6	Seating for four persons and coat rack; adjacent to the reception/clerical staff workstations.
9.01.02	WKS-2	Workstation	1	4.5	4.5	Workstation for the receptionist; adjacent to the reception/waiting area.
9.01.03	WKS-2	Workstation	3	4.5	13.5	Workstations for the corporate executive assistants; adjacent to the reception/waiting area.
9.01.04	CFR-1	Conference Room	1	20	20	Seating for eight to ten persons with teleconferencing capabilities.
9.01.05	CFR-2	Conference Room/Board Room	1	44	44	Seating for 20 to 25 persons with teleconferencing capabilities.
9.01.06	OFF-3	Office (Executive)	1	22.5	22.5	Chief executive officer.
9.01.07	OFF-2	Office (Director)	5	13.9	69.5	Directors of Operations, Patient Care, Medical Clinics, and Finance, and the Medical Director will be in the Executive Office.
9.01.08	WKS-2	Workstation	1	4.5	4.5	Coordinator (communications, policy, and planning).
9.01.09	OFF-1	Office (Standard)	1	9.3	9.3	Manager (quality and risk management).
9.01.10	OEQ-2	Office Equipment Alcove	1	6	6	Printer/copier/fax machine and other related equipment and supply storage.
9.01.11	KTC-1	Kitchenette	1	4.6	4.6	Semi-enclosed alcove with sink/cabinetry, under counter refrigerator, and microwave; could be combined with office equipment alcove.
9.01.12	WRS-2	Staff Washroom	1	4.6	4.6	Wheelchair accessible.
SUBTOTAL	EXECUTIVE OFFICE				209	
9.02	PATIENT CARE ADMINISTRATIVE SUPPORT					
9.02.01	OFF-1	Office (Standard)	1	12.6	12.6	Infection Control/Occupational Health and Safety (OHS) Coordinator; requires sink and small refrigerator. Decentralized.
9.02.02	OFF-4	Office (Shared by Dieticians)	1	9.3	9.3	Shared office with workstations for the two dieticians. Decentralized.
9.02.03	OFF-4	Office (Shared by Social Workers)	1	9.3	9.3	Shared office with workstations for the two social workers. Decentralized.

		Transcriptionists relocated to Off-Site Lease			36.2	
TOTAL		Operational Support			1077.3	

Future Flexibility

The functional program and schedule of accommodation for operational support services were prepared to optimize future flexibility and adaptability to accommodate changes in staffing roles and responsibilities as medical practice, technology, and linkages to other healthcare providers continue to evolve through 2045. In particular, co-location of corporate and patient administrative support staff in a central administrative office suite will facilitate the reassignment of offices and workstations as staffing patterns change.

10.0 Facility Support Services

Overview of Program Renewal for Facility Support Services

Facility support services currently located at Stanton Territorial Hospital (STH) include materials management, biomedical engineering, housekeeping, facility operations and maintenance, food and nutrition, central sterile reprocessing (CSR), and the laundry. Several of these functions — currently located within the hospital — have been identified as potential candidates for relocation outside the hospital in a separate on-site Support Services Building to accommodate the renewal of clinical services within the hospital. These include materials management (warehousing), the laundry, and biomedical engineering. All of these services are currently located on the west side of the main floor.

10.1 Supply Receiving and Staging

Current Situation

A service entrance with a loading bay is located at the northwest corner of the hospital building with access via a dedicated service drive. Materials management space includes a receiving/decasing area (directly inside the loading door) that leads to a large storage room (approximately 247 net square metres) with an adjacent office suite. Biomedical engineering currently occupies an office and a workshop adjacent to the materials management area.

Planned Scope of Services

As part of program renewal, the relocation of bulk storage outside the hospital is being considered. A supply receiving and staging area will be maintained within the hospital with appropriate space and staff to manage and stage incoming and outgoing supplies, equipment, and materials that support the day-to-day hospital operations. New equipment will be received from the biomedical engineering area in the on-site Support Services Building and existing hospital equipment may also be sent out and returned after repair from this facility.

Hours of Operation

The supply receiving and staging area will be staffed from 0800 to 2200 hours, seven days per week.

Projected Staffing

The projected staffing (headcount) for the supply receiving and staging function is shown in the table below.

Table 45 – Projected Staffing (Headcount) for Supply Receiving and Staging

Position	Headcount by Shift		
	Day	Evening	Night
Supervisor	1	-	-
Supply Attendant	3	2	-
Biomedical Engineer	1	-	-
Total (Supply Receiving and Staging)	5	2	-

Major Facility Components

Supply receiving and staging will include a staging/breakout area, space for staging clean incoming carts and soiled outgoing carts, back-up storage for medical supplies, workstations for the supervisor and attendants, and a satellite office/work area for the biomedical engineer. The following spaces are planned:

- **Staging/Breakout Area** that is immediately inside the loading dock/service bay; the existing space could be maintained at its current size and configuration.
- **Office/Mail room** with a workstation for the supervisor, storage space for packaging supplies, and an alcove for incoming mail.
- **Biomedical Engineering Satellite** with an office/work area for the biomedical engineer and anesthesia work space. Located adjacent to renal unit and surgery.
- **Biomedical Engineering Storage** to be used as a maintenance storage room and located adjacent to the renal unit and surgery.
- **Mobile Equipment Alcove** to be used for staging mobile equipment and includes electrical support.
- **Workstation** to be shared by the supply attendants.
- **Medical Supply Storage Room** to be accessed during off hours for backup linen and medical supplies in the event that decentralized supply carts are depleted.
- **Clean Cart Staging Area** with adequate space to accommodate 12 medical supply exchange carts, two top-up carts, and nine clean case carts; it is assumed that delivery of the 12 clean linen carts will be scheduled at a different time.
- **Soiled Cart Staging Area** with adequate space to accommodate four soiled linen (hamper) carts and nine soiled case carts.
- **Trash Alcove** with bins for the temporary holding of trash and recyclables.
- **Hand Hygiene Sink** to be used by the supply attendants and biomedical engineer.
- **Male Staff Washroom** that includes two fixtures to be shared by all facility support services.
- **Female Staff Washroom** that includes two fixtures to be shared by all facility support services.

10.2 Housekeeping

Current Situation

The housekeeping service at STH is currently a contract service and the contractor is responsible for cleaning all areas of the hospital. An office and a work area is located on the second floor.

Planned Scope of Services

It is anticipated that the housekeeping service will continue to be provided as a contract service with no changes to the current scope of services given the overall size of the hospital renewal project and the relative proportion of clinical space.

Hours of Operation

The housekeeping service is provided 24 hours per day, seven days per week, 365 days per year.

Projected Staffing

A manager and approximately eight housekeepers would typically be on-site during the primary weekday shift.

Major Facility Components

Housekeeping should be relocated from the second floor to the main floor. Housekeeping's former office and work area (currently occupied by biomedical engineering) could be re-occupied and expanded as necessary. This space already has a floor-level mop sink and other features required by this service. Decentralized housekeeping closets — with space for a housekeeping cart, supplies, and a mop sink — are planned for every 650 gross square metres throughout the hospital as well as within specific departments/service components, as follows:

- **Office/Cubicle**
- **Work Area and Equipment Storage**
- **Equipment/Cart Washing Room** that includes a hose with spray nozzle, utility sink and floor drain.

10.3 Facility Maintenance and Operations

Current Situation

The facility operations and maintenance function is located in the northwest corner of the main floor. Two offices, a workshop area, and storage room are provided in this location. There are adjacent rooms for the storage of medical gases, yard equipment, and trash with access both from inside the building and outside. Space is also used in a below-grade crawlspace at STH. Some miscellaneous space is leased outside of the hospital including one heated area and one un-heated area.

The facility operations and maintenance function ensures the safe and continuous operation of the physical plant and its equipment and systems. Other responsibilities include building safety and environmental monitoring, energy management and conservation, chemical testing and treatment, inventory control, and minor construction and renovation. In addition, facility operations and maintenance manages a number of service contracts and provides assistance to the occupational therapists with the construction of patient fittings.

Hours of Operation

Planned hours of operation are as follows:

- Facilities maintenance and operations (DPWS) will provide 24/7 coverage — the hours that staff are available on site will vary based on the final facility configuration and technical/mechanical design.
- Property and program services (STHA) will be staffed from 0700 to 2300 hours, Monday to Friday, with after hours and weekend call-back.

Projected Staffing

The preliminary staffing (headcount) for the FM&O and PPS components is shown in the following table.

Table 46 – Projected Staffing (Headcount) for FM & O/PPS

Position	Headcount by Shift		
	Day	Evening	Night
Manager/Supervisor (Located at DPWS)	1	-	-
Engineer Tech	3	1	1
Total (FM&O Staff)	4	1	1
Facility Manager	1	-	-
Administrative Assistant	1	-	-
Engineer Tech	2	1	-
Total (PPS Staff)	4	1	-

Major Facility Components

The newly-organized DPWS Facility Maintenance and Operations (FM&O) staff could occupy the current FMO space. Additional space within the hospital will be created for the PWS Property and Program Services (PPS) staff as follows:

- **Office/Administration Area** where the existing room size/configuration is to be retained.
- **General Storage** where the existing room size/configuration is to be retained.
- **Medical Gas Storage** where the existing room size/configuration is to be retained.
- **Yard Storage** where the existing room size/configuration is to be retained.
- **Trash Holding** in addition to the biomed waste area provided in PPS.
- **Office** where the existing room size/configuration is to be retained.
- **Carpentry Shop** where the existing room size/configuration is to be retained.
- **Work Room** where the existing room size/configuration is to be retained.

10.4 Property and Program Services

Major Facility Components

This new service has the following spaces planned:

- **Office** for the PPS facility manager.
- **Workstation** for the administrative assistant and located adjacent to the facility manager office.
- **Workstation (2)** that are open and for use by the PPS staff.
- **Workshop Area** that includes bench work space.
- **Storage Room** for the miscellaneous storage of supplies and equipment.

-
- **Trash Holding** with exterior access required.
 - **Biomedical Waste Holding** for the staging of biomedical waste shipping containers. Requires personal protection and equipment (PPE), eye wash stations and an exterior access door.

10.5 Food Services

Current Situation

The cafeteria, kitchen, and associated dishwashing and food storage space are located on the southwest side of the main floor. Although the entrance to the cafeteria is relatively close to the main entrance lobby, outpatients and visitors must travel a circuitous route.

Planned Scope of Services

The food service will continue to operate as a service contract with the vendor responsible for providing safe, effective, efficient, and professional dietary and patient food and cafeteria services. Specific service components include:

- Cafeteria services for patients, families, staff, and visitors.
- Inpatient meals and snacks.
- Outpatient meals in selected areas — ED, Day Procedure Unit, and the Northern Women's Health Program.
- Non-patient trays to family members or support persons.
- In-house catering.
- Meals-on-wheels food preparation.
- Vending machine stocking.
- Clinical dietetics.

Hours of Operation

Dietary services will be staffed from 0600 to 2000 hours, seven days per week. The cafeteria will be open from 0730 to 1800 hours, Monday through Friday, and from 0930 to 1800 hours on weekends. The clinical nutrition service will be staffed from 0900 to 1700 hours, Monday through Friday.

Projected Staffing

The staffing pattern for the food service will be determined by the contract service provider.

Major Facility Components

The following spaces reflect the changes in space allocation for the STH food services department:

- **Office (Standard)** for the NFS Manager. Access from the outside corridor and views of the kitchen work area are required.
- **Office (Standard)** for the General Manager. Access from the outside corridor and views of the kitchen work area are required.
- **Workstation (2)** for NFS staff and contiguous with the kitchen work areas.

-
- **Receiving and Break-down** located adjacent to the Delivery Entrance.
 - **Frozen Storage** with a walk-in freezer and HD shelving.
 - **Cold Storage** with walk-in coolers and HD shelving.
 - **Dry Storage** with high density shelving.
 - **Retail Storage** for quick access to items for server and vending areas.
 - **Kitchen** that includes areas for cold prep, bake/dessert prep, bake/roast and cooking areas.
 - **Meal Assembly Area** for inpatient meal assembly.
 - **Meal Cart Staging Area**
 - **Warewashing**
 - **Cart Cleaning**
 - **Janitorial and Chemical Storage**
 - **Servery Area** that includes tray storage, cashier stations and self-prep area.
 - **Vending Machines** located outside of server for after-hours access.
 - **Dining Area**

10.6 Medical Device Reprocessing (MDR)

Current Situation

The central sterile reprocessing (CSR) function is currently located on the main floor of the hospital contiguous with the laundry and abutting the emergency department.

Equipment Planning

The location and boundaries of space assigned to the new MDR have been confirmed and will be developed on the floor above the Operating rooms.

Planning for the equipment to be installed within the new MDR is guided by several factors:

- The age, condition and technological currency of existing equipment
- Productive capacity for existing and long term future workload, based on the approved Functional Program
- Centralization of all device reprocessing within the new space
- Continuity of service to all end user departments during renovations and occupancy of the new space
- Selection of equipment that is available with operating configurations for either electrical or mechanical services
- Quantities of each major reprocessing equipment type to ensure that continuity of service can be maintained during downtime for both scheduled maintenance and unexpected failure repairs.

Equipment planning commenced with development of a list and evaluation of existing equipment. The predicted quality of that equipment is based on an estimated 3-5 year future date of occupancy of new MDR.

The majority of existing equipment is either obsolete, inflexible with respect to servicing options, not capable

of supplying increased productivity or would present significant difficulties and costs to de-install and re-install.

The Existing Inventory and Planned Inventory reports provide the details.

The Planned Inventory report recommends the quantities and estimated purchase costs of each major item of reprocessing equipment to be installed for date of occupancy, as well as future quantities as required to support future increased workloads.

Space design planning for the MDR includes allocations for one future washer/disinfector, one steam sterilizer and one low temperature gas sterilizer.

Space Planning

Functional layout of the new department is based on compliance with the CSA standards guidelines contained within CSA Z8000-11 and CSA Z314.8-08.

The basic principles followed are that the department is organized to have a work flow starting with:

- the receiving of soiled material,
- followed by disassembly and gross cleaning of all items,
- progressing to automated washing/low level disinfection,
- re-assembly and packaging for either high level disinfection or sterilization,
- clean/sterile storage
- and finally, assembly of carts for distribution to end user departments.

There must be no back flow during the gross cleaning, automated washing/disinfection, sterilization and storage.

Cross flow of reprocessing activity traffic must be minimized and must ensure that there is no risk of re-infection.

Space directly above the existing operating theatres and sterile core has been avoided when planning the locations of equipment requiring drainage and heavy utilization of mechanical services E.g. high pressure steam. The largest item of equipment, high speed cart washer, has been located so that it can be installed in a slab depression allowing carts to be loaded without the requirement for a ramp which presents additional working space requirement and the potential for work related stress injury.

Space provision has been included to allow for options for loading and unloading of the washer/disinfectors, ranging from fully manual to fully automated.

In addition to the current operation, centralization of Diagnostic Imaging and Obstetrics/gynaecology, intra-cavitary ultrasound probe reprocessing has been incorporated, with a recommendation for change from the use of aldehyde wet disinfectant to low temperature gas vapor methodology.

Space and equipment for potential increases in the G.I endoscopy program have been accounted for.

Space has been assigned for storage of disinfected or sterilized items, likely requiring a high density system.

Design standards for surgical reprocessor PPE gowning/ungowning, dedicated hand wash facilities etc. have been included.

Major Facility Components

Clustered sub-units within the MDR unit includes a decontamination area, a scope processing suite, a preparation/packaging/sterilization zone, sterile stores and associated support space. The following spaces have been planned for MDR department:

- **Decontamination Area**
 - **Soiled Dumbwaiter** from the surgical department.
 - **Receiving/Case Cart Holding** with the capacity for nine soiled case carts per day.
 - **Work Area** that includes sinks for gross cleaning and an ultrasonic cleaner.
 - **Equipment Processing Area** with tables for sorting and a loading area for three washer/disinfectors.
 - **Cart Wash Area**
 - **Backup Manual Cart Wash**
 - **Chemical Storage**
 - **Personnel Facilities** including male and female change facilities that can be accessed from the corridor into the decontamination area.

- **Scope Processing Suite**
 - **Sterile Processing Room** for scope sterilization and probe equipment with a pass-through sterile drying cabinet to the prep/pack area.

- **Preparation/Packaging/Sterilization**
 - **Work Area** that includes unloading areas for washer/disinfectors, equipment counter/storage space and hi-lo prep/pack workstations.
 - **Clean Equipment Area** with a worksurface counter and undercounter storage area.
 - **Steam Sterilizers** with maintenance access off the outside corridor.
 - **Manual Pass Through** for access back to the decontamination side.
 - **Low Temperature Sterilization Area** for low temp sterilisers.
 - **Personnel Facilities** including male and female change facilities that can be accessed from the corridor into the clean side.

- **Sterile Stores**
 - **Clean Dumbwaiter** for return to the surgical department.
 - **Case Cart Holding**
 - **Sterile Stores**

- **Additional Support Spaces**
 - **Office (Standard)** for the manager/supervisor.
 - **Tech Workstation**
 - **MDR Staff Lounge**

-
- **Staff Washroom**
 - **Water Treatment Area** that is accessible from the outside corridor.
 - **Housekeeping**

10.7 Support Services Building

The Support Services Building will be located in an integrated building or buildings, on the existing Stanton Territorial Hospital Site. Services have been grouped into functional units including Shared Support Services, Laundry and Linen Services, Materials Management, Computer/Information Services, Biomedical Engineering, Collaborative Services and Health Records.

Major Facility Components

The allocation of space for the off-site Support Services Building has been planned as follows:

- **Facility Entry & Shared Support Services**
 - **Workstation** for reception/clerical support.
 - **Workstation (3)** for the purchasing officers and located adjacent to the conference/meeting room.
 - **Workstation (4)** with 1 for the forms/contracts administrator, 1 for the transport scheduler/coordinator and 2 for accounts payable clerks.
 - **Office** for Materials Management and Support Services.
 - **Office Equipment Alcove** with a printer/copier/fax machine and other related equipment and supply storage.
 - **Conference/Meeting Room (2)** with a folding partition
 - **Washroom** for use by visitors/conference room users; must be barrier free.
 - **Staff Lounge** with seating for up to 20 people and includes a kitchenette.
 - **Housekeeping Closet/Storage** for the staging of a housekeeping cart and mop cleaning. Includes a floor-level sink.
 - **Mail Room**
- **Laundry and Linen Services**
 - **Office** for the unit supervisor and views into the laundry room.
 - **Soiled Holding** located adjacent to the loading dock.
 - **Soiled Linen Sorting** with a sink and waste disposal for gross cleaning.
 - **Washers Area** that includes a minimum 900mm service access area to rear of machines and trench.
 - **Dryers Area** that includes a minimum 900mm services access area to rear of machines.
 - **Folding Area** sized for inclusion of an automated folding machine.
 - **Sewing and Repair Area**
 - **Clean Holding**
 - **Drop-off/Pick-up Zone** located adjacent to the loading dock.
 - **Cart Cleaning**
 - **Chemical Storage**

- **Materials Management**
 - **Workstations (2)** that are shared for the distribution officers.
 - **Workstations (3)** with 1 for the inventory control clerk and 2 for the stores keepers.
 - **Warehouse Storage** consisting of an open area.
 - **Clean & Sterile Supply** with rack shelving of a height of 14 feet.
 - **Staging Area (2)** located adjacent to the shipping/receiving docks.
 - **Trash/Recycling Room** for the cardboard baler.
 - **Workroom**
 - **Barcode Scanning Station (2)**

- **Computer/Information Services**
 - **Workstations (5)** for the technical analysts, a system integration technician and an information support worker.
 - **Benchspace (5)**
 - **Workstation** for the technical support officer.
 - **Storage**
 - **Office** for the unit manager.

- **Biomedical Engineering**
 - **Workstations (4)**
 - **Benchspace (4)**
 - **Storage**
 - **Office** for the unit manager.

- **Collaborative Services**
 - **Office (2)**

- **Health Records**
 - **Workstation**

Proposed Facility Reconfiguration and Key Spaces

Facility Reconfiguration Concept

Preliminary assumptions have been developed which will be tested as part of the future occupancy planning. Current functional planning assumptions include:

- The laundry, bulk storage, and biomedical engineering will be moved outside the hospital to a separate on-site Support Services Building.
- The food service will continue to occupy its existing “footprint” on the main floor — with equipment replacement and facility renewal (and time frame) to be determined by STHA and the designated

contract provider. However, the existing space may be relocated or reconfigured within the hospital as determined during block planning and based on technical renewal requirements.

- There is a dietician office on the main floor next to the elevators. This workstation could be relocated.
- It is assumed that the current space occupied by facility operations and maintenance will be used by FM&O.
- Additional space is planned within the hospital for PPS as a “placeholder” pending further STHA/PWS discussions.
- Biomedical engineering is currently occupying space on the main floor that was originally designed for housekeeping; housekeeping could re-occupy this space if it is vacated by biomedical engineering.

Facility Layout and Design Considerations

Key facility layout and design considerations pertaining the configuration of the facility support services at STH are listed below:

- Direct access is required from the service dock to the receiving/breakout area with the office/mail room and cart staging areas immediately adjacent.
- Convenient access between the cart staging areas and the Biomedical Engineering Satellite work area is required to facilitate the movement of carts and equipment.
- Access should be provided to the backup medical supply storage room for staff who may need to access this room after hours.
- Convenient work flow should be provided between the receiving area and the Biomedical Engineering Satellite and Property and Program Services work areas for incoming/outgoing equipment.
- Access is needed to the Pharmacy Receiving and Breakout Room so that drug shipments can be immediately secured within the Pharmacy, upon arrival.
- Incoming food deliveries will be transported directly to the appropriate storage area within the kitchen.
- Direct access to the cafeteria entrance and vending area should be provided from the main entrance lobby.
- Direct access is needed between the Medical Device Reprocessing area and the surgery suite — either horizontally or vertically via an elevator (or dumbwaiter if the Surgery and Special Procedures remains in the current location in the existing building).
- The biomedical waste holding room that was constructed on the north side of the west wing could be preserved unless main floor expansion options are considered during schematic design. However, convenient access for transport vehicles needs to be provided.

Summary of Space Requirements

Summary of Future Space Needs

The schedule of accommodation for facility support services that remain within the hospital is included in the Appendix. Corresponding room data sheets are provided under separate cover in the *Functional Program for the Stanton Territorial Hospital Renewal Project — Room Data Sheets*. Additional information on individual

room functions, required adjacencies, special design features, and furniture, fixtures, and equipment are provided on the room data sheets.

A total of 1,990.6 component gross square metres (CGSM) will be required for facility support services at STH by 2045 based on the net square metres (NSM) tabulated in the schedule of accommodation and using the following net to gross space conversion factors. Another 1,461.9 CGSM is estimated for the new Support Services Building to house materials management bulk storage, the laundry/linen service, biomedical engineering, record storage, and collaborative services. It should be noted that the actual component gross square metres or “footprint” of the various facility support services will depend on the limitations of the existing building envelope and column/bay spacing, building expansion potential, and the efficiency of the architectural design.

**Table 47 – Facility Support Services
Summary of Future Space Needs**

Facility Component	CNSM	Conversion Factor	CGSM
10.1 Supply Receiving and Staging	162.6	1.25	203.3
10.2 Housekeeping	43.3	1.25	54.1
10.3 Facility Maintenance and Operations	172.5	1.25	215.6
10.4 Property and Program Services	99.5	1.30	129.4
10.5 Food Service	578.0	1.25	722.5
10.6 Medical Device Reprocessing	532.6	1.25	665.8
Subtotal (Hospital-Based)	1,588.5	1.25	1,990.6
10.7 Support Services Building	1169.5	1.25	1,461.9
Total (On-Site)			3,452.5

Space Table

Refer to the table of Functional Space Requirements on the following page:

ROOM ID	ROOM TYPE	ROOM NAME	No. of ROOMS	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA
10.00	Facility Support Spaces					
10.01	SUPPLY RECEIVING AND STAGING					
						Contiguous with Service Entrance/Loading Dock
10.01.01	FSS-9	Staging/Breakout Area	1	18	18	Existing size/configuration.
10.01.02	FSS-1	Office/Mail Room	1	9.5	9.5	Office with supervisor workstation and mail alcove; adjacent to cart staging space.
10.01.03	FSS-2	Biomedical Engineering Satellite - Renal	1	26	26	Biomedical engineering computer workstation and bench work space. Located adjacent to renal unit and surgery. Includes storage.
10.01.04	FSS-2	Biomedical Engineering Satellite - Surgical	1	18	18	Biomedical engineering computer workstation and bench work space. Located adjacent to renal unit and surgery. Includes storage. Requires access from the sub sterile corridor.
10.01.05	MEA-2	Mobile Equipment Alcove	1	4.6	4.6	Staging space for mobile equipment with electrical support.
10.01.06	WKS-1	Workstation	1	3.7	3.7	Shared workstation for the supply attendants.
10.01.07	FSS-3	Medical Supply Storage Room	1	15	15	Secured room for backup clean supply/linen storage; could be located in the surgery suite.
10.01.08	FSS-4	Clean Cart Staging Area	1	23	23	Staging space for 12 medical supply exchange carts, two top-up carts, and nine clean case carts; delivery of 12 clean linen carts will be scheduled at a different time.
10.01.09	FSS-5	Soiled Cart Staging Area	1	13	13	Staging space for four soiled linen (hamper) carts and nine soiled case carts.
10.01.10	HHS-1	Hand Hygiene Sink	1	1	1	Near office/work areas.
10.01.11	FSS-6	Trash Alcove	1	2.8	2.8	Container recycling and trash bins.
10.01.12	WRS-2	Male Staff Washroom	1	14	14	Two fixtures to be shared by all facility support services.
10.01.13	WRS-2	Female Staff Washroom	1	14	14	Two fixtures to be shared by all facility support services.

SUBTOTAL		SUPPORT SERVICES BUILDING			1083.7	
TOTAL		Facility Support Spaces			2672.2	

Future Flexibility

As part of program renewal, key facility support services have been identified for potential relocation outside the hospital in a new Support Services Building — including materials management (bulk storage/warehousing), biomedical engineering, and the laundry. If the new Support Services Building could have a physical connection to the hospital, some of the space estimated for supply receiving and staging in the hospital could be reduced or eliminated.

**Government of the Northwest Territories
Stanton Territorial Health Authority**

Stanton Territorial Hospital Project

ATTACHMENT 1 – Room Data Sheets

0.0 Organization and Format of the Room Data Sheets

0.1 Overview

Room data sheets (RDS) are provided for all rooms/areas addressed in the Schedule of Accommodation (Appendix) of the *Functional Program for the Stanton Territorial Hospital Renewal Project — Volume I: Hospital-Based Programs*. The sections of this report align with the organization of spaces in the Schedule of Accommodation as follows:

- **Patient care spaces (generic)**
- **Clinical support spaces (generic)**
- **Administrative support spaces (generic)**
- **Unique service-specific spaces**

A complete listing of the room data sheets (for each section) is provided at the beginning of the section.

The Canadian Standards Association (CSA) issued the Z8000-11 standard for Canadian Health Care Facilities in September 2011 — referred to as Z8000. Functional service requirements specified in Z8000 were considered a significant guide in the establishment of key space requirements, key relationships and dependences, and minimum room sizes in the *Functional Program for the Stanton Territorial Hospital Renewal Project*.

Although the room data sheets provide architectural and engineering guidelines for each programmed room or area, they may need to be adjusted by the design architect during the subsequent Design Development phases.

Z8000 includes specific design and technical requirements for various functional services within a hospital. It is assumed that these must be considered during the design process along with infection prevention and control (Clause 7.5), occupational and health safety (Clause 7.6), safety and security (Clause 7.7), and accessibility (Clause 7.8).

Additional standards that are relevant to the functional program include:

- **Special Requirements for Heating, Ventilation, and Air Conditioning (HVAC) Systems in Health Care Facilities (Z317.2-10, February 2010)**. Ventilation requirements, relative pressurization, and special design criteria are specified in Table 1 (page 47) based on the area classification designated on the Room Data Sheet as per definitions provided in Z317.2-10.
- **Electrical Safety and Essential Electrical Systems in Health Care Facilities (Z32-09, December 2009)**. Quantities of receptacles and data outlets should be distributed patient care rooms as required to support functionality and convenient use of equipment by Facility Users and in accordance with Good Industry Practice and as required by other provisions of the Agreement. These quantities exceed the minimum number of electrical receptacles required for each room/area are specified in Table 6 (Page 33) according to the expected intensity of care designated on the Room Data Sheet (as per the definitions provided in Z32-09).

Quantities of electrical receptacles outside patient care areas will be determined by the design architect and electrical engineering consultant based on the anticipated equipment for each room.

- **Illumination Systems in Health Care Facilities (Z317.5-98 , March 1998).** Minimum general light levels and task light levels of illumination are specified for patient-care and other areas in Table 1 (page 22), minimum illuminating levels for safety in non-patient care areas are specified in Table 2 (page 27), and minimum illuminances on tasks for emergency service is specified in Table 3 (page 27).
- **Technical Design Requirements for Health Care Facilities or “The Blue Book” (Government of Alberta, July 2009).** Sound transmission class (STC) requirements for various room types can be found in Table 5.1, with amendments by the Government of the Northwest Territories Department of Public Works and Services to reflect northern practices.
- **Government of the Northwest Territories – Office Space Standards and Guidelines (Revised – February 2003).** This document outlines sizes for offices, shared workspaces and meeting rooms.

Compliance with applicable building codes, fire regulations, and other relevant standards are the responsibility of the project architects and engineers.

0.2 Glossary of Terms

Specific terms used in this document include the following. An extensive list of definitions and abbreviations can be found in Z8000-11 (page 10).

Net square metres (NSM): The inside wall-to-wall dimensions within a room or area that represents the actual usable space.

Component gross square metres (CGSM): The “footprint” of each department or specific facility component including net areas, internal circulation, partitions, building structure, and small mechanical shafts. CGSM includes all individual net areas required by the departmental functions, circulation space necessary to link together the net spaces, and the area occupied by internal walls. Component gross area is measured to the inside face of exterior walls and to the centre line of partitions adjoining other components or general circulation space. It excludes all engineering spaces and interdepartmental circulation elements such as main corridors, stairways, elevators, and dumbwaiters.

Net to component gross space factor: A factor which, when multiplied by the net area, estimates the component gross square metres (BGSM). The primary purpose of this factor is to assist in the translation of the net space into an estimate of building gross square metres for use in the preparation of block diagrams and schematic drawings. At the same time that the opportunities and functional requirements of the preliminary Block Planning Study were incorporated into a new iteration of the Functional Program, a Technical Status Evaluation of the Hospital examined and presented another set of requirements. These two studies were combined into more detailed Schematic Block Planning to develop options for review by the Project Work Group and Steering Committee. The selected option was advanced into Schematic Design, which led to another iteration of the Functional Program. This document is the final update to the *Functional Program for the Stanton Territorial Hospital Renewal Project*.

0.3 Room/Area Features

Features of each room or area are grouped into the following categories:

- **General**
- **Communications and Security**

- **Mechanical**
- **Electrical**
- **Finishes**

The application of these categories has been prepared in this report to aid in Schematic Planning. The room data sheets should be further developed as more detailed occupancy planning, electrical, mechanical, FF&E, and finish requirements are developed in subsequent stages of design.

General

General features for each room or area are noted as follows:

- **Typical occupancy.** The average number of people occupying the space is indicated with minimum to maximum range where applicable.
- **Occupancy intensity.** This is indicated as:
 - **Routinely occupied**
 - **Occasionally occupied**
 - **Intermittent** (space accessed only as needed)
- **Utilization.** The typical hours per day or week that the space will be occupied are indicated as:
 - **Day shift** (Monday through Friday)
 - **Building hours** (including weekday evening or weekend hours as noted in the operational plan)
 - **24/7** (on-site or on-call staff)
- **Access.** Requirements for access to the specific room/area are noted as:
 - **Standard** (ambulatory access only)
 - **Wheelchair**
 - **Stretcher**
- **Windows:** The placement of exterior windows in the space is noted as:
 - **Required**
 - **Desirable**
 - **Undesirable** (should not be provided)
 - **Unnecessary** (would not hinder use of the space if provided)

Communications and Security

The need for specific communications and security requirements is indicated with a “Yes” or “No” for the following:

- **Telephone**
- **Emergency call**
- **Intercom (two-way between selected areas or building-wide)**
- **Data**
- **Wireless**
- **CCTV (closed circuit television)**
- **Security lock (the need to secure the space is noted)**

Communications and security systems will be considered holistically as the Information Services plan is developed.

Mechanical

Specific mechanical requirements are noted as follows:

- **HVAC Area Classification** (per Z317.2-10) is noted as:
 - **Type I** — a patient care area where the invasiveness of procedures, the level of risk of morbidity and mortality to patients, and the level of risk of adverse outcomes to care providers necessitate more stringent HVAC and environmental requirements.
 - **Type II** — a patient care area or an area that is intended for the provision of services that provide direct support to patient care areas (e.g., lab, central supply).
 - **Type III** — all support spaces not designated as Type I or II.

- **Relative pressurization** is indicated based on Z317.2-10 as follows:
 - **Positive**
 - **Negative**
 - **Equal**
- **Plumbing.** Specific plumbing requirements are noted as:
 - **Plumbing:** The need for hot/cold water is indicated with a “Yes” or “No”
 - **Floor drain** is indicated with a “Yes” or “No”
 - **Specialized plumbing** (if “Yes”, to be described in Special Design Features).
- **Medical gases.** The need for specific medical gases or specialized plumbing is noted as follows:
 - **Oxygen**
 - **Suction**
 - **Medical Air**
 - **Other**

Electrical

Electrical requirements will be determined using CSA Z32-09 Standards in clinical areas, and current general CSA Standards and the National Building Code for other areas. For numbers of receptacles, the applicable standards should be considered in tandem with the equipment requirements of a space, and where necessary additional receptacles over the minimum required by code should be added.

Specific electrical requirements are noted as follows:

- **Electrical intensity of care** for patient care areas (as per Z32-09) is noted as.
 - **Basic care** — a patient care area where body contact between a patient and medical electrical equipment is neither frequent nor usual.
 - **Intermediate care** — a patient care area where body contact between a patient and medical electrical equipment is frequent or normal.
 - **Critical care** — a patient care area where the induction and maintenance of general anesthesia routinely occurs in connection with the examination or treatment of patients, or where cardiac contact between a patient and medical electrical equipment is frequent or normal.
- **Specialized electrical** (if “Yes”, to be described in Special Design Features).

The extent and methods of the provision on telehealth will be developed in Design Development.

Finishes

Recommended floor, wall, and ceiling finishes are noted as follows:

- **Standard**
 - **Impervious** (for use in areas where there is high humidity or where there is a corrosive environment)
 - **Decontaminable** (for use in areas requiring continuous and effective decontamination; cove at floor/wall is typical)
 - **Industrial** (for use in heavy traffic areas such as building support space)

0.4 Furniture, Fixtures and Equipment

This section includes a generic list of typical fixed and mobile equipment and furniture that may be provided within the room or area. In general, the use of mobile workstations and supply carts is preferable to wall-hung cabinetry. Some additional mobile equipment items may be listed in the operational plan with a description of their purpose and location.

Wherever millwork or modular hung casework has been listed, it is listed as a minimum requirement. Millwork and casework shall be designed throughout the spaces as required to support functionality and convenient use of equipment by Facility Users and in accordance with Good Industry Practice

- v -

This FF&E information in this report is intended to aid in Schematic Planning. It is assumed that this preliminary list will be reviewed and refined by the designated equipment and biomedical engineering consultants and incorporated in design development by the design architect.

1.0 Patient Care Spaces (Generic)

Clinical Specification for the Stanton Territorial Hospital Renewal Project

Room Code	Room/Area (Generic Patient Care Spaces)	Page Number
EXT-1	Exam/Treatment Room (General)	1-1
EXT-3	Exam/Treatment Room (Isolation)	1-2
EXT-4	Patient Holding Alcove	1-3
EXT-5	Exam/Treatment/Recovery Cubicle (Semi-Enclosed)	1-4
EXT-6	Exam/Treatment/Recovery Cubicle (Isolation)	1-5
EXT-7	Cardiopulmonary/Ultrasound Testing Room	1-6
EXT-8	Secure Observation Room	1-7
PRC-1	Procedure Room (Standard)	1-8
PRC-2	Procedure Room (Special)	1-9
PRC-3	Surgical Procedure Room (Standard)	1-10
PRC-4	Surgical Operating Room (Hybrid)	1-11
INT-1	Patient Intake Alcove	1-12
BDR-1	Standard Patient Bedroom (One-Bed)	1-13
BDR-2	Airborne Isolation Room (AIR) Patient Bedroom	1-14
BDR-3	Bariatric Patient Bedroom (One-Bed)	1-15
BDR-4	Standard Inpatient Rehab Room	1-16
BDR-5	Mental Health Patient Bedroom	1-17
WRB-1	Patient Washroom/Shower	1-18
WRB-2	Patient Washroom/Tub	1-19
TPY-1	Group Therapy Room	1-20

Room Data Sheet

EXT-1

Room Name: **Exam/Treatment Room (Standard)** Typical NSM: **12.0**

Function: Patient examination and non-invasive treatments and procedures. Exam/procedure/treatment room per CSA Z8000. Flexibility in design should allow for physician consults as well.

Adjacency: Grouped with other patient care spaces.

Special Design Features: Acoustical privacy from adjacent exam/treatment rooms and corridor; bench-height electrical receptacles. Point-of-care supply server with charting space to be incorporated into millwork/casework design.

Room Features:		Furniture, Fixtures, and Equipment:	
General:		Item/Description	Quantity
Typical Occupancy:	2-3 persons	Modular, wall-hung casework	1.2 m
Occupancy Intensity:	Routinely occupied	Linear metres of counter	1.2 m
Utilization:	Day shift	Hand hygiene sink	1
Access:	Wheelchair/stretchers	Computer/charting workstation	1
Windows:	Undesirable	Exam table	1
Communications and Security:		Stool	1
Telephone:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	Side chair w/arms	1

Walls:	Impervious/decontaminable	View Box	1
Ceiling:	Impervious/decontaminable		

Room Data Sheet

EXT-4

Room Name: Patient Holding Alcove **Typical NSM:** 7.5

Function: Primarily used for inpatient holding/staging while on a stretcher or in a wheelchair.

Adjacency: Adjacent to a staff work area and near the destination treatment/procedure room.

Special Design Features: Ceiling-mounted curtain track; bench-height electrical receptacles.

Room Features:	Furniture, Fixtures, and Equipment:				
<p>General:</p> <p>Typical Occupancy: 1-person</p> <p>Occupancy Intensity: Occasionally occupied</p> <p>Utilization: Day shift</p> <p>Access: Wheelchair/stretcher</p> <p>Windows: Undesirable</p> <p>Communications and Security:</p> <p>Telephone: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>Emergency Call: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>Intercom: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>Data: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>Wireless: <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>CCTV: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>Security Lock: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>Mechanical:</p> <p>HVAC Area Classification: <input type="checkbox"/> I <input checked="" type="checkbox"/> II <input type="checkbox"/> III</p> <p>Relative Pressurization: Equal</p> <p>Plumbing: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>Specialized Plumbing: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>Floor Drain: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>Medical Gases: None</p> <p>Electrical:</p> <p>Electrical Intensity of Care: Basic care</p> <p>Specialized Electrical: <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>Finishes:</p> <p>Floor: Impervious/decontaminable</p> <p>Walls: Impervious/decontaminable</p> <p>Ceiling: Impervious/decontaminable</p>	<table border="1"> <thead> <tr> <th style="text-decoration: underline;">Item/Description</th> <th style="text-decoration: underline;">Quantity</th> </tr> </thead> <tbody> <tr> <td>Hand hygiene dispenser (waterless)</td> <td style="text-align: center;">1</td> </tr> </tbody> </table>	Item/Description	Quantity	Hand hygiene dispenser (waterless)	1
Item/Description	Quantity				
Hand hygiene dispenser (waterless)	1				

Room Data Sheet

EXT-5

Room Name: Exam/Treatment Cubicle (Semi-Enclosed) **Typical NSM:** 9.5

Function: Semi-enclosed patient treatment cubicle with curtain closure; for use in Critical Care for Rapid Assessment.

Adjacency: Grouped with other patient care spaces. Located near Hand Hygiene sink.

Special Design Features: Ceiling-mounted curtain track; bench-height electrical receptacles

Room Features:	
General:	
Typical Occupancy:	1 person
Occupancy Intensity:	Routinely occupied
Utilization:	Day shift
Access:	Wheelchair/stretchers
Windows:	Undesirable

Room Data Sheet

EXT-7

Room Name: **Exam/Treatment Cardio/Ultrasound Testing** Typical NSM: **12.0&13.0**

Function: Patient examination and non-invasive treatments and procedures. Exam/procedure/treatment room per CSA Z8000.

Adjacency: Grouped with other Diagnostic Services support spaces. Ultrasound rooms will be contiguous with a patient washroom, and located near to Ultrasound Tech touchdown stations. Cardio/Resp testing rooms will be located near to Cardiology and Respiratory touchdown stations and adjacent to equipment room containing mobile testing equipment.

Special Design Features: Acoustical privacy from adjacent exam/treatment rooms and corridor; bench-height electrical receptacles.

Room Features:		Furniture, Fixtures, and Equipment:	
General:		Item/Description	Quantity
Typical Occupancy:	2-3 persons	Modular, wall-hung casework	---
Occupancy Intensity:	Routinely occupied	Linear metres of counter	1.0 m

Room Data Sheet

BDR-4

Room Name: **Standard Inpatient Rehab room** Typical NSM: **38.1**

Function: Rehabilitation services will be provided in this room for generic inpatient units. The room shall have barrier-free access. There shall be adequate space for equipment and storage

Adjacency: Grouped with other patient bedrooms. In proximity of ADL storage and staff work area

Special Design Features: Acoustical privacy from adjacent patient bedrooms and corridor; patient lift should be provided above assessment tables; minimum door width of 1500 mm (entry and washroom/shower). All selections shall be consistent with the accessibility needs of patients, staff, and visitors. Surface mounted gantry patient lift is required.

Room Features:		Furniture, Fixtures, and Equipment:	
General:		Item/Description	Quantity
Typical Occupancy:	1-2 persons	Hand hygiene sink (reinforced wall-hung)	1
Occupancy Intensity:	Routinely occupied	Assessment table	1
Utilization:	24-7	Digital display monitor (wall-mounted)	1
Access:	Wheelchair/stretchers	Headwall	1

Room Data Sheet

BDR-5

Room Name: **Mental Health Patient Bedroom** Typical NSM: **20.6**

Function: Single-bed patient accommodation; space is inclusive of entry vestibule (4.0 NSM), and contiguous patient washroom with roll-in shower (5.6 NSM); see WRB-1 for patient washroom/shower details.

Adjacency: Grouped with other mental health patient bedrooms, with good line-of-sight from central work station.

Special Design Features: Acoustical privacy from adjacent patient bedrooms and corridor; must meet Requirements of CSA Z-8000 (see clauses 8.4.3.2 and 8.4.2.3) for mental health/addiction services. Anti-damage and Anti-barricade measures will apply. All furniture, fittings, equipment and finishes shall be selected to prevent self-harm.

Room Features:		Furniture, Fixtures, and Equipment:	
General:		Item/Description	Quantity
Typical Occupancy:	1-2 persons	Patient bed (height-adjustable)	1
Occupancy Intensity:	Routinely occupied	Hand hygiene station (waterless)	1
Utilization:	24-7	Table (over-bed)	1

Hand hygiene dispenser (waterless)	1
Paper Towel Dispenser	1
Soap and lotion dispensers (wall-mounted)	1

Room Data Sheet

CLU-1

Room Name: Clean Utility Room **Typical NSM:** 11.0

Function: Storage and handling of clean and sterile supplies and instruments.

Adjacency: Convenient access from all patient treatment areas.

Special Design Features: Bench-height electric receptacles. Hand hygiene sink to be located near clean utility room but not within. See CSA Z-8000.11 Table 11.1-9

Room Features:	
General:	
Typical Occupancy:	1 person
Occupancy Intensity:	Occasionally occupied
Utilization:	Day shift
Access:	Standard
Windows:	Unnecessary
Communications and Security:	
Telephone:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

Furniture, Fixtures, and Equipment:	
<u>Item/Description</u>	<u>Quantity</u>
Modular, wall-hung casework	---
Linear metres of counter	2.0 m
Utility sink	1
Hand hygiene dispenser (waterless)	1
Metal supply cart	varies
Waste bin	1
Paper towel dispenser	1

Room Data Sheet

SLU-1

Room Name: Soiled Utility Room **Typical NSM:** 12.0

Function: Temporary storage of supplies, instruments, and soiled equipment to be removed for cleaning, reprocessing, or disposal.

Adjacency: Convenient access from all patient treatment areas without travel through patient waiting or public areas.

Special Design Features: Bench-height electric receptacles; for inpatient units, the utility sink should have a bedpan disposal unit. See CSA Z-8000.11 Table 11.1-9

Room Features:	
General:	
Typical Occupancy:	1 person
Occupancy Intensity:	Occasionally occupied
Utilization:	Day shift
Access:	Standard
Windows:	Unnecessary
Communications and Security:	
Telephone:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

Paper towel dispenser	1
Glove Dispenser	

Room Data Sheet

MED-1

Room Name: **Medication Room (Standard)** Typical NSM: **12.0**

Function: Storage and preparation of patient medications, including an automatic dispensing machine (Pyxis). Pyxis Machine configuration varies by unit.

Adjacency: Convenient access from all patient treatment areas.

Special Design Features: Bench-height electric receptacles; requires emergency power

Room Features:	
General:	
Typical Occupancy:	1 person
Occupancy Intensity:	Intermittent
Utilization:	24-7
Access:	Standard
Windows:	Unnecessary
Communications and Security:

Utility sink	1
Hand hygiene dispenser (waterless)	1
Automatic dispensing machine (Pyxis)	1
- Main (Pyxis)	1
Refrigerator (undercounter)	1
Securable narcotics cabinet	1
Waste bin	1
Medicine Cart	1
Hand hygiene sink (wall-hung)	1
Sharps disposal container	1
Paper towel dispenser	1

Room Data Sheet

HSK-1

Room Name: Housekeeping Closet **Typical NSM:** 7.0

Function: Storage of a housekeeping cart and supplies and space for mop cleaning.

Adjacency: Convenient access from all patient treatment areas.

Special Design Features: Floor-level utility sink for mop cleaning. Requires receptacle for recharging of floor scrubbers

Room Features:	
General:	
Typical Occupancy:	1 person
Occupancy Intensity:	Occasionally occupied
Utilization:	Day shift
Access:	Standard
Windows:	Unnecessary
Communications and Security:	
Telephone:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

<u>Item/Description</u>	<u>Quantity</u>
Modular, wall-hung metal shelving	1
Paper towel dispenser	1
Utility sink (floor-level)	1
Hand hygiene dispenser (waterless)	1
Housekeeping cart	1
Vacuum cleaner	1
Floor scrubber	1
Trash bin	1
Recycling bin	1
Biomedical waste bin	1
Mop Holder	1

Room Data Sheet

KTC-1

Room Name: Nourishment or Kitchenette Alcove **Typical NSM:** 4.0

Function: Storage and reheating of food and beverage preparation.

Adjacency: Convenient access from staff workstations.

Special Design Features: Instant hot water dispenser; bench-mounted electrical receptacles. Some areas may need securable millwork. Psychiatric ICU will require that whole alcove can be secured.

Room Features:	
General:	
Typical Occupancy:	1-2 persons
Occupancy Intensity:	Intermittent
Utilization:	Day shift
Access:	Standard
Windows:	Unnecessary
Communications and Security:	
Telephone:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Emergency Call:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Intercom:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Electrical Intensity of Care:	n/a
Specialized Electrical:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Finishes:	
Floor:	Impervious; decontaminable
Walls:	Impervious; decontaminable
Ceiling:	Impervious; decontaminable

Furniture, Fixtures, and Equipment:	
Item/Description	Quantity
Modular, wall-hung casework	2.0 m
Linear metres of counter	2.0 m
Utility sink	1
Instant hot water dispenser	1
Refrigerator (undercounter)	1
Microwave	1
Coffee maker	1
Waste bin	1
Recycling bin	1
Paper towel dispenser	1
Hand hygiene dispenser (waterless)	1
Ice machine	1
Securable Millwork	varies

Room Data Sheet

KTC-2

Room Name: Staff Room **Typical NSM:** varies

Function: To be used by staff for the storage and reheating of food and beverage preparation so they do not need to leave their unit/department during breaks.

Adjacency: Convenient access from staff work areas. Must be within 6m of Hand Hygiene Sink

Special Design Features: Instant hot water dispenser; bench-mounted electrical receptacles.

Room Features:	
General:	
Typical Occupancy:	1-2 persons
Occupancy Intensity:	Intermittent
Utilization:	Day shift
Access:	Standard
Windows:	Unnecessary
Communications and Security:	
Telephone:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

<u>Item/Description</u>	<u>Quantity</u>
Modular, wall-hung casework	2.0 m
Linear metres of counter	2.0 m
Instant hot water dispenser	1
Hand hygiene dispenser (waterless)	1
Refrigerator	1
Microwave	1
Coffee Maker	1
Toaster	1
Waste bin	1
Recycling bin	1
Paper towel dispenser	1
Table	1
Chairs	tbd

Room Data Sheet

LKR-1

Room Name: **Staff Lockers (Alcove)** **Typical NSM:** **5.6**

Function: Minimum for 20 stacked, full-width purse/tote bag lockers for staff without dedicated workstations; add 0.40 per additional locker (increments of two).

Adjacency: Convenient access from staff room and other staff work areas. Can be contiguous with KTC-2 Staff Room.

Special Design Features: None identified.

Room Features:	
General:	
Typical Occupancy:	2 persons
Occupancy Intensity:	Intermittent
Utilization:	24-7
Access:	Wheelchair
Windows:	Undesirable
Communications and Security:	
Telephone:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Room Data Sheet

MTP-1

Room Name: Multipurpose Room **Typical NSM:** varies

Function: For patient/family activities; also used for telehealth. Includes ADL kitchen on Surgical Inpatient Unit.

Adjacency: Convenient access and good visibility from staff work area or other staff locations. Natural light and view to the outdoors shall be provided. Adequate storage space shall be provided for activity equipment and supplies

Special Design Features: Two exits and an observation window are required on Psychiatric ICU. Area assigned to STO-1 for equipment storage should be considered as built-in storage units within this room during design development. Access to natural light required.

Room Features:	
General:	
Typical Occupancy:	8-10 persons
Occupancy Intensity:	Intermittent
Utilization:	Day shift
Access:	Standard
Windows:	Desirable
Communications and Security:

Room Data Sheet

OFF-5

Room Name: **Office (Collaborative)** Typical NSM: **7.5**

Function: Private office/cubicle space module for Nurse Practitioners and Physicians in clinic. To provide similar amenities as OFF-1, but in a collaborative open-office setting, for those also spending high volume of time in exam/consult spaces.

Adjacency: Grouped with other offices and workstations.

Special Design Features: Functions such as filing or side table could be replaced with innovative system furniture solutions, e.g. benches, breakout space. Each workstation to have separate data drops. Wire management for flexible workspace configuration.

Room Features:	
General:	
Typical Occupancy:	1 person
Occupancy Intensity:	Routinely occupied
Utilization:	Day shift
Access:	Standard
Windows:	Desirable
Communications and Security:

Room Data Sheet

CFR-1

Room Name: **Conference Room (Small)** Typical NSM: **20.0**

Function: Conference/meeting room with seating for eight to ten persons; add 1.4 NSM per additional seat. Updated recommendations to *Government of the Northwest Territories – Office Space Standards and Guidelines* should be considered during design development.

Adjacency: Grouped with other administrative offices and workstations.

Special Design Features: Telehealth and video conference capability and adjustable lighting to allow room darkening for presentations and adjustable blinds if windows are provided. Telehealth/audio-visual equipment to be portable. For Pharmacy, and any other staff areas that do not have separate staff lounge, provision of nourishment station should be considered. Wire management for flexible workspace configuration.

Room Features:	
General:	
Typical Occupancy:	8-10 persons
Occupancy Intensity:	Occasionally occupied

Room Data Sheet

LAB-1

Room Name: Central Specimen Processing Area **Typical NSM:** 22.5

Function: Receiving, sorting, and preparation of specimens received at the STH central laboratory and temporary holding of specimens to be sent out; includes receiving/sorting workstation (3.7 NSM), processing workstation (3.7 NSM), referral/send-out workstation (5.6 NSM), and shared support space (9.5 NSM).

Adjacency: Requires convenient access from outpatient specimen collection suite, main hospital corridor, and building access point for couriers bringing specimens to STH and picking up specimens for transport elsewhere. Located in proximity to pneumatic tube station

Special Design Features: Bench-height electric receptacles. Emergency power required. Adequate shelving required for requisitions, manuals, trays, tubes and supplies.

Room Features:	
General:	
Typical Occupancy:	2-3 persons
Occupancy Intensity:	Routinely occupied
Utilization:	24-7
Access:	Standard
Windows:	Unnecessary

Room Data Sheet

DYS-1

Room Name: Treatment Space **Typical NSM:** varies

Function: Patient treatment space for dialysis, should be designed as per Table 9.2 of the CSA Z-8000-11 Standards. Open cubicles are intended for community dialysis and can be closed by curtain when necessary.

Adjacency: Proper visibility from the Reception/Staff Work Area. Allow for sufficient space in front of the recliner for a 'computer on wheels'

Special Design Features: Ceiling-mounted curtain track; bench-height electrical receptacles. RO water supply to each dialysis machine; drain required for each dialysis station.

Room Features:	
General:	
Typical Occupancy:	1 person
Occupancy Intensity:	Routinely occupied
Utilization:	Building Hours
Access:	Wheelchair/stretchers
Windows:	Desirable
Communications and Security:

Room Data Sheet

PED-1

Room Name: High Intensity Pediatric Room (One-Bed) **Typical NSM:** 27.0

Function: Single-bed patient accommodation; space is inclusive of entry vestibule (4.0 NSM), supply alcove (1.4 NSM), and contiguous patient washroom with roll-in shower (5.6 NSM); see WRB-1 for patient washroom/shower details.

Adjacency: Direct visibility from Pediatrics Central Work Area for observation. Grouped with other Pediatric patient bedrooms.

Special Design Features: Acoustical privacy from adjacent patient bedrooms and corridor; must meet Requirements of CSA Z-8000 for mental health/addiction services. Anti-damage and Anti-barricade measures will apply. All furniture, fittings, equipment and finishes shall be selected to prevent self-harm

Room Features:	
General:	
Typical Occupancy:	1-2 persons
Occupancy Intensity:	Routinely occupied
Utilization:	24-7
Access:	Wheelchair/stretchers

APPENDIX 3B

WAYFINDING GUIDELINES

1. OVERVIEW

Stanton Territorial Hospital welcomes patients, family members, and visitors from all of the Northwest Territories and Kitikmeot Region of Nunavut, as well as visiting staff and students. Making the facility easy to navigate is an integral part of creating a positive and welcoming experience that promotes a healing environment.

With 11 official languages recognized by Government of the Northwest Territories and the Stanton Territorial Hospital Authority, and a requirement of the use of syllabics in some communications, a wayfinding design solution that includes the development of a series of common architectural and graphic elements will be important in creating clear and consistent wayfinding elements.

2. WAYFINDING REQUIREMENTS

2.1 HIERARCHY OF ELEMENTS

The wayfinding design solution shall be developed with a hierarchy of elements that help users navigate from arrival on-site, through parking and pathways, through entries into the facility, through the facility, eventually leading to their final destination or room.

- Considerations of where wayfinding must be supplemented by staff at major decision making locations, such as lobby and reception areas shall be indicated in a Wayfinding Plan.
- Exterior Architecture shall help orient and identify entrances & exits, parking, and paths of travel, and these items should be enhanced by exterior signage that is designed to suit the elevation concept and materials of the building.
- Creation of important points of interest and the use of consistent visual cues will better help visitors navigate their way.
- Signage can also become an integral part of the architecture and culture of the facility through appropriate selection of materials, colors, images, and mounting type. Directional features may incorporate design elements of landscape, culture, history, community, perceptions, artifacts, artwork or other elements to help express facility identity.

2.2 KEY ELEMENTS OF WAYFINDING

Specific Areas requiring the application of wayfinding are:

- **Hospital Directories** – these are required at all entrances, major corridor junctions and elevator lobbies. For the main hospital lobby, digital interactive kiosk signage systems are becoming highly desirable when there is a lot of information to convey, and can include, but are not limited to features such as building maps, department maps, point-to-point directions, area maps, event location mapping, built-in ADA controls, mobile device integration, color coding map capabilities, icon systems for common areas like stair and exits. Interactive digital kiosks help reduce signage clutter from hospital walls and waiting areas, and provide concise information to many different users.
- **Points of Arrival and Floor Directories** –these help assist new patients and visitors and are usually at all elevator lobbies or major hubs where decisions of direction are made. Specific departmental identities should be created as part of the Wayfinding Plan, a successful example of this is using imagery of art or local scenery to designate patient care departments.
- **Room Signage** – Room signage can often require regular changes to properly convey up-to-date information. These signs must have adaptable capabilities, and allow for controlling patient privacy. Adaptable elements may be as simple as pocket inserts for specific information such as the name of occupant, or may be more complex with tabs to alert staff or visitors of patient information conditions. Room signage for service/utility rooms may be a more generic, non-descript, and less evident than general room signage. Small door tag signage is also required on all door frames.
- **Feature Areas** – at various locations throughout the hospital, there must be focus on key areas to provide dedicatory canvases or donor recognitions, which may be instrumental to the facility development and growth. These may include signage locations for the reception desk or for the foundation kiosk.

2.3 SIGNAGE

Considerations in the design of signage shall be made regarding:

- Durability requirements of materials to withstand daily hospital facility cleaning regimes and potential vandalism in areas that are not under constant supervision.
- Accessibility requirements of character size, style and readability, color and contrast.
- Relationship with the building's environment and interior finishes.
- Requirements for illuminated signage.

2.4 LANGUAGE REQUIREMENTS

The Government of the Northwest Territories Official Languages Policy (http://www.ece.gov.nt.ca/files/T4.02.01_Official%20Languages%20Policy.pdf) is an important tool in developing the Wayfinding Plan of the Stanton Territorial Hospital, and any signage that is used as part of the Wayfinding Plan shall be developed with guidance from Stanton Territorial Hospital Authority.

APPENDIX 3C MEDICAL GAS AND HEADWALL REQUIREMENTS										
1.0 PATIENT CARE SPACES (GENERIC)		HEADWALL / NO. OF MEDICAL OUTPUTS REQUIREMENTS PER ROOM								
ROOM CODE	ROOM TYPE	O2	Med Air	N2O	Med Vac	Nitrogen	CO2	AGSS	Nurse Call	Intruder Alarm

**Stanton Territorial Hospital Facility Renewal Study
SUMMARY OF THE SCHEDULE OF ACCOMMODATION: REVISED DECEMBER 2013**

Section	Room/Area	Factor	Revised CNSM	Revised CGSM	Notes
1.0 MAIN ENTRANCE/CUSTOMER SERVICES					
1.01	Main Entrance/Lobby	1.30	#REF!	#REF!	
1.02	Customer Service Centre	1.30	#REF!	#REF!	
1.03	Auxiliary Tuck Shop	1.30	#REF!	#REF!	
1.04	Chapel/Meditation Room	1.30	#REF!	#REF!	
Total (Main Ent./Customer Services)		1.30	#REF!	#REF!	
2.0 DIAGNOSTIC SERVICES					
2.01	Outpatient Intake Area	1.50	#REF!	#REF!	
2.02	Diagnostic Imaging Suite	1.50	#REF!	#REF!	
2.03	Cardiopulmonary/Ultrasound Suite	1.50	#REF!	#REF!	
2.04	Outpatient Specimen Collection Suite	1.50	#REF!	#REF!	
2.05	Shared Support Space	1.50	#REF!	#REF!	
2.06	Laboratory	1.35	#REF!	#REF!	
2.04	Morgue	1.35	#REF!	#REF!	
Total (Diagnostic Services)		1.45	#REF!	#REF!	
2.08	Magnetic Resonance Imaging	1.50	#REF!	96.0	
3.0 AMBULATORY CARE CENTRE					
3.01	Ambulatory Care Check-In	1.46	#REF!	160.0	
3.02	Exam/Treatment Spaces	1.46	#REF!	504.7	
3.03	Collaborative Workspaces	1.46	#REF!	520.9	
3.04	Shared Clinical Support Space	1.50	#REF!	151.4	
3.05	Medical Day Care Unit	1.50	#REF!	185.1	
3.06	Renal Care Unit	1.46	#REF!	211.7	
3.07	Shared Support Space	1.46	#REF!	99.4	
Total (Ambulatory Care)		1.47	#REF!	1833.2	

MRI included as an allowance for future expansion. CGSM for MRI is not included in the total for Diagnostic Services, nor in the grand total summary.

4.0 SURGERY AND DAY PROCEDURES				
4.01	Surgery Suite	1.60	#REF!	#REF!
4.02	Day Procedure Unit	1.55	#REF!	#REF!
Total (Surgery & Special Procedures)		1.58	#REF!	#REF!

5.0 OUTPATIENT REHABILITATION CENTRE	1.40	#REF!	1234.2
---	-------------	--------------	---------------

Re-located off-site in leased space.

6.0 CRITICAL CARE				
6.01	Outpatient Triage Area	1.60	#REF!	#REF!
6.02	Minor Treatment Area	1.60	#REF!	#REF!
6.03	Acute Treatment Area	1.60	#REF!	#REF!
6.04	Intensive Care Unit	1.55	#REF!	#REF!
6.05	Shared Staff Support Space	1.55	#REF!	#REF!
Total (Critical Care)		1.58	#REF!	#REF!

7.0 INPATIENT SERVICES				
7.01	Medical Unit	1.55	#REF!	#REF!
7.02	Surgical Unit	1.55	#REF!	#REF!
7.03	General Psychiatry/Medical Unit	1.55	#REF!	#REF!
7.04	Psychiatric Intensive Care Unit	1.55	#REF!	#REF!
7.05	Obstetrics Unit	1.55	#REF!	#REF!
7.06	Pediatric Unit	1.55	#REF!	#REF!

APPENDIX 3D - INFORMATION SYSTEMS RESPONSIBILITY SUMMARY

System Heading	Scope Categorisation			Interface Requirements	Systems Operation - Operating Period	
	Hardware and Software	Infrastructure	Interface		End User Administration	Systems Lifecycle
			Equipment Category	Scope Definition		
			Category A Equipment	Project Co will be responsible for the: (a) Procurement, Delivery, Storage, Setup, Installation and Commissioning of all Category A Equipment; and (b) Maintenance, Renewal and Replacement of all Category A Equipment in accordance with Schedule 4 [Services Protocols and Specifications].		
			Category B Equipment	Project Co will be responsible for the: (a) Procurement, Delivery, Storage, Setup, Installation and Commissioning of all Category B Equipment; and (b) Maintenance of all Category B Equipment in accordance with Schedule 4 [Services Protocols and Specifications] provided that: (1) Project Co will not be responsible for the Renewal and Replacement of any Category B Equipment; and (2) the Authority will Renew and Replace all Category B Equipment in accordance with Good Industry Practice.		
			Category C Equipment	Authority will be responsible for the Procurement, Delivery, Storage, Setup, Installation, Commissioning, Maintenance, Renewal and Replacement of all Category C Equipment. Refer to Schedule 3 [Design and Construction Specifications] for specifications applicable to furniture, millwork and casework.		
			Category D Equipment	(a) Authority will be responsible for the Procurement, Delivery, Maintenance, Renewal and Replacement of all Category D Equipment; and (b) Project Co will be responsible for the Storage, Setup, Installation and Commissioning of all Category D Equipment.		
			Category E Equipment	(a) Project Co will: (1) be responsible for the Procurement, Delivery, Storage, Setup, Installation and Commissioning of all Category E Equipment; and (2) not be responsible for the Maintenance, Renewal and Replacement of any Category E Equipment; and (b) the Authority will Maintain, Renew and Replace all Category E Equipment in accordance with Good Industry Practice.		

APPENDIX 3E DOOR OPERATIONS MATRIX

	Room or Zone Type	High Level Description of Functional Intent	Card Reader Placement	CCTV	
Corridors & Departments	Exterior Perimeter Doors, Non Entry	Secure, door position switch, exit door hardware	N/A	A - fixed	
	Exterior Perimeter Doors, Main Entry	Door operator with motion sensor, to facilitate free flow during public hours, secure card access after hours from outside, free egressing from the inside. Provide video intercom and remote release	A	C - fixed	
	Exterior Perimeter Doors, Staff Entry & Department Doors	Secure card access from outside, door position switch, free egress from the inside	A	C - fixed	
	Exterior Perimeter Doors, Emergency & Ambulance Bay	Door operator with motion sensor, to facilitate free flow during public hours, secure card access after hours from outside, free egressing from the inside. Provide video intercom and remote release	A	C - fixed	
	Department Perimeter Doors	Secure card access after hours, doors with operators and hold open during hours of operation	A	C - fixed	
	Department Perimeter Doors - Mental Health & LDRP	Secure 24 hours, card access, doors with operators. Provide video intercom and remote release	C	C - fixed	
	Department Perimeter Doors - PHARMACY	Secure, locking capability after hours, card access, doors with operators. Provide video intercom and remote release	D	A - fixed	
	Department Perimeter Doors - IPU, Emergency, ICU, Renal	Secure, locking capability after hours, card access, doors with operators. Provide video intercom and remote release	A	A - fixed	
	Roof Access	Door position switch	N/A	B - PTZ	
	Staff Zone, Perimeter Doors (Boundary)	Secure, with card access for staff, door operator	A	A - fixed	
	Staff & Patient Zone, Double Egress Doors in Corridors	Door operator with motion sensor, hold open to facilitate free flow during public hours, secure card access after hours	C	C - fixed	
	All elevators (both hall call and inside the cab)	Floor-by-floor card access control	C	C - fixed	
	Perimeter walkways and walkways connecting to other buildings on Site		N/A	A - PTZ	
	Exit Stair Doors inside Departments	Delayed egress, panic, key override/reset card reader both sides, audible alarm.	C	C - fixed	
	Exit Stair Doors going into a Department	Delayed egress, panic, key override/reset, card reader both sides	C	C - fixed	
	Staff and Patient Zone	Diagnostic Imaging, Typical Imaging Modalities, not including MRI	Secure, with card access for staff, door operator, remote release as required.	A	N/A
		Exam Room, Isolation	Secure, with card access for staff, door operator, remote release as required.	A	N/A
Emergency, Trauma Resuscitation Room		Secure, with card access for staff, door operator, remote release as required.	A	N/A	
Exam Room Vestibule, Typical Isolation		Secure, with card access for staff, door operator, remote release as required, man trap function	A	N/A	
Patient Room Isolation		Secure, with card access for staff, door operator, remote release as required, man trap function	A	N/A	
Patient Room, LDRP Respite and Resuscitation Nursery		Secure, with card access for staff, door operator, remote release as required.	A	N/A	
Patient Seclusion Room, Emergency & Psychiatric		Secure, with card access for staff, door operator, remote release as required, ligature resistant hardware hardware	C	N/A	
Procedure & Therapy Rooms - Mental Health		Two entries to room, secure, with card access for staff, door operator, remote release as required, ligature resistant hardware	C	A - fixed	
Interview Rooms & Conference Rooms - Mental Health		Two entries to room, secure, with card access for staff, door operator, remote release as required, ligature resistant hardware	C	A - fixed	
Interview Rooms - Emergency		Two entries to room, secure, with card access for staff, door operator, remote release as required, ligature resistant hardware	C	A - fixed	
Man Trap Vestibule - Mental Health		Two entries, secure, with card access for staff, door operator, ligature resistant hardware. Provide video intercom and remote release, both doors.	C	C - fixed	
Pharmacy, Anteroom		Secure, with card access for staff, door operator, push button release as required, man trap requirement	A	A - fixed	
Pharmacy, Narcotics Storage Room		Secure, with card access for staff, intrusion alarm system	D	C - fixed	
Pharmacy, Night Cabinet Room		Secure, with card access for staff	A	A - fixed	
Medication Rooms, Drug Storage, Pharmacy		Secure, with card access for staff, door operator push button on inside	A	A - fixed	
Medical Records		Secure, with card access for staff	A	A - fixed	
Clean Utility Rooms		Closer with hold open function	N/A	N/A	
Housekeeping & Storage Utility Rooms		Closer with hold open function	N/A	N/A	
Service Rooms		Secure, with card access for staff, delayed closer	A	N/A	
Soiled Utility Rooms		Secure, with card access for staff, delayed closer, hands free latchset	A	A - fixed	
Support Spaces (FMO, Stores, Logistics, OT Splinting, etc.)		Secure, with card access for staff, delayed closer	A	A - fixed	
Cafeterias			N/A	A - fixed	
Building Management Rooms (Boiler Rooms, Fan Rooms, Hazmat Storage, etc.)		Secure, with card access for staff, delayed closer	A	N/A	
Staff Lounges, Washrooms, Locker Rooms		Secure, with card access for staff, closer	A	A - fixed	
Public Lobbies and Waiting Areas			N/A	A - fixed	
Meeting / Conference / Teaching Room (S/M)		Secure, with card access for staff, closer	A	A - fixed	

Secure Staff Zone	IS (Telecom) Rooms	Secure, with card access for staff, closer	A	A - fixed
	Loading Docks	Secure, with card access for staff, closer, video intercom with remote unlocking	A	A - fixed
	Laboratory, BioSafety Cabinet Station	Secure, with card access for staff, door operator, push button release as required.	A	A - fixed
	Laboratory, Various Modalities	Secure, with card access for staff, door operator, push button release as required.	A	A - fixed
	Laboratory, Walk in Cooler Room	Manual latchset, lockable	A	A - fixed
	Laboratory, Walk in Freezer Room	Manual latchset, lockable	A	A - fixed
	Materiels Management, Flammable Storage, Clean	Secure, with card access for staff, closer	A	A - fixed
	Materiels Management, Flammable Storage, Contaminated	Secure, with card access for staff, closer	A	A - fixed
	MDR, Clean Zone, Prep and Packaging	Secure, with card access for staff, door operator, push button release as required.	A	A - fixed
	MDR, Decontamination Area	Secure, with card access for staff, door operator, push button release as required.	A	A - fixed
	MDR, Sterile Zone, Sterilization and Holding	Secure, with card access for staff, door operator, push button release as required.	A	A - fixed
	Administration and Cash Offices	Secure, with card access for staff, closer	A	A - fixed
	On Call Rooms	Secure, with card access for staff, closer	A	A - fixed

Door Typical - Card reader placement

- (A) Single Card Reader on the Public side
- (B) Single Card Reader on the Secure side
- (C) Dual Card Readers on both the Public and Secure side
- (D) Combination pin code / proximity card readers

CCTV Typicals - CCTV placement (PTZ - pan tilt zoom / Fixed - stationary camera typical use ID)

- (A) Single CCTV camera on the Public side
- (B) Single CCTV camera on the Secure side
- (C) Dual CCTV camera's on both the Public and Secure side

Every Door with a Maglock will have key override both sides of door

Every Door with a latch set to have key core capability

Man Trap function is defined as a vestibule with interlocked doors to prevent one door from opening before the other door is shut

PTZ - Pan to Zoom camera

ID - Identification camera

APPENDIX 3F

DEMOLITION AND RELATED WORK

1. General

1.1 Site Preparation – Demolition

(a) Basic Requirements

- (1) Project Co is responsible for the demolition of the following:
 - (A) all demolition that is necessary, above ground (elements such as, but not limited to, buildings, structures, roads, curbs, parking areas, walkways and landscaping) and sub-surface (elements such as, but not limited to, foundations, slabs, pits, sumps, pipes, cables, ducts and underground tanks including related piping) , for the construction of the Facility.
- (2) Project Co acknowledges and agrees:
 - (A) it has received and reviewed a copy of the following reports including all appendices:
 - (i) Environmental Site Assessment (ESA) Phase 1 – as defined in Schedule 2 – Design and Construction Protocols
 - (ii) Hazardous Materials Report – as defined in Schedule 2 – Design and Construction Protocols
 - (B) it is responsible for all management, removal, abatement, containment and disposal of Hazardous Substances disclosed in or reasonably inferred from the reports listed in Section 1.1(a)(2)(A) above, with the exception of the underground oils tanks which have already been remediated by the Authority; and
 - (C) the Authority is not in any way responsible or liable for the completeness, interpretation or accuracy of reports listed in Section 1.1(a)(2)(A) above.
- (3) Without limiting the responsibility of Project Co above, Project Co will:
 - (A) take all precautions so that no transmission of Hazardous Substances and noxious fumes interfere or contaminate the surrounding community;
 - (B) be responsible for management, removal, abatement, containment and disposal of any underground storage tanks and any underground piping and appurtenances, including any that may themselves constitute Hazardous Substances which were disclosed in or reasonably inferable from the Disclosed Data; and
 - (C) complete the management, removal, abatement, containment and disposal of all Hazardous Substances, which were disclosed in or reasonably inferable from the Disclosed Data, prior to demolition.
- (4) For buildings to be demolished, Project Co is responsible for all building systems terminations and cap offs prior to demolition. The Authority will have separated the unburied mechanical and electrical systems connecting buildings to be demolished, except for Life Safety systems and underground systems.

- (5) Project Co will perform all design and construction work:
 - (A) that is triggered by the demolition work required in this Appendix 3F [Demolition and Related Work]; and
 - (B) including, but not be limited to: code related upgrades, fire egress upgrades, structural upgrades and the temporary or permanent redirection of services.
- (6) All new design and construction required by Appendix 3F [Demolition and Related Work] will meet the requirements of Schedule 3 [Design and Construction Specifications].
- (b) Performance Requirements
 - (1) Project Co will:
 - (A) prior to performing demolition work, submit a report on the protective measures in place for existing buildings to the Authority;
 - (B) conform to applicable codes for demolition of structures and provide for the safety of adjacent structures, the erection and maintenance of temporary barriers and security devices;
 - (C) obtain City of Yellowknife and other authority approvals required to undertake a demolition;
 - (D) ensure demolition work does not interfere with, or prevent the site and adjacent buildings from operating normally;
 - (E) provide perimeter screen and safety walls to ensure safety and protection of people and objects outside of the demolition area;
 - (F) provide overhead protection from falling debris;
 - (G) carry out demolition activities so as not to interfere with access to existing buildings;
 - (H) schedule hours of operation and plan the traffic flow required for demolition in accordance with the Phasing Plan, the Work Plan and the Demolition Plan referred to in Schedule 2 [Design and Construction Protocols];
 - (I) be responsible for ensuring that fire safety will be in force at all times during demolition;
 - (J) implement a pest control management plan for related areas before, during and post demolition;
 - (K) perform all work to CAN/CSA-Z317.13 Infection Control During Construction, Renovation, and Maintenance of Health Care Facilities;
 - (L) provide dust control at all times:
 - (i) spray demolition area with water once demolition of structure begins;
 - (ii) manage water runoff through the site; and

- (iii) protect all storm drains that could be affected by the demolition work;
- (M) perform work in accordance with Schedule 2 [Design and Construction Protocols] Control of Noise;
- (N) secure demolition site 24/7; obtain Authority's approval of methods to secure site prior to commencing work;
- (O) conform to applicable regulatory procedures, including the *Safety Act* (Northwest Territories) and all applicable occupational health and safety requirements and codes of practice in the Northwest Territories requirements, during all phases of the demolition and when discovering hazardous or contaminated materials;
- (P) ensure the walls separating the construction from remaining structures will be designed so that the demolition and construction will not interfere with the normal operation of the Hospital;
- (Q) remove of all demolition materials from the site safely and legally;
- (R) terminate existing surfaces of building elements to be demolished along straight lines at natural divisions determined through consultation with by the Authority. Cut existing surfaces so that a smooth transition with new work will result;
- (S) refer to Schedule 2 [Design and Construction Protocols] 6.12 for salvage material and equipment title;
- (T) make provisions to ensure that affected areas of the remaining building are weather-proofed during and after demolition and for the duration of construction of the Building;
- (U) construct a temporary insulated and weatherproof wall to protect all previously interior areas exposed to the exterior during the demolition and construction process;
- (V) Project Co's design will identify where the new construction and adjacent buildings are intended to be joined as interior space and be responsible for providing permanent exterior walls at all locations that are no longer interior walls. These required exterior walls in existing buildings shall meet all the requirements of Schedule 3 [Design and Construction Specifications] and complement the design of the existing adjacent building facades;
- (W) be responsible for patching, repairing and "making good" all exterior and interior surfaces affected in all existing buildings in which work is taking place, to match the quality of the adjacent surfaces. "Making Good" shall be defined as preparing new surfaces which are identical to adjacent surfaces, and finished off in such a manner that there are absolutely no visible traces (at a distance of 600 mm), between existing work and the work of new patching. "Making good" therefore, extends to the complete re-finishing of entire surface areas as is necessary, to junction points or inside or outside corners of walls, partitions and ceiling; and
- (X) accurately record actual locations of capped utilities, subsurface obstructions and/or conditions.

1.2 Civil Requirements

- (a) General
 - (1) Project Co will inspect and examine the Site with the Authority and verify the extent and location of items designated for demolition.
- (b) Basic Requirements
 - (1) Project Co will confirm the extent of the demolition and ensure there is no disturbance to the operations of the existing adjacent buildings and areas.
 - (2) All materials are to be stockpiled and removed for disposal offsite in a location acceptable to the Authority.
 - (3) Demolition to comply with CSA S350: Code of Practice for Safety in Demolition of Structures.
 - (4) Demolition to comply with the latest edition of the City of Yellowknife By-Laws.
- (c) Performance Requirements
 - (1) Project Co will undertake demolition in accordance with the following performance requirements:
 - (A) Locate any active services located on the site that serve other properties and take steps as required to prevent any disruption to such servicing
 - (B) Re-location of services that are connected to other buildings will include installation of replacement services at such a time, and any other steps required including installation of temporary alternate services, so that the services to other buildings are not disrupted.
 - (2) Disconnect, cap, plug or divert as required existing services.
 - (A) Sewer and Water Lines: Remove in locations as required, in accordance with the requirements of the Authority or City of Yellowknife and securely plug to form watertight seal.
 - (B) Other Underground Services: Remove and dispose of as required.
 - (3) Locate and protect utilities. Preserve active utilities traversing the site in operating conditions.
 - (4) Notify, coordinate and obtain approval from utility companies before starting demolition.
 - (5) Do not pump water containing suspended materials into watercourses, storm or sanitary sewers or onto adjacent properties
 - (6) Removal of Pavements, Curbs and Gutters will include but is not limited to the following:
 - (A) Square up adjacent surfaces to remain in place by saw cutting or other method approved by the Authority.
 - (B) Protect adjacent joints and load transfer devices

(C) Protect underlying and adjacent granular materials.

(7) Prevent movement, settlement, or damage to adjacent structures, utilities and landscaping features and parts of building to remain in place. Provide bracing and shoring as required.

1.3 **Structural Requirements**

(a) Prior to demolition Project Co will:

(1) Ensure that all remaining structures are sufficiently shored and protected against structural damage from demolition activities.

(2) Provide necessary shoring and temporary structures in accordance with the requirements of the City of Yellowknife Building By-Law 4469, the *Safety Act* (Northwest Territories) and all applicable occupational health and safety requirements and codes of practice in the Northwest Territories.

(3) Provide underpinning of existing structures as required for both temporary excavations and permanent construction. If underpinning is to remain in the final structures, design and construction will provide for long term durability.

(b) During demolition Project Co will:

(1) Maintain all shoring and protective measures in structurally sound condition until demolition activities are complete.

(c) Reinstatement of Existing buildings

(1) Where structural elements of the existing building are to be demolished to accommodate construction of the Facility, Project Co will rebuild exit stairs and structural elements as required for the remaining building to conform with the City of Yellowknife Building By-Law 4469 requirements, and all applicable codes and standards.

(2) Structural elements will include but not be limited to foundations, retaining walls, stair structures, vertical load carrying elements and lateral load resisting elements (including seismic loads).

1.4 **Mechanical Requirements – Not Used.**

1.5 **Electrical Requirements – Not Used.**

APPENDIX 3G
GROSS FLOOR AREAS

1. DEFINITIONS

In this Schedule, in addition to the definitions set out in Schedule 1 of the Agreement:

“**Accreditations**” has the meaning set out in Section 3.3(d) of this Schedule;

“**Annual Service Plan**” has the meaning set out in Section 4.2 of this Schedule;

“**Authority Policies**” means all policies, or portions of policies where only a portion is indicated, of the Authority as at the Effective Date, copies of which have been made available to Project Co including, subject to Section 3.4 of this Schedule, as applicable from time to time, any amendments of those policies and any additional policies;

“**BMS**” means the Building Management System;

“**CMMS**” means the Computerized Maintenance Management System for the Facility;

“**Core Hours**” means the period of time between 7:00am and 10:59pm;

“**Demand Requisition**” means any request for service, report of a Service Failure, report of an Unavailability Event or any other report or inquiry made to the Help Desk or to Project Co, including reports generated electronically by the BMS, the CMMS or other electronic monitoring systems operated by Project Co in the Facility;

“**District Heating Service**” means hot water heating service generated at the central plant and distributed via district heating supply and return water pipes to energy transfer stations in the Facility for space heating and domestic hot water heating in the building;

“**Energy Management Plan**” has the meaning set out in Section 4.5 of this Schedule;

“**Environmental Management Plan**” has the meaning set out in Section 4.4 of this Schedule;

“**Facility Average**” has the meaning set out in Appendix 4B [Help Desk];

“**Facility Users**” means the Authority, Authority Persons, physicians, patients, visitors, students and volunteers using or present at the Facility;

“**Five Year Maintenance Plan**” has the meaning set out in Section 4.3 of this Schedule;

“**Floor Care Ratio**” has the meaning set out in Appendix 4B [Help Desk];

“**Help Desk**” means the contact point established by Project Co in respect of the Help Desk Services for the notification of Demand Requisitions, the occurrence of Events and other matters arising in relation to the provision of Services;

“**Joint Technical Review**” has the meaning set out in Section 3.11 of Appendix 4A [General Management];

“**Life Cycle Plan**” has the meaning set out in Section 4.7 of this Schedule;

“Life Cycle Report” has the same meaning as Facility Condition Report set out in Appendix 4M [Life Cycle Schedule];

“Life Cycle Schedule” has the same meaning as schedule 2 in Appendix 4M [Life Cycle Schedule];

“Non-Core Hours” means the period of time between 11:00pm and 7:00am;

“NWT Infection Prevention and Control Manual” means the document provided by the Authority which sets out their infection prevention approach and control;

“Operating Period Joint Committee” means the committee established pursuant to Section 2.2(a) of this Schedule;

“Operating Period Representative” has the meaning set out in Section 2.1 of this Schedule;

“Performance Indicators” means the performance indicators described in each Appendix of Schedule 4;

“Performance Monitoring Program” means the performance monitoring system, equipment and procedures in place for monitoring performance of the Services as more particularly described in Section 6.1 of this Schedule;

“Performance Monitoring Report” has the meaning set out in Section 6.2 of this Schedule;

“Plans” means the Start-up Plan, the Annual Service Plan, the Five Year Maintenance Plans, the Life Cycle Plan, the Environmental Management Plan, the Energy Management Plan and the Services Quality Plans;

“Proposal Extracts (Services)” means the proposal extracts attached as Appendix 4O of this Schedule;

“Quality Ratio” has the meaning set out in Appendix 4B [Help Desk];

“Rectification” means, following the occurrence of an Event, making good the Event so that the subject matter of the Event complies with the levels of performance required pursuant to this Agreement, including (a) restoring all functional capability and (b) ensuring that all affected Functional Units comply with the Availability Condition; **“Rectify”** and **“Rectified”** will be construed accordingly;

“Rectification Time” means the period of time following a Demand Requisition or other electronic report or recording by the BMS during which Project Co must Rectify, each as indicated as a “Rectification Time” for the relevant Service in the Performance Indicators;

“Reporting Error” has the meaning set out in Section 6.5 of this Schedule;

“Respond” and **“Response”** means:

- (a) with respect to all Services, the appropriate personnel attending the location of the Event, making the location, and all affected locations safe, in accordance with Good Industry Practice, and providing a plan acceptable to the Authority, acting reasonably, for the Rectification of the Event; and

- (b) with respect to routine matters for all Services, means either the foregoing or an electronic response from the Help Desk confirming the details of the Event and providing a plan acceptable to the Authority, acting reasonably, for the Rectification of the Event;

“Response Time” means the period of time following a Demand Requisition or other electronic report or recording by the BMS during which Project Co must Respond, each as indicated as a “Response Time” for the relevant Service in the Performance Indicators;

“Services Quality Plan” has the meaning set out in Section 4.6 of this Schedule;

“Solid Waste Management Plan” means a document which describes how solid waste will be managed within the Facility as required by the City to fulfil rezoning requirements, and which sets out the solid waste management practices for the Facility;

“Start-up Plan” means the plan described in Section 4.1 of this Schedule;

“Sub-Contractor Termination Notice” has the meaning set out in Section 6.8 of this Schedule;

“Territorial Guidelines for Environmental Cleaning” means the documentation to be provided by the Authority which sets out their approach and minimum standards for Environmental Cleaning;

“Transition Manager” means the individual appointed by Project Co pursuant to Section 2.3 of this Schedule to lead and manage the process of transition to facilitate Service Commencement;

“Transition Steering Committee” means the committee established by Project Co pursuant to Section 2.3(d) of this Schedule to coordinate the entire transition process including but not limited to the Services and Equipment from the existing to the new Facility; and

“Utility Management Services” has the meaning set out in Section 5.5 of this Schedule.

2. ADMINISTRATION

2.1 Operating Period Representatives

- (a) Not less than one year before the Target Service Commencement Date, each of the parties will designate in writing a person (the **“Operating Period Representative”**) to be that party’s single point of contact with respect to the Operating Period and the Services.
- (b) Subject to limits of authority pursuant to Section 2.1 of this Agreement, a party’s Operating Period Representative will have full authority to act on behalf of and bind the party with respect to Services, except an Operating Period Representative will not have the authority to execute or to agree to any amendments or to give any waivers of this Agreement.
- (c) Project Co’s Operating Period Representative will be a Key Individual. A party’s Design and Construction Representative may also be the party’s Operating Period Representative.

- (d) Subject to Section 2.8 of this Agreement in respect of Key Individuals, a party may at any time and at its discretion by written notice to the other party change the person appointed as its Operating Period Representative. If at any time a party objects to the Operating Period Representative of the other party then the other party will give reasonable consideration to replacing the Operating Period Representative with a person reasonably acceptable to the objecting party.
- (e) Except as otherwise set out in this Agreement, all costs or expenses incurred by or with respect to a party's Operating Period Representative will be for the account of that party.

2.2 Operating Period Committee

- (a) Not less than one year before the Target Service Commencement Date, the Authority and Project Co shall establish, and will maintain throughout the Operating Period, a joint liaison committee (the "**Operating Period Joint Committee**") consisting of the Operating Period Representatives and such other members as the parties may agree from time to time.
- (b) The purpose of the Operating Period Joint Committee is to provide a formal forum for the parties to consult and cooperate in all matters relating to the Facility during the Operating Period together with any issues arising with respect to commissioning prior to the Service Commencement Date. Any member appointed to the Operating Period Joint Committee will not have any duties or obligations arising out of such appointment independent of such member's duties or obligations to the party making such appointment.
- (c) The Operating Period Joint Committee:
 - (1) will only have the authority as expressly delegated to it by the Authority and Project Co, and both parties will give reasonable consideration to delegating appropriate authority to permit efficient decision making with respect to the Facility and the Services;
 - (2) may strike, establish terms of reference for, delegate authority and appoint members having the necessary experience and qualifications to such sub-committees as the Operating Period Joint Committee may determine are necessary from time to time and all such sub-committees will report to the Operating Period Joint Committee;
 - (3) will establish protocols and procedures for undertaking the tasks and responsibilities delegated to it, including a co-operative and consultative process to review all Plans submitted to it pursuant to Section 4.8 of this Schedule;
 - (4) may make recommendations to the parties on all matters relating to the Facility and the Services, which the parties may accept or reject in their complete discretion; and

- (5) will have no authority to agree to any amendments or to give any waivers of this Agreement.
- (d) Subject to the provisions of this Agreement, the members of the Operating Period Joint Committee may adopt such procedures and practices for the conduct of the activities of the Operating Period Joint Committee as they consider appropriate from time to time and may:
 - (1) invite to any meeting of the Operating Period Joint Committee such other (non-voting) persons as a member may decide; and
 - (2) receive and review a report from any person agreed by the members of the Operating Period Joint Committee.
- (e) Recommendations of the Operating Period Joint Committee must be unanimous and any matters which cannot be resolved by the Operating Period Joint Committee may be referred to the Dispute Resolution Procedure by either the Authority or Project Co.
- (f) The Operating Period Joint Committee will meet (unless otherwise agreed by its members) at least once each month at a space provided by the Authority, and from time to time as necessary. Any member of the Operating Period Joint Committee may convene a meeting of the Operating Period Joint Committee at any time. Meetings of the Operating Period Joint Committee will be convened on not less than 10 Business Days' notice (which will also identify the agenda items to be discussed at the meeting) provided that in an urgent situation a meeting may be called at any time on such notice as may be reasonable in the circumstances.
- (g) Minutes of all recommendations and meetings of the Operating Period Joint Committee will be kept by Project Co in accordance with Schedule 14 [Records and Reports] and copies circulated promptly to the parties within five Business Days of the making of the recommendation or the holding of the meeting.

2.3 Transition

- (a) Project Co shall be responsible for the management of the overall transition program including but not limited to Services and the Equipment and the Authority shall provide relevant information as requested by Project Co and shall cooperate with Project Co's transition efforts. Project Co shall provide resources and methodology to assess the Authority operations, and develop an appropriate transition strategy and plan.
- (b) Project Co shall staff their transition team with the appropriate level and quantity of project resources to support the transition elements of the Start-up Plan.
- (c) Project Co shall appoint a Transition Manager who shall be responsible for integrating the work activity across the multiple transition program work streams during the transition period. Key responsibilities that shall be managed by Project Co throughout the transition include:

- (1) overall transition responsibility with focus on key milestones and dependencies;
 - (2) execution of the transition elements of the Start-up Plan in accordance with the Project Schedule;
 - (3) weekly status reporting by Project Co to update key stakeholders from the Authority with regard to transition progress and issues;
 - (4) issue log issued at regular intervals, providing a summary of issues that must be addressed to ensure the transition program is successful; and
 - (5) ensure sufficient training of all stakeholders prior to the Service Commencement Date.
- (d) Project Co shall establish a joint Transition Steering Committee to oversee the development and implementation of the transition. The Transition Steering Committee shall be comprised of senior representatives from Project Co and the Authority who have the authority to address matters that may arise during the transition.

2.4 Authority Not Responsible for the Services

The Authority's rights of review, acceptance, approval or confirmation of compliance with respect to any aspect of the Services will be for the Authority's benefit only, and no acceptance, approval or confirmation of compliance by the Authority's Operating Period Representative or other representative of the Authority will in any way relieve Project Co of its obligation for all aspects of the Services except as may be expressly set out in this Agreement.

3. PERFORMANCE OF SERVICES

3.1 Delivery of Services

Project Co shall at all times during the Operating Period provide the Services in accordance with the:

- (a) specifications set out in this Schedule and all Appendices to this schedule;
- (b) Proposal Extracts (Services); and
- (c) operational Plans then in effect.

3.2 Permits for Services

Except as expressly provided otherwise in this Agreement, Project Co shall obtain all Permits required for the performance of the Services. Project Co shall keep the Authority's Operating Period Representative fully informed of the details of all discussions and negotiations with Governmental Authorities with respect to all Permits for which it is responsible and, upon request from the Authority's Operating Period Representative, Project Co shall provide to the Authority copies of all documentation and correspondence with a Government Authority relating to such Permits. Project Co shall provide reasonable advance notice to the Authority of any meetings with Governmental Authorities (where practicable) and upon request by the Authority a representative of the Authority may attend any such meetings. Project Co assumes all risk

and costs arising in relation to Permits for which Project Co is responsible as described in this Section 3.2, including delays to the Project Schedule arising from delays in obtaining Permits or inability to obtain Permits, conditions of obtaining Permits, or amendments to Permits as may be required.

The Authority shall provide Project Co with such information within the Authority's possession, and co-operate with Project Co, as Project Co may reasonably require in relation to all Permits for which Project Co is responsible.

3.3 Standards

Project Co shall at all times during the Operating Period provide the Services:

- (a) in accordance with the standards set out in this Schedule;
- (b) in compliance with all applicable Laws;
- (c) in compliance with all applicable Authority Policies and all such Authority Policies will be interpreted to apply to Project Co and its Sub-Contractors and employees in the same manner as applicable to the employees and sub-contractors of the Authority;
- (d) to the standards required to maintain the Facility's full accreditations (the "**Accreditations**") under:
 - (1) Accreditation Canada;
 - (2) the Diagnostic Accreditation Program of the College of Physicians and Surgeons;
 - (3) Health Canada;
 - (4) Enhanced Water Quality Assurance (EWQA);
 - (5) the Public Health Agency of Canada; and
 - (6) the Canadian Food Inspection Agency,to the extent the Services contribute to the maintenance of the Accreditations;
- (e) in a manner based on sound technical and operational procedures in accordance with Good Industry Practice; and
- (f) to the same standards that an experienced, prudent, and knowledgeable long term owner of a comparable public health care facility in Canada would employ, taking into account the age and use of the comparable facility.

If one or more of the foregoing standards is applicable to any particular Service, then the highest of such standards will apply, provided that in all cases such standard or standards will be applied taking into account the age, use and reasonable wear and tear of the Facility.

3.4 Changes to Authority Policies

If the Authority changes any Authority Policies, including by any amendments or additional policies referenced in the definition of "Authority Policies", and such changes to Authority Policies are a Change and might reasonably be expected to result in a material increase in Project Co's costs of performing the Services, the terms of Schedule 6 [Changes, Minor Works and Innovation Proposals] will apply.

4. OPERATING PERIOD PLANS

4.1 Start-up Plan

Project Co shall prepare in consultation with the Design-Builder and the Service Provider one year prior to the Target Service Commencement Date a Start-up Plan incorporating the following:

- (1) a schedule identifying the tasks to be completed prior to the Service Commencement Date and the targeted completion dates of such tasks so that Project Co shall be in a position to commence delivery of the Services on the Service Commencement Date;
- (2) a detailed description of the transition strategy, schedule and resourcing to be implemented by Project Co;
- (3) the Annual Service Plan for the first 12 months of the Operating Period;
- (4) a preliminary Five Year Maintenance Plan;
- (5) a preliminary Environmental Management Plan;
- (6) a preliminary Energy Management Plan;
- (7) a preliminary Services Quality Plan;
- (8) a preliminary Life Cycle Plan; and
- (9) a detailed description of all elements of the Performance Monitoring Program and how such program will be implemented at the Service Commencement Date.

The Start-up Plan must be reasonable having regard to the requirements of this Agreement and will be developed and finalized as follows:

- (a) the Authority will, acting reasonably, make itself available to consult with Project Co and the Services Provider in connection with the development of the Life Cycle Report and the Start-up Plan;
- (b) Project Co shall deliver preliminary drafts at the 85% completion level and in accordance with Good Industry Practice of the Start-up Plan to the Authority not less than 240 days before the Target Service Commencement Date, failing which the Authority will be entitled to make a Deduction of:

- (1) [REDACTED] for each week, or part thereof, from the date falling 240 days before the Target Service Commencement Date until Project Co has delivered to the Authority a preliminary draft of the Start-up Plan,

provided that if Project Co has not delivered to the Authority a preliminary draft of the Start-up Plan, as the case may be, by the date falling 150 days before the Target Service Commencement Date, the Deduction applicable under this Section (b) will increase to [REDACTED];

- (c) the Authority will provide its comments, if any, on the preliminary drafts of such Plan to Project Co within 40 days of receipt of the preliminary drafts;
- (d) Project Co shall deliver revised drafts of the Start-up Plan to the Authority not less than 40 days after receiving the Authority's comments on the preliminary drafts of such Plan, failing which, the Authority will be entitled to make a deduction of:
 - (1) [REDACTED] for each week, or part thereof, after the date falling 40 days after the Authority delivered its comments on the preliminary draft of the Start-up Plan;
- (e) the Authority will, within 15 Business Days of receipt of the revised drafts, advise Project Co whether the Authority accepts the Start-up Plan, and if the Authority does not accept such Plan the Authority will provide its reasons for such non-acceptance in sufficient detail to allow Project Co to address them;
- (f) if the Authority does not accept the Start-up Plan, the parties will, acting reasonably, diligently work together with a view to revising the Start-up Plan to address the Authority's reasons for non-acceptance;
- (g) if the Authority has not accepted the Start-up Plan by the date that is 120 days before the Target Service Commencement Date, Project Co may refer the dispute to the Dispute Resolution Procedure to determine whether Project Co's proposed Start-up Plan is reasonable;
- (h) if the Authority has not accepted the Start-up Plan by the Target Service Commencement Date, unless such Plan has been determined to be reasonable under the Dispute Resolution Procedure, the Authority will be entitled to make a Deduction of:
 - (1) [REDACTED] for each week, or part thereof, after the Service Commencement Date until the Start-up Plan has been accepted by the Authority or it is determined through the Dispute Resolution Procedure that Project Co's proposed Start-up Plan is reasonable;
- (i) any Deduction the Authority is entitled to make pursuant to this Section 4.1 will be made from the first Service Payment(s) payable to Project Co, or subsequent Service Payments with respect to Deductions arising from Section 4.1(h), payable to Project Co; and

- (j) Deductions made pursuant to this Section 4.1 will not be counted for the purposes of Sections 11.1 or 12.1(h) of this Agreement or 6.7 or 6.8 of this Schedule 4.

