Re. Housing

Dear Sir,

The General Synod of the Anglican Church of Canada which is a gathering of representatives of the Anglican Churches all across our country called on members of the Anglican Church to look at the problems faced by many people in our country in regard to housing. At our Diocesan Synod we did this but the matter was referred to the Executive of that gathering for closer study.

We are calling upon all our people to do what they can in their local communities to help people who have problems with housing but realise that despite all the help which is given to people by the Government in this regard yet more Government help is required. We would therefore call on the Government of the N.W.T. to adjust its priorities of spending so that more funding is available to provide adequate housing for all the people of our area.

We thank you for your consideration of this concern.

Yours truly,

Peter C. Bishop
Executive Archdeacon
