

3 1936 00016 979 5

FEB 24 1992

Government of N.W.T.
Yellowknife, N.W.T.

February 8, 1992.

Honourable Fred Koe,
MLA Inuvik Region,
G.N.W.T. Box 1320,
Yellowknife, N.T.,
X1A 2L9.

Dear Mr. Koe:

In May 1991 an article appeared in the INUVIK DRUM, dealing with concerns of the employees at the Inuvik Regional Hospital, and how staff were concerned that certain management practices were affecting staff morale, staff turnover etc.

In the same month, there was also a letter in the INUVIK DRUM, written by Barb Wilson, Regional Vice President of the Union of Northern Workers, again addressing the issue of staff morale.

A subsequent issue in the INUVIK DRUM, again in May 1991, ran an article on how George Gillies, C.E.O., of the Inuvik Regional Hospital, had meet with a committee of hospital workers to address their concerns. Mr. Gillies assured staff that he would look into their concerns.

Recent demonstrations by the hospital employees indicate that hospital morale has not improved, it has in fact declined to the point where I, as a member of the community depending on the Inuvik Hospital for my health care needs, am concerned about the impact this morale problem will have on the level of care myself, and my family will receive.

The decline in staff morale also has a ripple effect on the community. Staff continue to leave Inuvik, taking their family and their economic and social input to the town with them. Employees working in a stressful environment take their stress home with them, thereby affecting their spouses and family. Training programs for Northerners suffer as continual staff turnover, particularly in Senior Positions, make it impossible for programs to be developed or maintained.

I urge you to use your position, as our government representative, to take prompt action regarding these concerns.

Sincerely, *A. McDonald*

Dear Mr. Koe:

In May 1991 an article appeared in the INUVIK DRUM, dealing with concerns of the employees at the Inuvik Regional Hospital, and how staff were concerned that certain management practices were affecting staff morale, staff turnover etc.

In the same month, there was also a letter in the INUVIK DRUM, written by Barb Wilson, Regional Vice President of the Union of Northern Workers, again addressing the issue of staff morale.

A subsequent issue in the INUVIK DRUM, again in May 1991, ran an article on how George Gillies, C.E.O., of the Inuvik Regional Hospital, had meet with a committee of hospital workers to address their concerns. Mr. Gillies assured staff that he would look into their concerns.

Recent demonstrations by the hospital employees indicate that hospital morale has not improved, it has in fact declined to the point where I, as a member of the community depending on the Inuvik Hospital for my health care needs, am concerned about the impact this morale problem will have on the level of care myself, and my family will receive.

The decline in staff morale also has a ripple effect on the community. Staff continue to leave Inuvik, taking their family and their economic and social input to the town with them. Employees working in a stressful environment take their stress home with them, thereby affecting their spouses and family. Training programs for Northerners suffer as continual staff turnover, particularly in Senior Positions, make it impossible for programs to be developed or maintained.

I urge you to use your position, as our government representative, to take prompt action regarding these concerns.

Sincerely,

Name and address:

Sarah Nerysoo

In the same month, there was also a letter in the INUVIK DRUM, written by Barb Wilson, Regional Vice President of the Union of Northern Workers, again addressing the issue of staff morale.

A subsequent issue in the INUVIK DRUM, again in May 1991, ran an article on how George Gillies, C.E.O., of the Inuvik Hospital, had meet with a committee of hospital staff to address their concerns. Mr. Gillies assured staff that he would address their concerns.

Recent demonstrations by the hospital employees indicate that hospital morale has not improved, it has in fact declined to the point where I, as a member of the community depending on the Inuvik Hospital for my health care needs, am concerned about the impact this morale problem will have on the level of care myself, and my family will receive.

The decline in staff morale also has a ripple effect on the community. Staff continue to leave Inuvik, taking their family and their economic and social input to the town with them. Employees working in a stressful environment take their stress home with them, thereby affecting their spouses and family. Training programs for Northerners suffer as continual staff turnover, particularly in Senior Positions, make it impossible for programs to be developed or maintained.

I urge you to use your position, as our government representative, to take prompt action regarding these concerns.

Sincerely,

Shanne Conway

In May 1991 an article appeared in the INUVIK DRUM, dealing with concerns of the employees at the Inuvik Regional Hospital, and how staff were concerned that certain management practices were affecting staff morale, staff turnover etc.

In the same month, there was also a letter in the INUVIK DRUM, written by Barb Wilson, Regional Vice President of the Union of Northern Workers, again addressing the issue of staff morale.

A subsequent issue in the INUVIK DRUM, again in May 1991, ran an article on how George Gillies, C.E.O., of the Inuvik Regional Hospital, had meet with a committee of hospital workers to address their concerns. Mr. Gillies assured staff that he would look into their concerns.

Recent demonstrations by the hospital employees indicate that hospital morale has not improved, it has in fact declined to the point where I, as a member of the community depending on the Inuvik Hospital for my health care needs, am concerned about the impact this morale problem will have on the level of care myself, and my family will receive.

The decline in staff morale also has a ripple effect on the community. Staff continue to leave Inuvik, taking their family and their economic and social input to the town with them. Employees working in a stressful environment take their stress home with them, thereby affecting their spouses and family. Training programs for Northerners suffer as continual staff turnover, particularly in Senior Positions, make it impossible for programs to be developed or maintained.

I urge you to use your position, as our government representative, to take prompt action regarding these concerns.

Sincerely,

Name and address:

*Frank Kay

Dear Mr. Koe:

In May 1991 an article appeared in the INUVIK DRUM, dealing with concerns of the employees at the Inuvik Regional Hospital, and how staff were concerned that certain management practices were affecting staff morale, staff turnover etc.

In the same month, there was also a letter in the INUVIK DRUM, written by Barb Wilson, Regional Vice President of the Union of Northern Workers, again addressing the issue of staff morale.

A subsequent issue in the INUVIK DRUM, again in May 1991, ran an article on how George Gillies, C.E.O., of the Inuvik Regional Hospital, had meet with a committee of hospital workers to address their concerns. Mr. Gillies assured staff that he would look into their concerns.

Recent demonstrations by the hospital employees indicate that hospital morale has not improved, it has in fact declined to the point where I, as a member of the community depending on the Inuvik Hospital for my health care needs, am concerned about the impact this morale problem will have on the level of care myself, and my family will receive.

The decline in staff morale also has a ripple effect on the community. Staff continue to leave Inuvik, taking their family and their economic and social input to the town with them. Employees working in a stressful environment take their stress home with them, thereby affecting their spouses and family. Training programs for Northerners suffer as continual staff turnover, particularly in Senior Positions, make it impossible for programs to be developed or maintained.

I urge you to use your position, as our government representative, to take prompt action regarding these concerns.

Sincerely,

Name and address:

Agnes Carpenter