4.2 Annual Service Plans

Project Co shall establish and implement an annual service plan (the “**Annual Service Plan**”) for the delivery of the Services in accordance with the terms of this Agreement and Good Industry Practice which will include:

- (a) detailed operational policies, procedures and practices for the Facility and the Services including the methods by which Project Co shall deliver the Services such that they:
 - (1) are consistent with the Appendices to this Schedule 4;
 - (2) will not interfere in any material respect with and will be complementary to the delivery of health care and other related services by the Authority and Authority Persons and use of the Facility by Facility Users; and
 - (3) have regard for the needs and interests of all Facility Users;
- (b) a detailed organizational and staffing plan for all employees of Project Co, the Service Provider and Sub-Contractors which includes:
 - (1) provision of:
 - (A) sufficient and appropriately qualified, licensed, trained, experienced and competent employees or Sub-Contractors with the skills necessary to perform the Services; and
 - (B) a designated site manager or responsible delegates who will be contactable by the Authority and one of whom will be available at the Facility within one hour's notice from the Authority;
 - (2) policies and procedures with respect to:
 - (A) occupational health and workplace safety including:
 - (i) infection control policies (including routine precautions, isolation, hand washing, blood, body fluid protocols, Legionella precautions, etc.) consistent with those of the Authority in effect for the Facility;
 - (ii) the provision of immunization and infection testing programs consistent with those of the Authority in effect for the Facility, including those for influenza, Hepatitis B and Tuberculosis or other communicable diseases and otherwise to meet the requirements of Section 3.5(b) of Appendix 4A [General Management Services];

- (iii) personal hygiene and hand washing;
 - (iv) the provision of appropriate dress and appropriate personal protective equipment (gowns, face shields, masks, hard hats, safety vests, safety footwear, eye protection, hearing protection, arc-flash protection etc.);
 - (v) the provision of identification systems reasonably required by the Authority;
 - (vi) appropriate rules of conduct for the Facility;
 - (vii) first aid training; and
 - (viii) use of all applicable equipment;
 - (B) confidentiality and privacy policies consistent with those of the Authority in effect for the Facility;
 - (C) appropriate Facility orientation and job training; and
 - (D) responding to codes and emergency alarms and procedures used by Project Co and the Authority at the Facility;
- (3) procedures for reporting to the Authority any employee of Project Co, the Service Provider or any Sub-Contractor:
- (A) suffering from any illness which may compromise the health or safety of any Facility User; and
 - (B) instances of any employee of Project Co, the Service Provider or any Sub-Contractor having had contact with any person suffering from any illness which may compromise the health or safety of any Facility User;
- (4) procedures for obtaining and reviewing with the Authority criminal records checks for all new employees of Project Co, the Service Provider or any Sub-Contractors (and their employees) directly employed in the provision of the Services and:
- (A) ensuring no such persons commence work until the results of a recent criminal record check is received, reviewed and is satisfactory to the Authority; and
 - (B) terminating the employment of any person whose criminal record is not satisfactory to the Authority;
- (c) details of any proposed amendments to the Performance Monitoring Program and the methods by which Project Co shall satisfy the reporting requirements described in Section 6 of this Schedule 4;

- (d) provision for the training and re-training of all Facility Users designated by the Authority, acting reasonably, including the Authority's employees, contractors and sub-contractors, physicians, students and volunteers engaged at the Facility, as to the use and operation of the Help Desk, communication systems and all other electronic monitoring systems and equipment provided by Project Co;
- (e) an auditable quality assurance control plan based on Good Industry Practice and ISO9001 and details, changes and specific areas targeted for improvement as part of the Services Quality Plan for the Services and all aspects of the Facility for which Project Co is responsible under this Schedule 4, including preparing, in conjunction with the Authority, and implementing annual comprehensive surveys of the Services, and surveys to receive direct feedback from Facility Users regarding the delivery of the Services at the task-specific level;
- (f) a comprehensive cleaning plan for the Facility including details with respect to Planned Periodic Cleaning, Reactive Cleaning, Enhanced Cleaning and Outbreak Cleaning including:
 - (1) daily and cyclical work routines and cleaning schedules for all Planned Periodic Cleaning, including routine cleaning and cyclical deep cleaning of the Cleaned Elements;
 - (2) cleaning and staffing schedules for Planned Periodic Cleaning and Reactive Cleaning, including patient room discharge cleans and post-procedural cleans of surgical and birthing suites;
 - (3) routine and restorative floor cleaning plan and program, including cleaning frequencies and materials;
 - (4) an upholstery cleaning, care and maintenance plan and program;
 - (5) an exterior area cleaning program for exterior areas of the Facility included in the Cleaned Elements; and
 - (6) details of all cleaning products, including Material Safety Data Sheets, to be used in the Facility all of which must be approved by the Authority as meeting infection control and workplace health and safety personnel standards then in effect;
- (g) a comprehensive catering plan for the Facility including details with respect to:
 - (1) daily meal and snack times for delivery to wards and patient dining areas;
 - (2) opening times for staff/visitor catering;
 - (3) sample menu plan for patient catering (typically a rolling 3 or 4 week menu);
 - (4) protocol for food ordering by patients;
 - (5) protocol for ordering meals/snacks outside meal times;

- (6) staffing schedules;
 - (7) details of any food hygiene accreditations or audits;
 - (8) procedures for monitoring food waste.
- (h) a comprehensive plan for carrying out monthly and annual audit procedures in accordance with the Cleaning Outcome Standards and the Territorial Guidelines for Environmental Cleaning;
- (i) the development, maintenance and implementation of a system to record:
- (1) failures to attain the Cleaning Outcome Standards and the Territorial Guidelines for Environmental Cleaning; and
 - (2) the development and implementation of actions to remedy such failures;
- (j) details of all:
- (1) maintenance undertaken during the previous year, including a summary of all Service Failures and Unavailability Events incurred and corrective actions undertaken including service requests; and
 - (2) Scheduled Maintenance plans for the ensuing year, including:
 - (A) date and time when the work is scheduled to be performed;
 - (B) location of the work to be undertaken;
 - (C) identification of activities which may cause disruption to the Authority or other Facility Users and the methods by which Project Co shall make appropriate accommodations to minimize such disruptions;
 - (D) a risk assessment, including with respect to health and safety; and
 - (E) any changes proposed to Maintenance Access Times either by the Authority or by Project Co;
- (k) a comprehensive preventive maintenance program comprised of planned and scheduled cyclical maintenance of all Maintained Elements planned, scheduled, controlled and monitored utilizing the CMMS and including:
- (1) hierarchical based component identification utilizing ASTM Uniformat II (E1557-97) Classification of Building Elements;
 - (2) description (make, model, serial #, capacity, efficiency rating, etc);
 - (3) location;
 - (4) priority classification;

- (5) unique identification code;
 - (6) maintenance job plan description including:
 - (A) detailed maintenance and testing procedures;
 - (B) warranty requirements;
 - (C) parts and consumables;
 - (D) regulatory or statutory requirements; and
 - (E) special instructions;
 - (7) frequency;
 - (8) scheduled dates;
 - (9) maintenance history including planned and unplanned;
 - (10) service provider (staff or contractor);
 - (11) condition assessment, status and test results; and
 - (12) notes including inspection observations, recommendations and comments;
- (l) provision for:
- (1) updating the cable infrastructure operational plan and communicating any such updates to the Authority as required by the Authority; and
 - (2) evaluating the maximum Facility demand for services and utilities, including the required thermal energy consumption rate and the normal power and emergency power requirements, and communicating such information to the Authority;
- (m) provision for undertaking:
- (1) routine inspection and testing and servicing, in accordance with the requirements of the insurers of the Project, recommended manufacturers' guidance and Good Industry Practice, of:
 - (A) Building Systems including: Heating, Ventilation and Air Conditioning (HVAC) systems, controls, plumbing and water systems, boilers and related systems and components, elevators, lifting and conveying devices, mechanical systems, lighting and electrical distribution systems, calorifiers and sterilizers;
 - (B) life safety and emergency systems including: standby generators and associated transfer switches, uninterrupting power supplies (UPS) standby domestic pumps, fire alarms, fire fighting equipment and

suppression systems, security systems and devices, emergency lighting systems and exit signs, voice communication systems, medical gas systems, demineralized water system for heating plant, potable water storage, fuel storage, etc.; and

- (C) building envelope, structural systems, building finishes and fabric including: floors, walls and ceiling coverings, paint, hardware, windows, doors, cladding, roofing systems, and other architectural and structural components;
- (2) testing for legionella;
- (3) testing, labeling and recording of all portable appliances, including:
 - (A) testing and certifying all portable test equipment, pressure gauges and recording equipment;
 - (B) testing and certifying all fixed instrumentation and will take the necessary action to repair, replace and adjust such devices as required; and
 - (C) ensuring that all test equipment is itself tested and carrying the necessary valid certification;
- (4) commissioning and re-commissioning plans for all new plant operations, systems and equipment; and
- (5) a comprehensive inspection and maintenance program of all parking structures in the manner contemplated in CAN/CSA S413 – 2007;
- (n) an analysis of historical operating performance trends and identification of potential service adjustments required for improved delivery of the Services to the Authority and Facility Users;
- (o) comprehensive emergency code response plans, including fire (code red), emergency, disaster preparedness, post-disaster operational and contingency response plans for the Facility which are in accordance with the territorial emergency response management system, local emergency response plan and integrated and consistent with those of the Authority, which will include:
 - (1) plans and procedures for:
 - (A) Project Co's role in fire safety and response in conjunction with the Authority and the relevant fire officials, including fire drills on all work shifts;
 - (B) Project Co's role in the evacuation of the Facility in the event of fire or other emergencies;

- (C) evacuation of areas of the Facility or Project Co's role in a declared outbreak, pandemic or emergency;
 - (D) Project Co's role during and after a natural disaster such as flood or earthquake;
 - (E) Project Co's business contingency and service resumption plans;
 - (F) Project Co's role in an evacuation event (code green);
 - (G) Project Co's role in a mass casualty event (code orange);
 - (H) Project Co's role in a missing patient event (code yellow);
 - (I) Project Co's role in a child abduction event (code pink);
 - (J) Project Co's role in a bomb threat event (code black);
 - (K) Project Co's role in an aggression event (code white);
 - (L) Project Co's role in a hazardous spill event (code brown); and
 - (M) Project Co's role in a critical infrastructure failure event (code grey);
- (2) training of all Project Co staff with respect to each contingency code, including fire safety;
 - (3) maintenance of access to the Facility by emergency vehicles by roadway and alternative fire paths and ensuring that all such routes are well marked by way of road signs and the use of hatched road markings;
 - (4) provision that all available site-based Project Co staff will provide whatever assistance can safely be provided in response to an emergency including:
 - (A) responding to a fire or other emergency alarm;
 - (B) reporting blocked fire access routes to the Help Desk and to the Authority;
 - (C) assisting the Authority to limit unauthorized access to the scene of a fire or other emergency;
 - (D) assisting in the evacuation of the affected areas; and
 - (E) liaising with external agencies, including the Fire Department as part of its response in relation to an incident; and
 - (5) confirmation that:

- (A) all emergency procedures and contingency plans including, fire compartmentalization design, provision of escape routes and provision of fire fighting equipment and systems are compliant with the requirements of this Agreement; and
- (B) the fire alarm system is properly certified;
- (p) plans detailing procedures for responding to Unavailability Events and Service Failures;
- (q) protocols and procedures for cooperation with the Authority and Authority Persons in respect to the Authority's operations at the Facility, including:
 - (1) repair and maintenance protocols for all infrastructure, utilities, systems and equipment integrated or connected with those of the Authority or other Facility Users;
 - (2) the movement of waste by Project Co from the Facility to the sole central waste disposal area and the operation of compactors and other waste disposal equipment in such disposal area; and
 - (3) receipt by the Authority at the main loading dock of goods and supplies required by Project Co to perform the Services, and Project Co's movement of such goods and supplies to the Facility;
- (r) a procedure to ensure regular liaison and communication between Project Co's managers and supervisors and the Authority and Authority Persons to facilitate the delivery of the Services and to ensure Project Co is made aware of the day-to-day specific requirements of the Facility Users;
- (s) details of any proposals for changes to the manner in which Project Co delivers the Services and the anticipated impact of those changes on the Authority and Facility Users;
- (t) a description of the arrangements and services to be provided by Project Co in respect of religious observances and other special cultural occasions which the Authority notifies Project Co are to be observed and recognized at the Facility provided any such arrangements and services will be consistent with those commonly recognized within the community; and
- (u) an update of the Five Year Maintenance Plan, the Life Cycle Plan, the Environmental Management Plan, the Energy Management Plan and the Services Quality Plans, as set out in Section 4.9(c)(2) detailing the elements and schedule of each such Plan to be implemented during the ensuing 12 month period.

4.3 Five Year Maintenance Plan

Project Co shall establish and implement throughout the Operating Period a rolling five year maintenance plan (the "**Five Year Maintenance Plan**") for the Facility and the Maintained Elements based on Good

Industry Practice which will include details and scheduling of planned, preventative and replacement maintenance programs, including those set out in the Life Cycle Plan, to be undertaken during that period.

4.4 Environmental Management Plan

Project Co shall establish and implement throughout the Operating Period an environmental management plan (the “**Environmental Management Plan**”) for the Facility based on Good Industry Practice which will include Project Co’s policies and procedures for:

- (a) managing all solid waste streams in accordance with the Solid Waste Management Plan;
- (b) maintaining a safe environment through the use of processes, practices, materials and products that avoid or minimize the production or disposal of Hazardous Substances;
- (c) managing and maintaining inventories of hazardous materials on the Lands, developing handling procedures and providing reporting in the format required by the Authority;
- (d) ensuring that the Services are integrated and performed in a careful and environmentally responsible fashion to minimize adverse effects on health and the environment;
- (e) managing and minimizing air and waste water emissions including greenhouse gases, halocarbons and other ozone depleting substances;
- (f) managing fuel storage tanks;
- (g) managing sound and light pollution from the Facility;
- (h) implementing a proactive indoor air quality (IAQ) management program;
- (i) ensuring that all materials used in the Maintenance of the Maintained Elements over the life of the Facility meet the low VOC requirements described in Schedule 3 [Design and Construction Specifications];
- (j) ensuring drinking water quality and safety;
- (k) implementing a proactive mould growth and legionella prevention program;
- (l) developing a Facility Users’ environmental awareness program in conjunction with the Authority;
- (m) adhering to, updating and maintaining as current the operational policies, procedures and practices for the performance of the Services; and
- (n) reporting to the Authority on the development and implementation of all programs and procedures intending to reduce the environmental impact of the delivery of the Services.

4.5 Energy Management Plan

Project Co shall establish and implement throughout the Operating Period an energy management plan (the “**Energy Management Plan**”) for the Facility based on Good Industry Practice which will include Project Co’s policies and procedures for:

- (a) ensuring full commitment to responsible energy management without comprising the working environment and safety of Authority Persons or Facility Users;
- (b) understanding the energy usage and identifying inefficient practices;
- (c) setting agreed objectives and targets to reduce energy consumption;
- (d) managing the energy usage and reducing the energy operating costs by implementing sound operating and maintenance practices including the maintenance of efficiency ratings of all Building Systems; and
- (e) developing and promoting an energy awareness program for all Facility Users in conjunction with the Authority.

The parties will monitor compliance with the Energy Management Plan at each meeting of the Operating Period Joint Committee. Where Project Co does not comply with the Energy Management Plan, then Section 4.3 of Appendix 2C [Energy] will apply to adjust the Annual Energy Target by an appropriate amount to reflect the effect of non-compliance.

4.6 Services Quality Plan

Project Co shall establish and implement throughout the Operating Period an auditable services quality plan (the “**Services Quality Plan**”) and quality assurance system based on Good Industry Practice and the requirements of the Authority’s quality framework as amended from time to time, for the Services, which will:

- (a) track all non-conformances in the performance of the Services;
- (b) form part of the Performance Monitoring Report;
- (c) include a remedial action plan and continuous business improvement process to address non-conformances including Unavailability Events and Service Failures; and
- (d) include preparing and implementing surveys, in conjunction with the Authority, to receive feedback from Facility Users regarding the delivery of the Services.

All quality assurance and quality monitoring required by this Schedule 4 will form part of, but will not be construed as limiting, Project Co’s quality assurance obligations as set out in Schedule 2 [Design and Construction Protocols].

4.7 Life Cycle Plan

Project Co shall establish and implement throughout the Operating Period in conjunction with, and include as a component of, the Five Year Maintenance Plan, an asset life cycle and rehabilitation plan (the “**Life Cycle Plan**”) for all Maintained Elements based on the Life Condition Report, including an up to date version of the model plan attached as Appendix 4M [Life Cycle Schedule] that sets out the proposed parameters for the anticipated life of major elements, and Good Industry Practice which will include:

- (a) the methods and practices by which Project Co shall:
 - (1) ensure the long-term integrity and ongoing operational serviceability of the Facility;
 - (2) preserve the design and performance criteria for all aspects of the Facility;
 - (3) ensure that on the Expiry Date all aspects of the Facility for which Project Co is responsible are functional to the standard specified in Schedule 20 [Handback Requirements];
 - (4) minimize, to the extent reasonably possible, disruption to the Authority’s activities and programs at the Facility; and
 - (5) initiate emergency procurement to enable timely replacement and response to the unexpected failure of elements of the Facility;
- (b) specific refurbishment and replacement strategies, key assumptions and annual cost provisions for all aspects of the Facility for which Project Co is responsible, categorized by major elements; and
- (c) the development, management and operation of a comprehensive electronic inventory control system and asset register (based on the initial Asset Register established under Schedule 2 [Design and Construction Protocols] and as updated) that provides up-to-date records for all aspects of the Facility including building architectural, mechanical and electrical elements and systems.

4.8 Preparation of Plans

Project Co shall work co-operatively with the Authority’s Operating Period Representative in the preparation of all Plans and will submit draft Plans for review and comment by the Operating Period Joint Committee prior to formal submission of such Plans to the Authority pursuant to Section 4.9 of this Schedule.

4.9 Submission of Plans to the Authority

- (a) Start-up Plan:

No later than 240 days prior to the Target Service Commencement Date, Project Co shall submit to the Authority’s Operating Period Representative the Start-up Plan;

- (b) Annual Service Plans:
 - (1) In accordance with Section 4.1 of this Schedule 4, the first Annual Service Plan will be submitted with the Start-up Plan.
 - (2) With respect to each Contract Year (commencing with the Contract Year that starts April 1 of the year following the calendar year in which the Service Commencement Date occurs), Project Co shall no later than 30 days prior to the start of the Contract Year submit to the Authority's Operating Period Representative, the Annual Service Plan for the relevant Contract Year.
- (c) Five Year Maintenance Plans, Life Cycle Plans, Environmental Management Plans, Energy Management Plans and Services Quality Plans:
 - (1) In accordance with Section 4.1 of this Schedule 4, the Five Year Maintenance Plan, the Life Cycle Plan, Environmental Management Plan, Energy Management Plans and Services Quality Plans will be submitted with the Start-up Plan.
 - (2) In accordance with Section 4.2(u) of this Schedule 4, updates of the Five Year Maintenance Plan, the Life Cycle Plan, Environmental Management Plan, Energy Management Plans and Services Quality Plans will be included with updates of the Annual Service Plans.

The Authority will review the Plans and may, but will not be obliged to, provide comments to Project Co within 35 days of receipt proposing changes to such Plans that the Authority considers desirable or necessary. Project Co shall have due regard for any comments which the Authority may have in relation to any of such Plans and will attend such meetings as the Authority or the Authority's Operating Period Representative may reasonably require in order to discuss the Authority's comments and proposals provided that:

- (d) it will remain Project Co's responsibility to ensure that its obligations in relation to the Facility and the Services are carried out in accordance with this Agreement; and
- (e) no comments or lack of comments will impose any liability on the Authority or in any way relieve Project Co of its obligations under this Agreement.

4.10 Failure to Prepare Plans

Any failure of Project Co to prepare and submit to the Authority any Plan in accordance with this Section 4 will be deemed to be a High Service Failure on each day the Plan is due and not submitted.

4.11 Amendment of Plans

Project Co shall follow the review procedure described in Section 4.9 of this Schedule 4 prior to amending any Plan.

4.12 Authority Comments

The following will apply to the changes to Plans proposed by the Authority:

- (a) comments provided by the Authority proposing changes to Plans submitted to it by Project Co under the review procedure described in Section 4.9 of this Schedule 4, are not Changes and will be completed at Project Co's cost (except to the extent that any such requested change would constitute a material change to this Agreement, the terms of Schedule 6 [Changes, Minor Works and Innovation Proposals] will apply and such change will not be implemented except under a Change Certificate issued by the Authority); and
- (b) if and to the extent the Authority requires an amendment to any of the Plans that it has previously reviewed and commented on (other than an amendment required to bring the Services into conformity with the Services Protocols and Specifications) then such amendment will be a Change and the terms of Schedule 6 [Changes, Minor Works and Innovation Proposals] will apply.

5. SERVICES

5.1 General Management Services

Project Co shall perform the general management services described in Appendix 4A (the "**General Management Services**").

5.2 Help Desk Services

Project Co shall perform the help desk services described in Appendix 4B (the "**Help Desk Services**").

5.3 Plant Services

Project Co shall perform the plant services described in Appendix 4C (the "**Plant Services**").

5.4 Housekeeping and Waste Management Services

Project Co shall perform the housekeeping and waste management services in Appendix 4D (the "**Housekeeping and Waste Management Services**").

5.5 Utility Management Services

Project Co shall perform the utility management services described in Appendix 4E (the "**Utility Management Services**").

5.6 Roads, Grounds and Landscape Maintenance

Project Co shall perform the roads, grounds and landscape maintenance services described in Appendix 4F (the "**Roads, Grounds and Landscape Maintenance Services**").

5.7 Parking Management Services

Project Co shall perform the parking management services described in Appendix 4G (the “**Parking Management Services**”).

5.8 Environmental and Sustainability Services

Project Co shall perform the environmental and sustainability services described in Appendix 4H (the “**Environmental Sustainability Services**”).

5.9 Pest Control Services

Project Co shall perform the pest control services described in Appendix 4I (the “**Pest Control Services**”).

5.10 Security and Surveillance Services

Project Co shall perform the security and surveillance services described in Appendix 4J (the “**Security and Surveillance Services**”).

5.11 Laundry and Linen Services

Project Co shall perform the laundry and linen services described in Appendix 4K (the “**Laundry and Linen Services**”).

5.12 Catering Services

Project Co shall perform the catering services described in Appendix 4L (the “**Catering Services**”).

5.13 Life Cycle Schedule

Project Co shall perform the life cycle schedule described in Appendix 4M (the “**Life Cycle Schedule**”).

5.14 Market Testing Procedure

Project Co shall perform the market testing procedure described in Appendix 4N (the “**Market Testing Procedure**”).

5.15 Proposal Extracts Services

Project Co shall perform the services in accordance with the services proposal extracts set out in Appendix 4O [Proposal Extracts (Services)].

5.16 Additional Services

Project Co agrees that in addition to the Services it will provide all other ancillary and additional services as may be reasonably required to achieve the standards and specifications set out in this Agreement.

6. PERFORMANCE MONITORING AND REPORTING

6.1 Project Co Performance Monitoring

Project Co shall at all times during the Operating Period have in place a Performance Monitoring Program pursuant to which Project Co shall monitor the delivery of the Services which will include:

- (a) all electronically recorded or written data, information or communications made in respect of the Services and all aspects of the Facility for which Project Co is responsible under this Schedule 4, including such data, information or communications made to or generated by the BMS, the computerized CMMS, the Help Desk, the Project Co quality assurance system and any other information system used by Project Co in connection with the Facility and the Services;
- (b) all other Project Co self-monitoring and reporting;
- (c) Project Co reporting all Demand Requisitions through the Help Desk, including those Demand Requisitions reported to or identified by Project Co separately from the Help Desk, with the intent that the Help Desk will produce a complete record of all Demand Requisitions; and
- (d) all reports in Project Co's possession or otherwise available to Project Co made by or to any Governmental Authority with respect to the Facility or the Services.

6.2 Periodic Reporting

Project Co shall prepare and deliver to the Authority's Operating Period Representative within five Business Days of the end of each Payment Period during the Operating Period a performance monitoring report (the "**Performance Monitoring Report**") as detailed in Attachment 1 of Appendix 4A [General Management Services].

Project Co shall prepare and deliver an annual Report to the Authority's Operating Period Representative within 30 calendar days of the end of each year during the Operating Period summarizing the overall performance for that annual period including all elements required under the monthly Performance Monitoring Report.

6.3 Authority Inspection and Audit

Project Co shall, on reasonable notice from the Authority:

- (a) permit the Authority to access, review and audit all records, information and reports maintained by Project Co including all Performance Monitoring Reports and other reports generated by the Performance Monitoring Program, including the methods and equipment used to calculate or determine the information therein;
- (b) ensure that the Performance Monitoring Program stores information and generates reports such that they are capable of, and readily available for, audit; and

- (c) facilitate and assist the Authority with any audit or inspection of the Facility, the Services or the Performance Monitoring Program undertaken by the Authority.

6.4 Reporting Failures

Any failure of Project Co to prepare and submit to the Authority a Performance Monitoring Report in accordance with this Schedule will be deemed to be a Medium Service Failure on the first day each Performance Monitoring Report is due and not submitted and an additional High Service Failure each day thereafter until submitted.

6.5 Reporting Errors

If any of the matters contained in a Performance Monitoring Report are incorrect or the Performance Monitoring Report fails to refer to any Unavailability Event or Service Failure that was not Rectified within the applicable Rectification Time (each of which is a “**Reporting Error**”):

- (a) Project Co shall:
 - (1) if the Reporting Error occurred other than as a result of fraud, deliberate misrepresentation, gross negligence, incompetence or wilful misconduct, or if the Reporting Error is discovered by Project Co and reported to the Authority prior to its discovery by the Authority, immediately pay to the Authority an amount equal to the amount overpaid by the Authority as a result of the Reporting Error, with interest at the Default Rate from the date of payment by the Authority to the date of repayment to the Authority; or
 - (2) if the Reporting Error occurred as a result of fraud, deliberate misrepresentation, gross negligence, incompetence or wilful misconduct, immediately pay to the Authority an amount equal to twice the amount overpaid by the Authority as a result of the Reporting Error,provided that in the first year after the Service Commencement Date, Section 6.5(a)(2) will only apply to Reporting Errors that result from wilful acts or omissions of Project Co; and
- (b) the Authority will immediately pay to Project Co an amount equal to the amount underpaid by the Authority as a result of the Reporting Error.

6.6 Parties to Advise of Reporting Errors

If at any time either the Authority or Project Co becomes aware of a Reporting Error, the party who discovers the error will immediately advise the other party of its nature and, if possible, its effect.

6.7 Increased Monitoring

If:

- (a) Project Co incurs Deductions exceeding:
- (1) ██████ (Indexed Linked) in any Payment Period in relation to the General Management Services;
 - (2) ██████ (Index Linked) in any Payment Period in relation to the Help Desk Services;
 - (3) ██████ (Index Linked) in any Payment Period in relation to the Plant Services;
 - (4) ██████ (Index Linked) in any Payment Period in relation to the Housekeeping and Waste Management Services;
 - (5) ██████ (Index Linked) in any Payment Period in relation to the Utility Management Services
 - (6) ██████ (Index Linked) in any Payment Period in relation to the Roads, Grounds and Landscape Maintenance Services;
 - (7) ██████ (Index Linked) in any Payment Period in relation to the Parking Management Services;
 - (8) ██████ (Index Linked) in any Payment Period in relation to the Environmental and Sustainability Services;
 - (9) ██████ (Index Linked) in any Payment Period in relation to the Pest Control Services;
 - (10) ██████ (Index Linked) in any Payment Period in relation to the Security and Surveillance Services;
 - (11) ██████ (Index Linked) in any Payment Period in relation to the Laundry and Linen Services;
 - (12) ██████ (Index Linked) in any Payment Period in relation to the Catering Services;
- (b) a Reporting Error (whether related to the same type of Reporting Error or not) occurs on more than three occasions in any 12 consecutive month period,

the Authority may increase its monitoring of the performance by Project Co under this Agreement and carry out any inspections and audits which it reasonably requires for a period of up to 90 days. Project Co shall reimburse the Authority for all reasonable costs and expenses incurred by the Authority in carrying out such additional monitoring, inspections and audits within five Business Days after the Authority delivers an invoice to Project Co for such amounts.

If, in any calendar month during the Operating Period, Project Co fails to attain, in accordance with the Cleaning Outcome Standards and the Territorial Guidelines for Environmental Cleaning (such as, but not limited to, NWT Infection Prevention and Control Manual best practice guidelines), a passing score in any of the Facility Average, Quality Ratio or Floor Care Ratio categories Project Co shall, within 5 days after the end of the relevant month, generate a Housekeeping Quality Report, all in accordance with Appendix 4D Housekeeping and Waste Management Services.

6.8 Replacement of Non-Performing Service Provider or Sub-Contractor

If Project Co has accrued Deductions of:

- (a) [REDACTED] (Index Linked) in any two consecutive Payment Periods or [REDACTED] (Index Linked) or more in any six consecutive Payment Periods in relation to the General Management Services;
- (b) [REDACTED] (Index Linked) in any two consecutive Payment Periods or [REDACTED] (Index Linked) or more in any six consecutive Payment Periods in relation to the Help Desk Services;
- (c) [REDACTED] (Index Linked) in any two consecutive Payment Periods or [REDACTED] (Index Linked) or more in any six consecutive Payment Periods in relation to the Plant Services;
- (d) [REDACTED] (Index Linked) in any two consecutive Payment Periods or [REDACTED] (Index Linked) or more in any six consecutive Payment Periods in relation to the Housekeeping and Waste Management Services;
- (e) [REDACTED] (Index Linked) in any two consecutive Payment Periods or [REDACTED] (Index Linked) or more in any six consecutive Payment Periods in relation to the Utility Management Services;
- (f) [REDACTED] (Index Linked) in any two consecutive Payment Periods or [REDACTED] (Index Linked) or more in any six consecutive Payment Periods in relation to the Roads, Grounds and Landscape Maintenance Services;
- (g) [REDACTED] (Index Linked) in any two consecutive Payment Periods or [REDACTED] (Index Linked) or more in any six consecutive Payment Periods in relation to the Parking Management Services;
- (h) [REDACTED] (Index Linked) in any two consecutive Payment Periods or [REDACTED] (Index Linked) or more in any six consecutive Payment Periods in relation to the Environmental and Sustainability Services;
- (i) [REDACTED] (Index Linked) in any two consecutive Payment Periods or [REDACTED] (Index Linked) or more in any six consecutive Payment Periods in relation to the Pest Control Services;

- (j) ██████ (Index Linked) in any two consecutive Payment Periods or ██████ (Index Linked) or more in any six consecutive Payment Periods in relation to the Security and Surveillance Services;
- (k) ██████ (Index Linked) in any two consecutive Payment Periods or ██████ (Index Linked) or more in any six consecutive Payment Periods in relation to the Laundry and Linen Services;
- (l) ██████ (Index Linked) in any two consecutive Payment Periods or ██████ (Index Linked) or more in any six consecutive Payment Periods in relation to the Catering Services;

the Authority may, by notice to Project Co (a “**Sub-Contractor Termination Notice**”), require Project Co to cause:

- (m) the termination of the Sub-Contract of the Sub-Contractor or Sub-Contractors, if any, delivering the Service which gave rise to such Deductions; or
- (n) if the Service which gave rise to such Deductions is being provided directly by the Service Provider, the termination of the Service Provider’s engagement to provide such Service.

Within 90 days of receipt of the Sub-Contractor Termination Notice, Project Co shall cause a replacement of such Sub-Contractor or Sub-Contractors or Service Provider (in respect of such Services), as the case may be, to be appointed in accordance with Sections 4.5 to 4.9 of this Agreement.

6.9 Authority’s Right of Access

The Authority may at all times during the Operating Period, without notice, access, audit and inspect the Facility and Project Co’s delivery of the Services so as to confirm:

- (a) the performance by Project Co of its obligations under this Agreement; and
- (b) that the Facility is being maintained in accordance with the terms of this Agreement,

provided that:

- (c) the Authority does not unreasonably interfere with the performance by Project Co of its obligations under this Agreement; and
- (d) the Authority complies with Project Co’s safety and security policies, provided that Project Co has delivered copies of such policies to the Authority and such policies do not unreasonably impair or limit the Authority’s ability to access all aspects of the Facility.

7. HANDBACK

Project Co shall carry out the Handback Requirements in accordance with Schedule 20 [Handback Requirements].

8. MISCELLANEOUS OCCUPANT SERVICES

Project Co shall provide Miscellaneous Occupant Services (i.e. general handyperson services) (the “**Miscellaneous Occupant Services**”) for requests that are not within the scope of other Project Co Services at the Facility.

These Miscellaneous Occupant Services include, but not limited to, the following types of services:

- (a) Installation or removal of pictures, shelves, display boards, minor equipment, etc.;
- (b) Set-up, reconfiguration and arrangement of furniture and modular units as necessary;
- (c) Minor relocations, small moves (e.g. box moves) and coordination for the installation of furniture (e.g. ensuring power is available);
- (d) Minor furniture and appliance repairs;
- (e) Supporting the Authority for the installation of audio visual or telecommunications or equipment required by the Authority;
- (f) Removing broken keys from locks and ensuring that the locks are functional; and
- (g) General handyperson services and other general requirements typically provided by facilities management service providers.

Miscellaneous Occupant Services do not include services requiring licensed trades.

Project Co shall provide a qualified full time equivalent (1 FTE) resource for 5 days per week, Monday to Friday, 8 hours per day to perform this work. Project Co shall advise the Authority when the volume of requests exceeds the resource’s ability to perform the work within the requested timeframe and alternate arrangements shall be made through mutual agreement between Project Co and the Authority.

Miscellaneous Occupant Services are to be initiated by the Authority or Facility Users through the Help Desk as a service request which shall define the requirements, including the work to be performed, the location, timeframe and other related information necessary to perform the Miscellaneous Occupant Services.

Project Co and the Authority shall follow the agreed protocols from the Authority for approval of work requests and allocation of any related costs, if required, to specific departments. These protocols and processes shall be developed and included as part of the Help Desk procedures.

The cost of materials and supplies for this service shall be flowed-through to the Authority at cost without mark-ups and billed monthly.

9. SITE SERVICE INTERFACES

9.1 Interfaces

Project Co:

- (a) acknowledges that there is an interface between the Services and other services delivered at the Lands and within the Facility by the Authority or Authority Persons;
- (b) will co-operate with the Authority and Authority Persons and will act reasonably in the preparation and implementation of service plans which address the coordination and integration of such services at the Lands and the Facility.

9.2 Loading Dock

Project Co shall:

- (a) co-operate with the Authority in co-ordinating the receipt and collection of all goods required to perform the Services at the main loading dock facility.

9.3 Restrictions to Access

Project Co shall be restricted from accessing the following rooms without the Authority's prior consent and/or supervision during the performance of the Services:

- 2.06.10 Blood Bank
- 2.06.11 Lab Storage
- 2.06.06 Microbiology: Microbiology Workroom
- 2.06.07 Microbiology: TB Anteroom
- 2.06.08 Microbiology: TB Work Room
- 8.01.01 Receiving and Breakout Room
- 8.01.02 Purchasing Workstation
- 8.01.03 Inventory Storage Room
- 8.01.04 Narcotics Vault
- 8.01.05 Central Production Area
- 8.01.06 Sterile Compounding/Preparation Area: Entry Vestibule (Gowning)
- 8.01.07 Sterile Compounding/Preparation Area: Sterile Ante Area- ISO 8 - USP 797
- 8.01.08 Sterile Compounding/Preparation Area: Sterile Preparation Room
- 8.01.09 Sterile Compounding/Preparation Area: Chemotherapy Prep Anteroom - ISO 7
- 8.01.10 Sterile Compounding/Preparation Area: Chemotherapy Prep Room - ISO 7
- 8.01.11 Night Cupboard
- 8.01.12 Office Suite: Office (Standard)
- 8.01.13 Office Suite: Workstation
- 8.01.14 Office Suite: Conference Room
- 9.08.03 Server Room
- 9.06.03 Health Records General Work Area
- 9.06.04 Health Records Physicians Office /Records Room
- 10.07.52 Health Records

10. MARKET TESTING

10.1 Market Testing Procedure

Project Co shall carry out Market Testing of each of the Market Tested Services in accordance with Appendix 4N [Market Testing Procedure].

APPENDIX 4A

GENERAL MANAGEMENT SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of the Agreement:

“**Business Continuity Plan**” has the meaning set out in Section 3.10(a) of this Appendix;

“**Contingency Plans**” means plans and procedures for the events listed at Section 4.2(o) and 4.2(p) of Schedule 4;

“**Facility Condition Report**” has the meaning set out in Section 3.11(e) of this Appendix;

“**Joint Technical Review**” has the meaning set out in Section 3.11(a) of this Appendix;

“**Performance Monitoring Report**” has the meaning set out in Section 6.2 of Schedule 4; and

“**Policy and Procedure Manual**” means the Project Co manual of policies and procedures for each of the Services.

2. SERVICES

2.1 General Requirements

In addition to the standards and specifications set out in Schedule 4 Services Protocols and Specifications, Project Co shall deliver the General Management Services:

- (a) 24 hours per day, 365(6) days per year;
- (b) in accordance with the requirements set out in Section 3 of this Appendix 4A; and
- (c) in a comprehensive, effective, flexible and efficient manner at all times.

3. SERVICE REQUIREMENTS

3.1 Management and Administration

GM01

Project Co shall prepare a comprehensive general management plan, updating it annually or as required, which shall include, but not be limited to, the following:

- (a) exercise reasonable and competent management and supervision of the performance of the Services at all times;
- (b) coordinate communication and liaison between Project Contractors, Sub-Contractors and Project Co, and, as may be reasonably required from time to time, between Project Contractors, Sub-Contractors and the Authority;

- (c) cooperate with and assist the Authority in the interface and coordination of other work or services delivered by the Authority and/or its contractors other than Project Co and the Service Providers and Sub-Contractors;
- (d) prepare and maintain a Policy and Procedure Manual;
- (e) subject to the Authority's requirements from time to time, implement a comprehensive system of financial and management controls relating to the delivery of the Services;
- (f) research and develop new delivery methods for the Services and apprise the Authority of the benefits of such delivery methods;
- (g) in addition to specific requirements of Schedule 16 Communication Roles, provide on request and within 24 hours information that is reasonably required for contribution to the Authority's internal and external public relations relating to the Services;
- (h) in accordance with the notification requirements established by Project Co as part of the relevant Policy and Procedure Manual established for the relevant Services, notify the Authority immediately after Project Co becomes aware of any hazard that has resulted or may result in serious injury or life threatening outcome to any person in relation to the Site, including personnel of the Authority;
- (i) in connection with the provision of the Services, liaise with:
 - (1) the Authority when undertaking or preparing to undertake action in respect of the Services which may impact upon the performance of the Authority Activities or upon the comfort and/or well being of patients, hospital employees, medical staff or visitors, including the posting of a project notification process; and
 - (2) external advisors and Governmental Authorities in respect of the Services, as reasonably required by the Authority;
- (j) be responsible for the provision of all IT and telecommunications infrastructure equipment and software necessary for the provision of the Services, which will interface with Authority systems, in consultation with the Authority's IMIT representative. Such IT and telecommunications systems shall be managed in accordance with Good Industry Practice and comply with all applicable Laws. Examples of such devices and systems shall include but not be limited to:
 - (1) Personal computers (PCs) and workstations;
 - (2) Hard drive images for PCs and workstations, printers and photocopiers;
 - (3) Network switches, wireless access points and security switches;
 - (4) Network cabling;
 - (5) Application software;

- (6) Telephone system and telephones;
- (7) Uninterruptible power supplies (UPSes); and
- (8) Wireless communications systems.

Additionally, equipment configurations (staging) and labelling shall conform with the Authority's IMIT standards and policies at all times.

3.2 Management of Services

GM02

Project Co shall:

- (a) appoint a general manager who will provide overall coordination of all Services, and who will personally (or through a designate) be the representative of Project Co at the Facility, available and contactable 24 hours per day and 365(6) days per year. Project Co shall oversee the day-to-day operations establishing necessary policies, quality assurance systems and controls assurance and will comply with the provisions of this Agreement, including requirements to comply with applicable Law and Authority Policies, all to ensure delivery of high quality services;
- (b) provide an appropriate management structure and process for ensuring compliance with the Services Protocols and Specifications throughout the Operating Period;
- (c) meet with the Authority Representative at least monthly. The meeting shall be used as a forum to discuss day to day aspects of the performance of the Agreement and to discuss and agree on the Performance Monitoring Report;
- (d) develop and maintain a Facility user guide on behalf of the Authority for use by staff and Authority employees, the content and style of which shall be approved by the Authority on an annual basis; and
- (e) make provision for and cooperate with the Authority in the management of visits by government officials, dignitaries, etc.

3.3 Performance Monitoring and Reporting

GM03

Project Co shall:

- (a) provide all performance monitoring of, and reporting in connection with, the Services, including pursuant to the Performance Monitoring Program and other reporting described in Sections 6.1 to 6.9 of Schedule 4 Services Protocols and Specifications. The occurrence of a Reporting Error will be dealt with in accordance with Section 6.5 of Schedule 4 Services Protocols and Specifications. Project Co shall ensure that it does not repeatedly submit the same or similar Reporting Errors, whether or not such Reporting Errors are related to the same or similar issues; and

- (b) Provide monthly and annual reporting with the content set out in Attachment 1 of this Appendix 4A.

3.4 Human Resources Matters

GM04

Project Co shall:

- (a) Develop and implement appropriate operational policies, procedures and practices, subject to review by the Authority, relative to human resources matters, including recruitment and orientation training and ongoing operations, which will include:
- (1) job role descriptions, tasks and responsibilities;
 - (2) reporting relationships for each job;
 - (3) physical layout of the Lands and Facility;
 - (4) interaction with lines of communication between Project Co and the Authority;
 - (5) acknowledgement of applicable Law and Authority Policies;
 - (6) Project Co policies on health and safety, and all other policies;
 - (7) use of machines and equipment relevant to the provision of the Services;
 - (8) handling, storage and use of cleaning materials and equipment, including familiarization with the Facility's materials, finishes and colour coding system;
 - (9) manual material handling (where applicable);
 - (10) patient and customer care;
 - (11) presentable employee dress codes, including protective footwear and protective clothing where required;
 - (12) maintaining a high standard of personal hygiene commensurate with their allocated tasks;
 - (13) fire risks and fire precautions, contingency plans and emergency codes;
 - (14) first aid training;
 - (15) mutual respect training as per Authority standards of conduct, workplace behaviour;
 - (16) CMMS user instruction;

- (17) confidentiality agreement;
 - (18) infection control policies;
 - (19) occupational health and safety responsibilities, and due diligence;
 - (20) Workplace Hazardous Material Information System (WHMIS);
 - (21) code of conduct, including mutual respect, workplace harassment, and violence in the workplace;
 - (22) site orientation;
 - (23) maintaining records on professional competency, including all training records;
 - (24) ensuring that all staff, in addition to the induction training are at all times properly and adequately notified, trained and instructed and the information recorded within their personal training records with regard to the task that the individual has to perform;
 - (25) ensuring all personnel are licensed, trained and members of professional associations to an appropriate level commensurate with the responsibility of the post held and tasks required to be undertaken with training records and proficiency verification records maintained as noted above and made available to the Authority for inspection upon written request;
 - (26) terms and conditions of employment, applicant screening, background checks, selection, hiring, training, supervision, compensation, bonuses, severance, pension plans and other employee benefits, discipline, dismissal, transfer and replacement;
 - (27) allowance for the exercise by any employees of rights under any applicable labour laws including union organizational efforts, recognition and/or withdrawal of recognition, representation vote, contract negotiations, the determination of an appropriate bargaining unit or units, whether to negotiate on a single-employer, coordinated or multi-employer basis, grievances, unfair labour practice charges, strikes, boycotts or other economic activity, and lockouts; and
 - (28) ensuring that all Project Co personnel, including managers, are knowledgeable regarding all of the requirements of this Appendix.
- (b) Project Co shall ensure that all new personnel involved in the delivery of any Service have received orientation training prior to their commencement at the Facility. Such an orientation course will include the relevant information from the orientation courses provided by the Authority to employees of the Authority. Project Co shall provide within the Performance Monitoring Report a list of the personnel and the date the relevant orientation course was undertaken

- (c) Project Co shall provide the Authority with updated, correct and timely information about the CMMS, which the Authority Representative can use to train and orientate Authority personnel in the use of the CMMS, as required.

3.5 Training and Ongoing Knowledge and Skills Development

GM05

- (a) Project Co shall, in addition to the orientation course referred to in Section 3.4 above, and prior to permitting any person to be involved in the delivery of any Service and at all times thereafter, ensure that all personnel are properly and adequately notified, trained, instructed and holding required certifications, in compliance with relevant applicable Law and Authority Policies, and the information recorded within their personal training record with regard to the task the individual has to perform including with regard to:
- (1) the provisions of the Agreement, including the Services Protocols and Specifications, and Plans then in effect that are relevant to the duties to be performed;
 - (2) the use of the CMMS;
 - (3) the job description, and training plans for all job functions related to that description;
 - (4) professional development plan and associated training plan for each employee;
 - (5) the Policy and Procedure Manuals relevant to the Services;
 - (6) all relevant health and safety hazards, rules, policies and procedures established by Project Co concerning health and safety at work, as required in accordance with applicable Law and Authority Policies;
 - (7) use of all machines and equipment relevant to their work areas;
 - (8) handling, storage, use and transport of chemicals and other hazardous materials;
 - (9) proper lifting and handling techniques; and
 - (10) use of personal protective equipment.
- (b) Project Co shall have in place reporting procedures and contingency plans with regard to personnel suffering from any illness including infectious diseases which may compromise the health and/or safety of any Authority employee, physician, patient or visitor and to identify instances of any personnel having knowingly had contact with any person with any illness which may compromise the health and/or safety of any Authority employee, physician, patient or visitor.
- (c) Project Co shall provide that all personnel directly employed in the provision of the Services have a good command of the English language.

3.6 Criminal Record Check

GM06

- (a) Project Co shall not permit personnel directly employed in the provision of the Services to commence work until a recent signed form of criminal record check authorization or similar document is received and the results are reviewed and are satisfactory to the Authority. Project Co shall terminate the employment of any person whose criminal record is not satisfactory to the Authority. Personnel of Project Co, the Service Provider and Sub-Contractors who may have unsupervised access to children in the ordinary course of their employment must have no criminal record relating to any offence involving children. If any such employee is charged with any offence involving children, such employee will be prohibited from performing work on the Lands. Unless requested more frequently by the Authority, every month Project Co shall, with the Performance Monitoring Report relevant to the end of that six month period, report on compliance with the foregoing.
- (b) Project Co shall determine, prepare and implement all reasonably prudent policies and practices consistent with the terms of any applicable Authority Policies and subject to and in accordance with the terms of any applicable collective agreements (and where applicable Project Co shall develop training programs and tests for ensuring compliance with such policies and practices) relating to:
- (1) terms and conditions of employment, applicant screening, background checks, selection, hiring, training, supervision, compensation, bonuses, severance, pension plans and other employee benefits, discipline, dismissal, transfer and replacement; and
 - (2) the exercise by any employees of rights under any applicable labour laws including union organizational efforts, recognition and/or withdrawal of recognition, representation vote, contract negotiations, the determination of an appropriate bargaining unit or units, whether to negotiate on a single-employer, coordinated or multi-employer basis, grievances, unfair labour practice charges, strikes, boycotts or other economic activity, and lockouts.
- (c) Project Co shall provide the Authority with updated, correct and timely information about the CMMS, which the Authority Representative can use to train and orientate Authority personnel in the use of the CMMS, as required.

GM06a

3.7 Workers Compensation Act & Requisition to Work

GM07

- (a) Prior to permitting any person to perform Services, Project Co shall comply and require

compliance with all requirements of the *Workers' Compensation Act* (Northwest Territories), including with respect to registration and payment of all amounts to the Workers' Safety & Compensation Commission of the Northwest Territories & Nunavut and will semi-annually or more frequently as required by the Authority, demonstrate compliance by all such persons, including by providing clearance letters from Workers' Safety & Compensation Commission of the Northwest Territories & Nunavut.

3.8 Occupational Health and Safety

GM08

- (a) Project Co shall:
- (1) Maintain a health and safety system relevant to the Services and develop and implement appropriate operational policies, procedures and practices relative to occupational health & safety/risk management, including with respect to the requirements of this Section 3.8;
 - (2) produce a comprehensive health and safety manual and ensuring it is available to, and used by, all personnel;
 - (3) attend Authority health and safety meetings;
 - (4) advise the Authority of any breaches by Project Co of applicable Law and Authority Policies related to occupational health & safety;
 - (5) comply with applicable Law, Authority Policies, and all health and safety legislation, including the obligation to establish a health and safety committee as well as participation in a joint health and safety committee with the Authority;
 - (6) ensure all personnel of Project Co, the Service Provider and Sub-Contractors directly employed in the provision of the Services, subject to applicable Law, are properly immunized and tested for influenza, Hepatitis B and TB or other communicable diseases, in accordance with Project Co's and the Authority's occupational health and safety policies and infection control policies and that proper immunization records are maintained;
 - (7) ensure that all personnel of Project Co, the Service Provider and Sub-Contractors directly employed in the provision of the Services do not attend work at the Site if such employee is carrying a restricted communicable disease;
 - (8) ensure that all personnel of Project Co, the Service Provider and Sub-Contractors directly employed in the provision of the Services are offered annual influenza vaccine, MMR (measles, mumps, rubella) vaccine, varicella vaccine, acellular pertussis vaccine, tetanus vaccine and Hepatitis B vaccine at no cost to the employee;

- (9) produce a sharps injury prevention program, including post-exposure prophylaxis and follow up, and ensure all staff are educated in this program;
 - (10) produce a respiratory protection program for staff required to work in patient rooms where airborne precautions are in place (e.g. TB patients), and ensure that such staff are educated in this program;
 - (11) ensure that all personnel of Project Co, the Service Provider and Sub-Contractors directly employed in the provision of the Services have received training in proper hand washing procedures;
 - (12) procure the services of a safety adviser qualified to at least the Canadian registered safety professional (CRSP) level or equivalent and coordinating the production, amendment and updating of all health and safety procedures of persons providing the Services;
 - (13) provide all personnel directly employed in the provision of the Services with suitable and appropriate personal protective equipment (gowns, face shields, masks, hard hats, safety vests, safety footwear, eye protection, hearing protection, arc-flash protection etc.);
 - (14) ensure suitable first aid and first aid facilities are provided to all personnel directly employed in the provision of the Services;
 - (15) maintain and keep up-to-date health and safety records and documentation and make these available for inspection by the Authority, or authorized Governmental Authorities, including:
 - (A) risk assessments in respect of all of the Services;
 - (B) manuals; and
 - (C) procedures.
- (b) Unless requested more frequently by the Authority, every six months Project Co shall, with the Performance Monitoring Report relevant to the end of that six month period, report on compliance with the foregoing.

3.9 Health Services Accreditations

GM09

Project Co shall assist the Authority and participate in the hospital accreditation processes as requested by the Authority and Project Co shall provide the Services in accordance with the provisions of this Agreement in order to ensure that the Accreditations are maintained, all in accordance with Section 3.3(d) of Schedule 4 Services Protocols and Specifications.

3.10 Business Continuity and Contingency Planning

GM10

- (a) Project Co shall develop a business continuity plan (the “**Business Continuity Plan**”) in accordance with the timelines set out in Section 4.1 of Schedule 4 Services Protocols and Specifications to ensure it is able to deliver all of the Services should there be a malfunction of the CMMS or an Unavailability Event or Service Failure in any of the Plant Services, Help Desk Services, Housekeeping and Waste Management Services or Utility Management Services for which Project Co is responsible or that could result in the disruption of Services to the Authority. Project Co shall keep the Business Continuity Plan current, and submit an updated plan with the Annual Service Plan in accordance with Section 4.2 of Schedule 4 Services Protocols and Specifications.
- (b) Project Co shall participate in, and review annually with the Authority, the development of the Contingency Plans for the safety and well-being of Project Co employees, Project Contractor employees and Sub-Contractor employees, Authority staff, physicians, patients, volunteers and visitors.

3.11 Joint Technical Review

GM11

- (a) At the end of each five-year period throughout the Operating Period, Project Co and the Authority will cause the Operating Period Joint Committee, supported by a mutually agreed and duly qualified independent inspector and such technical resources as are mutually deemed necessary, to conduct a joint technical review (the “**Joint Technical Review**”) of the Facility. The Joint Technical Review will assess the performance and effectiveness of both the preventive maintenance and life cycle works completed over the previous period and the work planned and scheduled for the upcoming five-year period in accordance with the Five Year Maintenance Plan, Life Cycle Plan and the Services Protocols and Specifications. The cost of the independent inspector engaged to conduct Joint Technical Review will be paid by Project Co;
- (b) the Five Year Maintenance Plan and the Life Cycle Plan shall be updated annually and provided to the Authority for review 3 months prior to the anniversary of the Service Commencement Date;
- (c) The current Facility condition standard for each Joint Technical Review will be based on the principle that each Maintained Element of the Facility and Lands will be maintained in a condition which is consistent with due performance by Project Co of its obligations under this Agreement.
- (d) During the final five years of the Operating Period, the parties on mutual agreement may cancel the requirement for a Joint Technical Review and carry out the inspection provisions of the Schedule 20 Handback Requirements.
- (e) The findings of the Joint Technical Review will be documented in a written report prepared by the independent inspector (a “**Facility Condition Report**”) that:

- (1) identifies the condition of the Facility and each Maintained Element; and
 - (2) identifies any deficiencies in the performance of the obligations of Project Co under this Agreement with respect to the condition of the Facility and each Maintained Element to the technical standards and specifically, the Services Protocols and Specifications and Life Cycle Plan.
- (f) Within 15 Business Days of receipt of the Facility Condition Report, Project Co shall prepare a remediation plan outlining its approach and proposed schedule for rectification of any identified deficiencies through integration with the Five Year Maintenance Plan and the Life Cycle Plan.
- (g) The parties will convene a meeting of the Operating Period Joint Committee to examine the findings of the Joint Technical Review and the Project Co remediation plan. If required, the parties will undertake a subsequent inspection of the remediation work completed by Project Co and issue a revised Facility Condition Report.
- (h) The Preventative Maintenance Plan and the Five-Year Maintenance Plan, including any life cycle replacement and/or refurbishment works will be amended and updated, as applicable, to include all remediation work identified in the Facility Condition Report and/or the revised Facility Condition Report. Project Co shall rectify any identified deficiencies for which it is responsible to the standards required by this Agreement within a reasonable time period as approved by the Operating Period Joint Committee.

4. SERVICE STANDARDS

Project Co shall deliver services identified within Sections 2 and 3 of this Appendix in accordance with the following standards.

- (a) Standards Council of Canada (SCC); and
- (b) ISO 9000.

5. RESPONSE AND RECTIFICATION PERIODS

Project Co shall respond to any notified variances from the Services Protocols and Specifications identified herein as follows:

Service Category	Definition	During Core Hours		During Non-Core Hours	
		Response Time	Rectification Time	Response Time	Rectification Time
Emergency	Service required immediately and is considered a serious emergency, including: <ul style="list-style-type: none"> issues having an immediate negative impact on patient care or clinical functionality; safety problems exposing Facility Users to danger; emergency repairs to prevent further damage (i.e. burst pipe); and equipment failure or operating difficulties which could result in the loss of critical utilities including heat, water, electricity, emergency power and medical gases. 	Immediate 15 minutes	2 hours	Immediate 15 minutes	2 hours
Urgent	Service required as soon as possible: <ul style="list-style-type: none"> to address problems not presenting an immediate danger; and to address problems having the potential to have a negative impact on patient care. 	30 minutes	24 hours	30 minutes following the resumption of Core Hours	24 hours following the resumption of Core Hours
Routine	Service required for non-emergencies not having an immediate effect on patient care such as leaking taps, faulty doors and windows or equipment breakdowns or work not requiring immediate attention such as repairs to damaged walls, furniture or fixture installations.	2 hours	3 days	2 hours following the resumption of Core Hours	3 days
Statutory	Service is a statutory, legal and/ or legislative requirement. If a Services Protocol and Specification includes any statutory, legal and/ or legislative requirement then this Service Failure category will apply.	Instant Failure	2 weeks	Instant Failure	2 weeks

*Note: The Authority shall work collaboratively with Project Co to mutually agree on specific situations upon which an Event would be considered Emergency, Urgent and Routine.

6. PERFORMANCE INDICATORS

*Note: For the avoidance of doubt, where the “Response Time” and “Rectification Period” is “N/A”, then the categories and periods within the table of Section 5 are to be used.

	Indicator	Service Failure Level	*Response Time	*Rectification Period	Recording Frequency	Monitoring Method
GM01	Management and Administration – Project Co shall prepare a comprehensive general management plan	High	N/A	N/A	Annually	Performance Monitoring Report
GM02	Management and Administration – Project Co appointing a general manager (or designate) and overseeing the day-to-day operations in accordance with Section 3.2 of this Appendix	Medium	1 Week	1 Month	Monthly	Performance Monitoring Report
GM03	Periodic Reporting - Project Co submitting Performance Monitoring Reports with the same or similar Reporting Errors on more than 3 occasions in any consecutive 12 month period.	Medium	N/A	N/A	Monthly	Performance Monitoring Report
GM04	Human Resources Matters – Project Co completing orientation course for all new personnel in accordance with Section 3.4 of this Appendix	Medium	N/A	N/A	Monthly	Performance Monitoring Report

ATTACHMENT 1

1. MONTHLY SERVICE REPORT

The Monthly Service Report shall contain as a minimum the following information in respect of the Contract Month:

1. all monitoring which has been performed pursuant to the Performance Monitoring Program and a summary of all findings;
2. Help Desk call logs during Core and non-Core Hours and e-mail response logs;
3. details of all amendments made to Help Desk records;
4. a summary of the Demand Maintenance received by the Help Desk by Service including the median applicable Response Time and Rectification Period, and Project Co's actual time of Response and Rectification;
5. a summary of all Unavailability Events and Service Failures including Project Co's Response Time and Rectification Period in respect of each;
6. the number of days that any Functional Unit has been Unavailable and the Unavailability Deductions to be awarded in respect of such Unavailability (shown on a daily basis).
7. a record of all conditions that made the Facility and/or part(s) thereof unsuitable for use (and the duration of such conditions);
8. closures or service limitations during Core Hours, setting out the details of the closure, the reasons for such closure and any remedial action taken by Project Co;
9. the level of Deductions for the Payment Period (and for each of the previous 5 Payment Periods) as a percentage of the annual Service Payment;
10. a summary and calculations of all adjustments to the relevant Periodic Payment;
11. all statistical data required for any territorial or federal reports or returns reasonably required by the Authority;
12. details of all health and safety issues arising during the month including incidents;
13. a summary of occupational health and safety events;
14. a summary of all life safety actions and statutory testing, such as fire extinguisher inspections, generator testing and sprinkler testing conducted during the Payment Period;
15. a summary detailing the implementation of the Annual Service Plan then in effect including a summary of:
 - a. the staffing plan including details of personnel changes, training and methods statements;
 - b. all Scheduled Maintenance, statutory testing and planned shutdowns implemented during the Payment Period and planned for the next Payment Period, including schedules and method statements;
 - c. all Demand Maintenance performed during the Payment Period; and
 - d. the delivery of all other Services;

16. a summary of all Miscellaneous Occupant Services performed during the Payment Period;
17. any report required by any Governmental Authority, including the GNWT Ministry of Health and Social Services, in respect of the failure of any Maintained Element;
18. A maintenance report including details of Facility breakdowns, repairs and planned action for reinstatement where applicable;
19. Scheduled Maintenance Plan for the forthcoming Contract Month including as a minimum:
 - a) Location of the work to be undertaken clearly identifying activities which are anticipated to cause disruption to the Facility and or Facility Users;
 - b) Services;
 - c) Time period when the work is to be undertaken
 - d) Risk assessment including health;
 - e) Operational method statement
 - f) Asset conditions;
 - g) Resources/sub contractors used;
 - h) permits to work needed; and
 - i) Contingency planning.
20. Details of all Plant and Equipment requiring lifecycle works/replacement within the next 3 months;
21. Details of Defects identified at the Facility;
22. A summary of customer satisfaction reports carried out;
23. Complaints relating to the Services, including complaints made by members of the public to the Authority that have been passed on to Project Co;
24. Details of outstanding requests;
25. Staff and industrial relations issues including details of recruitment and vacancies, and training undertaken in the previous month and due within the next 3 months;
26. an energy consumption certificate in accordance in all respects with the requirements of Appendix 2C [Energy];
27. Details of Utilities consumption against targets meter readings and a utilities consumption graph
 - a) Total kWh usage against profile - electricity
 - b) Total kWh usage against profile – gas
 - c) Total m3 usage against profile – water
 - d) Total CO2 emissions from building energy consumption against target
28. Monthly monitoring and reporting information to be supplied in accordance with the Energy Management Plan.

2. ANNUAL SERVICE REPORT

The annual service report will cover at a minimum, the following:

1. Summary of Service Reports during the Contract Year including category, response and rectification times achieved;
2. Report indicating Functional Units that were Unavailable or Unavailable but used in the Contract Year;
3. Summary of all Deductions during the Contract Year;
4. Financial performance indicating income generated from Services;
5. Asset acquisition and disposal (where relevant) including lifecycle replacement;
6. Summary of all annual reviews of documentation including but not limited to health and safety policies, this shall include details of any changes made that may impact the Services delivered at the Facilities;
7. Summary of KPI performance over the previous Contract Year;
8. Summary of the contingency plan testing carried out in the previous Contract Year;
9. Customer service performance review;
10. Resource summary and performance review including any changes;
11. Energy performance report (energy consumed, energy use and distribution data);
12. Utility usage report (water consumption and sewage);
13. Details of all Utilities initiatives implemented in the previous 12 months with summary of their relative success;
14. Details of Utilities initiatives planned for the forthcoming 12 months; and
15. Total CO2 emissions from building energy consumption against target.

APPENDIX 4B
HELP DESK SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of this Agreement:

“Help Desk Report” means in respect of:

- (a) the Facility, any Demand Requisition, request for Services, report of a Service Failure or Unavailability Event or any other enquiry or report made to the Help Desk by a Facility User or automatically generated by the BMS or the CMMS; and
- (b) the Stanton site other than the Facility, any report or request for services made to the Help Desk by Facility Users;

“Help Desk Services” means the services and requirements described in this Appendix; and

2. SERVICES

2.1 General Requirements

HD01

In addition to the standards and specifications set out in Schedule 4 Services Protocols and Specifications Project Co shall deliver the Help Desk Services:

- (a) 24 hours per day, 365(6) days per year, with provision of back-up plans to ensure continuity of service;
- (b) such that the Help Desk functions as the central communications hub for service requests for:
 - (1) the Stanton site generally, including the Facility;
 - (2) all Services and management of the Facility including:
 - (A) receiving, logging and responding appropriately to telephone, facsimile, e-mail and other communications and liaising with all Facility Users on the progress and status of work;
 - (B) capturing and logging particulars of Help Desk Reports in respect of the Facility and referring these to the Service Provider or appropriate Sub-Contractor;
 - (C) redirecting all Help Desk Reports in respect of the Stanton site other than the Facility to other service providers;
 - (D) providing seamless redirection of calls and information to the Authority’s existing CMMS systems and as otherwise directed by the Authority; and

- (E) redirecting calls to the Help Desk in respect of IMIT to the centralized IT service desk;
- (c) in a comprehensive, effective, flexible, Facility Users-friendly and efficient manner to facilitate the smooth operation of the Facility;
- (d) such that Facility Users can at all times electronically view and audit the current status of their Help Desk Reports from any location; and
- (e) such that relevant Facility staff can access the Help Desk remotely in real time to track progress of open items.

3. SERVICE REQUIREMENTS

3.1 General

HD02

In connection with the operation of the Help Desk, Project Co shall:

- (a) provide for Facility Users to submit Help Desk Reports by telephone, electronic mail and other electronic means;
- (b) set a categorization and call logging protocol;
- (c) respond (i.e. not put "on hold") to all Help Desk Reports: **HD03**
 - (1) if made by telephone, within 4 rings of the Help Desk telephone;
 - (2) if made by electronic mail or by other electronic means, within 5 minutes of receipt at the Help Desk;
- (d) keep records of telephone and electronic response times, number of calls on hold, length of hold calls and number of calls abandoned;
- (e) immediately redirect all calls that are not part of Project Co Services, in accordance with the contact information provided by the Authority; **HD04**
- (f) record and notify the Authority of:
 - (1) all Service Failures and Unavailability Events within 30 minutes if such failures or events will have a material impact on the use of the Facility by Facility Users and otherwise in accordance with Section 6.2 of Schedule 4 Services Protocols and Specifications;
 - (2) accidents or emergencies promptly after occurrence;
 - (3) complaints or compliments and other comments received from Facility Users in connection with the Services promptly following receipt in accordance with Authority Policies;

- (g) monitor the BMS and the CMMS including the monitoring of alarms, equipment alarms, emergency and security systems;
- (h) create, update and deliver to the Authority and other Facility Users Help Desk user instructions as and when required;
- (i) provide Help Desk user training to the Authority and other Facility Users as and when required;
- (j) maintain an electronic log of all Help Desk Reports including:
 - (1) Help Desk operator's name to whom the enquiry was made or the automated electronic system which generated the report;
 - (2) the name of the Facility User;
 - (3) date and time;
 - (4) location;
 - (5) nature of the Help Desk Report;
 - (6) service required;
 - (7) to whom, the time and means by which the Help Desk redirected Stanton-related calls and requests;
 - (8) Service Failure level (i.e. High Service Failure, Medium Service Failure, Low Service Failure);
 - (9) unique request reference identifier;
 - (10) date and time request passed to the appropriate person for response;
 - (11) action taken and by whom;
 - (12) the actual Response Time and time to Rectify the subject matter of such request; and
 - (13) any required follow-up actions.
- (k) keep the Authority informed of proposed course of action and response and rectification
- (l) not amend, delete or alter any details recorded by the Help Desk unless approved by the Authority and the following information is recorded and maintained:
 - (1) the exact nature and impact of the amendment;
 - (2) the reason for the amendment; and

HD05

- (3) by whom the amendment was authorized;
- (m) ensure that in the event of emergencies the Help Desk will raise the alarm, reporting the incident to internal and external authorities and log the details; and **HD06**
- (n) maintain confidentiality consistent with the Authority's Policies: **HD07**

3.2 Quality Monitoring

Prior to Service Commencement, Project Co and the Authority will develop, maintain and implement a system for recording and acting on customer feedback and satisfaction with respect to the Help Desk Services through the conduct of a customer user satisfaction survey/questionnaire to be carried out annually. **HD08**

4. SERVICE STANDARDS

Not Used.

5. REPONSE AND RECTIFICATION PERIODS

Project Co shall respond to any notified variances from the Services Protocols and Specifications identified herein as follows:

Service Category	Definition	During Core Hours		During Non-Core Hours	
		Response Time	Rectification Time	Response Time	Rectification Time
Emergency	<p>Service required immediately and is considered a serious emergency, including:</p> <ul style="list-style-type: none"> issues having an immediate negative impact on patient care or clinical functionality; safety problems exposing Facility Users to danger; emergency repairs to prevent further damage (i.e. burst pipe); and equipment failure or operating difficulties which could result in the loss of critical utilities including heat, water, electricity, emergency power and medical gases. 	Immediate 15 minutes	2 hours	Immediate 15 minutes	2 hours
Urgent	<p>Service required as soon as possible:</p> <ul style="list-style-type: none"> to address problems not presenting an immediate danger; and to address problems having the potential to have a negative impact on patient care. 	30 minutes	24 hours	30 minutes following the resumption of Core Hours	24 hours following the resumption of Core Hours
Routine	<p>Service required for non-emergencies not having an immediate effect on patient care such as leaking taps, faulty doors and windows or equipment breakdowns or work not requiring immediate attention such as repairs to damaged walls, furniture or fixture installations.</p>	2 hours	3 days	2 hours following the resumption of Core Hours	3 days
Statutory	<p>Service is a statutory, legal and/ or legislative requirement. If a Services Protocol and Specification includes any statutory, legal and/ or legislative requirement then this Service Failure category will apply.</p>	Instant Failure	2 weeks	Instant Failure	2 weeks

*Note: The Authority shall work collaboratively with Project Co to mutually agree on specific situations upon which an Event would be considered Emergency, Urgent and Routine.

Performance Indicators

*Note: For the avoidance of doubt, where the "Response Time" and "Rectification Period" is "N/A", then the categories and periods within the table of Section 5 are to be used.

	Indicator	Service Failure Level	Response Time	Rectification Period	Recording Frequency	Monitoring Method
HD01	The Help Desk Service is available at all times.	Medium	N/A	1 Hour	Monthly	Performance Monitoring Report
HD02	All Demand Requisitions, Service Failures or Unavailability Events are electronically recorded by the Help Desk.	Medium	N/A	N/A	Monthly	Performance Monitoring Report
HD03	All telephone calls and other electronic reports to the Help Desk initially answered and responded to (i.e. not put "on hold") as required under Section 3.1(c) of this Appendix	Low	N/A	N/A	Monthly	Performance Monitoring Report
HD04	95% of Demand Requisitions relating to the Stanton site (other than those relating to the Facility), made by telephone or electronic mail are redirected to the Authority	Low	N/A	N/A	Monthly	Performance Monitoring Report
HD05	No amendments are made to the information logged with the Help Desk unless the amendments are clearly identified and have been approved by the Authority.	Low	N/A	N/A	Monthly	Performance Monitoring Report
HD06	Provide assistance in raising alarms, reporting emergencies to internal and external authorities and logging of the details in the event of an emergency including monitoring and reporting on escalating situations.	High	N/A	N/A	Monthly	Performance Monitoring Report
HD07	Confidentiality is maintained in accordance with Authority's policy.	High	N/A	N/A	Monthly	Performance Monitoring Report
HD08	Project Co to develop, maintain and implement a quality monitoring program for recording and acting on customer feedback	High	1 Week	1 Month	Monthly	Performance Monitoring Report

APPENDIX 4C
PLANT SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of this Agreement:

“Building Components” means all elements including but not limited to the roof, facades and all internal components (i.e. stairs, doors, floor coverings, ceilings etc) of the Facility as constructed and supplied or provided by Project Co pursuant to Schedule 3 [Design and Construction Specifications];

“Building Systems” means the mechanical, electrical and other systems in or servicing the Facility as constructed and supplied or provided by Project Co pursuant to Schedule 3 Design and Construction Specifications, and if such systems are connected or integrated with the Authority’s systems servicing the Authority’s facilities, to the point of connection of such systems with the Authority’s systems;

“Demand Maintenance” means any maintenance, repair or restoration of equipment, systems, building structure, components or finishes, in each case located at or in the Facility which maintenance, repair or restoration is conducted in order to remedy a breakdown of such equipment, system, building structure, component or finish or is conducted in order to achieve standard operating performance for such equipment, system, building structure, component or finish, but excludes planned repair projects, Scheduled Maintenance and capital projects. All costs incurred in conducting Demand Maintenance form part of the Services. Demand Maintenance also includes repairing collateral damage related to equipment beyond the immediate component that failed, minor repairs to interior finishes and exterior finishes of the Facility (e.g. painting etc.). Demand Maintenance work may be either:

- a) any urgent Demand Maintenance that is unscheduled including maintenance of emergency/safety equipment or systems in the event of a breakdown of such equipment or systems; or
- b) non-urgent Demand Maintenance which has been scheduled in advance;

“Elevator Availability” means, in respect of each elevator and escalator in the Facility, the amount of time that such elevator was available during a measured period expressed as a percentage and calculated as follows:

$$\text{(Total Time – Down Time) x100 / Total Time}$$

Where:

“Down Time” is the number of hours that such elevator or escalator was unavailable for normal use other than times during which Scheduled Maintenance was performed on such elevator or escalator in accordance with the Annual Service Plan in effect; and

“Total Time” is the total number of hours during the measured period;

“Facility Incident” means an event that is inconsistent with the normal operations of the Facility including flood, fire, evacuation, gas leak or rupture, electrical or other utility disruption, life safety system disruption, patient or visitor injury or death related to Plant Services’ actions or inactions, Plant Services’ infection control breaches, labour action or notice of legal action;

“Maintained Elements” means all elements of the Facility and Lands constructed, renovated or installed pursuant to this Agreement including:

- (a) the Building Systems;
- (b) improvements to the Lands, including the external areas described in Table 1 in Attachment 1 of this Appendix, including soft landscaping, planted areas, lawns or gardens of courtyards or on rooftops;
- (c) underground parking facilities; and
- (d) the Maintained Equipment,

“Maintained Equipment” means the equipment maintained by Project Co;

“Maintenance” means commissioning, testing, servicing, maintenance, repair, renewal or replacement of the Maintained Elements, other than renewal or replacement of Maintained Equipment;

“Maintenance Access Times” means the times set out in the Annual Service Plan during which Project Co may perform Maintenance Services;

“Maintenance Services” means Demand Maintenance and Scheduled Maintenance;

“Normal Wear and Tear” means the deterioration of a substance or object, caused by ordinary use over time, but not resulting from extraordinary use, improper use, lack of care, lack of proper maintenance and repair, vandalism, catastrophic accident or destruction.

“Plant Services” means all of the services and requirements described in this Appendix, including Demand Maintenance and Scheduled Maintenance; and

“Scheduled Maintenance” means planned, preventive and replacement Maintenance in the context of any planned maintenance activity undertaken in an effort to prevent, predict or otherwise reduce the likelihood of system, equipment, building structure, building component or building finishes breakdowns or failures at the Facility to achieve acceptable levels of operating performance. Scheduled Maintenance is entirely discretionary to Service Provider as long as the equipment demonstrates use in a manner consistent with “Normal Wear and Tear”. All costs incurred in conducting Scheduled Maintenance form part of the Services. Scheduled Maintenance includes, but is not limited to, activities such as: condition based monitoring, performance monitoring, non-destructive testing, time based inspections and overhauls.

2. SERVICES

2.1 General Requirements

PS01

In addition to the standards and specifications set out in Schedule 4 Services Protocols and Specifications, Project Co shall deliver the Plant Services:

- (a) 24 hours per day, 365(6) days per year;
- (b) in a manner which:
 - (1) is efficient, comprehensive and responsive to the needs of Facility Users;
 - (2) ensures a collaborative working relationship with the Authority, its employees and contractors;
 - (3) minimizes, to the extent reasonably possible, any interruption to the use and operation of the Facility by Facility Users;
 - (4) is integrated and co-ordinated with the delivery of all:
 - (A) other Services provided by Project Co; and
 - (B) services delivered by the Authority at the Facility;
 - (5) is safe for all Facility Users; and
 - (6) does not create any environmental hazards;
- (c) in a safe and functional working environment applying safe working practices including: **PS02**
 - (1) using recognized risk assessment and management systems; and
 - (2) placing, maintaining and keeping records of all hazard notices and safety signage in accordance with the standards included in this Appendix;
- (d) having regard for and without limiting the requirements set out in Section 3.3 of Schedule 4 Services Protocols and Specifications: **PS03**
 - (1) CAN/CSA-Z317.1 Special Requirements for Plumbing Installations in Health Care Facilities;
 - (2) CAN/CSA-Z317.10 Handling of Waste Materials in Health Care Facilities;
 - (3) CAN/CSA-Z317.11 Area Measurement for Health Care Facilities;
 - (4) CAN/CSA Z317.2-10 Special Requirements for Heating, Ventilation, and Air Conditioning (HVAC) Systems in Health Care Facilities;

- (5) CAN/CSA-Z317.5 Illumination Systems in Health Care Facilities;
- (6) CAN/CSA-Z317.13 Infection Control during Construction or Renovation of Health Care Facilities;
- (7) CAN/CSA-Z318.0 Commissioning of Health Care Facilities;
- (8) CAN/CSA-Z323.5 Mechanical/Electromechanical Lifting Devices for Persons;
- (9) CAN/CSA-Z7396.1 Medical Gas Pipeline Systems;
- (10) CAN/CSA-B44 Safety code for Elevators and Escalators;
- (11) CAN/CSA-C282-00 Emergency Electrical Supply for Buildings;
- (12) CAN/CSA-Z32 Electrical Safety and Essential Electrical Systems in Health Care Facilities;
- (13) the Accreditations;
- (14) PAS55; and
- (15) ISO31000.

3. SERVICE REQUIREMENTS

3.1 Demand Maintenance

PS04

Project Co shall provide any maintenance, repair or restoration of equipment, systems, building structure, components or finishes, in each case located at or in the Facility which maintenance, repair or restoration is conducted in order to remedy a breakdown of such equipment, system, building structure, component or finish or is conducted in order to achieve standard operating performance for such equipment, system, building structure, component or finish, but excludes planned repair projects, Scheduled Maintenance and capital projects. Demand Maintenance also includes repairing collateral damage related to equipment beyond the immediate component that failed, minor repairs to interior finishes and exterior finishes of the Facility (e.g. painting etc.). Demand Maintenance work may be either:

- a) any urgent Demand Maintenance that is unscheduled including maintenance of emergency/safety equipment or systems in the event of a breakdown of such equipment or systems; or
- b) non-urgent Demand Maintenance which has been scheduled in advance.

3.2 Scheduled Maintenance

PS05

Project Co shall provide the Plant Services in accordance with this Appendix so that:

- (a) each of the Maintained Elements:
 - (1) is properly and safely maintained in accordance with all Plans and applicable Laws;
 - (2) remains functional, safe, operationally sound and of good appearance;
 - (3) performs in accordance with their respective design criteria as set out in Schedule 3 Design and Construction Specifications; and
 - (4) achieves the requirements set out in in Attachment 1 to this Appendix;
- (b) the Building Systems, including but not limited to, heating, air conditioning, lighting, humidity and mechanical ventilation systems, function in accordance with the requirements set out in in Attachment 1 to this Appendix;
- (c) the exterior areas of the Facility are maintained in accordance with Table 1 of Attachment 1 to this Appendix; **PS06**
- (d) all other Maintained Elements operate as designed and intended;
- (e) complies with all testing and reporting requirements under all applicable Authority Policies, policies of insurance and all applicable Laws. **PS03**

3.3 Maintenance Equipment and Supplies

PS07

Project Co shall provide, maintain, clean and replace as required all equipment, supplies, apparatus and consumable items (including any consumable required for the operation of Maintained Elements) required to deliver the Plant Services, including scaffolding, crange, tackle, machinery, tools or any other necessary equipment.

3.4 Annual Service Plan

PS08

Project Co shall develop in accordance with Sections 4.1 and 4.2 of Schedule 4 Services Protocols and Specifications and shall implement as part of the Annual Service Plan, appropriate policies, procedures, practices, schedules and a self-monitoring inspection and reporting system in respect of the delivery of the Plant Services to the Authority.

3.5 First Response Maintenance for Equipment

PS09

Project Co shall respond to Demand Requisitions in respect of all Equipment. If the Equipment which is the subject of the Demand Requisition is not Maintained Equipment, Project Co shall determine whether the problem relates to the Equipment itself or a Maintained Element supporting the Equipment. If:

- (a) the problem relates to a Maintained Element, Project Co shall rectify the problem in accordance with this Appendix; or
- (b) the problem does not relate to a Maintained Element, Project Co shall promptly make safe should the issue present an immediate risk and give notice of the problem to the Authority together with a summary of the results of the investigation into the problem conducted by Project Co.

3.6 Maintenance Times

PS10

Subject to Section 3.7 of this Appendix, Project Co shall perform the Maintenance Services during the relevant Maintenance Access Times and shall:

- (a) perform Scheduled Maintenance during the periods agreed in the Annual Service Plan in effect at that time, and will give the Authority 10 Business Days' written notice before commencing any such Maintenance; and
- (b) undertake and complete Demand Maintenance within the relevant Response Time and Rectification Time set out in Section 5 of this Appendix and Schedule 8.

3.7 Re-Scheduling of Maintenance

Notwithstanding any notice delivered by Project Co pursuant to this Appendix, if the Authority, acting reasonably, determines that the times at which Project Co proposes to perform Maintenance will cause material disruption to the operations of the Authority or other Facility Users, the Authority may give notice to Project Co not to carry out such Maintenance until such time as the Authority and Project Co, each acting reasonably, agree on an alternate time. Upon such agreement, the Response Time and Rectification Period for such Maintenance will be adjusted accordingly.

3.8 Elevators

PS11

Project Co shall:

- (a) operate and maintain all elevators, escalators, elevating devices and related equipment at the speeds and in accordance with the elevator design specifications set out in Schedule 3 Design and Construction Specifications;
- (b) dispatch its on-site personnel promptly and in line with the Response and Rectification times set out in Section 5 of this Appendix 4C to respond to all elevator alarms or telephone calls from an elevator and initiate the required action to rectify faults and release occupants;

PS12

- (c) undertake Scheduled Maintenance of elevators, escalators, elevating devices and related equipment to ensure that at no time will any floor be without elevator or escalator service. Project Co shall also ensure that not more than one elevator in a bank of two or more elevators is out of service;
- (d) include in each Performance Monitoring Report for the relevant period:
 - (1) the calculation of Elevator Availability; and
 - (2) a summary of any elevator, escalator or elevating device failures and corrective actions.

3.9 Building Management System (BMS)

PS13

Project Co shall:

- (a) provide a BMS which monitors and operates the Facility and the Services within the Facility and remotely;
- (b) monitor, control, indicate alarms and provide trending information for all BMS connected sensors and control points;
- (c) configure the BMS to automatically initiate an alarm and immediately page or otherwise notify staff designated by the Authority of particulars related to any alarmed equipment specified in Schedule 2 or Schedule 3; and
- (d) include with each Performance Monitoring Report and provide the Authority with continuous direct access (via web-accessed dashboard customized to the Authority's requirements, and other than during such reasonable periods as the BMS may be undergoing Scheduled Maintenance or emergency Maintenance) to the following information generated by the BMS during the relevant period:
 - (1) Facility Incident failures and all information relevant to Facility Incident investigations, as required by the Authority;
 - (2) daily, weekly and periodic status reports (including equipment availability or unavailability);
 - (3) exception reports by element status;
 - (4) trend log data (including multi-trend presentation where required to demonstrate effective and efficient sequencing of related equipment);
 - (5) time of occurrence, Response and Rectification; and
 - (6) such other information as the Authority may reasonably require.

3.10 Medical Gases and Vacuum**PS14**

Project Co shall perform all monitoring, maintenance, operations and periodic testing and certification required to ensure a safe and continuous flow of medical gases and vacuum in the Facility, including:

- (a) monitoring and controlling the medical gases and medical air supplies from and including source equipment, to and including terminal outlets, and all interconnecting distribution pipelines, safeties, and venting;
- (b) responding to all alarms related to the medical gas system and storage facilities;
- (c) metering, trending and reporting the consumption of medical gases in the Building;
- (d) monitoring the available inventory of bulk and bottled medical gases and notify the Authority or such contractor or agent as designated by the Authority if replacement inventory is required;
- (e) managing delivery of bulk and bottled supplies of medical gases as necessary, including transport and swapping bottles and empties as necessary; and
- (f) monitoring and controlling the medical vacuum system from and including terminal devices (inlets), to and including the medical vacuum equipment station, and all interconnecting distribution pipelines, safeties and venting.

3.11 Maintenance of Key Energy Consuming Building Systems**PS15**

Project Co shall:

- (a) maintain all key energy consuming Building Systems, including all boilers, so that each such system operates efficiently; and
- (b) to facilitate the obligation under 3.11(a) of this Appendix 4C, conduct regular efficiency testing of all such systems in accordance with Good Industry Practice, and without limitation no less than once per month for the boilers, and will include the results of such testing in each Performance Monitoring Report.

4. SERVICE STANDARDS

Project Co shall deliver services in accordance with the standards identified within Attachment 1 to this Appendix.

5. RESPONSE AND RECTIFICATION PERIODS

Project Co shall respond to any notified variances from the Services Protocols and Specifications identified herein as follows:

Service Category	Definition	During Core Hours		During Non-Core Hours	
		Response Time	Rectification Time	Response Time	Rectification Time
Emergency	<p>Service required immediately and is considered a serious emergency, including:</p> <ul style="list-style-type: none"> issues having an immediate negative impact on patient care or clinical functionality; safety problems exposing Facility Users to danger; emergency repairs to prevent further damage (i.e. burst pipe); and equipment failure or operating difficulties which could result in the loss of critical utilities including heat, water, electricity, emergency power and medical gases. 	Immediate 15 minutes	2 hours	Immediate 15 minutes	2 hours
Urgent	<p>Service required as soon as possible:</p> <ul style="list-style-type: none"> to address problems not presenting an immediate danger; and to address problems having the potential to have a negative impact on patient care. 	30 minutes	24 hours	30 minutes following the resumption of Core Hours	24 hours following the resumption of Core Hours
Routine	<p>Service required for non-emergencies not having an immediate effect on patient care such as leaking taps, faulty doors and windows or equipment breakdowns or work not requiring immediate attention such as repairs to damaged walls, furniture or fixture installations.</p>	2 hours	3 days	2 hours following the resumption of Core Hours	3 days
Statutory	<p>Service is a statutory, legal and/ or legislative requirement. If a Services Protocol and Specification includes any statutory, legal and/ or legislative requirement then this Service Failure category will apply.</p>	Instant Failure	2 weeks	Instant Failure	2 weeks

*Note: The Authority shall work collaboratively with Project Co to mutually agree on specific situations upon which an Event would be considered Emergency, Urgent and Routine.

6. PERFORMANCE INDICATORS

*Note: For the avoidance of doubt, where the “Response Time” and “Rectification Period” is “N/A”, then the categories and periods within the table of Section 5 are to be used.

	Indicator	Service Failure Level	Response Time	Rectification Period	Recording Frequency	Monitoring Method
PS01	Providing all Plant Services in line with the General Requirements	Medium	N/A	N/A	Monthly	Performance Monitoring Report
PS02	All hazard notices and safety signs are maintained, recorded, located and displayed correctly, and fully serviceable.	Medium	N/A	N/A	Monthly	Performance Monitoring Report
PS03	Project Co complies with all testing and reporting requirements under all applicable Authority policies, policies of insurance and all applicable Laws.	Medium	N/A	N/A	Monthly	Performance Monitoring Report
PS04	Demand Maintenance undertaken within the stipulated Response and Rectification times set out in Section 5 of this Appendix. This includes other maintenance requests (in addition to Demand Maintenance) as per the Miscellaneous Occupant Services requirements	Low	N/A	N/A	Monthly	Performance Monitoring Report

	Indicator	Service Failure Level	Response Time	Rectification Period	Recording Frequency	Monitoring Method
PS05	All Maintained Elements are maintained in accordance with this Appendix. For the avoidance of doubt, this includes meeting the Services Protocols and Specifications described within Attachment 1 to this Appendix.	Low	N/A	N/A	Monthly	Performance Monitoring Report
PS06	External areas of the Facility maintained in accordance with this Appendix	Low	N/A	N/A	Monthly	Performance Monitoring Report
PS07	Provide, maintain, clean and replace as required all equipment, supplies, apparatus and consumable items	Low	N/A	N/A	Monthly	Performance Monitoring Report
PS08	Project Co implementing and adhering to all elements of the Annual Service Plan related to Plant Services and not otherwise addressed in this Section 5.	Medium	1 Week	1 Month	Monthly	Performance Monitoring Report
PS09	Responding and determining cause for Demand Requisitions in respect of all Equipment	Low	N/A	N/A	Monthly	Performance Monitoring Report
PS10	Project Co carries out 100% of Scheduled Maintenance within the agreed Maintenance Access Times.	Medium	N/A	N/A	Monthly	Performance Monitoring Report
PS11	Elevator Availability of not less than 97.5% for each elevator within the Facility during each Payment Period.	High	N/A	N/A	Monthly	Performance Monitoring Report

	Indicator	Service Failure Level	Response Time	Rectification Period	Recording Frequency	Monitoring Method
PS12	If an elevator is out of service and occupants are trapped, suitably trained Project Co staff respond and safely release occupants.	High	N/A	N/A	Monthly	Performance Monitoring Report
PS13	All Building Management Systems are functional and available to the authority in accordance with Schedule 3 [Design and Construction Specifications]	Medium	N/A	N/A	Monthly	Performance Monitoring Report
PS14	Project Co performs all monitoring, maintenance, operations and periodic testing and certification required for complete, safe and functional systems.	Medium	N/A	N/A	Monthly	Performance Monitoring Report
PS15	Maintain all key energy consuming Building Systems, including all boilers, so that each such system operates efficiently.	Medium	N/A	N/A	Monthly	Performance Monitoring Report

ATTACHMENT 1

TABLES TO APPENDIX 4C

Table 1: Service Standards, Building

Element	Standard
<p>Building Fabric External Including:</p> <ul style="list-style-type: none"> • External walls • Roof • Fire escapes • Walkways • Safety barriers • Balconies • Eaves • Rendering • Stacks and flues 	<ul style="list-style-type: none"> • Sound secure and weatherproof where appropriate. • Free from damp penetration or spalling. • Claddings, copings and parapets are structurally sound and secure. • Chimney stacks/flues are structurally sound and secure and flue is free from blockages/excess soot. • Free from debris, moss growth and animal droppings. • Free from undue wear and tear.
<p>Building Fabric Internal Including:</p> <ul style="list-style-type: none"> • Internal walls • Partitions • Ceilings • Elevators, escalators, dumbwaiters • Pneumatic tube 	<ul style="list-style-type: none"> • Free from structural cracks and/or deflection. • Free from damp and vermin. • Free from undue damage and of reasonable appearance. • Compliant with the requirements set out in ASHRAE guidelines. • Free from asbestos and other hazardous materials.

Element	Standard
<p>Fixtures and Fittings</p> <p>Including:</p> <ul style="list-style-type: none"> • Doors (external, internal and fire) • Windows and sills • Hatches • Vents • Ironmongery • Millwork • Shelving • Cupboards • Railings • Racking • Notice boards • Mirrors • Balustrades • Magnetic door holders 	<ul style="list-style-type: none"> • Operate safely and as intended, without making undue noise and without including observable stains on hinges, locks, catches and handles, and without binding, rubbing or catching in any way. • Free from all but minor surface blemishes and wear and tear. • Luminescent strips, signs, notices, warning signs where appropriate are intact, legible and illuminated where appropriate. • Free from corrosion.
<p>Floor and Floor Coverings</p>	<ul style="list-style-type: none"> • The floor coverings are complete, according to their specification. • The floor coverings are fully fixed to the floor so as not to cause a health or safety hazard. • The floor/floor covering is free from tears, scoring, cracks or any other damage that is unsightly and/or could cause a health and safety hazard. • Floor coverings/surfaces are maintained in such a way as to provide a suitable uniform surface, with minimal resistance, for wheeled beds trolleys, wheel chairs and any other wheeled vehicle in use in the Facility. • Allow adequate drainage where necessary.
<p>Decorative Finishes</p> <p>Including:</p> <ul style="list-style-type: none"> • Paintwork • Fabric • Special finishes applied to walls, ceilings, woodwork, metalwork, pipework and other visible elements) 	<ul style="list-style-type: none"> • Decorative finishes are complete according to their specification. • Free from all but minor surface blemishes or undue wear and tear. • Free from cracks, or any other surface degradation inconsistent with a building maintained in accordance with Good Industry Practice.

Element	Standard
Furniture & Equipment Including: <ul style="list-style-type: none"> • Chairs • Tables, desks • Equipment 	<ul style="list-style-type: none"> • Free from splits, cracks, and other defects (including squeaks) and free from all but minor surface blemishes or undue wear and tear. • Maintained in accordance with Occupational Health and Safety requirements of the WorkSafeBC and the Authority. • Maintained in accordance with manufacturer's requirements.

Table 3: Service Standards, Systems

Element	Standard
General	<ul style="list-style-type: none"> • In general, all Maintained Elements including the elements outlined below will at all times be functional, operational and satisfy the same performance requirements as required for Service Commencement. • Ensure Functional Protection (as defined in Schedule 3) post disaster.
MV Distribution System Including but not limited to: <ul style="list-style-type: none"> • Distribution equipment and protective devices fuse switches • Isolators • Distribution boards • Fuses • MCB's, ACB, ELCB's and RCE's • Exposed distribution cables 	<ul style="list-style-type: none"> • Ratings will be clearly marked. • Fuse elements or circuit breaker mechanisms in good working order. • Contacts and connections clean and mechanically tight. • No overheating during normal operating loads. • Secure to authorized access only. Recording instruments operational where necessary. • all bus connectors are torqued to manufacturer recommendations. • lock out procedure provided. • All cables are mega tested. • all loads on each phase are balanced. • all protective relaying is coordinated to ensure lower-rated breakers trip first. • all breakers and transformers are regularly tested. • all switchgear and transformers are clean. • injection testing carried out at least every two years. • all alarm functions operate correctly. • identification notices where necessary.
HV Distribution Systems Including: <ul style="list-style-type: none"> • Distribution equipment • Isolators • Distribution units • OCBs, ACBs and ELCBs 	<ul style="list-style-type: none"> • Ratings will be clearly marked. • Fuse elements or circuit breaker mechanisms in working order. • Contacts and connections clean and mechanically tight. • No overheating during normal operating loads. • Secure to authorized access only. • Recording instruments operational where necessary. • Transformers are maintained as per manufacturer's recommendations at least every two years. • Protective coatings are intact. • No signs of excessive heating. • Provide lock out procedure.

Element	Standard
	<ul style="list-style-type: none"> • Balance loads. • Test all protective relaying including injection testing at least every two years. • Provide coordination study after initial installation and after every significant change or at minimum every 10 years. • Indicate fault levels. • Check electronic operation of all breakers and that power source is battery operated. • Provide DC Hipot test after initial installation. • Torque all bolted connections. • Identify all current transformer and potential transformer ratios. • Provide ground fault relaying as needed. • Marker and covering notices where necessary.
<p>Hot & Cold Water Systems Including:</p> <ul style="list-style-type: none"> • all infrastructure for hot and cold water systems, plumbing and sewer systems constructed or supplied by Project Co pursuant to Schedule 3 	<ul style="list-style-type: none"> • Deliver water at the temperatures and flow rates as required to serve the facility needs without undue noise and vibration. • Taps, valves and other related fittings and fixtures function as intended. • Pipework and fittings will be fastened securely to their intended points of anchorage. • There will be no persistent drips or leaks of water from pipework, taps, valves and/or fittings.
<p>Heating, Ventilation and Air Conditioning Systems Including:</p> <ul style="list-style-type: none"> • heating plant, including boilers • heat exchanger systems • Fume hoods • Humidifiers • Heaters • Ductwork • Mixing boxes and dampers • Coolers • Inlet/outlet grilles • Refrigeration plant • Cooling towers (and other local ventilation systems); • Pneumatic tube system • all infrastructure for heating, ventilation and air condition systems constructed or supplied by Project Co pursuant to Schedule 3. 	<ul style="list-style-type: none"> • All ventilation systems will function as intended without undue noise or vibration. • Air changes and ventilation levels as required to achieve CSA and ASHRAE Standards. • Ductwork, fittings and pipework will be securely fastened to their intended points of anchorage. • There will be no persistent or unreasonable leakages of water (or other heating/cooling medium) or air from ventilation systems. • Secure to authorized access only. • Free from corrosion, erosion and organic growth; • Pneumatic tube system operates to the manufactures specifications.

Element	Standard
<p>Sanitary and Other Drainage Systems Including all sanitary ware and associated fittings</p>	<ul style="list-style-type: none"> • Function as intended, without undue noise and vibration. • Provide a safe and comfortable environment. • All pipework and fittings fastened securely to their intended points of anchorage. • There will be no leakage of waste and/or foul water and/or rain water.
<p>Fire Fighting Equipment</p>	<ul style="list-style-type: none"> • Fire extinguishers and other fire fighting equipment will be maintained in accordance with relevant codes and standards (e.g., CSA Standards). • Sound, secure and fixed to their intended point of anchorage. • Fully operational within manufacturer's recommendations. • Hydrants, sprinklers & hoses will be at correct operating pressure & capacity. • Pipework will be free from corrosion, leaks and drips. • Be of suitable type and quantity for the hazards present within their vicinity.
<p>Medical Gases and Vacuum</p> <ul style="list-style-type: none"> ○ Including all infrastructure for medical gases constructed or supplied by Project Co pursuant to Schedule 3. 	<ul style="list-style-type: none"> • Medical gas and vacuum systems will be maintained in accordance with all relevant codes and standards.
<p>Sound Transmission</p>	<ul style="list-style-type: none"> • Sound transmission levels for designated areas maintained within the design tolerances in accordance with the requirements of Schedule 3.
<p>Communications Systems Including:</p> <ul style="list-style-type: none"> ○ all cabling infrastructure supplied by Project Co pursuant to Schedule 3; ○ the public address system; ○ the patient education / entertainment system; ○ RTLS system (the Authority will be responsible for replacement of RTLS tags); ○ intercom; ○ Patient/team call system; and ○ all other communication and information technology equipment provided by Project 	<ul style="list-style-type: none"> • Electrical and data transmission communications systems will be maintained and fully operational in accordance with all manufacturers' recommendations, relevant codes and standards.

