FEB 22 1993

Government of N.W.T.
Yellowknife, N.W.T.

Dear Sir:

I am opposed to the drastic increase in rent and implementation of utility user costs for government housing units. I am opposed to the direction that the government is taking as reflected in this housing strategy.

This policy will not encourage Inuit to become involved in education, health care, social services, renewable resources and other government departments. People will not be able to afford these high living costs, and therefore will leave the profession or be discouraged from entering. Success of Nunavut demands that government programs give support through positive housing strategies for all.

We are entitled to quality education, health care and other government services. These services will suffer if this Housing Strategy becomes effective.

As our M.L.A. I demand that you lobby against this Housing strategy for the benefit of our community and other settlements of the north.

Yours truly,

John Ningark
