Dear Mr. Ernerk

I am writing about the Cruise Missile. Just to let you know that I am totally against the testing of the Cruise over Territorial airspace. I know you're not going to buy warplanes and shoot them down but I think you could do something. Missiles will not be flying over the Keewatin but I am still concerned.

Also about the F-18's that will be based here. I was in Iqaluit this summer when the F-18's were there for some exercises and I think that they will really damage the environment. The only good thing about them is that they will bring jobs to the region. If the planes do not come people will lose money, but if they do come people will lose more than money-they'll lose hunting and a traditional way of life.

Thank-you,

Jimi Onalik