Element	Standard
Co pursuant to Schedule 3.	
<p>Electrical Systems Including:</p> <ul style="list-style-type: none"> • lighting • safety • alarm systems • all infrastructure and wiring supplied by Project Co pursuant to Schedule 3. 	<ul style="list-style-type: none"> • Weatherproof where appropriate. • Function as intended without undue noise or vibration; wiring, fittings, fixtures, controls and safety devices will be properly housed and fastened securely to their intended point of anchorage¹ and labelled. • Lightning conductor should be complete, isolated and comply with CSA Standards. • MICC cable protective coatings intact. • Light emittance should be fully functional, safe and remain within 15% of the design Lux levels in accordance with the requirements of Schedule 3.

¹ Safety devices will be deemed to include all Un-Interruptible Power Supplies (UPS) and power surge devices specified to protect personnel and equipment.

APPENDIX 4D

HOUSEKEEPING AND WASTE MANAGEMENT SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of this Agreement:

“Annual Projection Notice” has the meaning given in Section 3.2 of this Appendix;

“Authority’s Infection Control Policies and Procedures” means the policies or procedures listed in Section 3.2(e) of this Appendix;

“Biomedical Waste” means waste which contains pathogens with sufficient virulence and quantity so that exposure to the waste by a susceptible host could result in an infectious disease and includes:

- (a) patient care and research waste;
- (b) human or animal anatomical tissue, organs and body parts;
- (c) non-anatomical waste consisting of:
 - (1) human cultures or specimens submitted for analysis; cultures and stocks of human cell lines; microbiological cultures and stock and material that has come into contact with any of the items above;
 - (2) live or attenuated vaccines;
- (d) drugs or other pharmaceutical products, including cytotoxic (chemo/expired pharmaceutical waste);
- (e) sharps including needles, needles attached to syringes, blades and other sharp instruments;
- (f) broken glass or other materials which are capable of causing punctures or cuts and which have come into contact with human blood or body fluid; and
- (g) articles saturated with blood or body fluids.

“Cleaned Elements” means all elements of the Facility (including those described in Table 1 of Attachment 2 to this Appendix) and all Maintained Equipment but does not include the cleaning of:

- (a) surgical instruments;
- (b) anaesthesia machines;
- (c) microscopes;
- (d) laboratory benches;

- (e) physiological monitoring equipment;
- (f) department based computers and keyboards/mouse;
- (g) respiratory therapy equipment; and
- (h) other equipment that may be identified from time to time by the Authority;

“Cleaning Access Times” means the times during which Project Co may access specified areas of the Facility to perform Cleaning Services as set out in the Annual Service Plan;

“Cleaning Outcome Standards” means those cleaning outcome standards defined within Attachment 1 of this Appendix 4D;

“Cleaning Services” means the cleaning services in respect of the Cleaned Elements to be provided by Project Co pursuant to this Appendix including Routine Cleaning, Reactive Cleaning and Planned Periodic Cleaning;

“Confidential Waste” means all waste designated as confidential by the waste generator including paper, plastic (bradma plates, ID cards, etc.) and electronic recording media (CDs, DVDs, etc.);

“Critical Care Area” means those areas of the Facility with a “Level One” and “Level Two” Functional Area Risk Categorization set out in the Cleaning Outcome Standards, or a “Very High Risk” and “High Risk” designation in the Risk Stratification Matrix set out in the Territorial Guidelines for Environmental Cleaning;

“Enhanced Cleaning” means special cleaning necessary to contain and eliminate transmission of infections;

“Facility Average” means the average score, as weighted and calculated by the audit tool included within the Cleaning Outcome Standards, of individual audits within the Facility, as further defined in Section 3.14 of this Appendix;

“Floor Care Ratio” means the ratio calculated by dividing the number of passing individual audits of hard flooring elements only, as audited by the audit tool included within the Cleaning Outcome Standards, by the total individual audits of hard flooring elements audited within the Facility as further defined in Section 3.14 of this Appendix;

“Functional Area Risk Categorization” means the operational risk status of each area of the Facility as set out in the Cleaning Outcome Standards and Territorial Guidelines for Environmental Cleaning;

“Housekeeping Quality Report” has the meaning set out in Section 3.14 of this Appendix;

“Infection Control Policies and Procedure” means the Authorities Infection Control Policies and Procedures to be updated on an as and when basis;

“Material Change” means a change greater than or less than 10% of the agreed upon value;

“Outbreak Cleaning” means special cleaning necessary to contain and eliminate an infection outbreak;

“Outbreak Cleaning Notice” means a notice from the Authority to Project Co confirming that an authorized infection control practitioner has declared an infection outbreak and requiring Enhanced Cleaning or Outbreak Cleaning to be performed;

“Planned Periodic Cleaning” means cleaning which is neither Routine Cleaning nor Reactive Cleaning, and which has a degree of flexibility in its scheduling completion;

“Quality Ratio” means the ratio calculated by dividing the number of rooms that achieve a passing score using the audit tool included within the Cleaning Outcome Standards by the total number of individual rooms audited within the Facility, as further defined in Section 3.14 of this Appendix;

“Reactive Cleaning” means ad hoc cleaning tasks performed on demand;

“Recyclable Waste” means all waste that can be recycled and such other waste which may become recyclable from time to time;

“Routine Cleaning” means the regular day-to-day cleaning tasks as described in this Appendix;

“Stanton Infection Control Coordinator” means an Authority elected suitability qualified and designated person with regard to infection control management;

“Territorial Guidelines for Environmental Cleaning” means those cleaning guidelines defined within Attachment 1 of this Appendix;

“Usage Notice” has the meaning given in Section 3.3 of this Appendix; and

“Workplace Hazardous Materials Information Systems” means the system designed to ensure that all employers obtain the information that they need to inform and train their employees properly about hazardous materials used in the workplace.

2. SERVICES

2.1 General Requirements

Project Co shall comply with all requirements set out in Schedule 4 Services Protocols and Specifications and Appendix 4A General Management Services relevant to the Housekeeping and Waste Management Services.

Project Co shall deliver the Housekeeping and Waste Management Services:

- (a) 24 hours per day, 365(6) days per year maintaining service levels and quality standards to a level that meet:
 - (1) the minimum service levels set out in this Appendix;
 - (2) the minimum Territorial and Authority standards as measured in accordance with the Cleaning Outcome Standards and Territorial Guidelines for Environmental Cleaning and achieving the passing scores set out in Section 3.14 of this Appendix;

Appendix 4D – Housekeeping and Waste Management Services
Stanton Territorial Hospital Project Agreement – Execution Version

- (3) meet the Service standards of infection control as defined in Section 3.2 of this Appendix
- (4) acquire and/or requisition and dispense of all Housekeeping and Waste Management Services consumables.
- (b) using quality materials and high standards of workmanship to all areas of the Facility achieve high standards of cleanliness, appearance and sanitation;
- (c) at frequencies recommended by the Territorial Guidelines for Environmental Cleaning in accordance with Table 2 of Attachment 2 to this Appendix;
- (d) making all necessary changes to its cleaning programs on a daily basis to ensure that these service standards are met at all times;
- (e) in a manner which ensures a collaborative working relationship with the Authority, its employees and contractors;
- (f) in a manner which is integrated and co-ordinated with the delivery of all other Services by Project Co and the use and operation of the Facility by the Authority;
- (g) in a safe and secure manner, having regard for Facility Users and Authority Activities;
- (h) Project Co acknowledges that there will be operations and/or tasks to be performed that are not described, but are necessary ancillary to this Appendix 4D Housekeeping and Waste Management Services and these shall be performed by Project Co as part of the Services;
- (i) the details within this Appendix 4D Housekeeping and Waste Management Services form one aspect of what Project Co shall provide in respect of the Services; and Project Co will provide, integrate, and coordinate these Services with all other Services to provide, from the Authority's perspective, an integrated and complete Facility management solution;
- (j) Project Co shall exercise competent supervision of the work at all times;
- (k) Project Co shall ensure that all requisitions for Housekeeping and Waste Management Services may be completed by telephone, electronic mail, and other electronic means;
- (l) through providing sufficient qualified, licensed, trained, experienced, competent supervisory and cleaning staff (including such supervisory and cleaning staff required for workload surges, and replacements for planned and unplanned absences) to continuously meet Response Times and Rectification Periods, and to provide and maintain a clean, safe, secure, hygienic and visually pleasing environment within the Facility at all times;
- (m) Project Co shall prepare a periodic monitoring report in compliance with the contents outlined in Schedule 4 Services Protocols and Specifications and Appendix 4A General

Management Services relevant to the Housekeeping and Waste Management Services;

- (n) Project Co shall liaise monthly or as required with the Stanton Infection Control Coordinator.

3. SERVICE REQUIREMENTS

3.1 Housekeeping and Waste Management Services consists of the two main elements as follows:

- Cleaning
- Waste Management

3.2 Cleaning Services

- (a) Project Co shall develop and submit to the Authority in accordance with Sections 4.1 and 4.2 of Schedule 4 and implement as part of the Annual Service Plan appropriate policies, procedures, practices, schedules and a self-monitoring inspection and reporting system relative to the Cleaning Services.
- (b) including cleaning of all Cleaned Elements with due regard to the Functional Area Risk Categorization, the Territorial Guidelines for Environmental Cleaning and the unique requirements of each Critical Care Area.
- (c) Cleaning to the standards as identified in this Appendix 4D Housekeeping and Waste Management Services all elements as described in detail in Attachment 2 to Appendix 4D, except where specifically excluded between the Authority and Project Co.
- (d) Project Co shall not clean or move to enable general cleaning (as part of this specification) items of equipment so identified by the Authority unless in agreement between the Authority and Project Co. This shall include, but not be limited to:
- Surgical Instruments;
 - Anaesthesia machines;
 - Microscopes;
 - Laboratory Benches;
 - Physiological monitoring equipment;
 - Certain identified Patient Medical equipment when in use
 - Respiratory therapy equipment;
 - Sterilizers

A complete list shall be agreed between Project Co and the Authority and documented in the Annual Service Plan.

- (e) Compliance with the following standards for cleaning, inspections and surveys:
- Accreditation Canada. (2014). Infection prevention and control standards. Ottawa, ON: Author.
 - Canadian Standards Association (CSA). (2010). CSA Z314.15, Warehousing, storage, and transportation of clean and sterile medical devices. ON: Author
 - Canadian Standards Association (CSA). (R2014). CSA Z317.10, Handling of waste materials in health care facilities and veterinary health care facilities.
 - Department of Health and Social Services. (2012). NWT infection prevention and control manual. Yellowknife, NT: Government of the Northwest Territories.
 - Northwest Territories Safety Act. (2014). Yellowknife, NT: Territorial Printer.
 - Northwest Territories Food Establishment Safety Regulations. (2011). Yellowknife, NT.
 - Ontario Agency for Health Protection and Promotion (Public Health Ontario). Provincial Infectious Diseases Advisory Committee (PIDAC). Best practices for cleaning, disinfection and sterilization of medical equipment/devices. (3rd ed). Toronto, ON: Queen's Printer for Ontario; May 2013.
 - Ontario Agency for Health Protection and Promotion (Public Health Ontario). Provincial Infectious Disease Advisory Committee (PIDAC). Best practices for environmental cleaning for prevention and control of infections in all health care settings. (2nd ed). Toronto, ON: Queen's Printer for Ontario; May 2012.
 - Ontario Agency for Health Protection and Promotion (Public Health Ontario). Provincial Infectious Diseases Advisory Committee (PIDAC). Best Practices for hand hygiene in all health care settings. (4th ed). Toronto, ON: Queen's Printer for Ontario; April 2014.
 - Ontario Agency for Health Protection and Promotion (Public Health Ontario). Provincial Infectious Diseases Advisory Committee (PIDAC). Infection prevention and control for clinical office practice. Toronto, ON: Queen's Printer for Ontario; June 2013.
 - Ontario Agency for Health Protection and Promotion (Public Health Ontario). Provincial Infectious Disease Advisory Committee (PIDAC). Routine practices and additional precautions in all health care settings. Toronto, ON: Queen's Printer for Ontario; November 2012.
 - Ontario Agency for Health Protection and Promotion (Public Health Ontario). Provincial Infectious Disease Advisory Committee (PIDAC). Annex A: Screening, testing and surveillance for antibiotics-resistant organisms (ARO) in all health care settings. Toronto, ON: Queen's Printer for Ontario; February 2013.

- Ontario Agency for Health Protection and Promotion (Public Health Ontario). Provincial Infectious Disease Advisory Committee (PIDAC). Annex B: Best practices for prevention of transmission of acute respiratory infection in all health care settings. Toronto, ON: Queen's Printer for Ontario; March 2013.
 - Ontario Agency for Health Protection and Promotion (Public Health Ontario). Provincial Infectious Disease Advisory Committee (PIDAC). Annex C: Testing, surveillance and management of Clostridium difficile in all health care settings. Toronto, ON: Queen's Printer for Ontario; January 2013.
 - Operating Room Nurses Association of Canada (ORNAC). (2013). The ORNAC Standards for Perioperative Registered Nursing Practice. (11th ed.). Canada. Open Bed and Volume Planning
- (f) To assist Project Co in developing each Annual Service Plan, the Authority will give notice (the "**Annual Projection Notice**") to Project Co of the number and location of in-patient beds in the Facility the Authority anticipates will be in service during the ensuing Contract Year, as well as the opening dates and anticipated volumes in related Functional Units or other areas, no later than:
- 90 days before the Target Service Commencement Date; and
 - December 1 of each year thereafter.

Unless the Authority otherwise gives notice in accordance with Section 3.2(f) above, the Annual Projection Notice for the Contract Year commencing on the Service Commencement Date will be [102] inpatient beds.

3.3 Opening and Closing of Beds or Volume Changes

The Authority may open or close in-patient beds or change the anticipated volumes in related Functional Units or other areas at any time by giving 30 days' notice ("**Usage Notice**") to Project Co and as of the effective date set out in such notice:

- (a) all opened beds and volume increases in other areas and, to the extent reasonable in the circumstances, related Functional Units will become part of the Cleaned Elements and the Cleaning Services; and
- (b) all closed beds and volume decreases in other areas and, to the extent reasonable in the circumstances, related Functional Units will be removed from the Cleaned Elements and the Cleaning Services.

The Annual Projection Notice will be deemed to be a Usage Notice for the Contract Year in respect of which it applies and will remain effective until the Authority delivers a subsequent Usage Notice.

If any change by the Authority to the number of inpatient beds or anticipated volumes in other areas would constitute a Material Change to this Agreement, including taking into account the projected

demand volumes set out in Appendix 3A Clinical Specifications, then the terms of Schedule 6 Changes, Minor Works and Innovation Proposals will apply.

3.4 Routine Cleaning

Project Co shall provide Routine Cleaning services 24-hours a day, 365(6) days per year to meet the requirements of this contract in all areas of the Facility. Project Co shall provide the Service at such frequencies to comply with:

HK01

- (a) the requirements of this Agreement, including the Cleaning Outcome Standards, the Territorial Guidelines for Environmental Cleaning and the Annual Service Plan for each area of the Facility;
- (b) the Quality Standards set out in Attachment 2 to Appendix 4D; and
- (c) the applicable Cleaning Access Times of each area of the Facility as identified and agreed upon in advance with the Authority.

Table 3.4.1 Cleaning Access Times

Area	Access Times
Surgical	24 hours
Emergency	24 Hours
CCCU/ISCU	24 hours
Interventional diagnostic Imaging	24 hours
Medical Imaging	20:00 to 06:00
Haemodialysis	24 hours
Maternal/Child Program	24 hours
Procedure Rooms	24 hours
Inpatient Care Units	24 hours
Ambulatory Care Centre	18:00 to 06:00
Learning Centre	18:00 to 06:00
Pharmacy	18:00 to 06:00
Administrative Office Areas	18:00 to 06:00

Project Co shall deliver the Services during these Cleaning Access Times, all of which shall be fully defined within the Annual Service Plan.

3.5 Critical Care Area Services

Project Co shall provide Critical Care Areas with Cleaning Services that meet their specialized needs, including:

- (a) areas such as operating rooms, surgical day care, labour and delivery that require between case cleaning at the highest possible standard of cleaning;
- (b) areas such as post anaesthetic recovery, surgical day care and endoscopy that require between patient cleaning;
- (c) Emergency Room areas requiring 24 hours per day, 7 days per week coverage; and
- (d) other Critical Care Areas including neonatal intensive care unit, interventional diagnostic imaging, haemodialysis, procedure rooms.

3.6 Reactive Cleaning

Project Co shall provide Reactive Cleaning services on a 24-hour per day, 365(6) days per year basis to address Demand Requisitions for ad-hoc critical, emergency, urgent and routine cleaning. Project Co shall respond to such Demand Requisitions within the relevant Response Time and will return the affected areas to the required standard within the relevant Rectification Period set out in Section 3. Reactive Cleaning includes but is not limited to:

HK02

	Task	Classification	Period of Time to Complete before occurrence of Service Failure
(a)	cleaning of spillages including blood and body fluids;	Emergency	30 min
(b)	replenishment of cleaning materials/disposables and washroom supplies;	Urgent	2 hours
(c)	bed/bed linen/stretchers cleaning between patients;	Urgent	2 hours
(d)	patient room discharge, transfer and terminal cleaning, including bed/bed linen/stretchers makeup and adjoining restrooms;	Urgent	2 hours
(e)	following Demand Requisitions for isolation	Emergency	30 min

HK02a

HK02b

HK02c

	cleans;			
(e)	bed linen changing as required;	Emergency	30 min	HK02d
(g)	procedure room, birthing/delivery suite, ICU, Emergency Room and supporting rooms and restrooms;	Emergency	30 min	
(h)	following discharges from high turnover Critical Care Areas	Emergency	30 min	HK02e
(i)	cleaning following Plant Service maintenance work;	Routine	2 hours	
(i)	pre-occupancy cleaning following construction or renovation projects;	Routine	2 hours	
(j)	cleaning following incidents such as flooding;	Emergency	30 min	HK02f
(k)	cleaning following outbreaks;	Urgent	2 hours	
(l)	cleaning of operating rooms, maternity (get up cleans) and emergency department stretchers (to the extent of any overlap with tasks in items (a) to (i), the classification of "Critical" takes priority for the scope of the tasks listed in this item (l));	Emergency	30 min	HK02g
(m)	all others will be classified as per the table in Section 5 of Appendix 4D.		2 hours	

3.7 Planned Periodic Cleaning

Project Co shall provide Planned Periodic Cleaning for all Cleaned Elements including general cleaning of the Facility, interior and exterior window cleaning, carpet shampooing, high-level dusting and upholstery cleaning as and when required and in accordance with the schedule for Planned Periodic Cleaning. **HK03**

3.8 Outbreak Cleaning

Project Co shall, on receipt of an Outbreak Cleaning Notice; **HK04**

- (a) perform special Enhanced Cleaning in accordance with the Authority's Infection Control Policies and Procedures; or
- (b) perform special Outbreak Cleaning in accordance with the Authority's Infection Control Policies and Procedures;

and in either case,

- (c) work cooperatively with the appropriate infection control representatives of the Authority where a specific policy or protocol has not been established.

3.9 Cleaning Times

Subject to Section 1 of this Appendix, Project Co shall;

HK05

- (a) perform Routine Cleaning and Planned Periodic Cleaning during the relevant Cleaning Access Times and during the periods agreed in the Annual Service Plan; and
- (b) undertake and complete Reactive Cleaning within the relevant Response Time and Rectification Period set out in Section 5 of this Appendix and Schedule 8.

3.10 Re-Scheduling of Cleaning Times

If the Authority, acting reasonably, determines that the times at which Project Co proposes to perform Cleaning Services will cause disruption to the operations of the Authority or other Facility Users, the Authority may give notice to Project Co to carry out such Cleaning Services at an alternate time. Upon such agreement, the Response Time and Rectification Period for such Cleaning Services will be adjusted accordingly.

3.11 Cleaning Equipment and Supplies

Project Co shall:

- (a) provide, maintain, clean, store and replace as required all cleaning equipment in accordance with the Authority's Infection Control Policies and Procedures and will ensure all equipment is:
 - (1) designated for use in specific areas of the Facility marked and used only in these designated areas.
 - (2) noise-restricted and equipped with high quality dust filters to reduce environmental nuisance and maintain air quality when using such equipment, particularly in patient areas of the Facility; and
 - (3) individually marked and not used beyond the portable appliance testing test date certificate for each piece of equipment;
- (b) procure, store safely, deliver and use all cleaning materials and consumable products required for the provision of Cleaning Services including the supplies described in Section 3.11(c);

- (c) deliver and replenish throughout the Facility all soap, hand sanitizer, toilet paper, paper towels, feminine hygiene dispensers and consumables and biomedical waste disposal bags; and
- (d) maintain a listing of cleaning products used in the cleaning operation and ensure that:
 - (1) all materials thoroughly clean the Facility and are not detrimental to the life cycle of systems and building components (e.g. floors, walls, carpet, etc.) nor negatively affect indoor air quality;
 - (2) a copy of material safety data sheets of supplies used is kept at the Facility in accordance with Workplace Hazardous Materials Information Systems and applicable occupational health and safety regulations;
 - (3) all cleaning supply materials and equipment used are consistent with the Authority's Infection Control Policies and Procedures and have been approved by the Authority's Representative or designate before use. Approval of materials does not relieve Project Co of general responsibility under this Agreement; and
- (e) ensure that all cleaning and disinfecting products:
 - (1) have, as applicable, a drug identification number (DIN) from Health Canada;
 - (2) are used in accordance with the manufacturer's recommendations;
 - (3) require little or no mixing or diluting;
 - (4) are active at room temperature and within a short contact time against the usual microorganisms encountered in the Facility;
 - (5) have low irritancy and allergenic characteristics; and
 - (6) are safe for the environment.

3.12 Waste Management & Recycling

Project Co shall develop and submit to the Authority in accordance with Sections 4.1 and 4.2 of Schedule 4 and implement as part of the Annual Service Plan appropriate policies, procedures, practices, schedules and a self-monitoring inspection and reporting system relative to waste management and recycling. In developing such policies, procedures, practices, schedules, and inspection and reporting system Project Co shall fully take into account the Authority's waste management plan including to:

HK06

- (a) manage and provide the collection of all waste streams generated within the Facility from both Project Co and the Authority in accordance with this Appendix, including Table 1 of Attachment 2;
- (b) provide routine and reactive waste collection and segregation services in accordance with the Cleaning Access Times;

- (c) empty all refuse containers at least daily or as required such that none achieves more than 75% capacity;
- (d) segregate waste in accordance with the Authority Policies in appropriate secured and labelled containers;
- (e) transport waste generated in the Facility to the central waste disposal collection area for removal by the Authority's contractor;
- (f) segregate waste streams including Recyclable Waste (at source where practical to do so) and place in the appropriate containers at the soiled utility rooms, soiled holding rooms and exterior waste collection areas designated by the Authority, including:
 - (1) compostable, recyclable and confidential waste paper;
 - (2) cardboard;
 - (3) laser cartridges;
 - (4) glass and glass containers;
 - (5) metal food containers, and metal scrap containers;
 - (6) rigid plastics (1-7);
 - (7) soft plastics (such as film);
 - (8) newsprint;
 - (9) batteries;
 - (10) beverage containers;
 - (11) food waste;
 - (12) carpet;
 - (13) compostable materials;
 - (14) construction waste;
 - (15) electronic waste;
 - (16) furniture;
 - (17) general solid waste;
 - (18) gyproc;
 - (19) yardwaste;

- (20) confidential media (bradma plates, ID cards, CDs, DVDs and other similar media); and
- (21) wood;
- (g) work in cooperation with the Authority and its contractors to ensure that waste storage areas are:
 - (1) segregated;
 - (2) kept clean, free from loose litter, malodour, spillages and debris;
 - (3) free from pests and vermin;
 - (4) secure, clearly marked, appropriately signed, and with access restricted to authorized personnel only; and
 - (5) maintained and secured to minimize the risk of fire; and
- (h) collect soiled linens and deliver such linens to hampers and the soiled utility rooms or soiled holding rooms within the Facility and transport soiled linens from such rooms to a location designated by the Authority for removal from the Facility by the Authority's contractor.

3.13 Miscellaneous Services

Project Co shall provide the additional facility management services described in Section 1.3 of Table 1 of Attachment 2 to this Appendix. **HK07**

3.14 Quality Monitoring and Audit Reporting

Project Co shall provide a monthly, quarterly and annual performance report on all Housekeeping and Waste Management Services including:

Project Co shall annually submit its proposed auditing plan as part of the Annual Service Plan in accordance with Section 4.2 of Schedule 4 Services Protocols and Specifications. Project Co shall audit no less than 10% of patient units and 10% of all other areas of the Facility during each monthly audit with the intent that all areas of the Facility will have been subject to a cleaning audit pursuant to the Cleaning Outcome Standards and the Territorial Guidelines for Environmental Cleaning in each Contract Year. Project Co shall consider the Functional Risk Area Categorization in determining the frequency of audits within each area of the Facility. **HK08**

In addition to the observational audits and visual assessment audits set out in the Cleaning Outcome Standards, Project Co shall also carry out environmental marking audits and patient and staff satisfaction surveys using the Authority's survey tool. Project Co shall achieve an average score of 85% in accordance with the patient and staff satisfaction surveys. **HK09**

The Authority may attend Project Co's audits and request Project Co to arrange, at Project Co's cost, for independent audits in compliance with the Cleaning Outcome Standards and the Territorial Guidelines for Environmental Cleaning in order to confirm the validity of such reports. In any event, Project Co shall, at Project Co's cost, arrange for such independent audits comprehensively covering the Facility and in respect of the areas of the Facility described within the Annual Service Plan, to take place at least annually.

Project Co shall achieve the following passing scores in the observational audits and visual assessment audits pursuant to the Cleaning Outcome Standards:

- (a) Facility Average: a passing score for this category is 85% or higher; **HK10**
- (b) Quality Ratio: a passing score for this category is 75% or higher; **HK11**
- (c) Floor Care Ratio: a passing score for this category is 75% or higher. **HK12**

If, in any calendar month during the Operating Period, Project Co fails to attain a passing score in any of the Facility Average, Quality Ratio or Floor Care Ratio categories, then Project Co shall, within 5 Business Days after the end of the relevant month, generate a housekeeping quality report (a "**Housekeeping Quality Report**") identifying:

- (d) the relevant area(s) of the Facility;
- (e) the inspection elements for which Project Co did not attain a "Pass" in accordance with the Cleaning Outcome Standards and the Territorial Guidelines for Environmental Cleaning in the relevant area(s) during the relevant month;
- (f) the housekeeping functions that contributed to the identified failures and possible root causes; and
- (g) an action plan to remedy the identified failures.

Project Co shall review the Housekeeping Quality Report with the Authority and consult with the Authority with respect to the action plan(s) therein. Project Co shall, as soon as reasonably practicable, implement the action plan in consultation with the Authority. Project Co shall generate a further Housekeeping Quality Report, and review that report with the Authority, monthly until such time as the identified failures have been remedied and Project Co is achieving a passing score in all categories.

Project Co shall implement and adhere to all other elements of the Annual Service Plan relating to Housekeeping and Waste Management Services not otherwise addressed in Section 3.

HK013

4. SERVICE STANDARDS

Project Co shall deliver services in accordance with the standards identified within Attachment 1 and 2 of this Appendix.

5. RESPONSE AND RECTIFICATION PERIODS

Project Co shall respond to any notified variances from the Services Protocols and Specifications identified herein as follows:

Service Category	Definition	During Core Hours		During Non-Core Hours	
		Response Time	Rectification Time	Response Time	Rectification Time
Emergency	<p>Service required immediately and is considered a serious emergency, including:</p> <ul style="list-style-type: none"> issues having an immediate negative impact on patient care or clinical functionality; safety problems exposing Facility Users to danger; emergency repairs to prevent further damage (i.e. burst pipe); and equipment failure or operating difficulties which could result in the loss of critical utilities including heat, water, electricity, emergency power and medical gases. 	Immediate 15 minutes	2 hours	Immediate 15 minutes	2 hours
Urgent	<p>Service required as soon as possible:</p> <ul style="list-style-type: none"> to address problems not presenting an immediate danger; and to address problems having the potential to have a negative impact on patient care. 	30 minutes	24 hours	30 minutes following the resumption of Core Hours	24 hours following the resumption of Core Hours
Routine	<p>Service required for non-emergencies not having an immediate effect on patient care such as leaking taps, faulty doors and windows or equipment breakdowns or work not requiring immediate attention such as repairs to damaged walls, furniture or fixture installations.</p>	2 hours	3 days	2 hours following the resumption of Core Hours	3 days

Table 1 Housekeeping and Waste Management Services

Without limiting the requirements of the Schedule 4 Services Protocols and Specifications and this Appendix, Housekeeping and Waste Management Services includes the following:

Elements	Requirements
1.1 General Cleaning Requirements	<ul style="list-style-type: none"> (a) All patient/resident rooms, staff areas and supporting areas, daily, routine, discharge and special cleaning (b) All critical care areas (c) All isolation rooms cleaning (daily, routine, discharge and special cleaning) (d) Prepare all rooms after patient/resident discharges & transfers (includes stripping, making beds, stocking unit and blueware, removal of dirty linen to collection areas, transport of beds and equipment) except for equipment as identified in Section 3.2(d) (e) Remove all blue-ware from rooms and transport to collection/process cleaning areas (f) All washrooms/showers/tub areas and replenish supplies to meet frequency demands (g) All sinks and hand washing areas and replenish supplies to meet frequency demands (h) All stretchers, beds, routine and cycle cleaning of frames and all type of mattresses. Exchange of old mattresses with new mattresses provided by the Authority when required (i) All isolates (incubators), bassinets, baby warmers, crib hoods, labour/maternity birthing beds and all associated patient equipment (j) All patient medical related equipment including I.V. poles and pumps, suction and oxygen units, autoclaves, tractions (k) All patient/resident related equipment & furnishings including wheelchairs, commodes and walkers. Move furniture or equipment. (l) All paediatric unit toys, doll / play houses, etc. (m) All linen hampers and garbage waste containers and garbage waste transport units (n) All supply carts stored on unit, storage shelves and frames including: isolation, crash, lakeside and medication carts (must be coordinated with the units) (o) All bathing tubs (i.e. Century & Arjo Tubs) at end of day including routine disinfection of jets and plumbing (p) All staff refrigerators and unit appliances, including all food microwaves (q) All medical refrigerators provided the Authority has emptied them of all medication following reasonable notice from Project Co of the scheduled cleaning of such refrigerators (r) All offices, office furniture, phone, computer screens, keyboards, oscillating fans

Elements	Requirements
	<ul style="list-style-type: none"> (s) All unit dining room tables after each meal (t) All silk plants in common areas. (u) All elevators, including doors, floors, vents and tracks (v) All main lobbies, corridors and stairs (w) All seasonal areas and patios (x) All exterior and interior glass & windows, including screens (y) All window coverings, PVC blinds. Exchange cubicle, window and shower curtains (z) Provide carpet & upholstery cleaning programs (extracting/bonnet/spot /vacuum) (aa) Provide comprehensive floor care programs (scrub/polish/topcoat/strip/finish) bb) Move furnishing & equipment from rooms when performing special cleaning. Provide office moves, room set-ups. Provide furniture and equipment disposal (cc) Soiled Inpatient Mobile Equipment except for equipment as identified in Section 3.2(d), (dd) Provide spills clean of body fluids/water/general fluids. May include small chemical spill as per facility protocol (ee) Cleaning of the immediate area (up to [10] metres) outside each entrance of the Facility, including entrance/exit areas, exterior walkways, patios/seasonal areas, loading docks/waste collection points, glass, doors, ledges and sills to a maximum height of 5 metres, garbage cans, benches, seating areas and concrete walkways, routine exterior window cleaning of ground floor glass, entrances and exits into the parkades and parking lots and the power washing of concrete walkways. Remove waste, empty ashtrays and sweep. (ff) Cleaning of, and debris removal from, the underground parking areas
1.2 Waste Management Services:	<ul style="list-style-type: none"> (a) Collect waste from all rooms and corridors and transport to the soiled utility rooms/garbage chutes. (b) Collect biomedical, chemical, pharmaceutical, cytotoxic and radiological waste & take to designated holding area (c) Collect recyclables & take to holding/collection areas (d) Transport all waste /recyclables using defined transport routes only to central waste disposal holding areas and prepare material for disposal/collection by Authority's contractor, including operation of bailers and compactors (e) Clean containers or carts used for transport of all waste streams (f) Segregate/package/label/weigh/record/track all waste streams and provide random audits and waste reports (g) Replace all sharps containers when full to the lesser of $\frac{3}{4}$ full or the fill line. (h) Removal of non-functioning equipment and furniture and take to a holding area

Elements	Requirements
1.3 Miscellaneous Services:	<p>(a) Provide room setups for lecture/training/class rooms/display areas and provide clean-up and reset of the rooms/areas between meetings and at the end of the day</p> <p>(b) Pickup all units/departments soiled linen & take to the soiled utility rooms/linen chute/designated soiled linen holding cart</p> <p>(c) Provide odour control program</p> <p>(d) Provide sanitary napkin machine services</p> <p>(e) Launder cleaning cloths, mops offsite</p> <p>(f) Report all facility conditions that affect the cleaning operation, present as a safety hazard, or is detrimental to the image of a visually pleasing environment</p> <p>(g) Deliver seasonal decorations.</p> <p>(h) collect and deliver lost and found articles to the Authority's security department or as otherwise directed by the Authority</p>

Table 2 Cleaning Standards

Without limiting the requirements of Schedule 4 Services Protocols and Specifications and this Appendix, including the specific requirements of the Cleaning Outcome Standards and the Territorial Guidelines for Environmental Cleaning, Cleaning Services will include the following:

Element	Requirement
Building	
External features, fire exists and stairwells	<ul style="list-style-type: none"> • Landings, ramps, stairwells, fire exits, steps, entrances, porches, patios, balconies, eaves, external light fittings are free of dust, grit, dirt, chewing gum, leaves, cobwebs, rubbish, graffiti, cigarette butts and bird excreta. • Handrails are clean and free of stains. • Garden furniture is clean and operational.
Walls, assist rails, baseboards and ceilings/tile and support frames	<ul style="list-style-type: none"> • Internal and external walls and ceilings are free of dust, grit, lint, soil, film, graffiti and cobwebs. • Walls and ceilings are free of marks caused by furniture, equipment or users of the Facility. • Light switches are free of fingerprints, scuffs and any other marks. • Light fittings are free of dust, grit, lint and cobwebs. • Polished surfaces are of a uniform lustre.
Windows	<ul style="list-style-type: none"> • External and internal surfaces of glass are clear of all streaks, chewing gum, spots and marks, including fingerprints and smudges. • Window frames, tracks and ledges are clear and free of dust, grit, marks and spots.
Doors	<ul style="list-style-type: none"> • Internal and external doors and doorframes are free of dust, grit, lint, chewing gum, soil, film, fingerprints and cobwebs. • Doors and doorframes are free of marks caused by furniture, equipment

Element	Requirement
	<ul style="list-style-type: none"> • or staff. • Air vents, grilles and other ventilation outlets are kept unblocked and free of dust, grit, soil, film, cobwebs, scuffs and any other marks. • Door tracks and doorjambbs are free of grit and other debris. • Polished surfaces are of a uniform lustre.
Hard floors	<ul style="list-style-type: none"> • The floor is free of dust, grit, litter, chewing gum, marks and spots, water or other liquids. • The floor is free of polish or other build-up at the edges and corners or in traffic lanes. • The floor is free of spots, scuffs or scratches on traffic lanes, around furniture and at pivot points. • Inaccessible areas (edges, corners and around furniture) are free of dust, grit, lint and spots. • Polished or buffed floors are of a uniform lustre. • Appropriate signage and precautions are taken regarding pedestrian safety on newly cleaned or wet floors. • Dust control mats are free from ingrained dust, dirt and stains, and the edges and reverse side are free from dust and dirt.
Soft floors	<ul style="list-style-type: none"> • The floor is free of dust, grit, litter, chewing gum, marks and spots, water or other liquids. • The floor is free of stains, spots, scuffs or scratches on traffic lanes, around furniture and at pivot points. • Inaccessible areas (edges, corners and around furniture) are free of dust, grit, lint and spots. • Carpets and entrance matting are of an even appearance without flattened pile. After deep cleaning, there is not shrinkage, colour loss or embrittlement of fibres. • Dust control mats are free from ingrained dust, dirt and stains, and edges and reverse side are free from dust and dirt.
Ducts, grills and vents	<ul style="list-style-type: none"> • All ventilation outlets are kept unblocked and free of dust, grit, chewing gum, soil, film cobwebs, scuffs and any other marks. • All ventilation outlets are kept clear and uncluttered following cleaning.
Fixtures	
Electrical fixtures and appliances	<ul style="list-style-type: none"> • Electrical fixtures and appliances are free of grease, dirt, dust, deposits, marks, stains and cobwebs • Electrical fixtures and appliances are kept free from signs of use or non-use. • Hygiene standards are satisfied where the fixture or appliance is used in food preparation. • Motor vents, etc., are clean and free of duct and lint. • Insect killing devices are free of dead insects, and are clean and functional.
Furnishings and fixtures	<ul style="list-style-type: none"> • Hard surface furniture is free of spots, soil, film, dust, fingerprints and spillage.

Element	Requirement
	<ul style="list-style-type: none"> • Soft furnishings are free from stains, soil, film and dust. • Furniture legs, wheels and castors are free from mop strings, soil, film, dust and cobwebs. • Inaccessible areas (edges, corners, folds and crevices) are free of dust, grit, lint and spots. • All high surfaces are free from dust and cobwebs. • Curtains, blinds and drapes are free from stains, dust, cobwebs, lint and signs of use or non-use. Cords shall be clean and knot free. • Equipment is free of tapes/plastic, etc., which may compromise cleaning. • Furniture has no unpleasant or distasteful odour. • Shelves, bench tops, cupboards and wardrobes/lockers are clean inside an out, and free of dust and litter. • Internal plants are free of dust and litter. • Waste/rubbish bins or containers are clean inside and out, free of stains and mechanically intact. • Waste is removed in accordance with the Service Standards of the Waste Management Specific Service Specification Table 1 above. • Fire extinguishers and fire alarms are free of dust, grit, dirt and cobwebs, and mechanically intact. • All decorative plants are free of dust and debris.
Kitchen fixtures and appliances	<ul style="list-style-type: none"> • Fixtures, surfaces and appliances are free of grease, dirt, dust, deposits, marks, stains and cobwebs. • Electrical and cooking fixtures and appliances are kept free from signs of use or non-use. • Cooker hoods (interior and exterior) and filters are free of grease and dirt on inner and outer surfaces. • When cleaning food preparation areas, fixtures or appliances, the requirements of the Hazard Analysis Critical Control Points (HACCP) Standards and Health Authorities Environmental Health officer, as appropriate, must be satisfied. • Motor vents, etc., are clean and free of dust and lint. • Refrigerators/freezers are clean and free of ice build-up. • Waste is removed in accordance with the Service Standards of the Waste Management Specific Service Specification.
Toilets and bathroom fixtures	<ul style="list-style-type: none"> • Porcelain, cubicle rails and plastic surfaces are free from smudges, smears, body fluids, soap build-up, mineral deposits, and hair inside and outside. • Metal surfaces, shower screens and mirrors are free from streaks, soil, smudges, soap build-up and oxide deposits. • Wall tiles and wall fixtures (including soap dispensers and towel holders) are free of dust, grit, smudges/streaks, mold, soap build-up and mineral deposits. • Shower curtains and bath mats are free from stains, smudges, smears,

Element	Requirement
	<ul style="list-style-type: none"> odours, mould and body fluids. • Plumbing fixtures are free of smudges, dust, soap build-up and mineral deposits. • Bathroom fixtures are free from unpleasant or distasteful odours. • Polished surfaces are of a uniform lustre. • Sanitary disposal units are clean and functional. • Consumable items are in sufficient supply. • Waste is removed in accordance with the Service Standards of the Waste Management Specific Service Specification Table 1.
Patient Equipment	
<p>Patient equipment</p> <ul style="list-style-type: none"> • Wheelchairs • Beds and mattresses (including carts) • Carts, stretchers • Bedside lockers • Toilet chairs • Bedside tables/lockers • Bedside chairs • Sofas • Over bed tables • IV stands • Suction machines • Cubicle curtains • Bedpan washers/sterilizers • Hoists • Medication carts • Ceiling lifts/slings 	<ul style="list-style-type: none"> • Equipment is free from soil, smudges, dust, fingerprints, grease and spillage. • Equipment is free of tapes/plastic, etc., which may compromise cleaning. • Equipment legs, wheels and castors are free from mop strings, soil, film, dust and cobwebs. • Equipment has no unpleasant or distasteful odour.
Environment	
Overall Appearance	<ul style="list-style-type: none"> • The area appears tidy and uncluttered. • Floor space is clear, only occupied by furniture and fittings designed to sit on the floor. • Furniture is maintained in a fashion which allows for cleaning. • Fire access and exit doors are left clear and unhindered.
Odour control	<ul style="list-style-type: none"> • The area smells fresh. • There is no unpleasant or distasteful odour. • Room deodorizers are clean and functional.

APPENDIX 4E

UTILITY MANAGEMENT SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of this Agreement:

"Utilities" includes:

- (a) essential electrical power (vital and delay vital);
- (b) utility electrical power;
- (c) heating hot water;
- (d) water;
- (e) sanitary waste;
- (f) storm water;
- (g) gas, oil and any other fossil-based fuel;
- (h) the supply of fuel for the biomass boilers such as wood pellets as well as the removal of ash from the Lands;
- (i) medical gas compounds;
- (j) telephone and data cabling; and
- (k) television/satellite cable.

"Utility Company" means any company designated by the Authority to provide Utilities to the Facility and, in respect of heating and domestic hot water, means the Authority.

2. SERVICES

2.1 General Requirements

In addition to the standards and specifications set out in Schedule 4 Services Protocols and Specifications and the requirements set out in Schedule 2C [Energy and Carbon Emissions], Project Co shall deliver the Utility Management Services:

- (a) 24 hours per day, 365(6) days per year; and
- (b) in a manner integrated and coordinated with the Plant Services to facilitate the smooth operation of the Facility.

UM01

3. SERVICE REQUIREMENTS

3.1 General

As part of the delivery of the Utility Management Services, Project Co shall:

- (a) manage all Utilities delivered to the Facility by Utility Companies;
- (b) manage, test and troubleshoot all utilities, associated systems and infrastructure; **UM02**
- (c) maintain the integrity of the systems that support and deliver Utilities within the Facility and ensure that an adequate continuous supply of all Utilities is available 24 hours a day, 365(6) days per year to all applicable Facility locations;
- (d) in the event that there is a disruption from a Utility Company, Project Co shall supply emergency utilities in accordance with the design criteria included in Schedule 3 Design and Construction Specifications and will cooperate and assist the Authority in contingency response including the supply of temporary utilities where feasible; **UM03**
- (e) respond to all Demand Requisitions in connection with Utilities;
- (f) post hazard and safety notices and record, distribute and evaluate such notices to ensure that all required notification procedures regarding failures are complied with;
- (g) provide, manage and operate an effective BMS that includes an integrated energy and utilities management system;
- (h) prepare a utilities report for the Facility as part of the Annual Service Plan (together with progress reports at each Payment Period) that provides user configurable reports, detailing time stamped usage history, status, event history, consumption history and other required energy usage and control information in detailed and summary formats; **UM04**
- (i) be responsible for: **UM05**
 - (1) obtaining and maintaining all required permits, licenses, test certificates and approvals;
 - (2) undertaking all testing, cleaning and maintenance, including as required by the Utility Company(s) and other parties having jurisdiction;
- (j) regularly review and amend as required the utility supply specifications such that they are consistent with the requirements of the Authority; and
- (k) ensure all physical connections and structured cabling for telephone and data services are provided and maintained at all times; and

- (l) inform the Authority’s Representative or designate of all:
 - (1) unscheduled disruptions to any Utility immediately upon the occurrence; **UM06**
and
 - (2) scheduled interruptions to any Utility not less than seven days prior to such disruption. **UM07**

3.2 Utilities Provided by the Authority

Project Co shall be responsible for management of all Utilities provided by the Authority to the Facility from the point of connection of such Utilities within the Authority’s facilities on the Lands.

3.3 Biomass Waste

Project Co shall be responsible for the process and cost of removal of waste product from the biomass boilers such as ash.

4. SERVICE STANDARDS

NOT USED

5. RESPONSE AND RECITIFICATION PERIODS

Project Co shall respond to any notified variances from the Services Protocols and Specifications identified herein as follows:

Service Category	Definition	During Core Hours		During Non-Core Hours	
		Response Time	Rectification Time	Response Time	Rectification Time
Emergency	Service required immediately and is considered a serious emergency, including: <ul style="list-style-type: none"> issues having an immediate negative impact on patient care or clinical functionality; safety problems exposing Facility Users to danger; emergency repairs to prevent further damage (i.e. burst pipe); and equipment failure or operating difficulties which could result in the loss of critical utilities including heat, water, electricity, emergency power and medical gases. 	Immediate 15 minutes	2 hours	Immediate 15 minutes	2 hours
Urgent	Service required as soon as possible: <ul style="list-style-type: none"> to address problems not presenting an immediate danger; and to address problems having the potential to have a negative impact on patient care. 	30 minutes	24 hours	30 minutes following the resumption of Core Hours	24 hours following the resumption of Core Hours
Routine	Service required for non-emergencies not having an immediate effect on patient care such as leaking taps, faulty doors and windows or equipment breakdowns or work not requiring immediate attention such as repairs to damaged walls, furniture or fixture installations.	2 hours	3 days	2 hours following the resumption of Core Hours	3 days
Statutory	Service is a statutory, legal and/ or legislative requirement. If a Services Protocol and Specification includes any statutory, legal and/ or legislative requirement then this Service Failure category will apply.	Instant Failure	2 weeks	Instant Failure	2 weeks

*Note: The Authority shall work collaboratively with Project Co to mutually agree on specific situations upon which an Event would be considered Emergency, Urgent and Routine.

Performance Indicators

*Note: For the avoidance of doubt, where the “Response Time” and “Rectification Period” is “N/A”, then the categories and periods within the table of Section 5 are to be used.

	Indicator	Service Failure Level	Response Time	Rectification Period	Recording Frequency	Monitoring Method
	Management					
UM01	An adequate, continuous supply of all Utilities is maintained 365 (6) days per year, 24 hours a day. (Excluding disruptions in service caused by a Utility Company)	High	N/A	N/A	Monthly	Performance Monitoring Report
UM02	Project Co testing the Facility’s emergency power system at least weekly but otherwise as and when required under applicable Laws, standards and Good Industry Practice and including annual full load testing	High	N/A	N/A	Monthly	Performance Monitoring Report
UM03	Project Co supplying emergency utilities in accordance with the design criteria in the event that there is a disruption from a Utility Company	High	N/A	N/A	Monthly	Performance Monitoring Report
UM04	Project Co implementing and adhering to all elements of the Annual Service Plan related to Utility Management Services	Medium	N/A	N/A	Monthly	Performance Monitoring Report
UM05	Proof of all necessary required permits, licenses, test certificates and approvals;	Medium	N/A	N/A	Monthly	Performance Monitoring Report
UM06	Inform the Authority immediately on occurrence of any scheduled interruptions to any Utility supply	High	N/A	N/A	Monthly	Performance Monitoring Report
UM07	Inform the Authority of all unscheduled interruptions to any Utility supply	Medium	N/A	N/A	Monthly	Performance Monitoring Report

APPENDIX 4F

ROADS, GROUNDS AND LANDSCAPE MAINTENANCE

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of this Agreement:

“Roads, Grounds and Landscape Maintenance Services” means the commissioning, testing, servicing, maintenance, repair, renewal or replacement of the roads, grounds or landscape maintained elements.

2. SERVICES

2.1 General Requirements

In addition to the standards and specifications set out in Schedule 4 Services Protocols and Specifications, Project Co shall deliver the Roads, Grounds and Landscape Maintenance Services in a manner integrated and coordinated with all other Project Co Services to facilitate the smooth operation of the Lands.

3. SERVICE REQUIREMENTS

Project Co shall:

- (a) Provide Maintenance for all roads, grounds and landscape at the Lands: **RG01**
 - (1) maintenance of irrigation systems, exterior lighting, internal roadways, parking areas and other site improvements;
 - (2) Full horticulture services, including:
 - (A) tree maintenance/surgery;
 - (B) lawn care, including mowing and edging;
 - (C) flower bed maintenance;
 - (D) weeding;
 - (E) planting, including shrubs, trees, flower beds; and
 - (F) effective irrigation procedures;
 - (3) snow and ice removal from sidewalks and roadways, including: **RG02**
 - (A) snow plowing, clearing, sanding and salting (including the application of other ice melt products); and
 - (B) development of a snow and ice clearing priority protocol in consultation with the Authority;

- (b) ensure all external areas of the Facility are sound, safe, tidy and maintained in accordance with Table 1 of Attachment 1 to this Appendix;
- (c) protect from damage all existing and new plants, site services, curbs, paving, structures, finishes and any other features, during the course of providing the Services; and
- (d) obtain the approval of the Authority before using any herbicides, pesticides or fertilizers, all used in accordance with local regulations and bylaws.

4. SERVICE STANDARDS

Project Co shall deliver services in accordance with the standards identified within Attachment 1 of this Appendix.

5. RESPONSE AND RECITIFICATION PERIODS

Project Co shall respond to any notified variances from the Services Protocols and Specifications identified herein as follows:

Service Category	Definition	During Core Hours		During Non-Core Hours	
		Response Time	Rectification Time	Response Time	Rectification Time
Emergency	Service required immediately and is considered a serious emergency, including: <ul style="list-style-type: none"> • issues having an immediate negative impact on patient care or clinical functionality; • safety problems exposing Facility Users to danger; • emergency repairs to prevent further damage (i.e. burst pipe); and • equipment failure or operating difficulties which could result in the loss of critical utilities including heat, water, electricity, emergency power and medical gases. 	Immediate 15 minutes	2 hours	Immediate 15 minutes	2 hours
Urgent	Service required as soon as possible: <ul style="list-style-type: none"> • to address problems not presenting an immediate danger; and • to address problems having the potential to have a negative impact on patient care. 	30 minutes	24 hours	30 minutes following the resumption of Core Hours	24 hours following the resumption of Core Hours
Routine	Service required for non-emergencies not having an immediate effect on patient care such as leaking taps, faulty doors and windows or equipment breakdowns or work not requiring immediate attention such as repairs to damaged walls, furniture or fixture installations.	2 hours	3 days	2 hours following the resumption of Core Hours	3 days
Statutory	Service is a statutory, legal and/ or legislative requirement. If a Services Protocol and Specification includes any statutory, legal and/ or legislative requirement then this Service Failure category will apply.	Instant Failure	2 weeks	Instant Failure	2 weeks

*Note: The Authority shall work collaboratively with Project Co to mutually agree on specific situations upon which an Event would be considered Emergency, Urgent and Routine.

6. PERFORMANCE INDICATORS

*Note: For the avoidance of doubt, where the “Response Time” and “Rectification Period” is “N/A”, then the categories and periods within the table of Section 5 are to be used.

	Indicator	Service Failure Level	Response Time	Rectification Period	Recording Frequency	Monitoring Method
RG01	All gardens, grounds and other external areas of the Facility are maintained in accordance with this Appendix and specifically the standards set out in Attachment 1 of this Appendix.	Low	N/A	N/A	Monthly	Performance Monitoring Report
RG02	Snow and ice removal must be carried out according to this Appendix.	Medium	N/A	N/A	Monthly	Performance Monitoring Report

ATTACHMENT 1
SERVICE STANDARDS

Table 1:

Element	Standard
General	<ul style="list-style-type: none"> • All elements are to be maintained, repaired and refreshed as required to meet the performance specifications of the design criteria and consistent with a site maintained in accordance with all applicable laws, codes, legislation, hospital policies and Good Industry Practices.
Site Improvements and Infrastructure	<ul style="list-style-type: none"> • Free from litter, graffiti and/or vandalism. • Accessible for the visually and mobility impaired, wheelchair users. • All external furniture, and hard landscaping features maintained in accordance with the design criteria • Waste bins emptied as required • Irrigation and exterior lighting systems functional and maintained in accordance with the design criteria. • Gutters, drains and storm water systems free from litter, leaves, weeds and extraneous material • Fences, walls and gates safe, sound and secure
Site Circulation Routes Including: <ul style="list-style-type: none"> • Car Parking Areas (underground) • Hardstandings • Facility entrances • External staircases • External evacuation routes 	<ul style="list-style-type: none"> • Sound safe and even surfaces. • Substantially free from standing water, ice, snow. • Substantially free from fallen leaves, moss algae or interstitial weeds. • Free from fallen trees. • Curbs and edgings are sound. • No loose curbs or paving stones. • Road markings and parking stripings are clear and complete. • Free from graffiti and/or vandalism. • Provides for good disabled access such as the visually impaired and wheelchair users. • Protection of all vehicles from chemical sprays during any applications. • Free from undue wear and tear.

Element	Standard
<p>External Furniture and Structures Including:</p> <ul style="list-style-type: none"> • Guard rails • Copings • Statues or ornamental objects • Bollards 	<ul style="list-style-type: none"> • Sound, secure, safe and free from damage. • Operating at their design performance where applicable. • Substantially free from moss algae and/or interstitial weeds. • Free from graffiti and/or vandalism. • luminaries and light sources function as intended and achieve the required levels of illumination. • Free from undue wear and tear.
<p>Rooftop Landscaping and Interior Courtyards</p>	<ul style="list-style-type: none"> • Shrubs pruned and trimmed. • Smooth, even surfaces. • Regulation and management of pest control. • Seed, maintain, mow, trim and fertilize grass. • Substantially free from moss algae and/or interstitial weeds. • Free from graffiti and/or vandalism. • Substantially free from standing water, ice or snow. • Free from undue wear and tear.
<p>Boundaries Including:</p> <ul style="list-style-type: none"> • Fences/walls • Gates 	<ul style="list-style-type: none"> • Intact safe, sound and secure. • Free from graffiti and damage. • Locks are operational. • Free from undue wear and tear.

Element	Standard
Snow and Ice Removal	<ul style="list-style-type: none"> • Snow shall not be permitted to accumulate more than 3 cm in depth in Lands circulation areas used by the pedestrians in courtyards or to access the Facility and 5 cm for all other Lands circulation areas, and will be plowed daily as required within two hours of such accumulation. Remove snow from walkways, steps and entrances as required to maintain clear surfaces and permit safe access. • Relocation/removal of unreasonable snow accumulation • Application and re-application, as required, of salt, sand and/or ice melting products to all paved and concrete areas including without limitation roadways, sidewalks, stairs and landings • Removal of ice as required and on an on-going basis to reduce the risk of injury and accident and ensure safe access to the Facility at all times • Reasonable snow storage on the Lands is acceptable in designated areas for snow collection if they exist. Accumulation must not pose safety hazards, impede visibility or impede fire lanes, pedestrian or vehicle traffic or restrict availability of Parking. • Designated pathways used for therapy or patient circulation in courtyards are to be cleared of snow in accordance with these standards. Seating and assembly areas outside of the pathways do not need to be cleared.

APPENDIX 4G

PARKING MANAGEMENT SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of the Agreement:

“Authority-Provided Parking Services” means such parking services, including the provision of maintenance, monitoring and repair of related equipment and machinery, provided under any separate agreement(s) between the Authority and any third party, from time to time or at any time.

“Car Parking Areas” means all car parking lots and all other areas designated for parking on the Lands; and

“Car Parking Users” means users of the parking areas located within the Lands.

2. SERVICES

2.1 General Requirements

- (a) Project Co shall perform the Parking Management Services in compliance with this Appendix and all other requirements of this Agreement.
- (b) Project Co shall continuously perform the Parking Management Services throughout the Operating Period, and is responsible for such Services 24-hours per day 365(6) days per year.
- (c) There may be services or tasks to be performed that are not expressly described in this Agreement, but in performing the Services in this Appendix, Project Co shall perform all such tasks as are required by Good Industry Practice.
- (d) This Appendix includes a table that references Performance Indicators applicable to the Parking Management Services. The Performance Indicators include all provisions of the relevant section of this Appendix referenced in the table and all other Services required or reasonably inferred to be required to perform the relevant Performance Indicator. The Performance Indicators identified will not limit the scope of the Parking Management Services to be performed.
- (e) Without limiting the requirements of the Agreement, including the other provisions or this Appendix, Project Co shall:
 - (1) provide high quality, efficient and flexible Parking Management Services at all times;
 - (2) provide sufficient number of qualified, trained and competent personnel (which in all cases includes employees or other personnel of Project Co, the Service Provider and Sub-Contractors) with the skills necessary to perform the Services;
 - (3) meet all requirements of applicable Law, Building Code, applicable collective

agreement(s) and Authority Policies. Where there are conflicts between Project Co policies and the Authority Policies, Authority Policies will prevail;

- (4) research and develop new service delivery methods and apprise the Authority of their benefits;
 - (5) manage matters and marshal resources as required to participate in emergency responses and to provide a high level of customer care;
 - (6) cooperate with and assist the Authority in the interface and coordination of the other services identified to be delivered by the Authority and/or its contractors other than Project Co and the Service Provider and Sub-Contractors;
 - (7) exercise competent supervision of the Services at all times; and
 - (8) provide all quality assurance and quality monitoring.
- (f) References in this Appendix to the requirements for Design and Construction, including provisions of Schedule 3 Design and Construction Specifications will, in respect of the other site services, be interpreted to apply to the Facility and other site services with such changes as are required to give meaning to such references.

3. SERVICE REQUIREMENTS

3.1 General

- (a) Project Co shall:
 - (1) provide a secure and safe car parking environment for patients, staff, medical staff, volunteers and visitors to the Facility, their vehicles and their property; and
 - (2) provide traffic management across the car parking areas to ensure the free flow of traffic ensuring access to the Facility at all times.
- (b) For convenience of reference the Parking Management Services are separated into the following elements:
 - (1) provision of parking and traffic management;
 - (2) parking administration and management; and
 - (3) quality monitoring.
- (c) The intention of this Appendix is that Project Co shall provide Parking Management Services in respect of the whole of the Lands, but, for greater certainty, not in respect of the Existing Hospital Lands. It is not intended by this Appendix that Project Co shall provide Parking revenue collection services.

3.2 Provision of Parking and Traffic Management

- (a) Project Co shall provide parking which must be clearly signed and separately designated for each of the following categories: **PS01**
- (1) patient parking;
 - (2) staff and volunteer parking;
 - (3) visitor parking;
 - (4) persons with disabilities car parking;
 - (5) drop off zones;
 - (6) emergency patient/visitor parking;
 - (7) patient transport parking;
 - (8) priority staff parking;
 - (9) bicycle parking;
 - (10) ambulance parking; and
 - (11) public transportation including buses.
- (b) Project Co shall: **PS02**
- (1) provide, maintain, operate, and replace when necessary, access and egress equipment to ensure all Car Parking Areas can be used by authorized persons. Such control measures will minimize the potential for causing congestion and will have sufficient capacity to cope with peak traffic flow;
 - (2) ensure that the entry to any Car Parking Area is restricted to authorized persons through the delivery and management of appropriate access control as per the requirements of Schedule 3;
 - (3) ensure all equipment and machinery, other than equipment and machinery which may be subject to Authority-Provided Parking Services, are commissioned, operated and maintained in good safe working order (at all times) and in accordance with manufacturer's instructions and requirements; **PS03**
 - (4) in conjunction with the Authority, develop and manage a mechanism to handle lot full or capacity problems (i.e., overflow access, perpetual stall counter system etc.);

(5) regularly inspect the parking areas and internal roadways and report any damage to the Help Desk promptly and ensure appropriate repairs are made in accordance with the standards in the grounds specification. Such damage to be repaired includes, but is not limited to:

- (A) damaged car park or road surface;
- (B) curbing and footpaths;
- (C) overhanging obtrusive vegetation;
- (D) inadequate street and/or car park lighting;
- (E) road or space definition markings; and
- (F) inadequate, or damaged signage;

(6) keep all entrances, exits and internal roadways within the Car Parking Areas clear from vehicular and other obstructions thus maintaining free flow of traffic at all times. These responsibilities include but are not limited to:

PS04

- (A) enforced removal of such obstructions at Project Co's expense;
- (B) dealing with customer complaints in accordance with Project Co's complaints policy; and
- (C) acting at all times in a courteous and polite manner.

3.3 Parking Administration & Management

PS05

Project Co shall provide a report of all incidents of crime within the Car Parking Areas to the Authority daily.

3.4 Quality Monitoring

PS06

Project Co and the Authority will develop, maintain and implement a system for recording and acting on customer feedback and satisfaction with respect to the Parking Management Services through the conduct of a customer user satisfaction survey/questionnaire to be carried out annually.

4. SERVICE STANDARDS

NOT USED

5. RESPONSE AND RECTIFICATION PERIODS

Project Co shall respond to any notified variances from the Services Protocols and Specifications identified herein as follows:

Service Category	Definition	During Core Hours		During Non-Core Hours	
		Response Time	Rectification Time	Response Time	Rectification Time
Emergency	<p>Service required immediately and is considered a serious emergency, including:</p> <ul style="list-style-type: none"> • issues having an immediate negative impact on patient care or clinical functionality; • safety problems exposing Facility Users to danger; • emergency repairs to prevent further damage (i.e. burst pipe); and • equipment failure or operating difficulties which could result in the loss of critical utilities including heat, water, electricity, emergency power and medical gases. APPENDIX 4H

ENVIRONMENTAL AND SUSTAINABILITY SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of the Agreement:

“Environmental Management System” or **“EMS”** has the meaning set out in Section 3.2 of this Appendix.

2. SERVICES

2.1 General Requirements

- (a) Project Co shall perform the Environmental and Sustainability Services in compliance with this Appendix and all other requirements of this Agreement.
- (b) Project Co shall continuously perform the Environmental and Sustainability Services throughout the Operating Period, and is responsible for such Services 24-hours per day 365(6) days per year.
- (c) There may be services or tasks to be performed that are not expressly described in this Agreement, but in performing the Services in this Appendix, Project Co shall perform all such tasks as are required by Good Industry Practice.
- (d) The Performance Indicators identified within Section 6 will not limit Project Co's duty in terms of Environmental and Sustainability Services to be performed.
- (e) Without limiting the requirements of the Agreement, including the other provisions of this Appendix, Project Co shall:
 - (1) provide high quality, efficient, innovative and flexible Environmental and Sustainability Services at all times;
 - (2) provide sufficient number of qualified, trained and competent personnel which in all cases includes employees or other personnel of Project Co, the Service Provider and Sub-Contractors) with the skills necessary to perform the Environmental and Sustainability Services;
 - (3) meet all requirements of applicable Law, Building Code, applicable collective agreement(s) and Authority Policies. Where there are conflicts between Project Co policies and the Authority Policies, Authority Policies will prevail;

- (4) research and develop new service delivery methods and apprise the Authority of their benefits;
- (5) manage matters and marshal resources as required to participate in non-medical emergency responses and to provide a high level of customer care;
- (6) keep the Authority informed in such detail as the Authority may reasonably require of the progress of any negotiations regarding employees;
- (7) cooperate and assist the Authority in the interface and coordination of the other services identified to be delivered by the Authority and/or its contractors other than Project Co and the Service Provider and Sub-Contractors;
- (8) exercise competent supervision of the Environmental and Sustainability Services at all times; and
- (9) provide all quality assurances and quality monitoring required in connection with the Environmental and Sustainability Services.

3. SERVICE REQUIREMENTS

3.1 General

ES01

- (a) The general scope of the Environmental and Sustainability Services is:
 - (1) maintenance of a safe, compliant, working environment for the Facility through the use of processes, practices, materials, supplies and products that avoid or minimize the production of pollutants and waste thereby reducing the overall impact to human health systems, building components, life cycle and the environment; and
 - (2) utilization of recognized risk assessment/management systems to ensure that standards are maintained in the performance of the Services, and that any adverse variance is recognized and corrected.
- (b) Project Co shall perform the Environmental and Sustainability Services on a scheduled and demand basis to ensure that performance of the Services does not cause or create any safety or environmental hazard to the environment and/or any person in the Facility or on the Lands, and minimizes disruption to the Authority Activities
- (c) The intention of this Appendix is that Project Co shall provide Environmental and Sustainability Services in respect of the whole of the Facility and Lands.

3.2 Environmental Management System

- (a) Project Co shall develop and implement a comprehensive energy management system (the “**Environmental Management System (EMS)**”) including appropriate operational policies, procedures and practices to meet the requirements of this Environmental and Sustainability Service, including but not limited to with respect to:
- (1) emissions management (air and wastewater);
 - (2) Greenhouse Gas (GHG) emission reduction;
 - (3) halocarbons (ozone depleting substance) management;
 - (4) hazardous materials and hazardous waste management;
 - (5) non-hazardous solid waste management and recycling;
 - (6) storage tanks management;
 - (7) potable water quality management;
 - (8) water conservation;
 - (9) indoor air quality management;
 - (10) green materials and supplies;
 - (11) proactive mould growth prevention;
 - (12) continuous hazardous gas monitoring;
 - (13) sound pollution; and
 - (14) occupant awareness
- (b) Project Co shall perform the Services in accordance with the EMS on an ongoing basis in a careful and environmentally responsible fashion to minimize effects on health and the environment.
- (c) Project Co shall employ environmentally sound processes, materials, supplies and equipment.
- (d) Project Co shall put programs in place to ensure monitoring, inspection, testing, handling, storage and clean up as required for all elements of the EMS.

3.3 Quality Monitoring

Project Co and the Authority will develop, maintain and implement a system for recording and acting on customer feedback and satisfaction with respect to the Environmental and Sustainability Services through the conduct of a customer user satisfaction survey/questionnaire to be carried out annually.

APPENDIX 4I

PEST CONTROL SERVICES

1. DEFINITIONS

Not Used

2. SERVICES

In addition to the standards and specifications set out in Schedule 4 Services Protocols and Specifications, Project Co shall deliver the Pest Control Services:

PS01

- (a) 24 hours per day, 365(6) days per year; and
- (b) in a comprehensive, effective, flexible and efficient manner at all times.

3. SERVICE REQUIREMENTS

Project Co shall:

- (a) provide a comprehensive preventative, reactive and on-call pest control service for all pests, including insects, rodents and birds, using personnel who are fully trained, qualified and able to provide high quality professional and practical advice;
- (b) notify the Authority immediately of any pest/vermin infestation;
- (c) undertake all work in a safe manner with minimal interference with the Authority's operations and with minimal risk in terms of safety, food hygiene, infection control, and damage to the Facility;
- (d) provide safe, tamper resistant and efficient methods of catching, destroying and safely disposing of pests, adopting safe and humane procedures in all instances;
- (e) if non-chemical forms of pest control are ineffective, use chemical treatment and specific chemicals consented to by the Authority provided that no chemicals will be used which may come into contact with patients, staff, or visitors directly or indirectly;
- (f) ensure the use of any permitted chemicals, including pesticides, is strictly controlled and monitored;
- (g) maintain all records of the use of any permitted chemicals and advise the Authority in advance of the type of chemicals it intends to use;
- (h) include in its monthly report to the Authority a complete overview on pest control activity within the Facility during the previous period and identifying future action which will include the following:
 - (1) identification of any pest/vermin infestation;

- (2) details of the locations and areas inspected and treated and the product names and product number of the pesticide used if applicable;
- (3) the number, type and location of infestations reported;
- (4) any evidence of any pest and any belief that any infestation is associated with any other premises whether Authority owned or otherwise that may affect the Facility; and
- (5) a description of recommended preventative measures to minimize infestation.

4. SERVICE STANDARDS

APPENDIX 4J

SECURITY AND SURVEILLANCE SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of the Agreement:

“Security Services” means the service to be provided pursuant to this Appendix;

“Security Service Users” means the Authority’s employees, medical staff, volunteers, patients and visitors who are users of the Security Services.

“Security Staff” means personnel engaged or employed by Project Co from time to time to carry out Security Services.

2. GENERAL REQUIREMENTS

In addition to the standards and specifications set out in Schedule 4 Services Protocols and Specifications, Project Co shall deliver the Security Services:

- a) 24 hours per day, 365(6) days per year;
- b) in a manner integrated and coordinated with all other Project Co Services to facilitate safety and protection of the Facility and Lands;
- c) in line with non-violent crisis intervention best practices; and
- d) in a manner fully integrated and coordinated with the protocols established by the Authority’s human resources department regarding the issuance and recovery of photo identity cards, keys, access cards and parking passes.

Security will be required at times to assist in the restraint of patients or individuals while in the care of hospital personnel. In doing so, Project Co will follow non-violent crisis intervention best practices, all restraints or interventions with patients or individuals in the care of hospital personnel must be done under clinical direction.

3. SECURITY SERVICES REQUIREMENTS

3.1 ANNUAL SECURITY AND RISK ASSESSMENT PLAN

SS01

Project Co shall develop and submit to the Authority in accordance with Schedule 4 Services Protocols and Specifications, including Sections 4.1 and 4.2 of Schedule 4, and implement as part of the Annual Service Plan appropriate policies, joint service protocols, procedures, practices, schedules and a self-monitoring inspection and reporting system in respect of the delivery of the Security Services to the Authority, which will include a risk assessment and security plan to deal with all security matters which may occur at the Facility (with police involvement as required) including, but not limited to, theft, terrorism, vandalism, and assault on any patient, member of staff, visitor or their property.

3.2 ACCESS CONTROL

SS02

Project Co shall provide control of access to the Facility in accordance with the Annual Service Plan, including the risk assessment and security plan, and will:

- a) comply with joint service protocols established between the parties regarding the issuance, programming and recovery of security passes, parking passes, keys and other security related material to and from authorized personnel;
- b) manage, maintain and program access cards, devices and controls. Protocols for devices for the pharmacy, cashier office, and narcotics cupboards shall be established by the Authority;
- c) manage, maintain and program temporary access cards and maintain an inventory of temporary security access cards for use by Project Co's Sub-Contractors working on the Lands;
- d) issue unique security cards with photo I.D. to all Project Co staff;
- e) ensure that all access points to the Facility and Lands are secured and locked down in accordance with scheduled times;
- f) provide out-of-hours access to locked departments and restricted areas upon request by authorized staff, maintaining records of such access;
- g) maintain proper and accurate records of controlled access devices and provide the Authority with a periodic summary report on a frequency to be agreed between the parties as to changes that have occurred; and
- h) restrict access into non-public areas.

3.3 Monitoring and Incident Reporting

SS03

Project Co shall:

- a) maintain, operate and monitor surveillance and alarm systems of all designated areas of the Facility and Lands in accordance with the security plan;
- b) electronically record all incidents through the main security monitors located at the designated security office or satellite monitoring station and maintain a record of all recorded incidents for a minimum of 90 days;
- c) monitor and respond to any alarm initiated by the security system and take all reasonable action necessary to rectify security breaches and secure the Facility and Lands;
- d) summon the police as required and provide assistance in incident investigation and reporting;

- e) maintain records and provide a periodic written report of all security incidents including date, time, description of incident, location, action taken and a copy of the police report if applicable;
- f) assist the Authority in the promotion of security and safety procedures, provide basic crime prevention advice and cooperate with the Authority in the development and implementation of security policies and procedures; and
- g) report all significant security incidents immediately to the Authority's Representative or designate.

3.4 Security System Maintenance

Project Co shall maintain the security system including without limitation all access control devices, locking systems, surveillance cameras, monitors, recording devices, alarms and associated field devices in accordance with the requirements of Appendix 4C (*Plant Services*).

3.5 Patrol Service

Project Co shall:

SS04

- a) provide a security presence on the Lands 365(6) days per year 24 hours per day which may be met by Plant Services personnel to meet the following minimum requirements: (three evenly spaced security patrols of the Facility and Lands (including parking areas) per twelve hour coverage period (i.e. every 4 hours);
- b) ensure all Security Staff have been screened prior to commencement of employment with a Criminal records search or other current legislation and regulations in force;
- c) ensure all Security Staff are suitably trained in non –violent crisis intervention in line with the Crisis Prevention Institute requirements;
- d) ensure all staff wear an appropriate uniform which makes them readily identifiable;
- e) ensure Security Staff receive Security Services training and take reasonable action by calling the police to apprehend, restrain, detain and/or take other appropriate action in respect of any person who is in the act of, or is about to commit an offence, or any type of disruption or disturbance including aggressive behaviour;
- f) protect the Facility and the Authority's property against theft, vandalism, malicious tampering and criminal damage;
- g) take all reasonable steps to maintain the safety of all persons and their belongings in the Facility including the protection of the Authority's employees, medical staff, volunteers, patients and visitors;
- h) respond to and assist with emergency situations such as but not limited to fires, elevator entrapment, and the Authority's code system - (Code Red (Fire), Code Green

SS05

(Evacuation), Code White (aggression event), etc.);

- i) undertake the following tasks during patrols:
 - i. ensure sensitive or restricted areas are secure during off hours;
 - ii. report all security incidents or observed property damage to the Help Desk;
 - iii. report any Facility issues including water, steam or gas leaks, electrical faults, etc. to the Help Desk and take appropriate action as may be necessary to rectify the situation and/or minimize damage;
 - iv. secure doors and lock windows which may present a security risk and turn off lights in unoccupied areas.
 - v. summon the police as required to respond to serious incidents
- j) provide on-request escort services including:
 - i. Escorting staff after hours; and
 - ii. Escorting patients; and
- k) enforce hospital visiting hours and other Authority policies (e.g. smoking).

APPENDIX 4K

LAUNDRY AND LINEN SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of the Agreement:

“Laundry/Linen Services” means all of the requirements of this Appendix;

“Linen and Uniform Handling, Inventory Monitoring and Control” has the meaning set out in section 3.1 of this Appendix;

“Materials” means those products necessary for the provision of the Laundry/Linen Services; and

“Sterile Processing Department” means the Authority’s dedicated location within the Facility for sterile processing.

2. SERVICES

2.1 General Requirements

Project Co shall comply with all requirements set out in Appendix 4A General Management Services that are relevant to the delivery of the Laundry/Linen Services.

In addition to complying with the relevant requirements set out in Appendix 4A General Management Services, Project Co shall comply with all service standards and requirements of this Appendix 4K.

Project Co shall provide Laundry/Linen Services 24 hours per day, 365(6) days per year on a scheduled, reactive and planned basis as may be required to meet the service standards of this Appendix 4K. Project Co shall:

- a) Provide cost efficient, quality driven, comprehensive linen/textile/uniform management services,
- b) Ensure sufficient clean linen, textiles and uniforms are available at all times to all Functional Units in order to ensure that Clinical Services and Authority FM Services are not interrupted due to any short-falls.
- c) Maintain a safe environment and safe working practices including the use of a recognized risk assessment/management system to ensure that standards of cleanliness are maintained, and that any reduction in the quality of service is recognized and corrected.
- d) Maximize the use of circulating stocks, control loss, minimize requirements for linen inventories at the Facility, and reduce the amount of handling as linen and linen bundles pass from point of processing to point of use.
- e) Project Co shall acknowledge that there may be services or tasks to be performed that are not described, but are necessarily ancillary to the requirements set out in this Appendix 4K and these shall be performed by Project Co as part of the Services.

- f) Project Co shall prepare a periodic monitoring report in compliance with relevant aspects of this task outlined in Appendix 4A General Management Services.
- g) Project Co shall exercise competent supervision of the work at all times.

Project Co shall be responsible for confirming or suggesting changes to space requirements for rooms/spaces located in the clinical components described in Appendix 3A Clinical Specifications (e.g. security room).

3. SERVICE REQUIREMENTS

The Laundry/Linen Services consists of two main elements as follows:

- Linen and Uniform Handling, Inventory Monitoring and Control;
- Quality monitoring

3.1 Linen and Uniform Handling, Inventory Monitoring and Control

Project Co shall develop and implement appropriate operational policies, procedures and practices, together with customer service philosophy, relative to the inventory monitoring and control of the linen and uniform handling (the “**Linen and Uniform Handling, Inventory Monitoring and Control**”) prior to commencement of service which shall include, but not be limited to:

LL01

- a) Ensure, through continuous liaison that all articles are:
 - Thermally or chemically disinfected
 - Checked for damage and staining
 - Repaired/condemned as required
 - Delivered clean and finished fit for use
 - Verifiably delivered and charged
 - Light tabled where applicable (i.e., surgical drapes)
- b) Provide the following administrative services:
 - Continuously liaise with all off-site service providers
 - Develop, manage and implement a laundry and textile policy which will meet the Authority’s approval;
 - Comply with all statutory and Authority infection control requirements
 - Formulate and operate procedures for condemning linen and minimizing stock loss
 - Provide periodic laundry and textile management information to the Authority
- c) Provide the Authority with regular, standard periodic monitoring reports for management information and contract monitoring purposes, no later than 5 days after the end of each Payment Period. This is to include, but not be limited to, analyses of:
 - Stock purchases
 - Linen pieces condemned
 - Stock losses
 - Laundry volumes delivered and fitness for use (fill and reject) rates per 10,000 pieces
 - Average linen usage by STH department

- d) Provide Laundry/Linen Services to points of use to established fill rates and reject rates set out in Table 1: Fill Rates and Table 2: Reject Rates as described in Attachment 1 to this Appendix 4K. **LL02**
- e) Carry out tasks, including: **LL03**
- o Provide a scheduled, reactive and planned Laundry/Linen Service on a 24-hours per day, 365(6) days per year to address ad-hoc, emergency, urgent or routine laundry/linen requests. Tasks shall include, but not be limited to:
 - Delivery and collection of clean linen exchange carts between the central laundry/linen receiving areas and the inpatient units and other patient care areas within agreed timescales.
 - Routine collection of laundry/linen exchange carts for periodic cleaning to agreed standards.
 - Routine and separate collection of soiled linen from all points-of-use to the soiled linen handling areas prior to return to the central laundry.
 - o Project Co shall respond to such Demand Requisition within the “Response Times” set out in Table 3: Service Response Times in Attachment 1 to this Appendix 4K.
 - o Respond to emergency situations that the Authority may face, including but not limited to major incidents where the Authority will have to deal with a large number of incoming casualties
 - o Ensure contingency plans are in place for the continuous supply of linen. For example, in the case of a major laundry failure
 - o Secure used soiled linen in laundry bags and store in the appropriate receptacle in the designated area prior to portering
 - o Return empty carts to their designated dispatch/collection point in a clean and contamination free condition
 - o Ensure soiled linen is always kept and transported separate from clean linen in designated containers for each category
 - o Maintain a record of the volume/weight collected from each Functional Unit
 - o Supply the Authority with all linen necessary for the effective servicing of the Authority's linen requirements in all Functional Units
- f) Provide a cart stocking service, including, where appropriate, standard exchange carts, other standard carts and custom carts as required.
- g) Ensure that linen is cleaned and maintained to the following standard (Health Canada Infection Control Guidelines - routine practices and additional precautions for preventing the transmission of infection in health care). All repairs will be done quickly and efficiently until such time as the linen is no longer functional and will be condemned. Project Co shall determine when items are to be condemned, in accordance with this Appendix 4K. **LL04**
- h) Provide a linen pack making service including, but not limited to, surgical, obstetrical, ambulatory care and emergency packs to be forwarded through the Sterile Processing Department where appropriate for sterilizing with a pack assembly reject rate not greater than as per Table 2 in Attachment 1. **LL05**
- i) Provide a uniform service to the fill rate set out in Table 1: Fill Rates of Attachment 1 to this Appendix 4K and reject rates set out in Table 2: Reject Rates of Attachment 1 to this Appendix 4K carrying out the following tasks: **LL06**
- o Ensure that all Facility staff are provided with clean, fit-for-use uniforms as outlined in Table 4: Uniform Requirements in Attachment 1 to this Appendix 4K, as required and as applicable. Provide clean, fit-for-use uniforms to selected new members of staff. The

service methodology must relate to the type of uniform proposed. Project Co shall determine uniform requirements of their staff; such uniforms to be different than those supplied to Facility staff.

- j) Replace (to the specified standard) all linen and textiles that are condemned, lost or stolen.
- k) Provide all linen, as per Attachment 1 to this Appendix 4K
- l) Agree to the final specification of all items with the Authority prior to purchase. This to be reviewed with the Authority from time-to-time as appropriate.
- m) Ensure that daily clean linen and textile requirements are met, rotation of linen is conducted, and fitness for use, including cleanliness standards, are maintained.
- n) Ensure all linen and textiles supplied to the Facility comply with all service standards, and these being checked prior the delivery to each of the Functional Units.

Project Co and all Project Co staff shall at all times adhere to, update and maintain as current the operational policies, procedures and practices set out and agreed upon with the Authority. Every 6 Payment Periods, Project Co shall provide the Authority's Operating Period Representative or designate a report detailing where non-adherence has been identified.

LL07

3.2 Inpatient Linen and Laundry Volume Planning

- a) To assist Project Co in developing each Annual Service Plan regarding linen and laundry, the Authority will give notice (the "**Annual Projection Notice**") to Project Co of the number of inpatient beds in the Facility the Authority anticipates will be in service during the ensuing Contract Year, no later than:
 - 90 days before the Target Service Commencement Date; and
 - December 1 of each year thereafter.
- b) Unless the Authority otherwise gives notice in accordance with Section the above Section 3.2.(a) the Annual Projection Notice for the Contract Year commencing on the Service Commencement Date will be [102] inpatients.

3.3 Inpatient Linen and Laundry Volume Changes

The Authority may change the anticipated volumes of inpatient beds at any time by giving 30 days' notice ("**Usage Notice**") to Project Co and as of the effective date set out in such notice:

- a) The Annual Projection Notice will be deemed to be a Usage Notice for the Contract Year in respect of which it applies and will remain effective until the Authority delivers a subsequent Usage Notice.
- b) If any change by the Authority to the number of inpatient beds constitutes a Material Change to this Agreement regarding linen and laundry, including taking into account the projected demand volumes set out in Appendix 3A Clinical Specifications, then the terms of Schedule 6 Changes, Minor Works and Innovation Proposals will apply.

3.4 Quality Monitoring

Prior to the relevant Service Commencement Date, Project Co and the Authority shall develop, maintain and implement a system for recording and acting on customer feedback and satisfaction with respect to the Laundry/Linen Services through the conduct of a customer user satisfaction survey/questionnaire to be carried out quarterly in a mutually agreed format consistent with Good Industry Practice.

LL08

4. SERVICE STANDARDS

Project Co shall deliver services identified in accordance with the standards set out in Attachment 1 of this Appendix 4K.

5. RESPONSE AND RECTIFICATION PERIODS

Project Co shall respond to any notified variances from the Services Protocols and Specifications identified herein as follows:

Service Category	Definition	During Core Hours		During Non-Core Hours	
		Response Time	Rectification Time	Response Time	Rectification Time
Emergency	<p>Service required immediately and is considered a serious emergency, including:</p> <ul style="list-style-type: none"> issues having an immediate negative impact on patient care or clinical functionality; safety problems exposing Facility Users to danger; emergency repairs to prevent further damage (i.e. burst pipe); and equipment failure or operating difficulties which could result in the loss of critical utilities including heat, water, electricity, emergency power and medical gases. 	Immediate 15 minutes	2 hours	Immediate 15 minutes	2 hours
Urgent	<p>Service required as soon as possible:</p> <ul style="list-style-type: none"> to address problems not presenting an immediate danger; and to address problems having the potential to have a negative impact on patient care. 	30 minutes	24 hours	30 minutes following the resumption of Core Hours	24 hours following the resumption of Core Hours
Routine	<p>Service required for non-emergencies not having an immediate effect on patient care such as leaking taps, faulty doors and windows or equipment breakdowns or work not requiring immediate attention such as repairs to damaged walls, furniture or fixture installations.</p>	2 hours	3 days	2 hours following the resumption of Core Hours	3 days
Statutory	<p>Service is a statutory, legal and/ or legislative requirement.</p>	Instant Failure	2 weeks	Instant Failure	2 weeks

*Note: The Authority shall work collaboratively with Project Co to mutually agree on specific situations upon which an Event would be considered Emergency, Urgent and Routine.

6. PERFORMANCE INDICATORS

*Note: For the avoidance of doubt, where the “Response Time” and “Rectification Period” is “N/A” then the categories and periods within the table of Section 5 are to be used.

Ref	Indicator	Service Failure Level	Response Time	Rectification Period	Recording Frequency	Monitoring Method

APPENDIX 4L
CATERING SERVICES

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of the Agreement:

“Annual Projection Notice” has the meaning set out in Section 3.6(a) of this Appendix;

“Approved Certified Supplier” means supplier of goods and/or services to Project Co who have been subject to vetting and inspection by Canadian Food Inspection Agency qualified inspectors representing Hazard Analysis Critical Control Points (HACCP), to ensure that such supplier’s premises, procedures, goods and services are of an acceptable standard and capable of meeting the requirements of this Appendix;

“Cultural” means specific traditional, ethnic or religion-based requirement for special meal or diet;

“Dietician” means a professional, registered dietician suitably qualified to understand nutrition and dietetic needs;

“Ethnic Diet” means a diet for a specific ethnic group that has a Cultural basis;

“Food Services” means all of the requirements of this Appendix;

“Food Supplement” means food supplements and/or substitutes provided by Project Co which are required in addition to, or in the place of, the standard meals and which are provided to meet the nutritional requirements of a customer;

“HACCP” means Hazard Analysis Critical Control Points;

“Material Change” means a change greater than or less than 10% of the agreed upon value;

“Meal Times” means the times set out in Table 4.1 of this Appendix at which meals are to be provided to patients;

“Meals on Wheels Services” means meals preparation services to be provided by Project Co then delivered by volunteers between 17:30 and 19:00 to a variety of groups, including: seniors, people with physical disabilities and cognitive impairments, individuals suffering from illnesses and recovering from surgeries, and those who need special dietary planning and assistance;

“Patient Meal Services” means the meal services to be provided to patients pursuant to this Appendix;

“Special Diet” has its meaning set out in Section 3.3 (g) of this Appendix;

“Therapeutic Diet” means diet for a specific disease condition that contributes to its cure or management;

“Usage Notice” has the meaning set out in Section 3.7 of this Appendix;

“**Vegan Diet**” means a diet that excludes meat, poultry, fish and dairy products; and

“**Vegetarian Diet**” means a diet that excludes meat, poultry, and fish products.

2. GENERAL REQUIREMENTS

- a) Project Co shall comply with all requirements set out in Appendix 4A [General Management Services] relevant to the delivery of the Food Services.
- b) In addition to the applicable provisions set in Appendix 4A [General Management Services], Project Co shall comply with the service standards and requirements of this Appendix 4L [Catering Services].
- c) Project Co shall provide Food Services 24 hours per day, 365(6) days per year on a scheduled and reactive basis as may be required to meet the service standards of this Appendix 4L [Catering Services]. Project Co shall:
 - i. Provide high quality Food Services which offers a range of nutritious food and drink to enable all inpatients and outpatients to have a choice which reflects their dietary and nutritional requirements and preferences, including healthy eating, Ethnic Diets, Cultural options, patients too ill to eat normal food, prescribed Therapeutic Diets, religious, Vegetarian Diet and Vegan Diet options. The flexible service should provide for changing customer needs and adapt to the nature of the service provided within the Facility.
 - ii. Provide high quality Food Services which offer a range of nutritious food and drink to enable all non-patient customers, including staff and visitors, but also ambulant inpatients and outpatients to have a choice, including healthy eating, ethnic and cultural options 24 hours per day, 365(6) days per year. Cafeteria hours shall be 06:30 - 19:00 Mondays -Fridays, and 08:00 - 18:00 Saturdays, Sundays, and statutory holidays. The hours of service should provide for various and changing customer needs and adapting to the nature of the service provided within the Facility.
- d) Project Co shall acknowledge that there may be services or tasks to be performed that are not described, but are necessarily ancillary to this Appendix 4L [Catering Services] and these shall be performed by Project Co as part of the Services.
- e) Project Co shall ensure that all requisitions for Food Services are completed electronically via the Help Desk (refer to Appendix 4B Help Desk Services for details).
- f) Project Co shall provide food delivery and catering related delivery services (e.g., delivery and collection of stock/non-stock items, delivery and collection of food rethermalization carts).
- g) Project Co shall ensure integration, at its own cost, with patient nutrition services, systems and software, which are currently managed by Aramark.

3. SERVICE REQUIREMENTS

3.1. Food Services consist of five main elements as follows:

- General services
- Patient Meal Services
- Meals on Wheels Services
- Non-patient services
- Quality monitoring

3.2. General Services

- a) Project Co shall develop and implement appropriate operational policies, procedures and practices, together with customer service philosophy, relative to Food Services prior to commencement of service which shall include, but not be limited to:

CS01

- Compliance with Hazard Analysis Critical Control Points (HACCP) Standards.
- Maintenance of proper standards of food safety, personal hygiene and personnel apparel, in accordance with the Canadian Food Inspection Agency (CFIA) Standards at all times. This shall include training in the following, which represents current hospital industry practices:
 - Food preparation;
 - Food hygiene, including: applicable Law and the attainment of a Food Safe Level 1 Certificate and the attainment of a Food Safe Level 2 Certificate for all supervisory staff, managers and cooks;
- Ensure waste derived from the Food Services is disposed of safely according to agreed procedures, including compliance with recycling procedures;
- Performance of day-to-day cleaning tasks in the food production areas, including all work surfaces, refrigerated space and equipment. Housekeeping and Waste Management Services (as identified in the Appendix 4D) shall be responsible for cleaning of walls, ceilings, floors, hoods and waste removal.
- Provision of a range of snacks and beverages to inpatients as per dietary requirements.
- Source, procure and purchase all food and ingredients from Approved Certified Suppliers.
- Implementation of quality control procedures for all incoming ingredients and foodstuffs to ensure goods are within their stated expiry date, free from damage, pest infestation/damage, have been stored and transported at the correct temperature, and are suitable for consumption as per the HACCP Standards.
- Ensure that all food is handled, stored, prepared and cooked appropriately, that procedures are in place to ensure it is kept at the requisite temperature at all times, including, but not limited to, during cooking, during transfer and at point of service around the facilities to the patients.
- Provision of all staffing, training, supplies and equipment (including food retherm carts as required), hardware, software, menus, dishware, utensils, disposables, personal protective equipment, cleaning materials and any other items required for the efficient delivery of Food Services, and maintain them in a safe and hygienic manner. Dishware and cutlery shall include specialist dishware and cutlery for patients with special requirements.
- Provision, distribution, collection, washing and drying, storing and replacing as necessary all dishware, cutlery and other implements and equipment used in connection with the Food Services and be responsible for their cleaning as per CFIA Standards.

- Provide a report detailing where non-adherence has been identified every 6 payment periods

3.3. Patient Meal Services

Project Co shall develop and implement appropriate operational policies, procedures and practices, together with customer service philosophy, relative to Patient Meal Services prior to commencement of service which shall include, but not be limited to:

CS02

- Provide patient meal service 365(6) days per year. The patient meal services shall include:
 - Preparation and service of all meals ensuring that such meals meet general customer satisfaction with respect to appearance, temperature, timeliness, taste and texture.
- Provide a minimum of a 14-day menu cycle for inpatients to ensure variety and selection and to avoid menu fatigue. Menu cycles shall be changed to take account of the seasonal nature of customer preferences. Project Co shall provide suitable special menus for various ethnic and religious holidays (e.g., Christmas, Ramadan, etc.). Menus and nutritional content shall be provided to the Authority (for approval) 28 days prior to end of each menu cycle.
- Provide menus in the format and style agreed with the Authority's Representative or designate, and shall take full regard of:
 - Nutritional requirements
 - Ethnic/religious requirements
 - Visually impaired patients
 - Genetically modified and/or allergenic contents
- Provide a meal ordering system (no more than 2 meals in advance), at the point of care, which is integrated with the patient information system.
- Provide a scheduled Food Service for all inpatients and outpatients on a 24-hour per day, 365(6) days per year basis with all scheduled deliveries made inside the meal service times detailed in Table 4.1: Meal Service Times Guideline.

CS03

CS04

Table 4.1: Meal Service Times Guideline

Meal	Inpatients
Breakfast	07:00 to 09:00 hours
Lunch	11:00 to 13:00 hours
Evening Meal	16:30 to 18:30 hours
Ad Hoc Meal – Snacks	Fifteen minutes from request

- Provide ad hoc Food Services on a 24-hour per day, 365(6) days per year basis for the following:
 - Inpatients who are admitted outside scheduled meal times, or are receiving treatment during scheduled meal times
 - Patients in Emergency or the Ambulatory Care (day care service) components as advised by the Authority's Representative or designate
 - any ad hoc request made by the Authority's Representative or designate

CS05

Where such an ad hoc request is made during normal kitchen hours, meals shall be supplied in the usual manner. Ad hoc meals should first be delivered from a nourishment station by Authority staff; if not available, then a request is made as per Table 4.1 of this Appendix 4L [Catering Services]. Where requests are made outside these hours, Project Co shall supply meals through a nourishment station.

When delivering meals, snacks or beverages through one of these methods Project Co shall ensure the choice of at least three snack alternatives at any one time, one of which is designed for children.

- g) Provide, on the instruction of the Authority's Representative or designate, special diet meals developed as per Dietitians of Canada specifications ("**Special Diets**"), including Food Supplements to designated patients on a scheduled and ad hoc basis and, wherever possible, such meals and or beverages should be served with the other scheduled meals. Special Diets may include, but are not limited to:
- Therapeutic (renal, diabetic, low sodium)
 - Special
 - Children/adolescent
 - Cultural
 - Religious
 - Pediatric
 - Texture modified
 - Tube feedings/nutritional supplements
 - Any other requirement as may be reasonably requested from the Authority's Representative or designate
- ii) Project Co shall ensure delivery of all meals and nourishments to their intended patients and the collection and return of plates, dishware and any other equipment used in the delivery of meals and snacks. Project Co shall implement and maintain systems to ensure:
- | | |
|---|--------------|
| a. Meals/trays are delivered to the correct patient with a tray accuracy of not less than 100% | CS06a |
| b. No patients with known severe food allergies are delivered foods containing such allergens. | CS06b |
| c. Dirty dishware, cutlery and uneaten food are removed from 60 minutes of delivery to a patient. | CS06c |
| d. All carts for supply or return shall not be left in the corridors for longer than 10 minutes | CS06d |
| e. Movement of carts in a safe manner, so as not to: | CS06e |
| i. cause injury to any member or staff, patient or visitor | |
| ii. impair food presentation/quality | |

3.4. Meals on Wheels Services

Project Co shall develop and implement appropriate operational policies, procedures and practices, together with customer service philosophy, relative to Meals on Wheels Services prior to commencement of service which shall include, but not be limited to: **CS07**

- a) Provide a minimum of a 14-day menu cycle for meals on wheels to ensure variety and selection and to avoid menu fatigue. Menu cycles shall be changed to take account of the seasonal nature of customer preferences. Project Co shall provide suitable special menus for various ethnic and religious holidays (e.9., Christmas, Ramadan, etc.). Menus and nutritional content shall be provided to the Authority (for approval) 28 days prior to end of each menu cycle.
- b) Provide menus in the format and style agreed with the Authority's Representative or designate, and shall take full regard of:
- Nutritional requirements
 - Ethnic/religious requirements
 - Genetically modified and/or allergenic contents
- c) Provide scheduled Meals on Wheels Service for outpatients on a 24-hour per day, 365(6) days p

year basis with all meals prepared by the below Table 4.2: Meals on Wheels Service Times Guideline.

- d) Provide suitable containers for delivery of Meals on Wheels Services meals.

