Tom Butters  
 Minister  
 Department of Municipal  
 and Community Affairs  
 Government of the N.W.T.  
 Yellowknife, N.W.T.

January 22, 1990

Dear Mr. Butters,

The Hamlet Council of Clyde River has been reviewing the Water and Sewer Program changes for the next fiscal year.

We would like to point out changes that have the most impact for the communities of Baffin area. As a water/sewer program, everything should be covered that has to do with water/sewer. A helper for the driver not being accounted for is ridiculous as the Hamlet O&M will have an even tighter budget due to cuts. There were other concerns brought up but for this one, we'll have to lay off very good workers that doesn't even have to go if there was money for it. This would have an impact all over the Baffin area, or even other places in the N.W.T.

Our recommendation is that another year for discussion with the communities be taken into consideration. A year to get input would probably have longer lasting impact and the program accounting would not have to be changed again in the near future, as it happened with the program we've had the last 2 to 3 years.

Thank you in advance for your consideration.

Sincerely,

*Tomasie Panipak*
