**RE: Funding for Childcare-Pangnirtung**

Dear Mr. Ipeelee Kilabuk,

As you may know, the Pangnirtung Daycare Committee, has been working towards getting a Daycare Center for Pangnirtung. The Pangnirtung Daycare Committee asked the Hamlet Council in Pangnirtung if they could provide space for the Daycare Center. The Hamlet of Pangnirtung then decided to change the rennovations for the first floor of their Community Center from office space into a Daycare Center. The Hamlet of Pangnirtung is paying for the majority of materials and all of the labour costs to build the Daycare. (see attached blueprint of actual Daycare under construction.)

The Daycare committee is requesting immediate emergency start-up funding of \$ 20,953.68 from you to cover the costs of special materials ordered on sealift, especially to ensure that the Daycare Center is constructed according to the regulations pertaining to Daycare Centers that will be coming into legislation in the near future. ( the five invoice sheets of building materials required totaling \$20,953.68 are attached.);

The Daycare Center will accomodate 25 children. The Daycare Center is already under construction and is on schedule. It will be completed in January 1989.

At the start, we are looking at having children in the Daycare who are between about eighteen months to five years old. There might also be an after school program for younger children whose parents work . The program would involve crafts, music, gym, pre-school learning activities and elders who would tell stories and teach traditional games.

in the first year, there would be ten childcare workers trainees. Five individuals would work with the children while the other five were in the classroom. Another childcare worker would be hired when on a part-time basis to help with after school children or to provide emergency babysitting for parents whose regular babysitters could not come for a day. There would be an instructor hired for about six months who would work with a full-time interpreter to train the workers. There would also be a full-time Manager hired for the Daycare to do the bookkeeping and a full-time Domestic worker hired to make snacks for the children and clean the Daycenter. Older parents, who speak only Inuktitut, would be trained in the first year as licensed home care workers.

There are now three Pangnirtung women in the one year Early Childcare program at Arctic College. In the second year, these trained individuals would be hired in the Daycare and the other women would be able to look after the smaller babies in their home. We would also start up a Resource Center and Toy lending Library for the family home daycare to help those women who babysit in their homes.

By the third year, there would be a good support and trained staff for the Daycare Center. The Daycare Center would run on its own and continue on a permanent basis to provide childcare services for the community.

The Hamlet Council of Pangnirtung has already shown a commitment to Daycare by the construction of the Center. For this reason, we feel that Territorial Government should also show support to a community that has taken the initiative to follow up on the government's mandate to recognize the need for childcare in the North. Caring for children is not only a women's responsibility but the combined responsibility of community and government. The Territorial Government in the past has supported funding for economic reasons to our community. We feel that social issues should take a priority because children are everyone's future.

Thank you for taking the time to consider our request.

Sincerely,  
  
Nancy Anilniliak  
Secretary-Daycare Committee

  
Kim Kilabuk  
Member - Daycare Committee