Table 4.2: Meals on Wheels Service Times Guideline

Meal	Meals on Wheels Customers
Evening Meal	Meals must be ready for volunteer pick up by 17:00

3.5. Non-Patient Services

Project Co shall develop and implement appropriate operational policies, procedures and practices, together with customer service philosophy, relative to non-patient services for retail food services and vending food services prior to commencement of service which shall include, but not be limited to:

Retail Food Services

- a) Provide, operate and maintain a staff and visitor retail food service 365(6) days per year. The employees and visitor retail food services shall include:
 - o Preparation and service of all meals to staff and visitors in the retail facility ensuring that such meals meet general customer satisfaction with respect to appearance, temperature, timeliness, taste and texture
 - o Ensuring that a choice of meals is available to staff and visitors, including full hot and cold meals, normal, vegetarian/vegan and healthy options, and a range of snack / takeaway options
 - o Ensuring that snacks and beverages are available at all times when the retail facilities are not open. All food and beverages shall be displayed by Project Co in an attractive and appealing manner and shall include:
 - hot and cold beverages
 - sandwiches and light snacks
 - fresh fruit
 - o Ensuring that meals, including hot food and hot drinks are available at all times
- b) Permit access to the cafeteria to those of the Authority's staff who choose to consume their own food in the cafeteria; menus and pricing must be clearly displayed in the cafeteria at all times.
- c) Ensure all tables shall be cleaned promptly after use and made available for the next customer.
- d) Ensure the service of, and payment for, meals and beverages in the retail areas by all customers shall take place within 5 minutes of customers joining the queue unless it is a special order meal.
- e) Ensure chilled and ambient temperature drinking water and suitable receptacles are available free of charge at all times.
- f) Provide catering services, as and when requested by the Authority, and without limiting catering to others, to cater for:
 - o Beverage service to meetings
 - o Working meal service
 - o Other functions
- g) Pricing for these catering services will be agreed between Project Co and the Authority and applied on a function by function basis at rates determined by factors such as numbers, function type, menu choice, time of day and location. For the avoidance of doubt, the catering services shall include, where requested:
 - o Hot or cold beverages
 - o Transportation of food
 - o Dishware, cutlery and all other equipment necessary to fully meet the obligations of this agreement

CS08

- Provision of waiting and/or serving staff
 - Provision of table linen, napkins, etc.
 - Preparing catering product/clearing before/after the function
 - Any other reasonable requirement
- h) Maintain a portfolio of standard catering menus and prices, which should be available on request to the Authority's Representative or designate. The catering Food Service shall be itemized separately and included in Service Payments; **CS09**

Vending Food Services

- a) Deliver an out-of-hours Food Service by supplying, installing and maintaining vending services in the retail facility and in patient facilities to ensure that the choice of snacks and beverages agreed with the designated Authority's Representative or designate be available at all times. Project Co shall replenish all contents and maintain machine stocks ensuring sell by dates and good stock rotation methods are adhered to. Project Co to check stock levels to ensure adequate supplies are available. **CS10**
- b) The location of vending machines fitted retrospectively shall be agreed with the Authority's Representative or designate prior to installation. Vending areas should be located to provide a full vending service and be easily accessible from functional areas, outpatient areas and main reception.
- c) Procure, install, commission, maintain and clean vending machines according to manufacturer's instructions and any other ancillary equipment required, for meeting the out-of-hours Services. Equipment used for reheating shall be protected against misuse (e.g., microwaves).
- d) Provide all vending areas with garbage cans and ensure that all vending areas are kept clean and tidy at all times.
- e) Provide ingredient lists of vended goods upon request of customers or the Authority.
- f) Ensure vending prices are clearly displayed.
- g) Clearly display a telephone contact number for vending machine users to report faults or low stocks. All user complaints shall be the responsibility of Project Co.

3.6. Inpatient Meal Volume Planning

- a) To assist Project Co in developing each Annual Service Plan regarding catering, the Authority will give notice (the "**Annual Projection Notice**") to Project Co of the number of in-patient beds in the Facility the Authority anticipates will be in service during the ensuing Contract Year, no later than:
- 90 days before the Target Service Commencement Date; and
 - December 1 of each year thereafter.
- b) Unless the Authority otherwise gives notice in accordance with Section 3.6(a) above, the Annual Projection Notice for the Contract Year commencing on the Service Commencement Date will be 102 inpatients.

3.7. Inpatient Meal Volume Changes

The Authority may change the anticipated volumes of inpatient beds at any time by giving 30 days' notice ("**Usage Notice**") to Project Co and as of the effective date set out in such notice:

- a) The Annual Projection Notice will be deemed to be a Usage Notice for the Contract Year in respect of which it applies and will remain effective until the Authority delivers a subsequent Usage Notice.

- b) If any change by the Authority to the number of inpatient beds constitutes a Material Change to this Agreement regarding catering, including taking into account the projected demand volumes set out in Appendix 3A Clinical Specifications, then the terms of Schedule 6 Changes, Minor Works and Innovation Proposals will apply.

3.8. Quality Monitoring

Prior to the Final Service Commencement Date, Project Co and the Authority shall develop, maintain and implement a system for recording and acting on customer feedback and satisfaction with respect to the Food Services through the conduct of a customer user satisfaction survey/questionnaire to be carried out quarterly in a format consistent with Good Industry Practice.

CS11

Provide a customer-focused menu development service, based on periodic surveys, that meets the dietary requirements of the patient-mix and actively takes account of patient, staff and visitor feedback regarding the:

CS12

- Range of services on offer
- Choice of meals, snacks and drinks and portion size
- Quality of services
- Accessibility of service

4. SERVICE STANDARDS

Project Co shall deliver services in accordance with the standards identified within Section 3.2 of this Appendix or as identified by the Authority.

5. RESPONSE AND RECITIFICATION PERIODS

Project Co shall respond to any notified variances from the Services Protocols and Specifications identified herein as follows:

Service Category	Definition	During Core Hours		During Non-Core Hours	
		Response Time	Rectification Time	Response Time	Rectification Time
Emergency	<p>Service required immediately and is considered a serious emergency, including:</p> <ul style="list-style-type: none"> issues having an immediate negative impact on patient care or clinical functionality; safety problems exposing Facility Users to danger; emergency repairs to prevent further damage (i.e. burst pipe); and equipment failure or operating difficulties which could result in the loss of critical utilities including heat, water, electricity, emergency power and medical gases. 	Immediate 15 minutes	2 hours	Immediate 15 minutes	2 hours
Urgent	<p>Service required as soon as possible:</p> <ul style="list-style-type: none"> to address problems not presenting an immediate danger; and to address problems having the potential to have a negative impact on patient care. 	30 minutes	24 hours	30 minutes following the resumption of Core Hours	24 hours following the resumption of Core Hours
Routine	Service required for non-emergencies not having an immediate effect on patient care such as leaking taps, faulty doors and windows or equipment breakdowns or work not requiring immediate attention such as repairs to damaged walls, furniture or fixture installations.	2 hours	3 days	2 hours following the resumption of Core Hours	3 days
Statutory	Service is a statutory, legal and/ or legislative requirement. If a Services Protocol and Specification includes any statutory, legal and/ or legislative requirement then this Service Failure category will apply.	Instant Failure	2 weeks	Instant Failure	2 weeks

*Note: The Authority shall work collaboratively with Project Co to mutually agree on specific situations upon which an Event would be considered Emergency, Urgent and Routine.

PERFORMANCE INDICATORS

*Note: For the avoidance of doubt, where the “Response Time” and “Rectification Period” is “N/A”, then the categories and periods within the table of Section 5 are to be used.

Ref	Parameter	Category	Response	Rectification	Recording Frequency	Monitoring Method
General Services						
CS01	Operational policies and procedures adhered to and current. Every 6 Payment Periods Project Co shall provide the Authority’s Representative or designate a report detailing where non-adherence has been identified.	Medium	N/A	N/A	Bi-Annually	Performance Monitoring Report
Patient Services						
CS02	Project Co shall develop and implement appropriate operational policies, procedures and practices, together with customer service philosophy, relative to Patient Meal Services	Medium	N/A	N/A	Monthly	Performance Monitoring Report

APPENDIX 4M

LIFE CYCLE SCHEDULE

1. LIFE CYCLE REPLACEMENT AND REFURBISHMENT

Project Co is to ensure the long-term integrity and ongoing operational serviceability of the Facility through the delivery of the approved Life Cycle Plan which defines design life, specific replacement / refurbishment strategies, key assumptions, annual cost provisions for which Project Co is responsible; categorized by major divisions and elements such as substructure, structure, enclosure, interior dividing, vertical, finishes, furniture, fixtures & equipment, mechanical, electrical, and Lands. Project Co is responsible to maintain and renew the Facility and all equipment, components and systems/software described in Schedule 3 as required, such that, at termination or expiry of the Agreement, the Facility is fully functional and capable of performing to the standards set out in Schedule 3.

Project Co responsibilities shall include, but not be limited to:

- a) Life cycle replacement and refurbishment throughout the Operating Period in accordance with the approved Life Cycle Plan and Schedule 20 [Handback];
- b) Development, management and operation of a comprehensive electronic inventory control system and asset register, that provides up-to-date records of all Facility assets;
- c) Life cycle replacement and refurbishment that minimize disruption to the Authority. The Authority reserves the right to limit replacement renewal or other project related activities to outside of Core Hours if they are deemed to be disruptive to the Authority;
- d) Competent supervision of the work at all times and of all Project Co staff and/or Subcontractors performing services;
- e) Provide advice, guidance and recommendations on life cycle replacement and refurbishment of out-of-scope additions to the Facility subsequent to commissioning.

Replacement of elements, equipment and systems must be consistent with the following principles:

- a) On the Expiry Date, each element of the Facility will be in a condition which is consistent with the residual life specified in Schedule 20 [Handback].
- b) The standard of replacement or refurbishment of specific elements in accordance with the approved Life Cycle Plan shall meet or exceed the standards and specifications required in Schedule 3 [Design and Construction Specifications]. All replacements are to be new components that meet the most current technological standards available. Where elements are no longer available or those elements cannot be reproduced then elements may be replaced with elements of similar or equivalent form, substance and quality that meet or exceed the standards and specifications required in Schedule 3 [Design and Construction Specifications].
- c) Any upgrade of equipment or software that Project Co is implementing that interfaces with Authority equipment or software must be approved and be compatible with Authority's equipment or software and, if not, Project Co shall pay for the upgrade of Authority's equipment or software to meet the requirements.
- d) Both the Authority and Project Co shall ensure that training is provided to ensure all Project Co staff or Authority staff/users of upgraded equipment or software are trained and competent to meet the requirements. Project Co or the Authority respectively shall be responsible for the

Maintenance associated with their respective equipment or software following the initial installation

- e) Project Co shall make available to the Authority a full audit trail of life cycle activity and adherence to agreed standards.

APPENDIX 4N

MARKET TESTING PROCEDURE

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of this Agreement:

“Affiliated Person” means:

- (a) an Affiliate of any of Project Co, a Partner, a Project Contractor, a Sub-Contractor or other Project Co Person;
- (b) any partner in any partnership or any Person who participates in any profit sharing, cost-sharing or joint venture arrangement, in each case to which any of Project Co, a Partner, a Project Contractor, a Sub-Contractor or other Project Co Person (other than an invitee of Project Co or of any Project Co Person) or any Person mentioned in Section (a) above is also a party;
- (c) any shareholder, director, officer or employee of any of the Persons referred to in Sections (a) and (b) above or any of those Persons’ spouses, children, step-children or partners; or
- (d) any body corporate of which any Person referred to in Section (c) above is a shareholder, director, officer or employee;

“Benchmark Price Range” means the range of prices that is within ■■■ less than and ■■■ greater than the simple average of prices for the relevant Market Tested Services obtained from the suitable comparators as part of a Benchmarking Exercise conducted hereunder, once adjustments have been made to make such comparators comparable, including adjusting for standards, as agreed by the parties, provided however that the higher limit of such range will not exceed the highest of the suitable comparators;

“Benchmarking Exercise” has the meaning set out in Section 4.1 of this Appendix;

“Benchmarking Proposal” has the meaning set out in Section 4.4 of this Appendix;

“Draft Proposal” has the meaning set out in Section 3.5(a) of this Appendix;

“Excluded Person” means Project Co, any Affiliated Person, any subcontractor of an Affiliated Person or any Affiliate of their respective subcontractors;

“Market Tested Services” means:

- (a) Housekeeping and Waste Management Services;
- (b) Roads, Grounds and Landscape Maintenance Services;
- (c) Security and Surveillance Services;

- (d) Laundry and Linen Services; and
- (e) Catering Services.

“Market Testing” means the process described in this Appendix, including the Benchmarking Exercise if applicable;

“Market Testing Dates” means three years after Service Commencement and thereafter every sixth anniversary of that date;

“Market Testing Meetings” has the meaning set out in Section 3.1 of this Appendix;

“Market Testing Proposal” has the meaning set out in Section 3.5(e) of this Appendix;

“Preferred Service Tenderer” has the meaning set out in Section 3.9 of this Appendix;

“Prospective Service Tenderers” means those Persons identified by the parties pursuant to Section 3.6 of this Appendix;

“Qualifying Service Tender” means a tender received from a Service Tenderer which complies with the Service Tender Requirements;

“Service Tenderers” means those of the Prospective Service Tenderers selected to submit tenders in accordance with Section 3.7 of this Appendix;

“Service Tender Requirements” has the meaning set out in Section 3.1(e) of this Appendix; and

“Service Tender Validity Period” means the period within which tenders from Service Tenderers must be received if they are to be valid.

In this Appendix any reference to Service Provider includes reference to any Sub-Contractor engaged by the Service Provider to provide a Market Tested Service.

2. TIMING OF MARKET TESTING AND BENCHMARKING

2.1 Project Co’s Responsibility to Conduct

Notwithstanding any other provision of this Appendix (including the participation of the Authority described in Section 3.1 of this Appendix):

- (a) Project Co may; or
- (b) at the Authority’s request not less than 8 months prior to the Market Testing Date for the relevant Market Tested Service, Project Co shall:

carry out a Benchmarking Exercise, and if required pursuant to this Appendix, the Market Testing described in Section 3, in respect of each Market Tested Service in accordance with this Appendix so that the Preferred Service Tenderer(s) will, if appointed to act as service provider(s), commence provision of the relevant Market Tested Services on the relevant Market Testing Date.

2.2 Consequences of Delay in Market Testing

If for any reason the applicable Market Testing for any Market Tested Services will not be complete on the relevant Market Testing Date, including for failure of the Market Testing, then Project Co shall remain responsible to ensure the continued provision of the relevant Market Tested Services until the completion of the Market Testing, and the Authority will be responsible to continue to pay Project Co as provided in this Agreement for the continued provision of the relevant Market Tested Services, pending completion of the applicable Market Testing or the determination of how to proceed if Market Testing has failed. The pricing of such continued Market Tested Services will, pending the establishment of new pricing as contemplated under this Appendix, be at the same pricing as prevailed before the relevant Market Testing and will be Index Linked (with the base date for such purposes deemed to be the relevant Market Testing Date) provided that to the extent that any delay in completing the Market Testing on or before the Market Testing Date is caused by the Authority, the Authority will pay such reasonable additional costs as Project Co may incur for the continued provision of the Market Tested Service until completion of the Market Testing.

3. MARKET TESTING

3.1 Market Testing Meetings

Unless a Benchmarking Exercise has been successfully completed in accordance with Section 4 of this Appendix, at least 6 months before each Market Testing Date the parties will hold meetings (“**Market Testing Meetings**”) in respect of all Market Tested Services:

- (a) to review the Services Protocols and Specifications for each Market Tested Service and if required by the Authority, to amend the relevant Services Protocols and Specifications as appropriate, provided that Project Co may only object to any change in the requirements of the Authority on the grounds referred to in Section 2.4 (*Restrictions on Changes*) of Schedule 6 Changes, Minor Works and Innovation Proposals and any such objection must be made in writing to the Authority within 15 days of the relevant Market Testing Meeting at which the change was contemplated;
- (b) to discuss and seek to agree (subject to the provisions of Section 3.4 of this Appendix) upon any grouping or groupings of Market Tested Services or any division of any Market Tested Service into separate parts which will optimize the opportunity for the Authority to obtain best value for money;
- (c) to discuss and seek to agree upon the appropriate media for advertising the Market Tested Services and identifying the Prospective Service Tenderers;
- (d) to discuss and seek to agree upon the basis on which the Service Tenderers will be selected by Project Co from among the Prospective Service Tenderers; and
- (e) to discuss and seek to agree upon the form and requirements of the tender documents to be sent to Service Tenderers (the “**Service Tender Requirements**”) which will satisfy the requirements of this Appendix and be in sufficient detail to allow the Preferred Service Tenderer to be determined in accordance with this Appendix, and which will include:

- (1) a statement of the Service Tender Validity Period;
- (2) requirements in respect of the possible grouping or groupings of Market Tested Services and any division of any Market Tested Service into separate parts;
- (3) details of the tender evaluation criteria;
- (4) the information Service Tenderers are required to provide; and
- (5) details of the required financial capacity and performance security/guarantees to be provided to support the Preferred Service Tenderer's obligations.

3.2 Notice of Meetings

Project Co shall provide at least one month's notice to the Authority of the time, place and agenda for the first Market Testing Meeting. Thereafter, each subsequent Market Testing Meeting will be convened on not less than 7 days' notice, with such notice identifying the agenda items to be discussed at the Market Testing Meeting, provided that in emergencies a Market Testing Meeting may be called at any time on such notice as may be reasonable in the circumstances. The parties will hold Market Testing Meetings as often as necessary.

3.3 Tender Evaluation Material

Any tender evaluation criteria agreed between Project Co and the Authority and made available to the Service Tenderers as part of the Service Tender Requirements will be objective and impartial.

3.4 Grouping of Services

Unless Project Co can demonstrate to the Authority that Project Co shall optimize its ability to obtain best value for money for the Authority if Market Tested Services are tendered separately or in particular groupings or if any Market Tested Service is divided into separate parts, the grouping of any Market Tested Services will be left to the discretion of Project Co on the basis that the Service Tender Requirements will specify that:

- (a) Service Tenderers may submit tenders for all or any of the Market Tested Services; and
- (b) where a Service Tenderer submits a tender for a group or groups of Market Tested Services, such Service Tenderer may be required to provide all or any of the Market Tested Services in such group or groups and will, in any event, provide separate pricing for each Market Tested Service in such group or groups.

3.5 Market Testing Proposal

Notwithstanding any failure of the parties to agree upon any matter referred to in Section 3.1 of this Appendix:

- (a) Project Co shall prepare and deliver to the Authority no later than 4 months before the relevant Market Testing Date a draft market testing proposal (the "**Draft Proposal**") describing in detail Project Co's proposals for the Market Testing of each Market Tested

Service. The Draft Proposal will describe all of the matters referred to in, and agreed pursuant to, Section 3.1 of this Appendix and the form of contract which the Preferred Service Tenderer will be required to accept;

- (b) it will be a principle of the Market Testing Proposal that, unless otherwise agreed by the parties, the allocation of risk to the Preferred Service Tenderer, if appointed to act as a service provider, will not be materially greater or less than such allocation to the service provider whom the Preferred Service Tenderer is to replace;
- (c) the Authority may, within 30 days of the Authority's receipt of the Draft Proposal, provide comments and request amendments to the Draft Proposal to the extent required to comply with the requirements of this Section 3 and Project Co shall revise the Draft Proposal as reasonably required by the Authority;
- (d) if Project Co and the Authority are unable to agree on any matter relating to the Draft Proposal within 60 days of the Authority's receipt of the Draft Proposal, either party may refer the matter for resolution in accordance with the Dispute Resolution Procedure;
- (e) the Draft Proposal, amended as agreed by the parties or as determined by the Dispute Resolution Procedure, will be the "**Market Testing Proposal**"; and
- (f) the Services Protocols and Specifications, Service Tender Requirements and form of contracts set out in the Market Testing Proposal will be used for the Market Testing.

3.6 Selection of Prospective Service Tenderers

Prospective Service Tenderers will be selected as follows:

- (a) Project Co shall be responsible for compiling the list of Prospective Service Tenderers;
- (b) if the Authority recommends any Prospective Service Tenderers, then Project Co shall include any such recommended Person in the list of Prospective Service Tenderers provided such Person complies with and meets the criteria referred to in Section 3.7(a) of this Appendix; and
- (c) unless otherwise consented to by the Authority, the Authority will have the right to object to the selection of, and Project Co shall not select, any Person as a Prospective Service Tenderer:
 - (1) if such Person does not, or could not reasonably be considered to, comply with and meet any of the criteria referred to in Section 3.7(a) of this Appendix;
 - (2) if such Person is an Excluded Person provided that for the purposes of this Section 3.6 the existing Service Provider will not be an Excluded Person if such person is not in default of the performance of its obligations under its contract to provide the Market Tested Services; or
 - (3) if such Person is a Restricted Person or any other Person who is not permitted to be a Sub-Contractor pursuant to this Agreement.

3.7 Selection Of Service Tenderers

Service Tenderers will be selected as follows:

- (a) Project Co, in consultation with the Authority, will be responsible for selecting the Service Tenderers from the list of Prospective Service Tenderers on the basis of the following criteria:
 - (1) the financial standing of the Prospective Service Tenderers;
 - (2) the technical, managerial and other relevant experience and ability of the Prospective Service Tenderers, taking into account any relevant customer references;
 - (3) any other basis identified pursuant to Section 3.1(d) of this Appendix or the Service Tender Requirements; and
 - (4) the ability of the Prospective Service Tenderers to accept all relevant obligations and liabilities under the terms of Services Contract or the relevant Sub-Contract;
- (b) the Authority will have the right to object to the selection of, and Project Co shall not select, any Person as a Service Tenderer if pursuant to Section 3.6(c) of this Appendix the Authority consented to such Person being a Prospective Services Tenderer and Project Co or such Person failed to comply with any condition of such consent, including with respect to any conflict of interest for an Excluded Person; and
- (c) Project Co shall, after consultation with the Authority, provide any Prospective Service Tenderer which is unsuccessful in being selected as a Service Tenderer with an appropriate explanation of the reasons behind its non-selection, if so requested by the Person in question.

3.8 Service Tendering Process

Project Co shall be responsible for managing and co-ordinating the Market Testing in an efficient and fair manner in accordance with the Market Testing Proposal (including the Service Tender Requirements) and:

- (a) Project Co shall ensure that only Service Tenderers selected in accordance with this Appendix are invited to submit tenders and that the principle of equality of information to, and treatment of, Service Tenderers will apply at all times;
- (b) the Market Testing will be by way of competitive tenders unless the Authority consents in writing to another competitive process (including requests for proposals, requests for qualifications or requests for quotations). If the Authority consents to another such process, the terms “tender”, “tenderer” and “tendering” will be deemed modified as necessary to reflect the terminology of such other process;
- (c) Project Co shall send all necessary documents and information to Service Tenderers (including the Service Tender Requirements) in a timely manner;

- (d) tenders must be assessed on the basis of relevant criteria, including:
 - (1) their compliance with the Service Tender Requirements; and
 - (2) the value for money that the tenders represent for the Authority;
- (e) Project Co shall bear all costs, fees and expenses associated with Market Testing other than any costs, fees or expenses incurred by the Authority;
- (f) the Authority may, at its own cost, appoint a monitor for the purpose of monitoring and reporting to the Authority on Project Co's compliance with all requirements for Market Testing. Such monitors will be entitled to attend all meetings and processes relating to Market Testing, including evaluation meetings and processes, inspect copies of all the tender documentation, bids and evaluation documentation and comment (on behalf of the Authority) to Project Co as to compliance with the requirements for Market Testing provided that the Authority will cause such monitor to comply with the confidentiality provisions set out in Section 17.1 of this Agreement; and
- (g) if, in respect of any Market Tested Service or group of Market Tested Services or any part of any Market Tested Service, there is only one Prospective Service Tenderer, or Project Co intends to select only one of the Prospective Service Tenderers as the Service Tenderer, then Project Co shall provide notice thereof to the Authority and:
 - (1) Project Co and the Authority will discuss and consider whether the Market Testing conducted for the relevant Market Tested Services was adequate or whether such Market Tested Service should be re-performed on a different basis; and
 - (2) if Project Co and the Authority agree that such Market Testing was adequate, or if such Market Testing is re-performed and there is still only one Prospective Service Tenderer, then the Authority may negotiate with the Prospective Service Tenderer and Project Co with respect to the pricing for such Market Tested Service for a period of no greater than 30 days. If:
 - (A) following such negotiations the Authority, Project Co and the Prospective Service Tenderer agree, then Project Co shall appoint the Prospective Service Tenderer to perform the Market Tested Service in accordance with Section 3.10 of this Appendix; or
 - (B) the Authority chooses not to negotiate or no agreement is reached pursuant to this Section 3.8(g)(2), then Project Co shall implement the Benchmarking Exercise described in Section 4 of this Appendix unless an unsuccessful Benchmarking Exercise has previously been conducted in respect of such Market Tested Service;
 - (3) if no agreement is reached pursuant to Section 3.8(g)(2)(A) of this Appendix and the subsequent Benchmarking Exercise, if any, is either terminated pursuant to Section 4.3 of this Appendix or results in a price greater than the Benchmarking

Price Range pursuant to Section 4.7 of this Appendix, then the pricing for such Market Tested Service will be the greater of:

- (A) the average of all prices included in the Benchmark Price Range if agreed pursuant to section 4.5 of this Appendix; and
- (B) an amount based on the pricing of such Market Tested Service then in effect subject to adjustments for the period such pricing was in effect equal to the greater of any increase in:
 - (i) the Consumer Price Index, All-Items in British Columbia as published by Statistics Canada for the period; and
 - (ii) the British Columbia Average Weekly Wage Rates as published by BC stats in the monthly report entitled "Earnings and Employment Trends",

to the extent such increases have not already been taken into account in the price for such Market Test Services then in effect.

- (h) if Project Co does not comply with all requirements for Market Testing, then, without limiting any other remedies of the Authority under this Agreement or otherwise, Project Co shall if required by the Authority re-perform the relevant Market Testing in accordance with such requirements.

3.9 Preferred Service Tenderers

Following expiry of the Service Tender Validity Period, Project Co shall, subject to the provisions of this Section 3.9, determine which Service Tenderer (the "**Preferred Service Tenderer**") offers the Qualifying Service Tender in respect of any Market Tested Service, group of Market Tested Services or individual part of any Market Tested Service, that represents, as the case may be, the best value for money for the Authority, and:

- (a) promptly upon making such determination of the Preferred Service Tenderer, Project Co shall supply to the Authority a copy of its tender evaluation, together with sufficient supporting information concerning the tender evaluation to enable the Authority to analyse and understand the basis for Project Co's determination; and
- (b) if the Authority does not agree with Project Co's determination in the case of any Qualifying Service Tender, the Authority may, within 30 days of being provided with the tender evaluation, dispute such determination and, if the parties do not resolve such Dispute within a further 30 days, the Dispute will be resolved in accordance with the Dispute Resolution Procedure; and
- (c) Project Co shall, after consultation with the Authority, provide any Service Tenderer which is unsuccessful in being selected as a Preferred Service Tenderer with an appropriate explanation of the reasons behind its non selection, if so requested by the party in question.

3.10 Appointment

On or about each Market Testing Date, Project Co shall ensure that all Preferred Service Tenderers, as agreed or determined in accordance with Section 3.9 of this Appendix, are appointed to provide and enter into contracts to provide the relevant Market Tested Service or group of Market Tested Services or individual parts of any Market Tested Service, as the case may be, for 6 year terms and on the basis set out in their Qualifying Service Tender.

4. BENCHMARKING

4.1 Project Co Notice May Initiate Benchmarking

Project Co may, not later than 8 months before a Market Testing Date, carry out a benchmarking exercise (the "**Benchmarking Exercise**") of one or more of the Market Tested Services rather than Market Testing as otherwise required by this Appendix.

4.2 Initial Meeting

Within 7 days of initiating a Benchmarking Exercise pursuant to Section 4.1 of this Appendix, the parties will meet to:

- (a) discuss and agree to the procedure for, and factors to be taken into account, in the Benchmarking Exercise to ensure that the Market Tested Services are compared on a like to like basis with suitable comparators and reliable information, which will include comparing the standards and prices of such Market Tested Services and the costs of providing them with the standards and prices of equivalent services and the costs of providing them in similar circumstances by reputable organizations possessing an appropriate degree of skill, resources, reputation and financial standing relative to the provision of such Market Tested Services; and
- (b) review the Services Protocols and Specifications for each Market Tested Service that will be subject to the Benchmarking Exercise and, if required by the Authority, amend the relevant Services Protocols and Specifications to be applicable to the Market Tested Service after the Market Testing Date, as appropriate, provided that Project Co may only object to any change in the requirements of the Authority on the grounds referred to in Section 2.4 (*Restrictions on Changes*) of Schedule 6 Changes, Minor Works and Innovation Proposals and any such objection must be made in writing to the Authority within 15 days of the relevant meeting at which the change was contemplated.

4.3 No Suitable Comparators

If Project Co cannot establish to the Authority's satisfaction, acting reasonably, that for a Market Tested Service there are suitable comparators and reliable information as described in Section 4.2(a) of this Appendix, then the Benchmarking Exercise for that Market Tested Service will not proceed and Market Testing of such Market Tested Service will be as otherwise provided in this Appendix.

4.4 Benchmarking Proposal

Project Co shall, prior to the start of the Benchmarking Exercise, submit a proposal (the “**Benchmarking Proposal**”) for the pricing of each Market Tested Service that is the subject of the Benchmarking Exercise. The pricing will not exceed any amount contractually agreed between Project Co and the relevant service provider that is applicable for the period after the Market Testing Date adjusted to reflect any changes to the Services Protocols and Specifications to the applicable Market Tested Service required pursuant to Section 4.2(b) of this Appendix. After Project Co submits the Benchmarking Proposal, Project Co shall carry out the Benchmarking Exercise for the relevant Market Tested Services.

4.5 Records and Information

Project Co shall maintain complete and accurate records of each Benchmarking Exercise and will present the results of the Benchmarking Exercise to the Authority, together with all necessary supporting documentation and such other information for full transparency of relevant cost and other information relating to the Benchmarking Exercise and as the Authority may reasonably require in order to evaluate properly the results of the Benchmarking Exercise. The parties will use all reasonable efforts to agree upon the Benchmark Price Range, but if each party acts reasonably and no agreement is reached Section 3 of this Appendix will apply.

4.6 Pricing Less Than Benchmark Price Range

If the pricing of a Market Tested Service in the Benchmarking Proposal is less than or within the Benchmark Price Range, then Project Co shall confirm the appointment of the relevant Service Provider then providing such Market Tested Service to continue providing such Market Tested Service for a further 6 year term and the re-pricing of such Market Tested Service will be at the pricing set out in the Benchmarking Proposal.

4.7 Pricing Greater Than Benchmark Price Range

If the pricing of a Market Tested Service in the Benchmarking Proposal is greater than the Benchmark Price Range then Section 3 of this Appendix will apply unless Project Co agrees to provide the Market Tested Services for an amount within the Benchmark Price Range or the Authority otherwise agrees.

4.8 Costs

Project Co shall bear all costs, fees and expenses associated with the Benchmarking Exercise other than any costs, fees or and expenses incurred by the Authority.

5. PAYMENTS

5.1 Service Payment Adjustment

Following Market Testing, the Periodic Payments will be adjusted in accordance with Section 3.3 of Schedule 8 Payments.

6. INFORMATION REQUIREMENTS

Without prejudice to any of Project Co's general obligations under this Agreement, including pursuant to Section 4.2 (*Records and Reports*) of this Agreement, Schedule 14 Records and Reports and the other provisions of this Appendix, Project Co shall:

- (a) maintain a full record and audit trail of each Market Testing and make all such records, including details of all tenders received, available for inspection by the Authority and other authorized representatives on reasonable notice from the Authority;
- (b) provide to the Authority, in a comprehensive and accurate manner, all information necessary to enable the Authority to review and assess all matters relating to the Market Testing; and
- (c) certify to the Authority within 30 days after expiry of the Service Tender Validity Period that:
 - (1) to the best of Project Co's knowledge after due enquiry, no Excluded Person intends to or will obtain any direct or indirect financial or other benefit from such appointment, other than the benefit of the contract itself;
 - (2) to the best of Project Co's knowledge after due enquiry, no Excluded Person has colluded in connection with the Market Testing; and
 - (3) there has been material compliance with all requirements relating to ensuring equality of information provided to, and treatment of, Service Tenderers.

7. INDEMNITY

Project Co shall indemnify and keep the Authority and each Authority Person indemnified at all times from and against all Direct Losses (including those arising from any third party claims) that any such Person may sustain in connection with:

- (a) the implementation of this Appendix;
- (b) any breach of the provisions of this Appendix; and
- (c) any claim made by any Person, including any Prospective Service Tenderer, Service Tenderer or Preferred Service Tenderer, that is not awarded a contract,

except to the extent that any such breach or claim results from any failure of the Authority to comply with the provisions of this Appendix.

APPENDIX 40

PROPOSAL EXTRACTS (SERVICES)

342051 – STH FM Commercial Close FM Item Log

Item	Source	Item	Comment/Status
1.	Annual Service Plans	<ul style="list-style-type: none"> Clarify timescale, structure and format for the Annual Plans in order that all Parties are aware of the level, type and content of the information to be provided - all annual plans need to respond to each of the obligations identified in the Output Specifications and begin submission 240 days prior to SC. Clarify the Continuous Improvement Plan is included within the Start-Up and Annual Service Plans. 	<ul style="list-style-type: none"> It was agreed that within one month following Commercial Close, Project Co and the Authority will make commercially reasonable efforts to mutually agree on the process for developing the Start-up Plan and Annual Services Plans to effectively meet an acceptable 85% level of Plan completion 240 days prior to Service Commencement. The Continuous Improvement Plan identified in the RFP response will be included within in the Service Quality Plan.
2.	Security and Surveillance	<ul style="list-style-type: none"> Further clarity required with regards to the security service. BHP should validate and test the proposed security staffing levels (2 security guards and 1 CCTV monitor) with current provisions within the existing hospital Security. 	<ul style="list-style-type: none"> The initial staffing plan in respect of the delivery of the services required under Appendix 4J will require Security Staff to be stationed at the Security Desk in the Emergency Department when not performing other scheduled or demand duties.
3.	Catering	<ul style="list-style-type: none"> Clarify the suitability of catering staffing levels against current provisions. 	<ul style="list-style-type: none"> Involvement of a Project Co qualified Dietician (e.g. Dieticians of Canada) to participate and support the menu selection process based on Authority requirements which are consistent and not in addition to the terms of the Project Agreement.
4.	Market Tested Services	<ul style="list-style-type: none"> Clarify the Market Tested Services and BHP's proposed FM budgets in relation to the individual breakdowns provided. 	<ul style="list-style-type: none"> Project Co. shall include in any Market Testing Proposal a breakdown of current Labour and Non Labour costs against the overall Annual Service Payment for each Market Tested Service within the Market Testing Proposal.

SCHEDULE 5

INSURANCE REQUIREMENTS

1. INSURANCE REQUIREMENTS FOR THE FACILITY UNTIL THE INITIAL REMEDIATION WORK COMPLETION DATE

1.1 “All Risks” Builder’s Risk Insurance for the Facility until the Initial Remediation Work Completion Date

From the Effective Date until the Initial Remediation Work Completion Date for the Facility, and inclusive of the Initial Remediation Work Period for the Existing Facility, Project Co shall, at its own expense, take out, maintain in force and extend or will cause to be taken out, maintained and extended:

- (a) for the Construction, “all risks” course of construction insurance covering physical loss or damage including boiler & machinery and delay in start-up insurance covering all materials property, structures and equipment purchased for, entering into or forming part of the Facility, including any Equipment being moved by Project Co while located anywhere within Canada or the United States of America during construction, erection, installation and testing of the Facility. The policies will provide for the following extensions:
 - (i) faulty workmanship, materials construction or design as a permitted exclusion, but resultant damage insured to a DE5 or LEG3 standard with respect to the “all risks” course of construction;
 - (ii) 100% hard costs and 100% of recurring & continuing soft costs for the Construction;
 - (iii) replacement cost valuation (property);
 - (iv) most recent technology replacement cost valuation (equipment);
 - (v) flood (to policy limit with annual aggregate permitted);
 - (vi) natural or man-made earth movement, including earthquake, landslide or subsidence (to policy limit with annual aggregate permitted);
 - (vii) for property insured under the policy and stored at an off-site location or in transit in Canada or the United States of America, a limit of not less than the total of all values stored at any single location, or the value of the largest shipment to be transported by land to the Lands or the Existing Hospital Lands if such transport by land is not covered by marine cargo insurance;
 - (viii) professional fees – minimum [REDACTED] sublimit;
 - (ix) fire fighting expenses – minimum [REDACTED] sublimit;

- (x) debris removal and clean up – minimum [REDACTED] sublimit;
- (xi) expediting expenses – minimum [REDACTED] sublimit;
- (xii) extra and expediting expenses – minimum [REDACTED] sublimit;
- (xiii) valuable papers – minimum [REDACTED] sublimit;
- (xiv) accounts receivable – minimum [REDACTED] sublimit;
- (xv) contamination clean-up or removal – minimum [REDACTED] sublimit;
- (xvi) testing and commissioning – minimum 120 days, any one item;
- (xvii) frost or freezing to concrete – but only resultant damage from a peril not otherwise excluded;
- (xviii) radioactive contamination caused by sudden and accidental release of radioactive isotopes (resulting from an accident and accident to measuring, testing or medical equipment) - [REDACTED] sublimit;
- (xix) margin of profit for contractors;
- (xx) off premises services interruption - minimum 8 weeks;
- (xxi) civil authority - minimum 8 weeks;
- (xxii) prevention of ingress / egress - minimum 8 weeks;
- (xxiii) permission for partial occupancy prior to the Service Commencement Date;
- (xxiv) cost of carrying financing included in the soft costs coverage (indemnity period of 38 months)
- (xxv) underground services, temporary buildings and structures, temporary boilers and pressure vessels, scaffolding, false work, forms, hoardings, excavation, site preparation, landscaping and similar work;
- (xxvi) electronic data processing equipment and media, including the cost to restore from the application of by-laws or ordinances;
- (xxvii) non-vitiating;
- (xxviii) waiver of subrogation in favour of all named and unnamed insureds, including but not limited to Project Co, the Authority, the Project Contractors, the Senior Lenders, the Sub-Contractors, consultants and design professionals, except where a loss is caused by or resulting from any error in Design or any other design professional error or omission;

- (xxix) permit use and occupancy of the incomplete Facility by Project Co, the Project Contractors, the Sub-Contractors and the Authority prior to the Service Commencement Date;
 - (xxx) coverage shall be primary without any right of contribution of any insured carried by the Authority or the Senior Lenders
- (b) delay in start-up coverage:
- (i) in an amount sufficient to compensate Project Co for additional capital payments, additional interest for the extension of financing necessary for the completion of the Project, legal and accounting expenses, property taxes, insurance premiums, building permits and other miscellaneous costs, various incurred fees, fixed operation and maintenance expenses, additional commissions, advertising, margin of profit for Project Co, caused by the delay in the Service Commencement Date resulting from any perils insured under (a) above;
 - (ii) having an indemnity period not less than 38 months in respect of the Facility;
 - (iii) having a waiting period of not greater than 30 days;
 - (iv) in respect of delay in start-up insurance proceeds name the Senior Lenders and Project Co as loss payees as per the Senior Lender Endorsements;
- (c) deductibles, per occurrence not exceeding the following amounts;
- (i) flood - [REDACTED];
 - (ii) testing and commissioning - [REDACTED];
 - (iii) for earthquakes, the greater of [REDACTED] or [REDACTED] of the total insured value of the Facility;
 - (iv) faulty design, workmanship or materials (LEG3/DE5) - [REDACTED];
 - (v) for all other insured perils - [REDACTED]; and
 - (vi) if more than one event occurs, only the highest deductible applies;
- (d) include, as named insureds, as their interests may appear, the following entities:
- (i) Project Co;
 - (ii) the Authority;
 - (iii) the Design-Builder;

- (iv) all Sub-Contractors, sub-subcontractors, consultants and sub-consultants as their interests may appear;
- (v) any third party service provider(s) providing services to Stanton Territorial Hospital on behalf of the Authority (each an “**Authority Service Provider**”);
- (e) name the Senior Lenders in respect of the Construction as per the Senior Lender Endorsements substantially in the form set out in Appendix 5A, including, without limitation, naming the Senior Lenders as additional insureds and loss payees and with respect to the delay in start-up coverage referred to in Section 1.1(b) of this Schedule, naming Project Co and the Senior Lenders as the exclusive loss payees;

1.2 Wrap-Up Liability Insurance

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, commercial general liability insurance on a wrap-up basis which will include the following terms:

- (a) coverage in an amount of not less than [REDACTED] per occurrence and [REDACTED] in the aggregate for bodily injury, death and damage to property, including loss of use thereof, subject to the following principle extensions and sublimits:
 - (i) products & completed operations - [REDACTED] – minimum 48 months after the Service Commencement Date;
 - (ii) non-owned automobile liability - [REDACTED];
 - (iii) sudden and accidental pollution and hostile fire pollution liability - [REDACTED];
 - (iv) “all risks” tenants’ legal liability – minimum [REDACTED] sublimit;
 - (v) forest fire fighting expenses – minimum [REDACTED] sublimit;
 - (vi) employee benefits administrative errors and omissions – minimum [REDACTED] sublimit;
 - (vii) legal liability for damages to non-owned automobiles (SEF 94) - [REDACTED] sublimit;
 - (viii) contractor’s rework - [REDACTED] sublimit;
 - (ix) medical payments - [REDACTED] per occurrence / [REDACTED] aggregate;
 - (x) owners’ and contractors’ protective liability;
 - (xi) blanket contractual liability (written and oral);
 - (xii) direct and contingent employers’ liability;

- (xiii) attached machinery;
 - (xiv) personal injury;
 - (xv) cross liability and severability of interests;
 - (xvi) hoist collision liability;
 - (xvii) hazardous operation XCU (blasting / demolition / excavating / underpinning / pile driving / shoring / caisson work / work below ground surface / tunnelling / grading and similar operations);
 - (xviii) permission for unlicensed vehicles;
 - (xix) permission to occupy incomplete Facility;
 - (xx) loss of use without property damage;
 - (xxi) broad form property damage;
 - (xxii) broad form completed operations;
 - (xxiii) intentional injury to project persons or property;
 - (xxiv) watercraft (not in excess of 10 m) unless insured elsewhere, as applicable;
 - (xxv) worldwide territory, subject to suits being brought in Canada or the US;
 - (xxvi) non-vitiation;
 - (xxvii) waiver of subrogation in favour of all named and unnamed insureds, including but not limited to Project Co, the Authority, the Project Contractors, the Senior Lenders, any Authority Service Provider(s), the Sub-Contractors, consultants and design professionals, except where a loss is caused by or resulting from any error in Design or any other design professional error or omission;
 - (xxviii) insurance shall be primary without right of contribution of any other insurance carried by any named insured
 - (xxix) Professional services integral to the Project, but not covering engineers, architects or other professional consultants (i.e. incidental professional liability risk of a named insured and their employed professionals to be covered, but not the professional liability of independent fee-for-service professional consultants, architects or engineers)
- (b) a deductible not in excess of ██████████ per occurrence;
- (c) include, as named insureds the following entities:

- (i) Project Co;
 - (ii) the Authority;
 - (iii) the Design-Builder;
 - (iv) all Sub-Contractors, sub-subcontractors, consultants and sub-consultants as their interests may appear;
 - (v) any Authority Service Provider(s);
- (d) include the Senior Lender Endorsements substantially in the form set out in Appendix 5A, including, without limitation, naming the Senior Lenders as additional insureds.

1.3 Project Specific Professional Liability

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, project specific professional liability insurance which will include the following terms:

- (a) coverage in an amount of not less than [REDACTED] per claim and in the aggregate (inclusive of defense and related costs and supplementary payments) for all architectural, engineering, land surveying, environmental, landscape architectural, interior design /space planning, soil and material testing services, geotechnical services and procurement services, including their replacements and/or sub-consultants of any tier subject to the following principle extensions:
 - (i) primary insurance extension;
 - (ii) present, former partner, executive officer, director or shareholder of named insureds while acting within their scope of duties for the named insured;
 - (iii) any individuals or personal corporations retained by the named insured under a personal services contract;
 - (iv) claim defined as a written or oral demand for money or a written or oral allegation in breach in the rendering or failure to render professional services by a named insured and resulting from a single error, omission or negligent act;
 - (v) lawyer fees and associated expenses incurred in the investigation, defence, settlement, arbitration or litigation of claims;
 - (vi) duty to defend, even if the allegations are groundless, false or fraudulent;
 - (vii) vicarious of liability of Project Co;
 - (viii) extended reporting period – minimum 48 months after the Service Commencement Date;

- (ix) retroactive date to the date of first design activity;
 - (x) coverage shall be primary without any right of contribution of any insured carried by the Authority or the Senior Lenders
- (b) a deductible not exceeding ██████████ per claim; ██████████ per claim with respect to mitigation
- (c) include, as named insureds the following entities:
- (i) Project Contractors (as appropriate);
 - (ii) all engineers, architects and other professional consultants that provide professional design services in connection with the Project.

1.4 Project Specific Pollution Liability (combined Contractors' Pollution Liability and Pollution Legal Liability)

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, project specific pollution liability insurance (combined contractors' pollution liability and pollution legal liability) which will include the following terms:

- (a) coverage in the amount of not less than ██████████ per claim and in the aggregate inclusive of defense and all costs and expenses subject to the following principle extensions:
- (i) bodily injury and third party contamination;
 - (ii) hazardous substances occurring or emanating from the Facility, the Lands, the Existing Hospital (during the Initial Remediation Work Period only), or the Existing Hospital Lands (during the Initial Remediation Work Period only) during the policy period;
 - (iii) microbial matter (including fungus/mould);
 - (iv) underground / above ground storage tanks;
 - (v) first party remediation and clean-up costs;
 - (vi) disposal site (reporting required);
 - (vii) contractual liability;
 - (viii) emergency response costs;
 - (ix) extended reporting period – minimum 48 months after the Service Commencement Date;

- (x) waiver of subrogation in favour of all named and unnamed insureds, including but not limited to Project Co, the Authority, the Project Contractors, the Senior Lenders, the Sub-Contractors;
- (xi) coverage shall be primary without any right of contribution of any insured carried by the Authority or the Senior Lenders
- (b) a deductible not exceeding ██████████ per claim;
- (c) include, as named insureds the following entities:
 - (i) Project Co;
 - (ii) the Authority;
 - (iii) Project Contractors;
 - (iv) all Sub-Contractors, sub-subcontractors, consultants and sub-consultants;
- (d) include the Senior Lender Endorsements substantially in the form set out in Appendix 5A, including, without limitation, naming the Senior Lenders as additional insureds.

1.5 Aircraft Liability

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, aircraft liability insurance (if an exposure exists) which will include the following terms:

- (a) coverage in the amount of not less than ██████████ per occurrence for all owned and non-owned aircraft including ██████████ per occurrence for passenger hazard subject to the following principal extensions:
 - (i) all aviation risks including the use of fixed or variable winged aircraft and helipads (if applicable);
 - (ii) waiver of subrogation in favour of all named and unnamed insureds, including but not limited to Project Co, the Authority, the Project Contractors, the Senior Lenders, the Sub-Contractors;
 - (iii) include coverage for Project Co, the Project Contractors and all Sub-Contractors;
 - (iv) coverage shall be primary without any right of contribution of any insured carried by the Authority or the Senior Lenders
- (b) a deductible not exceeding an amount acceptable to the Authority, acting reasonably;
- (c) include, as additional insureds the following entities:

- (i) the Authority;
- (ii) the Senior Lenders.

1.6 Aircraft Cargo Insurance

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, aircraft cargo insurance (if an exposure exists) for losses arising from the physical damage to cargo while it is in transit by air for any of the materials, equipment or property supplied under or used during the Project and which are critical to achieve Service Commencement which will include the following terms:

- (a) coverage in an amount not less than the full replacement value of the shipment subject to the following principal extensions:
 - (i) subject to the conditions of the Institute Cargo Clauses (all risks), including war and strikes extensions and including transit and storage where applicable;
 - (ii) 50/50 clause; and
 - (iii) warehouse to warehouse clause;
 - (iv) coverage shall be primary without any right of contribution of any insured carried by the Authority or the Senior Lenders
- (b) coverage for Project Co, the Project Contractors and all Sub-Contractors;
- (c) a deductible not exceeding an amount acceptable to the Authority, acting reasonably;
- (d) delay in start-up arising from the loss of a shipment subject to a minimum indemnity period of to be agreed between Project Co and the Authority, both acting reasonably;
- (e) include, as additional insureds:
 - (i) the Authority.
- (f) include, as loss payee:
 - (i) the Senior Lenders.

1.7 Watercraft Liability

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, watercraft liability insurance (if applicable) which will include the following terms:

- (a) coverage in the amount of not less than [REDACTED] per occurrence for all owned and non-owned watercraft subject to the following principal extensions:

- (i) waiver of subrogation in favour of all named and unnamed insureds, including but not limited to Project Co, the Authority, the Project Contractors, the Senior Lenders, the Sub-Contractors;
 - (ii) include coverage for Project Co, the Project Contractors and all Sub-Contractors;
 - (iii) coverage shall be primary without any right of contribution of any insured carried by the Authority or the Senior Lenders
- (b) a deductible not exceeding an amount acceptable to the Authority, acting reasonably;
 - (c) include, as additional insureds the following entities:
 - (i) the Authority;
 - (ii) the Senior Lenders.

1.8 “All Risks” Ocean Marine Cargo

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, “all risks” ocean marine cargo insurance (if applicable) for any of the materials, equipment or property supplied under or used during the Project and which are critical to achieve the Service Commencement Date, which will include the following terms:

- (a) coverage in an amount not less than the full replacement value of the shipment;
 - (i) coverage for Project Co, the Project Contractors and all Sub-Contractors;
 - (ii) coverage shall be primary without any right of contribution of any insured carried by the Authority or the Senior Lenders
- (b) a deductible not exceeding an amount acceptable to the Authority, acting reasonably;
- (c) delay in start-up arising from the loss of a shipment subject to a minimum indemnity period to be agreed between Project Co and the Authority, both acting reasonably;
- (d) include, as additional insureds:
 - (i) the Authority.
- (e) include, as loss payee:
 - (i) the Senior Lenders.

1.9 Automobile Liability

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, automobile liability which will include the following terms:

- (a) coverage in the amount of not less than [REDACTED] per accident for Project Co and the Project Contractors and an amount not less than [REDACTED] per accident for vehicles of any other contractor, Sub-Contractors, sub-subcontractors, consultants and sub-consultants or other persons working on or at the Lands and/or the Existing Hospital Lands on a standard automobile form

1.10 "All Risks" Contractors' Equipment

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, "all risks" contractors' equipment insurance which will include the following terms:

- (a) replacement cost for equipment less than 3 years old, otherwise actual cash value basis of such equipment;
- (b) coverage for Project Co, the Project Contractors and all Sub-Contractors;
- (c) a waiver of subrogation in favour of the following entities:
 - (i) the Authority;
 - (ii) the Senior Lenders.

1.11 Commercial General Liability and Non-Owned Automobile Liability (Off-Site Operations)

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, commercial general liability insurance for off-site exposures, subject to the following limits:

- (a) Coverage in the amount of not less than [REDACTED] per occurrence and in the annual aggregate with respect to Project Co and the Project Contractors, with the following extensions:
 - (i) Owner's and contractor's protective liability
 - (ii) Blanket contractual liability (written)
 - (iii) Direct and contingent employer's liability
 - (iv) Personal injury
 - (v) Cross liability and severability of interests

- (vi) hazardous operation XCU (blasting / demolition / excavating / underpinning / pile driving / shoring / caisson work / work below ground surface / tunnelling / grading and similar operations;
 - (vii) permission for unlicensed vehicles;
 - (viii) permission to occupy incomplete Facility;
 - (ix) loss of use without property damage;
 - (x) broad form property damage;
 - (xi) broad form completed operations;
 - (xii) tenant's legal liability;
 - (xiii) no exclusion for abuse / molestation, or a specific endorsement to the policy providing coverage for abuse / molestation;
 - (xiv) intentional injury;
 - (xv) watercraft (not in excess of 10 m) unless insured elsewhere, as applicable;
 - (xvi) worldwide territory, subject to suits being brought in Canada or the US;
- (b) include, as additional insureds:
- (i) the Authority;
 - (ii) Senior Lenders.
- (c) Coverage in the amount of not less than [REDACTED] per occurrence and in the annual aggregate with respect to broad form completed operations and any other contractors, subcontractors, sub-subcontractors, consultants, and sub-consultants, workmen or tradesmen or other persons involved in the Project.

1.12 Employee Dishonesty (Crime)

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, employee dishonesty insurance against the fraudulent acts of employees of Project Co which will include the following terms:

- (a) Coverage in the amount of not less than [REDACTED] per claim and will include the following principal extensions:
- (i) broad form money and securities;
 - (ii) money orders and counterfeit paper;

- (iii) depositors' forgery;
- (iv) computer fraud and funds transfer fraud;
- (v) audit expenses;
- (vi) credit card forgery.

1.13 Workers Compensation

From the Effective Date until the Initial Remediation Work Completion Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, workers' compensation insurance coverage for all employees of Project Co and any Sub-Contractor engaged in the performance of the Construction, in accordance with applicable Laws and the requirements of any Governmental Authority.

2. INSURANCE REQUIREMENTS FOR THE EXISTING HOSPITAL

2.1 Insurance Requirements of Project Co for the Existing Hospital

The Authority shall, at its own expense, take out, maintain in force and extend or will cause to be taken out, maintained and extended, "all risks" property insurance for the full replacement cost of the Existing Hospital. Project Co will be responsible for the deductible of [REDACTED] due to damage during the Initial Remediation Work Period for the Existing Hospital. In addition the Authority agrees to waive any subrogation rights in relation to loss or damage to the Existing Hospital during the Initial Remediation Work Period. For the purposes of this Section 2.1, Project Co will be responsible for the deductible of [REDACTED] for any claim made on the "all risks" policy of insurance described in this Section 2.1, unless the loss was caused by the Authority or an Authority Service Provider, in which case the deductible will be the responsibility of the Authority to the extent caused by the Authority or such Authority Service Provider.

3. OPERATING PERIOD INSURANCE REQUIREMENTS

Project Co may utilize blanket corporate policies to satisfy the Operating Period insurance requirements, provided that all the needs, scope of coverage and limits of the Authority have been met. The Authority reserves the right to audit the blanket corporate policies to ensure compliance.

3.1 "All Risks" Property Insurance

From the Service Commencement Date, Project Co shall at its own expense, take out, maintain in force and extend or will cause to be taken out, maintained and extended, "all risks" property insurance will include the following terms:

- (a) coverage in an amount not less than the full replacement value of the Facility including all Equipment subject to the following principle extensions and sublimits:
 - (i) replacement cost valuation (property);
 - (ii) most recent technology replacement cost valuation (equipment);

- (iii) flood (to policy limit with annual aggregate permitted);
- (iv) natural or man-made earth movement, including earthquake, landslide or subsidence (to policy limit with annual aggregate permitted);
- (v) for property insured under the policy and stored at an off-site location or in transit in Canada or the United States of America, a limit of not less than the total of all values stored at any single location, or the value of the largest shipment to be transported by land to the Lands or the Existing Hospital Lands if such transport by land is not covered by marine cargo insurance;
- (vi) professional fees – minimum [REDACTED] sublimit;
- (vii) fire fighting expenses – minimum [REDACTED] sublimit;
- (viii) debris removal and clean up – minimum [REDACTED] sublimit;
- (ix) expediting expenses – minimum [REDACTED] sublimit;
- (x) extra and expediting expenses – minimum [REDACTED] sublimit;
- (xi) by-laws including demolition, and increased cost of construction;
- (xii) valuable papers – minimum [REDACTED] sublimit;
- (xiii) accounts receivable – minimum [REDACTED] sublimit;
- (xiv) contamination clean-up or removal – minimum [REDACTED] sublimit;
- (xv) personal effects of employees and patients;
- (xvi) radioactive contamination caused by sudden and accidental release of radioactive isotopes (resulting from an accident and accident to measuring, testing or medical equipment) - [REDACTED] sublimit;
- (xvii) data processing equipment and media;
- (xviii) data processing – extra expense;
- (xix) automatic reinstatement of the sum insured;
- (xx) off premises services interruption;
- (xxi) civil authority - minimum 8 weeks;
- (xxii) prevention of ingress / egress - minimum 8 weeks;
- (xxiii) automatic coverage for newly acquired locations (90 days reporting period acceptable);

- (xxiv) joint loss agreement (if separate “all risks” property and boiler & machinery policies are arranged);
 - (xxv) no co-insurance;
 - (xxvi) course of construction continuance cover for permission for renovations and construction with a minimum sublimit of [REDACTED] to be covered at no additional premium;
 - (xxvii) blanket additional insureds, as applicable
- (b) business interruption coverage:
- (i) in an amount sufficient to compensate Project Co for loss of revenue (on a gross profits or gross revenue form) less Avoidable Costs resulting from or attributable to any insured perils under the “all risks” property policy;
 - (ii) having an indemnity period not less than 38 months in respect of the Facility;
 - (iii) having a waiting period of not greater than 30 days;
 - (iv) if commercially available the business interruption will be extended to include an infectious disease as a peril to trigger the business interruption coverage
 - (v) include interdependence and contingent cover regarding losses at key supplier premises, property in transit or in storage off-site.
- (c) deductibles, per occurrence not exceeding the following amounts;
- (i) flood - [REDACTED];
 - (ii) for earthquakes, the greater of [REDACTED] or [REDACTED] of the total insured value of the Facility;
 - (iii) for all other insured perils - [REDACTED];
 - (iv) with respect to deductibles, the deductibles in 2.1(b) and 2.1(c) may be provided on a combined form.
- (d) include, as named insureds the following entities:
- (i) Project Co;
 - (ii) the Authority;
 - (iii) Service Provider.
- (e) a waiver of subrogation in favour of the following entities:

- (i) Project Co;
 - (ii) Service Provider;
 - (iii) the Authority;
 - (iv) the Senior Lenders.
- (f) include the Senior Lender Endorsements substantially in the form set out in Appendix 5A, including, without limitation, naming the Senior Lenders as additional insureds and loss payees, and with respect to the business interruption coverage referred to in Section 3.1(b) of this Schedule, name Project Co and the Senior Lenders as the exclusive loss payees.
- (g) for any equipment owned by the Authority that is the responsibility of the Authority, the Authority shall be the sole loss payee with respect to physical damage.

3.2 Boiler & Machinery Insurance

From the Service Commencement Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, boiler and machinery insurance covering all boilers, pressure vessels, electrical and mechanical machines included in the Project on a comprehensive basis. Project Co may, at its option, combine this policy with the insurance required pursuant to Section 3.1 above. The policy will include the following terms:

- (a) coverage on a replacement cost basis in an amount not less than the maximum probable loss of the Facility, as determined by Project Co and agreed by the Authority and the Senior Lenders, subject to the following sublimits:
- (i) ammonia contamination – minimum [REDACTED] sublimit;
 - (ii) by-laws, including demolition and increased costs of construction – minimum [REDACTED] sublimit;
 - (iii) errors and omissions – minimum [REDACTED] sublimit;
 - (iv) expediting expenses – minimum [REDACTED] sublimit;
 - (v) extra expenses – minimum [REDACTED] sublimit;
 - (vi) hazardous substances – minimum [REDACTED] sublimit;
 - (vii) professional fees – minimum [REDACTED] sublimit;
 - (viii) water damage – minimum [REDACTED] sublimit;
 - (ix) data restoration;

- (x) denial of service – minimum 2 weeks sublimit;
 - (xi) service interruption – 1,000 meters;
 - (xii) course of construction continuance cover for permission for renovations and construction with a minimum sublimit of [REDACTED] to be covered at no additional premium
- (b) business interruption coverage:
- (i) in an amount sufficient to compensate Project Co for loss of revenue (on a gross profits or gross revenue form) less Avoidable Costs resulting from or attributable to any insured perils under the “all risks” property policy;
 - (ii) having an indemnity period not less than 38 months in respect of the Facility;
 - (iii) having a waiting period of not greater than 30 calendar days.
- (c) a deductible not exceeding [REDACTED] per occurrence;
- (d) include, as named insureds the following entities:
- (i) Project Co;
 - (ii) the Authority;
 - (iii) the Service Provider.
- (e) include the Senior Lender Endorsements substantially in the form set out in Appendix 5A, including, without limitation, naming the Senior Lenders as additional insureds and loss payees, and with respect to the business interruption coverage referred to in Section 3.2(b) of this Schedule, name Project Co and the Senior Lenders as the exclusive loss payees.

3.3 Commercial General Liability Insurance

From the Service Commencement Date to the Termination Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, commercial general liability insurance which will include the following terms:

- (a) commercial general liability insurance with respect to the Services.

It is hereby understood that Project Co shall have no liability arising out of the Authority Activities, including, but not limited to medical malpractice.

- (b) coverage in an amount of not less than [REDACTED] per occurrence and [REDACTED] in the aggregate for bodily injury, death and damage to property including loss of use thereof subject to the following principle extensions and sublimits;

- (i) product and completed operations;
- (ii) non-owned automobile liability - [REDACTED];
- (iii) sudden and accidental pollution and hostile fire pollution liability - [REDACTED];
- (iv) "all risks" tenants' legal liability – minimum [REDACTED] sublimit;
- (v) prairie or forest fire fighting expenses – minimum [REDACTED] sublimit;
- (vi) employee benefits administrative errors and omissions – minimum [REDACTED] sublimit;
- (vii) legal liability for damages to non-owned automobiles (SEF 94) - [REDACTED] sublimit;
- (viii) medical payments - [REDACTED] per occurrence / [REDACTED] aggregate;
- (ix) owners' and contractors' protective liability;
- (x) blanket contractual liability (written and oral);
- (xi) direct and contingent employers' liability;
- (xii) failure to provide services;
- (xiii) advertising liability;
- (xiv) no exclusion for abuse / molestation, or a specific endorsement to the policy providing coverage for abuse / molestation (subject to a minimum sublimit of [REDACTED]);
- (xv) radioactive contamination caused by sudden and accidental release of radioactive isotopes (resulting from an accident and accident to measuring, testing or medical equipment);
- (xvi) personal injury;
- (xvii) cross liability and severability of interests;
- (xviii) hazardous operation XCU (blasting / demolition / excavating / underpinning / pile driving / shoring / caisson work / work below ground surface / tunnelling / grading and similar operations);
- (xix) permission for unlicensed vehicles;
- (xx) loss of use without property damage;
- (xxi) broad form property damage;

- (xxii) broad form completed operations;
 - (xxiii) intentional injury;
 - (xxiv) watercraft (not in excess of 10 m) unless insured elsewhere, as applicable;
 - (xxv) worldwide territory, subject to suits being brought in Canada or the US;
 - (xxvi) non-vitiation;
 - (xxvii) waiver of subrogation in favour of all named and unnamed insureds, including but not limited to Project Co, the Authority, the Service Provider, and the Senior Lenders.
- (c) a deductible not in excess of ██████ per occurrence;
 - (d) include, as named insureds, the following entities:
 - (i) Project Co;
 - (ii) the Authority;
 - (iii) the Service Provider.
 - (e) include the Senior Lender Endorsements substantially in the form set out in Appendix 5A, including, without limitation, naming the Senior Lenders as additional insureds.

3.4 Pollution Liability Insurance

From the Service Commencement Date to the Termination Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, pollution liability insurance which will include the following terms:

- (a) coverage in the amount of not less than ██████ per claim and in the annual aggregate (multi-year policies will be allowed) inclusive of defense and all costs and expenses subject to the following principle extensions:
 - (i) hazardous substances occurring or emanating from the Project, the Facility and the Lands during the policy period;
 - (ii) microbial matter (including fungus/mould);
 - (iii) underground / above ground storage tanks;
 - (iv) first party restoration and clean-up costs;
 - (v) disposal site (reporting required);
 - (vi) contractual liability;

- (vii) emergency response costs;
 - (viii) extended reporting period – minimum 12 months in the event of termination of the policy or termination of the Project Agreement;
 - (ix) waiver of subrogation in favour of all named and unnamed insureds, including but not limited to Project Co, the Authority, the Service Provider and the Senior Lenders;
- (b) a deductible not exceeding [REDACTED] per claim;
- (c) include, as named insureds the following entities:
- (i) Project Co;
 - (ii) the Authority;
 - (iii) the Service Provider;
- (d) include the Senior Lender Endorsements substantially in the form set out in Appendix 5A, including, without limitation, naming the Senior Lenders as additional insureds.

3.5 Employee Dishonesty

From the Service Commencement Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, employee dishonesty insurance against the fraudulent acts of employees of Project Co which will include the following terms:

- (a) Coverage in the amount of not less than [REDACTED] per claim and will include the following principal extensions:
- (i) broad form money and securities;
 - (ii) money orders and counterfeit paper;
 - (iii) depositors' forgery;
 - (iv) computer fraud and funds transfer fraud;
 - (v) audit expenses;
 - (vi) credit card forgery.

3.6 Workers Compensation

From the Service Commencement Date, Project Co will take out, maintain in force and extend or will cause to be taken out, maintained and extended, workers' compensation insurance coverage for all employees of Project Co and any Sub-Contractor engaged in the performance of the Services, in accordance with applicable Laws and the requirements of any Governmental Authority.

3.7 Other Operating Period Insurance

From the Service Commencement Date, when construction, rehabilitation or major repair work is being carried out by or on behalf of Project Co under this Agreement and the risks associated with such work are not insured by the insurance described in the policies described in Section 3 [Operating Period Insurance Requirements] of this Schedule, Project Co will take out, maintain in force and renew or will cause to be taken out, maintained and renewed such insurance described in Section 1 [Insurance Requirements until the Service Commencement Date] of this Schedule in such amounts, as a prudent owner would reasonably require, as determined by the Authority, acting reasonably, at least 10 Business Days before the commencement of the applicable period during which the insurance is required. To the extent such work is undertaken pursuant to a Change Certificate and such work is not covered in the policies described in Section 3 [Operating Period Insurance Requirements] of this Schedule, the Change Certificate for such work will include such insurance coverage as the Authority, acting reasonably, considers necessary in the circumstances.

4. GENERAL INSURANCE PROVISIONS

4.1 Insurance Representative

Before commencing any Construction, Project Co will appoint an insurance representative who will communicate with the Authority and keep the Authority advised of all material matters of insurance, including claims, possible claims and policy changes or amendments. Project Co will at all times maintain such a representative throughout the Term and Project Co will advise the Authority promptly of any change in such representative during the Term.

4.2 Cooperation with Insurer's Consultants

If an insurer or an insurer's appointed consultant, for underwriting purposes, in connection with a claim or as a term or condition of an insurance policy, needs to review any part of the performance of this Project Agreement, then the Authority and Project Co shall, and each of them shall require the Authority Persons and the Project Co Persons, respectively, to:

- (a) cooperate with the insurer and its consultant, including providing them with such information and documentation as they may reasonably require; and
- (b) allow the insurer and its consultant to attend meetings between Project Co and the Authority (or, as applicable, and if reasonably required by the insurer, between Project Co and those engaged by or through Project Co).

Project Co and the Authority covenant and agree with each other to do all acts, matters and things as may be reasonably necessary or required to expedite the adjustment of any claim for loss or damage covered by insurance hereunder so as to expedite the release and disposition of such insurance in the manner and for the purposes herein contemplated.

4.3 Additional Insurance

None of the insurance coverage amounts or sublimits specified in this Schedule limit the liability of Project Co with respect to any obligations of Project Co to the Authority arising under this Agreement. Project Co will obtain and maintain, or cause to be obtained and maintained, at its cost, all such other policies of insurance required by Law or which Project Co deems necessary having regard for the policies of insurance which prudent owners and operators of projects of similar scope and magnitude to the Project would maintain and obtain, or cause to be obtained and maintained, including directors and officers liability insurance and corporate indemnification insurance.

4.4 Insurers and Terms of Policies

Project Co will ensure that all policies for the insurance pursuant to this Schedule are obtained and maintained with Qualified Insurers licensed in Canada and, subject to this Schedule, are in such forms and contain such terms and conditions which are equal to or better than those that would be obtained by prudent owners and operators of projects of similar scope and magnitude to the Project and, in addition to the required inclusions or permitted exclusions for each policy specifically described in this Schedule, include such other inclusions and exclusions as such prudent owner or operator would require or permit.

4.5 Particular Requirements of Policies

Without limiting the generality of this Schedule and the provisions of Section 6 [Insurance, Damage and Destruction] of this Agreement:

- (a) each commercial policy of insurance required under this Agreement will:
 - (i) with respect to insurances required under Sections 1.1, 1.2, 1.3, and 1.4 of this Schedule bear an endorsement to the effect that the policies will be non-cancellable except for non-payment of premium, material misrepresentation or concealment of facts or material breach of a policy condition;
 - (ii) with respect to insurances required under Sections 1.8, 3.1, 3.2, 3.3 and 3.4 of this Schedule bear an endorsement to the effect that the insurer will provide at least 60 days' notice of cancellation, including for non-payment of premium;
 - (iii) with respect to insurances required under Sections 1.5, 1.6, 1.7, 1.9, 1.10, 1.11, 1.12 and 3.5 of this Schedule bear an endorsement to the effect that the insurer will provide at least 60 days' notice of cancellation except for non-payment of premium where statutory conditions may apply;
 - (iv) with respect to insurances required under Sections 1.1, , 1.2, 1.3, 1.4, 1.5, 1.6, 1.7, 1.8, 3.1, 3.2, 3.3, 3.4 of this Schedule contain an endorsement to the effect that the policy will not be invalidated and coverage thereunder will not be denied to any insureds by reason of any breach or violation of warranties, representations, declarations or conditions contained in the policy other than as a result of a negligent act, misrepresentation or omission of such insured; and

- (v) be primary and not require the sharing of any loss by any insurer of the Authority.

4.6 Evidence of Insurance

In respect of those policies of insurance required to be maintained by Project Co pursuant to this Schedule, upon the issue of and upon every renewal of each such policy, and otherwise upon request by the Authority, Project Co will deliver to the Authority a certificate of insurance or certified copy of each such policy or other satisfactory evidence of adequate insurance. No review or approval of any insurance certificate or insurance policy by the Authority will derogate from or diminish such party's rights under this Agreement.

4.7 Claims

Project Co will:

- (a) maintain a written register of all claims and incidents that might reasonably result in a claim under any of the policies of insurance required by this Agreement and will allow the Authority to inspect such register at any time; and
- (b) notify the Authority and provide full particulars of any incident giving rise to a claim:
 - (i) within 5 Business Days after making any claim under any of the policies for the insurance required by this Agreement where the value of the claim exceeds [REDACTED]; or
 - (ii) immediately:
 - (A) after any property loss; and
 - (B) after any claim (regardless of the value of the claim) involving personal injury or death or professional liability, accompanied by full particulars of the incident giving rise to the claim.

4.8 Deductibles

Project Co will be responsible for the deductible portion of, or waiting period for, any claim made on any policy of insurance described in this Schedule, unless the loss was caused by the Authority or an Authority Service Provider, in which case the deductible will be the responsibility of the Authority to the extent caused by the Authority or such Authority Service Provider.

4.9 No Indemnification for Insured Claims

Project Co will not be entitled to claim compensation, indemnification or reimbursement from the Authority under this Agreement to the extent that Project Co:

- (a) is entitled to recover any such amounts under any insurance in force at the time of loss; or

- (b) would have been entitled to recover any such amounts under any insurance if it had complied with its obligation to take out and maintain, or cause to be taken out and maintained, insurance in accordance with this Agreement.

4.10 Compliance

- (a) Project Co will comply with the terms, conditions and requirements of all policies for the insurance required by this Schedule and will not do or omit to do, or permit to be done or omitted by any Project Co Person, anything on or with respect to the Facility, the Existing Hospital, the Lands or the Existing Hospital Lands that could reasonably be expected to result in the cancellation of any insurance described in this Schedule, or that would reasonably be expected to entitle any insurer to refuse to pay any claim under the policy for any such insurance;
- (b) The Authority will not do, or permit to be done by any Authority Person, anything on or with respect to the Facility, the Existing Hospital, the Lands or the Existing Hospital Lands that could reasonably be expected to result in the cancellation of any insurance described in this Schedule, or that would entitle any insurer to refuse to pay any claim under the policy for any such insurance;
- (c) The Authority and Project Co will, and Project Co will cause the Project Contractors and the Sub-Contractors to, comply with all insurance policy warranties made known to them.

4.11 Failure to Insure

Subject to Section 6.15 [Consequences of Risks becoming Uninsurable], if Project Co fails or refuses to obtain or maintain in force any insurance required to be effected by it under this Schedule, or to provide evidence of such insurance and renewals in relation thereto as and when required and in accordance with this Schedule, the Authority will, without prejudice to any of its other rights under this Agreement or otherwise, have the right itself to procure such insurance, in which event any amounts paid by the Authority for that purpose together with all reasonable costs incurred by the Authority in procuring such insurance will become due and payable by Project Co to the Authority.

4.12 Increase in Amount of Coverage

The Authority and Project Co will ensure that, throughout the Operating Period, the amounts of coverage in respect of the policies of insurance required to be obtained and kept in force under Section 4 of this Schedule are not less than the greater of the amounts:

- (a) specified in Section 3.3; and
- (b) of coverage that would be obtained from time to time by prudent owners and operators of projects of similar scope and magnitude as the Project in respect of such policies of insurance,

(each a "**Prudent Coverage Amount**").

In order to determine the Prudent Coverage Amount, Project Co will, at its own expense, carry out a replacement cost appraisal once every 3 years and provide evidence of said appraisal to the Authority.

If, at any time, a party (the “**Notifying Party**”) determines that the amount of coverage then in effect (the “**Actual Coverage Amount**”) in respect of any commercial policy of insurance required to be obtained and kept in force by a party under Section 2 of this Schedule, as applicable, is or will be less than the Prudent Coverage Amount, the Notifying Party will notify the other party in writing of such determination and, if both parties agree, or it is determined under the Dispute Resolution Procedure, that the Actual Coverage Amount is or will be less than the Prudent Coverage Amount, the party responsible for effecting and maintaining such policy of insurance will forthwith cause the amount of coverage in respect thereof to be increased to an amount equal to at least the Prudent Coverage Amount.

4.13 Project Co Contractors and Sub-Contractors

Project Co will determine the applicable insurance coverage to be obtained by Project Contractors and Sub-Contractors provided that such insurance coverages will be consistent with insurance that prudent Sub-Contractors would be required to maintain for projects of similar scope and magnitude to the Project.

5. BENCHMARKING OF INSURANCE COSTS

5.1 Definitions

For purposes of this Section 5, the following terms shall have the following meanings:

“**Actual Principal Insured Risk Insurance Cost**” means the aggregate of the annual insurance premiums reasonably incurred by Project Co, or incurred by others on behalf of Project Co, to maintain the Principal Insured Risk insurance during the Insurance Review Period, but excluding Taxes and all broker’s fees and commissions.

“**Base Principal Insured Risk Insurance Cost**” means ██████████, which is to be carried in the Financial Model for each year until the end of the Termination Date so long as the projected premiums were arrived at reasonably to be incurred by Project Co to maintain Principal Insured Risk insurances during the Insurance Review Period plus the annual insurance premiums incurred by others to maintain the Principal Insured Risk insurances on behalf of Project Co, which amounts exclude Taxes and all broker’s fees and commissions.

“**Insurance Cost Differential**” means an amount, based on the Joint Insurance Cost Report, equal to $(APIRIC - BPIRIC) \pm PIC$ where:

APIRIC is the Actual Principal Insured Risk Insurance Cost;

BPIRIC is the Base Principal Insured Risk Insurance Cost; and

PIC is any Project Insurance Change.

For the purpose of determining the Insurance Cost Differential, in the event that there is a net increase in the APIRIC relative to the BPIRIC, the Project Insurance Change shall have a negative value and, in

the event that there is a net decrease in the APIRIC relative to the BPIRIC, the Project Insurance Change shall have a positive value.

“Insurance Review Date” means each anniversary of the Principal Insured Risk Insurance Inception Date, except where such date lies beyond the end of the Project Term, in which case the Insurance Review Date shall be the last renewal date of the Principal Insured Risk Insurance prior to the Expiry Date.

“Insurance Review Period” means a one year period from the Principal Insured Risk Insurance Inception Date and each subsequent one year period commencing on the first anniversary of the Principal Insured Risk Insurance Inception Date, except where the end of such period lies beyond the end of the Term, in which case the Insurance Review Period shall be the period from the end of the penultimate Insurance Review Period to the last day of the Term.

“Principal Insured Risk” means all policies of insurance to be obtained by or on behalf of Project Co in Section 2 of this Schedule 5.

“Principal Insured Risk Inception Date” means the Service Commencement Date.

“Project Insurance Change” means any net increase or net decrease in the Actual Principal Insured Risk Insurance Cost relative to the Base Principal Insured Risk Insurance Cost, arising from:

- (a) other than in respect of claims or re-ratings arising out of the acts or omissions of the Authority or any Authority Person, the claims history or re-rating of Project Co or any Project Co Person;
- (b) the effect of any change in deductible or self-insured retention unless:
 - (i) such change is attributable to circumstances generally prevailing in the insurance market in the Northwest Territories; and
 - (ii) the deductible or self-insured retention, further to such change, is either greater than or equal to the maximum deductibles or self-insured retentions set out in this Schedule 5; and
 - (iii) any other issue or factor other than circumstances generally prevailing in the insurance market in the Northwest Territories.

5.2 Joint Insurance Cost Report

No later than 60 calendar days prior to each Insurance Review Date, Project Co’s insurance broker shall, at Project Co’s sole cost and expense, prepare a report on behalf of both Project Co and the Authority (the **“Joint Insurance Cost Report”**), which contains the following information for the relevant Insurance Review Period:

- (a) a full breakdown of the Actual Principal Insured Risk Insurance Cost;

- (b) an assessment and quantification of each Project Insurance Change, together with the reasons therefor;
- (c) the opinion of Project Co's insurance broker as to the reasons why the Actual Principal Insured Risk Insurance Cost has varied from the Base Principal Insured Risk Insurance Cost, specifying the impact of each of the factors and quantifying the amount attributable to each factor;
- (d) the calculation of the Insurance Cost Differential; and
- (e) evidence satisfactory to the Authority, acting reasonably, of any changes to circumstances generally prevailing in the Northwest Territories insurance market that are claimed to account for the Insurance Cost Differential.

The Service Payment will be subject to an adjustment in the amount of the Insurance Cost Differential (the "**Insurance Adjustment**") in accordance with the payment mechanism set out in Schedule 8 [Payments].

APPENDIX 5A

SENIOR LENDER ENDORSEMENTS

With respect to any policy of insurance noted in Schedule 5 [Insurance Requirements] as requiring these Senior Lender Endorsements, Project Co and the Authority will use all reasonable efforts to have the underwriters of such policies include terms and endorsements substantially similar to those set out in this Appendix 5A with such changes and amendments as may reasonably be required in the context of the coverage provided under, and the wording contained in, each such policy.

Notwithstanding any other provision of this Policy, the following endorsement shall apply:

Section I: Definitions

1. IN THIS ENDORSEMENT:

Agent means Computershare Trust Company of Canada, as indenture trustee, for and on behalf of the Finance Parties;

Authority means the Government of the Northwest Territories;

Finance Parties means the Indenture Trustee and the Bondholders (each as defined in the Trust Indenture);

Insurance Trust Account has the meaning given in the Trust Indenture;

Insurance Trust Agreement has the meaning given in the Trust Indenture;

Insured means those parties so described in the policy declarations;

Insurers means the insurer or insurers underwriting this insurance policy;

Project means the project described in the declarations to this Policy;

Project Co means Boreal Health Partnership;

Security Trustee means Computershare Trust Company of Canada, as indenture trustee, for and on behalf of the Finance Parties; and

Trust Indenture means the trust indenture made as of September 22, 2015 between Project Co and Computershare Trust Company of Canada, as indenture trustee, as amended or replaced from time to time.

Section II: Policy formation/basis

2. SEPARATE POLICY

All the provisions of this Policy (except for those relating to limits of liability) shall operate as if there were a separate policy covering each Insured. Accordingly, the liability of the Insurers under this Policy to any one of the Insured shall not be conditional upon the due observance and fulfilment of any other Insured of the terms of this Policy and of any duties imposed upon it relating thereto and shall not be affected by any failure in such observance or fulfilment of any such other Insured.

3. INTEREST OF THE FINANCE PARTIES AND THE AUTHORITY

3.1 The Insurers acknowledge that the Finance Parties and (in respect of third party liabilities) their respective officers, directors, employees, secondees and assigns are each additional insureds under this Policy and that the premium specified in this Policy provides consideration for their being insured parties.

3.2 The Insurers acknowledge that the Authority and (in respect of third party liabilities) its officers, directors, employees, secondees and assigns are each additional insureds under the sections of this Policy relating to property damage and third party liability risks and that the premium specified in this Policy provides consideration for their being insured parties.

4. LIABILITY FOR PREMIUM

Neither the Agent, nor the Finance Parties shall be liable for the payment of any premium under this Policy although they may choose to pay the premium.

5. DISCLOSURE

5.1 The Finance Parties shall have no duty of disclosure to Insurers in relation to the Policy.

5.2 The Insurers acknowledge to the Finance Parties alone that (i) they have received adequate information in order to evaluate the risk of insuring Project Co in respect of the risks hereby insured on the assumption that such information is not materially misleading, (ii) there is no information which has been relied on or is required by Insurers in respect of their decision to co-insure the Finance Parties or their directors, officers, employees or agents, and (iii) in agreeing to enter into this Policy, they have not relied upon or taken into account any information supplied to them by any Finance Party. The acknowledgements provided by the Insurers in this clause 5.2 shall have no effect on any rights that Insurers might have had under or in relation to the Policy against any party (including Project Co) other than the Finance Parties and the Agent in the absence of such acknowledgements.

5.3 Non-disclosure or misrepresentation by one Insured shall not be attributable to any other Insured who did not actively participate in that non-disclosure or misrepresentation. Without prejudice to the protections afforded to the Insured by this endorsement, no one Insured represents or warrants the adequacy or accuracy of any information provided or representation made by or on behalf of any other Insured.

Section III: Rights to avoid/cancel or change Policy terms

6. NON-VITIATION

- 6.1** The Insurers undertake to each Insured that the Policy will not be invalidated as regards the rights and interests of such Insured and that the Insurers will not seek to avoid any liability under this Policy because of any act, neglect, error or omission made by any other Insured, including any failure by any other Insured to disclose any material fact, circumstance or occurrence, any misrepresentation by any other Insured or any breach or non-fulfilment by any other Insured of any condition, warranty or provision contained in the policy.
- 6.2** The Insurers agree that no Insured shall be penalised or prejudiced in any way by any unintentional or inadvertent misrepresentation, non-disclosure, want of due diligence or breach of any declaration, terms, condition or warranty of this Policy (together “the Relevant Matter”), but that this shall not apply as regards the individual Insured responsible for the Relevant Matter if that Insured fails to notify the Insurers or the brokers through whom the Policy was placed as soon as reasonably practicable after the management or managers of that Insured become aware or are made aware of the Relevant Matter.

7. CANCELLATION

- 7.1** The Insurers agree that they shall not seek to cancel or suspend the construction phases of this insurance except for non-payment of premium.
- 7.2** The Insurers shall promptly notify the Agent and the Authority in writing of any default in the payment of premium and shall give the Agent and the Authority at least 30 days’ notice in writing before voiding this Policy for non-payment of premium, in order to give an opportunity for that premium to be paid within the notice period.

8. CHANGES IN COVER

The Insurers shall give the Agent and the Authority at least 30 days’ notice in writing before any reduction in cover or increase in excess or deductible under this Policy takes effect. Nothing in this clause shall give the Insurers any right which they do not otherwise have to reduce cover or increase any excess or deductible under this Policy.

9. AMENDMENTS TO ENDORSEMENT

During the term of this Policy, the provisions of this endorsement may only be amended by written agreement between Project Co, the Insurers and the Agent, such amendment to be endorsed on the Policy.

Section IV: Claims

10. NOTICE OF CLAIMS

10.1 Notice of claim by the Authority or the Finance Parties or any other party entitled to indemnity under the Policy shall, in the absence of manifest error, be accepted by Insurers as a valid notification of claim on behalf of all other Insureds subject to the full terms of the Policy.

11. CLAIM PAYMENTS/LOSS PAYEE

Payments made in accordance with this Clause 11 shall, to the extent of the payment, discharge the Insurers' liability to pay Project Co or any other Insured.

11.1 In respect of property and boiler and machinery risks only:

Subject to the provisions of the Insurance Trust Agreement and the Trust Indenture, all claim payments or return premium shall be paid into the Insurance Trust Account or to such other account as the Security Trustee may specify in writing.

11.2 In respect of the insurance under this Policy of third party liability risks only:

All claim payments in respect of a third party liability shall be paid to person(s) whose claim(s) constitute the risk or liability insured against except in the case where the Insured has properly discharged its liability to such person(s), in which case, subject to the provisions of the Insurance Trust Agreement and the Trust Indenture, the claim payment shall be paid to the Insurance Trust Account or such account as the Security Trustee directs in writing.

Subject to the provisions of the Insurance Trust Agreement and the Trust Indenture, any return premiums shall be paid to the Insurance Trust Account or such other account as the Security Trustee directs in writing.

11.3 In respect of the insurance under this Policy of loss of revenue risks only:

Subject to the provisions of the Insurance Trust Agreement and the Trust Indenture, all claim payments or return premiums shall be paid to the Insurance Trust Account or such other account as the Security Agent directs in writing.

12. WAIVER OF SUBROGATION

The Insurers waive all rights of subrogation howsoever arising which they may have or acquire against any Insured described within the appropriate Schedules arising out of any occurrence in respect of which any claim is admitted and is insured hereunder for the benefit of such Insured except against any:

- (a) such Insured (or officer, director, employee, agent or assign) who has caused or contributed to such an occurrence or claim by fraud, deliberate misrepresentation, deliberate non-disclosure or deliberate breach of policy condition; or
- (b) consultant or equivalent professional party to the extent that their professional errors, omissions or activities not covered by this Policy have caused or contributed to a loss covered under this Policy; or

- (c) supplier or manufacturer to the extent that their errors, omissions or activities not covered by this Policy have caused or contributed to a loss covered under this Policy; or
- (d) such Insured to the extent that they are entitled to recover in respect of a loss under cover falling within sub-clause 13(a)–(e) below (or would be so insured if cover in the terms set out in this Policy had not been taken out).

13. PRIMARY INSURANCE

The Insurers agree that this insurance provides the primary cover for risks insured under this Policy. In the event that any risk insured under this Policy is also insured under any other policy of insurance effected by any Insured, the Insurers agree to indemnify the Insured as if such other policy of insurance did not exist except in respect of:

- (a) excess layers of third party cover effected specifically for the Project;
- (b) any third party liability claim against the Insured which exceeds the applicable limit of indemnity under this Policy, in which case the liability of the Insurers for additional legal costs and expenses shall be limited to the proportion that the applicable limit of indemnity bears to the total claim against the Insured;
- (c) any claim under this Policy to which a Marine 50/50 Clause applies, if any;
- (d) any claim made under a Contingent Motor Liability extension to this Policy, if any; or
- (e) any claim relating to a loss which is insured against (or would be insured but for a double insurance provision or similar or the application of a deductible) under:
 - (i) any other policy specifically effected for the construction or operational phase(s) of the Project; or
 - (ii) a latent or inherent defects policy or engineering or mechanical breakdown policy specifically effected for the Project;

or a related business interruption insurance policy.

Section V: Miscellaneous

14. NOTICE OF SECURITY INTEREST

The Insurers acknowledge that by an assignment contained in a general security agreement dated on or about September 22, 2015 (the “**Assignment**”), Project Co assigned by way of security to the Finance Parties all benefits and rights in respect of this insurance and all claims and returns of premiums in respect thereof to which the Insured is or may at a future time become entitled. The Insurers confirm that they have not been notified of any other assignment of or security interest in Project Co’s interest in this insurance.

15. NOTICE

15.1 All notices or other communications under or in connection with the Policy will be given by fax and post. Any such notice given by Insurers will be deemed to be given on the earlier of:

- (A) if by fax, when transmitted but only if the sender's fax machine confirms successful transmission; and
- (B) if by post, within 2 business days of release from the relevant Insurer's office.

15.2 The address and fax number of the Agent for all notices under or in connection with the Policy are those notified from time to time by the Finance Parties for this purpose to the insurance broker at the relevant time. The initial address and fax number of the Agent is as follows:

Address: Computershare Trust Company of Canada
 100 University Avenue,
 11th Floor
 Toronto, ON M5J 2Y1

██████████ ████████████████████
██████████ ██

15.3 The address and fax number of the Authority for all notices under or in connection with the Policy are those notified from time to time by the Authority for this purpose to the insurance broker at the relevant time. The initial address and fax number of the Authority is as follows:

The Government of the Northwest Territories
5th Floor Arthur Laing Building
5003-49th Street, P.O. Box 1320
Yellowknife, NT X1A 2L9

██████████ ██

16. GOVERNING LAW & JURISDICTION

The Policy shall be governed and interpreted in accordance with the Law of the Northwest Territories.

This endorsement overrides any conflicting provision in this Policy.

**APPENDIX 5B
INSURANCE TRUST AGREEMENT**

THIS AGREEMENT is made as of the 22nd day of September, 2015

AMONG:

The Government of the Northwest Territories
(the “**Authority**”)

AND:

Computershare Trust Company of Canada, acting as agent for and on behalf of the Senior Lenders
(the “**Agent**”)

AND:

Boreal Health Partnership
(“**Project Co**”)

AND:

Computershare Trust Company of Canada, a trust company incorporated under the laws of Canada
(the “**Account Trustee**”)

WHEREAS:

- A. The Authority and Project Co have entered into the Project Agreement.
- B. The Authority, the Agent and Project Co have entered into the Lenders’ Remedies Agreement.
- C. The Authority, the Agent and Project Co have agreed that all amounts from time to time contained in the Insurance Trust Account are to be held in trust by the Account Trustee in accordance with the terms of this Insurance Trust Agreement, and that no releases, distributions or transfers of any funds from the Insurance Trust Account shall be made other than in accordance with the terms of this Insurance Trust Agreement.

NOW THEREFORE in consideration of the mutual covenants and agreements of the parties hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties covenant and agree as follows:

1. DEFINITIONS

In this Insurance Trust Agreement, unless the context otherwise requires:

- (a) “**Account Trustee**” has the meaning given in the introductory paragraph of this Insurance Trust Agreement.
- (b) “**Agent**” has the meaning given in the introductory paragraph of this Insurance Trust Agreement.
- (c) “**Appointed Representative**” has the meaning given in the Lenders’ Remedies Agreement.

- (d) **“Authority”** has the meaning given in the introductory paragraph of this Insurance Trust Agreement.
- (e) **“Bank”** means HSBC Bank Canada.
- (f) **“Business Day”** has the meaning given in the Project Agreement.
- (g) **“Change of Authorization Event”** has the meaning given in Section **Error! Reference source not found.** of this Insurance Trust Agreement.
- (h) **“Change of Authorization Notice”** has the meaning given in Section 8(b)(ii) of this Insurance Trust Agreement.
- (i) **“Default Notice”** means a written notice given by the Agent to the Account Trustee and the Authority that an event of default under the Senior Financing Agreements has occurred and is continuing.
- (j) **“Default Period”** means the period commencing on the date upon which the Account Trustee and the Authority receive a Default Notice and ending on the date upon which the Account Trustee and the Authority receive written notice from the Agent that the event of default which was the subject matter of the applicable Default Notice has been cured.
- (k) **“Facility”** has the meaning given in the Project Agreement.
- (l) **“Governmental Authority”** has the meaning given in the Project Agreement.
- (m) **“Insurance Policies”** has the meaning given in Section 4 of this Insurance Trust Agreement.
- (n) **“Insurance Proceeds”** has the meaning given in Section 5(a) of this Insurance Trust Agreement.
- (o) **“Insurance Trust Account”** means Insurance Trust Account No. 002-729679 at Bank.
- (p) **“Insurance Trust Agreement”** means this Insurance Trust Agreement.
- (q) **“Lenders’ Remedies Agreement”** means the Lenders’ Remedies Agreement made on or about the date hereof between the Authority, Project Co and the Agent.
- (r) **“Notice Period”** has the meaning given in the Lenders’ Remedies Agreement.
- (s) **“Order”** has the meaning given in Section 7(k) of this Insurance Trust Agreement.
- (t) **“Project”** has the meaning given in the Project Agreement.
- (u) **“Project Agreement”** means the project agreement made on or about September 22, 2015 between the Authority and Project Co.
- (v) **“Project Co”** has the meaning given in the introductory paragraph of this Insurance Trust Agreement.
- (w) **“Project Co Event of Default”** has the meaning given in the Project Agreement.

- (x) **“Suitable Substitute Project Co”** has the meaning given in the Lenders’ Remedies Agreement.
- (y) **“Senior Financing Agreements”** has the meaning given in the Project Agreement.
- (z) **“Senior Lenders”** has the meaning given in the Project Agreement.
- (aa) **“Step-In Notice”** has the meaning given in the Lenders’ Remedies Agreement.
- (bb) **“Step-In Period”** has the meaning given in the Lenders’ Remedies Agreement.
- (cc) **“Trust Property”** means all of the property held in trust by the Account Trustee pursuant to this Insurance Trust Agreement, including, without limitation, the Insurance Trust Account, and all amounts from time to time contained therein, the Insurance Policies and the Insurance Proceeds.

2. CONSTRUCTION AND INTERPRETATION

This Insurance Trust Agreement will be interpreted according to the following provisions, save to the extent that the context or the express provisions of this Insurance Trust Agreement otherwise require:

- (a) The parties waive the application of any rule of law which otherwise would be applicable in connection with the construction of this Insurance Trust Agreement that ambiguous or conflicting terms or provisions should be construed against the party who (or whose counsel) prepared the executed agreement or any earlier draft of the same.
- (b) The table of contents, headings and sub-headings, marginal notes and references to them in this Insurance Trust Agreement are for convenience of reference only, do not constitute a part of this Insurance Trust Agreement, and will not be taken into consideration in the interpretation or construction of, or affect the meaning of, this Insurance Trust Agreement.
- (c) Each reference in this Insurance Trust Agreement to "Section" is to a section of this Insurance Trust Agreement.
- (d) Each reference to an agreement, document, standard, principle or other instrument includes (subject to all relevant approvals and any other provision of this Insurance Trust Agreement expressly concerning such agreement, document, standard, principle or other instrument) a reference to that agreement, document, standard, principle or instrument as amended, supplemented, replaced, novated or assigned, and a reference to an "amendment" and similar terms (including "amend" and "amended") include a reference to supplement, alteration, substitute, variation, change and any other modification and similar terms.
- (e) Each reference to a statute or statutory provision (including any subordinate legislation) includes any statute or statutory provision which amends, extends, consolidates or replaces the statute or statutory provision or which has been amended, extended, consolidated or replaced by the statute or statutory provision and includes any orders, regulations, by-laws, ordinances, orders, codes of practice, instruments or other subordinate legislation made under the relevant statute.
- (f) Each reference to time of day is a reference to Mountain Standard time or Mountain Daylight Saving time, as the case may be.

- (g) Words importing the singular include the plural and vice versa.
- (h) Words importing a particular gender include all genders
- (i) Each reference to a public organization is deemed to include a reference to any successor(s) to such public organization or any organization or entity or organizations or entities which has or have taken over the functions or responsibilities of such public organization.
- (j) Unless the context otherwise requires, each reference to "parties" means the parties to this Insurance Trust Agreement and each reference to a "party" means any one of the parties to this Insurance Trust Agreement, provided however that a reference to a third party does not mean a party to this Insurance Trust Agreement.
- (k) All monetary amounts are expressed in Canadian Dollars.
- (l) The words "include", "includes" and "including" are to be construed as meaning "include without limitation", "includes without limitation" and "including without limitation", respectively.
- (m) Any consent contemplated to be given under this Insurance Trust Agreement must be in writing.
- (n) General words are not given a restrictive meaning:
 - (i) if they are introduced by the word "other", by reason of the fact that they are preceded by words indicating a particular class of act, matter or thing; or
 - (ii) by reason of the fact that they are followed by particular examples intended to be embraced by those general words.
- (o) All accounting and financial terms used herein are, unless otherwise indicated, to be interpreted and applied in accordance with Canadian generally accepted accounting principles, consistently applied.
- (p) If the time for doing an act falls or expires on a day that is not a Business Day, the time for doing such act will be extended to the next Business Day.
- (q) Each provision of this Insurance Trust Agreement will be valid and enforceable to the fullest extent permitted by law. If any provision of this Insurance Trust Agreement is held to be invalid, unenforceable or illegal to any extent, such provision may be severed and such invalidity, unenforceability or illegality will not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Insurance Trust Agreement. If any such provision of this Insurance Trust Agreement is held to be invalid, unenforceable or illegal, the parties will promptly endeavour in good faith to negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Insurance Trust Agreement as nearly as possible to its original intent and effect.

3. INSURANCE TRUST ACCOUNT

- (a) Prior to the commencement of a Default Period, the Insurance Trust Account and all amounts from time to time contained therein, including interest thereon, shall be held in trust by the Account Trustee for the benefit of Project Co. During a Default Period, the Insurance Trust Account, and all amounts from time to time contained therein, shall be held in trust by the Account Trustee for the benefit of the Agent and the Senior Lenders,

provided that, upon receipt by the Account Trustee of a Change of Authorization Notice, the Insurance Trust Account, and all amounts from time to time contained therein, shall be held in trust by the Account Trustee for the benefit of the Authority.

