

# Equality of Men and Women in the Northwest Territories

## 1. Statement of Policy

The Government of the Northwest Territories supports international conventions on the elimination of all forms of discrimination against women to which the Government of Canada is a party and is committed to the fundamental rights, freedoms and guarantees of equality set out in Canadian and Northwest Territories statutes.

The Government of the Northwest Territories will actively support and encourage the participation of women on an equal basis with men in all aspects of society in the Northwest Territories.

## 2. Principles

The Government of the Northwest Territories will adhere to the following principles when implementing this Policy:

(1) Objectives identified by the international conventions to which Canada is a party provide a standard of equality for women and men in the Northwest Territories.

(2) The objectives and programs of the Government of the Northwest Territories should be consistent with these world standards.

(3) Priorities established for the United Nations Decade for Women, specifically: integrating status of women concerns into employment, education and health programs; Women in Public Life; and Women in Legislation, should be recognized in Government of the Northwest Territories action plans.

(4) As women represent half of the population, concern for the equality of women must become integral to programs undertaken by the Government of the Northwest Territories, as well as promoted through the Ministry responsible for the status of women.

(5) The Government of the Northwest Territories may undertake special affirmative action programs in accordance with human rights legislation.

(6) Equal opportunity for the development of the human potential of both women and men is a benefit to society as a whole and is the responsibility and concern of individual women and men, government and non-

governmental organizations.

(7) Government should neither force women or men to stay in traditional roles nor pressure them to move out of traditional roles. Each individual should have the freedom and opportunity to make an informed choice about lifestyle.