- (b) The Account Trustee shall not release, distribute or transfer any funds from the Insurance Trust Account other than in accordance with the terms of this Insurance Trust Agreement.
- (c) Notwithstanding any other provision of this Insurance Trust Agreement and subject to Section 3(d), the Agent, the Authority, and Project Co agree that if any of them either receives any Insurance Proceeds from the Insurance Trust Account or has the right to direct the Account Trustee to advance funds in respect of any Insurance Proceeds from the Insurance Trust Account to third parties, such funds shall be directed, used or advanced only for one of the following purposes:
 - (i) the repair, reinstatement, restoration or replacement of the Facility or any other assets, materials or goods necessary or desirable for the carrying out of the Design and/or the Construction or the Services in respect of which such Insurance Proceeds have been paid;
 - (ii) the completion of the Project;
 - (iii) indemnification for any Authority loss for which the subject Insurance Proceeds were paid under the Insurance Policies (as defined below); or
 - (iv) to the Senior Lenders as provided in the Senior Financing Agreements, in the case of Insurance Proceeds received in respect of a claim by Project Co for delay in start-up, soft costs, extra expense or business interruption.
- (d) Notwithstanding anything in this Insurance Trust Agreement, if the Authority is entitled to indemnification under the Insurance Policies in respect of any loss incurred by the Authority, such related insurance proceeds are to be paid directly to the Authority by the insurer or the Account Trustee and shall not be Insurance Proceeds subject to Section 3(c)(i) or (ii) of this Insurance Trust Agreement. For greater certainty it is understood and agreed that the Authority shall be required to use such proceeds for carrying out the purposes referred to in Sections 3(c)(i) and (ii) in respect of which such proceeds have been paid.

4. DELIVERY OF INSURANCE POLICIES

Project Co shall deliver, or cause to be delivered, to the Account Trustee all certificates, certified copies or originals of all property and asset related insurance policies that Project Co is required to maintain under the Project Agreement (collectively, the “**Insurance Policies**”), and the Account Trustee shall hold the Insurance Policies in trust for the benefit of each of the beneficiaries and loss payees, as the case may be, thereunder.

5. INSURANCE PROCEEDS

- (a) Subject to Section 3(d), the Account Trustee shall distribute any proceeds of any Insurance Policy that are paid over to it by any insurer, Project Co, the Agent or the Authority (the “**Insurance Proceeds**”) as follows:
 - (i) in the case of the all risks course of construction (builders’ risk), boiler and machinery insurance or property insurance policies that Project Co is required to maintain under the Project Agreement:

- (A) if the Account Trustee has not received a Default Notice and:
 - (1) if the amount of such Insurance Proceeds, together with the aggregate of all Insurance Proceeds in respect of the same loss or claim, is less than [REDACTED], to Project Co to repair, restore or replace the assets in respect of which such Insurance Proceeds have been paid; or
 - (2) if the amount of such Insurance Proceeds, together with the aggregate of all Insurance Proceeds in respect of the same loss or claim, is equal to or greater than [REDACTED], to the Agent to reimburse Project Co for the costs of repairing, restoring or replacing the assets in respect of which such Insurance Proceeds have been paid; or
- (B) if the Account Trustee has received a Default Notice, to the Insurance Trust Account to be distributed by the Account Trustee in such amounts and to such persons as the Agent may at any time or from time to time direct in writing, provided that, if the Account Trustee has received a Change of Authorization Notice, the Account Trustee shall release such Insurance Proceeds from the Insurance Trust Account in such amounts and to such parties as the Authority may at any time or from time to time direct in writing, in each case, to repair, restore or replace the assets in respect of which such Insurance Proceeds have been paid; and
 - (ii) in the case of any other Insurance Policies, to the Agent, or, following receipt by the Account Trustee of a Change of Authorization Notice, to the Authority, to be distributed to the parties entitled thereto.
- (b) All losses under (i) all risks course of construction (builder's risk) including boiler and machinery insurance carried by Project Co prior to the Service Commencement Date; (ii) property insurance carried by Project Co after the Service Commencement Date; and (iii) the boiler and machinery insurance carried by Project Co after the Service Commencement Date, which in each case is related to Equipment purchased by the Authority, shall be payable solely to the Authority and shall not be payable to the Account Trustee or distributed pursuant to this Insurance Trust Agreement.
- (c) The Account Trustee shall distribute any excess Insurance Proceeds remaining after the distributions contemplated in Section 5(a) have been made, including, without limitation, any Insurance Proceeds held in the Insurance Trust Account:
 - (i) if the Account Trustee has not received a Default Notice, to Project Co; and
 - (ii) if the Account Trustee has received a Default Notice, to such persons as the Agent, or, following receipt by the Account Trustee of a Change of Authorization Notice, the Authority, may at any time or from time to time direct in writing.
- (d) Each of Project Co, the Agent and the Authority shall forthwith deliver, or cause to be delivered, to the Account Trustee, any and all Insurance Proceeds it received from time to time and is not otherwise entitled to in accordance with the terms of this Insurance Trust Agreement.
- (e) The Account Trustee shall deposit to the Insurance Trust Account all amounts that are paid over to it pursuant to the Insurance Policies or otherwise by Project Co, the Authority

or the Agent and shall not transfer, release or distribute any such proceeds other than in accordance with this Insurance Trust Agreement.

6. ACCOUNT AGREEMENT

- (a) The Account Trustee hereby agrees to promptly provide to the Agent all monthly statements and other information with respect to the Insurance Trust Account provided to the Account Trustee by the Bank pursuant to the relevant account agreement. The Account Trustee further agrees that it shall make such requests to the Bank for additional information with respect to the Insurance Trust Account as the Agent may from time to time request in writing.
- (b) The Account Trustee hereby agrees to promptly provide to the Authority all monthly statements and other information with respect to the Insurance Trust Account provided to the Account Trustee by the Bank pursuant to the relevant account agreement. The Account Trustee further agrees that it shall make such requests to the Bank for additional information with respect to the Insurance Trust Account as the Authority may from time to time request in writing.

7. THE ACCOUNT TRUSTEE

- (a) The Account Trustee shall not have any duty or obligation to manage, control, use, make any payment in respect of, register, record, insure, inspect, sell, dispose of or otherwise deal with any part of the Trust Property except as expressly provided by the terms of this Insurance Trust Agreement. The Account Trustee shall carry out all written directions given by the Agent, the Authority or Project Co, as applicable, in accordance with this Insurance Trust Agreement and shall not be required to exercise any discretion in exercising any of its duties under this Insurance Trust Agreement in pursuance of such written directions. The Account Trustee shall not be bound to do or take any act, action or proceeding by virtue of the powers conferred on it hereby unless and until it shall have been required to do so under the terms hereof and has received instruction, advice or direction from the Agent, the Authority or Project Co, as applicable, as to the action to be taken (except with respect to actions specifically set out herein to be performed by the Account Trustee).
- (b) The Account Trustee will exercise its powers and carry out its obligations hereunder as account trustee honestly, in good faith and in the best interests of the beneficiaries hereunder and in connection therewith will exercise that degree of care, diligence, and skill that a reasonably prudent professional trustee would exercise in comparable circumstances. Unless otherwise required by law, the Account Trustee will not be required to give bond surety or security in any jurisdiction for the performance of any duties or obligations hereunder. No provision of this Insurance Trust Agreement shall be construed to relieve the Account Trustee from liability for its own dishonesty, fraud, negligence (including, without limitation, negligence in the handling of funds), wilful misconduct, bad faith or reckless disregard of any duty hereunder.
- (c) The Account Trustee will not be subject to any liability whatsoever, in tort, contract or otherwise in connection with the Trust Property or the carrying out of its duties under this Insurance Trust Agreement to the Agent, the Senior Lenders, the Authority, Project Co or any other person for any action taken or permitted by it to be taken, or for its failure to take any action, or for not performing any act or fulfilling any duty, obligation or responsibility hereunder by reason of any occurrence beyond the control of the Account Trustee (including, but not limited to, any act or provision of any present or future law or of any Governmental Authority, any act of God or war, or the unavailability of any wire or communication facility), provided that the foregoing limitation will not apply in respect of

any action or failure to act arising from or in connection with wilful misconduct, negligence or reckless disregard of duty by the Account Trustee. The Account Trustee in doing anything or permitting anything to be done in respect of the Trust Property or the carrying out of its duties under this Insurance Trust Agreement is, and will be conclusively deemed to be, acting as trustee for the beneficiaries hereunder and not in any other capacity. Except to the extent provided in this Section 7(c), the Account Trustee will not be subject to any liability for debts, liabilities, obligations, claims, demands, judgments, costs, charges or expenses against or with respect to the Trust Property, arising out of anything done or permitted by it to be done or its failure to take any action in respect of the execution of its duties hereunder and resort will be had solely to the Trust Property for the payment or performance thereof, and no other property or assets of the Account Trustee, whether owned in its personal capacity or otherwise, will be subject to levy, execution or other enforcement procedure with regard to any obligation under this Insurance Trust Agreement.

- (d) The Account Trustee shall not be required to expend or risk its own funds or otherwise incur financial liability in the performance of any of its duties hereunder, or in the exercise of any of its rights or powers hereunder, or in acting at the request or direction of the Agent on behalf of the Senior Lenders or of the Authority or of Project Co, unless it shall have received adequate indemnity or security against such risk or liability satisfactory to it.
- (e) Notwithstanding the foregoing, the Account Trustee shall be liable for any action or failure to act arising from or in connection with the dishonesty, fraud, negligence (including, without limitation, negligence in the handling of funds), wilful misconduct, bad faith or reckless disregard of any duty hereunder by the Account Trustee or any of its directors, officers or employees, or the failure to comply with the standard of care referred to in Section 7(b).
- (f) Except as otherwise provided in Sections 7(c), 7(d) and 7(e):
 - (i) the Account Trustee may rely and shall be protected in acting or refraining from acting upon any signature, resolution, certificate, statement, instrument, opinion, report, notice, request, direction, consent, order or other paper or document reasonably believed by it in good faith to be genuine and to have been signed or presented by the proper party or parties; and
 - (ii) the Account Trustee may exercise its powers and perform its duties by or through such attorneys, representatives, agents and employees as it shall appoint; and may consult with counsel, accountants and other skilled persons selected and employed or retained by it, and the Account Trustee shall not be liable for anything done, suffered or omitted in good faith by it in accordance with the written advice of such counsel, accountants or other skilled persons (provided that such advice pertains to such matters as the Account Trustee may reasonably presume to be within the scope of such person's area of competency) and not contrary to any express provision in this Insurance Trust Agreement.
- (g) Project Co hereby agrees to pay, indemnify and hold harmless the Account Trustee from and against any and all loss, liability, cost, claim and expense incurred by the Account Trustee with respect to the performance of this Insurance Trust Agreement by the Account Trustee or any of the Account Trustee's directors, officers or employees, unless arising from its or their own dishonesty, fraud, negligence (including, without limitation, negligence in the handling of funds), wilful misconduct, bad faith or reckless disregard of any duty hereunder.

- (h) Subject to the terms and conditions set forth in the Account Trustee fee letter, the Account Trustee shall receive from the Trust Property reasonable compensation for its services hereunder and shall be reimbursed by Project Co for its reasonable fees and expenses (including the disbursements and reasonable fees of counsel).
- (i) The Account Trustee agrees to look solely to Project Co, and not, except as expressly set forth herein, to the Agent, the Senior Lenders or the Authority for any claim for indemnification which may arise under this Insurance Trust Agreement.
- (j) The Account Trustee shall be responsible for keeping all appropriate books and records relating to the receipt and disbursement of all money which it receives hereunder.
- (k) If at any time the Account Trustee is served with any judicial or administrative order, judgment, decree, writ or other form of judicial or administrative process which in any way affects the Trust Property held by it hereunder (including, but not limited to, orders of attachment or garnishment or other forms of levies or injunctions or stays relating to the transfer of Trust Property) (each, an “**Order**”), the Account Trustee is authorized to comply therewith in any manner as it or legal counsel of its own choosing deems appropriate. The Account Trustee shall in no way be bound to call for further evidence (whether as to due execution validity or effectiveness, or the jurisdiction of any court, or as to the truth of any fact), and shall not be responsible for any loss that may be occasioned by its failing to do so. If the Account Trustee complies with any Order, the Account Trustee shall not be liable to any of the parties hereto or to any other person or entity even though such Order may be subsequently modified or vacated or otherwise determined to have been without legal force or effect. If the Account Trustee is served with any Order, it shall forthwith and, in any event, within three (3) Business Days, deliver a copy of such Order to each of the Agent, the Authority and Project Co.
- (l) Unless otherwise specifically set forth herein, the Account Trustee shall proceed as soon as practicable to collect any cheques or other collection items at any time deposited hereunder. All such collections shall be subject to the Account Trustee’s usual collection practices or terms regarding items received by the Account Trustee for deposit or collection. Except and to the extent provided herein, the Account Trustee shall not be required, or have any duty, to notify any person of any payment or maturity under the terms of any instrument deposited hereunder, nor to take any legal action to enforce payment of any cheque, note or security deposited hereunder, or to exercise any right or privilege which may be afforded to the holder of any such security.
- (m) In the event that the Account Trustee determines that any direction, instruction, notice or other communication given under this Insurance Trust Agreement by the Agent or, where the Account Trustee has received a Change of Authorization Notice, the Authority, is ambiguous or uncertain, the Account Trustee may, in its sole discretion, refrain from taking any action other than retaining possession of the Trust Property, unless the Account Trustee has received written instructions, signed by the Agent or, if the Account Trustee has received a Change of Authorization Notice, the Authority, which resolve such ambiguity or uncertainty, provided that the Account Trustee shall, forthwith upon determining that such direction, instruction, notice or other communication is ambiguous or uncertain, seek clarification from the Agent, or where the Account Trustee has received a Change of Authorization Notice, the Authority, to resolve such ambiguity or uncertainty.
- (n) Prior to receipt of a Change of Authorization Notice by the Account Trustee, any instruction, notice or other communication delivered to the Account Trustee by the Agent shall be paramount to and supersede any direction, instruction, notice or other communication from any other party to this Insurance Trust Agreement, and the Account

Trustee shall comply with such direction, instruction, notice or other communication from the Agent. After the Account Trustee has received a Change of Authorization Notice, any instruction, notice or other communication delivered to the Account Trustee by the Authority shall be paramount to and supersede any direction, instruction, notice or other communication from any other party to this Insurance Trust Agreement, and the Account Trustee shall comply with such direction, instruction, notice or other communication from the Authority.

- (o) Each of the Agent and the Authority shall provide to the Account Trustee an incumbency certificate setting out the names and sample signatures of individuals authorized to give instructions to the Account Trustee hereunder. The Account Trustee shall be entitled to rely on each such incumbency certificate until a revised or replacement incumbency certificate is provided to the Account Trustee by the Agent or the Authority, as applicable. The Account Trustee shall refuse to act upon any instruction given by the Agent or the Authority which is signed by any person other than an individual named in the incumbency certificate provided to the Account Trustee by the Agent or the Authority, as applicable, pursuant to this Section 7(o), as any such incumbency certificate may be amended, supplemented or replaced from time to time.
- (p) The Account Trustee shall be entitled to rely on, and act upon, any direction, instruction, notice or other communication provided to it hereunder which is sent to it by facsimile transmission, provided that any such direction, instruction, notice or other communication is signed by an individual named in the incumbency certificate delivered to the Account Trustee by the Agent or the Authority, as applicable, pursuant to Section 7(o).
- (q) The Account Trustee shall retain the right not to act and shall not be liable for refusing to act if, due to a lack of information or for any other reason whatsoever, the Account Trustee, in its sole judgment, determines that such act might cause it to be in non-compliance with any applicable anti-money laundering or anti-terrorist legislation, regulation or guideline. Further, should the Account Trustee, in its sole judgment, determine at any time that its acting under this Insurance Trust Agreement has resulted in its being in non-compliance with any applicable anti-money laundering or anti-terrorist legislation, regulation or guideline, then it shall have the right to resign on 10 days' written notice to Project Co and the Authority, or any shorter period of time as agreed to by Project Co and the Authority, notwithstanding the provisions of Section 7(a) of this Insurance Trust Agreement, provided that (i) the Account Trustee's written notice shall describe the circumstances of such non-compliance; and (ii) if such circumstances are rectified to the Account Trustee's satisfaction within such 10 day period, then such resignation shall not be effective.

8. AGENT AND AUTHORITY RIGHTS TO DIRECT

- (a) Until the termination of the Project Agreement in accordance with the Lenders' Remedies Agreement and receipt by Project Co of any amounts to which it is entitled pursuant to Schedule 9 [Compensation on Termination] to the Project Agreement and all Insurance Proceeds to the extent that the value of such Insurance Proceeds was deducted from the amounts payable to Project Co by the Authority (a "**Change of Authorization Event**"), the Agent shall, subject to Sections 3 and 5 of this Insurance Trust Agreement, have the exclusive right to direct the Account Trustee with respect to the Insurance Trust Account, the Insurance Policies and the Insurance Proceeds.
- (b) Upon the occurrence of a Change of Authorization Event:

- (i) the Agent shall cease to be entitled, and the Authority shall thenceforth be entitled, to direct the Account Trustee with respect to the Insurance Trust Account, the Insurance Policies and the Insurance Proceeds; and
 - (ii) the Agent and the Authority shall jointly provide notice to the Account Trustee (a **"Change of Authorization Notice"**) that the Authority shall, as of the date of such Change of Authorization Event, have the exclusive right to direct the Account Trustee with respect to the Insurance Trust Account, the Insurance Policies and the Insurance Proceeds.
- (c) Notwithstanding the foregoing, no Change of Authorization Event shall occur and no Change of Authorization Notice shall be delivered to the Account Trustee where an Authority Event of Default has occurred. Where an Authority Event of Default has occurred, upon receipt by the Agent and Senior Lenders of all amounts owing by the Authority to the Agent and Senior Lenders under the Lenders' Remedies Agreement, the Account Trustee shall release all amounts in the Insurance Trust Account, the Insurance Policies and the Insurance Proceeds to Project Co or as Project Co may otherwise direct from time to time.

9. TERMINATION

- (a) Subject to the provisions of Section 9(b), this Insurance Trust Agreement shall remain in full force and effect and be binding in accordance with and to the extent of its terms until:
 - (i) the obligations of Project Co to the Agent and the Senior Lenders under the Senior Financing Agreements have been paid and performed in full and the Senior Lenders have no further obligation to make any further advances or other credit accommodations under the Senior Financing Agreements; and
 - (ii) the obligations of Project Co to the Authority have been paid and performed in full.
- (b) The Account Trustee may terminate this Insurance Trust Agreement at any time upon 60 days prior written notice to the other parties hereto, provided that no termination of this Insurance Trust Agreement by the Account Trustee shall be effective until such time as the Agent, the Authority, and Project Co have entered into a replacement Insurance Trust Agreement on the same terms and conditions as this Insurance Trust Agreement with a replacement account trustee satisfactory to the Agent, the Senior Lenders and the Authority.

10. ASSIGNMENT

The Account Trustee shall not assign, transfer or otherwise dispose of any of its rights or obligations under this Insurance Trust Agreement without the prior written consent of the Agent, the Authority and Project Co.

11. AUTHORITY DESIGNATE

At any time and from time to time, the Authority may designate any ministry, branch, agency, division, department or office of the Government of the Northwest Territories to carry out administrative responsibility for the rights and obligations of the Authority under this Insurance Trust Agreement and Project Co, the Account Trustee and Agent may deal exclusively with the designated person in respect of all such matters and each of them is entitled to rely on the actions, directions, requests, notices, consents, approvals, waivers, comments relating to the review of documentation and other administrative matters and decisions determined by such

designated person from time to time, until the Authority has notified Project Co, the Account Trustee and the Agent in writing that such designated person is no longer the person designated by the Authority hereunder and such notice shall have effect on the later of the date of delivery of such notice and the date specified in the written notice. The Authority shall advise Project Co, the Account Trustee and the Agent in writing of any designation hereunder. The rights and obligations of the parties to this Insurance Trust Agreement shall be in no way affected by reason of any such designation. Project Co, the Account Trustee and the Agent acknowledge the right of the Authority to delegate administrative responsibilities hereunder as set forth in this Section 11.

12. NOTICES

or to such other address or electronic mail address as any party may, from time to time, designate in the manner set out above. Any such notice or communication will be considered to have been received:

- (a) if delivered by hand during business hours (and in any event, at or before 3:00 pm local time in the place of receipt) on a Business Day, upon receipt by a responsible representative of the receiver, and if not delivered during business hours, upon the commencement of business hours on the next Business Day; and
- (b) if delivered by electronic mail during business hours (and in any event, at or before 3:00 pm local time in the place of receipt) on a Business Day, upon receipt, and if not delivered during business hours, upon the commencement of business hours on the next Business Day provided that:
 - (i) the receiving party has, by electronic mail or by hand delivery, acknowledged to the notifying party that it has received such notice; or
 - (ii) within 24 hours after sending the notice, the notifying party has also delivered a copy of such notice to the receiving party by hand delivery.

13. AMENDMENTS

This Insurance Trust Agreement may not be varied, amended or supplemented except by an agreement in writing signed by duly authorized representatives of the parties and stating on its face that it is intended to be an amendment, restatement or other modification, as the case may be, to this Insurance Trust Agreement.

14. WAIVER

- (a) No waiver made or given by a party under or in connection with this Insurance Trust Agreement shall be binding or effective unless the waiver is in writing, signed by an

authorized representative of the Party giving such waiver, and delivered by such party to the other parties. No waiver made with respect to any right, power or remedy in one instance will be deemed to be a waiver with respect to any other instance involving the exercise of such right, power, or remedy or with respect to any other right, power, or remedy.

- (b) Failure by any party to exercise any of its rights, powers or remedies hereunder or its delay to do so shall not constitute a waiver of those rights, powers or remedies. The single or partial exercise of a right, power or remedy shall not prevent its subsequent exercise or the exercise of any other right, power or remedy.

15. RELATIONSHIP BETWEEN THE PARTIES

The parties are independent contractors. This Insurance Trust Agreement is not intended to and does not create or establish between the parties any relationship as partners, joint venturers, employer and employee, master and servant, or, except as provided in this Insurance Trust Agreement, of principal and agent.

16. ENTIRE AGREEMENT

Except where provided otherwise in this Insurance Trust Agreement, this Insurance Trust Agreement constitutes the entire agreement between the parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings, whether oral, written, express or implied, concerning the subject matter of this Insurance Trust Agreement.

17. ENUREMENT

This Insurance Trust Agreement shall enure to the benefit of, and be binding on, each of the parties and their respective successors and permitted transferees and assigns.

18. GOVERNING LAW AND ATTORNMENT

- (a) This Insurance Trust Agreement will be deemed to be made pursuant to the laws of the Northwest Territories and the laws of Canada applicable therein and will be governed by and construed in accordance with such laws.
- (b) For the purposes of any legal actions or proceedings brought by any party hereto against the other party, the parties hereby irrevocably submit to the exclusive jurisdiction of the courts of the Northwest Territories and acknowledge their competence and the convenience and propriety of the venue and agree to be bound by any judgment thereof and not to seek, and hereby waive, review of its merits by the courts of any other jurisdiction.

19. FURTHER ASSURANCE

Each party shall do all things, from time to time, and execute all reasonable further documents necessary to give full effect to this Insurance Trust Agreement.

20. LANGUAGE OF AGREEMENT

Each Party acknowledges having requested and being satisfied that this Insurance Trust Agreement and related documents be drawn in English. Chacune des parties reconnaît avoir demandé que ce document et ses annexes soient rédigés en anglais et s'en déclare satisfaite.

21. COUNTERPARTS

This Insurance Trust Agreement may be executed in one or more counterparts. Any single counterpart or a set of counterparts executed, in either case, by all the parties shall constitute a full, original and binding agreement for all purposes. Counterparts may be executed either in original or faxed form provided that any party providing its signature in faxed form shall promptly forward to such party an original signed copy of this Insurance Trust Agreement which was so faxed.

[signature pages to follow]

IN WITNESS WHEREOF the parties have executed this Insurance Trust Agreement as of the date and year first above written.

SCHEDULE 6

CHANGES, MINOR WORKS AND INNOVATION PROPOSALS

1. INTERPRETATION

1.1 Definitions

In this Schedule, in addition to the definitions set out in Schedule 1 of this Agreement:

“Change” means a Facility Change or a Services Change as the context requires;

“Change Certificate” means a certificate issued by the Authority describing and authorizing a Change, the value or method of valuation of the Change, and in the case of a Facility Change occurring prior to the Service Commencement Date the adjustment, if any, to the Project Schedule (including the Target Service Commencement Date);

“Change Directive” means a written instruction which is issued on a form designated as a “Change Directive Form” and signed by the Authority’s Representative directing Project Co to immediately proceed with a Change, pending the finalization and issuance of a Change Certificate for that Change;

“Change Mark-Up” has the meaning set out in Section 2.10 of this Schedule;

“Change Report” means a written report prepared by Project Co in response to a Preliminary Change Instruction, containing the information described in Section 2.6 of this Schedule;

“Change Report Costs” has the meaning set out in Section 2.5(b)(3)(A) of this Schedule;

“Development Change” has the meaning set out in Section 6.1 of this Schedule;

“Development Change Record” has the meaning set out in Section 6.2 of this Schedule;

“Development Change Record Confirmation” has the meaning set out in Section 6.3 of this Schedule;

“Development Change Register” has the meaning set out in Section 6.6 of this Schedule;

“Facility Change” means a change, including an addition, deletion, alteration, substitution or otherwise, to Project Co’s Design, Construction or Initial Remediation Work obligations under this Agreement, or a Renovation;

“Innovation Proposal” has the meaning set out in Section 4.1 of this Schedule;

“Minor Works” means a Change that is requested by the Authority at any time after the Service Commencement Date with a value that does not exceed ██████████, Index Linked, unless otherwise agreed by the Authority;

“Minor Works Rates” has the meaning set out in Section 3.1 of this Schedule;

“Net Change Value” has the meaning set out in Section 2.9 of this Schedule;

Schedule 6 - Changes, Minor Works and Innovation Proposals
Stanton Territorial Hospital Project Agreement – Execution Version

“**Preliminary Change Instruction**” has the meaning set out in Section 2.3 of this Schedule;

“**Preliminary Estimate**” has the meaning set out in Section 2.5(b)(1) of this Schedule; and

“**Services Change**” means a change, including an addition, deletion, alteration, substitution or otherwise, to Project Co’s Services obligations under this Agreement.

2. CHANGES

2.1 Changes Required by Authority

The Authority may at any time during the Term, without invalidating this Agreement, require Changes in accordance with this Schedule 6. Except to the extent that a Change Certificate expressly requires otherwise, Project Co will implement a Change in accordance with all the terms of this Agreement, including Schedule 2 [Design and Construction Protocols], Schedule 3 [Design and Construction and Specifications] and Schedule 4 [Service Protocols and Specifications].

2.2 No Entitlement to Perform a Change

Without prejudice to Project Co’s rights under this Agreement, including Section 8.3 (Project Co’s Entitlements Upon Occurrence of a Compensation Event), the Authority may at any time after giving notice to Project Co, perform, or engage any person to perform, any work on the Lands or the Existing Hospital Lands or in the Existing Hospital or the Facility that is not included in Project Co’s obligations under this Agreement. None of Project Co, the Project Contractors or the Sub-Contractors will have any right or entitlement to perform any such work. Project Co may submit a proposal to the Authority for the performance of such work, but nothing in this Agreement will obligate the Authority to consider or accept such proposal.

2.3 Preliminary Change Instruction

The Authority may at any time during the Term issue to Project Co an instruction (a “**Preliminary Change Instruction**”) describing a potential Facility Change or Services Change that the Authority is considering. A Preliminary Change Instruction will include sufficient description of the contemplated Change, including any requirements under Section 2.12(b) of this Schedule to permit Project Co to prepare a Change Report.

2.4 Restrictions on Changes

The Authority will not at any time during the Term require, and Project Co may refuse to implement, a Change (including Minor Works):

- (a) which would be contrary to Law;
- (b) which would render the insurance policies required under this Agreement void or voidable and the Authority does not agree to provide replacement security satisfactory to Project Co acting reasonably;

- (c) which would cause the revocation of any Permit required by Project Co to perform its obligations under this Agreement, and such Permit would not, using reasonable efforts, be capable of amendment or renewal;
- (d) which would require a new Permit for Project Co to perform its obligations under this Agreement, which Permit would not, using reasonable efforts by Project Co or the Authority, as applicable, be obtainable;
- (e) which would cause Project Co to be unable to obtain a Permit required by Project Co to perform its obligations under this Agreement, provided that such Permit was previously required but at the time of the Preliminary Change Instruction had not been obtained and such Permit would not, using reasonable efforts by Project Co or the Authority, as applicable, be obtainable;
- (f) which would:
 - (1) in combination with prior Changes (or Minor Works), have an aggregate value equal to or greater than █████ of the total capital cost of the Project; and
 - (2) materially and adversely affect the risk allocation and payment regime under this Agreement with respect to Design, Construction, Initial Remediation Work or Services; or
- (g) for which:
 - (1) Project Co has used commercially reasonable efforts to obtain financing;
 - (2) Project Co has been unable to obtain financing on terms acceptable to Project Co and the Authority, each acting reasonably; and
 - (3) the Authority has indicated that it will not provide funding in advance of the execution of the Change.

If Project Co, acting reasonably, determines that a Change is unacceptable because it contravenes one or more of the above, then Project Co will promptly give notice to the Authority of its objection, with written reasons. If the Authority disagrees then it may deliver a Dispute Notice to Project Co, and the parties will cooperate to have the issue resolved in a timely manner pursuant to the Dispute Resolution Procedure.

2.5 Delivery of Change Report

Subject to Section 2.4 of this Schedule:

- (a) as soon as practicable and in any event, to the extent reasonably possible, within 15 Business Days after receipt of a Preliminary Change Instruction, or such other period as the parties agree acting reasonably, Project Co will at its cost prepare and deliver to the Authority a Change Report, signed by Project Co's Representative, for the contemplated Change described in the Preliminary Change Instruction; or

- (b) notwithstanding Section 2.5(a) of this Schedule if the Net Change Value of the contemplated Change (comprised of a Facility Change or a Services Change or both) is likely to be more than ██████████, Index Linked, then:
- (1) Project Co may, at its election within 5 Business Days after receipt of the Preliminary Change Instruction for such contemplated Change give notice to the Authority that it intends to first prepare and deliver a preliminary estimate (the “**Preliminary Estimate**”) of the net cost of the contemplated Change;
 - (2) if Project Co has given notice as described in Section 2.5(b)(1) then within 10 Business Days after provision of such notice Project Co will at its cost prepare and deliver to the Authority an order of magnitude estimate of the net cost of the contemplated Change, and the Authority may give notice to Project Co to proceed with Section 2.5(b)(3), or alternatively, to proceed with the preparation of the Change Report for the contemplated Change and Project Co will prepare and deliver the Change Report as soon as practicable and in any event, to the extent reasonably possible, within 15 Business Days after receipt of such notice, or such longer period as the parties agree acting reasonably;
 - (3) if the Authority has given notice as described in Section 2.5(b)(2) to proceed with this Section then within 10 Business Days after receipt of such notice Project Co will at its cost prepare and deliver to the Authority:
 - (A) a reasonable estimate of costs if any (the “**Change Report Costs**”) that Project Co would incur to retain third parties (such as design consultants and construction managers) that Project Co would require to prepare the Change Report, including any incremental costs incurred under management service contracts held by Project Co, but excluding the costs of Project Co’s own staff and employees, and the staff and employees of a Project Contractor, or any of their Affiliates who are normally part of the general management, administration, and supervision of the Design, Construction or Services; and
 - (B) a Preliminary Estimate of the contemplated Change, in sufficient detail and accuracy to permit the Authority to make an informed decision as to whether to proceed with the contemplated Change, including as appropriate:
 - (i) preliminary cost estimates of the main elements of the contemplated Change;
 - (ii) a preliminary implementation schedule and work plan for the implementation of the contemplated Change; and

- (iii) a description of the impact of the contemplated Change on the Facility and/or the Existing Hospital (if applicable) during implementation or in the use of the Facility; and
- (4) the Authority may within 10 Business Days following receipt of the Preliminary Estimate, or at any time if Project Co fails to comply with the time requirements set out in this Section 2.5(b), give notice to Project Co to proceed with the preparation of the Change Report for the contemplated Change and Project Co will prepare and deliver the Change Report as soon as practicable and in any event, to the extent reasonably possible, within 15 Business Days after receipt of such notice, or such longer period as the parties agree acting reasonably.

If Project Co prepares a Change Report pursuant to Section 2.5(b)(4) of this Schedule, and the Authority elects not to proceed with the contemplated Change, then the Authority will pay Project Co's substantiated Change Report Costs.

2.6 Change Report Contents

A Change Report will include:

- (a) if and to the extent a contemplated Change is a Facility Change:
 - (1) a description of the scope of the contemplated Change with respect to Design, Construction and Initial Remediation Work;
 - (2) a comparison of the scope of Design, Construction and Initial Remediation Work as a result of the contemplated Change as compared to the scope prior to the Change;
 - (3) subject to Section 2.11 of this Schedule, a description of any adjustments to the Project Schedule, including the Target Service Commencement Date, which Project Co will require as a result of the implementation of the contemplated Change (including details of any corresponding adjustments required by any Project Contractor or any Sub-Contractors) and any compensation required under Section 2.9(d) of this Schedule; and
 - (4) a description of any impact of the contemplated Change on the performance of the Services;
- (b) if and to the extent a contemplated Change is a Services Change:
 - (1) a description of the scope of the contemplated Change with respect to Services; and
 - (2) a comparison of the scope of Services as a result of the contemplated Change as compared to the scope prior to the Change; and

- (c) for all contemplated Changes (in addition to the requirements of Section 2.6(a) or 2.6(b) of this Schedule, as applicable):
- (1) an estimate of all costs, if any, reasonably necessary for and directly associated with the contemplated Change, including the following (which will be shown separately if requested by the Authority), as applicable:
 - (A) all Design costs (based on the estimated number of hours reasonably required to perform any additional Design);
 - (B) all Construction and Initial Remediation Work labour, material and equipment costs, supported as the case may be by quotations from the applicable Project Contractor and Sub-Contractors;
 - (C) all Services labour, material and equipment costs, supported as the case may be by quotations from the applicable Project Contractor and Sub-Contractors;
 - (D) all additional costs of site management, including supervision of trade foremen, site overheads and site establishment including, without duplication, any costs related to Project Co's management and oversight of the Project that should reasonably be included in the contemplated Change;
 - (E) all costs of relevant Permits, including an amendment or renewal of a Permit, a new Permit or a Permit that is in the course of being obtained;
 - (F) all costs associated with services provided by professional advisors;
 - (G) all financing costs;
 - (H) if and to the extent a contemplated Change is a Facility Change that also materially affects the cost of the Services, all changes to the cost of the Services;
 - (I) if and to the extent a contemplated Change is a Services Change that requires a material change to the Facility, all changes to the cost of the Facility; and
 - (J) if and to the extent a contemplated Change has an impact adverse to Project Co in respect of the Design and Construction Energy Target, costs associated with such adverse impact unless and to the extent the Change itself provides for relief from such impact through an adjustment to the target;
 - (2) an estimate of the cost savings, if any, resulting from the contemplated Change;

- (3) any proposal(s) as to how the contemplated Change could be accomplished at no net cost;
- (4) a description of any changes to the Senior Financing Agreements that would be required to reflect a change in the risk profile of the Project arising from the contemplated Change;
- (5) a description of any changes to the Service Payments that are required to reflect the costs and cost savings referred to in Sections 2.6(c)(1) and 2.6(c)(2) above;
- (6) identification of any amounts payable by the Authority to Project Co, if any, other than the Service Payments;
- (7) Project Co's proposal as to how any increased costs to Project Co resulting from the contemplated Change might be funded;
- (8) the value of the loss or reduction of benefits resulting from the contemplated Change;
- (9) a description of any additional consents or approvals required, including amendments, if any, of any Permits required to implement the contemplated Change;
- (10) a description of any impact on the obligations of Project Co under any Material Contracts;
- (11) a description of the extent to which the contemplated Change would interfere with Project Co's ability to comply with any of its obligations under this Agreement, the Material Contracts, any Sub-Contracts and any Permits;
- (12) the name of the Sub-Contractor(s) (if any) which Project Co intends to engage for the purposes of implementing the contemplated Change together with a description of the qualifications of any such Sub-Contractor(s) so as to demonstrate the ability of such Sub-Contractor(s) to implement the contemplated Change;
- (13) a description of any further effects (including benefits and impairments) which, Project Co foresees as being likely to result from the contemplated Change;
- (14) a description of any actions that would be reasonably required by the Authority to implement the contemplated Change;
- (15) a description of the steps Project Co will take to implement the contemplated Change, in such detail as is reasonable and appropriate in all the circumstances; and

- (16) a description of any impact on expected usage of utilities for the current Contract Year and subsequent Contract Years.

The cost of the correction of a Defect or Deficiency will not be included in the valuation of a Change.

All of the costs described in this Section 2.6 will be provided in current applicable dollar amounts. If a Change is implemented based on such cost estimates, equivalent dollar amounts as at the Base Date will be calculated for the purposes of indexation.

2.7 Justification and Supporting Documentation for Contemplated Change Estimates

The cost estimates included in a Change Report will be in sufficient detail to allow evaluation by the Authority and will include such supporting information and justification as is necessary to demonstrate that:

- (a) Project Co has used all reasonable efforts, including utilizing competitive quotes or tenders, to minimize the cost of a contemplated Change and maximize potential related cost savings;
- (b) Project Co and its Project Contractors and Sub-Contractors have valued the Change as described in Section 2.8 of this Schedule, and have not included other margins or mark-ups;
- (c) the full amount of any and all expenditures that have been reduced or avoided (including any Capital Expenditure) have been fully taken into account; and
- (d) Project Co has mitigated or will mitigate the impact of the contemplated Change, including on the Project Schedule, the performance of the Services, the expected usage of utilities, and the direct costs to be incurred.

2.8 Valuation of and Payment for Changes

The value and method of valuation of a Change will be as agreed by the parties and failing agreement will be the net cost (or saving) of implementing the Change, calculated in accordance with Section 2.9(a) of this Schedule (and for greater certainty a Change may have a net cost, or a net saving, or may result in no net cost or saving), and:

- (a) if a Change has a net cost (a positive Net Change Value), the Authority will pay Project Co the Net Change Value plus the Change Mark-Up and any amounts due under Section 2.9(d) of this Schedule; and
- (b) if a Change has a net cost savings (a negative Net Change Value), then Project Co will pay the Authority the Net Change Value.

2.9 Net Change Value

- (a) The value of a Change (the “**Net Change Value**”) is the aggregate of the direct incremental costs (minus the aggregate cost savings) reasonably incurred to implement the Change, supported by invoices, purchase orders, time sheets and other customary industry documentation, as follows:
- (1) Design: the direct incremental costs (or cost savings) of any Design incurred (or saved) by the entity that retains the design personnel, based on the additional (or decreased) number of design consultant’s hours required to undertake the Change;
 - (2) Construction Labour: the direct incremental costs incurred (or cost savings) by the entity that engages the construction labour, based on the additional (or decreased) number of labour and direct labour-supervision hours required to undertake the Change (including allowance for all payroll burdens such as overtime premiums (when paid), vacation pay, pensions, statutory payments, workers’ compensation insurance, union dues, tool money, medical insurance, and any other payments directly paid in the ordinary course, and including any severance and termination costs directly resulting from the Change);
 - (3) Materials and Equipment: the direct incremental costs incurred (or cost savings) by the entity that procures the materials, consumables and equipment, for the supply and delivery of such materials, consumables and equipment (including the cost of any associated testing, commissioning, spare parts, manuals and software, and including any related design and engineering), except that any changes to the Authority’s cost of purchasing Equipment will not be included in the calculation of Net Change Value;
 - (4) Procurement Cost: the direct incremental costs incurred (or cost savings) by the procuring entity to obtain and evaluate tenders and award a contract for work required for the Change that is to be tendered under Section 2.9(c) or Section 2.12(b) of this Schedule, and the supervision and management of such contract;
 - (5) Services: the direct incremental costs incurred (or cost savings) by the entity that retains the Services personnel, based on the number of personnel hours required to undertake the Change; and
 - (6) Miscellaneous: all other additional direct costs (or cost savings) pertaining to the Change, including wastage, disposal, insurance, bonding, financing and Permits calculated at the direct cost to the entity that directly incurs such costs;

all without addition of any mark-ups except as otherwise expressly provided for in this Section 2;

- (b) the rates and charges applied in Section 2.9(a) above will be no greater than the market rates, prevailing at the time of the implementation of the Change, paid between arm's length contracting parties;
- (c) unless otherwise agreed by the Authority, Project Co will obtain competitive quotations or tenders for all work, equipment and materials required to implement a Change;
- (d) subject to Section 2.11 of this Schedule, if a Change causes a delay in the Target Service Commencement Date and if Project Co is entitled to an equitable adjustment of the Project Schedule (including the Target Service Commencement Date) as a result of a Change, the cost of the Change will include an amount calculated on the basis that Project Co will be placed in no better or worse position than it would have been in had the Change and the delay in the Target Service Commencement Date not occurred and taking into consideration the following (without duplication):
 - (1) any net increase or decrease in the costs of Project Co performing its obligations under this Agreement resulting solely from the Change and the delay, including any increased financing costs caused by a reduction in the amortization schedule for the Senior Debt;
 - (2) the Service Payments that would have otherwise been payable to Project Co; and
 - (3) no amount will be payable for Avoidable Costs or Indirect Losses.

For greater certainty, Project Co will not be entitled to any amount under this Section if the Change does not cause a delay in the Target Service Commencement Date, including in circumstances where Project Co has updated the Target Service Commencement Date without obtaining the Authority's consent where required by Section 10.2 of Schedule 2 [Design and Construction Protocols]; and

- (e) no amount will be payable to Senior Lenders in connection with the consent to any Change unless consent is required under the Senior Financing Agreements and the amount payable is reasonable.

2.10 Mark-Up on Changes

If a Change has a positive Net Change Value, the Authority will pay a mark-up on the Net Change Value determined in accordance with this Section 2 (the "**Change Mark-Up**") to cover all indirect, head office and other costs and profit:

- (a) if the Net Change Value is less than or equal to [REDACTED] (and is not Minor Works), the Change Mark-Up will be [REDACTED] of the Net Change Value;
- (b) if the Net Change Value is more than [REDACTED] and less than or equal to [REDACTED], the Change Mark-Up will be [REDACTED] of the Net Change Value; or

- (c) if the Net Change Value is more than ██████████, the Change Mark-Up will be ██████ of the Net Change Value.

2.11 Effect on the Project Schedule or Delays to Services

Project Co will use all reasonable efforts, as described in Section 2.9 of this Agreement (General Duty of Project Co to Mitigate), to minimize the effect of a Change on the Project Schedule (including the Target Service Commencement Date) and the performance of the Services and subject to the foregoing, Project Co will be entitled to an equitable adjustment of the Project Schedule (including the Target Service Commencement Date) and the requirements for performance of the Services as a result of the Change. Without limiting the generality of the foregoing, the implementation of a Change, to the extent Project Co has identified the effect on the Services and such effect has been documented in a Change Certificate, but without duplication of relief that may be provided in a Change Certificate, will constitute an Excusing Event.

2.12 Agreement on a Change

Following receipt by the Authority of a Change Report prepared in accordance with Section 2.6 of this Schedule:

- (a) as soon as practicable, and in any event within 15 Business Days after the Authority receives a Change Report, or such longer period as the parties agree acting reasonably, the Authority will deliver to Project Co any requests for clarifications or amendments, and the parties' Representatives will meet and use all reasonable efforts to agree to the Change Report, including the costs, payments (including payment of direct costs and adjustments to Service Payments, if any) and other information contained in the Change Report;
- (b) if the Authority is required by applicable Law or Governmental Authority to require Project Co to competitively tender any contract in relation to a contemplated Change, Project Co will seek and evaluate competitive tenders for the proposed Change;
- (c) the Authority may in writing modify a Preliminary Change Instruction at any time prior to the parties reaching an agreement on the Change Report for any matter relating to the Change Report or arising from the discussions in relation thereto, in which case Project Co will, as soon as practicable and in any event not more than 10 Business Days after receipt of such modification (or such longer period as the parties may agree acting reasonably), notify the Authority of any consequential changes to the Change Report.

2.13 Change Certificate

A Change will come into effect by the Authority issuing to Project Co a Change Certificate signed by the Authority's Representative. If the parties have agreed on the Change Report without amendment, it is sufficient for the Change Certificate to be signed by the Authority's Representative. Subject to Section 2.14, if the Change Report requires amendment the Change Certificate comes into effect when signed by the Authority's Representative and Project Co's Representative. Subject to Section 2.16,

Project Co will not proceed with a Change prior to receiving a signed Change Certificate from the Authority. A Change Certificate issued in accordance with this Section 2.13 will be binding upon the Authority and Project Co. Subject to Section 2.4 and Section 2.14(b) of this Schedule, upon receipt of a Change Certificate Project Co will implement the Change, without prejudice to Project Co's right to refer any question of valuation of the Change to the Dispute Resolution Procedure.

2.14 Disagreement on Change Report

If the parties do not agree on a Change Report, then the Authority may:

- (a) except in connection with a Change required pursuant to Section 2.15 of this Schedule, elect not to proceed with the Change described in the Preliminary Change Instruction; or
- (b) issue a Change Certificate to Project Co stating the Authority's determination of the matters referred to in the Change Report, and if Project Co disagrees with all or any of the determinations set out in the Change Certificate, then Project Co may deliver to the Authority a Dispute Notice, and Project Co will, without prejudice to its rights with respect to such Dispute, use all reasonable efforts to implement the Change as directed in the Change Certificate.

The Change Certificate referred to in Section 2.14(b) is effective when signed by the Authority's Representative alone.

2.15 Changes in Other Circumstances

The Authority will issue a Preliminary Change Instruction in respect of:

- (a) an Authority decision regarding Facility reinstatement pursuant to Section 6.4(b) (Project Co's Obligations - Material Damage or Destruction); and
- (b) a deemed Change pursuant to Section 8.8(a) (Parties' Entitlements Upon Occurrence of a Change in Law).

2.16 Change Directive

Subject to Section 2.4 of this Schedule but notwithstanding any other provision of this Schedule, the Authority may at any time issue a Change Directive to Project Co, signed by the Authority's Representative, directing Project Co to proceed with a contemplated Change in which case the following will apply:

- (a) Project Co will proceed with the Change and the valuation and the time extensions and payment of any adjustments will be made as soon as reasonably possible after the implementation thereof in the same manner as a Change for which a Preliminary Change Instruction, Change Report and Change Certificate would be issued hereunder;
- (b) if Project Co has not previously done so, Project Co will within 20 Business Days after the issuance of the Change Directive provide a Change Report in accordance with the

requirements of this Schedule for a Change Report and Section 2.12(a) of this Schedule will apply;

- (c) pending a final determination as to any time extensions or valuation and payment of any adjustments for a Change or any other matters in the Change Report delivered by Project Co pursuant to Section 2.16(b) of this Schedule, the Authority will pay Project Co amounts reasonably demonstrated by Project Co in writing from time to time to be payable for the Change, including reimbursement of amounts that Project Co reasonably incurs with respect to the Change. The Authority will fund all Changes implemented by way of a Change Directive as provided for in Section 5.2 of this Schedule; and
- (d) if the parties agree on the Change Report, the Authority will issue a signed Change Certificate stating the Parties' agreed determination of the matters referred to in the Change Report. If the parties do not agree on a Change Report, then the Authority will issue a signed Change Certificate stating the Authority's determination of the matters referred to in the Change Report. If Project Co disagrees with all or any of the determinations set out in the Change Certificate, then Project Co may deliver to the Authority a Dispute Notice, and Project Co will, without prejudice to its rights with respect to such Dispute, continue to implement the Change as directed in the Change Directive.

The Authority may issue a Change Directive at any time in its discretion, including in the absence of a Preliminary Change Instruction, at any time following issuance of a Preliminary Change Instruction, if Project Co fails to provide a Change Report, if a Change Report or Change Certificate is not promptly agreed upon by the parties, or if there is a Dispute in relation to a Preliminary Change Instruction, Change Report or Change Certificate (including a Dispute as to whether there is a Change), but not if there is a Dispute as to whether Project Co is entitled to refuse to implement the Change under Section 2.4 of this Schedule.

2.17 Modification of Processes and Procedures

Nothing in this Schedule shall limit the ability of the parties to mutually, in writing, modify, simplify or waive some or all of the processes and procedures outlined in this Schedule in respect of Changes.

3. MINOR WORKS

3.1 Minor Works Rates

Rates for Minor Works will be established and applied as follows:

- (a) Not less than 45 Business Days before the anticipated Service Commencement Date, and not less than 20 Business Days before the commencement of each subsequent Contract Year, Project Co will submit to the Authority for review and approval by the Authority any amendments to the table of categories and hourly rates set out in Section 3.1(b) (the "**Minor Works Rates**") to be applied in respect of any request by the Authority for Minor Works to be completed during the next occurring Contract Year.

- (b) For reference purposes, the Minor Works Rates that would apply to the first Contract Year (if Minor Works Rates were to apply in that Contract Year), would be as follows:

Categories	Minor Works Rates
Internal Labour Category:	
Project Manager	██████
Operating Engineer	██████
External Labour Category:	
Electrician	██████
Plumber	██████
Painter	██████
Flooring Installation Technician	██████
Drywall Technician	██████
Controls Technician	██████
IT Technician	██████
Sprinkler Technician	██████
Carpenter	██████
Millworker	██████
Refrigeration Technician	██████
Windows/Doors/Hardware/Locksmith	██████

The Authority, acting reasonably, may identify amendments to the categories that may be required for Minor Works in the next applicable Contract Year. For greater certainty, the categories will apply to the Project Contractors and Sub-Contractors unless otherwise agreed by the Authority, and some of the above may be employees of a Project Contractor.

- (c) The Minor Works Rates will be based on the actual hourly cost that will be paid to the individual (including allowance for all payroll burdens such as overtime premiums (when paid), vacation pay, pensions, statutory payments, workers' compensation insurance, union dues, tool money, medical insurance, and any other payments directly paid in the ordinary course), and will include a mark up of ██████ to cover Project Co's head office

overhead and profit, except that the Minor Works Rates will not be greater than the prevailing market rates paid by arm's length contracting parties.

- (d) If the parties are unable to agree on the categories and Minor Works Rates as required under Section 3.1(a) of this Schedule then the cost of Minor Works will be valued as described in Section 3.5 of this Schedule.

3.2 Direction for Minor Works

The Authority may at any time following the Service Commencement Date require Project Co to perform Minor Works as follows:

- (a) within 10 Business Days of a request in writing for Minor Works, Project Co will at its own cost prepare and deliver to the Authority a written price estimate covering the full scope of the requested Minor Works, based on the applicable Minor Works Rates or, if and to the extent the Minor Works Rates are not applicable, at cost plus ■■■;
- (b) a Preliminary Change Instruction and a Change Report will not be required for Minor Works;
- (c) upon further written direction from the Authority, Project Co will in a timely manner carry out the Minor Works; and
- (d) the completed Minor Works will be a part of the completed Facility and accordingly, as required by this Agreement, and without further payment, except for an appropriate adjustment to the Service Payment to reflect the effect, if any, on the cost of the Services or the Life Cycle Requirements, Project Co will be responsible for any Defect or Deficiency, and for all Services and Life Cycle Requirements related to the completed Minor Works.

Project Co will not be entitled to charge the Authority for preparing a written price quote in accordance with Section 3.2(a) above.

3.3 Project Co to Minimize Inconvenience

Prior to commencing any Minor Works, Project Co will notify the Authority of the estimated duration of the Minor Works so that the Authority and Project Co can agree upon a convenient time for carrying out the Minor Works in a manner that minimizes and mitigates inconvenience and disruption to the use of the Facility and the Existing Hospital (if applicable). Project Co will use all reasonable efforts to minimize the duration of any Minor Works, and will schedule Minor Works as reasonably requested by the Authority, including doing works outside normal operating hours.

3.4 Payment for Minor Works

Project Co will as of the end of a calendar month invoice the Authority monthly for Minor Works completed in the calendar month, supported by appropriate invoices and work records, and the Authority will pay

Project Co by the later of the 20th day of the next calendar month, or 30 calendar days following receipt of the invoice, for Minor Works performed in the previous calendar month.

3.5 Minor Works Disputes

Any Dispute arising in connection with Minor Works, including the price to be paid for Minor Works and the annual determination of the Minor Works Rates, will be resolved in accordance with the Dispute Resolution Procedure.

4. INNOVATION PROPOSALS

4.1 Innovation and Value Engineering

Project Co may at any time during the Operating Period submit a proposal to the Authority (an “**Innovation Proposal**”) to implement modifications to the Facility and the Services, including through innovation or value engineering, for the purpose of achieving efficiencies and reducing the Service Payments or the overall cost to the Authority of the Facility and the Services or the Authority’s overall energy costs (including costs of energy related measures such as carbon taxes). Project Co must demonstrate to the Authority’s satisfaction that an Innovation Proposal:

- (a) is originated and initiated solely by Project Co (including by Project Co bearing all research and development costs) without the involvement of the Authority or its consultants; and
- (b) offers savings, innovation or efficiency that is not otherwise called for or provided by this Agreement.

4.2 Content of Innovation Proposal

An Innovation Proposal will:

- (a) set out all the information required in a Change Report as required under Section 2.6 of this Schedule, modified to apply to an Innovation Proposal;
- (b) specify Project Co’s reasons and justification for proposing the Innovation Proposal;
- (c) request the Authority to consult with Project Co with a view to the Authority deciding whether to agree to the Innovation Proposal and, if so, what consequential changes the Authority may require;
- (d) indicate any implications of the Innovation Proposal, including a difference between the existing and the proposed requirements of this Agreement, and the comparative advantages of each to Project Co and the Authority;
- (e) indicate whether a payment by the Authority in respect of direct costs or a variation to the Service Payments is proposed and, if so, give a detailed estimate of such proposed payment or variation;

- (f) indicate if there are any dates by which a decision by the Authority must be made; and
- (g) include such other information and documentation as may be reasonably requested by the Authority to fully evaluate and consider the Innovation Proposal.

4.3 Costs of Developing Innovation Proposal

Project Co may deliver to the Authority preliminary information with respect to a proposed Innovation Proposal, but unless the Authority, in its discretion, agrees to pay or share the costs of developing an Innovation Proposal, the costs of investigating a potential Innovation Proposal will be borne entirely by Project Co.

4.4 Evaluation of Innovation Proposal

The Authority will evaluate and give consideration to an Innovation Proposal taking into account all relevant issues, including whether:

- (a) a change in the Service Payments will occur;
- (b) the Innovation Proposal affects the quality or delivery of the Facility or the Services;
- (c) the Innovation Proposal lowers the Authority's overall energy costs (including costs of energy related measures such as carbon taxes);
- (d) the Innovation Proposal will interfere with the relationship of the Authority with any third parties;
- (e) the financial strength of Project Co is sufficient to deliver the changed Facility or changed Services, as applicable;
- (f) the residual value of the Facility is affected; and
- (g) the Innovation Proposal materially affects the risks or costs to which the Authority is exposed,

and any other matter the Authority considers relevant. The Authority may request clarification or additional information regarding the Innovation Proposal, and may request modifications to the Innovation Proposal.

4.5 Acceptance and Implementation of Innovation Proposal

Notwithstanding any potential cost savings of an Innovation Proposal, the Authority is under no obligation to accept an Innovation Proposal and may in its discretion elect not to implement an Innovation Proposal. An Innovation Proposal that is accepted by the Authority will be implemented as a Change and Project Co will not implement an Innovation Proposal prior to the issuance of a Change Certificate.

4.6 Sharing Benefits of an Innovation Proposal

If the Innovation Proposal causes or will cause the costs of Project Co or of a Project Contractor or Sub-Contractor to decrease, after taking into account the agreed implementation and reasonably allocated development costs (incurred by Project Co, a Project Contractor or a Sub-Contractor) of the Innovation Proposal (taking into account any other uses of the Innovation Proposal by Project Co), the net savings in the costs of Project Co and such Project Contractor or Sub-Contractor will be shared equally by Project Co and the Authority, and the Authority's share of the net savings will be reflected in a reduction of the Service Payments.

5. RESPONSIBILITY AND PAYMENT FOR CHANGES

5.1 Responsibility for Changes, Minor Works and Innovation Proposals

Except as specifically provided in this Agreement, the Authority will bear no risk or liability whatsoever arising from any Change, Minor Works or Innovation Proposal other than the liability to make payment in connection therewith. Notwithstanding the previous sentence, the Authority will pay to Project Co increased costs or any Direct Losses suffered by Project Co as a result of any particular design, materials, goods, workmanship or method of construction which the Authority specifies must be incorporated in a Change and which is subsequently shown to be defective (other than as a result of the default or negligence of Project Co or any Project Co Person), if:

- (a) Project Co objected in writing to the incorporation of such item prior to the issue of the relevant Change Certificate; and
- (b) such objection was rejected by the Authority.

5.2 Service Payments in Respect of Changes, Minor Works and Innovation Proposals

Payments between the parties and any adjustments to Service Payments in respect of Changes, Minor Works and Innovation Proposals will be made in accordance with any agreed basis for payment set out in the Change Certificate. The basis for payment may at the Authority's discretion include progress draws, milestone payments, lump sum payments, time and materials or maximum amounts. If no basis for payment is included in the Change Certificate, payment will be made in accordance with Section 10 (Lump Sum Payments and Service Payment Adjustments) of this Agreement.

If payments between the parties in respect of Changes, Minor Works and Innovation Proposals include an adjustment to payments (if any) during the Construction Period, Service Payments or otherwise require an update to the Financial Model, Project Co will expeditiously update and will provide such updated Financial Model to the Authority, all in accordance with Section 10 (Lump Sum Payments and Service Payment Adjustments) of this Agreement. The Authority may in its sole discretion waive or defer the requirements for Project Co to make such updates to the Financial Model in respect of Changes, Minor Works and Innovation Proposals. The updates to the Financial Model will be shown as of the relevant current date and, as applicable, the Base Date.

5.3 Consequential Amendments to Appendix 8A

If the Change, Minor Works or Innovation Proposal affects any of the contents of Appendix 8A [Functional Units, Unit Deduction Amounts, Rectification Periods], the parties will in accordance with Section 6 of Schedule 8 [Payments] review and adjust Appendix 8A [Functional Units, Unit Deduction Amounts, Rectification Periods].

6. ALTERNATE CHANGE PROCESS DURING DESIGN

6.1 Development Changes

The parties may during the Design process agree to utilize an alternate procedure for agreeing on and tracking Changes that:

- (a) on an individual basis, are less than ████████ in value, including “no cost” Changes;
- (b) on a cumulative basis over the course of the Construction Period, are less than ████████ in value;
- (c) do not result in a change in the Target Service Commencement Date;
- (d) do not result in a change to the Financial Model; and
- (e) would not fall within the scope of Section 2.4 of this Schedule.

In such cases the parties may, on an individual Change basis, agree to utilize the process set out in this Section 6 rather than the process set out in Section 2 of this Schedule (“**Development Changes**”).

6.2 Alternate Process

Where a party identifies a potential Development Change, that party may present the potential Development Change to the other party in a form, and with such supporting information, as it considers to be appropriate to the nature and complexity of the potential Development Change.

Where a party presents a potential Development Change, the parties’ respective Design and Construction Representatives will meet as soon as practicable to discuss the proposed Development Change and where:

- (a) the proposed Development Change meets the requirements of Section 6.1 of this Schedule; and
- (b) the parties reach agreement with respect to the value of the proposed Development Change and any contractual amendments required to implement the proposed Development Change,

Project Co will record the terms of the parties’ agreement with respect to the applicable Development Change (a “**Development Change Record**”).

Promptly after preparing a Development Change Record, and in any event prior to implementation of the agreed Development Change, Project Co will deliver a copy of the Development Change Record to the Authority's Design and Construction Representative.

6.3 Opportunity to Object

If, within 5 Business Days after receipt of a Development Change Record, the Authority's Design and Construction Representative objects in writing to the Development Change Record on the basis that it is not an accurate representation of the parties' agreement, the parties will meet to discuss the Development Change and attempt to resolve the objection.

If an objection cannot be resolved, then the proposed Change will be deemed not to be a Development Change and will not be implemented by the parties; provided that either the Authority or Project Co will be permitted to pursue such Development Change in accordance with the Change process in accordance with this Schedule.

If an objection is resolved, then following such resolution, the parties will record the terms of the Development Change (the "**Development Change Record Confirmation**"), and such Development Change Record Confirmation will be signed on behalf of the parties.

6.4 Design and Construction Representatives

The Authority's Design and Construction Representative and Project Co's Design and Construction Representative will have authority to agree on the value of Development Changes and contractual amendments to implement such Development Changes.

6.5 Implementation

Where there is no objection to a proposed Development Change within the 5 Business Day period specified in Section 6.3 of this Schedule, the Development Change Record will become the Development Change Record Confirmation. Following the issue of a Development Change Record Confirmation, the parties will promptly proceed with implementation of the applicable Development Change on the terms set out in the applicable Development Change Record Confirmation.

6.6 Reconciliation

No later than the 10th day of each month, Project Co's Design and Construction Representative will prepare and deliver to the Authority's Design and Construction Representative a register of all Development Changes agreed during the prior month (the "**Development Change Register**").

6.7 Development Change Register

Within 30 days after the issuance of the [REDACTED] construction documents pursuant to Section 5.3(b)(3) (Design Process) of Schedule 2 [Design and Construction Protocols], the Authority will prepare and deliver to Project Co a consolidated Change Certificate encompassing all of the agreed Development

Changes, as set out in the applicable Development Change Registers.

6.8 No Dispute

The parties agree that a failure to reach agreement with respect to a proposed Development Change pursuant to the procedure set out in this Section 6 shall not constitute a Dispute, and shall not be referred for resolution to the Dispute Resolution Procedure.

APPENDIX 7A DESCRIPTION OF LANDS AND ENCUMBRANCES

SCHEDULE 7

LANDS

1. DEFINITIONS

In this Schedule, in addition to terms defined in Schedule 1 of this Agreement:

“Charge” means any charge, mortgage, lien, pledge, judgment, execution, security interest, restriction, claim or encumbrance of any nature whatsoever, including any claims of the Workers’ Safety and Compensation Commission, Canada Revenue Agency, Employment Standards Office or other Governmental Authority;

“Encumbrances” means those Charges against title to the Lands and the Existing Hospital Lands described in the land title searches attached as Appendix 7A [Description of Lands and Encumbrances] and any additional Charges against the Lands and the Existing Hospital Lands permitted under this Schedule;

“Existing Hospital Lands” means those certain lands, the boundary of which is indicated on the preliminary sketch plan attached in Appendix 7A (which boundary may be subject to minor adjustments to be agreed upon by the Parties, acting reasonably), and which includes the lands on which the Existing Hospital is situated;

“Existing Hospital Licence” has the meaning set out in Section 2.2(a) of this Schedule;

“Facility Licence” has the meaning set out in Section 2.1(a) of this Schedule; and

“Lands” means those certain lands, the boundary of which is indicated on the preliminary sketch plan attached in Appendix 7A (which boundary may be subject to minor adjustments to be agreed upon by the Parties, acting reasonably), and which includes the lands on which the Facility is to be situated but for greater certainty does not include the Existing Hospital Lands.

2. AUTHORITY’S OBLIGATIONS AND REPRESENTATIONS

2.1 Grant of Facility Licence

(a) From the Effective Date until the later of:

- (1) the Termination Date; and
- (2) the date the Authority no longer requires Project Co to provide the transitional services described in Section 14.3(a) of the Agreement,

the Authority hereby grants and will continuously until the applicable date above, grant or cause to be granted to Project Co a non-exclusive licence of use and access to, on and over the Lands and the Facility to the extent required by Project Co to allow Project Co to perform the Design, the Construction and the Services (the **“Facility Licence”**).

- (b) In consideration for the Facility Licence granted in Section 2.1(a), Project Co will perform the obligations described in Section 4.1(a) of the Agreement subject to and in accordance with the Agreement.
- (c) Project Co may for the same purposes described in Section 2.1(a), grant sub-licences to any Project Co Person, provided that any such grant will be subject to, and terminate upon, termination of the Facility Licence.

2.2 Grant of Existing Hospital Licence

- (a) From the Effective Date until the earlier of:
 - (1) the Termination Date; and
 - (2) the Lease Commencement Date,

the Authority hereby grants and will continuously until the applicable date above, grant or cause to be granted to Project Co a non-exclusive licence of use and access to, on and over the Existing Hospital Lands and the Existing Hospital to the extent required by Project Co to allow Project Co to perform the Facility Move and Initial Remediation Work (the “**Existing Hospital Licence**”).

- (b) In consideration for the Existing Hospital Licence granted in Section 2.2(a), Project Co will perform the obligations described in Section 4.1A of the Agreement, subject to and in accordance with the Agreement.
- (c) Project Co may for the same purposes described in Section 2.2(a), grant sub-licences to any Project Co Person, provided that any such grant will be subject to, and terminate upon, termination of the Existing Hospital Licence.

2.3 Terms Affecting Grant of Licences

Without limiting the other provisions of this Schedule and this Agreement, the following terms and conditions apply to the Facility Licence and the Existing Hospital Licence:

- (a) no legal demise or other interest in land, and no interest in the Existing Hospital or the Facility or any other improvements, is granted to Project Co or created by this Agreement;
- (b) the Facility Licence and the Existing Hospital Licence are non-exclusive and no right to exclusive possession of the Lands, the Existing Hospital Lands, the Existing Hospital or the Facility is granted to Project Co;
- (c) Project Co's rights are subject to the Encumbrances; and
- (d) subject to Section 6.14 of Schedule 2 [Design and Construction Protocols], the Authority will be entitled at any time and from time to time to:

- (1) grant to Authority Persons and any other persons, including contractors and the general public, access to the Lands, the Existing Hospital Lands, the Existing Hospital and the Facility; and
- (2) use or develop, or permit the use or development of, portions of the Lands and/or the Existing Hospital Lands. To the extent that such use or development materially adversely interferes with the ability of Project Co to perform the Project, such use or development shall, subject to and in accordance with the provisions of Schedule 6 [Changes, Minor Works and Innovation Proposals], result in a Change.

2.4 Property Taxes

The Authority will be responsible for property taxes (if any), or payments in lieu of property taxes, payable in respect of:

- (a) the Lands and the Facility; and
- (b) the Existing Hospital Lands and the Existing Hospital,

or the occupation thereof by the Authority, Project Co or any Project Contractor or Sub-Contractor; provided that, for greater clarity, Project Co will not be responsible for property taxes under this Agreement.

3. PROJECT CO'S OBLIGATIONS AND ACKNOWLEDGMENTS

3.1 "As Is Where Is"

Subject to the provisions of Section 4.1 of this Schedule, Project Co accepts the Lands and the Facility Licence, and the Existing Hospital Lands and the Existing Hospital Licence, on an "as is, where is" basis.

3.2 Encumbrances

Project Co acknowledges that it has reviewed the Encumbrances in effect as of the Effective Date, Project Co will fully and punctually observe and perform (to the same extent as if Project Co were the owner of the Lands and the Existing Hospital Lands (until the Initial Remediation Work Completion Date) and bound by the Encumbrances), any limitations, restrictions, obligations, liabilities and other terms and conditions set out in the Encumbrances on the Lands from the Effective Date to the Expiry Date and on the Existing Hospital Lands from the Effective Date to the Initial Remediation Work Completion Date and Project Co assumes all risks arising therefrom. Project Co will fully and punctually observe and perform all of the terms and conditions of any interest included in the Lands from the Effective Date to the Expiry Date, the Existing Hospital Lands from the Effective Date to the Initial Remediation Work Completion Date and any Encumbrance on the Lands from the Effective Date to the Expiry Date and on the Existing Hospital Lands from the Effective Date to the Initial Remediation Work Completion Date. The Authority may without restriction modify, add or remove any Encumbrances, provided that the foregoing will not limit Project Co's entitlements under the Agreement if such modification, addition or removal results in a Change.

3.3 Project Co Not To Encumber

Project Co will not, without the consent of the Authority:

- (a) grant or permit any Charge affecting or against the Lands, the Existing Hospital or the Facility; or
- (b) do or omit to do, or cause, suffer or permit to be done or omitted to be done by any Project Co Person anything that would result in any Charge against or affecting the Lands, the Existing Hospital, the Facility or any asset, matter or thing that may be required to be delivered or transferred to the Authority on the Termination Date pursuant to Section 14.2 (Transfer to the Authority of Assets, Contracts, etc.) of this Agreement,

and will at its own expense promptly discharge and remove or cause to be discharged and removed any such encumbrance.

3.4 No Restriction on Authority Use or Development

Project Co acknowledges that the Authority may from time to time without restriction use, develop or re-develop, or permit the use, development or re-development of, the Lands, the Existing Hospital Lands, the Existing Hospital, the Facility or any portion thereof (including by way of subdivision) for any purpose and by any Person. To the extent such use, development or re-development adversely interferes with the Facility Licence or the Existing Hospital Licence or adversely interferes with Project Co's ability to carry out the Design, the Construction, the Initial Remediation Work or the Services, the Authority will, to address such interference, initiate a Change.

3.5 No Registration

Project Co will not register in any land title office this Agreement, the Facility Licence, the Existing Hospital Licence or any instrument, claim or notice in respect of the Facility Licence or the Existing Hospital Licence or any other rights of Project Co under this Agreement.

3.6 Builders Liens

Project Co will, at its own cost and expense, cause any and all builders liens and other liens and claims of lien for labour, services or materials furnished or alleged to have been furnished with respect to the Design, the Construction, the Initial Remediation Work or the Services that are registered against or otherwise affect the Lands, the Existing Hospital Lands, the Existing Hospital or the Facility or any part thereof, to be paid, satisfied, released or vacated forthwith after the Authority has sent Project Co written notice of any such lien or claim. If there is a bona fide dispute of the validity or correctness of any such lien or claim, Project Co will be entitled to defend against the lien or claim in any proceedings if Project Co first:

- (a) pays into court, or provides sufficient security for, the amount claimed and costs as the court may direct, as may be required to obtain a court order for the discharge of such lien or claim from title to the Lands and/or the Existing Hospital Lands, and obtains such

discharge and registers such discharge in the relevant land title office to cancel such lien;
or

- (b) provides such other reasonable security in respect of such lien or claim as the Authority may in writing, and in its discretion, approve.

3.7 Title to Improvements

Project Co will not acquire any property interest in or title to the Existing Hospital, the Facility or any other improvements to the Lands or, prior to the Initial Remediation Work Completion Date, the Existing Hospital Lands. As between Project Co and the Authority, title to and ownership of the Existing Hospital, the Facility and all other improvements to the Lands and, prior to the Initial Remediation Work Completion Date, the Existing Hospital Lands will at all times be vested in the Authority.

4. HAZARDOUS SUBSTANCES

4.1 Responsibility

Notwithstanding any other provision of this Agreement or this Schedule, Project Co will not be responsible for any Hazardous Substances in, on, below or adjacent to the Lands or the Existing Hospital Lands or any cost, expense or claim arising therefrom, other than:

- (a) any Hazardous Substances brought onto, or adjacent to, the Lands or the Existing Hospital Lands by Project Co or any Project Co Person during the Term; and
- (b) those Hazardous Substances for which Project Co has agreed to accept responsibility in Schedule 3 [Design and Construction Specifications].

4.2 Restrictions on Use

Unless otherwise expressly required or permitted under this Agreement, Project Co will not install, use or store on the Lands, the Existing Hospital Lands or adjacent property any materials, equipment or apparatus, the installation, use or storage of which is likely to cause or in fact causes the generation, accumulation or migration of any Hazardous Substance in contravention of any applicable Laws. Without limiting the generality of the foregoing, Project Co will not use the Lands or the Existing Hospital Lands to dispose of, handle or treat any Hazardous Substances, in a manner that would cause the Lands, the Existing Hospital Lands or any adjacent property to become a contaminated site under applicable Laws.

APPENDIX 7A

DESCRIPTION OF LANDS AND ENCUMBRANCES

The “**Lands**” are those portions of the lands legally described as Lot 1, Block 162, Plan 1475 in the City of Yellowknife as depicted on the sketch plan attached hereto, which, for greater certainty, shall exclude the Existing Hospital Lands.

The “**Existing Hospital Lands**” are those portions of the lands legally described as Lot 1, Block 162, Plan 1475 in the City of Yellowknife as depicted on the sketch plan attached hereto.

Sketch plan of the Existing Hospital Lands – see attached.

SCHEDULE 8

PAYMENTS

1. INTERPRETATION

1.1 Definitions

In this Schedule, in addition to the definitions set out in Schedule 1 of this Agreement:

“Availability Condition” means, with respect to a Functional Unit, that the Functional Unit, Maintained Equipment within the Functional Unit and normal access routes are in a state or condition that:

- (a) allows safe and convenient access to all persons who are entitled to enter, leave, occupy or use it, using normal access routes; and
- (b) is complete, operational, safe, functional and fit for its intended use (as contemplated in the Room Data Sheets) and meets the requirements of Schedules 3 [Design and Construction Specifications] or Schedule 4 [Services Protocols and Specifications] specifically applicable to the relevant Functional Unit,

and for Functional Units (with the exception of parking stalls) on floors other than the ground floor at least one public elevator and two service elevators are functional and operating to manufacturer’s specifications;

“Deduction” means a deduction from a Service Payment, calculated in accordance with this Schedule;

“Event” means an incident or state of affairs affecting the Availability Condition of a Functional Unit or requiring Services to be performed or both;

“Functional Unit” means a room or space which is specified as such in Appendix 8A to this Schedule;

“High Service Failure” means a Service Failure which has been designated in Schedule 4 [Services Protocols and Specifications] or in this Schedule as a High Service Failure;

“Linked Unit” means, with respect to a Functional Unit, any other Functional Unit which is designated in Appendix 8A as being linked to another Functional Unit;

“Long Stop Return Date” has the meaning set out in Section 5.10 of this Schedule;

“Low Service Failure” means a Service Failure which has been designated in Schedule 4 [Services Protocols and Specifications] or in this Schedule as a Low Service Failure, or a Service Failure which has not been designated as a Medium Service Failure or High Service Failure;

“Market Tested Services Costs” means the costs for the Market Tested Services, as set out in Appendix 8D [Market Tested Services Costs] and as may be modified from time to time pursuant to Section 3.3 of this Schedule;

“Medium Service Failure” means a Service Failure which has been designated in Schedule 4 [Services Protocols and Specifications] or in this Schedule as a Medium Service Failure;

“Miscellaneous Occupant Services Payment” means the amount, subject to the maximum amount applicable to a Contract Year as set out in Section 8 of Schedule 4 [Services Protocols and Specifications], to be paid by the Authority to Project Co in respect of the costs incurred by Project Co in carrying out the Miscellaneous Occupant Services in a preceding Payment Period;

“New Service Provider Start Date” means:

- (a) the Service Commencement Date; or
- (b) if any Service Provider is replaced by a new Service Provider, either:
 - (1) in the case of replacement following a Market Testing, the later of the Market Testing Date to which the Market Testing related and the date on which the Preferred Service Tenderer begins to perform the relevant Market Tested Services; or
 - (2) in other cases, the date on which the Services begin to be provided by the replacement Service Provider or, if earlier, the date on which they were first due to be provided;

“New Service Provider Transition Period” has the meaning set out in Section 4.15 of this Schedule;

“Payment Adjustment Report” has the meaning set out in Section 8.1(g)(2) of this Schedule;

“Payment Period” means a calendar month;

“Permanent Repair” means Rectification where a Temporary Repair has been permitted and carried out pursuant to Section 4.11 of this Schedule;

“Permanent Repair Deadline” has the meaning set out in Section 4.11(a)(4) of this Schedule;

“Return Date” has the meaning set out in Section 5.3(d) of this Schedule;

“Service Failure” means any failure by Project Co, other than an Unavailability Event, to provide the Services in accordance with this Agreement and in particular in accordance with Schedule 4 [Services Protocols and Specifications], and includes a failure to satisfy any Performance Indicator;

“Service Failure Deduction” means a Deduction which may be made in respect of a Service Failure;

“Service Payment” means the sum calculated in accordance with Section 3 of this Schedule;

“Temporary Alternative Accommodation” means accommodation offered to the Authority by Project Co as a substitute for any Unavailable Functional Unit pursuant to Section 5.1 of this Schedule;

“Temporary Alternative Accommodation Notice” has the meaning set out in Section 5.1 of this Schedule;

“Temporary Availability Condition” has the meaning set out in Section 4.11(a)(2) of this Schedule;

“Temporary Repair” means, in respect of the occurrence of an Unavailability Event, works of a temporary nature that do not constitute Rectification;

“Temporary Repair Proposal” has the meaning set out in Section 4.11(a) of this Schedule;

“Total Unavailability” occurs if:

- (a) 25% or more of the Functional Units which are ranked a Category 1 or 2 are Unavailable at the same time and a Rectification Period has expired with respect to each such Unavailable Functional Unit;
- (b) 50% or more of the washrooms in the Facility are Unavailable at the same time and a Rectification Period has expired with respect to each such washroom;
- (c) the following are Unavailable at the same time:
 - (1) the walk-in entrance to the Emergency Department; and
 - (2) the main entrance area to the Facility; or
- (d) any of the following are not accessible:
 - (3) any of the fire exits;
 - (4) all of the patient transfer elevators,

and a Rectification Period has expired with respect to each Event that caused such lack of access and the Authority has not approved a mitigation plan put forward by Project Co;

“Transition” means the tolerance level for the making of Deductions in respect of Service Failures as described in Section 4.15 of this Schedule;

“Unavailable” and **“Unavailability”** means, with respect to a Functional Unit, that such Functional Unit or an applicable Linked Unit is in a state or condition that does not comply with the Availability Condition;

“Unavailability Deduction” means a Deduction which may be made in respect of an Unavailability Event;

“Unavailability Event” means an incident or state of affairs which causes one or more Functional Units to be Unavailable; and

“Unit Deduction Amounts” means the amount of the Deduction specified in Appendix 8A per Functional Unit for an Unavailability Event, which amounts are Index Linked.

2. CONSTRUCTION PAYMENTS

2.1 Construction Payments

The Authority will make payments to Project Co relating to Construction in accordance with Appendix 8B [Construction Payments].

3. CALCULATION OF SERVICE PAYMENTS

3.1 Service Payment

- (a) From and after the Service Commencement Date, the Authority will pay Project Co in respect of each Payment Period a Service Payment calculated as follows:
- 1) the Periodic Payment for that Payment Period in accordance with Section 3.2;
 - 2) plus the relevant Miscellaneous Occupant Request Services Payment;
 - 3) subject to Section 4.1 of this Schedule, minus the aggregate of Deductions for that Payment Period; and,
 - 4) plus the Energy Gainshare or minus the Energy Painshare, as applicable, payable in that Payment Period.

If, after deducting the Energy Painshare (if applicable), the Service Payment as calculated is less than zero, Project Co will pay the Authority the lesser of (i) the Energy Painshare, and (ii) the amount by which the Service Payment is calculated to be less than zero.

3.2 Periodic Payments

- (a) Subject to Section 3.2(b), the Periodic Payments will be, in accordance with Appendix 8C [Periodic Payments], from and after the Service Commencement Date, a fixed amount in accordance with Column A of Appendix 8C, which will not be Index Linked, and a fixed amount in accordance with Column B of Appendix 8C, which will be Index Linked.
- (b) The Periodic Payments in Section 3.2(a) of this Schedule will be subject to the following adjustments:
- 1) if the first Payment Period from and after the Service Commencement Date is less than a full calendar month, the Periodic Payment will be reduced by the same proportion that the first Payment Period is less than a full calendar month; and
 - 2) if the last Payment Period of the Term is less than a full calendar month, the Periodic Payment will be reduced by the same proportion that the last Payment Period is less than a full calendar month.

3.3 Effect of Market Testing

On the appointment of any Preferred Service Tenderer, or, if applicable, on the completion of the re-pricing of a Market Tested Service pursuant to a Market Testing or as otherwise agreed by the Authority, the Service Payments following the Market Testing will be adjusted according to the following procedure:

- (a) new Market Tested Services Costs will be determined and calculated for each Payment Period for the applicable Contract Year in accordance with Appendix 4G [Market Testing Procedure];
- (b) after such calculations, the Service Payments will be adjusted by the amount of the difference (positive or negative) between the new Market Tested Services Costs and the previous Market Tested Services Costs;
- (c) any adjustment to the Service Payments will take effect, in the case of Market Tested Services subject to a Benchmarking Exercise, on the Market Testing Date or as otherwise agreed by the parties, and in the case of all other Market Tested Services, on the later of the Market Testing Date to which the Market Testing related and the date on which the Preferred Service Tenderer begins to perform the relevant Market Tested Services; and
- (d) for the purpose of subsequent Market Testing, Appendix 8D [Market Tested Services Costs] will be deemed to be modified as required to give effect to the new Market Tested Services Costs.

3.4 Insurance Adjustment

Project Co and the Authority, both acting reasonably, will agree on the Insurance Adjustment to be applied to the Service Payments as of the Service Commencement Date and on each Insurance Review Date thereafter. The Authority will adjust the Service Payments in accordance with such agreed Insurance Adjustment. The Insurance Adjustment will be calculated separately from the calculation set out in Section 3.1(a) and will not affect the result of the calculation set out in Section 3.1(a).

4. DEDUCTIONS FROM SERVICE PAYMENTS

4.1 Entitlement to Make Deductions

If at any time after the Service Commencement Date an Unavailability Event or a Service Failure occurs, the Authority will be entitled to make Deductions in accordance with this Schedule 8 (including Section 4.9 of this Schedule 8) in respect of that Unavailability Event or Service Failure (and, for greater certainty, in respect of all other Unavailability Events and Service Failures) from the Service Payment for the relevant Payment Period, except that:

- (a) the aggregate of all Deductions that the Authority may make from a Service Payment may not exceed the amount of the Service Payment in respect of a Payment Period before the Deductions; and
- (b) to the extent that an Unavailability Event or a Service Failure is the result of an Excusing Event or a Compensation Event, the Authority will not be entitled to make Deductions.

4.2 Classification of Event

The classification of an Event as a Service Failure or an Unavailability Event, and the rank of an Unavailability Event, will be made by Project Co at the time at which the occurrence of the Event is reported to the Help Desk or otherwise reported to Project Co. If an Event which results in an immediate Service Failure Deduction (because there is no applicable Response Time or Rectification Period) can properly be classified as both a Service Failure and an Unavailability Event at the time it is reported, it will be classified as the Event that has the highest potential Deduction applicable to it. An Event which is incorrectly classified may be re-classified only with the approval of the Authority, such approval not to be unreasonably withheld. If such an Event is re-classified, the appropriate Deduction (if applicable) will be made and any Deduction incorrectly applied will be withdrawn.

4.3 Service Failure Becoming Unavailability Event

A Service Failure may become or lead to an Unavailability Event if circumstances change or the Service Failure continues. In such a circumstance, when the Functional Unit becomes Unavailable, the Service Failure will have ended (without prejudice to the Service Failure Deductions that have accrued to that point) and an Unavailability Event will have occurred.

4.4 Total Unavailability

When Total Unavailability occurs, there will be deemed to be an Unavailability Event for each Functional Unit that otherwise met the Availability Condition at that time and all such Functional Units will continue to be deemed to be Unavailable until Total Unavailability no longer occurs.

4.5 Deductions for Unavailability Events

Subject to Sections 4.1, 4.9 and 4.12 of this Schedule, the Deduction in respect of each Unavailability Event will be the greater of:

- (a) \$100, Index Linked; and

- (b) subject to Section 4.6 of this Schedule, the aggregate of the Unit Deduction Amounts for all Functional Units made Unavailable as a result of the Unavailability Event.

4.6 Unavailable But Used

If any Functional Unit is Unavailable (including, for greater certainty, Functional Units that are deemed Unavailable under Section 3.4 of this Schedule) but the Authority continues to use it or a Linked Unit for the intended use or purpose of that Functional Unit or Linked Unit, for the purposes of Section 4.5(b) of this Schedule the Unit Deduction Amount applicable to an Unavailability Deduction for such Functional Unit and Linked Unit will be multiplied by 50%.

4.7 Deductions for Service Failures

Subject to Sections 4.1 and 4.15 of this Schedule, the amount of the Deduction in respect of a Service Failure will be as follows:

- (a) for a High Service Failure, the sum of ██████, Index Linked;
- (b) for a Medium Service Failure, the sum of ██████, Index Linked; and
- (c) for a Low Service Failure, the sum of ██████, Index Linked.

4.8 Response Time

If an Event occurs and a Response Time is indicated in Schedule 4 [Services Protocols and Specifications], in addition to any other Deduction arising from such Event, if Project Co does not respond as required under this Agreement within the applicable Response Time:

- (a) a Low Service Failure will be deemed to have occurred; and
- (b) unless otherwise specified in Schedule 4 [Services Protocols and Specifications], a new Response Time will start and the provisions of this Section 4.8 will again apply and will continue to apply with repeated Low Service Failures until Project Co responds as required under this Agreement.

Nothing in this Section 4.8 will limit any other Deductions in respect of the same Event or the occurrence of, and Deductions in respect of, additional Events that occur within a Response Time period.

4.9 Deduction Triggers

If an Event occurs:

- (a) in the case of a Service Failure for which there is no Rectification Period, the Authority will make the applicable Service Failure Deduction;
- (b) in the case of an Unavailability Event, other than a deemed Unavailability Event due to Total Unavailability, if Project Co Rectifies the Unavailability Event within the Rectification Period, then no Deduction will be made for such Unavailability Event;

- (c) in the case of a deemed Unavailability Event due to Total Unavailability, the Authority will make the applicable Unavailability Deduction; and
- (d) in any case and in addition to the foregoing, if Project Co does not Rectify the Event (which in the case of deemed Unavailability Events due to Total Unavailability means that Total Unavailability no longer occurs), including any Service Failure for which there is a Rectification Period, within the Rectification Period:
 - (1) the applicable Deduction will be made for the Event; and
 - (2) a new Event (which in the case of a Service Failure will be of the same category as the original Service Failure unless otherwise specified in Schedule 4 [Service Protocols and Specifications]) will be deemed to occur at the end of such Rectification Period and the provisions of this Section 4.9 will again apply and will continue to apply with repeated Deductions until Project Co Rectifies the Event.

Nothing in this Section 4.9 will limit any other Deductions in respect of the same Event or the occurrence of, and Deductions in respect of, additional Events that occur within a Rectification Period.

4.10 Multiple Events

If the root cause of a series of Events is substantially the same, whether or not Project Co Rectifies any or all of the Events within the applicable Rectification Period, there will be deemed to be a Medium Service Failure on the occurrence of any of the following:

- (a) the third such Event in a day and on the occurrence of each subsequent such Event in that day; and
- (b) the fourth such Event in a rolling consecutive seven day period and on the occurrence of each subsequent such Event in that seven day period.

4.11 Temporary Repairs

If Project Co is unable to Rectify an Unavailability Event within the applicable Rectification Period due to the need for specialized materials or personnel that are not required by this Agreement to be immediately available at the Facility and are not, and cannot reasonably be expected to be, available at the Facility, then:

- (a) Project Co may provide the Authority with a proposal (the "**Temporary Repair Proposal**") for:
 - (1) a Temporary Repair;
 - (2) a temporary modification to the Availability Condition for the relevant Functional Unit until the Permanent Repair is completed (the "**Temporary Availability Condition**");
 - (3) the Permanent Repair; and

- (4) the period within which to complete the Permanent Repair (the “**Permanent Repair Deadline**”);
- (b) the Authority may in its discretion but without unreasonable delay, consider the Temporary Repair Proposal, and Project Co will not carry out the Temporary Repair until the Temporary Repair Proposal is accepted by the Authority;
- (c) if the Authority accepts the Temporary Repair Proposal, Project Co will carry out the Temporary Repair in accordance with the Temporary Repair Proposal;
- (d) if the Temporary Repair is completed in accordance with the Temporary Repair Proposal, the Availability Condition for the relevant Functional Unit will be modified to be the Temporary Availability Condition until the Permanent Repair Deadline;
- (e) if the Permanent Repair is not completed by the Permanent Repair Deadline:
 - (1) the Temporary Availability Condition will cease to be the Availability Condition and the Authority may make all applicable Unavailability Deductions with effect from the Permanent Repair Deadline; and
 - (2) Project Co may revise the Temporary Repair Proposal and resubmit such proposal to the Authority as a new Temporary Repair Proposal pursuant to Section 4.11(b) of this Schedule; and
- (f) except with respect to the applicable modification of the Availability Condition, nothing in this Section 4.11 will limit the Authority’s entitlement to Deductions within the applicable Rectification Periods.

4.12 Compliance with Laws and Good Industry Practice

When carrying out Rectification, or works of Temporary Repair pursuant to Section 4.11 of this Schedule, Project Co will at all times act in accordance with Laws and Good Industry Practice. If in doing so Project Co breaches Law, there will be deemed to be a new additional High Service Failure. If in doing so Project Co breaches Good Industry Practice, but does not also breach Laws, there will be deemed to be a new additional Low Service Failure.

4.13 Deficiency Correction Period - Unavailability

During the 20 Business Days beginning on the Service Commencement Date, the amount of any Unavailability Deductions for Unavailability Events directly caused by Deficiencies will be reduced by 100%. This Section 4.13 does not give any relief in respect of any Service Failure Deductions.

4.14 Service Failure Related Solely to Unavailability

No Service Failure Deduction will be made if the Service Failure to which it relates arises solely as a result of the Unavailability of the Functional Unit in which the Service was to be provided. If any Functional Unit is Unavailable but the Authority continues to use it for the intended use or purpose of that Functional Unit, the Authority will, subject to Section 4.3 of this Schedule, deduct the full amount of any Service Failure Deductions that apply to the Services in the applicable Functional Unit.

4.15 Transition Periods - Service Failures

In respect of the Services, there will be a period of 90 days (the “**New Service Provider Transition Period**”) for Transition beginning on each New Service Provider Start Date. During each New Service Provider Transition Period the following provisions will apply:

- (a) during the first 60 days of the New Service Provider Transition Period, the amount of any Service Failure Deductions will be reduced by [REDACTED]; and
- (b) during the final 30 days of the New Service Provider Transition Period, the amount of any Service Failure Deductions will be reduced by [REDACTED].

This Section 4.15 will not give any relief during any period of Transition in respect of Unavailability Deductions.

5. TEMPORARY ALTERNATIVE ACCOMMODATION

5.1 Project Co Option to Provide

If an Unavailability Event occurs Project Co may offer the Authority Temporary Alternative Accommodation by notice (the “**Temporary Alternative Accommodation Notice**”) to the Authority within 5 Business Days from the commencement of the applicable Event.

5.2 Requirements

The Temporary Alternative Accommodation must:

- (a) comply with the Availability Condition for the Functional Units affected by the Unavailability Event for which Temporary Alternative Accommodation is offered;
- (b) be a temporary alternative having regard to the facts and the circumstances in existence;
- (c) be upon terms which are not materially different from the terms upon which the Authority occupied the affected Functional Unit;
- (d) unless the Authority otherwise agrees, be accommodation that Project Co is not already obligated to provide to the Authority;
- (e) be supplied with the Services to the standards set out in Schedule 4 [Services Protocols and Specifications] which Project Co would under normal circumstances be providing within the Unavailable Functional Unit;
- (f) not involve the Authority incurring any additional cost or charges in respect of the Temporary Alternative Accommodation including the reasonable costs of any relocation to and from the Temporary Alternative Accommodation; and
- (g) be in reasonable proximity to the Facility, be reasonably accessible by public and private transport and have adequate parking.

5.3 Notice Requirements

The Temporary Alternative Accommodation Notice must:

- (a) describe the Temporary Alternative Accommodation;
- (b) invite the Authority to inspect the Temporary Alternative Accommodation and give the Authority reasonable notice of a time and a date when it may do so;
- (c) set out Project Co's proposals regarding the timing and co-ordination of relocation to the Temporary Alternative Accommodation;
- (d) specify the date (which must be agreed by the Authority before the submission of the written notice) by which Project Co reasonably expects the Authority to be able to relocate back to the applicable Functional Unit (the "**Return Date**"); and
- (e) describe the terms upon which the Authority will be entitled to occupy such Temporary Alternative Accommodation including the proposed division of such accommodation into Functional Units and the weighting to be attributed to them for the purposes of the operation of this Schedule.

5.4 Acceptance by Authority

If it wishes to inspect the Temporary Alternative Accommodation the Authority will do so within 5 Business Days of receipt of the Temporary Alternative Accommodation Notice. The Authority will notify Project Co in writing of its acceptance or refusal of the proposed Temporary Alternative Accommodation within 24 hours of its inspection or, if the Authority has elected not to inspect, within 5 Business Days of receipt of the Temporary Alternative Accommodation Notice. The Authority may in its discretion refuse or accept any proposed Temporary Alternative Accommodation that does not meet the requirements of Section 5.2 of this Schedule and in all other cases will act reasonably when deciding to accept or refuse any proposed Temporary Alternative Accommodation.

5.5 Effect of Acceptance

If the Authority accepts the offer of Temporary Alternative Accommodation:

- (a) which is not within the Facility then, without affecting the Authority's remedial rights under Section 11 of this Agreement, the Authority will not be entitled to vacate the Temporary Alternative Accommodation until the earlier of the Return Date and the date on which the Authority is entitled and able to return to and use the Functional Unit in accordance with the agreed program for return and re-commissioning referred to in Section 5.8 of this Schedule; and
- (b) which is within the Facility and the Authority subsequently needs such Temporary Alternative Accommodation in connection with needs that were not anticipated at the time the Authority agreed to occupy the space, then the Authority will be entitled to vacate the Temporary Alternative Accommodation.

5.6 Additional Authority Costs

Project Co will pay for any additional reasonable and direct costs and expenses incurred by the Authority in respect of Temporary Alternative Accommodation, including reasonable relocation costs to and from the Temporary Alternative Accommodation.

5.7 Deduction

If the Authority accepts Project Co's offer of Temporary Alternative Accommodation, no further Deductions will be made in respect of a Functional Unit vacated by the Authority while the Temporary Alternative Accommodation replacing that Functional Unit is being used by the Authority. The Authority will be entitled to make Deductions in respect of any Service Failure or Unavailability Event which occurs in the Temporary Alternative Accommodation as if the Temporary Alternative Accommodation was the Functional Unit which it replaced and any Deduction in respect of an Unavailability Event will be calculated using the Unit Deduction Amounts attributed to such Functional Unit.

5.8 Return to Functional Unit

When Project Co has completed the required works to enable the Authority to return to the Functional Unit the Authority will confirm that the Availability Condition is met for the Functional Unit and the Authority and Project Co will agree to a relocation program to return to the Functional Unit and any necessary period for re-commissioning.

5.9 Failure to Complete Works

If the Authority has accepted the proposed Temporary Alternative Accommodation and Project Co fails to complete the works to enable the Authority to return to the relevant Functional Unit on the Return Date:

- (a) the Temporary Alternative Accommodation will be deemed to be Unavailable with effect from the Return Date until the date on which the Unavailability Event has been Rectified and the Authority is able to resume its use of the Functional Unit; and
- (b) the Authority may, in its absolute discretion, vacate the Temporary Alternative Accommodation at any time after the Return Date or remain in occupation, and in the latter circumstance a [REDACTED] reduction will apply with respect to the Unavailability Deduction.

5.10 Long Stop Return Date

The Authority will specify a date (the "**Long Stop Return Date**"), being a date no earlier than 30 days after the Return Date, by which the Rectification must be completed and if Project Co fails to complete the Rectification of the Functional Unit for which the Temporary Alternative Accommodation is a replacement by the Long Stop Return Date:

- (a) the Authority may (without prejudice to its rights under Section 12 (Project Co Events of Default) or any other express rights of the Authority under this Agreement) take such steps as it considers to be appropriate (either itself or by engaging others to take such

steps) to restore the Functional Unit to a condition that satisfies in all respects the requirements of Schedule 4 [Services Protocols and Specifications]; and

- (b) Project Co will reimburse the Authority for all reasonable direct costs and expenses incurred by the Authority in relation to taking the steps, or engaging others to take the steps, referred to in Section 5.10(a) and the Authority will be entitled to deduct any such amount from any amounts payable to Project Co under this Agreement.

6. REVIEW OF FUNCTIONAL UNITS, DEDUCTIONS, ETC.

6.1 Initiation of Review

The identification of Functional Units, Linked Units, Performance Indicators, Response Times, Rectification Periods, Unit Deduction Amounts and the amount of Deductions for each category of Service Failure and for Unavailability Events will be reviewed by the Authority and Project Co at any time if requested by either party but in any event will be reviewed at the following times, unless otherwise agreed by the parties:

- (a) at such time as the Design Development Phase as set out in Section 5.3 of Schedule 2 [Design and Construction Protocols] has been completed in all material respects;
- (b) in the circumstances referred to in Section 5.3 of Schedule 6 [Changes, Minor Works and Innovation Proposals];
- (c) following the Service Commencement Date; and
- (d) at least once in every Contract Year following the first anniversary of the Service Commencement Date for the purposes of the following Contract Year.

The Authority and Project Co will act reasonably and diligently in carrying out the review, which will not exceed 30 days without the agreement of both parties. For the avoidance of doubt, the parties intend that any changes made as a result of such a review will not alter the overall risk profile of the relevant Service or the likely magnitude of Deductions. If proposed changes would result in any such alteration, the matter will be deemed to be a Change subject to the provisions of Schedule 6 [Changes, Minor Works and Innovation Proposals].

6.2 Results of Review

The Authority and Project Co may, in respect of each matter that is the subject of the review, either:

- (a) agree that the status of the relevant matter will continue to apply unchanged for the following Contract Year; or
- (b) agree to adjustments to the relevant matter to take effect in the following Contract Year.

If the parties do not agree within 30 days after completion of the review, either party may refer the matter to the Dispute Resolution Procedure. No change will be made with respect to a matter under review until agreed or until determined under the Dispute Resolution Procedure. For the avoidance of doubt, if the changes that are agreed or determined under the Dispute Resolution Procedure alter the overall risk

profile of the relevant Service, the matter will be deemed a Change subject to the provisions of Schedule 6 [Changes, Minor Works and Innovation Proposals].

6.3 Effective Time of Adjustments

Any adjustment pursuant to a review will be effective from the commencement of the relevant Contract Year for which the adjustment is to take effect under Section 6.2 of this Schedule.

6.4 Result of Change, Minor Works or Innovation Proposal

As set out in Section 5.3 of Schedule 6 [Changes, Minor Works and Innovation Proposals] the parties will review and agree any changes to Appendix 8A [Functional Units, Unit Deduction Amounts, Rectification Periods] that are needed as the result of a Change, Minor Works or an Innovation Proposal.

7. FAILURE BY PROJECT CO TO MONITOR OR REPORT

7.1 Performance Monitoring Report

The Performance Monitoring Report produced by Project Co for any Payment Period will be the initial source of the information regarding the performance of the Services for the relevant Payment Period for the purposes of calculating the relevant Deductions.

7.2 Failure to Monitor or Report

If Project Co fails to monitor or accurately report an Event, a Service Failure or an Unavailability Event:

- (a) such failure will be deemed to be a new Low Service Failure for each Event that has been misreported. The relevant Deduction for the new Low Service Failure will be made in addition to the Deductions that would have been made had there been no failure to monitor or report;
- (b) the Authority will be entitled to make Deductions in respect of any Service Failures or Unavailability Events in the manner prescribed in this Schedule and the Performance Monitoring Report(s) and invoice(s) with respect to all Payment Periods affected by such failure will be restated to include any such Deductions; and
- (c) Project Co will forthwith pay to the Authority the amount, if any, by which the amount paid to it for the affected Payment Periods exceeds the amount in the restated invoices for such Payment Periods.

7.3 Misconduct

If the Authority's inspection or investigation of records reveals, on the part of Project Co or a Project Co Person:

- (a) fraudulent action or inaction;
- (b) deliberate misrepresentation; or

- (c) gross misconduct or incompetence,

then a new High Service Failure will be deemed to have occurred for each Event that has been misreported. The relevant Deduction for the new High Service Failure will be made in addition to the Deductions that would have been made had there been no misreporting.

7.4 No Prejudice to Other Rights

The provisions of this Section 7 are without prejudice to any rights of the Authority in this Agreement, including pursuant to Section 6 (Performance Monitoring and Reporting) of Schedule 4 [Services Protocols and Specifications] and Section 12.1 (Project Co Events of Default) of this Agreement.

8. GENERAL PAYMENT PROVISIONS

8.1 Invoicing and Payment Arrangements

With respect to invoicing and payment the following will apply.

- (a) All Service Payments, except for the Miscellaneous Occupant Services Payment, will be payable in advance for each Payment Period;
- (b) The Miscellaneous Occupant Services Payment will be payable in arrears. Project Co will use reasonable efforts to include in its invoice amounts in respect of any Miscellaneous Occupant Services within one Payment Period following the Payment Period in which such Miscellaneous Occupant Services were carried out. Project Co will include in its invoice an amount in respect of any Miscellaneous Occupant Services within two Payment Periods following the Payment Period within which the Miscellaneous Occupant Services were carried out, and after that time Project Co waives the right to any claims against the Authority for payment in respect of such Miscellaneous Occupant Services.
- (c) A minimum of 10 Business Days prior to each Payment Period, Project Co will provide the Authority with an invoice in a form agreed by the parties, acting reasonably. The invoice will include as a minimum:
 - (1) the estimated Service Payments (not including the Miscellaneous Occupant Services Payment) for the applicable Payment Period;
 - (2) the amount of the Miscellaneous Occupant Services Payment;
 - (3) any adjustments to a previous Payment Period, as set out in the applicable Payment Adjustment Report;
 - (4) any amount owing to the Authority under this Agreement;
 - (5) any amount owing to Project Co under this Agreement;
 - (6) the amount of applicable GST calculated in accordance with Section 8.2 of this Appendix;

- (7) the amount of applicable PST;
 - (8) Project Co's GST registration number; and
 - (9) the net amount owing by the Authority to Project Co, or by Project Co to the Authority, as applicable;
- (d) the Authority will:
- (1) review each invoice submitted in accordance with this Section 8.1 within 5 Business Days; and
 - (2) pay the amount approved by the Authority within 30 calendar days upon receipt of the invoice; and
 - (3) concurrently advise Project Co of any amounts the Authority has not approved and the reasons for non-approval;
- (e) Project Co:
- (1) will, after discussion and agreement with the Authority, clarify and resubmit an invoice for any amounts not approved by the Authority in any previously submitted invoice and the Authority will pay such agreed amounts in accordance section 8.1(d)(2); and
 - (2) may refer for resolution pursuant to Dispute Resolution Procedure the amount of any invoice it has not agreed with the Authority;
- (f) the Authority will not be obligated to make any payment unless all conditions of payment in this Agreement have been satisfied;
- (g) within 10 Business Days following the end of each Payment Period, Project Co will submit to the Authority:
- (1) a Performance Monitoring Report for that Payment Period; and
 - (2) a report (a "**Payment Adjustment Report**") setting out any adjustments, including Deductions, to the Service Payments for that Payment Period, the amount of the Miscellaneous Occupant Services Payment, and the amount of over-payment or under-payment from the amount paid previously by the Authority for that Payment Period;
- (h) Project Co will include with each invoice and Payment Adjustment Report such supporting documentation as is reasonably required to substantiate and confirm the invoiced amounts and amounts set out in each Payment Adjustment Report;
- (i) for the final 3 Payment Periods of the Term, the Authority may withhold from payment a reasonable amount for possible adjustments to the Service Payments, and within 30 days after the expiry of the Term Project Co will provide the Authority with a final invoice

setting out Project Co's calculations to reconcile any over-payments or under-payments and the Authority or Project Co, as applicable, will within 30 calendar days pay the amount properly due and payable to the other party; and

- (j) no payment will be construed as an acceptance or approval of incomplete, defective or improper Design, Construction, Services or any other matter provided by Project Co which is not in conformance with the requirements of this Agreement, and will not operate to relieve Project Co from any of its obligations under this Agreement.

8.2 GST

Project Co will include in each invoice for a Service Payment:

- (a) for the Payment Period immediately following the month in which Service Commencement is achieved, the GST payable by the Authority on the Cost To Date as at the Service Commencement Date, less the GST that has already been paid by the Authority on that portion of the Cost To Date as at the Service Commencement Date pursuant to Appendix 8B [Construction Period Payments];
- (b) for each Payment Period, the GST payable by the Authority on the Service Payment, excluding any portion of such Service Payment relating to costs in respect of which the Authority has already paid GST pursuant to Section 8.2(a) of this Schedule.

APPENDIX 8A

FUNCTIONAL UNITS, UNIT DEDUCTION AMOUNTS, RECTIFICATION PERIODS

LINKED UNITS PRINCIPLES

See attached.

Schedule 8A - Functional Unit Listing

FU Priority Level	Hours per Rectification Period	Deduction per Rectification Period

2	3	
3	4	
4	4	
5	4	

FU ID	FU TYPE	FU NAME	NUMBER OF FUs	ROOM SIZE (NSM)	TOTAL NSM	CONTENTS/KEY FEATURES/DESIGN CRITERIA	PRIORITY	CRITICAL LINKAGES
1.00	Main Entry/Customer Services							
1.01	MAIN ENTRANCE/LOBBY							
1.01.01	CSS-1	Main Entrance Vestibule	1	11	11	Main hospital entrance for patients/visitors who are ambulatory; size may vary based on architectural design.	3	-
1.01.03	---	Patient/Visitor Lounge	1	38.5	38.5	Direct view of drop-off/pick-up drive; includes space for two bariatric seats/wheelchairs.	3	-
1.01.04	---	Phone Alcove	1	1.9	1.9	Wall mounted phones (e.g. transportation).	3	-
1.01.05	---	ATM Alcove	1	1.9	1.9	Alcove adjacent to seating area.	3	-
1.01.06	---	Stanton Foundation Kiosk	1	4.6	4.6	Kiosk or wall display with contiguous counter, stool, queuing space, within direct view of public seating.	3	-
1.01.07	MEA-1	Wheelchair alcove	1	4.6	4.6	Accessible from Customer Service Centre but out of view of lounge.	3	-
1.01.08	WRS-4	Public Washroom (Female)	1	14.6	14.6	Includes entrance vestibule, two handwashing sinks, wheelchair accessible toilet stall and regular toilet stall.	4	-
1.01.09	WRS-4	Public Washroom (Male)	1	14.6	14.6	Includes entrance vestibule, two handwashing sinks, wheelchair accessible toilet stall and urinal.	5	-
1.01.10	---	Storage Room	1	5.6	5.6	General storage including storage for personal items of patients who have been discharged but are awaiting flights.	5	-
1.01.11	---	Breastfeeding Room	1	7.5	7.5	as per the CSA z-8000 recommendations.	5	-
1.02	CUSTOMER SERVICE CENTRE							
1.02.01	CSS-3	Reception/Concierge Desk	1	9	9	Immediately adjacent to main entrance vestibule; open reception desk with two staff workstations (one for language services).	3	-
1.02.02	CSS-4	Registration/Communication Cubicle	2	6	12	Semi-enclosed cubicle with desk and two patient/visitor chairs. Requires direct access to an office equipment alcove.	3	-
1.02.03	---	Self-Registration Kiosk	2	3.7	7.4	Free standing kiosk with queuing space for self check-in; in view to entrance and lounge.	3	1.02.02
1.02.04	WKS-2	Workstation	1	4.5	4.5	Semi-enclosed cubicle for switchboard operator.	1	-
1.02.05	WKS-5	Office/Cubicle	1	9.3	9.3	Office/cubicle for patient registration supervisor.	3	-
1.02.06	WKS-2	Workstation	1	3.7	3.7	Touchdown station for the Registration Assisstant.	3	-
1.02.07	WKS-5	Office/Cubicle	1	9.3	9.3	Office/cubicle for security officer during daytime hours; view to main entrance/lounge must be provided.	3	-
1.02.08	OFF-1	Office (Standard)	1	9.3	9.3	Patient care coordinator, used 24/7 by shift supervisor; located near to the Emergency Department with convenient access to all patient care areas required.	4	-
1.02.09	WKS-1	Med Response	1	23	23	Includes 3 large workstations for electronic consultation, each equipped with up to 10 monitors; can be open to the office equipment alcove. Natural light desired.	4	-
1.02.10	OEQ-1	Med Response: Office Equipment Alcove	1	4	4	Printer/copier/fax machine and related equipment.	4	-
1.02.11	OFF-1	Med Response: Office/Consult Room	1	9.3	9.3	Physician office//teleconference.	4	-
1.02.12	OFF-1	Office (Standard)	1	9.3	9.3	Foundation office.	4	-
1.02.13	OEQ-2	Office Equipment Alcove	1	6	6	Printer/copier/fax and other related equipment.	5	-
1.03	AUXILIARY TUCK SHOP							
1.03.01	CSS-6	Retail Area	1	18.9	18.9	Includes display shelving and cashier/counter workstation.	3	-
1.03.02	CSS-7	Storage Room	1	5	5	Contiguous with retail area with connecting door; mobile storage.	4	-
1.04.01	CSS-8	Chapel/Meditation Room	1	30	30	Flexible seating with raised altar/stage platform.	4	-
1.04.02	CSS-9	Storage Room	1	6	6	Items used for multi-faith worship or celebration; contiguous with chapel.	5	-
2.00	Diagnostic Services							
2.01	OUTPATIENT INTAKE AREA							
2.01.01	WTA-1	Diagnostics Centre Waiting Room: Waiting Area	1	46	46	Seating for up to 30 with 2 wheelchairs and a bariatric seat: educational display area and coat rack.	3	-
2.01.02	WTA-2	Diagnostics Centre Waiting Room: Child Play Area	1	5	5	Contiguous with the clinic waiting area; small alcove with child's table and chairs, books, and small toys for quiet play.	3	-

2.01.03	WRS-2	Patient/Visitor Washroom	2	4.6	9.2	Wheelchair accessible; male and female; could be eliminated if other facilities are available nearby.	3	-
2.02	DIAGNOSTIC IMAGING SUITE							
2.02.01	WTA-1	Patient Reception and Preparation Area - Sub-Waiting Area	1	6	6	Seating for up to 4 persons, directly adjacent to staff work area.	1	-
2.02.02	DXS-1	Patient Reception and Preparation Area - Male Patient Changing/Washroom	1	12.6	12.6	Includes 2 changing cubicles, six full size lockers.	1	-
2.02.03	DXS-2	Patient Reception and Preparation Area - Female Patient Changing/Washroom	1	12.6	12.6	Includes 2 changing cubicles, six full size lockers.	2	-
2.02.04	EXT-4	Inpatient/ED Holding Alcove	2	7.5	15	Curtained cubicle for a stretcher or holding alcove for 2 wheelchairs, adjacent to staff work area and near DI imaging procedure rooms.	2	-
2.02.05	WKS-1	Staff Work Area: Clerical Workstation	2	3.7	7.4	Touch down stations for clerks responsible for film management and other duties.	2	-
2.02.06	WKS-1	Staff Work Area: Tech Workstation	3	3.7	11.1	Touch down stations for X-Ray, CT and mammography techs.	2	-
2.02.07	OFF-1	Staff Work Area: Office	1	9.3	9.3	Clerical supervisor.	2	-
2.02.08	WKS-5	Staff Work Area: Office/Cubicle	1	9.3	9.3	DI Tech supervisor.	2	-
2.02.09	WKS-4	Staff Work Area: Office/Cubicle	1	6.5	6.5	PACS coordinator.	1	-
2.02.10	OEQ-2	Staff Work Area: Office Equipment Alcove	1	6	6	Printer/copier/fax etc.	1	-
2.02.11	HHS-1	Hand Hygiene Sink	1	1	1		3	-
2.02.12	---	Radiography Suite: Radiography Procedure Room	1	29	29		1	2.02.13, 6.03.07, 6.03.13
2.02.13	---	Radiography Suite: Radiography Control/Workstation	1	7.5	7.5		1	2.02.12
2.02.14	---	Radiography Suite: Radiography Procedure Room	1	29	29		1	2.02.15, 6.03.07, 6.03.13
2.02.15	---	Radiography Suite: Radiography Control/Workstation	1	7.5	7.5		1	2.02.14
2.02.16	---	Fluoroscopy Suite: Fluoroscopy Procedure Room	1	29	29		3	2.02.17, 2.02.18
2.02.17	---	Fluoroscopy Suite: Fluoroscopy Control/Workstation	1	7.5	7.5	Requires access from within the room and from the corridor.	2	2.02.16
2.02.18	WRS-2	Fluoroscopy Suite: Patient Washroom	1	4.6	4.6	Wheelchair accessible.	3	2.02.16
2.02.19	DXS-3	Mammography Procedure Room	1	14	14		4	-
2.02.20	---	CT Suite: CT Procedure Room	1	40	40		1	2.02.21, 6.03.07, 6.03.13
2.02.21	---	CT Suite: CT Control Room	1	11	11		1	2.02.20
2.02.22	WRS-2	CT Suite: Patient Washroom	1	4.6	4.6	Wheelchair accessible. This washroom is to be contiguous with CT room.	4	-
2.02.23	OFF-1	Office (Radiologist)	2	9.3	18.6	Requires access from within the room and from the corridor.	4	-
2.03	CARDIOPULMONARY/ULTRASOUND							
2.03.01	WTA-1	Patient Recovery/Prep Area: Sub-Waiting Area	1	6	6	Seating for up to 4 persons, directly adjacent to staff work area.	2	-
2.03.02	WRS-2	Patient Recovery/Prep Area: Patient Washroom	1	4.6	4.6	Wheelchair accessible.	2	-
2.03.03	WKS-1	Staff Work Area: Tech Workstation	3	3.7	11.1	Touch-down stations for ultrasound, cardiac and respiratory techs working on the cardiopulmonary/ultrasound suite.	2	-
2.03.04	WKS-1	Staff Work Area: Tech Workstation	1	3.7	3.7	Touch-down station shared by respiratory therapists working on the inpatient units.	2	-
2.03.05	WKS-4	Staff Work Area: Office/Cubicle	1	9.3	9.3	Nurse practitioner (cardiac).	2	-
2.03.06	OEQ-1	Staff Work Area: Office Equipment Alcove	1	1.9	1.9	Printer/copier/fax and other related equipment.	2	-
2.03.07	HHS-1	Staff Work Area: Hand Hygiene Sink	1	1	1		3	-
2.03.08	EXT-7	Ultrasound Testing Room	2	13	26	Ultrasound unit (mobile).	3	-
2.03.09	EXT-7	Cardiac Exam/Testing Room	1	12	12	EKGs, echocardiography, Holting monitor prep. etc.: all mobile units.	3	-
2.03.10	EXT-7	Respiratory Testing Room	1	14	14	Pulmonary function testing; could accommodate body box; Negative pressure capable.	2	-
2.03.11	EXT-7	Testing Room (Multipurpose)	1	12	12	Could be used for remote monitoring/telehealth, as an additional ultrasound room, or to accommodate CP testing equipment.	3	-
2.03.12	DXS-5	Exercise/Stress Testing Room	1	20	20	Enclosed room with two treadmill bays (curtain closure) to be used for cardiac and respiratory exercise/stress testing.	4	-
2.03.13	DXS-8	Physician Viewing Area	1	9.2	9.2	Per CSA Z8000.	4	-
2.03.14	WRS-2	Patient Washroom	2	4.6	9.2	Wheelchair accessible: one between the two ultrasound rooms, one central to other testing rooms.	4	-
2.03.15	---	Charting Alcove	2	1.4	2.8	Located in the corridor outside of the ultrasound rooms.	4	-

2.04 OUTPATIENT SPECIMEN COLLECTION								
2.04.01	WTA-1	Patient Reception/Sub-Waiting Area	1	6.2	6.2	Seating for up to four persons, directly adjacent to collection work area.	2	-
2.04.02	DXS-6	Specimen Collection Work Area	1	9.5	9.5	Computer & label maker: contiguous with phlebotomy cubicles, connected to the Laboratory Central Specimen Processing Area via a pass-through or pneumatic tube.	3	-
2.04.03	DXS-7	Blood Drawing Cubicle	3	7.5*	24.5	Cubicle with phlebotomy chair, adjacent to collection work area; curtain closure. *One cubicle should accommodate stretcher (CSA Z8000 recommendation 9.5m2).	3	-
2.04.04	WRS-2	Patient Washroom (Specimen Collection)	1	5.6	5.6	Wheelchair accessible with pass-through cabinet to work area.	3	-
2.04.05	HHS-1	Hand Hygiene Sink	1	1	1		2	-
2.05 SHARED SUPPORT SPACE								
2.05.01	CLU-1	Clean Utility Room	1	11	11	Storage of clean and sterile supplies.	2	-
2.05.02	SLU-1	Soiled Utility Room	1	12	12	Temporary storage of supplies to be moved for cleaning, reprocessing, or disposal.	2	-
2.05.03	HSK-1	Housekeeping Closet	1	7	7	Housekeeping cart, supplies, mop cleaning.	3	-
2.05.04	STO-1	Equipment Storage Room	1	12	12	Holding of equipment (primarily respiratory) for dispatch.	3	-
2.05.05	MEA-2	Mobile Equipment Alcove	1	4.6	4.6	Holding/docking of mobile equipment with electrical support.	4	-
2.05.06	OFF-1	Office (Standard)	2	9.3	18.6	DI Centre (diagnostic imaging and lab) manager.	4	-
2.05.07	OFF-4	Office	1	9.3	9.3	Breast screening program leader.	4	-
2.05.08	WKS-1	Workstation	2	3.7	7.4	Breast screening clerk and booking clerk.	4	-
2.05.09	CFR-1	Conference Room	1	15	15	Seating for eight to ten persons.	5	-
2.05.10	KTC-2	Staff Room	1	12	12	Kitchenette, dining table, six chairs.	5	-
2.05.11	LKR-1	Staff Lockers Alcove	1	5.6	5.6	20 stacked purse/tote bag lockers for staff without dedicated workstations.	5	-
2.05.12	WRS-2	Staff Washroom	2	4.6	9.2	Wheelchair accessible.	5	-
2.06 LABORATORY								
2.06.01	WKS-1	Central Specimen Processing Area: Receiving/Sorting Workstation	1	3.7	3.7	Receiving, sorting, data entry; computer, phone, label printer, and printer/fax.	2	-
2.06.02	WKS-1	Central Specimen Processing Area: Processing Workstation	1	3.7	3.7	Specimen centrifuging/aliquoting; two counter top centrifuges and one label printer.	1	2.06.04
2.06.03	---	Central Specimen Processing Area: Referral/Send Out Workstation	1	5.6	5.6	Specimen packaging; computer, printer, label printer, phone.	2	-
2.06.04	---	Central Specimen Processing Area: Shared Support Space	1	15	15	Includes double-door refrigerator (floor mounted), double sink, and supply storage for specimen processing, referral/send out, courier boxes.	1	2.06.02
2.06.05	PNT-1	Pneumatic Tube	1	2	2		1	-
2.06.06		Microbiology: Microbiology Work Room	1	50	50		3	-
2.06.07	LAB-3	Microbiology: TB Ante Room	1	8	8		3	-
2.06.08	LAB-4	Microbiology: TB Work Room	1	16	16		3	-
2.06.09	LAB-5	Core Laboratory	1	104	104	Chemistry and hematology.	1	2.06.02
2.06.10	LAB-6	Transfusion Services	1	20	20		1	2.06.09
2.06.11	LAB-7	Storage (with Refrigerator/Freezer)	1	24	24	For refrigerator / freezer	1	-
2.06.12	OFF-1	Office	1	9.3	9.3	Lab Supervisor	2	-
2.06.13	OFF-1	Office	1	9.3	9.3	Clerical Supervisor	4	-
2.06.14	WKS-5	Office/Workstation	1	9.3	9.3	Lab information services	4	-
2.06.15	LAB-5	Central Work Area	1	13.5	13.5	Touchdown stations for lab staff	4	-
2.06.16	WRS-2	Staff Washroom	1	4.6	4.6	Wheelchair accessible	4	-
2.06.17	HHS-1	Hand Hygiene Sink	2	1	2	One Located in each Core Lab and Central Specimen Processing	4	-
2.07 MORGUE								
2.07.01	MOR-1	Family Viewing Area	1	20	20	Adjacent to body holding area.	1	2.07.01
2.07.02	MOR-2	Morgue	1	28.4	28.4		1	-
2.07.03	MOR-2	Body Holding	1	11	11	Holding for 6 bodies including bariatric capability.	1	-
2.07.04	WRS-1	Family Washroom	1	4.6	4.6	Adjacent to Family Viewing Area	1	-
2.08 MAGNETIC RESONANCE IMAGING								
2.08.01	---	Anteroom	1	10	10	An area to manage patient transfers and to create an allowance for the gauss perimeter area.	-	-
2.08.02	HHS-1	Hand Hygiene Sink	1	1	1	Contiguous with anteroom.	-	-
2.08.03	WRS-2	Patient Washroom	1	4.6	4.6	Wheelchair accessible.	-	-
2.08.04	---	MRI Procedure Room	1	50	50	Requires RF and magnetic shielding.	-	-
2.08.05	---	Control Room	1	14	14	Requires a dedicated cooling system with automatic emergency backup.	-	-
2.08.06	---	Equipment Room	1	19.5	19.5	3.0 Tesla magnet.	-	-
3.00 Ambulatory Care Centre								
3.01 AMBULATORY CARE CHECK-IN CENTRE								
3.01.02	WKS-1	Reception/Check-in Desk: Workstation	1	4.5	4.5	For Unit Clerk, on-stage.	3	-
3.01.03	PNT-1	Reception/Check-in Desk: Pneumatic Tube	1	2	2		1	-
3.01.04	OEQ-2	Reception/Check-in Desk: Alcove	1	6	6	Office equipment.	3	-
3.01.05		Reception/Check-in Desk: Self Check-in Kiosk	1	3.7	3.7	Free-standing kiosk with queuing space for self check-in; in view of registration/communications cubicles.	4	-

3.01.06	WTA-1	Reception/Check-in Desk: Waiting Area	1	46	46	Primarily to support ambulatory care waiting; seating for up to 30 with two wheel chair/bariatric seats; within view of check in desk.	4	-
3.01.07	WTA-2	Reception/Check-in Desk: Child Play Alcove	1	5	5	Contiguous with the clinic waiting area; small alcove with child's table and chairs, books, small toys for quiet play.	4	-
3.01.08	WRS-4	Public Washroom (Female)	1	14.6	14.6	Includes entry vestibule, two handwashing sinks, wheelchair accessible toilet and standard toilet stall.	4	-
3.01.09	WRS-3	Public Washroom (Male)	1	14.6	14.6	Includes entry vestibule, two handwashing sinks, wheelchair accessible toilet and urinal.	4	-
3.01.10	WRS-4	Public Washroom (Family/Bariatric)	1	5.6	5.6	Unisex, for use by family and/or bariatric patient, wheelchair accessible.	4	-
3.02 EXAM/TREATMENT SPACES								
3.02.01	INT-1	Patient Intake Alcove	1	5.6	5.6		3	-
3.02.02	EXT-1	Exam/Treatment Pod No. 1 - Exam/Consult Rooms (Standard)	9	12	108	Point of care supply in each room. Rooms should have access for patients off of public corridors, and access for clinicians off of collaborative staff work areas.	3	-
3.02.03	EXT-3	Exam/Treatment Pod No. 1 - Exam/Treatment Pod No. 1 - Exam/Treatment Rooms (Standard)	1	13	13	Negative Pressure, with Bariatric Capability.	3	-
3.02.04	PPE-1	Exam/Treatment Rooms (Isolation) - PPE Alcove	1	2	2	Contiguous personal protection and equipment alcove.	3	-
3.02.05	WRS-2	Exam/Treatment Pod No. 1 - Exam/Treatment Rooms (Isolation) - Isolation Room	1	4.6	4.6	Ensuite	3	-
3.02.06	PRC-2	Exam/Treatment Pod No. 1 - Procedure Room (Isolation)	1	16.5	16.5	Negative pressure isolation exam/treatment room with four-sided access, also equipped with ceiling mounted patient lift track for a bariatric patient and associated bariatric design; for minor treatments and procedures.	3	-
3.02.07	PPE-1	Exam/Treatment Pod No. 1 - Procedure Room (Isolation)- PPE Prep Alcove	1	2	2	Contiguous with procedure room; includes hand hygiene sink, personal protection and equipment (PPE) organizer, hamper for soiled materials.	3	-
3.02.08	WRS-2	Exam/Treatment Pod No. 1 - Procedure Room (Isolation) - Patient Washroom	1	4.6	4.6	Wheelchair accessible, contiguous with procedure room.	3	-
3.02.09	CLU-1	Exam/Treatment Pod No. 1 - Clean Utility Room	1	5.5	5.5	Storage of clean and sterile supplies	3	-
3.02.10	SLU-1	Exam/Treatment Pod No. 1 - Soiled Utility Room	1	6	6	Temporary storage of supplies to be moved for cleaning, reprocessing, or disposal	3	-
3.02.11	WRS-2	Exam/Treatment Pod No. 1 - Patient Washroom	1	4.6	4.6		3	-
3.02.12	EXT-1	Exam/Treatment Pod No. 2 - Exam/Treatment Rooms (Standard)	9	12	108	Point of care supply in each room. Rooms should have access for patients off of public corridors, and access for clinicians off of collaborative staff work areas.	3	-
3.02.13	EXT-3	Exam/Treatment Pod No. 2 - Exam/Treatment Rooms (Isolation)	1	13	13	Negative Pressure, with Bariatric Capability, Point of care supply in each room	3	-
3.02.14	PPE-1	Exam/Treatment Pod No. 2 - Exam/Treatment Rooms (Isolation) - PPE Alcove	1	2	2	Contiguous personal protection and equipment alcove.	3	3.02.13
3.02.15	WRS-2	Exam/Treatment Pod No. 2 - Exam/Treatment Rooms (Isolation) - Isolation Washroom	1	4.6	4.6	Ensuite	3	-
3.02.16	PRC-1	Exam/Treatment Pod No. 2 - Procedure Room (Isolation)	1	23	23	Negative pressure isolation exam/treatment room with three-sided access; for minor procedures and wound care. Located close to Medical Day Care Unit.	3	-
3.02.17	PPE-1	Exam/Treatment Pod No. 2 - Procedure Room (Isolation) - PPE Alcove	1	2	2	Contiguous with procedure room; includes hand hygiene sink, personal protection and equipment (PPE) organizer, hamper for soiled materials.	3	3.02.16
3.02.18	WRS-2	Exam/Treatment Pod No. 2 - Procedure Room (Isolation) - Patient Washroom	1	4.6	4.6	Wheelchair accessible, contiguous with procedure room.	3	-
3.02.19	CLU-1	Exam/Treatment Pod No. 2 - Clean Utility Room	1	5.5	5.5	Storage of clean and sterile supplies	3	-
3.02.20	SLU-1	Exam/Treatment Pod No. 2 - Soiled Utility Room	1	6	6	Temporary storage of supplies to be moved for cleaning, reprocessing, or disposal	3	-
3.02.21	WRS-2	Exam/Treatment Pod No. 2 - Patient Washroom	1	4.6	4.6		3	-
3.03 COLLABORATIVE WORK SPACES								
3.03.01	WKS-1	Work Area - Pod No. 1 - Workstations	10	4.5	45	4 Clinical Program Assistants, 3 RN's, 3 Visiting Specialist	3	-
3.03.02	OFF-5	Work Area - Pod No. 1 - Office	14	7.5	105	11 Physician and 3 NP's	3	-
3.03.03	HHS-1	Work Area - Pod No. 1 - Hand Hygiene Sink	1	1	1	For staff work area.	4	-
3.03.04	OEQ-1	Work Area - Pod No. 1 - Alcove	1	4	4	Office equipment.	4	-
3.03.06	WKS-1	Work Area - Pod No. 2 - Workstations	11	4.5	49.5	4 Clinical Program Assistants, 4 RN's, 3 Visiting Specialist	4	-
3.03.07	OFF-5	Work Area - Pod No. 2 - Office	14	7.5	105	10 Physician and 4 NP's	4	-
3.03.08	HHS-1	Work Area - Pod No. 2 - Hand Hygiene Sink	1	1	1	For staff work area.	4	-

3.03.09	OEQ-1	Work Area - Pod No. 2 - Alcove	1	4	4	Office equipment.	4	-
3.03.10	OFF-1	Clinical Coordinator	1	9.3	9.3		4	-
3.03.11	OFF-1	Ambulatory Care Managers	2	9.3	18.6		4	-
3.03.12	OFF-1	Clinical Supervisor	1	9.3	9.3		5	-
3.04	SHARED CLINIC SUPPORT SPACES							
3.04.01	CFR-2	Conference Room	1	30	30	Seating for 15-18 persons. To be accessible near the entry to the clinic for group medical appointments and for staff meetings	3	-
3.04.02	MED-1	Medication Room	1	9.5	9.5	Medication preparation and storage; includes small Pyxis machine.	3	8.01.05
3.04.03	HSK-1	Housekeeping Closet	1	7	7	Housekeeping cart, supplies, mop cleaning.	3	-
3.04.04	STO-1	Equipment Storage Room	1	12	12	Storing and staging of mobile equipment used in the clinics. Must be centrally located and easily accessible from each treatment pod.	3	-
3.04.05	MEA-1	Mobile Equipment Alcove	2	4.6	9.2	Temporary holding of stretchers, wheelchairs or mobile equipment.	3	-
3.04.06	KTC-2	Staff Room	1	12	12	Kitchenette, dining table, 6 chairs.	4	-
3.04.07	LKR-1	Staff Lockers (Alcove)	1	5.6	5.6	20 stacked purse/tote bag lockers for staff without dedicated workstations.	4	-
3.04.08	WRS-2	Staff Washroom	4	4.6	18.4	Wheelchair accessible.	4	-
3.04.09	STO-1	Supply Storage	1	5	5	For dressings, etc. and storage used by the Wound Care Nurse.	5	-
3.05	MEDICAL DAY CARE UNIT							
3.05.01	WKS-1	Reception/Staff Work Area - Provider Charting Workstation	3	3.7	11.1	Touchdown workstation. For Registered Nurse (OPAT), Registered Nurse (Chemo/IV Therapy), Registered Nurse (Wound Care).	3	-
3.05.02	OEQ-1	Reception/Staff Work Area-Office Equipment Alcove	1	4	4	Fax/copier/printer etc.	3	-
3.05.03	PNT-1	Reception/Staff Work Area - Pneumatic Tube	1	2	2		3	-
3.05.04	OFF-1	Clinic Coordinator Office	1	9.3	9.3		3	-
3.05.05	OFF-1	Cancer patient Navigator Office	1	9.3	9.3	Could be based in alternate location.	3	-
3.05.06	WTA-1	Medical Day Care Sub-Waiting Area	1	6	6	Seating for up to four persons, coat rack, directly adjacent to reception/staff work area.	5	-
3.05.07	MDC-2	Treatment Room (Recliner Chair)	2	13	26	Enclosed room with recliner chair; includes hand hygiene sink.	3	8.01.05, 8.01.08, 8.01.10, 2.06.09
3.05.08	WRS-2	Patient Washroom	1	4.6	4.6		4	-
3.05.09	MDC-1	Treatment Cubicle (Recliner Chair)	4	11	44	Semi-enclosed cubicle with recliner chair; could be configured into 2 pods separated by staff work area. Curtains not recommended due to infection control issues. Include Hand Hygiene Stations in Treatment Area. See CSA Z-8000-11 Table 9.1 Item 8.	1	8.01.05, 8.01.08, 8.01.10, 2.06.09
3.05.10	WRS-2	Patient Washroom	1	4.6	4.6	To be shared and accessible between all 6 treatment rooms; wheelchair accessible.	4	-
3.05.11	KTC-1	Nourishment Alcove	--	0	--	Shared with Renal Care Unit.	4	-
3.05.12	MEA-1	Mobile Equipment Alcove	1	4.6	4.6	For staging of stretchers/wheelchairs.	5	-
3.06	RENAL CARE UNIT							
3.06.01	WKS-1	Reception/Staff Work Area: Workstation	3	3.7	11.1	Three shared touch-down workstations for nursing staff and other providers, including 2 Registered Nurses (Hemodialysis).	1	-
3.06.02	OEQ-1	Reception/Staff Work Area: Office Equipment Alcove	0	1.9		Shared with Medical Day Care Unit	1	-
3.06.03	PNT-1	Reception/Staff Work Area: Pneumatic Tube	0	2		Shared with Medical Day Care Unit	1	-
3.06.04	OFF-1	Offices: Clinical Coordinator	1	9.3	9.3		1	-
3.06.05	OFF-1	Offices: Nurse Practitioner (Renal Insufficiency Clinic)	1	9.3	9.3		1	-
3.06.06	DYS-1	Treatment Station (Open Recliner Chair)	3	7.5	22.5	Flexible, open cubicles each with recliner chair, intended for community dialysis social treatment area. 2400 from centre to centre of recliners, and 1500 mm clear between recliners. See CSA Z-8000-11 Table 9.2. Item 1	4	3.06.15
3.06.07	DYS-1	Treatment Station (Patrial Walls)	2	11	22	Flexible, semi-enclosed cubicles each with recliner chair. See CSA Z-8000-11 Table 9.2.	3	3.06.15
3.06.08	HHS-1	Hand Hygiene Sink	2	1	2	One between each two to three treatment cubicles.	3	-
3.06.09	WRS-1	Patient Washroom	1	4.6	4.6	Wheelchair accessible.	2	-
3.06.10	EXT-3	Treatment /Procedure Area: Isolation Treatment Room	1	16.5	16.5	Flexible room with a contiguous PPE alcove and washroom; can also be used as a negative pressure exam/treatment room; must be stretcher accessible. See CSA Z-8000-11 Table 9.2. Item 2	3	3.06.15, 3.06.11, 3.06.12
3.06.11	PPE-1	Treatment /Procedure Area: Isolation Treatment Room - PPE Prep Alcove	1	2	2	Immediately outside the procedure room (isolation); includes hand hygiene sink, personal protection and equipment (PPE) organizer, and container for soiled materials.	5	3.06.10
3.06.12	WRS-1	Treatment /Procedure Area: Isolation Treatment Room- Patient Washroom	1	4.6	4.6	Wheelchair accessible; contiguous with treatment/procedure room.	3	3.06.10
3.06.13	KTC-1	Nourishment Alcove	1	4.6	4.6	Storage and preparation of patient snacks; sink, counter for coffeemaker, and under counter refrigerator.	4	-
3.06.14	MEA-1	Mobile Equipment Alcove	1	4.6	4.6		4	-
3.06.15	DYS-2	Water Treatment Room	1	20	20	Sized to provide treated water to future dialysis station in ICU.	1	-
3.06.16	---	Wheelchair Scale Alcove	1	2	2		4	-
3.06.17	MEA-1	Wheelchair/Scooter Parking	1	6	6	Dedicated area for wheelchairs and scooters brought in by the patients.	4	-

3.07 SHARED SUPPORT SPACE								
3.07.01	MED-1	Medication Room	1	9.5	9.5	Medication preparation and storage; includes small Pyxis machine. Shared by medical day care and renal unit.	1	-
3.07.02	CLU-1	Clean Utility Room	1	11	11	Storage of clean and sterile supplies.	1	-
3.07.03	SLU-1	Soiled Utility Room	1	12	12	Temporary storage of supplies to be moved for cleaning, reprocessing, or disposal.	2	-
3.07.04	HSK-1	Housekeeping Closet	1	7	7	Housekeeping cart, supplies, mop cleaning.	3	-
3.07.05	STO-1	Equipment Storage Room	1	12	12	Storage and staging of mobile equipment used in the clinics.	4	-
3.07.06	KTC-2	Staff Room	1	12	12	Kitchenette, dining table, 6 chairs.	4	-
3.07.07	WRS-2	Staff Washroom	1	4.6	4.6	Wheelchair accessible.	5	-
4.00 Surgery and Special Procedures								
4.01 SURGERY SUITE								
4.01.01	PRC-3	Surgical Procedure Room	2	38	76	Per CSA Z8000 for four-sided access procedure room; includes space for optional fixed imaging and control alcove. Standard Surgical Procedure Rooms shall be of the same size and same-handed orientation.	1	4.01.24, 4.01.05, 4.01.11, 10.06.17, 10.06.13
4.01.02	PRC-4	Surgical Operating Room (Hybrid)	1	70	70	Per CSA Z8000 for hybrid operation/imaging procedure room.	1	4.01.03, 4.01.04, 4.01.24, 4.01.05, 4.01.11, , 10.06.17, 10.06.13
4.01.03	---	Control Room	1	14	14	Contiguous with hybrid operating room.	1	4.01.02
4.01.04	---	Computer Room	1	10	10	Contiguous with hybrid operating room.	1	4.01.02
4.01.05	ORS-10	Sterile Core	1	27.9	27.9	Requires 7.5 to 9.2 NSM per surgical procedure room exclusive of circulation.	1	-
4.01.06	ORS-9	Scrub Station (2 sinks)	3	1.6	4.8	Pair of two scrub sinks per operating/procedure room.	1	-
4.01.07	CLU-1	Clean Utility Room	1	11	11	Storage of clean and sterile supplies.	1	-
4.01.08	SLU-1	Soiled Utility Room	1	12	12	Temporary storage of supplies and equipment to be removed for cleaning, reprocessing or disposal.	1	-
4.01.09	ORS-1	Clean Case Cart Holding	1	10.8	10.8	Staging of nine clean case carts.	1	-
4.01.10	ORS-2	Soiled Case Cart Holding	1	10.8	10.8	Temporary removal of nine soiled case carts until removal from surgery.	1	-
4.01.11	MEA-2	Anesthesia Support Equipment Alcove	1	2	2	To accommodate spare anesthesia machine.	1	-
4.01.12	ORS-4	Anesthesia Office	1	9.3	9.3	Per CSAZ8000. Should be accessible from hallway within surgery/day procedure zone.	1	-
4.01.13	ORS-5	Frozen Section Laboratory	1	7.4	7.4	To provide intra-operative analysis of surgical specimens by visiting pathologist: required telemedicine technology. Requires access from both the sub sterile corridor and general staff circulation.	1	-
4.01.14	STO-1	Equipment Storage Room	1	14	14	Per CSA Z8000: storage of portable X-ray equipment, stretchers, warming devices, pumps etc.	1	-
4.01.15	PNT-1	Pneumatic Tube	1	2	2		2	-
4.01.16	MEA-2	Mobile Equipment Room	1	4.6	4.6	For mobile equipment with electrical support.	2	-
4.01.17	HSK-1	Housekeeping Closet	1	7	7	Housekeeping cart, floor-level sink, shelving for supplies.	2	-
4.01.18	WKS-1	Surgery Communication Centre: Provider Charting Workstation	2	3.7	7.4	Touchdown stations for providers working in surgery suite.	2	-
4.01.19	WKS-2	Surgery Communication Centre: Clinical Coordinator Workstation	1	9.3	9.3	Private office for Clinical Coordinator.	2	-
4.01.20	WKS-2	Surgery Communication Centre: Operating Room Supply Coordinator	1	4.5	4.5	Dedicated workstation.	3	-
4.01.21	OEQ-1	Surgery Communication Centre: Office Equipment Alcove	1	4	4	Printer/copier/fax machine and other related equipment.	3	-
4.01.22	HHS-1	Surgery Communication Centre: Hand Hygiene Sink	1	1	1		2	-
4.01.23	EXT-4	Patient Holding/Staging Cubicle	1	7.5	7.5	Staging/holding of patients on stretchers arriving from an inpatient unit.	2	-
4.01.24	WKS-1	Post Anesthesia Recovery (Stage 1): Provider Charting Workstation	2	3.7	7.4	Touchdown stations for providers working in the prep/recovery area.	3	4.01.01, 4.01.02
4.01.25	HHS-1	Post Anesthesia Recovery (Stage 1): Hand Hygiene Sink	3	1	3	One shared between each three to four stretcher cubicles.	4	4.01.01, 4.01.02
4.01.26	ORS-6	Post Anesthesia Recovery (Stage 1): Clean Supply/Medication Alcove	1	4.6	4.6	Medication storage and preparation/storage of clean supplies.	4	-
4.01.27	ORS-7	Post Anesthesia Recovery (Stage 1): Soiled Holding Alcove	1	3.7	3.7	Storage of soiled linen cart and waste bins.	4	-
4.01.28	EXT-5	Post Anesthesia Recovery (Stage 1): Stretcher Cubicle	4	9.5	38	Semi-enclosed to provide acoustical separation between cubicles with curtain enclosure. Provide 3 Sided Access	2	-
4.01.29	EXT-6	Post Anesthesia Recovery (Stage 1): Stretcher Cubicle w/ isolation/anteroom	1	18.9	18.9	Includes airborne isolation and anteroom (13.9NSM + 5.0 NSM for anteroom as per CSA Z8000 Table 9.5).	4	-
4.01.30		Male Staff Lockers/Changing Area: Entry Vestibule	1	2.8	2.8		4	-
4.01.31		Male Staff Lockers/Changing Area: Coat Rack/Boot Storage	1	1.9	1.9		4	-
4.01.32		Male Staff Lockers/Changing Area: Lockers	10	0.9	9	Full width lockers.	4	-

4.01.33		0	Male Staff Lockers/Changing Area: Hand Hygiene Sink	1	1	1	In addition to staff washroom.	4	-
4.01.34		0	Male Staff Lockers/Changing Area: Staff Washroom	1	2.8	2.8		4	-
4.01.35		0	Male Staff Lockers/Changing Area: Staff Washroom/Shower	1	6	6	Washroom with shower stall.	4	-
4.01.37		0	Female Staff Lockers/Changing Area: Entry Vestibule	1	2.8	2.8		4	-
4.01.38		0	Female Staff Lockers/Changing Area: Coat Rack/Boot Storage	1	1.9	1.9		4	-
4.01.39		0	Female Staff Lockers/Changing Area: Lockers	20	0.9	18	Full width lockers.	4	-
4.01.40		0	Female Staff Lockers/Changing Area: Hand Hygiene Sink	1	1	1	In addition to staff washroom.	4	-
4.01.41		0	Female Staff Lockers/Changing Area: Staff Washroom	1	2.8	2.8		5	-
4.01.42		0	Female Staff Lockers/Changing Area: Staff Washroom/Shower	1	6	6	Washroom with shower stall.	5	-
4.01.43	KTC-2		Staff Lounge	1	23.8	23.8	Existing room size/configuration could be maintained.	5	-
4.01.44	WRS-1		Post Anesthesia Recovery (Stage 1): Patient Washroom	1	4.6	4.6	Patient washroom adjacent to the Post Anesthesia Recovery area, wheelchair accessible.	3	-
4.02	DAY PROCEDURE UNIT								
4.02.01	WTA-1		Reception/Staff Work Area: Family/Visitor Lounge	1	31	31	Primarily to support day procedure unit and surgery family waiting; also used for outpatient sub waiting area; seating for up to 20 with two wheel chair/bariatric seats. Within view of reception/staff work area.	2	-
4.02.02	WKS-2		Reception/Staff Work Area: Clinical Workstation	1	4.5	4.5	Unit clerk. Designed as clinical workstation and reception. Requires direct view into waiting area.	2	-
4.02.03	WKS-1		Reception/Staff Work Area: Provider Charting Workstation	3	3.7	11.1	Touchdown stations for providers working in DPU.	2	-
4.02.04	WKS-3		Reception/Staff Work Area: Physician Dictation Cubicle	1	4.5	4.5	Semi-enclosed.	2	-
4.02.05	WKS-2		Reception/Staff Work Area: Coordinator Workstation	1	9.3	9.3	Private office for Clinical Coordinator.	2	-
4.02.06	OEQ-2		Reception/Staff Work Area: Office Equipment Alcove	1	6	6	Printer/copier/fax machine and other related equipment.	2	-
4.02.07	HHS-1		Reception/Staff Work Area: Hand Hygiene Sink	1	1	1		2	-
4.02.08	PNT-1		Pneumatic Tube	1	2	2		2	-
4.02.09	WTA-1		Outpatient Sub-Waiting Alcove	1	8	8	Seating for up to six persons with coat rack/alcove: directly adjacent to the staff work area.	2	-
4.02.10	INT-1		Patient Intake Alcove	1	5.6	5.6	Initial assessment (height/weight, vital signs etc.); hand hygiene sink.	2	-
4.02.11	PRC-2		Procedure Room (GI Endoscopy)	2	23	46	GI endoscopies; four-sided access; Connect both procedure rooms with door access.	2	4.02.21, 4.02.12, 10.06.09, 10.06.11
4.02.12	DPU-1		Scope Storage Room	1	7.2	7.2	Accessible from both endoscopy rooms and pass through cabinet opening onto internal circulation.	2	10.06.09, 10.06.11
4.02.13	PRC-2		Procedure Room (Multipurpose)	1	23	23	Cystoscopies and other adult and pediatric procedures; four-sided access. Will accommodate the NOW procedures.	3	10.06.17, 10.06.10, 10.06.13
4.02.14	WTA-1		NOW Waiting Area	1	3	3		3	-
4.02.15	EXT-5		3 Bay Recovery Area	1	21.2	21.2	Equipped with chairs and minimum 7' wide. Used for NOW patients and for other patients who do not require access to a stretcher (e.g. cystoscopies, cataract surgeries).	3	-
4.02.16	WKS-4		Office Workstation	1	5.2	5.2	To accommodate NOW program.	4	-
4.02.17	WRS-2		Patient Washroom	2	4.6	9.2	One contiguous with the multipurpose procedure room and the other adjacent to the two GI endoscopy procedure rooms; wheelchair accessible.	3	-
4.02.18	MEA-1		Mobile Equipment Alcove	1	4.6	4.6	Storage of a stretcher or mobile equipment with electrical support.	3	-
4.02.19	WKS-1		Patient Intake/Prep/Recovery (Stage 2): Staff Charting Workstation	2	3.7	7.4	Touchdown stations for providers working in the prep/recovery area.	4	-
4.02.20	HHS-1		Patient Intake/Prep/Recovery (Stage 2): Hand Hygiene Sink	3	1	3	One shared between each three to four stretcher cubicles. Design not to consider separation of 3 stretchers for NOW program.	3	-
4.02.21	EXT-5		Patient Intake/Prep/Recovery (Stage 2): Stretcher Cubicles	12	9.5	114	Semi-enclosed to provide acoustical separation between cubicles with curtain enclosure.	3	-
4.02.22	WRS-2		Patient Intake/Prep/Recovery (Stage 2): Stretcher Room	1	13	13	With negative pressure stretcher bay.	3	4.02.24

4.02.23	KTC-1	Patient Intake/Prep/Recovery (Stage 2): Nourishment Alcove	1	4.6	4.6	To serve snacks to patients waiting to be discharged; will need an ice cream machine.	3	-
4.02.24	WRS-2	Patient Intake/Prep/Recovery (Stage 2): Ensuite washroom	1	4.6	4.6	In negative pressure stretcher room.	3	-
4.02.25	WRS-1	Patient Intake/Prep/Recovery (Stage 2): Patient Washroom	2	4.6	9.2	Wheelchair accessible.	4	-
4.02.26	CLU-1	Clean Utility Room	1	11	11	Storage of clean and sterile supplies.	2	-
4.02.27	SLU-1	Soiled Utility Room	1	12	12	Temporary storage of supplies and equipment to be removed for cleaning, reprocessing or disposal.	1	-
4.02.28	MED-1	Medication Room	1	9.5	9.5	Medication preparation and storage; includes Pyxis machine.	4	-
4.02.29	STO-1	Equipment Storage Room	1	12	12	Could be located elsewhere in floor or combined with another functional component.	4	-
4.02.30	HSK-1	Housekeeping Closet	1	7	7	Housekeeping cart, floor level sink and shelving for supplies.	4	-
4.02.31	KTC-2	Staff Room	1	12	12	Kitchenette, dining table, and four to six chairs.	4	-
4.02.32	LKR-1	Staff Locker Alcove	1	5.6	5.6	20 stacked purse/tote bag lockers for staff members without dedicated workstation.	4	-
4.02.33	WRS-2	Staff Washroom	1	4.6	4.6	Wheelchair accessible.	5	-
5.00	Outpatient Rehabilitation Centre							
5.01	OUTPATIENT REHABILITATION CENTRE							
5.01.01	WTA-1	Patient Reception/Staging Area: Waiting Area	1	31	31	Seating for up to 20 persons with two wheelchair/bariatric seats; directly adjacent to the staff work area.	3	-
5.01.02		Patient Reception/Staging Area: Records and Office Storage	1	9.3	9.3	Active files, mail, office supplies	3	-
5.01.03	OEQ-2	Patient Reception/Staging Area: Office Equipment Alcove	1	6	6	Printer/copier/fax and other related equipment.	3	-
5.01.04	WKS-2	Patient Reception/Staging Area: Reception/Clerical Workstation	1	3.7	3.7	Reception/check-in desk.	3	-
5.01.05	WTA-2	Patient Reception/Staging Area: Child Play Alcove	1	5	5		3	-
5.01.06	DXS-1	Patient Reception/Staging Area: Patient Washroom	1	4.6	4.6	With change table	3	-
5.01.07	WKS-2	Staff Work Area (Physio/Occ. Therapy): Provider Charting Workstation	8	3.7	29.6	Touchdown stations for physiotherapists.	3	-
5.01.08	WKS-2	Staff Work Area (Physio/Occ. Therapy): Provider Charting Workstation	9	3.7	33.3	Touchdown stations for occupational therapists.	3	-
5.01.09	WKS-2	Staff Work Area (Physio/Occ. Therapy): Clerical Workstation	2	3.7	7.4	Program assistants (physiotherapy and occupational therapy)	3	-
5.01.10	OEQ-1	Staff Work Area (Physio/Occ. Therapy): Office Equipment Alcove	1	4	4	Printer/copier/fax and other related equipment.	3	-
5.01.11	OFF-1	Office: Outpatient Rehabilitation Centre Manager	1	9.3	9.3		3	-
5.01.12	OFF-1	Office: Supervisor OT	1	9.3	9.3		3	-
5.01.13	OFF-1	Office: Supervisor PT	1	9.3	9.3		3	-
5.01.14	OFF-1	Office: Supervisor SLP	1	9.3	9.3		3	-
5.01.15	EXT-1	Exam/Treatment Room (Standard)	2	12	24	Private exam/treatment for PT/OT with plinths (treatment beds)	3	-
5.01.16	CSL-1	Consult Room	1	11	11	Shared OT/PT	3	-
5.01.17		Physical Therapy Treatment Cubicles: Standard	7	8.5	59.5	As per CSAZ8000	3	-
5.01.18		Physical Therapy Treatment Cubicles: Large/Bariatric	4	9.5	38	As per CSAZ8000	3	-
5.01.19		Charting Stations	2	1.4	2.8		3	-
5.01.20	RHB-1	Open Treatment Gym	1	90	90	Open area with plinths, parallel bars, stair, and wall-mounted and floor-mounted exercise equipment. Includes island with double utility sink, ice machine charting workstation	4	-
5.01.21		Equipment Alcove	1	8	8	Used for modality carts, opening off gym	4	-
5.01.22	HHS-1	Hand Hygiene Sink	2	1	2	Easily accessible from gym and treatment cubicles.	4	-
5.01.23	STO-1	Equipment Storage Room (Gym)	1	16	16	Contiguous with open treatment gym. For walkers, crutches, braces etc.	4	-
5.01.24	RHB-2	Whirlpool Room	1	8.5	8.5	Portable whirlpool bath, wax bath	4	-
5.01.25	RHB-3	Occupational Therapy Activity Room	1	67	67	3 large cubicles, upper extremity station, work counter with utility sink, includes room for mobile equipment	4	-
5.01.26	STO-1	Occupational Therapy Workshop	1	20	20	Adjacent to the occupational therapy activity room; work counter with utility sink, grinder, fume hood (for work with glues, solvents), hazardous goods cabinet	4	-
5.01.27		Small Paediatric Exam/Treatment Room	1	12	12	Private exam/treatment for paediatric patients	4	-
5.01.28	WKS-1	Viewing Console	1	4.5	4.5	Contiguous with viewing window into both paediatric rooms.	4	-

5.01.29		0	Large Paediatric Treatment Room	1	40	40	Gross motor activity, suspension equipment	4	-
5.01.30	HHS-1		Hand Hygiene Sink	2	1	2	Easily accessible from OT work areas	4	-
5.01.31	WRS-2		Patient Washroom	2	4.6	9.2	Wheelchair accessible, for all rehab components	4	-
5.01.32	STO-1		Equipment Storage Room (OT Paediatric)	1	8	8	Contiguous with large paediatric treatment room.	4	-
5.01.33	STO-1		Equipment Storage Room (OT Adult)	1	8	8	Soft goods; near OT activity and exam rooms, plus access to off-site storage in warehouse.	4	-
5.01.34	STO-1		Equipment Storage Room (OT Adult)	1	16	16	ADL equipment, plus access to off-site storage in warehouse.	4	-
5.01.35	WKS-1		Provider Work Area (SLP/Audiology): Workstations	7	3.7	25.9	One dedicated office/cubicle per speech language pathologist; off-stage.	4	-
5.01.36	WKS-1		Provider Work Area (SLP/Audiology): Workstations	2	3.7	7.4	One dedicated office/cubicle per audiologist; off-stage.	4	-
5.01.37	WKS-1		Provider Work Area (SLP/Audiology): Workstation	1	3.7	3.7	Program assistant (speech language pathology); off-stage.	4	-
5.01.38	WKS-1		Provider Work Area (SLP/Audiology): Workstation	1	3.7	3.7	Hearing aid practitioner; off-stage.	4	-
5.01.39	OEQ-1		Provider Work Area (SLP/Audiology): Office Equipment Alcove	1	4	4		4	-
5.01.40	RHB-4		SLP/Audiology Testing Suite: Audiology Sound Booth	1	16	16	Prefab sound booth with 2 rooms	4	-
5.01.41		0	SLP/Audiology Testing Suite: Mini Sound Booth	1	12	12	Booth plus station for operator and work station for hearing aid fitting, viewing window, hand hygiene sink	4	-
5.01.42		0	SLP/Audiology Testing Suite: Multi-purpose testing room	1	12	12	ABR (no electrical interference), VNG, hand hygiene sink, work station; and future mini sound booth	4	-
5.01.43		0	Audiology Workshop	1	15	15	Hearing aid fitting room; near the audiology testing suite; includes hand hygiene sink.	4	-
5.01.44	CSL-1		Consult/Assessment Room	4	11	44	Shared by the speech language pathologists, audiologists, and child development team for individual consults and team/family conferences; telehealth capability	4	-
5.01.45	WKS-1		Viewing Console	1	4.5	4.5	Contiguous with viewing window into two of the consult assessment rooms.	4	-
5.01.46	STO-1		Equipment Storage Room (SLP/Audio.)	1	8	8	In SLP/Audiology zone	4	-
5.01.47	WKS-1		Staff Work Area (Child Dev. Team): Workstation	1	3.7	3.7	Child development team coordinator; semi-enclosed.	4	-
5.01.48	WKS-1		Staff Work Area (Child Dev. Team): Workstation	1	3.7	3.7	Fetal alcohol spectrum disorders (FASD) family liaison; semi-enclosed.	4	-
5.01.49	WKS-1		Staff Work Area (Child Dev. Team): Workstation	1	3.7	3.7	Shared by family counselor, social worker, and neuropsychologist.	4	-
5.01.50	HSK-1		Housekeeping Closet	1	7	7	Housekeeping cart, supplies, and mop cleaning.	5	-
5.01.51	STO-1		Equipment Storage Room	1	8	8	For travelling equipment	5	-
5.01.52	CLU-1		Clean Utility Room	1	11	11	Storage of clean and sterile supplies; could be subdivided; temporary staging of supplies and equipment.	5	-
5.01.53	SLU-1		Soiled Utility Room	1	12	12	Temporary storage of supplies to be moved for cleaning, reprocessing, or disposal.	5	-
5.01.54		0	Laundry Room	1	6	6	Washer, dryer, utility sink, storage shelving.	5	-
5.01.55	CFR-1		Conference Room	1	20	20	Seating for 12 persons, telehealth capability.	5	-
5.01.56	KTC-2		Staff Room	1	12	12	Kitchenette, dining table, and six chairs.	5	-
5.01.57	LKR-1		Staff Coats & Boots	33	0.6	19.8	Could be broken into several areas	5	-
5.01.58	WRS-2		Staff Washroom	2	4.6	9.2	Wheelchair accessible.	5	-
6.00	Critical Care Services								
6.01	OUTPATIENT TRIAGE AREA								
6.01.01	---		Ambulance Entrance Area: Ambulance Garage	1	80	80	Minimum area as per CSA Z8000. To be a completely enclosed, heated, drive-through garage, with services and drainage to allow washdown (including adequate hose-bib connections), and planned to accommodate mass-triage	1	-
6.01.02	EMG-1		Ambulance Entrance Area: Ambulance Entrance Vestibule	1	11	11	Entrance for patients on stretchers arriving by ambulance with access to the triage area.	1	-
6.01.03	OFF-1		Ambulance Entrance Area: Office/Staging Area	1	9.3	9.3	For use by police and EMS staff; adjacent to ambulance entrance. Includes firearm storage	1	-
6.01.04	EMG-2		Walk-In Entrance Vestibule	1	7	7	Main ED entrance for patients/visitors who are ambulatory.	1	-
6.01.05	EMG-3		Decontamination Room	1	10	10	Enclosed room exhausted to exterior - Serviced w/ water, deluge shower, eye wash station - Hamper for containment of bio hazardous items/garments - Direct access from Ambulance Bay	4	-
6.01.06	MEA-1		Mobile Equipment Alcove	1	4.6	4.6	Accessible from the walk-in entrance and triage workstation but out of view of general waiting area; for staging of wheelchairs/stretchers primarily.	3	-
6.01.07	WTA-1		Triage/Registration Area: Isolated Triage Sub-Waiting Area	1	6	6	Space for two chairs and a bariatric wheelchair; adjacent to the triage/exam room, for contact isolation of people waiting	4	-

6.01.08	WKS-2	Triage/Registration Area: Registration/Unit Clerk Workstation	1	4.5	4.5	Immediately adjacent to the walk-in and ambulance entrances and contiguous with the triage workstation.	3	-
6.01.09	OEQ-2	Triage/Registration Area: Office Equipment Alcove	1	6	6	Printer/copier/fax machine and other related equipment.	3	-
6.01.10	WKS-1	Triage/Registration Area: Security/Police Workstation	1	9.3	9.3	Workstation for security guard, police, etc.; should be adjacent to triage/registration workstations.	3	-
6.01.11	WKS-1	Triage/Registration Area: Triage Workstation	1	3.7	3.7	Immediately adjacent to the walk-in and ambulance entrances with passage to the acute treatment area; computer workstation and storage for triage supplies.	3	6.01.12
6.01.12	EXT-1	Triage/Registration Area: Triage Assessment Room	1	12	12	Contiguous with the triage workstation.	3	6.01.11
6.01.13	WRS-2	Triage/Registration Area: Patient Washroom	1	4.6	4.6	Contiguous with the triage assessment room; may be used for urine specimen collection; wheelchair accessible.	3	-
6.01.14	WTA-1	General Waiting Area: Family/Visitor Lounge	1	30	30	Seating for up to 20 persons with space for two wheelchairs and a bariatric seat; amenity station and coat rack.	3	-
6.01.15	WTA-2	General Waiting Area: Child Play Alcove	1	5	5	Contiguous with the general waiting area; small alcove with child's table and chairs, books, and small toys for quiet play.	3	-
6.01.16	EMG-4	General Waiting Area: Phone/Communications Carrel	2	1.9	3.8	Alcove adjacent to the general waiting area for private phone conversations and/or recharging of handheld communications devices.	4	-
6.01.17	EMG-5	Family Consult/Bereavement Room	1	12	12	Adjacent to the general waiting area.	3	-
6.01.18	WRS-2	Public Washroom	2	4.6	9.2	Near the general waiting area; wheelchair accessible.	4	-
6.02	MINOR TREATMENT AREA							
6.02.01	WKS-1	Reception/Staff Work Area: Provider Charting Workstation	2	3.7	7.4		2	-
6.02.02	WKS-3	Reception/Staff Work Area: Physician Dictation/Consult Alcove	1	4.5	4.5	Private alcove for phone consult with PACS workstation.	2	-
6.02.03	OEQ-1	Reception/Staff Work Area: Office Equipment Alcove	1	4	4	Printer/copier/fax machine and other related equipment.	2	-
6.02.04	HHS-1	Reception/Staff Work Area: Hand Hygiene Sink	1	1	1		2	-
6.02.05	WTA-1	Minor Treatment Sub-Waiting Area	1	6	6	Seating for up to four persons; directly adjacent to the staff work area.	2	-
6.02.06	EXT-5	Exam/Treatment Cubicle (General)	3	12	36	Standard exam room. Used with Acute Care for Rapid Assessment.	2	-
6.02.07	EMG-10	Psychiatric Exam/Consult Room	1	12	12	Located close to triage station. Soft furnishings required.	3	-
6.02.08	EMG-6	Suture/Casting Room (Two Bays)	1	14.8	14.8	Private room with two bays with plaster trap/sink and suture/casting cart; could be designed to flex for a bariatric patient.	3	-
6.02.09	WRS-2	Patient Washroom	1	4.6	4.6	Central to exam/treatment spaces; wheelchair accessible.	2	-
6.02.10	CLU-1	Clean Utility Room	--	11	--	Shared with Acute Care Area; storage of clean and sterile supplies.	3	-
6.02.11	SLU-1	Soiled Utility Room	--	12	--	Shared with Acute Care Area; temporary storage of supplies and equipment to be removed for cleaning, reprocessing, or disposal.	3	-
6.02.12	MED-1	Medication Room	--	12	--	Medication preparation, large Pyxis unit, locked narcotics storage, and refrigerator/freezer; shared with Acute Treatment Area.	4	-
6.03	ACUTE TREATMENT AREA							
6.03.01	WKS-2	Communication Centre: Unit Clerk Workstation	1	4.5	4.5	Dedicated workstation for the Unit Clerk.	1	-
6.03.02	WKS-1	Communication Centre: Provider Charting Workstation	4	3.7	14.8		1	-
6.03.03	WKS-4	Communication Centre: Physician Dictation Alcove	1	4.5	4.5	Private alcove with PACS workstation.	1	-
6.03.04	OEQ-1	Communication Centre: Office Equipment Alcove	1	4	4	Printer/copier/fax machine and other related equipment.	1	-
6.03.05	HHS-1	Communication Centre: Hand Hygiene Sink	1	1	1		1	-
6.03.06	EMG-7	Trauma/Resuscitation Room	1	56	56	Enclosed AIR room with sliding doors and two treatment bays (at 28.0 NSM each per CSA Z8000); shared touch-down workstations and medication/supply storage; negative pressure. Ceiling lift required. Provision for future radiology unit.	1	2.02.12, 2.02.13, 2.02.20, 2.06.02, 2.06.09
6.03.07	MEA-2	Mobile Equipment Alcove	1	4.6	4.6	Adjacent to the trauma/resuscitation room.	1	-
6.03.08	EXT-1	Exam/Treatment Room (General)	2	12	24	General exam/treatment room; also used for pediatrics and/or disruptive patients.	1	-
6.03.09	EXT-3	Airborne Isolation Suite: Exam/Treatment Room (Isolation)	1	13	13	Airborne isolation exam/treatment room (AIR); also equipped with ceiling-mounted patient lift track for a bariatric patient.	1	6.03.11
6.03.10	---	Airborne Isolation Suite: PPE Alcove	1	2	2	Immediately outside the exam/treatment room (isolation); includes hand hygiene sink, personal protection and equipment (PPE) organizer, and container for soiled materials.	1	6.03.10

6.03.11	WRS-2	Airborne Isolation Suite: Patient Washroom/Shower	1	4.6	4.6	Contiguous with the exam/treatment room (isolation).	1	6.03.10
6.03.12	EXT-5	Clinical Decision Unit (CDU): Stretcher Cubicle	4	9.5	38	Stretcher holding bay with curtain closure. Must be observable from an Emergency Department staff work station.	1	2.02.12, 2.02.14, 2.02.20
6.03.13	HHS-1	Clinical Decision Unit (CDU): Hand Hygiene Sink	1	1	1		1	-
6.03.14	EXT-1	Ob-Gyn Exam Suite: Exam/Treatment Room (Ob-Gyn)	1	12	12	Private room with ob-gyn exam table.	1	6.03.16
6.03.15	WRS-2	Ob-Gyn Exam Suite: Patient Washroom	1	4.6	4.6	Contiguous with the ob-gyn exam room.	1	6.03.15
6.03.16	EXT-1	Exam/Treatment Room (EENT)	1	15.5	15.5	Per CSA Z8000; private room with exam chair and slit lamp.	2	-
6.03.17	EMG-8	Seclusion Suite: Seclusion/Safe Treatment Room	1	12	12	Private room with fixed floor bed with restraint points; requires observation window with one-way glass.	2	-
6.03.18	WRS-2	Seclusion Suite: Patient Washroom	1	4.6	4.6	Contiguous with the seclusion/safe exam room.	2	-
6.03.19	WRS-2	Patient Washroom	2	4.6	9.2	Easily accessible from exam/treatment spaces and CDU.	3	6.03.19
6.03.20	CLU-2	Clean Utility Room	1	11	11	Storage of clean and sterile supplies; to be shared with Minor Treatment Area.	1	-
6.03.21	SLU-2	Soiled Utility Room	1	12	12	Temporary storage of supplies and equipment to be removed for cleaning, reprocessing, or disposal; to be shared with Minor Treatment Area.	3	-
6.03.22	MEA-2	Mobile Equipment Alcove	1	4.6	4.6	Temporary staging of wheelchairs and other mobile equipment.	3	-
6.03.23	MED-1	Medication Room	1	12	12	Medication preparation, large Pyxis unit, locked narcotics storage, and refrigerator/freezer; shared with ICU and Minor Treatment Area.	3	8.01.05
6.03.24	EMG-9	Lab Accessioning Alcove	1	3.7	3.7	Storage of specimen collection supplies and temporary holding of specimens for laboratory pick-up.	3	-
6.03.25	STO-1	Equipment Storage Room	1	18	18	Shared with ICU; Also used for testing of respiratory equipment; includes medical air, oxygen, etc.	1	-
6.03.26	HSK-1	Housekeeping Closet	1	7	7	Staging of housekeeping cart and mop cleaning; shared with ICU.	3	-
6.03.27	PNT-1	Pneumatic Tube	1	2	2	Shared with Minor Treatment Central Work Area	4	-
6.03.28	WKS-1	CDU: Provider Charting Workstation	1	3.7	3.7	To be adjacent with direct observation to the CDU	3	-
6.04	INTENSIVE CARE UNIT							
6.04.01	OFF-1	Staff Work Area: Office	1	9.3	9.3	Clinical Coordinator.	1	-
6.04.02	WKS-1	Staff Work Area: Provider Charting Workstation	3	3.7	11.1		1	-
6.04.03	WKS-3	Staff Work Area: Physician Dictation Alcove	1	4.5	4.5	Private alcove with PACS workstation.	1	-
6.04.04	OEQ-1	Staff Work Area: Office Equipment Alcove	1	4	4	Printer/copier/fax machine and other related equipment.	1	-
6.04.05	HHS-1	Staff Work Area: Hand Hygiene Sink	1	1	1		1	-
6.04.06	PNT-1	Pneumatic Tube	1	2	2		1	-
6.04.07	ICU-1	Intensive Care Unit Bedroom Suite (Standard): Critical Care Cubicle	4	23.2	92.8	Includes staff charting, hand hygiene sink, and supply alcove; ceiling lifts required. One patient room to include rough-in for future dialysis capability. Requires access to natural light.	2	6.04.22
6.04.08	WRS-2	Intensive Care Unit Bedroom Suite (Standard): Patient Washroom	--	--	--	Deleted 1 critical care cubicle and developed AIR CC Bedroom with anteroom.	1	-
6.04.09	---	Intensive Care Unit Bedroom Suite (Standard): Charting Alcove	--	--	--	Included in bedroom space per HHS.	1	-
6.04.10	---	Intensive Care Unit Bedroom Suite (Standard): Supply Alcove	--	--	--	Included in bedroom space per HHS.	1	-
6.04.11	---	AIR Critical Care Bedroom Suite (One-Bed)	1	23.2	23.2	Requires access to natural light.	2	-
6.04.12	---	AIR Critical Care Bedroom Suite (One-Bed): Anteroom	1	4	4	Includes hand hygiene sink, personal protection and equipment (PPE) organizer, and hamper for soiled materials.	2	6.04.14
6.04.13	---	AIR Critical Care Bedroom Suite (One-Bed): Family Zone	--	--	--	Included in bedroom space.	2	-
6.04.14	---	AIR Critical Care Bedroom Suite (One-Bed): Staff Zone	--	--	--	Included in bedroom space.	2	-
6.04.15	---	AIR Critical Care Bedroom Suite (One-Bed): Washroom/Shower	1	5.6	5.6		2	-
6.04.16	---	High-Dependency Bedroom (One-Bed)	1	23.2	23.2	Requires access to natural light.	3	-
6.04.17	---	High-Dependency Bedroom (One-Bed): Washroom/Shower (Roll-In)	1	5.6	5.6	Optimal; can be reduced to 4.6 NSM for washroom only.	3	-
6.04.18	KTC-1	Nourishment Alcove	1	4.6	4.6	Storage and preparation of patient meals or snacks; shared with ED.	3	-
6.04.19	CLU-1	Clean Utility Room	1	11	11	Storage of clean and sterile supplies.	3	-

6.04.20	SLU-1	Soiled Utility Room	1	12	12	Temporary storage of supplies and equipment to be removed for cleaning, reprocessing, or disposal.	3	-
6.04.21	WRS-2	Staff Washroom	1	4.6	4.6	Wheelchair accessible.	3	-
6.04.22	WRB-1	Patient Washroom/Shower	1	5.6	5.6	Central to intensive care cubicles.	3	-
6.04.23	MEA-2	Mobile Equipment Alcove	1	4.6	4.6	Temporary staging of wheelchairs and other mobile equipment.	4	-
6.04.24	MED-1	Medication Room	--	12	--	Medication preparation, large Pyxis unit, locked narcotics storage, and refrigerator/freezer; shared with Acute Treatment Area.	4	8.01.05
6.04.25	---	ICU: Family Room	1	15	15	Room with seating and kitchenette for family members of ICU patients.	3	-
6.04.26	WRS-1	ICU: Family Washroom	1	4.6	4.6	Adjacent to ICU: family room	3	-
6.04.27	WKS-1	RT Touchdown Station	1	3.7	3.7	Touchdown station for Respiratory Therapist located in ICU	4	-
6.05	SHARED STAFF SUPPORT SPACE							
6.05.01	OFF-1	Office	1	9.3	9.3	For the manager who oversees critical care services.	3	-
6.05.02	OFF-1	Office	1	9.3	9.3	For the Clinical Coordinator who oversees the ED and ICU.	3	-
6.05.03	CFR-1	Conference Room	1	15	15	Seating for eight to ten persons.	4	-
6.05.04	KTC-2	Staff Room	1	12	12	Kitchenette, dining table, and six chairs. To be located centrally for use by all Critical Care Staff.	4	-
6.05.05	WRS-2	Staff Washroom	2	4.6	9.2		5	-
6.05.06	LKR-1	Staff Lockers Alcove	1	5.6	5.6	20 stacked purse/tote bag lockers for staff without dedicated workstation.	5	-
7.00	Inpatient Services							
7.01	MEDICAL UNIT							
7.01.01	WKS-2	Central Staff Work Area: Clerical Workstation	1	4.5	4.5	Unit clerk.	1	-
7.01.02		Waiting Area	1	6	6	Accommodates 4 people	5	-
7.01.03	WRS-2	Public Washroom	1	4.6	4.6	Wheelchair accessible, adjacent to waiting area.	3	-
7.01.04	WKS-2	Central Staff Work Area: Coordinator Workstation	1	9.3	9.3	Private office for Clinical Coordinator.	1	-

APPENDIX 8B

CONSTRUCTION PAYMENTS

1. DEFINITIONS

In this Appendix, in addition to the definitions set out in Schedule 1 of this Agreement:

“**Construction Payment**” has the meaning set out in Section 2 of this Appendix;

“**Cost to Date**” as at a date means the total amounts paid or payable by Project Co to the Design-Builder under the Design-Build Agreement (including the amount of any holdback required under the *Mechanics Lien Act* (Northwest Territories) and any reserves retained in connection with the Existing Hospital Security and the Initial Remediation Work) for Construction performed by the Design-Builder, as certified by the Independent Certifier as contemplated in Section 3.4 of Schedule 2 [Design and Construction Protocols];

“**Lenders’ Technical Advisor**” means the Person appointed by the Senior Lenders from time to time to advise the Senior Lenders on technical matters, including with respect to certain conditions precedent to advances under the Senior Financing Agreements; and

“**Table 8B-1**” means Table 8B-1 attached to this Appendix.

2. CONSTRUCTION PAYMENT AMOUNTS

The Authority will make quarterly payments (each a “**Construction Payment**”) to Project Co during the Construction Period in accordance with this Appendix.¹ The amount payable by the Authority to Project Co as a Construction Payment as at the end of the month indicated in Table 8B-1 will be the amount by which the lesser of:

- (a) the cumulative maximum applicable to that month as set out in Column B of Table 8B-1; and
- (b) █████ of Cost to Date at the end of that month

exceeds the total of all Construction Payments previously paid by the Authority to Project Co under this Appendix.

These payments are intended as funding and to qualify as one of the listed items in paragraph 12(1)(x) of the *Income Tax Act* (Canada).

¹ An exception is made for the last Construction Payment which will occur two months subsequent to the Prior Construction Payment

3. INVOICING AND PAYMENT

Project Co will invoice the Authority for Construction Payments at any time after the end of the applicable quarter and will include with that invoice:

- (a) a certificate of the Independent Certifier certifying (in the manner outlined in Section 3.4 of Schedule 2 [Design and Construction Protocols]) the Cost to Date, as at the end of the applicable quarter;
- (b) the amount of GST payable;
- (c) copies of all certifications (including from the Lender's Technical Advisor) provided to, and communications from, the Senior Lenders (other than those previously provided under this Appendix) with respect to payments to the Design-Builder, the cost to complete the Project, the sufficiency of funds available to Project Co to complete the Project and the likelihood that Service Commencement will be achieved by the Longstop Date;
- (d) a certificate of an officer of Project Co certifying:
 - (1) that Project Co is in compliance with all applicable provisions of the Senior Financing Agreements and the Design-Build Agreement with respect to all payments to the Design-Builder made on or before the date of the invoice;
 - (2) that Project Co has taken all steps required under the Senior Financing Agreement to draw the funds required (in addition to the amounts invoiced to the Authority) to pay the Design-Builder and knows of no reason why such funds would not be advanced as requested;
 - (3) that Project Co is not in default under either the Project Agreement or any of the Senior Financing Agreements;
 - (4) that Project Co has available to it sufficient funds to complete the Project; and
 - (5) the month and year by which the Project can reasonably be expected to achieve Service Commencement.

The Authority will review each invoice submitted by Project Co in accordance with this Section 3 within 10 calendar days and will pay to Project Co the amount approved by the Authority within 30 calendar days of receipt of the relevant invoice.

SCHEDULE 9

COMPENSATION ON TERMINATION

1. INTERPRETATION

1.1 Definitions

In this Schedule, in addition to the definitions set out in Schedule 1 to this Agreement:

“Adjusted Estimated Market Value” means the Estimated Market Value:

- (a) less an amount, without duplication, equal to the aggregate of:
 - (1) any Re-Bidding Costs; and
 - (2) any other amounts that the Authority is entitled to set-off or deduct under this Agreement,
- (b) plus an amount, without duplication, equal to the aggregate of:
 - (1) any Insurance Proceeds and Insurance Receivables;
 - (2) any accrued but unpaid amounts owing and payable by the Authority to Project Co under this Agreement;
 - (3) all credit balances on any bank account held by or on behalf of Project Co on the date the Estimated Market Value is calculated; and
 - (4) any other amounts that are owing to Project Co (and that Project Co is entitled to retain),

to the extent that any of the above amounts have not been included in calculating the Estimated Market Value and, in the case of (b)(1) and (b)(3) above, the Authority has received or been assigned such amounts and is entitled to retain them;

“Adjusted Highest Compliant Bid Price” means the Highest Compliant Bid Price:

- (a) less an amount, without duplication, equal to the aggregate of:
 - (1) any Re-Bidding Costs; and
 - (2) any other amounts that the Authority is entitled to set-off or deduct under this Agreement; and
 - (3) the amount by which:
 - (A) all reasonable costs and expenses incurred by the Authority, during the period commencing on the day following the Termination Date and ending on the Termination Payment Date (or, as the case may be, the date on which it is agreed or determined that no Termination Payment is payable by the Authority under this Agreement), to carry out and perform (or to procure the carrying out and performance of), in the manner and to the standards contemplated by this Agreement, the obligations,

responsibilities, activities and work that would, but for the termination of this Agreement, have been the responsibility and obligation of Project Co under this Agreement (including, without limitation, the rectification and mitigation of all defaults by Project Co occurring prior to such termination); exceeds

- (B) the amount of the Service Payments, if any, that would have been payable to Project Co but for the termination of this Agreement that relates directly to the provision of Services;
- (b) plus an amount, without duplication, equal to the aggregate of:
- (1) any Insurance Proceeds and Insurance Receivables;
 - (2) any accrued but unpaid amounts owing and payable by the Authority to Project Co under this Agreement;
 - (3) all credit balances on any bank account held by or on behalf of Project Co on the date that the highest priced Compliant Bid is received or, if no Compliant Bid is received on the final date for submission of bids pursuant to the Re-Bidding Process; and
 - (4) any other amounts that are owing to Project Co (and that Project Co is entitled to retain),

to the extent that any of the above amounts has not been taken into account in the relevant Compliant Bid and, in the case of (b)(1) and (b)(3) above, the Authority has received or been assigned such amounts and is entitled to retain them;

“Compliant Bid” means a bid, proposal or other submission pursuant to a competitive process which meets the reasonable criteria that the Authority requires the party making the submission to meet as part of the Re-Bidding Process, which unless otherwise agreed by Project Co and the Authority will include:

- (a) compliance with the New Project Agreement terms;
- (b) the financial ability to pay the proposed capital sum as a single, lump sum payment to be made as of the date of the New Project Agreement and the financial ability to comply with the New Project Agreement terms for the price proposed;
- (c) such party is experienced in maintaining and operating a facility similar to the Facility or providing services similar to the Design and Construction and/or Services, as applicable;
- (d) the technical solution proposed by such party is capable of delivery and such party is technically capable of delivering and maintaining the Project or the remainder thereof, as the case may be;
- (e) such party is not a Restricted Person; and
- (f) such party is not Project Co or any of its Affiliates;

“Employee Information” means written details related to employees employed by Project Co or any of the Project Contractors or Sub-Contractors whose work (or any part of it) is work undertaken for the purposes of the Project, including:

- (a) the staffing plan and total number of such employees;

- (b) the employment costs for such employees;
- (c) the amount of severance payable to such employees used in the calculation of any Employee Payment and all relevant information used in determining such amounts; and
- (d) any other information that the Authority may reasonably require in relation to the calculation of Employee Payments in respect of Project Co or any relevant Project Contractor or Sub-Contractors;

“Estimated Market Value” means the amount (calculated as at the day following the Termination Date) determined to be the Fair Market Value of a New Project Agreement pursuant to Section 4.2 or 4.3 of this Schedule;

“Highest Compliant Bid Price” means the price offered by the Person making the Compliant Bid (if any) with the highest bid price;

“Liquid Market” means that there are sufficient willing parties (being at least two parties each of whom is capable of submitting a Compliant Bid in a Re-Bidding Process and each of whom deals with the Authority at arm’s length) in the market for agreements in Canada for the provision of services under public private partnerships or other basis similar to this Agreement for the price that is likely to be achieved through a competitive process to be a reliable indicator of the Fair Market Value of a New Project Agreement, provided that any entity controlled and established by the Senior Lenders specifically for the purposes of this Project will not be counted for the purpose of determining whether there are sufficient willing bidders in the market;

“Project Risk Premium” means [redacted] [being the difference between (i) [redacted] (equal to the financial close pre-tax Project IRR) and (ii) [redacted] (being the yield as determined by the parties at financial close on the Government of Canada [redacted] Bond maturing [redacted])];

“Re-Bidding Costs” means the reasonable costs incurred by the Authority in connection with the Re-Bidding Process or the calculation of the Estimated Market Value;

“Re-Bidding Process” means the process by which the Authority requests bids from parties interested in entering into a New Project Agreement, evaluates the responses from such of those parties that submit Compliant Bids and enters into a New Project Agreement with a New Project Co in accordance with Section 3 of this Schedule;

“Re-Bidding Process Monitor” means a third party appointed by Project Co pursuant to Section 3.10 of this Schedule;

“Senior Debt Termination Amount” has the meaning set out in Section 2.1(b)(1) of this Schedule;

“Termination Date Benchmark Canada Bond Yield” means the yield to maturity on a benchmark Government of Canada Bond of the same maturity as the average life of the outstanding Senior Debt, Junior Debt and equity on the Termination Date, provided however that if there is no benchmark Government of Canada Bond with the same maturity the relevant yield will be calculated from the interpolated yield of the two most relevant and liquid benchmark Government of Canada Bonds; and

“Termination Date Discount Rate” means a discount rate equal to the Project Risk Premium plus the Termination Date Benchmark Canada Bond Yield.

2. TERMINATION FOR AUTHORITY EVENT OF DEFAULT OR AT AUTHORITY'S OPTION

2.1 Calculation

If either the Authority or Project Co terminates this Agreement pursuant to Section 2.1(a), Section 6.6 (Authority Election Not to Reinstate) or Section 13 (Authority Events of Default), the Authority will pay to Project Co on the Termination Payment Date a Termination Payment equal to the greater of:

- (a) the amount which would be determined under Section 5.1 of this Schedule if it applied; and
- (b) the aggregate amount, without duplication, of:
 - (1) the Senior Debt as at the Termination Date with per diem interest on amounts falling within paragraph (a) of the definition of Senior Debt calculated at the non-default interest rate provided for such amounts in the Senior Financing Agreements for the period from (but excluding) the Termination Date until (and including) the Termination Payment Date (the "**Senior Debt Termination Amount**");
 - (2) the Employee Payments and the Project Contractor Breakage Costs;
 - (3) any accrued but unpaid amounts owing and payable by the Authority to Project Co under this Agreement;
 - (4) any Insurance Receivables, if and to the extent Project Co has assigned them to the Authority; and
 - (5) the aggregate amount for which the then issued and outstanding Units and any amounts outstanding under Junior Debt could have been sold for Fair Market Value on the date immediately before the Termination Date based on the assumption that there has been no default by the Authority, that the sale is on a going concern basis and that no restrictions exist on the transfer of equity capital;

LESS, to the extent it is a positive amount, the aggregate amount, without double counting, of:

- (6) the aggregate of all credit balances on any bank accounts held by or on behalf of Project Co on the Termination Date that are secured in favour of the Senior Lenders;
- (7) the value of any amounts due and payable from third parties (but only when received from third parties) but excluding any claims under a Project Contract or claims against other third parties which have not been determined or have been determined but not yet paid provided that in such case Project Co will assign any such rights and claims under the Project Contracts or claims against other third parties to the Authority and give the Authority reasonable assistance in prosecuting such claims;
- (8) to the extent not taken into account in calculating the amount under (b) above, the amount of any Contingent Funding Liabilities that are triggered as a result of or in relation to a termination of this Agreement;
- (9) the market value of any other assets and rights of Project Co (other than those transferred to the Authority pursuant to this Agreement) less liabilities of Project

Co properly incurred in carrying out its obligations under this Agreement as at the Termination Date to the extent realised before the Termination Payment Date provided that no account will be taken of any liabilities and obligations of Project Co arising out of:

- (A) agreements or arrangements entered into by Project Co to the extent that such agreements or arrangements were not entered into in connection with Project Co's obligations in relation to the Project; or
 - (B) agreements or arrangements entered into by Project Co to the extent that such agreements or arrangements were not entered into in the ordinary course of business and on commercial arm's length terms.
- (10) any amounts, including hedging termination amounts and other breakage costs, payable by the Senior Lenders to Project Co as a result of a prepayment under the Senior Financing Agreements;
 - (11) any amounts received by the Senior Lenders (or on their behalf) on or after the Termination Date and before the Termination Payment Date as a result of enforcing any other rights or security the Senior Lenders may have under the Senior Financing Agreements in respect of Senior Debt (net of the reasonable and proper costs incurred in such enforcement); and
 - (12) any other amounts that the Authority is entitled to set-off or deduct under this Agreement.

To the extent that the assets and rights referred to in Section 2.1(b)(9) above are not realised and applied pursuant to that Section, Project Co will on payment of the amount due under this Section 2.1 assign such assets and rights to the Authority.

2.2 Notice to the Authority

As soon as practicable after termination of this Agreement pursuant to Section 2.1(a), Section 6.6 (Authority Election Not to Reinstate), Section 6.7(d) (Insufficient Insurance) or Section 13.3 (Project Co's Options), Project Co will, acting reasonably, notify the Authority of the Termination Payment as of an estimated Termination Payment Date and include in such notice the details and calculations of each component thereof, including a revised and up to date Financial Model and certificates from the Senior Lenders as to the amounts owed to them. Project Co will provide to the Authority all such documents and information as may be reasonably required by the Authority to confirm the amount of the Termination Payment including Employee Information.

3. TERMINATION FOR PROJECT CO EVENT OF DEFAULT: RE-BIDDING PROCESS

3.1 Authority Election

If the Authority terminates this Agreement in accordance with Section 12.4 (Authority Termination Right), the Authority may, within 20 Business Days after the Termination Date, give notice to Project Co electing to have this Section 3 of this Schedule apply if:

- (a) there is a Liquid Market as at the Termination Date; and
- (b) the Senior Lenders:
 - (1) either (i) have not exercised their rights under Section 4 of the Lenders' Remedies Agreement and have no further right to exercise such rights; or (ii) if

they have exercised such rights, they have subsequently exercised their rights under Section 3.4 of the Lenders' Remedies Agreement or their rights under Section 4 of the Lenders' Remedies Agreement have otherwise terminated in accordance with the Lenders' Remedies Agreement; or

- (2) have not transferred Project Co's rights and obligations under this Agreement to a Suitable Substitute Project Co in accordance with the Lenders' Remedies Agreement and have no further right to do so, and have not demonstrated to the Authority's satisfaction, acting reasonably, that they have used all reasonable efforts to do so,

but otherwise the Authority will require a determination in accordance with Section 4 of this Schedule and the provisions of that Section will apply.

3.2 Re-Bidding Process

If Section 3 of this Schedule applies, the Authority will:

- (a) use all reasonable efforts to:
 - (1) conduct the Re-Bidding Process so as to obtain the maximum Highest Compliant Bid Price; and
 - (2) implement and complete the Re-Bidding Process as soon as practicable after making the election under Section 3.1 of this Schedule; and
- (b) notify, as soon as practicable and acting reasonably, Project Co of the requirements and terms of the Re-Bidding Process, including the timing of the Re-Bidding Process and the criteria for a Compliant Bid and other matters which will be required to be taken into account by a Compliant Bid. Information provided to bidders during the Re-Bidding Process will include similar information to that provided to bidders in the original procurement process for the Project taking into consideration the relevance of such information and the status of the Project at the time of the Re-Bidding Process. All such references to bids and bidders include references to proposals and proponents and similar terms under other competitive projects.

3.3 Release of Information

Project Co hereby authorizes the Authority to release any information that is reasonably required under the Re-Bidding Process which would otherwise be subject to the restrictions in Section 17.1 (Confidentiality) and Section 17.2 (Personal Information).

3.4 Determination and Payment of Termination Payment

If Section 3 of this Schedule applies and:

- (a) the Adjusted Highest Compliant Bid Price is a positive amount, the Authority will pay to Project Co on the Termination Payment Date a Termination Payment equal to the Adjusted Highest Compliant Bid Price; or
- (b) the Adjusted Highest Compliant Bid Price is less than zero, an amount by which the Adjusted Highest Compliant Bid Price is less than zero will be due and payable by Project Co to the Authority on the earliest to occur of the dates referred to in Sections 7.1(a)(1) and 7.1(a)(2) of this Schedule.

3.5 Notice to Project Co

As soon as practicable after receipt of the bids, the Authority will, acting reasonably, determine the Compliant Bids and will notify Project Co of the Adjusted Highest Compliant Bid Price and include in such notice the details and calculations of each component thereof.

3.6 New Project Agreement

Notwithstanding any Dispute relating to the Highest Compliant Bid Price, the Adjusted Highest Compliant Bid Price or the Re-Bidding Process, the Authority will be entitled to enter into a New Project Agreement with the New Project Co in accordance with the Re-Bidding Process.

3.7 Subsequent Authority Election

At any time prior to receipt by the Authority of a Compliant Bid or at any time thereafter with the consent of Project Co, acting reasonably, the Authority may, by notice to Project Co, elect for the provisions of Section 4 of this Schedule to apply and on such notice:

- (a) the provisions of Section 4 of this Schedule will apply; and
- (b) the Authority will have no liability to Project Co in respect of any breach of the provisions of Section 3 of this Schedule or in respect of making such election.

3.8 Authority Decision Not to Complete

The Authority will not be obligated to accept the Compliant Bid with the Highest Compliant Bid Price or to enter into any New Project Agreement with the New Project Co, however if the Authority has received a Compliant Bid but decides not to accept it or to enter into a New Project Agreement, the Authority will notify Project Co of this decision, Section 3.4 of this Schedule will continue to apply and the Termination Payment Date will be 20 Business Days after the Authority so notifies Project Co.

3.9 Time Limit For Re-Bidding Process

Subject to Section 3.8 of this Schedule, if the Authority makes an election under Section 3.1 of this Schedule but the Authority has not signed a New Project Agreement with a New Project Co as contemplated by Section 3 of this Schedule within 18 months after the Termination Date, the provisions of Section 4 of this Schedule will apply.

3.10 Appointment of Re-Bidding Process Monitor

Project Co may, at its own cost, appoint a Re-Bidding Process Monitor for the purpose of monitoring and reporting to Project Co and the Senior Lenders on the Authority's compliance with the Re-Bidding Process.

3.11 Role of Re-Bidding Process Monitor

The Re-Bidding Process Monitor will be entitled to attend all meetings relating to the Re-Bidding Process, inspect copies of all relevant documentation and make submissions to the Authority as to compliance with the Re-Bidding Process. The Authority will not be bound to consider or act upon such submissions. The Re-Bidding Process Monitor will not disclose Confidential Information to Project Co or the Senior Lenders or take any action which might materially delay or interfere with the Re-Bidding Process but will be entitled to advise Project Co and the Senior Lenders on whether it considers that the Authority has acted in accordance with the Re-Bidding Process and determined the Highest Compliant Bid Price.

3.12 Post-Termination Date Payment

If this Agreement is terminated in accordance with Section 12.4 (Authority Termination Right), during the period from the Termination Date to the Termination Payment Date the Authority will, on or before the later of:

- (a) 2 Business Days prior to each interest payment date under the Senior Financing Agreements; and
- (b) 30 calendar days after the Authority has received written notice from Project Co of the amount of interest payable by it on such interest payment date,

as an advance against the payment to be made pursuant to this Section 3, pay to Project Co the interest payable on that interest payment date by Project Co to the Senior Lenders in the normal course (which, for greater certainty, does not include breach or default circumstances) under the Senior Financing Agreements. The Authority may withhold payment if the Authority has reasonable grounds to believe that the aggregate of that payment and all such previous payments would exceed the Termination Payment otherwise payable under this Section 3. All payments under this Section 3.12 will be deducted from the Termination Payment and any over-payment will be re-paid by Project Co no later than the Termination Payment Date.

4. PROJECT CO EVENT OF DEFAULT: NO RE-BIDDING PROCESS

4.1 Application for No Re-Bidding Process

The provisions of Section 4 of this Schedule will apply if:

- (a) the Authority terminates this Agreement in accordance with Section 12.4 (Authority Termination Right) and does not, or is not entitled to, make an election under Section 3.1 of this Schedule;
- (b) the Authority so elects under Section 3.7 of this Schedule; or
- (c) Section 3.9 of this Schedule requires it.

4.2 Determination of Adjusted Estimated Market Value

Project Co and the Authority will act reasonably in agreeing on the Adjusted Estimated Market Value which will be calculated as at the day following the Termination Payment Date, provided that in determining the Estimated Market Value (which will be determined by deducting the aggregate of the amounts referred to in Section 4.2(d) of this Schedule from the aggregate of the amounts referred to in Section 4.2(c) of this Schedule):

- (a) this Agreement will be assumed not to have been terminated and neither party is in default under its terms;
- (b) all forecast amounts will be calculated on a Nominal basis;
- (c) each of the following will be calculated and discounted at the Termination Date Discount Rate:
 - (1) all future Service Payments which according to the Financial Model Project Co expected to receive from the Termination Date to the Expiry Date; and

- (2) all amounts payable by the Authority to Project Co in respect of a Supervening Event or Authority Change and all other payments, other than any such amounts and payments that are reflected in the Service Payments as set out in (1) above, which the Authority is required to make to Project Co prior to the Expiry Date which Project Co has not been paid in accordance with this Agreement, including any applicable Construction Payments not yet paid;
- (d) the total of all costs forecast to be reasonably incurred by the Authority as a result of termination and related to providing the Design, Construction and Services itself or by others from the Termination Date to the Expiry Date will be calculated and discounted at the Termination Date Discount Rate, such costs to include (without double counting):
- (1) all reasonable costs required to put the Facility in the condition required by this Agreement (including, in the case of termination prior to Service Commencement, the reasonable costs required to be expended to achieve Service Commencement) and to meet the level of performance for the Services, that will deliver the Service Payments referred to in Section 4.2(c)(1) of this Schedule;
- (2) an amount equal to all Taxes deemed paid by Project Co to achieve the Base Case Project IRR; and
- (3) the projected cost of operating, maintaining and performing life cycle rehabilitation for the Facility from the Termination Date to the Expiry Date, such costs to be determined on the basis that:
- (A) the costs referred to in Section 4.2(d)(1) of this Schedule put the Facility in the condition required by this Agreement and that the Facility meets the said level of performance for the Services; and
- (B) in the case of termination prior to the Service Commencement Date, costs in respect of Services that have not yet commenced will be in amounts contemplated by the Financial Model at the Effective Date,
- in each case such costs to be in substantially similar categories to those set out in the Financial Model at the Effective Date, but not (subject to (B) above) necessarily of the same amounts as those costs set out in the Financial Model at the date of this Agreement, and to be forecast at a level that will deliver the Service Payments referred to in Section 4.2(c)(1) of this Schedule, with such costs to include a reasonable risk margin to cover a realistic and reasonable risk assessment of likely cost overruns; and
- (e) if Section 182 of the *Excise Tax Act (Canada)* is applicable to the Termination Payment payable under this Section, the Estimated Market Value will be increased by an amount such that after remitting the applicable GST Project Co will be in the same position as it would have been if Section 182 of the *Excise Tax Act (Canada)* were not applicable.

The above determined amount will be adjusted to the extent required under Section 6.1 of this Schedule.

4.3 Determination by Valuator

If the Authority and Project Co cannot agree on the Adjusted Estimated Market Value within 20 Business Days after the date on which the Authority elected for the provisions of Section 4 of this Schedule to apply or they were deemed to apply, then either party may require, by notice to the other party, that the Adjusted Estimated Market Value be determined by a Valuator as of an estimated Termination Payment Date. If the parties cannot agree on the appointment of a Valuator within 5 Business Days of such notice,

the appointment of the Valuator will be a Dispute and resolved, with a Valuator appointed, pursuant to the Dispute Resolution Procedure. The Authority and Project Co will each pay one-half of the fees of, and any costs and expenses incurred by, the Valuator. The parties will cooperate with, and provide all such information as may reasonably be required by, the Valuator to assist in the Valuator's determination of the Adjusted Estimated Market Value.

4.4 Determination and Payment of Termination Payment

If Section 4 of this Schedule applies and:

- (a) the Adjusted Estimated Market Value is a positive amount, the Authority will pay to Project Co on the Termination Payment Date a Termination Payment equal to the Adjusted Estimated Market Value; and
- (b) the Adjusted Estimated Market Value is less than zero, an amount equal to the amount by which the Adjusted Estimated Market Value is less than zero will be due and payable by Project Co to the Authority by the earliest of:
 - (1) 40 Business Days after the parties have agreed or been deemed to have agreed the Adjusted Estimated Market Value; and
 - (2) 30 Business Days after the amount of the Adjusted Estimated Market Value is determined under the Dispute Resolution Procedure.

5. NO-FAULT TERMINATION

5.1 Calculation

If Project Co or the Authority terminates this Agreement pursuant to Sections 6.7, 6.8, 6.9, 6.15, 8.4 or 8.6 of this Agreement, the Authority will pay to Project Co on the Termination Payment Date a Termination Payment equal to the aggregate of:

- (a) the Senior Debt Termination Amount;
- (b) any accrued but unpaid amounts owing and payable by the Authority to Project Co under this Agreement;
- (c) the amount, if any, by which the Junior Debt exceeds the amount of all Distributions made in respect of Junior Debt;
- (d) the amount, if any, by which the amount of capital contributed to Project Co by the Partners exceeds the amount of Distributions made by Project Co to its Partners; and
- (e) the Employee Payments and the Project Contractor Breakage Costs,

less:

- (f) the amount of any Distributions other than those referred to in (c) and (d) above; and
- (g) any other amounts that the Authority is entitled to set-off or deduct under this Agreement.

If the aggregate of the amount calculated above is less than the Senior Debt Termination Amount plus the amount referred to in (e) above, then the Termination Payment will be increased so that it is equal to the aggregate of the Senior Debt Termination Amount plus the amount referred to in (e) above.

5.2 Notice to the Authority

As soon as practicable after termination of this Agreement as contemplated by this Section 5, Project Co will, acting reasonably, notify the Authority of the Termination Payment as of an estimated Termination Payment Date and include in such notice the details and calculations of each component thereof, including a revised and up to date Financial Model and certificates from the Senior Lenders as to the amounts owed to them and will also provide to the Authority all such documents and information reasonably required by the Authority to confirm the amount of the Termination Payment including Employee Information.

6. ADJUSTMENTS AND DISPUTES

6.1 Income Tax Gross-Up - Partnership Project Co

For the purpose of this Section 6.1:

“Deemed Corporate Project Co” means a fictional fully taxable single purpose British Columbia resident corporation that (i) is, and has since the date of this Agreement been, a subsidiary of a public corporation carrying on an active business with the same fiscal year end as Project Co; and (ii) has had the same revenues and expenses as Project Co and has taken all exemptions, relief, allowances, deductions, set offs and credits permitted under laws relating to Income Taxes (including any that would be available in relation to the Project) since the date of this Agreement so as to minimize its Income Tax payable; and

“Taxable Shareholder Portion” means:

- (a) [REDACTED] if Project Co is a taxable entity with respect to Income Tax; or
- (b) that percentage, measured as at the Termination Date, of the total equity interests of Project Co that are not owned, directly or indirectly, by persons (1) described in Section 149 of the *Income Tax Act (Canada)*, or the equivalent section if there are changes to the *Income Tax Act (Canada)*, and (2) not subject to the payment of Income Tax in respect of payments by Project Co from proceeds of the Termination Payment.

If a Termination Payment is payable by the Authority under Section 2 or Section 5 of this Schedule and such Termination Payment would, in the hands of a Deemed Corporate Project Co (if the Deemed Corporate Project Co were being paid the Termination Payment), be subject to Income Tax payable to a Governmental Authority within Canada that would not have been payable but for the fact that such amount is payable as compensation on termination, then the Authority will pay to Project Co the Taxable Shareholder Portion of the additional amount that would be required to be paid to the Deemed Corporate Project Co (if the Deemed Corporate Project Co were being paid the Termination Payment) to put it in the same position after Income Tax as it would have been in had the Termination Payment (or portion thereof) not been subject to any such Income Tax, taking account of any exemption, relief, allowances, deduction, setting off or credit in respect of Income Tax (whether available by choice or not) which would be available to the Deemed Corporate Project Co to reduce the Tax to which the Termination Payment, or any portion thereof, would be subject.

6.2 Time Related Adjustments

It is understood that the calculations of the Termination Payment pursuant to Sections 2, 4 and 5 of this Schedule are as of an estimated Termination Payment Date and that such estimated date may not be the actual Termination Payment Date for reasons including the existence of a Dispute. The parties will act reasonably in adjusting the amount of such calculated Termination Payment to reflect the actual Termination Payment Date.

6.3 Senior Debt

The Authority will be entitled to rely on one or more certificates of officers of the Senior Lenders or their agent(s) as conclusive evidence of the amount of the Senior Debt Termination Amount. The receipt of this amount by Project Co, the Senior Lenders or their agent(s) will discharge the Authority's obligation to pay any portion of compensation due to Project Co that is attributable to the Senior Debt.

6.4 Disputes

If:

- (a) the Authority does not agree with Project Co's determination of the Termination Payment under Section 2 or Section 5 of this Schedule, the Authority may, within 20 Business Days of the notice referred to in Section 2.2 or Section 5.2 of this Schedule as the case may be, refer the matter to the Dispute Resolution Procedure; or
- (b) Project Co does not agree with the Authority's determination of the Adjusted Highest Compliant Bid Price under Section 3 of this Schedule or the Valuator's determination of the Adjusted Estimated Market Value under Section 4 of this Schedule, Project Co may, within 20 Business Days of the notice referred to in Section 3.5 of this Schedule or the Valuator's determination under Section 4.3 of this Schedule, refer the matter to the Dispute Resolution Procedure.

If either party does not refer the matter to the Dispute Resolution Procedure within the periods provided for in (a) or (b) above, as applicable, such party will be deemed to have agreed to the amount of the applicable determination of the Termination Payment as of the estimated Termination Payment Date.

7. PAYMENTS

7.1 Termination Payment Date

The Termination Payment Date will be determined as follows:

- (a) if the Termination Payment is determined pursuant to Sections 2, 4 or 5 of this Schedule, the Termination Payment Date will be:
 - (1) if the amount thereof is agreed to or deemed agreed to by the Authority and Project Co on the earliest of:
 - (A) the date advised by the Authority; and
 - (B) 40 Business Days after such agreement or deemed agreement, as the case may be; or
 - (2) if the amount thereof is the subject of a Dispute, 30 Business Days after the amount of the Termination Payment is determined under the Dispute Resolution Procedure; and
- (b) if the Termination Payment is determined pursuant to Section 3 of this Schedule, the Termination Payment Date will be the earliest of:
 - (1) 30 Business Days after the Adjusted Highest Compliant Bid Price has been agreed or determined pursuant to the Dispute Resolution Procedure; and

- (2) 20 Business Days after the New Project Co has executed and delivered the New Project Agreement.

7.2 Tax Allocations

The Authority and Project Co will:

- (a) act reasonably and will co-operate with each other to determine the Income Tax treatment resulting from a Termination Payment and to allocate the Termination Payment to each of the non-fixed assets transferred to the Authority pursuant to Section 14.2 (Transfer to Authority of Assets, Contracts, etc.) so as to minimize the amount of Taxes payable on such transfer;
- (b) failing agreement on such treatment or allocation, use the treatment or allocation determined by the Authority unless and until such time as a different treatment or allocation is determined under the Dispute Resolution Procedure or by Canada Revenue Agency (after all appeals have been exhausted); and
- (c) use the allocation agreed to in (a) above or determined in accordance with (b) above in their respective Tax filings and returns.

7.3 Liability for Sales Taxes

The Authority will be responsible for all applicable sales Taxes payable in connection with the transfers referred to in Section 14.2 (Transfer to the Authority of Assets, Contracts, etc.) and will either pay all such sales Taxes directly or reimburse Project Co for such sales Taxes if Project Co is required to and does remit such sales Taxes.

7.4 GST Filings

If Section 182 of the *Excise Tax Act (Canada)* applies to a Termination Payment, the Authority and Project Co will submit their respective GST filings in respect of any period in which a Termination Payment was made on the basis that Section 182 of the *Excise Tax Act (Canada)* will apply to any such Termination Payment.

7.5 Full Settlement

Any and all amounts paid by the Authority to Project Co under this Schedule or any agreement or determination that the Authority has no obligations to make any payment to Project Co under this Schedule will be in full and final settlement of each party's rights and claims against each other for termination of this Agreement and any Project Contract, whether under contract, tort, restitution or otherwise, but without prejudice to:

- (a) any antecedent liability of either party to the other that arose prior to the date of termination of this Agreement (but not from the termination itself) to the extent such liability has not already been taken into account in determining the Termination Payment; and
- (b) any liability of either party to the other that may arise after the date of termination of this Agreement (but not from the termination itself), including, for greater certainty, liabilities arising under the provisions of this Agreement which are intended by Section 17.11 (Survival) to survive termination, to the extent any such liability has not already been taken into account in determining the Termination Payment.

SCHEDULE 10

LENDERS' REMEDIES AGREEMENT

THIS AGREEMENT is dated as of September 22, 2015

BETWEEN:

The Government of the Northwest Territories
(the "Authority")

AND:

Computershare Trust Company of Canada
(the "Agent"), as agent for the Senior Lenders

AND:

Boreal Health Partnership
(**"Project Co"**)

WHEREAS:

- A. The Authority and Project Co have entered into the Project Agreement (defined below);
- B. Pursuant to the Trust Indenture (defined below), the Senior Lenders have agreed, subject to the terms and conditions contained therein, to make available to Project Co the loan facility specified therein to finance certain costs to be incurred and expenditures to be made by Project Co in connection with the Project Agreement;
- C. It is a condition precedent to the obligations of the Senior Lenders under the Trust Indenture that this Agreement be executed and delivered by the parties; and
- D. The Authority and Project Co have agreed under the terms of the Project Agreement to execute and deliver this Agreement.

NOW THEREFORE in consideration of the mutual promises and agreements of the parties herein expressed and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties covenant and agree as follows:

1. DEFINITION AND INTERPRETATION

1.1 Definition

Unless otherwise specified or the context otherwise requires, capitalized but otherwise undefined terms in this Agreement will have the respective meanings given to such terms in the Project Agreement, and:

"Agent's Withdrawal Notice" has the meaning set out in Section 3.4;

“Agreement” means this agreement, including any recitals to this agreement, as amended, supplemented or restated from time to time;

“Antecedent Liabilities” means, as at any time:

- (a) all amounts due and payable by Project Co to the Authority under the Project Agreement at such time; and
- (b) all obligations which should have, but have not, been performed and outstanding liabilities of Project Co under the Project Agreement, in each case at such time;

“Appointed Representative” means the Senior Lenders’ Representative identified in a Step-In Notice;

“Deficiency” has the meaning set out in Section 9.4(b);

“Discharged Obligations” has the meaning set out in Section 6.4;

“Discharged Rights” has the meaning set out in Section 6.4;

“Event of Default” has the meaning set out in the Trust Indenture;

“Finance Parties” has the meaning set out in the Trust Indenture;

“Indenture Trustee” has the meaning set out in the Trust Indenture;

“Indicative Notice Period” means:

- (a) where an Indicative Step-In Notice has been given, the period commencing on the date of delivery of such Indicative Step-In Notice and ending on the earlier of:
 - (i) the Step-In Date;
 - (ii) the date of delivery of an Agent’s Withdrawal Notice; and
 - (iii) 45 Business Days following the date of delivery of such Indicative Step-In Notice;
- (b) where an Indicative Transfer Notice has been given, the period commencing on the date of delivery of such Indicative Transfer Notice and ending on the earlier of:
 - (i) the date on which any transfer in accordance with Section 6.1 becomes effective;
 - (ii) the date of delivery of an Agent’s Withdrawal Notice; and

45 Business Days following the date of delivery of such Indicative Transfer Notice;

“Indicative Notice” means either an Indicative Step-In Notice or an Indicative Transfer Notice given in accordance with Section 3.3;

“Indicative Step-In Notice” has the meaning given to it in Section 3.3;

“Indicative Transfer Notice” has the meaning given to it in Section 3.3;

“Insolvency Law” means any of the *Bankruptcy and Insolvency Act* (Canada), the *Companies’ Creditors Arrangement Act* (Canada) and the *Winding-Up and Restructuring Act* (Canada) and any other applicable insolvency or other similar law of any jurisdiction, including any applicable law of any jurisdiction permitting a debtor to obtain a stay or a compromise of the claims of its creditors against it;

“Insolvency Officer” means any trustee, receiver, receiver and manager, liquidator, sequestrator, administrator or other custodian in connection with the insolvency of Project Co or any of its assets;

“Insolvency Proceedings” means:

- (a) any:
 - (i) formal step (including petition, proposal, application, convening of a meeting or other proceeding) taken with a view to or for the purpose of considering;
 - (ii) appointment of an Insolvency Officer in connection with;
 - (iii) order or resolution passed in connection with; or
 - (iv) formal agreement reached regarding,

a dissolution, bankruptcy, receivership, winding-up, liquidation, administration or other similar proceedings or any other proceeding seeking a stay of proceedings, reorganisation, debt arrangement, compromise of the claims of creditors or any distribution of assets in respect of Project Co (whether voluntary or involuntary) made or commenced by any party under any Insolvency Law; or
- (b) any distress, attachment, sequestration or execution or other similar process affecting any of the assets of Project Co or any other similar process or event occurring in relation to Project Co’s assets in any other jurisdiction;

“Insurance Trust Account” has the meaning given to it in the Trust Indenture;

“Liability Report” has the meaning given in Section 3.5;

“Material Antecedent Liabilities” means Antecedent Liabilities that are:

- (a) financial liabilities; or
- (b) non-financial liabilities, the breach of which will trigger any remedy of the Authority under Section 9.1 (Project Co’s Obligation to Indemnify) or Section 12 (Project Co Events of Default) of the Project Agreement;

“Notice Period” means:

- (a) in respect of a Project Co Event of Default, the Termination Notice Period; and

(b) in respect of an Event of Default, the Indicative Notice Period;

“Project Agreement” means the agreement dated September 22, 2015 between Project Co and the Authority relating to the design, construction, financing, maintenance, operation and life cycle rehabilitation of the Facility;

“Project Documents” means, collectively, the Project Agreement and any other agreement (other than this Agreement) entered into from time to time by the Authority and Project Co (with or without other parties) in connection with the Project; and **“Project Document”** means any one of the foregoing;

“Reported Antecedent Liabilities” means the Antecedent Liabilities identified in the Liability Report;

“Revised Senior Debt Termination Amount” means the amount of the Senior Debt as at the Termination Date with per diem interest on amounts falling within paragraph (a) of the definition of Senior Debt calculated at the non-default interest rate provided for such amounts in the Senior Financing Agreements for the Period from (but excluding) the Termination Date until (and including) the Termination Payment Date;

“Revocation of Termination Notice” means a written notice from the Authority to the Agent revoking a Termination Notice;

“Security Documents” has the meaning as set out in the Trust Indenture;

“Senior Debt Discharge Date” means the date on which all amounts due and owing to the Senior Lenders under the Senior Financing Agreements have been fully and irrevocably paid or discharged (whether or not as a result of enforcement) and the Senior Lenders are under no further obligation to advance under the relevant Senior Financing Agreement;

“Senior Lenders’ Representative” means:

- (a) the Agent, or any Senior Lender;
- (b) a receiver or receiver and manager of Project Co appointed under or in connection with the Security Documents; or
- (c) any other Person approved by the Authority (such approval not to be unreasonably withheld or delayed);

“Step-In Date” means 5 Business Days after delivery of a Step-In Notice;

“Step-In Notice” means a notice given by the Agent to the Authority pursuant to Section 4;

“Step-In Period” means, subject to Section 4.3, the period from the Step-In Date up to and including the earliest of:

- (a) the Step-Out Date;
- (b) the date of any transfer under Section 6;

- (c) the date of any termination under Section 4.5; and
- (d) the Expiry Date;

“Step-Out Date” means the date that is 20 Business Days after the date of a Step-Out Notice;

“Step-Out Notice” means a notice from the Agent or Appointed Representative to the Authority pursuant to Section 5;

“Suitable Substitute Project Co” means a Person approved by the Authority in accordance with Sections 6.2 and 6.3 as:

- (a) having the legal capacity, power and authority to become a party to and perform the obligations of Project Co under the Project Agreement; and
- (b) employing or contracting for the services of persons having the appropriate qualifications, experience and technical competence and having the resources available to it (including committed financial resources and sub-contracts) which are sufficient to enable it to perform the obligations of Project Co under the Project Agreement;

“Termination Notice” means a notice given by the Authority to the Agent under Section 3;

“Termination Notice Period” means the period beginning on the date of giving of a Termination Notice and ending on the earlier of:

- (a) the Step-In Date;
- (b) the date of service of a Revocation of Termination Notice; and
- (c) the proposed Termination Date (subject to the minimum notice requirements under Section 3.1(a)) set out in the Termination Notice; and

“Trust Indenture” means the trust indenture dated September 22, 2015 between: (i) Boreal Health Partnership as issuer; (ii) Bird Capital (STH) GP Holdings Inc., Hochtief Boreal Health Partner Inc., Carillion BHP (STH) GP Holdings Inc. as partners; and (iii) Computershare Trust Company of Canada as Indenture Trustee.

1.2 Construction and Interpretation

This Agreement will be interpreted according to the following provisions, save to the extent that the context or the express provisions of this Agreement otherwise require:

- (a) the parties waive the application of any rule of law which otherwise would be applicable in connection with the construction of this Agreement that ambiguous or conflicting terms or provisions should be construed against the party who (or whose counsel) prepared the executed agreement or any earlier draft of the same;

- (b) the table of contents, headings and sub-headings, marginal notes and references to them in this Agreement are for convenience of reference only, do not constitute a part of this Agreement, and will not be taken into consideration in the interpretation or construction of, or affect the meaning of, this Agreement;
- (c) each reference in this Agreement to "**Section**" is to a section of this Agreement;
- (d) each reference to an agreement, document, standard, principle or other instrument includes (subject to all relevant approvals and any other provision of this Agreement expressly concerning such agreement, document, standard, principle or other instrument) a reference to that agreement, document, standard, principle or instrument as amended, supplemented, replaced, novated or assigned, and a reference to an "amendment" and similar terms (including "amend" and "amended") include a reference to supplement, alteration, substitute, variation, change and any other modification and similar terms;
- (e) each reference to a statute or statutory provision (including any subordinate legislation) includes any statute or statutory provision which amends, extends, consolidates or replaces the statute or statutory provision or which has been amended, extended, consolidated or replaced by the statute or statutory provision and includes any orders, regulations, by-laws, ordinances, orders, codes of practice, instruments or other subordinate legislation made under the relevant statute;
- (f) each reference to time of day is a reference to Mountain Standard time or Mountain Daylight Saving time, as the case may be;
- (g) words importing the singular include the plural and vice versa;
- (h) words importing a particular gender include all genders;
- (i) each reference to a public organization is deemed to include a reference to any successor(s) to such public organization or any organization or entity or organizations or entities which has or have taken over the functions or responsibilities of such public organization;
- (j) unless the context otherwise requires, each reference to "parties" means the parties to this Agreement and each reference to a "party" means any one of the parties to this Agreement, provided however that a reference to a third party does not mean a party to this Agreement;
- (k) all monetary amounts are expressed in Canadian Dollars;
- (l) the words "include", "includes" and "including" are to be construed as meaning "include without limitation", "includes without limitation" and "including without limitation", respectively;
- (m) any consent contemplated to be given under this Agreement must be in writing;
- (n) general words are not given a restrictive meaning:

- (i) if they are introduced by the word “other”, by reason of the fact that they are preceded by words indicating a particular class of act, matter or thing; or
 - (ii) by reason of the fact that they are followed by particular examples intended to be embraced by those general words;
- (o) the expression “all reasonable efforts” and expressions of like import, when used in connection with an obligation of the Senior Lenders, the Agent, the Indenture Trustee, the Appointed Representative or any other Senior Lenders’ Representative, means taking in good faith and with due diligence all commercially reasonable steps to achieve the objective and to perform the obligation, including doing all that can reasonably be done in the circumstances, and in any event taking no less steps and efforts than those that would be taken by a commercially reasonable and prudent Person in comparable circumstances but where the whole of the benefit of the obligation and where all the results of taking such steps and efforts accrued solely to that Person’s own benefit;
- (p) all accounting and financial terms used herein are, unless otherwise indicated, to be interpreted and applied in accordance with Canadian generally accepted accounting principles, consistently applied;
- (q) if the time for doing an act falls or expires on a day that is not a Business Day, the time for doing such act will be extended to the next Business Day; and
- (r) each provision of this Agreement will be valid and enforceable to the fullest extent permitted by law. If any provision of this Agreement is held to be invalid, unenforceable or illegal to any extent, such provision may be severed and such invalidity, unenforceability or illegality will not prejudice or affect the validity, enforceability and legality of the remaining provisions of this Agreement. If any such provision of this Agreement is held to be invalid, unenforceable or illegal, the parties will promptly endeavour in good faith to negotiate new provisions to eliminate such invalidity, unenforceability or illegality and to restore this Agreement as nearly as possible to its original intent and effect.

1.3 Governing Law

This Agreement will be deemed to be made pursuant to the laws of the Northwest Territories and the laws of Canada applicable therein and will be governed by and construed in accordance with such laws.

1.4 Attornment

For the purposes of any legal actions or proceedings brought by any party hereto against the other party, the parties hereby irrevocably submit to the exclusive jurisdiction of the courts of the Northwest Territories and acknowledge their competence and the convenience and propriety of the venue and agree to be bound by any judgment thereof and not to seek, and hereby waive, review of its merits by the courts of any other jurisdiction.

2. CONSENT TO SECURITY

2.1 Consent

The Authority acknowledges notice of, and consents to, the security interest granted by Project Co in favour of the Finance Parties under the Trust Indenture and Security Documents over:

- (a) Project Co's rights under the Project Agreement and all other Project Documents;
- (b) Project Co's assets; and
- (c) Project Co's rights to Insurance Proceeds and Insurance Receivables.

2.2 No Notice of Other Security

The Authority confirms that as of the date of this Agreement it has not received written notice of any other security interest granted over Project Co's rights described in Sections 2.1 other than pursuant to the Trust Indenture and Security Documents.

2.3 Authority Obligations

Except as specifically provided for in this Agreement or the Insurance Trust Agreement, the Authority has no obligations (whether express, implied, collateral or otherwise) to the Agent or the Senior Lenders in connection with this Agreement, the Project Agreement or the Project. All of the obligations and liabilities given, undertaken or arising on the part of the Authority under this Agreement are given solely to the Agent on behalf of the Senior Lenders and do not confer any rights on or in favour of Project Co or any Affiliate of Project Co or any other Person.

2.4 Authority's Rights not Prejudiced

The parties acknowledge that nothing in the Senior Financing Agreements, this Agreement or any other agreement between any of them (including any giving by the Agent of a notice hereunder) will, except as between the Senior Lenders, the Agent and the Authority as expressly set out in this Agreement, affect the rights of the Authority under the Project Agreement (but an exercise by the Authority of those rights will not preclude a proper exercise by the Agent of its rights under this Agreement). For greater certainty and without limiting the generality of the foregoing, nothing in this Agreement will limit, and the Authority will be entitled at all times in accordance with the provisions thereof to exercise the Authority's rights under Section 11.1(a) (Authority's Step-In Rights) of the Project Agreement and the related exercise of its rights under Section 11.2 (Authority's Rectification Rights) of the Project Agreement.

3. NOTICES

3.1 Termination Notice

The Authority will not terminate or deliver any notice terminating the Project Agreement without giving to the Agent written notice (a "**Termination Notice**") stating:

- (a) that a Project Co Event of Default has occurred and the proposed Termination Date, which will be not sooner than 60 Business Days after the Termination Notice; and
- (b) the grounds for termination in reasonable detail.

3.2 Notice of Event of Default

Concurrently with delivery by it to Project Co of any notice of an Event of Default, the Agent will provide a copy of such notice to the Authority, together with reasonable details of such Event of Default.

3.3 Indicative Notice

Without prejudice to the Indenture Trustee's rights under the Security Documents, at any time upon the occurrence of an Event of Default, and where relevant to such Event of Default the continuance of such Event of Default, the Agent may give notice to the Authority of its intention to nominate a Senior Lenders' Representative to step-in in accordance with Section 4.1 (an "**Indicative Step-In Notice**") or to effect a transfer in accordance with Section 6.1 (an "**Indicative Transfer Notice**").

3.4 Agent's Withdrawal Notice

If at any time after the giving of an Indicative Notice or a Termination Notice, the Agent has determined that it is not, or is no longer, considering appointing a Senior Lenders' Representative or effecting a transfer of Project Co's rights and liabilities under the Project Agreement to a Suitable Substitute Project Co in accordance with this Agreement, the Agent will give notice (an "**Agent's Withdrawal Notice**") to the Authority and thereafter the provisions of this Agreement will not be applicable with respect to the event that led to such Indicative Notice or Termination Notice and the Authority will be at liberty to take any and all action available to it under the Project Agreement and other Project Documents.

3.5 Notice of Antecedent Liabilities

Unless an Agent's Withdrawal Notice has been given, not later than 20 Business Days after the date of delivery by the Authority of a Termination Notice or the date of delivery by the Agent of an Indicative Notice, as the case may be, the Authority will give the Agent a notice (the "**Liability Report**") containing details of:

- (a) any Material Antecedent Liabilities accrued and outstanding as of the date of delivery of the Termination Notice or Indicative Notice, as the case may be; and
- (b) any financial liabilities of which the Authority is aware (after reasonable enquiry) that will fall due under the Project Agreement on or after the date of delivery of the Termination Notice or Indicative Notice, as the case may be, and on or prior to:
 - (i) in the case of a Termination Notice, the proposed Termination Date set out in that notice; and
 - (ii) in the case of an Indicative Notice, 40 Business Days after the date of delivery of the Indicative Notice.

3.6 Subsequent Authority Notice of Liabilities

After the delivery of the Liability Report, unless an Agent's Withdrawal Notice has been given, the Authority will, promptly upon becoming aware of them, notify the Agent in writing of any additional Material Antecedent Liabilities arising on or after the date of delivery of the Termination Notice or Indicative Notice, as the case may be, and prior to the end of the Termination Notice Period or the Indicative Notice Period, as the case may be.

3.7 No Right to Terminate

The Authority will not terminate or deliver any notice terminating the Project Agreement during any Notice Period, provided however that until the expiry of that period the Authority will be entitled to require Project Co to remedy any Project Co Event of Default and will be entitled to exercise all rights under the Project Agreement other than termination of the Project Agreement.

4. STEP-IN

4.1 Step-In Notice

Subject to Section 4.3 and without prejudice to the Indenture Trustee's rights under the Security Documents, the Agent may give the Authority a notice (a "**Step-In Notice**") at any time during an Indicative Notice Period or a Termination Notice Period, as the case may be.

4.2 Contents of Step-In Notice

In the Step-In Notice, the Agent will:

- (a) state that it intends to exercise its step-in rights under this Agreement; and
- (b) identify the Appointed Representative.

4.3 One Step-In Period

There will be not more than one Step-In Period following any one Indicative Notice or Termination Notice.

4.4 Appointed Representative Rights

On the Step-In Date, the Appointed Representative will assume jointly and severally with Project Co the rights of Project Co under the Project Agreement, which rights are conditional on and may be exercised subject to performance of Project Co's obligations under the Project Agreement. During the Step-In Period, the Authority will deal with the Appointed Representative and not Project Co. No Appointed Representative will be liable to the Authority or Project Co for any liabilities or obligations of Project Co. An Appointed Representative who is also an Insolvency Officer will not, and will not be required to, assume or have any personal liability for any liabilities or obligations of Project Co.

4.5 Authority Right to Terminate

The Authority will not terminate the Project Agreement in whole or in part during the Step-In Period except as set out in this Section 4.5. The Authority will be entitled to terminate the Project Agreement during the Step-In Period by written notice to Project Co, the Agent and the Appointed Representative:

- (a) if the Reported Antecedent Liabilities that are financial liabilities have not been paid to the Authority on or before the Step-In Date or, if the due date for payment thereof is after the Step-In Date, have not been paid by the due date;
- (b) if amounts, of which the Authority was not aware (having made reasonable enquiry) at the time of the Liability Report, subsequently become payable and are not discharged by:
 - (i) if notice of the liability is given to the Agent at least 20 Business Days prior to the Step-In Date, the Step-In Date or, if the due date for payment thereof is after the Step-In Date, the due date;
 - (ii) if notice of the liability is given to the Agent within 20 Business Days before the Step-In Date and such liability is material (as stated by the Authority, acting reasonably, when it gives such notice or as stated by the Agent, acting reasonably, by notice to the Authority within 5 Business Days of receipt of the notice from the Authority), 20 Business Days after the Step-In Date or, if later, the due date; or
 - (iii) otherwise, 20 Business Days after delivery of the notice or, if later, the due date;
- (c) on grounds arising after the Step-In Date in accordance with the terms of the Project Agreement (other than a Project Co Insolvency Event), provided that for the purposes of termination under the Project Agreement, any Deductions that arose prior to the Step-In Date will not be taken into account during the Step-In Period;
- (d) on grounds arising prior to the Step-In Date (whether or not continuing at the Step-In Date) in accordance with the terms of the Project Agreement but only if the Appointed Representative is not using all reasonable efforts to remedy the relevant Antecedent Liabilities which are non-financial liabilities; or
- (e) if the Service Commencement Date does not occur on or before the date that is 6 months after the Longstop Date.

5. STEP-OUT

5.1 Step-Out Notice

The Agent or the Appointed Representative may at any time during the Step-In Period deliver to the Authority a Step-Out Notice which specifies the Step-Out Date.

5.2 Expiry of Step-In Period

Upon the termination or expiry of the Step-In Period:

- (a) the rights of the Authority against the Appointed Representative and the rights of the Appointed Representative against the Authority will be cancelled; and
- (b) the Authority will no longer deal with the Appointed Representative and will deal with Project Co in connection with the Project Agreement.

5.3 Project Co Remains Bound

Subject to Section 6.4, Project Co will continue to be bound by the terms of the Project Agreement notwithstanding the occurrence of an Indicative Notice, a Step-In Notice, a Step-In Period, a Step-Out Notice, a Step-Out Date, any action by the Agent, Appointed Representative, Indenture Trustee or the Senior Lenders or any provision of this Agreement, and for greater certainty Project Co will be liable for any obligations and liabilities arising prior to the expiry of the Step-In Period from actions or inactions of the Agent, the Appointed Representative, Indenture Trustee or Senior Lenders. Project Co will remain liable for any unpaid amounts due and payable to the Authority by Project Co under the Project Agreement provided that Project Co will not be required to discharge such liability during the Step-In Period.

6. SENIOR LENDER REPLACEMENT OF PROJECT CO

6.1 Project Co Transfer Notice

Subject to Section 6.2, at any time:

- (a) during a Termination Notice Period;
- (b) during an Indicative Notice Period; or
- (c) during a Step-In Period,

the Agent may, on 30 Business Days' notice to the Authority and any Appointed Representative, take any action available to it to cause the transfer of Project Co's rights and liabilities under the Project Agreement to a Suitable Substitute Project Co in accordance with the provisions of Section 6.4.

6.2 Authority Consent

The Authority will notify the Agent as to whether any Person to whom the Agent proposes to transfer Project Co's rights and liabilities under the Project Agreement is a Suitable Substitute Project Co, not later than 20 Business Days after the date of receipt from the Agent of all information reasonably required by the Authority to decide whether the proposed transferee is a Suitable Substitute Project Co and if the Authority fails to notify the Agent within such period, the proposed transferee will be deemed to be a Suitable Substitute Project Co.

6.3 Withholding of Consent

The Authority will not unreasonably withhold or delay its decision on whether the proposed transferee is a Suitable Substitute Project Co and it will, without limitation, be reasonable for the Authority to withhold its consent:

- (a) if there are unremedied breaches under the Project Agreement and there is no remedial program reasonably acceptable to the Authority in respect of the breaches; or
- (b) based on any of the factors set out in Section 16.3 (Factors Authority May Consider) of the Project Agreement with respect to any transfer, including any assignment, to such Person or Change in Control resulting from the transfer.

6.4 Terms of Transfer

Upon the transfer referred to in Section 6.1 becoming effective:

- (a) Project Co and the Authority will be released from their obligations under the Project Agreement to each other, including with respect to indemnification under the Project Agreement whether arising prior to or after such transfer (the “**Discharged Obligations**”);
- (b) the Suitable Substitute Project Co and the Authority will assume obligations which are substantially similar to the Discharged Obligations, but owed to or assumed by the Suitable Substitute Project Co instead of Project Co;
- (c) the rights of Project Co against the Authority under the Project Agreement and vice versa (the “**Discharged Rights**”) will be cancelled;
- (d) the Suitable Substitute Project Co and the Authority will acquire rights against each other which differ from the Discharged Rights only insofar as they are exercisable by or against the Suitable Substitute Project Co instead of Project Co;
- (e) any subsisting ground for termination of the Project Agreement by the Authority will be deemed to have no effect and any subsisting Termination Notice will be automatically revoked;
- (f) the Authority will enter into a lenders’ remedies agreement with the Suitable Substitute Project Co and a representative of Senior Lenders lending to the Suitable Substitute Project Co on substantially the same terms as this Agreement; and
- (g) any Deductions that arose prior to that time will not be taken into account after the transfer for the purposes of Sections 11.1(b) and 12.1(h) of the Project Agreement and Sections 6.7 and 6.8 of Schedule 4 to the Project Agreement.

7. INSURANCE

7.1 Release of Insurance Proceeds

Notwithstanding the other provisions of this Agreement and the terms and conditions of the Senior Financing Agreements, the Agent will only permit amounts to be released from the Insurance Trust Account in accordance with Section 6 (Insurance, Damage and Destruction) and Schedule 5 [Insurance Requirements] of the Project Agreement and will not exercise any rights under the Senior Financing Agreements or take any other steps to prevent amounts being released from the Insurance Trust Account in accordance with Section 6 (Insurance, Damage and Destruction) and Schedule 5 [Insurance Requirements] of the Project Agreement.

8. COVENANTS

8.1 Authority Covenants

The Authority agrees with the Agent that the Authority will:

- (a) as soon as is reasonably practicable, at Project Co's or the Agent's expense, take whatever action the Agent, an Appointed Representative or a Suitable Substitute Project Co taking a transfer in accordance with Section 6 may reasonably require for perfecting any transfer or release under this Agreement, including the execution of any transfer or assignment, and the giving of any notice, order or direction and the making of any registration which, in each case, the Agent or Appointed Representative or Suitable Substitute Project Co reasonably requires;
- (b) not, prior to the Senior Debt Discharge Date, unless the Agent has (acting reasonably) consented in writing:
 - (i) appoint an Insolvency Officer;
 - (ii) commence any Insolvency Proceedings;
 - (iii) sanction, by voting or failing to vote, any Insolvency Proceedings and will, if requested to do so by the Agent, vote against any Insolvency Proceedings;
 - (iv) without prejudice to its rights of set-off under the Project Agreement, including rights to take amounts owing by Project Co into account in calculating termination compensation payable, claim or prove as creditor or otherwise in competition with any Finance Party in respect of any monies owing to it by Project Co for or on account of Project Co's liabilities under the Project Documents in the event of any Insolvency Proceedings; or
 - (v) take any action authorising, or which might result in or is in furtherance of, any of the prohibited matters referred to in Sections (i), (ii), (iii) or (iv) above;
- (c) not take or fail to take any action (including amendments, waivers and enforcement action) with respect to any material agreement between the Authority and a third party,

the effect of which would be reasonably likely to render the Authority unable to satisfy its obligations under the Project Agreement; and

- (d) not issue a Step-In Notice or Proposed Transfer Notice under any Material Project Contractor Collateral Agreement at any time that the Senior Lenders are validly exercising under any Senior Financing Agreement any step-in rights with respect to the relevant Material Contract.

8.2 Agent Covenants

The Agent will promptly:

- (a) notify the Authority when it believes the Senior Debt Discharge Date will occur or has occurred, and in any event will so notify no later than 20 Business Days after its occurrence;
- (b) a reasonable time prior to the taking of any such action, notify the Authority of any decision by the Senior Lenders to take action under any acceleration rights, security enforcement rights, step-in rights or transfer rights provisions of the Trust Indenture, together with reasonable details of any such action;
- (c) unless notice is already provided under the above provisions, notify the Authority of any decision by the Senior Lenders to:
 - (i) appoint an Insolvency Officer;
 - (ii) commence any Insolvency Proceedings;
 - (iii) sanction, by voting or failing to vote, any Insolvency Proceedings; or
 - (iv) take any action authorizing, or which might result in or is in furtherance of, any of the matters referred to in Sections (i), (ii) or (iii) above; and
- (d) upon request by the Authority, cause all security on any real or personal property comprised in the Facility to be promptly discharged and released on the date requested by the Authority (which will be on or after the Termination Date).

8.3 Project Co Covenant

Project Co acknowledges and consents to the arrangements set out in this Agreement and agrees not to do or omit to do anything that may prevent any party from enforcing its rights under this Agreement.

9. STEP-IN RIGHTS UNDER MATERIAL CONTRACTS

9.1 Priority of Step-In Rights under Material Contracts

Subject to Sections 9.2 and 9.4, notwithstanding any provision in any Material Project Contractor Collateral Agreement, the Authority will not exercise any right it may have pursuant to a Material Project

Contractor Collateral Agreement to step-in and assume or otherwise enforce (or cause a third party designated by the Authority to step-in and assume or otherwise enforce) Project Co's rights and obligations under any of the Material Contracts (including the issuance of a step-in notice by the Authority pursuant to any Material Project Contractor Collateral Agreement), or to transfer or assign a Material Contract, unless:

- (a) within 40 Business Days of delivery by the relevant Project Contractor to the Authority of a Termination Notice as contemplated in Section 2.1 of the relevant Material Project Contractor Collateral Agreement, the Authority has not received a copy of a step-in notice delivered under the terms of the lenders' direct agreement in respect of such Material Contract (a "**Lenders' Step-In Notice**"); or
- (b) if (i) within 40 Business Days of delivery by the relevant Project Contractor to the Authority of a Termination Notice as contemplated in Section 2.1 of the relevant Material Project Contractor Collateral Agreement, the Authority has received a copy of a Lenders' Step-In Notice but (ii) within 70 Business Days of delivery by the relevant Project Contractor to the Authority of a Termination Notice as contemplated in Section 2.1 of the relevant Material Project Contractor Collateral Agreement, the Agent has not completed either a step-in and assumption of Project Co's rights and obligations under the relevant Material Contract or a transfer or assignment thereof.

9.2 Step-In from Termination Date

Subject to Section 9.4, from the Termination Date, provided that the Authority has (if applicable) complied with Section 3.7 and Section 4.5 in terminating the Project Agreement, the Authority will be free to exercise its rights under any Material Project Contractor Collateral Agreement to step-in and assume (or cause a third party designated by the Authority to step-in and assume) Project Co's rights and obligations under, or to transfer or assign, any Material Contract in accordance with a Material Project Contractor Collateral Agreement.

9.3 Release of Security

Subject to Section 9.4, the Agent will release and discharge (or cause to be released and discharged) at no cost to the Authority, and as soon as reasonably possible, all security in respect of each of the Material Contracts in respect of which any of Project Co's rights or obligations thereunder are assumed, transferred or assigned by or to the Authority (or by or to a third party designated by the Authority) pursuant to a Material Project Contractor Collateral Agreement.

9.4 Retention of Security for Deficiency

Until such time as any Deficiency has been determined and an amount equal to the Deficiency has been recovered by the Finance Parties, the Finance Parties will be entitled to retain the benefit of the security in respect of claims and losses that Project Co has as against the Project Contractor under the relevant Material Contract (or as against any guarantor of such Material Contract) that arose prior to the date of the assumption, transfer or assignment of the relevant Material Contract (or guarantee in respect of such Material Contract) by or to the Authority (or by or to a third party designated by the Authority) provided that:

- (a) the Finance Parties will not, and will not be entitled to, exercise any rights or enforce any security in respect of any such claim during the period from the date on which such assumption, transfer or assignment occurs to the Termination Date; and
- (b) the rights in relation to the security retained by the Finance Parties pursuant to this Section 9.4 may only be exercised if and to the extent that the Termination Payment actually paid by the Authority pursuant to Section 2 or Section 3 of Schedule 9 to the Project Agreement is less than the Revised Senior Debt Termination Amount (the amount by which the Termination Payment is (or, in the reasonable opinion of the Agent, is likely to be) less than the Revised Senior Debt Termination Amount being herein referred to as the “**Deficiency**”).

Any amounts recovered by the Finance Parties pursuant to claims referred to in this Section 9.4, from the Termination Date to the date on which the Termination Payment and the amount of the Deficiency, if any, have been determined, will be held by the Agent in a segregated account on terms satisfactory to the Agent and the Authority, each acting reasonably, and, upon determination of the Termination Payment and the amount of the Deficiency, if any, such funds will be distributed to the Agent, to the extent of the Deficiency, if any, and the balance of such funds will be paid to the Authority.

9.5 Assignment of Material Contracts by Finance Parties

The Finance Parties will not transfer or assign any Material Contract except to a Suitable Substitute Project Co in conjunction with a permitted transfer or assignment of the Project Agreement to that Suitable Substitute Project Co in accordance with Section 6.

9.6 No Enforcement Action

Subject to Section 9.1 of this Agreement, during the period commencing either (i) on the date on which a Project Contractor delivers to the Authority a Termination Notice as contemplated in Section 3.1 (Termination Notice) of the relevant Material Project Contractor Collateral Agreement; or (ii) on the date on which the Authority delivers a Step-In Notice pursuant to Section 4.1 (Step-In Notice) of any Material Project Contractor Collateral Agreement and, in the case of either (i) or (ii), ending on the date on which the Authority receives an Indicative Step-In Notice or Indicative Transfer Notice referred to in Section 3.3 of this Agreement, the Senior Lenders shall not exercise any rights or take any enforcement action in respect of any of the Material Contracts, other than in respect of the claims and losses referred to in Section 9.4 (Retention of Security for Deficiency) of this Agreement (and then only in accordance with the provisions of that Section), if such action would materially prejudice the ability of the Authority to exercise any of its rights under a Material Project Contractor Collateral Agreement in respect of any Material Contract and/or any performance securities (and/or any guarantee in respect of such Material Contract) or would materially impair the ongoing performance under any of the Material Contracts.

10. ASSIGNMENT

10.1 Restriction on Assignment

No party to this Agreement may assign or transfer all or any part of its rights or obligations under this Agreement except as provided in this Section 10.

10.2 Assignment by Agent

The Agent, in its own capacity and not as agent for the Senior Lenders, may assign or transfer its rights and obligations under this Agreement to a successor Agent in its own capacity and not as agent for the Senior Lenders, in accordance with the Senior Financing Agreements without the consent of the Authority provided that the Agent delivers to the Authority not less than 10 Business Days prior to such assignment or transfer a notice setting out such contact information regarding the assignee or transferee as the Authority may reasonably require and provided the assignee or transferee is not a Restricted Person.

10.3 Assignment by Senior Lender

Any Senior Lender may assign or transfer its rights and obligations under the Senior Financing Agreements in accordance with the terms of the Senior Financing Agreements without the consent of the Authority provided the assignee or transferee is not a Restricted Person. For the purposes of this Section 10.3, the definition of Restricted Person will not include sub-paragraph (d) of that definition.

10.4 Assignment by Authority

The Authority will assign or transfer its rights and obligations under this Agreement to any permitted assignee of its interest in the Project Agreement concurrently with the assignment of the Project Agreement to such assignee and the Agent and the Senior Lenders will co-operate with the Authority in completing the formalities of any transfer or assignment including by executing any additional documents as may be reasonably required by the Authority.

10.5 New Agreement

If Section 10.2 applies in relation to the Agent, the Authority and Project Co will, upon request by the new Agent, enter into a new lenders' remedies agreement with the new Agent on substantially the same terms as this Agreement.

11. GENERAL

11.1 Term

This Agreement will remain in effect until the earlier of:

- (a) the Senior Debt Discharge Date; and
- (b) subject to compliance with Section 6.4(f) above, the date of transfer of Project Co's rights and liabilities under the Project Agreement to a Suitable Substitute Project Co pursuant to Section 6.

11.2 Conflict or Inconsistency

If there is any conflict or inconsistency between the provisions of this Agreement and the Project Agreement, as between the Agent and the Authority the provisions of this Agreement will prevail.

11.3 Entire Agreement

Unless otherwise stated in this Agreement, this Agreement constitutes the entire agreement between the parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings concerning the subject matter of this Agreement. No party has relied on any representation except as expressly set out in this Agreement.

11.4 Waiver

The failure of any party to exercise any contractual right or remedy will not constitute a waiver thereof and no waiver will be effective, unless it is communicated in writing to the other party. A waiver of any right or remedy arising from a breach of this Agreement will not constitute a waiver of any right or remedy arising from any other breach of this Agreement.

11.5 Counterparts

This Agreement may be executed in any number of counterparts, all of which when taken together will constitute one and the same instrument.

11.6 Confidentiality

The Agent will be bound to comply with the confidentiality obligations on the part of Project Co contained in the Project Agreement in relation to all information matters obtained from any other party under or in connection with the Project.

11.7 Notices

Any notice or communication required or permitted to be given under this Agreement will be in writing and will be considered to have been sufficiently given if delivered by hand or transmitted by electronic transmission to the address or electronic mail address of each party set out below:

if to the Authority:

The Government of the Northwest Territories
5th Floor Arthur Laing Building
5003-49th Street, P.O. Box 1320
Yellowknife, NT X1A 2L9

[Redacted]
[Redacted]

if to the Agent:

with copy to:

[Redacted]

or to such other address or electronic mail address as any party may, from time to time, designate in the manner set out above. Any such notice or communication will be considered to have been received:

- (a) if delivered by hand during business hours (and in any event, at or before 3:00 pm local time in the place of receipt) on a Business Day, upon receipt by a responsible representative of the receiver, and if not delivered during business hours, upon the commencement of business hours on the next Business Day; and
- (b) if delivered by electronic mail during business hours (and in any event, at or before 3:00 pm local time in the place of receipt) on a Business Day, upon receipt, and if not

delivered during business hours, upon the commencement of business hours on the next Business Day provided that:

- (i) the receiving party has, by electronic mail or by hand delivery, acknowledged to the notifying party that it has received such notice; or
- (ii) within 24 hours after sending the notice, the notifying party has also delivered a copy of such notice to the receiving party by hand delivery.

11.8 No Partnership or Agency

Nothing in this Agreement will be construed as creating a partnership or as constituting the Senior Lenders, the Agent, the Appointed Representative, any other Senior Lenders' Representative or a Suitable Substitute Project Co as an agent of the Authority. No such person will hold itself out as having any authority or power to bind the Authority in any way.

11.9 Remedies Cumulative

The rights and remedies under this Agreement are cumulative and are in addition to and not in substitution for any other rights and remedies available at law or in equity or otherwise. No single or partial exercise by a party of any right or remedy precludes or otherwise affects the exercise of any other right or remedy to which that party may be entitled.

11.10 Disputes

Any dispute between any of the parties with respect to any of the subject matters of this Agreement will be resolved in accordance with, and the parties will comply with, the Dispute Resolution Procedure, and Schedule 13 [Dispute Resolution Procedure] of the Project Agreement is deemed to be incorporated, *mutatis mutandis*, in this Agreement.

IN WITNESS WHEREOF the parties have executed this Agreement as of the day and year first above written.

8.10	Disputes	13

DESIGN-BUILDER COLLATERAL AGREEMENT

THIS AGREEMENT is dated as of September 22, 2015.

AMONG:

Bird-Clark Stanton JV

(the "**Material Project Contractor**")

AND:

The Government of the Northwest Territories

(the "**Authority**")

AND:

Boreal Health Partnership

("Project Co")

WHEREAS:

A. The Authority and Project Co have entered into an agreement dated as of September 22, 2015 (the "**Project Agreement**") whereby Project Co has agreed to design, construct, finance, operate, maintain and perform life cycle rehabilitation on the Facility (the "**Project**"), all as more particularly described in the Project Agreement;

B. Project Co and the Material Project Contractor have entered into an agreement dated as of September 22, 2015 (the "**Material Contract**") whereby the Material Project Contractor has agreed to carry out the Design and Construction;

C. It is a condition of the Material Contract that the Material Project Contractor enter into this Agreement with the Authority and Project Co; and

D. The Authority and Project Co have agreed under the terms of the Project Agreement to execute and deliver this Agreement.

NOW THEREFORE in consideration of the mutual promises and agreements of the parties herein expressed and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties covenant and agree as follows:

1. DEFINITIONS AND INTERPRETATION

1.1 Definitions

Unless otherwise specified or the context otherwise requires, capitalized but otherwise undefined terms in this Agreement will have the respective meaning given to such terms in the Project Agreement, and:

"**Agreement**" means this agreement, including any recitals to this agreement, as amended or restated from time to time;

"**Material Contract**" has the meaning set out in Recital B;

"Parties" means the Authority, Project Co and the Material Project Contractor;

"Project" has the meaning set out in Recital A;

"Project Agreement" has the meaning set out in Recital A;

"Proposed Transfer Date" has the meaning set out in Section 4.1;

"Proposed Transfer Notice" has the meaning set out in Section 4.1;

"Proposed Step-In Date" has the meaning set out in Section 3.1;

"Proposed Substitute" has the meaning set out in Section 4.1;

"Step-In Date" means the date the Authority delivers the Step-In Undertaking;

"Step-In Notice" has the meaning set out in Section 3.1;

"Step-In Period" means the period commencing on the Step-In Date and ending on the earliest of:

- (a) the Step-Out Date;
- (b) the Transfer Effective Date; and
- (c) the termination date of the Material Contract as permitted under Section 3.8.

"Step-In Undertaking" has the meaning set out in Section 3.5;

"Step-Out Date" has the meaning set out in Section 3.9;

"Termination Notice" has the meaning set out in Section 2.1;

"Transfer Agreement" has the meaning set out in Section 4.5(b); and

"Transfer Effective Date" means the effective date of the Transfer Agreement.

1.2 Construction and Interpretation

Unless otherwise defined in this Agreement or to the extent the context requires, this Agreement will be interpreted according to the provisions set out in Sections 2 and 3(b) of Schedule 1 [Definitions and Interpretation] to the Project Agreement, except that references in such section to Project Co will be also deemed to be references to the Material Project Contractor.

1.3 Governing Law

This Agreement will be deemed to be made pursuant to the laws of the Northwest Territories and the laws of Canada applicable therein and will be governed by and construed in accordance with such laws.

1.4 Attornment

For the purposes of any legal actions or proceedings brought by any party hereto against the other party, the parties hereby irrevocably submit to the exclusive jurisdiction of the courts of the Northwest Territories and acknowledge their competence and the convenience and propriety of the venue and agree to be bound by any judgment thereof and not to seek, and hereby waive, review of its merits by the courts of any other jurisdiction.

2. TERMINATION NOTICE AND AUTHORITY TERMINATION

2.1 Termination Notice

The Material Project Contractor will not terminate the Material Contract without first giving the Authority at least 20 Business Days' Notice (or in the case of a Project Co Event of Default under Part 2 Section 13.1(b) of the Material Contract such longer period as is reasonably required for Project Co to rectify or remedy) specifying the grounds for such termination (the "**Termination Notice**").

2.2 Survival of Material Contract

Notwithstanding any provision of the Material Contract to the contrary, on termination of the Project Agreement by the Authority, the parties agree that the Material Contract will not come to an end except in accordance with the terms of this Agreement.

2.3 Suspension Notice

The Material Project Contractor will not exercise any right it may have under the Material Contract to temporarily suspend its performance thereunder, unless:

- (a) the Material Project Contractor first delivers a notice (a "**Suspension Notice**") to the Authority detailing the event that has occurred that entitles it to exercise such right and stating that it intends to exercise such right, together with details of any sums which are due and payable but unpaid by Project Co and of any other material obligations or liabilities which should have been performed or discharged by Project Co under the Material Contract, in each case as at the date of such Suspension Notice; and
- (b) both:
 - (1) the Material Project Contractor has confirmed in writing to the Authority that the Senior Lenders have not agreed to pay the Material Project Contractor in accordance with the Material Contract for work performed by it during the period commencing on the date (the "**Suspension Date**") when it, but for the provisions of this Section, would have been entitled to suspend its performance under the Material Contract; and
 - (2) within 5 Business Days of receipt of confirmation from the Material Project Contractor pursuant to Section 2.3(b)(1), the Authority has not agreed, by written notice to the Material Project Contractor, to pay the Material Project Contractor in accordance with the Material Contract for work performed by it during the period (the "**No Suspension Period**") commencing on the Suspension Date and ending on the earliest to occur of:
 - (A) the date on which the Senior Lenders exercise any of their step-in or transfer rights pursuant to and in accordance with, respectively, Section 4 or Section 6 of the Lenders' Remedies Agreement;
 - (B) the date from which the Senior Lenders agree to pay the Material Project Contractor as contemplated under Section 2.3(b)(1); and
 - (C) the Step-In Date.

except that, if the Authority provides a written notice to the Material Project Contractor pursuant to Section 2.3(b)(2) and thereafter fails to make payment to the Material Project Contractor of any undisputed amount payable pursuant to and in accordance with the

Material Contract for work performed by the Material Project Contractor during the No Suspension Period, the No Suspension Period will terminate and the Material Project Contractor may thereafter exercise any right it may have to temporarily suspend its performance under the Material Contract.

3. STEP-IN AND STEP-OUT

3.1 Step-In Notice

Subject to Section 3.2, if the Authority has terminated the Project Agreement in accordance with its terms or if the Authority has received a Termination Notice, the Authority may give notice to the Material Project Contractor (a “**Step-In Notice**”) of the intention of the Authority to issue a Step-In Undertaking on a specified date (the “**Proposed Step-In Date**”) provided that such Proposed Step-In Date is:

- (a) no later than 10 Business Days after termination of the Project Agreement if the Project Agreement was terminated by the Authority; and
- (b) no later than 10 Business Days after delivery of the Termination Notice to the Authority.

3.2 Lenders’ Step-In Rights

The Authority will not issue a Step-In Notice at any time that the Senior Lenders are validly exercising any step-in rights with respect to the Project under:

- (a) the Lenders’ Remedies Agreement;
- (b) any Senior Financing Agreement; or
- (c) any direct agreement entered into between the Material Project Contractor and the Senior Lenders with respect to the Material Project Contract,

and the running of all notice periods and timelines set out in Section 3.1 will be suspended until such time as the Senior Lenders are no longer exercising, or are no longer permitted to exercise, such rights under the Lenders’ Remedies Agreement, any Senior Financing Agreement or any such direct agreement. The Material Project Contractor will provide copies of all relevant notices delivered by it to, or to it by, the Senior Lenders in respect of the exercise of such rights so as to enable the Authority and the Material Project Contractor to determine, in accordance with this Section 3.2 the notice periods and timelines set out in Section 3.1.

3.3 Notice of Obligations and Step-In Undertaking

Not less than 5 Business Days prior to the Proposed Step-In Date, the Material Project Contractor will give notice to the Authority of any sums that are due and payable but unpaid by Project Co and of any other material obligations or liabilities that should have been performed or discharged by Project Co under the Material Contract, in each case as at the date of the Step-In Notice.

3.4 Update of Obligations

Not less than 2 Business Days prior to the Proposed Step-In Date, the Material Project Contractor will give notice to the Authority of any change in such sums, obligations or liabilities referred to in Section 3.3.

3.5 Delivery of Step-In Undertaking

On or before the Proposed Step-In Date, the Authority may deliver to the Material Project Contractor a written undertaking to the Material Project Contractor (the “**Step-In Undertaking**”) undertaking to the Material Project Contractor to:

- (a) pay or procure the payment to the Material Project Contractor, within 15 Business Days of demand by the Material Project Contractor, of any sum due and payable or accruing due and payable but unpaid by Project Co to the Material Project Contractor under the Material Contract before the Step-In Date, provided that the Material Project Contractor has notified the Authority of such amounts in accordance with Sections 3.3 and 3.4;
- (b) perform or discharge or procure the performance or discharge of any unperformed or undischarged obligations of Project Co under the Material Contract that will have fallen due for performance or discharge before the Step-In Date and of which the Authority has been notified by the Material Project Contractor in accordance with Sections 3.3 and 3.4;
- (c) pay or procure the payment of any sum due and payable by Project Co under the Material Contract as a result of either any work or services performed during the Step-In Period or any act or omission occurring during the Step-In Period that arises from any act or omission occurring after the Step-In Date; and
- (d) perform or discharge or procure the performance or discharge of any obligations of Project Co under the Material Contract as a result of any act or omission occurring during the Step-In Period that arises from any act or omission occurring after the Step-In Date.

3.6 Limits on Authority Liability on Step-In

The Authority will not be required to assume any liability under a Step-In Undertaking for any outstanding obligations or liabilities of Project Co to the Material Project Contractor:

- (a) that existed as at the Step-In Date; and
- (b) of which the Authority has not been notified pursuant to Sections 3.3 and 3.4.

3.7 Non-Delivery of the Step-In Undertaking

If the Authority does not deliver the Step-In Undertaking on or before the Proposed Step-In Date, the Step-In Notice will be deemed to have been withdrawn and the rights and obligations of the parties will be construed as if the Step-In Notice had not been given.

3.8 Effect of Step-In Undertaking

During any Step-In Period, the Material Project Contractor will continue to observe and perform its duties and obligations under the Material Contract and will only be entitled to exercise its rights of termination under the Material Contract:

- (a) by reference to a default under the Material Contract arising during the Step-In Period (other than to the extent that a Project Co Insolvency Event constitutes such a default), provided that no event of default by Project Co under the Project Agreement will entitle the Material Project Contractor to exercise such rights of termination during the Step-In Period;

- (b) if the Authority fails to pay when due any amount owed to the Material Project Contractor or fails to perform or discharge when falling due for performance or discharge any obligation under the Step-In Undertaking; or
- (c) if such rights of termination arise in circumstances where there is no default under the Material Contract by the Authority or the Material Project Contractor.

3.9 Step-Out

The Authority may, at any time, terminate the Step-In Period by giving the Material Project Contractor at least 20 Business Days' notice specifying the date on which the Step-In Period will terminate (the "**Step-Out Date**").

3.10 Effect of Step-Out

The Authority will be released from the Step-In Undertaking on the expiry or termination of the Step-In Period, provided that the Authority has performed and discharged in full or procured the performance and discharge in full of any of the Authority's obligations under the Step-In Undertaking arising on or before the expiry or termination of the Step-In Period.

3.11 Payment by Project Co

Project Co will pay to the Authority on demand any amounts of which the Authority has been notified by the Material Project Contractor pursuant to Sections 3.3 and 3.4 and that were paid by the Authority or a Proposed Substitute to the Material Project Contractor pursuant to this Agreement. Any such amounts will constitute amounts due and payable by Project Co to the Authority under the Project Agreement, and the Authority will have all the same rights and remedies under the Project Agreement (including any rights of set-off) in respect of payment or non-payment of any such amounts as the Authority would have for any payment or non-payment by Project Co of any other amounts that are due and payable by it to the Authority under the Project Agreement.

4. TRANSFER

4.1 Proposed Substitute

At any time that the Authority is entitled to give a Step-In Notice pursuant to Section 3.1 or at any time during the Step-In Period, the Authority may give notice (a "**Proposed Transfer Notice**") to the Material Project Contractor that it wishes itself or another person (a "**Proposed Substitute**") to assume, by way of sale, assignment, transfer or other disposal, the rights and obligations of Project Co under the Material Contract and specifying a date (the "**Proposed Transfer Date**"):

- (a) if the Authority has terminated the Project Agreement but has not given a Step-In Notice, no later than 15 Business Days after termination of the Project Agreement;
- (b) if the Material Project Contractor has given a Termination Notice but the Authority has not given a Step-In Notice, no later than expiry of the Termination Notice; and
- (c) if the Authority has given a Step-In Notice (whether or not the Step-In Period has commenced), no later than 20 Business Days after the date of the Proposed Transfer Notice.

Subject to Section 3, the Material Project Contractor will not be entitled to terminate the Material Contract during the notice period specified in a Proposed Transfer Notice.

4.2 Consent to Transfer

If the Proposed Transfer Notice specifies the Authority as the Proposed Substitute, the Material Project Contractor's consent to the transfer will be deemed to have been given. If the Proposed Substitute is not the Authority, a transfer in accordance with a Proposed Transfer Notice will only be effective if the Material Project Contractor consents to that transfer in writing in accordance with Section 4.3, and the Authority will (as soon as practicable) supply the Material Project Contractor with the following information:

- (a) the name and registered address of the Proposed Substitute;
- (b) the names of the shareholders in the Proposed Substitute and the share capital owned by each of them;
- (c) the names of the directors and the secretary of the Proposed Substitute;
- (d) details of the means by which it is proposed to finance the Proposed Substitute (including the extent to which such finance is committed and any conditions precedent as to its availability for drawing); and
- (e) details of the technical competence of the Proposed Substitute and the resources (including contractual arrangements) which are to be available to the Proposed Substitute to enable it to perform its obligations under the Material Contract.

4.3 Grant of Consent

The Material Project Contractor may withhold or delay consent to a transfer only if the Proposed Substitute is not the Authority and the Authority has failed to show to the Material Project Contractor's satisfaction (acting reasonably) that:

- (a) the Proposed Substitute has the legal capacity, power and authority to become a party to and perform the obligations of Project Co under the Material Contract; and
- (b) the technical competence and financial standing of, and the technical and financial resources available to, the Proposed Substitute are sufficient to perform the obligations of Project Co under the Material Contract.

Within 5 Business Days of the receipt of a Proposed Transfer Notice and all information required under Section 4.2, the Material Project Contractor will notify the Authority in writing that it has consented to the transfer or, if the Material Project Contractor has not consented, will provide to the Authority an explanation of its reasons to withhold its consent.

4.4 Consent Withheld

If the Material Project Contractor withholds its consent to a Proposed Transfer Notice, the Authority may give one or more subsequent Proposed Transfer Notices, pursuant to the provisions of Section 4.1, containing changed particulars relating to the same Proposed Substitute or particulars relating to another Proposed Substitute that the Authority reasonably believes would fulfil the requirements of Sections 4.3, provided that only one Proposed Transfer Notice may be outstanding at any one time, and provided further that:

- (a) if a Step-In Notice has not been issued, any revised Proposed Transfer Date will be a date falling no later than the date specified in Section 4.1(a) or 4.1(b), as the case may be; and

- (b) if a Step-In Notice has been issued, any revised Proposed Transfer Date will be a date falling no later than the date specified in Section 4.1(c).

4.5 Implementation of Transfer

If the Material Project Contractor consents or is deemed to have consented to a transfer pursuant to a Proposed Transfer Notice, then on the Proposed Transfer Date:

- (a) the Proposed Substitute will become a party to the Material Contract in place of Project Co and, thereafter, will be treated as if it was and had always been named as a party to the Material Contract in place of Project Co; and
- (b) the Material Project Contractor, Project Co and the Proposed Substitute will enter into a transfer agreement (the "**Transfer Agreement**") and any other requisite agreements, in form and substance satisfactory to the Material Project Contractor, acting reasonably, pursuant to which:
 - (1) the Proposed Substitute will be granted all of the rights of Project Co under the Material Contract; and
 - (2) the Proposed Substitute will assume all of the obligations and liabilities of Project Co under the Material Contract.

4.6 Effect of Transfer

On and after the Transfer Effective Date:

- (a) the Material Project Contractor will owe its obligations under the Material Contract, whether arising before, on or after such date, to the Proposed Substitute; and
- (b) if the Authority has entered into a Step-In Undertaking, the Authority will be released from the Step-In Undertaking, provided that all obligations of the Authority under the Step-In Undertaking that have accrued up to the Transfer Effective Date have been fully and unconditionally discharged.

The Authority and the Material Project Contractor will use reasonable efforts to agree to any amendments to the Material Contract reasonably necessary to reflect the fact that the Project Agreement may have terminated at the time of the Transfer Effective Date.

4.7 Termination After Transfer

After the Transfer Effective Date, the Material Project Contractor will only be entitled to exercise its rights of termination under the Material Contract:

- (a) in respect of any Project Co Event of Default arising after that date in accordance with the Material Contract; or
- (b) if the Proposed Substitute does not discharge the obligations and liabilities referred to in Section 4.5(b)(2) assumed by it under the Transfer Agreement that relate to matters arising prior to the end of any Step-In Period within 15 Business Days following the Transfer Effective Date.

5. RIGHTS AND OBLIGATIONS UNDER THE MATERIAL CONTRACT

5.1 Rights of Termination

If:

- (a) no Step-In Notice or Proposed Transfer Notice is given before a Termination Notice expires or within 15 Business Days after termination of the Project Agreement by the Authority;
- (b) a Step-In Undertaking is not issued on or before the Proposed Step-In Date;
- (c) the Step-In Notice is withdrawn or, pursuant to Section 3.7, is deemed to have been withdrawn;
- (d) the Step-In Period ends before the occurrence of the Transfer Effective Date;
- (e) in the absence of a Step-In Undertaking, the Material Project Contractor reasonably withholds its consent to a transfer pursuant to a Proposed Transfer Notice, in accordance with Section 4.3, and does not subsequently grant consent to a transfer in accordance with Section 4.4 on or before the Proposed Transfer Date;
- (f) in the absence of a Step-In Undertaking, a Transfer Agreement is not entered into on the Proposed Transfer Date;
- (g) the Material Project Contractor is entitled to terminate the Material Contract under Section 3.8 or 4.7; or
- (h) the Authority exercises its right to Step-Out under Section 3.9, then on the Step-Out Date,

the Material Project Contractor may:

- (i) exercise all of its rights under the Material Contract and act upon any and all grounds for termination available to it in relation to the Material Contract whenever occurring; and
- (j) pursue any and all claims and exercise any and all rights and remedies against Project Co.

5.2 Project Co's Obligations to Continue

Until completion of a transfer pursuant to Section 4.5, Project Co will continue to be liable for all its obligations and liabilities, whenever occurring, under or arising from the Material Contract notwithstanding:

- (a) the service of a Step-In Notice or the issue of a Step-In Undertaking or the expiry of the Step-In Period or the release of a Step-In Undertaking;
- (b) the service of a Proposed Transfer Notice; or
- (c) any other provision of this Agreement.

6. REVOCATION OF NOTICES

A Termination Notice and a Step-In Notice may each be revoked (in writing to the recipient) by the party giving them before the expiry of their respective notice periods. Upon any such revocation, the rights and obligations of the parties will be construed as if the relevant notice had not been given.

7. ASSIGNMENT

7.1 Binding on Successors and Assigns

This Agreement will be binding on and will enure to the benefit of the parties and their respective successors and permitted assigns.

7.2 Restriction on Assignment

No party will assign or transfer any part of its respective rights or obligations under this Agreement without the prior consent of the others (such consent not to be unreasonably withheld or delayed), provided that:

- (a) the Authority will be entitled, without the consent of any other party, to transfer all its rights and obligations hereunder to any person to whom it assigns or otherwise disposes of the benefit of the Project Agreement in accordance with the Project Agreement; and
- (b) the Material Project Contractor will assign or transfer all its rights and obligations under this Agreement to any person to whom it assigns or transfers all its rights and obligations under the Material Contract in accordance with the terms of the Material Contract and the Project Agreement.

8. GENERAL

8.1 Notices

Any notice or communication required or permitted to be given under this Agreement will be in writing and will be considered to have been sufficiently given if delivered by hand or transmitted by electronic transmission to the address or electronic mail address of each party set out below:

if to the Material Project Contractor:

Bird Design-Build Construction Inc.
5700 Explorer Drive

with copy to:

[REDACTED]

or to such other address or electronic mail address as any party may, from time to time, designate in the manner set out above. Any such notice or communication will be considered to have been received:

- (a) if delivered by hand during business hours (and in any event, at or before 3:00 p.m. local time in the place of receipt) on a Business Day, upon receipt by a responsible representative of the receiver, and if not delivered during business hours, upon the commencement of business hours on the next Business Day; and
- (b) if delivered by electronic mail during business hours (and in any event, at or before 3:00 p.m. local time in the place of receipt) on a Business Day, upon receipt, and if not delivered during business hours, upon the commencement of business hours on the next Business Day provided that:
 - (1) the receiving party has, by electronic mail or by hand delivery, acknowledged to the notifying party that it has received such notice; or
 - (2) within 24 hours after sending the notice, the notifying party has also delivered a copy of such notice to the receiving party by hand delivery.

8.2 Entire Agreement

Unless otherwise stated in this Agreement, this Agreement constitutes the entire agreement between the parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings concerning the subject matter of this Agreement. No party has relied on any representation except as expressly set out in this Agreement.

8.3 Waiver

The failure of any party to exercise any contractual right or remedy will not constitute a waiver thereof, and no waiver will be effective unless it is communicated in writing to the other party. A waiver of any right or remedy arising from a breach of this Agreement will not constitute a waiver of any right or remedy arising from any other breach of this Agreement.

8.4 No Partnership or Agency

Nothing in this Agreement will be construed as creating a partnership or as constituting the Material Project Contractor as an agent of the Authority. The Material Project Contractor will not hold itself out as having any authority or power to bind the Authority in any way.

8.5 Conflicting Agreements

If there is any conflict or inconsistency between the provisions of this Agreement and the Project Agreement, the provisions of the Project Agreement will prevail.

8.6 Remedies Cumulative

The rights and remedies under this Agreement are cumulative and are in addition to and not in substitution for any other rights and remedies available at law or in equity or otherwise. No single or partial exercise by a party of any right or remedy precludes or otherwise affects the exercise of any other right or remedy to which that party may be entitled.

8.7 Counterparts

This Agreement may be executed in any number of counterparts, all of which when taken together will constitute one and the same instrument.

8.8 Delivery by Fax

Any party may deliver an executed copy of this Agreement by fax but that party will immediately dispatch by delivery in person to the other parties an originally executed copy of this Agreement.

8.9 Joint and Several

If the Material Project Contractor is comprised of more than one legal entity, the obligations and liabilities of the Material Project Contractor under this Agreement will be the obligations and liabilities of each legal entity comprising the Material Project Contractor, jointly and severally with each other such legal entity.

8.10 Disputes

Any dispute between any of the parties with respect to any of the subject matters of this Agreement or any disagreement between any of the parties with respect to any matter that, by the express terms of this Agreement, is to be agreed upon by the parties will be resolved in accordance with, and the parties will comply with, the Dispute Resolution Procedure, provided that, for greater certainty, the parties acknowledge that, during a Step-In Period or after the Transfer Effective Date, any dispute with respect to any of the subject matters of the Material Contract will be resolved in accordance with the applicable dispute resolution procedure thereunder.

SERVICE PROVIDER COLLATERAL AGREEMENT

THIS AGREEMENT is dated as of September 22, 2015.

AMONG:

Carillion Canada Inc.

(the "**Material Project Contractor**")

AND:

The Government of the Northwest Territories

(the "**Authority**")

AND:

Boreal Health Partnership

(the "**Project Co**")

WHEREAS:

A. The Authority and Project Co have entered into an agreement dated as of September 22, 2015 (the "**Project Agreement**") whereby Project Co has agreed to design, construct, finance, operate, maintain and perform life cycle rehabilitation on the Facility (the "**Project**"), all as more particularly described in the Project Agreement;

B. Project Co and the Material Project Contractor have entered into an agreement dated as of September 22, 2015 (the "**Material Contract**") whereby the Material Project Contractor has agreed to carry out the Services;

C. It is a condition of the Material Contract that the Material Project Contractor enter into this Agreement with the Authority and Project Co; and

D. The Authority and Project Co have agreed under the terms of the Project Agreement to execute and deliver this Agreement.

NOW THEREFORE in consideration of the mutual promises and agreements of the parties herein expressed and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties covenant and agree as follows:

1. DEFINITIONS AND INTERPRETATION

1.1 Definitions

Unless otherwise specified or the context otherwise requires, capitalized but otherwise undefined terms in this Agreement will have the respective meaning given to such terms in the Project Agreement, and:

"**Agreement**" means this agreement, including any recitals to this agreement, as amended or restated from time to time;

"**Material Contract**" has the meaning set out in Recital B;

"Parties" means the Authority, Project Co and the Material Project Contractor;

"Project" has the meaning set out in Recital A;

"Project Agreement" has the meaning set out in Recital A;

"Proposed Transfer Date" has the meaning set out in Section 4.1;

"Proposed Transfer Notice" has the meaning set out in Section 4.1;

"Proposed Step-In Date" has the meaning set out in Section 3.1;

"Proposed Substitute" has the meaning set out in Section 4.1;

"Step-In Date" means the date the Authority delivers the Step-In Undertaking;

"Step-In Notice" has the meaning set out in Section 3.1;

"Step-In Period" means the period commencing on the Step-In Date and ending on the earliest of:

- (a) the Step-Out Date;
- (b) the Transfer Effective Date; and
- (c) the termination date of the Material Contract as permitted under Section 3.8.

"Step-In Undertaking" has the meaning set out in Section 3.5;

"Step-Out Date" has the meaning set out in Section 3.9;

"Termination Notice" has the meaning set out in Section 2.1;

"Transfer Agreement" has the meaning set out in Section 4.5(b); and

"Transfer Effective Date" means the effective date of the Transfer Agreement.

1.2 Construction and Interpretation

Unless otherwise defined in this Agreement or to the extent the context requires, this Agreement will be interpreted according to the provisions set out in Sections 2 and 3(b) of Schedule 1 [Definitions and Interpretation] to the Project Agreement, except that references in such section to Project Co will be also deemed to be references to the Material Project Contractor.

1.3 Governing Law

This Agreement will be deemed to be made pursuant to the laws of the Northwest Territories and the laws of Canada applicable therein and will be governed by and construed in accordance with such laws.

1.4 Attornment

For the purposes of any legal actions or proceedings brought by any party hereto against the other party, the parties hereby irrevocably submit to the exclusive jurisdiction of the courts of the Northwest Territories and acknowledge their competence and the convenience and propriety of the venue and agree to be bound by any judgment thereof and not to seek, and hereby waive, review of its merits by the courts of any other jurisdiction.

2. TERMINATION NOTICE AND AUTHORITY TERMINATION

2.1 Termination Notice

The Material Project Contractor will not terminate the Material Contract without first giving the Authority at least 20 Business Days' Notice (or in the case of a Project Co Event of Default under Part 2 Section 13.1(b) of the Material Contract such longer period as is reasonably required for Project Co to rectify or remedy) specifying the grounds for such termination (the "**Termination Notice**").

2.2 Survival of Material Contract

Notwithstanding any provision of the Material Contract to the contrary, on termination of the Project Agreement by the Authority, the parties agree that the Material Contract will not come to an end except in accordance with the terms of this Agreement.

3. STEP-IN AND STEP-OUT

3.1 Step-In Notice

Subject to Section 3.2, if the Authority has terminated the Project Agreement in accordance with its terms or if the Authority has received a Termination Notice, the Authority may give notice to the Material Project Contractor (a "**Step-In Notice**") of the intention of the Authority to issue a Step-In Undertaking on a specified date (the "**Proposed Step-In Date**") provided that such Proposed Step-In Date is:

- (a) no later than 10 Business Days after termination of the Project Agreement if the Project Agreement was terminated by the Authority; and
- (b) no later than 10 Business Days after delivery of the Termination Notice to the Authority.

3.2 Lenders' Step-In Rights

The Authority will not issue a Step-In Notice at any time that the Senior Lenders are validly exercising any step-in rights with respect to the Project under:

- (a) the Lenders' Remedies Agreement;
- (b) any Senior Financing Agreement; or
- (c) any direct agreement entered into between the Material Project Contractor and the Senior Lenders with respect to the Material Project Contract,

and the running of all notice periods and timelines set out in Section 3.1 will be suspended until such time as the Senior Lenders are no longer exercising, or are no longer permitted to exercise, such rights under the Lenders' Remedies Agreement, any Senior Financing Agreement or any such direct agreement. The Material Project Contractor will provide copies of all relevant notices delivered by it to, or to it by, the Senior Lenders in respect of the exercise of such rights so as to enable the Authority and the Material Project Contractor to determine, in accordance with this Section 3.2 the notice periods and timelines set out in Section 3.1.

3.3 Notice of Obligations and Step-In Undertaking

Not less than 5 Business Days prior to the Proposed Step-In Date, the Material Project Contractor will give notice to the Authority of any sums that are due and payable but unpaid by Project Co and of any other material obligations or liabilities that should have been performed or discharged by Project Co under the Material Contract, in each case as at the date of the Step-In Notice.

3.4 Update of Obligations

Not less than 2 Business Days prior to the Proposed Step-In Date, the Material Project Contractor will give notice to the Authority of any change in such sums, obligations or liabilities referred to in Section 3.3.

3.5 Delivery of Step-In Undertaking

On or before the Proposed Step-In Date, the Authority may deliver to the Material Project Contractor a written undertaking to the Material Project Contractor (the “**Step-In Undertaking**”) undertaking to the Material Project Contractor to:

- (a) pay or procure the payment to the Material Project Contractor, within 15 Business Days of demand by the Material Project Contractor, of any sum due and payable or accruing due and payable but unpaid by Project Co to the Material Project Contractor under the Material Contract before the Step-In Date, provided that the Material Project Contractor has notified the Authority of such amounts in accordance with Sections 3.3 and 3.4;
- (b) perform or discharge or procure the performance or discharge of any unperformed or undischarged obligations of Project Co under the Material Contract that will have fallen due for performance or discharge before the Step-In Date and of which the Authority has been notified by the Material Project Contractor in accordance with Sections 3.3 and 3.4;
- (c) pay or procure the payment of any sum due and payable by Project Co under the Material Contract as a result of either any work or services performed during the Step-In Period or any act or omission occurring during the Step-In Period that arises from any act or omission occurring after the Step-In Date; and
- (d) perform or discharge or procure the performance or discharge of any obligations of Project Co under the Material Contract as a result of any act or omission occurring during the Step-In Period that arises from any act or omission occurring after the Step-In Date.

3.6 Limits on Authority Liability on Step-In

The Authority will not be required to assume any liability under a Step-In Undertaking for any outstanding obligations or liabilities of Project Co to the Material Project Contractor:

- (a) that existed as at the Step-In Date; and
- (b) of which the Authority has not been notified pursuant to Sections 3.3 and 3.4.

3.7 Non-Delivery of the Step-In Undertaking

If the Authority does not deliver the Step-In Undertaking on or before the Proposed Step-In Date, the Step-In Notice will be deemed to have been withdrawn and the rights and obligations of the parties will be construed as if the Step-In Notice had not been given.

3.8 Effect of Step-In Undertaking

During any Step-In Period, the Material Project Contractor will continue to observe and perform its duties and obligations under the Material Contract and will only be entitled to exercise its rights of termination under the Material Contract:

- (a) by reference to a default under the Material Contract arising during the Step-In Period (other than to the extent that a Project Co Insolvency Event constitutes such a default), provided that no event of default by Project Co under the Project Agreement will entitle

the Material Project Contractor to exercise such rights of termination during the Step-In Period;

- (b) if the Authority fails to pay when due any amount owed to the Material Project Contractor or fails to perform or discharge when falling due for performance or discharge any obligation under the Step-In Undertaking; or
- (c) if such rights of termination arise in circumstances where there is no default under the Material Contract by the Authority or the Material Project Contractor.

3.9 Step-Out

The Authority may, at any time, terminate the Step-In Period by giving the Material Project Contractor at least 20 Business Days' notice specifying the date on which the Step-In Period will terminate (the "**Step-Out Date**").

3.10 Effect of Step-Out

The Authority will be released from the Step-In Undertaking on the expiry or termination of the Step-In Period, provided that the Authority has performed and discharged in full or procured the performance and discharge in full of any of the Authority's obligations under the Step-In Undertaking arising on or before the expiry or termination of the Step-In Period.

3.11 Payment by Project Co

Project Co will pay to the Authority on demand any amounts of which the Authority has been notified by the Material Project Contractor pursuant to Sections 3.3 and 3.4 and that were paid by the Authority or a Proposed Substitute to the Material Project Contractor pursuant to this Agreement. Any such amounts will constitute amounts due and payable by Project Co to the Authority under the Project Agreement, and the Authority will have all the same rights and remedies under the Project Agreement (including any rights of set-off) in respect of payment or non-payment of any such amounts as the Authority would have for any payment or non-payment by Project Co of any other amounts that are due and payable by it to the Authority under the Project Agreement.

4. TRANSFER

4.1 Proposed Substitute

At any time that the Authority is entitled to give a Step-In Notice pursuant to Section 3.1 or at any time during the Step-In Period, the Authority may give notice (a "**Proposed Transfer Notice**") to the Material Project Contractor that it wishes itself or another person (a "**Proposed Substitute**") to assume, by way of sale, assignment, transfer or other disposal, the rights and obligations of Project Co under the Material Contract and specifying a date (the "**Proposed Transfer Date**"):

- (a) if the Authority has terminated the Project Agreement but has not given a Step-In Notice, no later than 15 Business Days after termination of the Project Agreement;
- (b) if the Material Project Contractor has given a Termination Notice but the Authority has not given a Step-In Notice, no later than expiry of the Termination Notice; and
- (c) if the Authority has given a Step-In Notice (whether or not the Step-In Period has commenced), no later than 20 Business Days after the date of the Proposed Transfer Notice.

Subject to Section 3, the Material Project Contractor will not be entitled to terminate the Material Contract during the notice period specified in a Proposed Transfer Notice.

4.2 Consent to Transfer

If the Proposed Transfer Notice specifies the Authority as the Proposed Substitute, the Material Project Contractor's consent to the transfer will be deemed to have been given. If the Proposed Substitute is not the Authority, a transfer in accordance with a Proposed Transfer Notice will only be effective if the Material Project Contractor consents to that transfer in writing in accordance with Section 4.3, and the Authority will (as soon as practicable) supply the Material Project Contractor with the following information:

- (a) the name and registered address of the Proposed Substitute;
- (b) the names of the shareholders in the Proposed Substitute and the share capital owned by each of them;
- (c) the names of the directors and the secretary of the Proposed Substitute;
- (d) details of the means by which it is proposed to finance the Proposed Substitute (including the extent to which such finance is committed and any conditions precedent as to its availability for drawing); and
- (e) details of the technical competence of the Proposed Substitute and the resources (including contractual arrangements) which are to be available to the Proposed Substitute to enable it to perform its obligations under the Material Contract.

4.3 Grant of Consent

The Material Project Contractor may withhold or delay consent to a transfer only if the Proposed Substitute is not the Authority and the Authority has failed to show to the Material Project Contractor's satisfaction (acting reasonably) that:

- (a) the Proposed Substitute has the legal capacity, power and authority to become a party to and perform the obligations of Project Co under the Material Contract; and
- (b) the technical competence and financial standing of, and the technical and financial resources available to, the Proposed Substitute are sufficient to perform the obligations of Project Co under the Material Contract.

Within 5 Business Days of the receipt of a Proposed Transfer Notice and all information required under Section 4.2, the Material Project Contractor will notify the Authority in writing that it has consented to the transfer or, if the Material Project Contractor has not consented, will provide to the Authority an explanation of its reasons to withhold its consent.

4.4 Consent Withheld

If the Material Project Contractor withholds its consent to a Proposed Transfer Notice, the Authority may give one or more subsequent Proposed Transfer Notices, pursuant to the provisions of Section 4.1, containing changed particulars relating to the same Proposed Substitute or particulars relating to another Proposed Substitute that the Authority reasonably believes would fulfil the requirements of Sections 4.3, provided that only one Proposed Transfer Notice may be outstanding at any one time, and provided further that:

- (a) if a Step-In Notice has not been issued, any revised Proposed Transfer Date will be a date falling no later than the date specified in Section 4.1(a) or 4.1(b), as the case may be; and
- (b) if a Step-In Notice has been issued, any revised Proposed Transfer Date will be a date falling no later than the date specified in Section 4.1(c).

4.5 Implementation of Transfer

If the Material Project Contractor consents or is deemed to have consented to a transfer pursuant to a Proposed Transfer Notice, then on the Proposed Transfer Date:

- (a) the Proposed Substitute will become a party to the Material Contract in place of Project Co and, thereafter, will be treated as if it was and had always been named as a party to the Material Contract in place of Project Co; and
- (b) the Material Project Contractor, Project Co and the Proposed Substitute will enter into a transfer agreement (the "**Transfer Agreement**") and any other requisite agreements, in form and substance satisfactory to the Material Project Contractor, acting reasonably, pursuant to which:
 - (1) the Proposed Substitute will be granted all of the rights of Project Co under the Material Contract; and
 - (2) the Proposed Substitute will assume all of the obligations and liabilities of Project Co under the Material Contract.

4.6 Effect of Transfer

On and after the Transfer Effective Date:

- (a) the Material Project Contractor will owe its obligations under the Material Contract, whether arising before, on or after such date, to the Proposed Substitute; and
- (b) if the Authority has entered into a Step-In Undertaking, the Authority will be released from the Step-In Undertaking, provided that all obligations of the Authority under the Step-In Undertaking that have accrued up to the Transfer Effective Date have been fully and unconditionally discharged.

The Authority and the Material Project Contractor will use reasonable efforts to agree to any amendments to the Material Contract reasonably necessary to reflect the fact that the Project Agreement may have terminated at the time of the Transfer Effective Date.

4.7 Termination After Transfer

After the Transfer Effective Date, the Material Project Contractor will only be entitled to exercise its rights of termination under the Material Contract:

- (a) in respect of any Project Co Event of Default arising after that date in accordance with the Material Contract; or
- (b) if the Proposed Substitute does not discharge the obligations and liabilities referred to in Section 4.5(b)(2) assumed by it under the Transfer Agreement that relate to matters arising prior to the end of any Step-In Period within 15 Business Days following the Transfer Effective Date.

5. RIGHTS AND OBLIGATIONS UNDER THE MATERIAL CONTRACT

5.1 Rights of Termination

If:

- (a) no Step-In Notice or Proposed Transfer Notice is given before a Termination Notice expires or within 15 Business Days after termination of the Project Agreement by the Authority;
- (b) a Step-In Undertaking is not issued on or before the Proposed Step-In Date;
- (c) the Step-In Notice is withdrawn or, pursuant to Section 3.7, is deemed to have been withdrawn;
- (d) the Step-In Period ends before the occurrence of the Transfer Effective Date;
- (e) in the absence of a Step-In Undertaking, the Material Project Contractor reasonably withholds its consent to a transfer pursuant to a Proposed Transfer Notice, in accordance with Section 4.3, and does not subsequently grant consent to a transfer in accordance with Section 4.4 on or before the Proposed Transfer Date;
- (f) in the absence of a Step-In Undertaking, a Transfer Agreement is not entered into on the Proposed Transfer Date;
- (g) the Material Project Contractor is entitled to terminate the Material Contract under Section 3.8 or 4.7; or
- (h) the Authority exercises its right to Step-Out under Section 3.9, then on the Step-Out Date,

the Material Project Contractor may:

- (i) exercise all of its rights under the Material Contract and act upon any and all grounds for termination available to it in relation to the Material Contract whenever occurring; and
- (j) pursue any and all claims and exercise any and all rights and remedies against Project Co.

5.2 Project Co's Obligations to Continue

Until completion of a transfer pursuant to Section 4.5, Project Co will continue to be liable for all its obligations and liabilities, whenever occurring, under or arising from the Material Contract notwithstanding:

- (a) the service of a Step-In Notice or the issue of a Step-In Undertaking or the expiry of the Step-In Period or the release of a Step-In Undertaking;
- (b) the service of a Proposed Transfer Notice; or
- (c) any other provision of this Agreement.

6. REVOCATION OF NOTICES

A Termination Notice and a Step-In Notice may each be revoked (in writing to the recipient) by the party giving them before the expiry of their respective notice periods. Upon any such revocation, the rights and obligations of the parties will be construed as if the relevant notice had not been given.

7. ASSIGNMENT

7.1 Binding on Successors and Assigns

This Agreement will be binding on and will enure to the benefit of the parties and their respective successors and permitted assigns.

7.2 Restriction on Assignment

No party will assign or transfer any part of its respective rights or obligations under this Agreement without the prior consent of the others (such consent not to be unreasonably withheld or delayed), provided that:

- (a) the Authority will be entitled, without the consent of any other party, to transfer all its rights and obligations hereunder to any person to whom it assigns or otherwise disposes of the benefit of the Project Agreement in accordance with the Project Agreement; and
- (b) the Material Project Contractor will assign or transfer all its rights and obligations under this Agreement to any person to whom it assigns or transfers all its rights and obligations under the Material Contract in accordance with the terms of the Material Contract and the Project Agreement.

8. GENERAL

8.1 Notices

Any notice or communication required or permitted to be given under this Agreement will be in writing and will be considered to have been sufficiently given if delivered by hand or transmitted by electronic transmission to the address or electronic mail address of each party set out below:

if to the Material Project Contractor:

Carillion Canada Inc.
7077 Keele Street
Concord, ON L4K 0B6

if to the Authority:

The Government of the Northwest Territories
5th Floor Arthur Laing Building
5003-49th Street, P.O. Box 1320
Yellowknife, NT X1A 2L9

if to Project Co:

Boreal Health Partnership
c/o Carillion Canada Inc.
7077 Keele Street
Concord, ON L4K 0B6

[REDACTED]

with copy to:

HOCHTIEF Boreal Health Partner Inc.
2 Bloor Street East, Suite 701
Toronto, ON M4W 1A8

[REDACTED]

with copy to:

Bird Capital Limited Partnership
Suite 400, 5700 Explorer Drive
Mississauga, ON L4W 0C6

[REDACTED]

with copy to:

[REDACTED]

or to such other address or electronic mail address as any party may, from time to time, designate in the manner set out above. Any such notice or communication will be considered to have been received:

- (a) if delivered by hand during business hours (and in any event, at or before 3:00 p.m. local time in the place of receipt) on a Business Day, upon receipt by a responsible representative of the receiver, and if not delivered during business hours, upon the commencement of business hours on the next Business Day; and
- (b) if delivered by electronic mail during business hours (and in any event, at or before 3:00 p.m. local time in the place of receipt) on a Business Day, upon receipt, and if not delivered during business hours, upon the commencement of business hours on the next Business Day provided that:
 - (1) the receiving party has, by electronic mail or by hand delivery, acknowledged to the notifying party that it has received such notice; or
 - (2) within 24 hours after sending the notice, the notifying party has also delivered a copy of such notice to the receiving party by hand delivery.

8.2 Entire Agreement

Unless otherwise stated in this Agreement, this Agreement constitutes the entire agreement between the parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings concerning the subject matter of this Agreement. No party has relied on any representation except as expressly set out in this Agreement.

8.3 Waiver

The failure of any party to exercise any contractual right or remedy will not constitute a waiver thereof, and no waiver will be effective unless it is communicated in writing to the other party. A waiver of any right or remedy arising from a breach of this Agreement will not constitute a waiver of any right or remedy arising from any other breach of this Agreement.

8.4 No Partnership or Agency

Nothing in this Agreement will be construed as creating a partnership or as constituting the Material Project Contractor as an agent of the Authority. The Material Project Contractor will not hold itself out as having any authority or power to bind the Authority in any way.

8.5 Conflicting Agreements

If there is any conflict or inconsistency between the provisions of this Agreement and the Project Agreement, the provisions of the Project Agreement will prevail.

8.6 Remedies Cumulative

The rights and remedies under this Agreement are cumulative and are in addition to and not in substitution for any other rights and remedies available at law or in equity or otherwise. No single or partial exercise by a party of any right or remedy precludes or otherwise affects the exercise of any other right or remedy to which that party may be entitled.

8.7 Counterparts

This Agreement may be executed in any number of counterparts, all of which when taken together will constitute one and the same instrument.

8.8 Delivery by Fax

Any party may deliver an executed copy of this Agreement by fax but that party will immediately dispatch by delivery in person to the other parties an originally executed copy of this Agreement.

8.9 Joint and Several

If the Material Project Contractor is comprised of more than one legal entity, the obligations and liabilities of the Material Project Contractor under this Agreement will be the obligations and liabilities of each legal entity comprising the Material Project Contractor, jointly and severally with each other such legal entity.

8.10 Disputes

Any dispute between any of the parties with respect to any of the subject matters of this Agreement or any disagreement between any of the parties with respect to any matter that, by the express terms of this Agreement, is to be agreed upon by the parties will be resolved in accordance with, and the parties will comply with, the Dispute Resolution Procedure, provided that, for greater certainty, the parties acknowledge that, during a Step-In Period or after the Transfer Effective Date, any dispute with respect to

any of the subject matters of the Material Contract will be resolved in accordance with the applicable dispute resolution procedure thereunder.

7. Loans at the date of this Agreement issued as follows: None
8. Other outstanding securities (including description of type of securities, name and address of holder and amount): None
9. Summary of any constitutional, contractual or other special voting rights, restrictions on powers of directors or similar matters relevant to the control of Project Co:

The business and affairs of Project Co are managed by an executive committee appointed by the Partners. The day to day operations of Project Co will be managed by Carillion Construction Inc. pursuant to the terms of a management services agreement as between Project Co and Carillion Construction Inc. as manager (the "**Management Services Agreement**"). Certain material decisions with respect to Project Co must be decided by way of unanimous resolution of the Partners, including: major corporate changes to Project Co (i.e., changes to the constating documents, changes to the business, merger, amalgamation, wind-up, reorganization or termination); changes to the managerial structure of Project Co; delegations of authority to officers of any of the Partners; the commencement of or settlement of any litigation and/or other administrative proceedings involving Project Co; creation of new subsidiaries of any Partner; certain financial matters of Project Co (including the approval of financial statements, any changes to the fiscal period and/or accounting principles previously applied by Project Co, any filing of any application under the *Bankruptcy and Insolvency Act*, the *Companies Creditors Arrangement Act* or legislation of similar effect or any material increase or decrease in the aggregate amount of the approved annual capital budget or annual operating budget); any material acquisition of property, plant or equipment; any disposition of all or substantially all of the property, plant and equipment of Project Co; the entering into of any material contract; any amendment to, termination of, or waiver of rights in respect of (a) the equity contribution agreement as between the Partners, Project Co and the Indenture Trustee, (b) the amended and restated general partnership agreement as between each of the Partners with respect to Project Co (the "**Amended and Restated General Partnership Agreement**"), (c) the Agreement, (d) the Design-Build Agreement, (e) the Services Contract, (f) the interface agreement between Project Co, the Service Provider and the Design-Builder, (g) the Management Services Agreement and (h) the Finance Documents (as defined in the Trust Indenture) and other items as described in section 5.12 of the Amended and Restated General Partnership Agreement.

Furthermore, Articles 3-4 and Schedule B of the Amended and Restated General Partnership Agreement restrict the issuance and transfer of units and partnership interests.

APPENDIX 13A REFEREE AGREEMENT

SCHEDULE 13

DISPUTE RESOLUTION PROCEDURE

1. INTERPRETATION

1.1 Definitions

In this Schedule, in addition to the definitions set out in Schedule 1 of this Agreement:

“**Dispute Notice**” has the meaning set out in Section 2.2 of this Schedule;

“**Dispute Resolution Procedure**” has the meaning set out in Section 2.1 of this Schedule;

“**Initiating Party**” has the meaning set out in Section 2.6(b)(2) of this Schedule;

“**Notice of Intention to Arbitrate**” has the meaning set out in Section 2.6(a) of this Schedule;

“**Notice of Objection to Arbitration**” has the meaning set out in Section 2.6(b) of this Schedule;

“**Referee**” has the meaning set out in Section 2.4 of this Schedule;

“**Referee Agreement**” has the meaning set out in Section 2.4(c) of this Schedule;

“**Referee Notice**” has the meaning set out in Section 2.4 of this Schedule; and

“**Responding Party**” has the meaning set out in Section 2.6(b)(2) of this Schedule.

2. DISPUTE RESOLUTION

2.1 Procedure

Unless both parties otherwise agree, all Disputes will be resolved in accordance with the provisions of this Schedule (the “**Dispute Resolution Procedure**”), provided that the decision of the Independent Certifier that Service Commencement has been achieved is final and binding on the parties, and such decision will not be the subject of a Dispute and will not be subject to the Dispute Resolution Procedure. Except for the foregoing decision as to achievement of Service Commencement, all other decisions of the Independent Certifier, including as to any Deficiencies, may be the subject of a Dispute and may be subject to the Dispute Resolution Procedure.

2.2 Dispute Notice

The Dispute Resolution Procedure may be commenced by either party by giving notice to the other party (the “**Dispute Notice**”) briefly setting out the pertinent facts, the remedy or relief sought and the grounds on which such remedy or relief is sought.

2.3 Negotiation

Within 5 Business Days of one party receiving a Dispute Notice from the other, or such longer period as the parties may agree, a Representative of each party will meet and make good faith efforts to resolve the Dispute by without prejudice negotiations.

2.4 Fast Track Referee Process

If the Dispute is not resolved pursuant to Section 2.3 of this Schedule to the mutual satisfaction of the parties within 5 Business Days (or such longer period as the parties may agree) following the receipt of the Dispute Notice by the receiving party, either party may by notice to the other (a "**Referee Notice**"), request the appointment of a referee ("**Referee**") as provided under the terms of this Section 2.4. The Referee will be appointed as an expert to resolve the Dispute and will participate in the resolution of the Dispute as set out below:

- (a) if the Referee Notice is given during the Construction Period, then the Independent Certifier will as of the end of the 2nd Business Day following the delivery of the Referee Notice be deemed the Referee unless:
 - (1) within 2 Business Days of the delivery of the Referee Notice, either (i) the parties agree that another person would be more suitable considering the nature of the Dispute, or (ii) either party gives written notice that it objects to the Independent Certifier acting as Referee in relation to the Dispute; or
 - (2) for any reason the Independent Certifier is unable to perform the duties of the Referee,and in either such case the Referee will be appointed in the manner described in Section 2.4(b) of this Schedule;
- (b) if the Dispute Notice is given during the Operating Period or Section 2.4(a) of this Schedule requires that this Section 2.4(b) applies, the parties will appoint a Referee in the following manner:
 - (1) within 2 Business Days of the delivery of a Referee Notice, each party will submit in writing to the other party, the names of no more than 2 candidates for Referee who are independent of the parties, experienced in the resolution of similar disputes and immediately available to perform the role of Referee in respect of the Dispute at hand;
 - (2) if a party has an objection to a proposed candidate, it will give written notice of such objection with reasons to the other party;
 - (3) if for any reason within 3 Business Days of the delivery of a Referee Notice, a Referee has not been appointed, then either party may apply to a judge for an arbitrator to be promptly appointed in accordance with the *Arbitration Act*

(Northwest Territories) to act as a Referee under this Agreement in relation to the Dispute.

- (c) the parties will enter into an agreement with the Referee to act as Referee generally in the form attached as Appendix 13A (the "**Referee Agreement**"), such agreement to be entered into no later than 2 Business Days after the Referee's appointment. The Referee's fees and expenses will be shared equally by the Authority and Project Co. The Authority will pay the full amount of the Referee's fees and expenses on the day that such fees and expenses are due (including any advances on fees and expenses) in accordance with the Referee Agreement and Project Co will reimburse the Authority, for Project Co's share of all such fees and expenses within 5 Business Days of receipt of a written demand from the Authority, failing which the Authority will be entitled to deduct the amount of Project Co's share of the Referee's fees and expenses from amounts otherwise due to Project Co under the provisions of this Agreement;
- (d) the Referee will conduct an impartial review of the Dispute in such manner as the Referee thinks fit, including carrying out on-site inspections and interviews with any persons that the Referee thinks fit. The parties will comply with all reasonable requests from the Referee for additional information, documents and access to personnel which the Referee considers necessary for the review. Any submission or documentation in respect of the Dispute provided to the Referee by a party will also be provided to the other party;
- (e) the Referee may, with the written approval of both parties, retain other professional persons or experts to assist with the review and will pay due regard to any request by either party for him to retain such other professional persons or experts;
- (f) the Referee will not be obliged to conduct his enquiries in the presence of the parties or receive submissions from the parties, except to the extent that the Referee thinks fit, and may render his decision notwithstanding the failure of a party to participate in the proceedings;
- (g) the Referee will render a brief, written, reasoned and impartial decision on the Dispute, with copies to both parties within 5 Business Days of the signing by the Referee and both parties of the Referee Agreement referred to in Section 2.4(c) of this Schedule, or such longer period as agreed to in writing by both parties. The Referee's decision will be in the form of a proposed determination of the rights of the parties having regard to the Referee's understanding of the relevant contractual provisions, the applicable law and the facts as agreed by the parties or as best the Referee is able to determine them;
- (h) each party acknowledges the value of having the Referee render a timely decision regarding the Dispute. If the Referee is unable to render his decision within the time set or as extended by mutual agreement of the parties, then the parties will request that the Referee provide to the parties within such time such analysis of the Dispute as the Referee is able to make within that time and describe the further work the Referee recommends would be required in order to arrive at a reasoned decision;

- (i) subject to the provisions of Section 3.3 of this Schedule, a decision of a Referee is not binding on the parties but is intended to assist the parties to reach agreement with respect to the Dispute;
- (j) the proceedings under this Section 2.4 will be confidential and all information, data or documentation disclosed or delivered by either party to the Referee as a result or in connection with his duties as Referee will be treated as confidential and neither the parties nor the Referee will, except as would be permitted under Section 17 of this Agreement, disclose to any Person any such information, data or documentation unless the parties otherwise agree in writing. Nothing contained in this provision will prevent the submission in any subsequent proceedings of any evidence other than evidence that came into existence for the express purpose of submission to, or assistance of, the Referee; and
- (k) the proceedings by or before a Referee will be without prejudice in any subsequent proceedings.

2.5 Commencement of Proceedings

If the Dispute is not completely resolved by agreement between the parties within 10 Business Days of the receipt of the Referee's decision or analysis pursuant to Section 2.4 of this Schedule (or such longer period as the parties may agree) or within 10 Business Days of the date on which the Referee's decision or analysis ought to have been received under Section 2.4 of this Schedule then either party may commence proceedings to have the Dispute finally settled, either by arbitration under Section 2.6 of this Schedule or by litigation as contemplated in Section 2.7 of this Schedule. In any such proceedings the scope of issues will not be limited strictly to the terms of the Dispute Notice but may extend to include directly related matters for the purpose of completely resolving the Dispute.

2.6 Arbitration

If a party is entitled under Section 2.5 of this Schedule to commence proceedings to have a Dispute finally resolved, then:

- (a) the party may give the other party notice ("**Notice of Intention to Arbitrate**") of its intention to submit the Dispute to binding arbitration; and
- (b) if the other party does not deliver a notice of objection (the "**Notice of Objection to Arbitration**") within 5 Business Day of receipt of the Notice of Intention to Arbitrate then either party may refer the Dispute to be finally resolved by arbitration as follows:
 - (1) the *Arbitration Act* (Northwest Territories) will apply to the arbitration, as modified by this Schedule or as otherwise agreed by the parties;
 - (2) arbitration proceedings will be commenced by a party (the "**Initiating Party**") giving notice to the other party (the "**Responding Party**");

- (3) the arbitrator(s) will have the authority to award any remedy or relief that a court or judge of the Supreme Court of the Northwest Territories could order or grant in accordance with the Agreement, including specific performance of any obligation created under the Agreement, the issuance of an interim, interlocutory or permanent injunction, or the imposition of sanctions for abuse or frustration of the arbitration process;
- (4) meetings and hearings of the arbitrator(s) will take place in the City of Yellowknife or in such other place as the parties agree and such meetings and hearings will be conducted in the English language unless otherwise agreed by such parties;
- (5) the arbitrator(s) may at any time fix the date, time and place of meetings and hearings in the arbitration, upon reasonable notice to the parties;
- (6) subject to any adjournments permitted by the arbitrator(s) the final hearing will be continued on successive Business Days until it is concluded;
- (7) all meetings and hearings will be in private unless the parties agree otherwise and either party may be represented at any meetings or hearings by legal counsel;
- (8) either party may examine, and re-examine, all its own witnesses at the arbitration and may cross-examine all of the other party's witnesses;
- (9) the arbitration will be kept confidential and the existence of the proceeding and any element of it (including any pleadings, briefs or other documents submitted or exchanged, and testimony or other oral submission and any awards) will not be disclosed to any party other than the arbitrators, the parties (and their respective directors, officers, shareholders and legal counsel), the Senior Lenders and such other persons as may be necessary to the conduct of the proceeding or required by law; and
- (10) the arbitrator(s) will deliver a decision in writing within 15 Business Days after the conclusion of the hearing and, unless the parties agree otherwise, will set out reasons for the decision.

2.7 Litigation

If either party is entitled under Section 2.5 of this Schedule to commence proceedings to have a Dispute finally resolved and:

- (a) no Notice of Intention to Arbitrate has been delivered by one party to the other; or
- (b) a Notice of Objection to Arbitration has been delivered by one party to the other in response to a Notice of Intention to Arbitrate;

then either party may commence proceedings in respect of the Dispute in the courts of the Northwest Territories and for purposes of certainty, the provisions of Section 17.5 of this Agreement will apply to such litigation. If a party has commenced such proceedings but has not served the other party as required for such proceedings prior to the other party delivering a Notice of Intention to Arbitrate, the party commencing such proceedings will either give the Notice of Objection to Arbitrate or serve such party the required notice within the time required under Section 2.6(b) of this Schedule, failing which the Dispute will be resolved by arbitration under Section 2.6 of this Schedule.

3. GENERAL

3.1 Other Remedies

Nothing contained in this Schedule will preclude a party from initiating a proceeding in a court of competent jurisdiction for the purpose of obtaining an effective emergency or provisional remedy to protect its rights as necessary in the circumstances, including obtaining temporary and preliminary injunctive relief and other orders, whether before or after the Dispute has been initiated by a Dispute Notice.

3.2 Strict Compliance with Time Limits

The parties acknowledge that timely resolution of Disputes is mutually beneficial and the time limits set out in this Schedule, or as otherwise agreed by the parties, will therefore be strictly complied with and enforced.

3.3 Interim Decision

If a Dispute occurs then the Authority and Project Co will in good faith carry out their respective obligations under this Agreement pending resolution of the Dispute pursuant to the Dispute Resolution Procedure. Prior to resolution of the Dispute, the Authority may in its discretion by notice to Project Co direct Project Co to proceed in respect of the matter in Dispute or any related matter and Project Co will comply with and implement the direction. Such direction will be without prejudice to Project Co's rights to compensation or other rights under the Agreement. Nothing in this Schedule will limit the Authority's right to require a Change.

APPENDIX 13A

REFEREE AGREEMENT

BETWEEN:

[Name and address of Referee]
(the “**Referee**”)

AND:

Government of the Northwest Territories
(the “**Authority**”)

AND:

Boreal Health Partnership
(“**Project Co**”)

We write to confirm your appointment as a Referee under the Project Agreement dated ■ between the Authority and Project Co (the “Project Agreement”). The terms of your appointment are as contained in Section 2.4 of Schedule 13 [Dispute Resolution Procedure] to the Project Agreement.

We confirm our agreement for you to review the Dispute(s) described in the Dispute Notice in accordance with the provisions of the Project Agreement, and to perform the functions of a Referee as described in Section 2.4 of Schedule 13 [Dispute Resolution Procedure] to the Project Agreement. A copy of the Project Agreement and related materials, will be forwarded to you shortly.

We confirm that your daily/hourly rate for fees is \$ _____. In addition to your invoiced fees, the Authority will pay any and all reasonable disbursements incurred in providing your services.

Please submit your invoices on a monthly basis directly to _____ **[Insert name of Authority’s Construction or Operating Period Representative as applicable]** (the “**Authority’s Representative**”). The Authority will make payment within 30 calendar days of receipt.

Please confirm your agreement to the terms as set out in this letter by signing a copy of the enclosed letter and returning it to the Authority’s Representative.

Yours truly,

Authorized Signatory of the Authority

SCHEDULE 14

RECORDS AND REPORTS

TABLE OF CONTENTS

1. GENERAL REQUIREMENTS..... 1

2. RECORDS TO BE KEPT 3

SCHEDULE 14

RECORDS AND REPORTS

1. GENERAL REQUIREMENTS

- (a) Project Co will retain and maintain all the records (including superseded records) referred to in Section 2 of this Schedule as follows:
- (1) in accordance with this Schedule and other applicable terms of this Agreement;
 - (2) in an organized manner;
 - (3) in a form that is capable of audit;
 - (4) in accordance with the requirements of Good Industry Practice, including all requirements of the Canadian Institute for Health Information (CIHI);
 - (5) having due regard to the guidelines and policies of the Access and Privacy Office of GNWT;
 - (6) in accordance with Project Co's normal business practices; and
 - (7) in accordance with GAAP.
- (b) Wherever practical and unless otherwise agreed, Project Co will retain and maintain original records in hard copy form. Project Co will also maintain all electronic data and records in readable and accessible form.
- (c) Any drawings or plans required to be made or supplied pursuant to this Agreement will be of a size appropriate to show the detail to be depicted clearly without magnifying aids. If by prior agreement with Project Co the Authority has agreed to accept microfilm, microfiche or other electronic storage media (which must include secure back up facilities), Project Co will make or supply, or have made or supplied, drawings and other documents in such agreed upon form.
- (d) Project Co will retain and maintain all records referred to in Section 2 of this Schedule, all in sufficient detail, in appropriate categories and generally in such a manner to enable each party to comply with its obligations and exercise its rights under this Agreement.
- (e) Project Co will maintain all records for the period specified for such records in Section 2 of this Schedule and if no period is specified, for not less than 10 years.
- (f) Prior to destroying or disposing of any records required to be maintained under Section 2 of this Schedule, Project Co will give the Authority 45 Business Days' notice of Project Co's intention to destroy or dispose of records. If within such 45 Business Day period the Authority gives notice to Project Co that the Authority wishes to receive any of the records, then Project Co will, at the cost and expense of the Authority, deliver up such

records to the Authority in the manner and at the location or locations as the Authority specifies, acting reasonably.

- (g) Project Co will provide a comprehensive computerized information management system which will include:
- (1) records and information related to the Design, the Construction, the Facility and all Services delivered under this Agreement;
 - (2) access by the Authority (through online web access or other access acceptable to the Authority) to all such information such that the Authority will be able to read, copy, download and search all such records without licence or payment;
 - (3) hardware and software which operate the information management and communications systems and which interface with the Authority's information technology systems, provided that any changes required and resulting from an upgrade to, or change by, the Authority to its system will be paid for by the Authority;
 - (4) backup and storage in safe custody of the data, materials and documents in accordance with Good Industry Practice; and
 - (5) records and details of specific license requirements.
- (h) Within 20 Business Days after the end of each Contract Year, Project Co will deliver to the Authority a report, as reasonably requested by the Authority in connection with the Authority's financial reporting, detailing to the best of Project Co's knowledge at the time of any such report any and all liabilities, claims and demands, including contingent liabilities, claims and demands, that Project Co has or may have against the Authority or that may be owing by the Authority to Project Co. The parties acknowledge and agree that the contents of any such report or the failure to mention any matter in any such report will not limit either party's rights or remedies against the other party as contemplated by this Agreement.
- (i) Project Co will provide to the Authority:
- (1) not later than 80 Business Days after the end of each fiscal year of Project Co, a copy of Project Co's audited financial statements prepared in accordance with GAAP, consistently applied; and
 - (2) not later than 40 Business Days after the end of each fiscal quarter of Project Co, a copy of Project Co's unaudited quarterly financial statements, together with copies of all related directors' and auditors' reports and all other notices and circulars to shareholders or partners, all of which documents will be treated by the Authority as Confidential Information of Project Co.

- (j) The Authority and its employees, agents and other representatives may at any time at the Authority's expense conduct an audit, examination or investigation of all the records (including superseded records) referred to in this Schedule. Project Co will make available its facilities and records and provide reasonable assistance, including providing copies, in the conduct of - and, without limiting Schedule 6 [Changes, Minor Works and Innovation Proposals], implement any recommendations from the Authority arising from - the audit, examination or investigation.

2. RECORDS TO BE KEPT

Project Co will retain, and will require its Project Contractors to retain, the following:

- (a) this Agreement, its Schedules, the Project Contracts, Senior Financing Agreements and all other documents and instruments in respect of any financing, including all amendments to such agreements for a period of 6 years after the Termination Date;
- (b) the Financial Model, including the following in respect of the Financial Model:
 - (1) all prior versions;
 - (2) all amendments and modifications;
 - (3) all related or incidental reports; and
 - (4) written operating instructions in sufficient detail to allow the Authority to access and review all formulas, coding, data and other inputs;
- (c) the as-built drawings, plan, records and other Construction documentation described in Schedule 2 (Design and Constructions Protocols) and Schedule 3 (Design and Construction Specifications) for a period of 6 years after the Termination Date, including any revisions or amendments to such documents (copies of all such documents will be kept at the Facility and made accessible to the Authority at all times), including up-to-date CAD drawings for the Facility and all Services, linked to, and compatible with, the Authority's information systems;
- (d) all documents relating to the appointment and supervision of Project Co's Design and Construction Representative and the Independent Certifier for a period of 6 years following the Service Commencement Date;
- (e) all documents relating to all Permits, including applications, refusals and appeals, for a period of 6 years after the expiry date of the relevant Permit;
- (f) all notices, reports, test reports, results and certificates relating to the Design, the Construction, and the Lands, including as described in Schedule 2 [Design and Construction Protocols] or in Schedule 3 [Design and Construction Specifications], for a period of 6 years after the Service Commencement Date;

- (g) all records relating to any inspections of the Facility conducted under applicable Laws or by or for any Governmental Authority;
- (h) all orders or other requirements issued to Project Co by any Governmental Authority for a period of 6 years after such order or requirement has been satisfied by Project Co;
- (i) all operation and maintenance manuals, procedures, guidelines, policies and other similar records in respect of the Facility until the Termination Date including all information electronically and manually recorded by the BMS and the CMMS for the Facility and the Existing Hospital (if applicable) for a period of 6 years after such information was recorded;
- (j) all testing certificates in respect of all building elements, components, systems and equipment and appropriate documentation and records (in particular those relating to any aspects of safety or statutory compliance) relating thereto;
- (k) all notices delivered to the Help Desk and all responses from the Help Desk in respect of such notices for a period of 6 years after such notice was delivered;
- (l) all electronically and manually recorded information with respect to the provision of the Services including Events, Availability Conditions, Unavailability Events and Service Failures for a period of 6 years after such information was recorded;
- (m) all electronically and manually recorded information with respect to actions initiated by Project Co to respond to and rectify Events, Availability Conditions, Unavailability Events and Service Failures for a period of 6 years following rectification of such matters;
- (n) all electronically or manually recorded reports and information related to safety and security of Facility Users, including the date and time of such incidents, for a period of 6 years after each such event;
- (o) a comprehensive electronic inventory control system and asset register that provides up-to-date records for all building elements, components, systems and equipment;
- (p) comprehensive maintenance and overhaul records for the Facility and the Existing Hospital (if applicable) including the date, time and scope of each such activity until the Termination Date;
- (q) all Performance Monitoring Reports and the information and data used to prepare such reports for a period of 6 years following the date of each such report;
- (r) detailed records and reports related to use and consumption of Utilities and Energy;
- (s) invoices and payments, including calculation thereof;
- (t) all certificates, permits, licences, registrations or warranties related to the provision of the Services for a period of 6 years after their expiration;

- (u) all documents relating to Supervening Events and the consequences thereof for a period of 6 years after the relevant event occurred, or in the case of a matter in Dispute, for a period of 6 years after a determination has been made with respect thereto;
- (v) all notices delivered to or received from the Authority's Representative for a period of 6 years after receipt;
- (w) all documents relating to a referral to the Dispute Resolution Procedure for a period of 6 years after a determination has been made with respect thereto;
- (x) all documents submitted in connection with any Change;
- (y) all documents relating to a Change in Control of Project Co;
- (z) all documents relating to a Refinancing (other than an Exempt Refinancing) until the Termination Date;
- (aa) all tax invoices, assessments, returns and other records applicable to the Project (other than any income tax records for Project Co or records pertaining to other taxes personal to Project Co) for a period of 7 years after the Termination Date or such longer period as may be required by Law;
- (bb) all records required by Law (including in relation to health and safety matters) to be maintained by Project Co with respect to the Design, the Construction and the Services;
- (cc) all documents relating to insurance and insurance claims for a period of 12 years after the relevant claim is settled;
- (dd) financial accounts of Project Co referred to in Section 1(i) of this Schedule; and
- (ee) all other records, notices or certificates required to be produced or maintained by Project Co pursuant to the express terms of this Agreement or any Project Contract.

1.	GENERAL	1
2.	CATEGORIES OF COMMUNICATIONS	2
3.	LEAD AND SUPPORTING ROLES	2
4.	LEAD RESPONSIBILITIES	2
5.	SUPPORTING RESPONSIBILITIES	3
6.	ALLOCATION OF LEAD AND SUPPORTING ROLES	4
7.	AUTHORITY RIGHT TO STEP IN AT PROJECT CO'S COST	5

SCHEDULE 16

COMMUNICATION ROLES

The Authority and Project Co will, throughout the Term, share responsibilities for communications, including community relations, stakeholder consultation, media relations and emergency communications on the terms set out in this Schedule.

1. GENERAL

- 1.1 Project Co will consult and cooperate with the Authority regarding communications activities relating to the Project.
- 1.2 The desired outcome of communications activities is to inform and involve the public and other stakeholders about the progress, value and benefits of the Project and to develop and maintain support for the Project.
- 1.3 Communications strategies and plans involving the interests of both parties are to be prepared on a joint basis, with one party taking a lead role and the other a supporting role, as described in this Schedule.
- 1.4 Where communications strategies and plans involve the interests of both parties, each party will give the other a reasonable opportunity (taking into account the need for timely communications) to consider communications strategies and plans initiated by the other and, if information is supplied by a party, it should include or be accompanied by sufficient explanatory or other material to enable the information to be properly considered.
- 1.5 Project Co will consider and, acting reasonably, take into account, public and other stakeholder input in regard to its plans for the Design, the Construction and the Services.
- 1.6 This Schedule is a guideline and may be amended by mutual agreement. Except for non-compliances with this Schedule by Project Co that constitute Persistent Breach, non-compliance with this Schedule by Project Co will not constitute a Project Co Material Breach and non-compliance with this Schedule by the Authority will not constitute an Authority Material Breach.
- 1.7 No communication regarding the subject matter of a Dispute, including one resolved under the Dispute Resolution Procedure, will be made public or shared beyond the parties without the prior written consent of the Authority or Project Co, as the case may be, unless otherwise ordered under the Dispute Resolution Procedure.
- 1.8 Project Co acknowledges that the *Access to Information and Protection of Privacy Act* (Northwest Territories) applies to the Authority, that nothing in this Schedule limits any requirements for compliance with that Act and that the Authority may be required to make disclosure of information under that Act.
- 1.9 Project Co acknowledges that the Authority will be free to disclose (including on websites) this Agreement and any and all terms hereof, except for those portions that would not be required to

be disclosed under the *Access to Information and Protection of Privacy Act* (Northwest Territories). The Authority will consult with Project Co prior to such disclosure.

- 1.10 Except for Section 1.9, this Schedule is subject to the parties' obligations in respect of Confidential Information and Personal Information pursuant to Sections 17.1, 17.2 and 17.3 of this Agreement.

2. CATEGORIES OF COMMUNICATIONS

The following categories of communications are covered by this Schedule and each category applies during the Construction Period and the Operating Period:

- (a) **Communications Planning:** developing plans and strategies in support of the Project, including integrating the categories of communication listed in Section 6 of this Schedule;
- (b) **Community Relations:** keeping all key audiences (as identified in communications plans) informed, including providing overall Project information, including information about schedule, design, construction (including traffic management), facilities management and other services, using any and all appropriate communications tools and tactics;
- (c) **Consultation:** engaging in discussions with Project stakeholders throughout each period;
- (d) **Media Relations:** providing media with Project updates and responding to issues raised by the media; and
- (e) **Emergency Communications:** preparing and implementing crisis communications planning and preparedness.

3. LEAD AND SUPPORTING ROLES

3.1 Within each category of communications set out in Section 6 of this Schedule, Project Co will play either a lead or supporting role, working with the Authority to achieve the desired communications outcomes. These roles may be different for the different periods of the Project.

3.2 For all categories of communication, and whether communication occurs as part of a lead or supporting role, no advertising that involves payment, by Project Co, to a third party may include the Authority or the Project unless Project Co obtains the prior consent of the Authority, not to be unreasonably withheld or delayed.

4. LEAD RESPONSIBILITIES

The following is an overview of the responsibilities associated with lead roles:

- (a) developing a communications plan to include all activities for which the party is identified as lead (communications plans should be updated annually from the Effective Date);

- (b) having regard for the input of the supporting party, approving communication plans and tactics in response to specific circumstances, unless otherwise indicated in this Schedule;
- (c) implementing its role in approved plans;
- (d) achieving the outcomes set out in the annual strategic communication plans;
- (e) maintaining constructive and positive relationships with the public and other stakeholders;
- (f) providing information, as required by the supporting party and its team members, to support communication and consultation activities;
- (g) as relevant to its lead role, organizing, attending and participating in community and other stakeholder consultation meetings and carrying out other communication activities to consult with and report back to the community and other stakeholders, including open houses, information updates, public displays, advertising, website creation, maintenance updates, construction notices, milestone celebration events, news releases and tours, and directing inquiries to the supporting party as appropriate;
- (h) assuming responsibility for costs related to carrying out lead responsibilities, in the amounts and in the manner outlined in approved plans;
- (i) monitoring whether the Design, the Construction and the Services are conducted in a manner consistent with strategic communication plans and advising the parties of any material inconsistency; and
- (j) having a local, trained media relations spokesperson available 24/7 to respond to media requests.

5. SUPPORTING RESPONSIBILITIES

The following is an overview of the responsibilities associated with supporting roles:

- (a) obtaining approval for plans and tactics before implementation;
- (b) assisting with the development and implementation of plans, including drafting of initial plans and other communication documents, such as coloured floor plans/elevations/perspectives for public communications, as directed by the lead party;
- (c) implementing its role in approved plans;
- (d) maintaining constructive and positive relationships with the public and other stakeholders;
- (e) providing information, as required by the lead party and its team members, to support communication and consultation activities;
- (f) as relevant to its supporting role, organizing, attending and participating in community and other stakeholder consultation meetings and carrying out other communication

activities to consult with and report back to the community and other stakeholders, including open houses, information updates, public displays, advertising, website creation, maintenance updates, construction notices, milestone celebration events, news releases and tours, and directing inquiries to the lead party as appropriate;

- (g) assuming responsibility for costs related to carrying out supporting responsibilities, in the amounts and in the manner outlined in approved plans; and
- (h) having a local, trained media relations spokesperson available 24/7 to respond to media requests.

6. ALLOCATION OF LEAD AND SUPPORTING ROLES

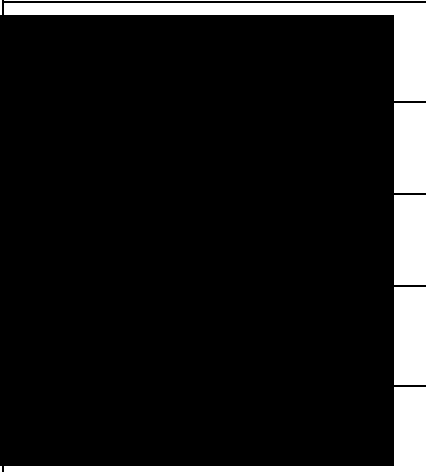

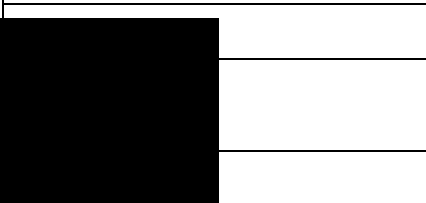

The lead and supporting roles will be allocated as set out in the following table, unless otherwise required by the Authority in consultation with Project Co.

PERIOD	CATEGORY	LEAD	SUPPORTING
Construction Period	Communications Planning	Authority	Project Co
	Community Relations	Authority	Project Co
	Consultation	Authority	Project Co
	Media Relations	Authority	Project Co
	Emergency Communications	Authority	Project Co
	Construction	Project Co	Authority
	Traffic	Project Co	Authority
	Noise	Project Co	Authority
Operating Period	Communications Planning	Authority	Project Co
	Community Relations	Authority	Project Co
	Consultation	Authority	Project Co
	Media Relations	Authority	Project Co
	Emergency Communications	Authority	Project Co

7. AUTHORITY RIGHT TO STEP IN AT PROJECT CO'S COST

If Project Co is required to take a lead role in accordance with Section 6 of this Schedule but fails to comply with its obligations under this Schedule in any material respect, the Authority may give reasonable notice to Project Co that it intends to undertake and assume the lead role obligations of Project Co, at the expense of Project Co, including all direct costs of engaging third party assistance with communication responsibilities and all Direct Losses of the Authority in connection with fulfilling Project Co's obligations under this Schedule.

SCHEDULE 17
KEY INDIVIDUALS

Name of Key Individual	Capacity	Applicable Period of Term
Project Co:		
	Project Lead	Construction Period Operating Period
	Project Co's Design and Construction Representative	Construction Period
	Project Co's Operating Period Representative	Operating Period
	Communications Lead	Construction Period Operating Period
	Transition Manager	Construction Period and Operating Period
Design-Builder:		
	Design-Builder Lead	Construction Period
	Design Lead	Construction Period
	Construction Lead	Construction Period
	FF&E Lead	Construction Period
	Equipment Planning Medical Equipment Specialist	Construction Period
	Commissioning Lead	Construction Period
Service Provider:		
	Service Provider Lead	Operating Period
	Director of Facility Management and Operations	Operating Period
	Facility Maintenance Team Lead	Operating Period

SCHEDULE 18

COMPLETION DOCUMENTS

1. GENERAL

In this Schedule “certified” will mean that the relevant document is certified (for and on behalf of the relevant corporation or other entity and without personal liability) by an officer, director or authorized signatory of the relevant entity as a true and complete copy in full force and effect and unamended as of the date of the relevant certificate.

2. DOCUMENTS TO BE DELIVERED BY PROJECT CO

Unless an original document is specifically referred to below, Project Co will deliver to the Authority a certified copy of each of the following documents in accordance with Section 2.2(a) of this Agreement:

- (a) an original of this Agreement executed by Project Co;
- (b) the general partnership agreement or agreements between the partners of Project Co relating to Project Co, any agreements relating to subscriptions of equity, contributions of capital or other funding by such parties in Project Co, and any other agreements relating to the parties providing an equity commitment to Project Co or the Senior Lenders in respect of Project Co, including the equity contribution agreement, executed by the parties to such agreements;
- (c) the Senior Financing Agreements, executed by the parties to such agreements;
- (d) certification from Project Co that:
 - (1) the agreement or agreements referred to in item 2(b) are unconditional in accordance with their terms, accompanied by evidence of the same and that the subscriptions of equity (and other funding) to be made as of the Effective Date under such agreement or agreements have been made, accompanied by evidence of the same;
 - (2) the Senior Financing Agreements are unconditional; and
 - (3) all conditions to the availability of funds to Project Co under the Senior Financing Agreements have been satisfied or waived, accompanied by evidence of the same;
- (e) an original of the Lenders’ Remedies Agreement, executed by the parties to such agreement (other than the Authority);
- (f) an original of the Insurance Trust Agreement, executed by the parties to such agreement (other than the Authority);
- (g) the Design-Build Agreement, executed by the parties to such agreement;
- (h) the Services Contract, executed by the parties to such agreement;
- (i) the following documents executed by the parties thereto:
 - (1) Design-Builder:

- (A) the Design-Builder P3 Bond in relation to the Design-Build Agreement;
 - (B) evidence of the subtrade default insurance policy for the Design-Builder's subcontractors; and
 - (C) guarantee from Bird Construction Inc. in accordance with the terms of the Design-Build Agreement.
- (2) Service Provider:
- (A) approved form of letter of credit as security for the Service Provider's obligations; and
 - (B) guarantee from the Service Provider's parent with respect to the Services Contract.

In each case the performance and other security will provide for a novation or assignment to the Authority if the Authority exercises its rights under the Design-Builder's Collateral Agreement or Service Provider's Collateral Agreement, as applicable, provided that the Authority's interest in the performance and other security will remain subject to the security interest granted in favour of the Lenders until the Senior Debt has been repaid;

- (j) an original of the Design-Builder's Collateral Agreement, executed by the parties to such agreement (other than the Authority);
- (k) an original of the opinion of counsel to the Design-Builder in respect of the Design-Build Agreement and the Design-Builder's Collateral Agreement, such opinion to be in a form acceptable to the Authority and its counsel, acting reasonably;
- (l) an original of the opinion of counsel to the parent of the Design-Builder in respect of the guarantee given in support of the Design-Build Agreement, such opinion to be in a form acceptable to the Authority and its counsel, acting reasonably;
- (m) an original of the Service Provider's Collateral Agreement, executed by the parties to such agreement (other than the Authority);
- (n) an original of the opinion of counsel to the Service Provider in respect of the Services Contract and the Service Provider's Collateral Agreement, such opinion to be in a form acceptable to the Authority and its counsel, acting reasonably;
- (o) an original of the opinion of counsel to the parent of the Service Provider in respect of the guarantee given in support of the Services Contract, such opinion to be in a form acceptable to the Authority and its counsel, acting reasonably;
- (p) an original of the interface agreement between the Project Contractors and Project Co, executed by the parties to such agreement;
- (q) an original of the Independent Certifier Agreement, executed by the parties to such agreement (other than the Authority);
- (r) a certificate of an officer of Carillion Construction Inc. as manager (the "**Manager**") of Project Co and an officer of each of Project Co's partners certifying true copies of the following:

- (1) an authorizing resolution of the partners of Project Co and an authorizing resolution of the board of directors of each of its partners;
 - (2) incumbency of the officer or officers of the Manager of Project Co and each of the officers of its partners; and
 - (3) the constating documents each of Project Co's partners; and
 - (4) the management services agreement of Project Co;
- (s) a certificate of an officer of each member of the Design-Builder certifying true copies of the following:
- (1) an authorizing resolution of the board of directors of each member the Design-Builder;
 - (2) incumbency of the officers of each member of the Design-Builder; and
 - (3) the constating documents of each member of the Design-Builder;
- (t) a certificate of an officer of the Service Provider and the parent company of the Service Provider certifying true copies of the following:
- (1) an authorizing resolution of the board of directors of the Service Provider and its parent company;
 - (2) incumbency of the officers of the Service Provider and its parent company; and
 - (3) the constating documents of the Service Provider and its parent company;
- (u) certificate of good standing for Project Co;
- (v) a government certified copy of any applicable partnership registration;
- (w) statement of extra-territorial registration in the Northwest Territories for Project Co;
- (x) a copy of an insurance binder or certificates, certified copies or originals for all policies of insurance required to be taken out by or on behalf of Project Co for the Construction Period in accordance with this Agreement;
- (y) an original notice of appointment of Representatives to be appointed by Project Co under this Agreement;
- (z) an original of the opinion from counsel to Project Co that Project Co and its partners exist, have the power and capacity to enter into this Agreement, the Senior Financing Agreements, the Lenders' Remedies Agreement, the Independent Certifier Agreement, the Design-Builder Collateral Agreement and the Service Provider Collateral Agreement, the interface agreement between the Project Contractors and Project Co, the Insurance Trust Agreement and the Tripartite Agreement, and that such documents have been duly authorized, executed and delivered by Project Co, create valid and binding obligations, and are enforceable against Project Co in accordance with their terms, in a form acceptable to the Authority and its counsel, acting reasonably, and including originals of relevant certificates and other documents relied upon by Project Co's counsel;

- (aa) a certificate from Project Co certifying Schedule 15 [Financial Model], and the electronic version of the same, are true and correct copies of the Financial Model;
- (bb) an audit of the Financial Model dated September 22, 2015, by Operis Business Engineering Limited;
- (cc) an original of the Tripartite Agreement, executed by the parties to such agreement (other than the Authority);
- (dd) an Agreement to Lease the Existing Hospital executed by a third party developer in the form attached in Appendix 18A [Form of Agreement to Lease] hereto; and
- (ee) such other documents as the parties may agree, each acting reasonably.

3. DOCUMENTS TO BE DELIVERED BY THE AUTHORITY

Unless an original document is specifically referred to below, the Authority will deliver to Project Co a certified copy of each of the following documents in accordance with Section 2.2(b) of this Agreement:

- (a) an original of this Agreement executed by the Authority;
- (b) an original of the Lenders' Remedies Agreement, executed by the Authority;
- (c) an original of the Insurance Trust Agreement, executed the Authority;
- (d) an original of the Design-Builder's Collateral Agreement, executed by the Authority;
- (e) an original of the Service Provider's Collateral Agreement, executed by the Authority;
- (f) an original of the Independent Certifier Agreement, executed by the Authority;
- (g) a certificate of an officer of the Authority certifying:
 - (1) the Authority has taken all necessary action to authorize the execution and delivery of, and the performance of its obligations under, this Agreement, the Lenders' Remedies Agreement, the Insurance Trust Agreement, the Design-Builder's Collateral Agreement, the Service Provider's Collateral Agreement, the Independent Certifier Agreement and the Tripartite Agreement;
 - (2) the Financial Management Board of the Authority has approved the entering into of this Agreement, and the Lenders' Remedies Agreement, the Insurance Trust Agreement, the Design-Builder Collateral Agreement, the Service Provider Collateral Agreement, the Independent Certifier Agreement and the Tripartite Agreement in the forms appended to this Agreement or provided to the Financial Management Board; and
 - (3) the identity and signature of the authorized delegate of the Authority;
- (h) an original notice of appointment of the Representatives to be appointed by the Authority under this Agreement;
- (i) an original of an opinion (or originals of opinions, as applicable) from internal and/or external counsel to the Authority that the Authority exists, has the power and capacity to enter into this Agreement, the Lenders' Remedies Agreement, the Independent Certifier Agreement, the Design-Builder Collateral Agreement, the Service Provider Collateral

documents have been duly authorized, executed and delivered by the Authority, create valid and binding obligations, and are enforceable against the Authority in accordance with their terms, in a form acceptable to Project Co and its counsel, acting reasonably, and including originals of relevant certificates and other documents relied upon by the Authority's counsel;

- (j) an original of the Tripartite Agreement, executed by the Authority; and
- (k) such other documents as the parties may agree, each acting reasonably.

3. **Initial Remediation Work:** The Parties hereby acknowledge that prior to the Term Commencement Date, certain remediation and decommissioning work to the Existing Hospital Building set out in Schedule "B" attached hereto (the "Initial Remediation Work") shall be completed by Project Co, in accordance with the obligations of Project Co contained in the Tripartite Agreement. The date of completion of the Initial Remediation Work is hereafter referred to as the "IRW Completion Date".

4. **Renovation Work:** The Tenant shall, subject to receipt of amounts in the Existing Facility Fund (as defined below) and otherwise at no cost to the Landlord, complete certain renovation work to facilitate the Tenant's subleasing of the Existing Hospital Building (the "Renovation Work"), as set out in Schedule "C" attached hereto

The Tenant acknowledges and agrees that the obligations of the Landlord with respect to the Renovation Work shall be limited to issuing distributions from the Existing Facility Fund (subject to sufficient funds being available).

The Tenant further acknowledges and agrees that its obligations with respect to the performance and completion of the Renovation Work shall not be limited to work for which amounts are or may be available from the Existing Facility Fund.

5. **Tenant Security:** The Tenant covenants and agrees to deliver to the Landlord:

(a) on or before the date of this Agreement to Lease, the amount of [REDACTED] (the "Tenant Security"); and

(b) within five (5) days following the IRW Completion Date, the amount of [REDACTED] (the "Tenant Works Security"),

to be held by the Landlord as security (together with security previously delivered by Project Co to the Landlord in the amounts of [REDACTED] (the "Project Co Initial Security") and [REDACTED] (the "Project Co Works Security", collectively with the Tenant Security, the Tenant Works Security and the Project Co Initial Security, the "Security") for the performance of the Renovation Work required under the terms of the Lease.

The Security shall be in the form of either cash, letter(s) of credit (or a combination thereof) or other form(s) of security acceptable to the Landlord.

In the event the Tenant fails to deliver the Tenant Works Security when required to do so, the Lease shall immediately terminate and the Tenant Security shall be retained and forfeited to the Landlord as liquidated damages, and not as a penalty, as full and final settlement of all obligations of the Tenant (and the Indemnifier) as set out in the Lease. In the event of such termination, and for greater certainty, all amounts contained within the Existing Facility Fund shall be retained by the Landlord.

6. **Existing Facility Fund:** The Security shall be held by the Landlord in a segregated fund (the "Existing Facility Fund"). The Tenant shall be entitled to submit to the Landlord a claim for reimbursement from the Existing Facility Fund with respect to any Renovation Work performed by or on behalf of the Tenant to the Leased Premises at reasonable market rates.

The Tenant represents to the Landlord that the total amount of the Existing Facility Fund is a reasonable estimate of the cost of all work necessary to bring the Leased Premises up to a commercially rentable state, such that it would be reasonable to expect that any additional capital expenditure would be funded by subtenants pursuant to commercial sublease agreements (assuming a reasonable commercial subtenant mix).

7. **Landlord's Cooperation:** The Landlord shall reasonably cooperate with requests of the Tenant to effectuate the intent of the Lease. At Tenant's request, the Landlord shall reasonably assist and cooperate with Tenant, at the Tenant's sole cost and expense, in obtaining the permits required for the Renovation Work.
8. **"As Is":** Subject to the completion by Project Co of the Initial Remediation Work, as certified by the Independent Certifier, the Leased Premises will be leased to the Tenant in an "as is" condition and the Landlord will not be required to perform any maintenance or repairs, or construct any improvements, with respect to the Leased Premises.
9. **Basic Rent / Revenue Sharing:**
 - (a) The capital spent on developing and improving the Leased Premises by the Tenant ("Invested Capital"), will be assessed at the end of each quarter during the Term, commencing as of the first day of the Term. The Tenant will be entitled to an annual return of [REDACTED] on Invested Capital ("Developer Return"), to be paid monthly from the Net Income.

For the purposes of this Agreement to Lease and the Lease:

- "Invested Capital" includes all capital spent on developing and improving the Leased Premises by the Tenant, whether from debt, equity, credit or other sources. For greater clarity, "Invested Capital" shall not include any portion of the Project Co Initial Security or the Project Co Works Security invested into the Leased Premises, but shall include the Tenant Security and Tenant Works Security, and any funds received by the Tenant as a result of a mortgage of the Leased Premises.
 - "Net Income" shall mean all income generated by the Leased Premises from subleases with third parties minus, without duplication, Operating Costs, Property Taxes and inducements contained in any subleases with third parties (including attributed costs, such as rent free periods).
 - "Operating Costs" shall include those items set out in Schedule "E" attached hereto. Notwithstanding the foregoing, the parties agree that the definition of "Operating Costs" to be included in the Lease, shall be subject to further agreement between the Landlord and the Tenant, each acting reasonably, based upon the proposed subtenant mix.
- (b) That portion of the Net Income generated by subleases with arm's length third parties in excess of the Developer Return ("Excess Income") will be shared [REDACTED] to the Landlord.
 - (c) That portion of the Net Income generated by subleases with the Government of the Northwest Territories or other territorial public agencies in excess of the Developer Return will be shared [REDACTED] to the Landlord during the currency of such subleases.
 - (d) During periods where the Net Income is insufficient to pay the Developer Return, the shortfall will be accrued to the benefit of the Tenant. Any such accrued shortfalls will be paid from future Excess Income before being eligible for sharing between the Tenant and the Landlord.
 - (e) The Tenant shall satisfy certain financial reporting requirements and shall provide the Landlord will copies of all books and records and other accounting information in

connection with the subleasing of the Leased Premises and rental revenue generated therefrom, including, but not limited to, an annual statement of cash flows.

For the purposes of the Lease, Basic Rent shall be, the portion of the Net Income payable to the Landlord in accordance with Section 9(b) and 9(c) above. Basic Rent shall be agreed upon on an estimated annual basis by the Landlord and the Tenant, acting reasonably (the "Estimated Basic Rent").

The Tenant will pay to the Landlord, in monthly installments, one-twelfth of the amount of the Estimated Basic Rent plus applicable taxes by way of equal monthly instalments by cheque in arrears, payable on the first day of each month, commencing on the first day of the next month following the Term Commencement Date. Any Estimated Basic Rent payable for a part of a month shall be prorated on a daily basis.

Within six (6) months after the expiration of each year of the Term, the Tenant will deliver to the Landlord a statement of the Net Income generated by the Leased Premises together with a detailed statement of costs and expenses, including all taxes and utilities (collectively the "Basic Rent Statement").

If the aggregate of the monthly instalments of the Estimated Basic Rent actually paid by the Tenant during the preceding year (the "Actual Payments") is less than the portion of the Net Income calculated in accordance with Section 9(b) and 9(c) above payable to the Landlord for that lease year (the "Actual Net Income"), the Tenant will pay the difference without interest within thirty (30) days after the delivery of the Basic Rent Statement. If the Actual Payments are greater than the Actual Net Income, the Landlord will refund the difference without interest within thirty (30) days after the delivery of the Basic Rent Statement.

10. **Additional Rent:** In addition to the payment of Basic Rent, Tenant shall pay to Landlord in advance on the first day of each month commencing on the Term Commencement Date, as additional rent, all Property Taxes (if paid by the Landlord) and all other amounts that the Landlord and the Tenant agree in the Lease are chargeable to the Tenant in connection with the operation, maintenance, repair, replacement and management of the Leased Premises.
11. **Taxes:** The Tenant will be responsible for payment of all applicable goods and services taxes, business taxes, and sales taxes, if applicable. The Tenant shall also be responsible to pay all realty taxes attributable to or charged against the Leased Premises (the "Property Taxes"). The Landlord will promptly provide to the Tenant copies of all tax bills and notices of assessment with respect to all Property Taxes levied, assessed or imposed against the Leased Premises and the Tenant shall, at the written direction of the Landlord, pay all such amounts directly to either (i) the relevant taxing authorities; or (ii) the Landlord as Additional Rent and subject to the Tenant making such payments, the Landlord will pay, directly to the taxing authorities, all Property Taxes levied, assessed or imposed against the Leased Premises.

The Tenant will have the right to contest or review by legal proceedings any and all taxes and assessments that were levied, assessed or imposed against the Leased Premises at its sole cost and expense. No such contest will defer or suspend the Tenant's obligation to pay such taxes.

The Tenant will also pay directly to the applicable tax authority when due all business taxes charged in respect of any business operations carried on at or from the Leased Premises. The Tenant will provide to the Landlord promptly upon request, satisfactory evidence that such taxes have been paid on or before their due date.

12. **Utilities:** The Tenant will contract directly with utility and service providers and will promptly pay, as and when due, all charges for all utilities and services supplied to or consumed in the Leased Premises and all costs for all fittings, connections and meters and all work or services performed

in connection with any utilities or services provided to or in respect of the Leased Premises and such costs will be considered to be part of the Operating Costs. Landlord will not be liable for any interruption, cessation or failure in the supply of any utilities to the Leased Premises.

13. **Insurance:** From and after the Term Commencement Date, the Tenant, will, throughout the Term, at its expense, take out and maintain the following minimum insurance(s) with insurance companies rated "A" or better by A.M. Best:
- (a) commercial general liability insurance with limits for bodily injury, personal injury, property damage, product liability and advertising liability of not less than [REDACTED] for each occurrence for liabilities arising out of operations at the Leased Premises of the Tenant or its subtenants and licensees or their respective employees, invitees, contractors or agents or others for whom the Tenant is responsible in law. This insurance shall include products/completed operations coverage, independent contractors' liability and blanket contractual liability specifically in support of, but not limited to, the indemnity provisions contained in the Lease. The policy shall not contain a general aggregate. The foregoing policy shall: (i) be endorsed to include the Landlord as an additional insured; (ii) contain cross-liability and severability of interests coverage; (iii) include employer's liability and non-owned automobile coverage; and (iv) include Tenant's legal liability insurance for the full replacement cost of the Leased Premises in the Tenant's care, custody or control including the loss of use thereof;
 - (b) all risks property insurance covering the Building and building systems against destruction or damage by fire and those additional perils covered by "all risks" insurance for a limit of not less than the full replacement cost thereof. The Landlord will be named as a loss payee on the policy as their interests may appear;
 - (c) all risks property insurance covering 'Property of Every Description' covering all property owned by the Tenant or for which the Tenant is legally liable or which has been installed by or on behalf of the Tenant including coverage for sewer back-up, flood, earthquake, consequential loss, pollution clean-up/removal and debris removal and those additional perils covered by "all risks" insurance for not less than the full replacement cost thereof. The Landlord will be named as a loss payee on the policy as their interests may appear;
 - (d) business interruption insurance in such amounts as will reimburse the Tenant for direct loss or indirect loss of earnings and continuing expenses for an indemnity period of not less than 24 months;
 - (e) comprehensive boiler and machinery (equipment breakdown) insurance with limits of insurance to follow 'Property of Every Description' insurance above and for not less than the full replacement cost thereof including extensions for consequential damage and business interruption insurance. The Landlord will be named as a loss payee on the policy as its interest may appear;
 - (f) site specific environmental pollution insurance with a limit to be approved by the Landlord, acting reasonably; and
 - (g) any other form of insurance as the Landlord reasonably requires from time to time in form, in amounts and for insurance risks against which a prudent tenant would insure similar premises.

All such insurance will be in such form, on such terms, with such deductibles and with such insurers as are satisfactory to the Landlord, acting reasonably. The Tenant's insurance policies will be primary with respect to all other available insurance and shall not call into contribution any insurance policies of the Landlord.

All of Tenant's insurance policies shall contain (i) a waiver of subrogation in favour of the Landlord, and (ii) provisions that no cancellation of the policy will become effective without not less than 30 days prior written notices to the insured. The Tenant shall provide the Landlord with 30 days prior written notice of any non-renewal or material change to any required insurance policy.

The Tenant shall deliver to the Landlord prior to the Term Commencement Date and at such other times as the Landlord may reasonably require insurance certificates, endorsements or evidence of coverage signed by authorized representatives of the companies providing coverage required under the terms of the Lease.

The Landlord shall not be liable for any death or injury arising from or out of any occurrence in, upon, at, or relating to the Leased Premises or any part thereof, nor shall the Landlord be responsible for any loss of or damage (direct, indirect, consequential or otherwise) to, or loss of use of, any property of the Tenant or others from any cause whatsoever.

14. **Net Lease:** The Landlord and the Tenant will enter into a lease agreement which shall be in the Landlord's standard form of lease (the "Lease") prior to [REDACTED] which will reflect the terms set out in this Agreement to Lease subject to any modifications as are agreed to between the Landlord and Tenant, both parties acting reasonably, and, in the event of any conflict between the terms of this Agreement to Lease and the Lease, the terms of the Lease shall prevail. The Lease will be completely net and carefree to the Landlord during the Term, and the Landlord will not be responsible for any costs, charges, expenses, outlays or obligations of any nature in respect of the Leased Premises. There shall be no right of set-off, abatement or termination in favour of the Tenant, except termination rights in the event of damage or destruction as provided in Section 22.
15. **Tenant Maintenance and Repairs:** The Tenant will from time to time and at all times throughout the Term, at its sole cost and expense, diligently and in a good and workmanlike manner, perform such maintenance, repairs and replacements as are required to keep the Leased Premises and every part thereof (including, without limitation, the building structure (including the roof and roof membrane), the building systems (including the mechanical and electrical systems and HVAC), the adjacent lands, and the building parking area) in good order, condition and repair; in such condition as would a prudent owner of similar premises; and as necessary to satisfy the required Handback Condition.
16. **Agreed Capital Expenditures:** The Tenant shall be responsible, throughout the Term at its sole cost and expense, for all capital expenditures required in connection with the Leased Premises and in satisfaction of the Tenant's obligations contained in the Lease. For greater certainty, the obligation of the Tenant to make capital expenditures shall not be limited to any amounts available in the Existing Facility Fund or expended as part of the Renovation Work. However, during the last five (5) years of the Term, the Landlord may be willing to pursue a collaborative approach involving joint approvals with respect to capital investments, such as interior fit out and mechanical and electrical systems, with an agreed expected life of greater than five (5) years.
17. **Signage:** Provided that:
 - (a) the Lease has been executed and delivered by Tenant;
 - (b) Tenant is not in default under the Lease;
 - (c) the Lease has not previously been terminated; and
 - (d) the Tenant has obtained all relevant municipal approvals,

then Tenant will have the right to place its signage on the Existing Hospital Building, subject to the approval of the Landlord, acting reasonably. Such signage will be installed and maintained by the Tenant consistent with a first class building and in compliance and accordance with the requirements of all applicable laws and codes. Such signage will be removed by Tenant at the expiry or earlier termination of the Term, and the Tenant shall repair all damage caused to the Existing Hospital Building as a result of such removal. Such signage shall be subject to the Tenant obtaining at Tenant's sole cost, the prior approval of and all necessary permits from any governmental authority having jurisdiction. All costs associated with Tenant's signage, including installation, maintenance, removal and repair of any damage caused by such removal, shall be the Tenant's responsibility.

18. **Use:** The Tenant may use, and may sublease the use of, the Leased Premises for any lawful purpose that is consistent with the adjacent Stanton Hospital health care campus activities or such other uses as may be approved in writing by the Landlord, acting reasonably, from time to time. Below, the Landlord has provided non-exhaustive lists of uses that it would consider to be inconsistent or consistent with the adjacent Stanton Hospital health care campus activities:

(a) Inconsistent

- casino / gambling activities
- firearms or other weapon sales
- tobacco sales
- liquor stores
- "adult entertainment" establishments

(b) Consistent

- medical, dental and other health professional offices (i.e. massage therapy, optometry and vision care, hearing care, blood testing labs, ultrasound labs, etc.)
- general office or other professional or business offices (i.e. law, accounting, real estate, corporate offices, etc.)
- restaurants and food services (restaurants serving liquor are acceptable)
- retail storefronts (without tobacco or liquor sales)
- hair salons and esthetic services
- gyms or sports facilities
- education facilities
- child care facilities
- art galleries and cultural facilities
- pharmacy and/or medical device sales
- visiting doctors, residents and hospital staff accommodation
- residential housing (including student housing and/or subsidized housing)
- long term care and/or assisted living
- nursing homes and/or hospices
- hotel and/or patient visitor accommodation
- dry cleaning (provided that no dry cleaning of clothing occurs on the Leased Premises)

19. **Transfer:** No transfer or assignment affecting the Tenant, this Agreement to Lease, the Lease, the Leased Premises or the business of the Tenant at the Leased Premises will be permitted without the prior written consent of the Landlord, which consent may be withheld in the sole and absolute discretion of the Landlord. For the purposes of this Agreement to Lease and the Lease, any change of corporate control of the Tenant shall be deemed to be an assignment.

Notwithstanding the foregoing, the Tenant may, without the prior written consent but upon not less than 14 days' prior written notice to the Landlord, which notice shall, with respect to subparagraph (a) below, specify the proposed use and identity of subtenant:

- (a) sublet the whole or any part of the Leased Premises, provided that the relevant subtenants' proposed uses are consistent with Section 18 and the proposed term of any sublease does not extend beyond the Term of the Lease; or
- (b) from and after the date on which in excess of twenty-five percent (25%) of the leasable area of the Leased Premises has been subleased to subtenants, mortgage, charge or encumber the Leased Premises, to a maximum of the Tenant's Invested Capital, such amount excluding any portion of the Security invested into the Leased Premises.

20. **Right of First Offer to Sublease:** The Government of the Northwest Territories and its public agencies (collectively, the "GNWT Subtenant") shall have the right of first offer (the "Right of First Offer") to sublease, during the Term, any space available in the Building that may become available for sublease (the "Available Premises"). The Tenant shall deliver a written notice describing the Available Premises and the date such space will be available for sublease (the "GNWT Sublease Notice"). The GNWT Subtenant shall then have thirty (30) days from its receipt of the GNWT Sublease Notice to advise the Tenant in writing whether or not it elects to sublease the Available Premises. If the GNWT Subtenant elects to not sublease the Available Premises or if it fails to elect to sublease the Available Premises within such thirty (30) day period, then the Tenant may thereafter sublease or otherwise retain or use the Available Premises free of any right of the GNWT Subtenant to sublease the Available Premises. Available Premises which are not subleased or occupied by the Tenant within twelve (12) months from the expiry of the thirty (30) day period will be deemed available for sublease after such twelve (12) month period. The right of the GNWT Subtenant under this section may be re-exercised from time to time during the Term for any Available Premises as the conditions in this section are satisfied regardless of whether the GNWT Subtenant has previously declined or failed to elect to sublease Available Premises.
21. **Marketing:** The Tenant shall use its best commercial efforts to market the Leased Premises to prospective subtenants. The Tenant shall keep the Landlord fully apprised as to the status of its efforts to market and sublet the Leased Premises, including, but not limited to, providing the Landlord with full copies of all offers to sublease, letters of intent, subleases and any other documentation prepared in anticipation of subleasing space within the Leased Premises and shall deliver to the Landlord a quarterly management report substantially in the form set out in Schedule "D" attached hereto.
22. **Damage and Destruction:** Unless otherwise agreed by the Landlord or as provided below, if all or any part of the Leased Premises is damaged or destroyed the Tenant will, with reasonable diligence and without unnecessary delay, restore and/or repair the damage or destruction so that the Leased Premises and the Tenant's leasehold improvements are substantially restored to their former state and condition as existed immediately prior to such damage or destruction.
- If, in the last five (5) years of the Term, there is any damage or destruction that would cost in excess of ██████████ of the replacement cost of the Leased Premises to repair or restore, then either party may terminate the Lease by giving notice to the other party within 30 days of receiving an architect's certificate as to the extent of such damage and destruction. On termination of the Lease, the Landlord shall be entitled to the proceeds of insurance in respect of any damage or destruction relating to the Leased Premises under all policies of insurance required to be maintained by the Tenant under the Lease.
23. **Events of Default:** Events of Default on the part of the Tenant will include:

- (a) obstruction of ingress to or egress from the adjacent Stanton Hospital health care campus by the Tenant or its subtenants and licensees or their respective employees, invitees, contractors or agents or others for whom the Tenant is responsible in law; or
- (b) the Tenant is in default with respect to Rent or other amounts payable to the Landlord (including, but not limited to, the Tenant Security and the Tenant Works Security) and the Tenant fails to remedy such default within five (5) business days after notice from the Landlord; or
- (c) the Tenant is in default (other than in respect of the payment of Rent or other amounts) and fails to remedy such default within 30 days after notice in writing from Landlord (unless such default cannot be remedied within such 30-day period, in which case the Tenant will not be in default if it commences to remedy the default within such 30-day period and thereafter is diligently taking actions to remedy such default); or
- (d) the Tenant or the Indemnifier files a proposal for the benefit of its creditors, is declared bankrupt or makes a voluntary assignment for the benefit of its creditors; or
- (e) a petition is filed against the Tenant or the Indemnifier to declare it bankrupt, which is not cancelled or annulled within 60 days (unless the Tenant or the Indemnifier has commenced and is diligently seeking to set aside the same); or
- (f) a trustee, receiver or like person is appointed with respect to a material portion of the business or assets of the Tenant or the Indemnifier, whether in bankruptcy or otherwise, and such appointment is not cancelled or annulled within 60 days (unless the Tenant or the Indemnifier has commenced and is diligently seeking to set aside such appointment); or
- (g) the Term hereby granted is at any time seized or taken in execution or in attachment by any creditor of the Tenant and not released within 45 days (unless the Tenant has commenced and is diligently pursuing the discharge of such execution); or
- (h) the Tenant makes a bulk sale of substantially all of its goods out of the ordinary course of business (save and except for a sale of substantially all of the assets of the Tenant in connection with any assignment or subletting as contemplated herein); or
- (i) the Tenant assigns or sublets the Lease or the Leased Premises or mortgages, charges or encumbers its interest in the Lease other than in accordance with the provisions of the Lease; or
- (j) the Tenant abandons or attempts to abandon the Leased Premises; or
- (k) the Tenant uses, or permits the use of, the Leased Premises in a way which is inconsistent with the adjacent Stanton Hospital health care campus activities; or
- (l) the Tenant's insurance policy is cancelled; or
- (m) the indemnity agreement is terminated for any reason whatsoever, whether by the Indemnifier or by any other person or by effect of law, or alternatively, if the obligations of the Indemnifier under the indemnity agreement are reduced, modified or otherwise limited except by way of an agreement made in writing with the Landlord.

Events of Default on the part of the Landlord will include:

- (a) breach of the covenant of quiet enjoyment; or

(b) failure to make any payments owing to the Tenant in accordance with the terms of the Lease.

24. **Termination:** Subject to the last paragraph of Section 5 and Section 21, upon termination the Tenant shall forthwith deliver the Leased Premises in accordance with the Handback Condition.

On termination or expiry of the Lease, the Leased Premises shall be unencumbered by any encumbrance which is the responsibility of the Tenant. Notwithstanding the foregoing, the Landlord agrees to provide the Tenant with a reasonable period of time following the termination or expiry of the Lease to obtain and register any agreements or documentation required to discharge any Tenant's mortgage.

25. **Restoration:** Subject to the last paragraph of Section 24, upon the expiry or earlier termination of the Lease, the Tenant shall (i) ensure that the Leased Premises are free from all encumbrances, save and except for certain permitted encumbrances which shall be defined in the Lease, and (ii) deliver vacant possession of the Leased Premises to the Landlord, which shall be in a structurally sound and weathertight exterior and a dry and minimally heated interior (the "Handback Condition").

26. **Environmental:** The Tenant will provide customary covenants with respect to compliance with applicable environmental laws and an indemnity in favour of the Landlord in respect of all costs and expenses suffered or incurred by the Landlord in the event that, after the Term Commencement Date, the Tenant breaches any such covenants or causes environmental contamination of the Leased Premises that the Tenant is responsible to remediate and/or manage pursuant to the following terms.

The Landlord may, from time to time, request that the Tenant commission a Phase I report and, if recommended by the Phase I report, a Phase II report in respect of the Leased Premises if the Landlord, acting reasonably, has a cause to be concerned that the Tenant may have caused environmental contamination on or about the Leased Premises from and after the Term Commencement Date. If environmental contamination is found that must immediately be remediated and/or otherwise managed to comply with environmental laws and that was caused by the Tenant or its subtenants, employees, agents, contractors or others for whom it is responsible at law as a result of the use or occupancy of the Leased Premises from and after the Term Commencement Date, the Tenant will, at its sole cost and expense, remediate and/or otherwise manage any such contamination to ensure compliance with all applicable environmental laws and the Tenant will pay for the Phase I report and Phase II report (if any). At the expiry or earlier termination of the Term, the Tenant shall remediate such contamination to a concentration that the Landlord's environmental consultant opines in a written report is not expected to result in any adverse effect to humans or the environment at the Leased Premises or elsewhere.

The Landlord acknowledges and agrees that it shall be responsible for any pre-existing environmental contamination which may exist in, on or under the Leased Premises (including the lands forming a part thereof) prior to the Term Commencement Date and that the Tenant shall not be responsible for any environmental contamination identified in the Stantec Environmental Report dated September 18, 2014.

27. **Financial Information:** Tenant shall, within five (5) business days after request from Landlord, provide to Landlord such information as to Tenant's and Indemnifier's financial standing and corporate organization as Landlord requires, including but not limited to, delivery of the Tenant's financial statements and information in respect of the Indemnifier as set out in Section 30.

28. **Lease Form:** The Landlord shall deliver the draft Lease to the Tenant within thirty (30) days of the date hereof. Each of the parties shall negotiate in good faith to settle the terms of the Lease prior to [REDACTED]. In no event will Tenant be permitted to occupy the Leased Premises

until the Lease is executed and delivered to the Landlord, the Tenant has delivered a copy of the Tenant's certificate of insurance evidencing requisite insurance coverage(s) in accordance with the Lease and the Term Commencement Date has occurred. In the event the parties are unable to agree upon the form of the Lease by [REDACTED] the issues in dispute will be determined by Arbitration in accordance with this Agreement to Lease.

29. **Arbitration:** Any dispute relating to the Lease, or the performance, breach, termination or validity thereof, will be finally settled by arbitration. The arbitration will be conducted by a single arbitrator having no financial or personal interest in the business affairs of either of the parties who will be appointed jointly by agreement of the parties, failing which the arbitrator will be appointed, on application by either party, by a judge of the Northwest Territories. The arbitration will take place in the Northwest Territories, and will be conducted in English in accordance with the procedures to be set forth in the Lease. Absent agreement or an award in the arbitration to the contrary, the arbitration fees and expenses will be paid by the parties jointly.
30. **Indemnity:** The Tenant shall cause the Indemnifier to provide an indemnity agreement, with regard to the issues set out below in favour of the Landlord in respect of the payment and performance by the Tenant of all of its obligations contained in the Lease, including, but not limited to, the payment of all costs and expenses suffered or incurred by the Landlord in event of:
- (a) nonpayment by the Tenant of amounts owed to the Landlord;
 - (b) the Tenant causing environmental contamination of the Leased Premises or adjacent lands;
 - (c) the Tenant failing to achieve the required Handback Condition; and/or
 - (d) third party claims with respect to the Leased Premises (including carriage of any such action).

The form of the indemnity agreement shall be finalized by the Landlord and Tenant prior to the signing of the Lease and shall reflect the terms set out above subject to further amendments agreed upon by the Landlord and the Tenant, both parties acting reasonably.

The Indemnifier shall deliver evidence of its ability to indemnify the Landlord (as required under the terms of this Agreement to Lease), including, but not limited to, a letter from a qualified accountant providing the balance of net assets, the value of cash and liquid marketable securities on hand, the amount of net working capital, as well as the calculated Current Ratio and the Interest Cover Ratio.

The indemnity agreement shall be executed and delivered to the Landlord concurrently with the Lease.

31. **No Registration:** No notice of this Agreement to Lease shall be registered against title to the Leased Premises. The Tenant shall be entitled to register notice of the Lease against title to the Leased Premises, subject to the prior written approval of the Landlord with respect to the form of such notice, such approval not to be unreasonably withheld.
32. **Signatures:** This Agreement to Lease may be transmitted by facsimile and/or by email (PDF) and the reproduction of signatures by way of facsimile device and/or by email (PDF) will be treated as though such reproductions were executed originals and communication by such means will be legal and binding.

33. **GST:** Tenant will pay to the Landlord with each payment of Rent or Additional Rent, all applicable GST. Unless otherwise noted, amounts quoted in this Agreement to Lease do not include GST.
34. **Notices:** Any notice to be given will be in writing and shall be delivered, transmitted by facsimile device and/or by email (PDF), to the addresses shown herein.
35. **Confidentiality:** The Tenant shall not disclose this Agreement to Lease or the Lease or the terms of either such document, except to any of its professional advisors, consultants and auditors, which such disclosure is reasonably required and such advisor, consultant or auditor has agreed to honour such confidentiality, and except as required by law.
36. **Binding Agreement:** THE PARTIES HEREBY ACKNOWLEDGE AND AGREE THAT THIS AGREEMENT TO LEASE CONSTITUTES AN IRREVOCABLE, VALID AND BINDING AGREEMENT BETWEEN LANDLORD, TENANT AND INDEMNIFIER, ENFORCEABLE IN ACCORDANCE WITH ITS TERMS..

[Remainder of page deliberately blank]

IN WITNESS WHEREOF the parties have executed this Agreement to Lease as of the date first written above.

SCHEDULE "A"
PLAN

See Attached.

SCHEDULE "B"
INITIAL REMEDIATION WORK

1. General

1.1 Site Preparation – Demolition

(a) Basic Requirements

(1) Project Co is responsible for the demolition of the following:

(A) all demolition that is necessary, above ground (elements such as, but not limited to, buildings, structures, roads, curbs, parking areas, walkways and landscaping) and sub-surface (elements such as, but not limited to, foundations, slabs, pits, sumps, pipes, cables, ducts and underground tanks including related piping) , for the construction of the Facility.

(2) Project Co acknowledges and agrees:

(A) it has received and reviewed a copy of the following reports including all appendices:

(i) *Environmental Site Assessment (ESA) Phase 1 – as defined in Schedule 2 – Design and Construction Protocols*

(ii) *Hazardous Materials Report – as defined in Schedule 2 – Design and Construction Protocols*

(B) it is responsible for all management, removal, abatement, containment and disposal of Hazardous Substances disclosed in or reasonably inferred from the reports listed in Section 1.1(a)(2)(A) above, with the exception of the underground oils tanks which have already been remediated by the Authority; and

(C) the Authority is not in any way responsible or liable for the completeness, interpretation or accuracy of reports listed in Section 1.1(a)(2)(A) above.

(3) Without limiting the responsibility of Project Co above, Project Co will:

(A) take all precautions so that no transmission of Hazardous Substances and noxious fumes interfere or contaminate the surrounding community;

(B) be responsible for management, removal, abatement, containment and disposal of any underground storage tanks and any underground piping and appurtenances, including any that may themselves constitute Hazardous Substances which were disclosed in or reasonably inferable from the Disclosed Data; and

(C) complete the management, removal, abatement, containment and disposal of all Hazardous Substances, which were disclosed in or reasonably inferable from the Disclosed Data, prior to demolition.

(4) For buildings to be demolished, Project Co is responsible for all building systems

terminations and cap offs prior to demolition. The Authority will have separated the unburied mechanical and electrical systems connecting buildings to be demolished, except for Life Safety systems and underground systems.

- (5) Project Co will perform all design and construction work:
 - (A) that is triggered by the demolition work required in this Schedule; and
 - (B) including, but not be limited to: code related upgrades, fire egress upgrades, structural upgrades and the temporary or permanent redirection of services.
- (6) All new design and construction required by this Schedule will meet the requirements of Schedule 3 [Design and Construction Specifications] of the Project Agreement.

(b) Performance Requirements

- (1) Project Co will:
 - (A) prior to performing demolition work, submit a report on the protective measures in place for existing buildings to the Authority;
 - (B) conform to applicable codes for demolition of structures and provide for the safety of adjacent structures, the erection and maintenance of temporary barriers and security devices;
 - (C) obtain City of Yellowknife and other authority approvals required to undertake a demolition;
 - (D) ensure demolition work does not interfere with, or prevent the site and adjacent buildings from operating normally;
 - (E) provide perimeter screen and safety walls to ensure safety and protection of people and objects outside of the demolition area;
 - (F) provide overhead protection from falling debris;
 - (G) carry out demolition activities so as not to interfere with access to existing buildings;
 - (H) schedule hours of operation and plan the traffic flow required for demolition in accordance with the Phasing Plan, the Work Plan and the Demolition Plan referred to in Schedule 2 [Design and Construction Protocols] of the Project Agreement;
 - (I) be responsible for ensuring that fire safety will be in force at all times during demolition;
 - (J) implement a pest control management plan for related areas before, during and post demolition;
 - (K) perform all work to CAN/CSA-Z317.13 Infection Control During Construction, Renovation, and Maintenance of Health Care Facilities;

- (L) provide dust control at all times:
 - (i) *spray demolition area with water once demolition of structure begins;*
 - (ii) *manage water runoff through the site; and*
 - (iii) *protect all storm drains that could be affected by the demolition work;*
- (M) perform work in accordance with Schedule 2 [Design and Construction Protocols] Control of Noise of the Project Agreement;
- (N) secure demolition site 24/7; obtain Authority's approval of methods to secure site prior to commencing work;
- (O) conform to applicable regulatory procedures, including the *Safety Act* (Northwest Territories) and all applicable occupational health and safety requirements and codes of practice in the Northwest Territories requirements, during all phases of the demolition and when discovering hazardous or contaminated materials;
- (P) ensure the walls separating the construction from remaining structures will be designed so that the demolition and construction will not interfere with the normal operation of the Hospital;
- (Q) remove of all demolition materials from the site safely and legally;
- (R) terminate existing surfaces of building elements to be demolished along straight lines at natural divisions determined through consultation with by the Authority. Cut existing surfaces so that a smooth transition with new work will result;
- (S) refer to Schedule 2 [Design and Construction Protocols] 6.12 of the Project Agreement for salvage material and equipment title;
- (T) make provisions to ensure that affected areas of the remaining building are weather-proofed during and after demolition and for the duration of construction of the Building;
- (U) construct a temporary insulated and weatherproof wall to protect all previously interior areas exposed to the exterior during the demolition and construction process;
- (V) Project Co's design will identify where the new construction and adjacent buildings are intended to be joined as interior space and be responsible for providing permanent exterior walls at all locations that are no longer interior walls. These required exterior walls in existing buildings shall meet all the requirements of Schedule 3 [Design and Construction Specifications] of the Project Agreement and complement the design of the existing adjacent building facades;

- (W) be responsible for patching, repairing and “making good” all exterior and interior surfaces affected in all existing buildings in which work is taking place, to match the quality of the adjacent surfaces. “Making Good” shall be defined as preparing new surfaces which are identical to adjacent surfaces, and finished off in such a manner that there are absolutely no visible traces (at a distance of 600 mm), between existing work and the work of new patching. “Making good” therefore, extends to the complete re-finishing of entire surface areas as is necessary, to junction points or inside or outside corners of walls, partitions and ceiling; and
- (X) accurately record actual locations of capped utilities, subsurface obstructions and/or conditions.

1.2 Civil Requirements

- (a) General
 - (1) Project Co will inspect and examine the Site with the Authority and verify the extent and location of items designated for demolition.
- (b) Basic Requirements
 - (1) Project Co will confirm the extent of the demolition and ensure there is no disturbance to the operations of the existing adjacent buildings and areas.
 - (2) All materials are to be stockpiled and removed for disposal offsite in a location acceptable to the Authority.
 - (3) Demolition to comply with CSA S350: Code of Practice for Safety in Demolition of Structures.
 - (4) Demolition to comply with the latest edition of the City of Yellowknife By-Laws.
- (c) Performance Requirements
 - (1) Project Co will undertake demolition in accordance with the following performance requirements:
 - (A) Locate any active services located on the site that serve other properties and take steps as required to prevent any disruption to such servicing
 - (B) Re-location of services that are connected to other buildings will include installation of replacement services at such a time, and any other steps required including installation of temporary alternate services, so that the services to other buildings are not disrupted.
 - (2) Disconnect, cap, plug or divert as required existing services.
 - (A) Sewer and Water Lines: Remove in locations as required, in accordance with the requirements of the Authority or City of Yellowknife and securely plug to form watertight seal.
 - (B) Other Underground Services: Remove and dispose of as required.
 - (3) Locate and protect utilities. Preserve active utilities traversing the site in operating conditions.

- (4) Notify, coordinate and obtain approval from utility companies before starting demolition.
- (5) Do not pump water containing suspended materials into watercourses, storm or sanitary sewers or onto adjacent properties
- (6) Removal of Pavements, Curbs and Gutters will include but is not limited to the following:
 - (A) Square up adjacent surfaces to remain in place by saw cutting or other method approved by the Authority.
 - (B) Protect adjacent joints and load transfer devices
 - (C) Protect underlying and adjacent granular materials.
- (7) Prevent movement, settlement, or damage to adjacent structures, utilities and landscaping features and parts of building to remain in place. Provide bracing and shoring as required.

1.3 Structural Requirements

- (a) Prior to demolition Project Co will:
 - (1) Ensure that all remaining structures are sufficiently shored and protected against structural damage from demolition activities.
 - (2) Provide necessary shoring and temporary structures in accordance with the requirements of the City of Yellowknife Building By-Law 4469, the *Safety Act* (Northwest Territories) and all applicable occupational health and safety requirements and codes of practice in the Northwest Territories.
 - (3) Provide underpinning of existing structures as required for both temporary excavations and permanent construction. If underpinning is to remain in the final structures, design and construction will provide for long term durability.
- (b) During demolition Project Co will:
 - (1) Maintain all shoring and protective measures in structurally sound condition until demolition activities are complete.
- (c) Reinstatement of Existing buildings
 - (1) Where structural elements of the existing building are to be demolished to accommodate construction of the Facility, Project Co will rebuild exit stairs and structural elements as required for the remaining building to conform with the City of Yellowknife Building By-Law 4469 requirements, and all applicable codes and standards.
 - (2) Structural elements will include but not be limited to foundations, retaining walls, stair structures, vertical load carrying elements and lateral load resisting elements (including seismic loads).

1.4 Mechanical Requirements – Not Used.

1.5 Electrical Requirements – Not Used.

SCHEDULE "C"

RENOVATION WORK PRINCIPLES

The principles for the Renovation Work to be completed by the Tenant to the Leased Premises include:

Completion of all renovation work necessary to bring the Leased Premises to the standard reasonably required for space leasable to subtenants, including but not limited to:

- The softening of the exterior appearance taking it from an institutional look to a warm and friendly commercial/residential type feel. This will include landscaping to soften the feel of the exterior approach to the Leased Premises and make it more inviting for the customer/client.
- A new roof will be needed.
- Demolition of current tenant improvements.
- Conversion of the heating plant from an industrial steam to commercial hot water heating plant will take place.
- Upgrades to the electrical and life safety systems as necessary.
- New ceilings complete with lighting, sprinklers, and roughed-in ventilation all to make tenant ready.
- Exterior devising walls primed and ready to receive finishes.
- Concrete floor ready to, receive floor product.

Completion of all work required to ensure the Leased Premises has sufficient parking to conform to municipal requirements.

Completion of all necessary additional work is carried out to ensure that the Leased Premises has a minimum of five (5) years of residual life from the commencement of the Lease.

Sources of Funds for the Renovation Work:

Description:	Value	Timing
Tenant Security		
Project Co Initial Security		
Project Co Works Security		
Tenant Works Security		
Additional Tenant Invested Capital		
Total Sources of Funds		

Estimated Budget and Description of renovations required to achieve the Initial Remediation Work and Renovation Works Principles

Section	Description	Total Cost	
Building:			
	1250 Clean efflorescence off masonry		
	2220 Interior Demo & Remediation		
	4000 Repointing minor areas of masonry		
	5500 Roof top unit supports		
	5500 Re&Re stairwell handrails		
	6100 Rough Carpentry		
	7410 Cladding changes to soften exterior		
	7500 Re roofing		
	7840 Firestopping existing misc openings		
	7900 Re&Re sealants at brick, cladding, windows		
	9000 Ceiling and finishes		
	14000 Refurbish elevator cabs		
	15000 Mechanical		
	16000 Electrical		
Exterior:			
	2200 Additional parking stalls @1 per 1,000 sq ft		
	2800 Curbs		
	5500 Railings		
Shelled Space	Total		
	Tenant Improvements @ \$100/sf		
	Additional Parking to 1/400 sf

SCHEDULE "D"
FORM OF MANAGEMENT REPORT

See attached.

SCHEDULE "E"

OPERATING COSTS

"Operating Costs" shall mean all amounts, charges, costs and expenses payable or incurred with respect to the operation, supervision, insurance and management of the Leased Premises by the Tenant, including:

- (1) the cost of the purchase or rental of machinery, equipment, tools, supplies and materials used on-site in connection with the operation, supervision and management of the Leased Premises, , provided that if the costs of the purchase of machinery, equipment, tools, supplies and materials exceed [REDACTED] for any individual item then such cost shall be amortized over the lesser of (a) the remaining Term of the Lease or (b) five (5) years;
- (2) wages, salaries and benefits of on-site personnel (including on-site management personnel) employed full-time at the Leased Premises, if any;
- (3) amounts payable to independent contractors, (including any property management company but excluding the Tenant's auditors, accountants, legal professionals, tax consultants), for any on site services provided in connection with the operation, maintenance, supervision and management of the Leased Premises;
- (4) the cost of all insurance which the Tenant is obligated or permitted to obtain under the Lease and any deductibles payable by the Tenant thereunder; and
- (5) costs incurred by the Tenant in subleasing the Leased Premises, including commissions, advertising costs and tenant inducement payments.

The following will be excluded or deducted from Operating Costs as the case may be:

- (6) net recoveries by the Tenant from subtenants of the Leased Premises in respect of costs which have been charged as Operating Costs;
- (7) net insurance proceeds received by Tenant to the extent that the proceeds reimburse the Tenant for costs of repair and replacement which have been charged as Operating Costs;
- (8) net recoveries received by Tenant under any warranties relating to the repair or replacement of any portion of the Leased Premises or part thereof;
- (9) Tenant's income taxes, business taxes, capital taxes, large corporation taxes and any other taxes personal to the Tenant;
- (10) any fines, penalties, interest or late payment charges incurred by the Tenant as a result of the Tenant's late payment of Property Taxes or other bills relating to the Leased Premises;
- (11) interest, fees and other debt service costs and capital retirement of any financing of the Leased Premises.

SCHEDULE 19

(NOT USED)

SCHEDULE 20

HANDBACK REQUIREMENTS

1. INTERPRETATION

1.1 Definitions

In this Schedule, in addition to the definitions set out in Schedule 1 to this Agreement:

“**Handback Works Costs**” has the meaning given in Section 2.5 (d) of this Schedule;

“**Handback Amount**” means Project Co’s estimate of the cost of carrying out the Handback Works Plan;

“**Handback Certificate**” has the meaning given in Section 4.2(a) of this Schedule:

“**Handback Holdback**” has the meaning given in Section 3.1(a) of this Schedule;

“**Handback Requirements**” means the requirements for the condition of the Facility on the Expiry Date described in Section 2.1 of this Schedule;

“**Handback Survey**” has the meaning given in Section 2.5 of this Schedule;

“**Handback Works**” has the meaning given in Section 2.7(a) of this Schedule;

“**Handback Works Plan**” has the meaning given in Section 2.7(b) of this Schedule;

“**Independent Inspector**” has the meaning given in Section 2.4 of this Schedule;

“**New Service Provider**” means:

- (a) New Project Co, in the case of termination of this Agreement prior to the expiry of the Term; or
- (a) a Person that has entered into or that will enter into an agreement with the Authority for provision of the Services at the expiry of the Term.

“**Post Handback Life Cycle Plan**” has the meaning given in Section 2.6 of this Schedule.

2. FACILITY HANDBACK

2.1 Facility Condition

On the Expiry Date, the Facility and each element comprising the Facility will be in a condition which is:

- (a) consistent with the Facility and each of the elements of the Facility having been designed and constructed in accordance with the applicable design life requirements set out in Schedule 2 Design and Construction Protocols and Schedule 3 Design and Construction Specifications of this Agreement; and

- (b) consistent with Project Co having performed the Services and maintained the Facility in accordance with Schedule 4 Services Protocols and Specifications;
- (c) For greater certainty, this Schedule shall not apply to any Equipment to be maintained by the Authority in accordance with this Project Agreement.

(collectively, the “**Handback Requirements**”).

2.2 Handback and Life Expectancy

Project Co shall allow for structural elements of the Facility to have a minimum residual life expectancy of 30 years at the Expiry Date. Non-structural elements of the Facility shall be in a condition which is consistent with good maintenance practice, and at the end of the Term shall have a minimum residual life expectancy of 5 years, unless specifically set out within Table 1 below.

Materials and components forming part of the Facility, which require maintenance and replacement within the Term, shall be selected, located and fixed to the fullest extent possible to minimise future inconvenience, disruptions and to avoid temporary closure of the Facility.

Table 1 Minimum Residual Life at Handback

Item	Residual Life at Handback
Primary elements	
Internal walls – load bearing	30 years
Roof structure	30 years
Drainage and below ground civil engineering infrastructure	30 years
Floor Structure	30 years
External openings, doors and sealed glazed windows	5 years
Rainwater gutters and down pipes	5 years
External elements	
Walls, (excluding painted finishes to windows and doors)	5 years
External painted finishes	5 years
Wall cladding and membranes	10 years
Roof claddings and membranes	10 years
Flat roof coverings	5 years
External hard landscaping elements	5 years
Internal elements	
Internal partitions – plasterboard and stud	10 years
Doors and internal timber work	5 years
Sanitary appliances	5 years
Communal kitchen appliances	5 years
Internal finishes (excluding paintwork)	2 years
Internal painted finishes	5 years
Floor finishes and skirting	5 years
Engineering elements	
Engineering plant	5 years
• Thermostats for heating	5 years

Item	Residual Life at Handback
• Access control equipment	5 years
• CCTV equipment	5 years
• Intruder alarm equipment	5 years
• Fire alarm equipment	5 years
• Bollard lighting (external)	5 years
• Laundry equipment	5 years
• Fire suppression system	5 years
• Communication system	5 years
• Electrical system	5 years
• Elevators and other conveying systems	5 years
• BMS	5 years
• Solar thermal / photovoltaic panels	5 years
• Air source heat pumps	5 years
Engineering services distribution systems	5 years

2.3 Durability and Maintainability

All elements of the structure of the Facility and Site shall withstand deterioration due to weather, ground conditions and accidental damage relevant to their location and environment.

Where there is a requirement for maintenance during the required life span of the elements, practical and realistic arrangements shall be designed into the construction of the Facility and selection of the materials, to allow for any repairs, replacements, and painting to be carried out:

- (a) safely;
- (b) without compromising the operational activities within and around the Site;
- (c) with minimal disruption for Facility Users; and
- (d) without requiring temporary decants or closures.

2.4 Independent Inspector

Not less than six (6) years prior to the Expiry Date, Project Co and the Authority shall agree upon and, in accordance with the Authority's procurement policies, engage an independent and suitability qualified person (the "**Independent Inspector**") to carry out the Handback Survey of the Facility pursuant to this Schedule.

- (a) Project Co and the Authority shall share equally the responsibility for the payment of all fees and costs of the Independent Inspector;
- (b) In the event of the Independent Inspector's engagement being terminated otherwise than for full performance, Project Co and the Authority shall liaise and cooperate with each other in order to appoint a replacement as soon as reasonably practicable, and in any

event within 20 Business Days of the termination of the last Independent Inspector's engagement.

- (c) In the event Project Co and the Authority fail to agree upon the identity of the Independent Inspector either pursuant to 2.4 (a) or 2.4 (b) of this Schedule by the specified deadline, then the Independent Inspector shall be selected as follows:
- (1) each party shall within 10 Business Days thereafter select three independent and suitably qualified and experienced persons that would be acceptable to that party as the Independent Inspector, and shall provide notice thereof to the other party; and
 - (2) if the parties have both selected a common person, then such common person shall be the Independent Inspector; or
 - (3) if the parties have not selected a common person, then the Independent Inspector shall be selected in accordance with the Dispute Resolution Procedure.

2.5 Handback Survey

In conjunction with the preparation of the Annual Service Plan for the year commencing not less than 3 years prior to the Expiry Date, Project Co and the Authority will conduct a joint inspection and survey of the Facility (the "**Handback Survey**"). The content of the Handback Survey shall include the following:

- (a) identifies the condition of the Facility and each element of the Facility in relation to the Handback Requirements;
- (b) assesses Project Co's Lifecycle Plan related to capital replacement (which, for greater certainty, will include consideration of energy consumption), and provides the Independent Inspector's opinion on both the adequacy of Project Co's proposed strategy and the consistency of Project Co's proposed strategy with the Lifecycle Plan methodology and Lifecycle Schedule set out in Appendix 4N of Schedule 4 hereto;
- (c) identifies any works required to ensure the Facility and each element of the Facility will meet the Handback Requirements on the Expiry Date (the "**Handback Works**"), and specifying the Contract Year in which each of those Handback Works would be required;
- (d) specifies the Independent Inspector's estimate of the costs that would be required to perform the Handback Works (the "**Handback Works Costs**"); and
- (e) details of how the Handback Works Costs were calculated.

2.6 Post Handback Lifecycle Plan

No later than five (5) years prior to the Expiry Date, Project Co shall develop, in conjunction with the Five Year Maintenance Plan, an asset life cycle and rehabilitation plan (the "Post Handback Life Cycle Plan") for all maintained elements based on the Life Cycle Report and good industry practice on a look forward basis for ten (10) years following the Expiry Date. The Post Handback Life Cycle Plan shall include specific refurbishment and replacement strategies, key assumptions and projected annual cost provisions

for all aspects of the Facility for which Project Co was responsible for during the Operating Period, categorized by major elements.

The Post Handback Lifecycle Plan will be used by the Authority for planning and budgetary purposes.

2.7 Results of Survey

If the Handback Survey indicates that any element of the Facility will not be in a condition consistent with the Handback Requirements upon Project Co implementing the Plans over the remainder of the Term, within 60 Business Days of completion of the Handback Survey, Project Co will deliver to the Authority's Operating Period Representative in accordance with Sections 4.7 and 4.8 of Schedule 4:

- (a) Project Co's proposal as to the maintenance and other works (if any) (the "**Handback Works**") required to be carried out in respect of the Facility to satisfy the Handback Requirements as at the Expiry Date;
- (b) Project Co's proposal for the carrying out of the Handback Works (the "**Handback Works Plan**") over the remainder of the Term as part of the Annual Service Plan, Life Cycle Plan and the Five Year Maintenance Plan then in effect and describing the total works to be carried out as well as the method and schedule for carrying out such works; and
- (c) Project Co's calculation of the Handback Amount.

The Authority's Operating Period Representative may, within 20 Business Days after receipt of the Handback Works and Handback Works Plan, review and comment on such plan in accordance with Section 4.8 of Schedule 4 Services Protocols and Specifications.

3. HOLDBACK

3.1 Handback Holdback

By agreement between Project Co and the Authority, or determination in accordance with the Dispute Resolution Procedure, of the Handback Works, the Handback Works Plan and the Handback Amount, Project Co will:

- (a) within 10 Business Days of the agreement, or determination in accordance with the Dispute Resolution Procedure, deliver to the Authority a performance bond or letter of credit:
 - (1) issued by a financial institution listed on Schedule 1 of the *Bank Act* or a surety company authorized to carry out business in the Northwest Territories;
 - (2) securing performance by Project Co of the Handback Works; and
 - (3) having a term which expires no sooner than two years after the Expiry Date,
 or other cash collateral acceptable to the Authority, acting reasonably, in an amount equal to the Handback Amount (the "**Handback Holdback**"); and

- (b) at its own cost and expense, carry out the Handback Works in accordance with the Handback Works Plan and Good Industry Practice, notwithstanding that the actual cost of the Handback Works may be higher than the Handback Amount.

3.2 Handback Reserve

If the Authority does not receive the Handback Holdback pursuant to Section 3.1 and/or a compliant and approved Handback Works Plan is not in place by the date that is 40 Business Days after the date of the Handback Survey, the Authority shall be entitled to offset the estimated value of the Handback Works against subsequent installments of the Service Payments on the following basis:

- (a) where Project Co has failed to deliver a Handback Works Plan by the required date, the Authority may reserve amounts in aggregate up to the value of the Handback Amount determined by Project Co in accordance with Section 2.7(c) or determined pursuant to the Dispute Resolution Procedure; or
- (b) where the Authority has rejected a proposed plan submitted in accordance with Section 2.6, the Authority may reserve an amount representing the value of the non-compliant elements of the plan, in aggregate up to the value of the Handback Amount determined by Project Co in accordance with Section 2.7(c) or determined pursuant to the Dispute Resolution Procedure.

If Project Co fails to carry out any Handback Works in accordance with the schedule in an approved Handback Works Plan or in a manner consistent with the Handback Requirements, the Authority may reserve or offset the value of those Handback Works from subsequent installments of the Service Payments.

Any amounts reserved or offset under this Section 3.2 shall be placed in an escrow account and released to Project Co upon satisfactory completion of the relevant Handback Works.

3.3 Obligation of Project Co

Notwithstanding:

- (a) the agreement of the Authority's Operating Period Representative to any Handback Works, the Handback Works Plan or the Handback Amount;
- (b) the participation of the Authority's Operating Period Representative in the Handback Survey; or
- (c) the complete or partial carrying out of the Handback Works.

Project Co will not be released from any obligation to conduct any other inspection or to perform any other works in accordance with this Agreement.

4. COMPLETION OF HANDBACK WORK

4.1 Further Inspection

Not later than six (6) months prior to the Expiry Date, Project Co and the Authority will conduct a further joint inspection and survey of the Facility. Such inspection will confirm whether or not the condition of the Facility meets the Handback Requirements.

4.2 Notice from the Authority

On, or within five Business Days after, the Expiry Date, the Authority's Operating Period Representative will either:

- (a) issue to Project Co a handback certificate confirming completion of the Handback Works (the "**Handback Certificate**") and return the Handback Holdback to Project Co; or
- (b) notify Project Co of its decision not to issue the Handback Certificate:
 - (1) stating the reasons for such decision;
 - (2) setting out each respect in which the Handback Works have not been completed or the Facility does not comply with the Handback Requirements; and
 - (3) stating the Authority's Operating Period Representative's estimate of the cost of completing all work required for the Facility to comply in all respects with the Handback Requirements.

4.3 Response from Project Co

Project Co may, within 30 days after receipt of the notice given in accordance with Section 4.2(b) of this Schedule by notice to the Authority's Operating Period Representative, object to any matter set out in the Authority's Operating Period Representative notice by:

- (a) giving details of the grounds of each such objection; and
- (b) setting out Project Co's proposals in respect of such matters.

4.4 Noncompliance with Handback Requirements

If it is agreed, or determined in accordance with the Dispute Resolution Procedure, that the Facility did not, at the Expiry Date, comply in all respects with the Handback Requirements:

- (a) Project Co will:
 - (1) complete any outstanding Handback Works within 60 days of the Expiry Date; and
 - (2) pay to the Authority no later than 60 days after the Expiry Date an amount, if any, equal to the estimated cost of completing any outstanding Handback Works

(based on the cost estimate provided by the Authority's Operating Period Representative in accordance with Section 4.2(b)(3) unless otherwise agreed or determined in accordance with the Dispute Resolution Procedure), so that the Facility is in a condition which complies with the Handback Requirements. Upon payment being received in full by the Authority, the Authority will issue the Handback Certificate and return the Handback Holdback to Project Co and if such payment is not received from Project Co when due, the Authority may draw any unpaid amounts against the Handback Holdback and release the balance of the Handback Holdback to Project Co.

5. SERVICE TRANSITION

5.1 Services Transition Out Requirements

Subject to Section 14.3(a) of the Agreement, at the expiry of the Term Project Co will:

- (a) comply with all requests of the Authority to provide information and data in the form, and incorporating the particulars, required by the Authority, relating to Project Co's administration and costs of performing the Services and including information relating to the anticipated administration and cost of a transfer of the Services to a New Service Provider, and the Authority shall have the right to disclose to any prospective New Service Provider any or all of the information provided under this Section 5.1(a), without disclosing to Project Co the identity of any such prospective New Service Provider;
- (b) comply with all requests of the Authority to facilitate for the Authority and/or any prospective New Service Provider meetings with the employees of Project Co who are engaged in the performance of the Services prior to such persons being released from employment by Project Co, and
 - (1) Project Co shall in no way restrict the Authority or New Service Provider, as the case may be, from offering employment to any employees of Project Co who are engaged in the performance of the Project; and
 - (2) in the event any of the employees of Project Co who are offered positions to work with the Authority or New Service Provider, as the case may be, accept such offers of employment, Project Co shall complete all documentation and take all steps as may be necessary in the opinion of the Authority, acting reasonably, to properly terminate such employees of Project Co, including by fulfilling all severance and/or termination payment obligations required to be made, and Project Co shall take all such other steps as the Authority or New Service Provider may reasonably require in connection with the termination of those employees who are accepting offers of employment from the Authority or New Service Provider.
- (c) comply with all requests of the Authority to provide all information, records, documents, agreements and data relating, directly or indirectly, to the Services including, without limitation, such information, records, documents, agreements and data set out below in

Schedule 20 – Handback Requirements
Stanton Territorial Hospital Project Agreement – Execution Version

the form, and incorporating the particulars, required by the Authority, relating to Project Co's administration and cost of performing the Services:

- (1) full operations, maintenance and service records for the Facility, including Help Desk records;
- (2) full complement of current operating manuals;
- (3) listing of all current and historical costs and expenses relating to the performance of the Services with a breakdown of such costs and expenses listed in respect of the Services;
- (4) information and data related to the Services;
- (5) information related to contingent liabilities and threatened or pending litigation;
- (6) floor plan, site plan, maps and photographs in respect of the Facility;
- (7) true, accurate and complete copies of all contracts and subcontracts with third parties and all other agreements, understandings, indentures, contracts, leases, deeds of trust, licences, options, instruments or other commitments between Project Co and any Persons relating to the Services;
- (8) details of all Service Failures from the Effective Date to the date such request is made of Project Co;
- (9) all information relating to the Services as may be identified by the Authority including, without limitation:
 - (A) information technology design, configuration, architecture and infrastructure documents;
 - (B) telephony design, configuration, architecture and infrastructure documents;
 - (C) databases;
 - (D) applications; and
 - (E) business rules.
