- i) the Gross Expenditure Base for the Current Fiscal Year, as calculated in section 3 of this Appendix;  
less
- ii) Eligible Revenues for the Current Fiscal Year, as calculated in section 4 of this Appendix;

CALCULATION METHODS**GENERAL**

Fiscal Year T designates the Fiscal Year beginning April 1 of a calendar year T and ending March 31 of the immediately following calendar year (T+1).

1. Three-Year Moving Averages Calculated for Population Adjusted Gross Expenditure Escalator

The three-year moving averages for the Current Fiscal Year T of the rates of change in Consolidated Provincial/Territorial-Local Government Expenditures, territorial and Canadian population, and nominal Gross Domestic Product at Market Prices for Canada shall be calculated as follows:

$$M = (R_T + R_{T-1} + R_{T-2}) / 3$$

where

M = the three-year moving average, and

$R_T$  = the rate of change of the variable in question from Fiscal Year T-1 to Fiscal Year T, where

$$R_T = \frac{X_T - X_{T-1}}{X_{T-1}}$$

where

$X_T$  = the value of the variable in question for Fiscal Year T; and is measured in accordance with the data sources and methods specified in Annex 2.

2. Data on a Fiscal Year Basis

All variables used to calculate Consolidated Provincial/Territorial-Local Government Expenditures for Canada, and nominal Gross Domestic Product at Market Prices for Canada, for the purpose of the Formula, shall be measured on a Fiscal Year basis.

A variable for Fiscal Year T shall be calculated as the sum of the variable for the 2nd, 3rd and 4th quarters of calendar year T and the 1st quarter of calendar year (T+1) whether on a seasonally-adjusted or non-seasonally adjusted basis, as the case may be. If the variable is recorded at annual rates, then the sum of the quarterly values shall be divided by 4.0.

**3. Measurement of Average Tax and Recovery Rates**

- a) For the purpose of measuring Hypothetical Own-Revenues and Own-Recoveries for the Current Fiscal Year, the average tax and recovery rates for each of the revenue sources listed below shall be specified on a per unit basis, for the Current Fiscal Year and for the Base Year as defined in the Appendix to this Agreement, unless agreed to otherwise by Designated Representatives.

Tobacco Products; Gasoline; Diesel Fuel; Non-Commercial Vehicle Licenses; Sale of Spirits; Sale of Wine; Sale of Beer; Hospital and Medical Insurance Premiums; Highway Filing Fees; Library Fees; Electrical Permits; Document Registration Fees; Insurance Licenses; Business Licenses; Public Trustee Fees; Securities Registries Fees; Vital Statistics Fees; Boiler Registrations; Professional Licenses; Gas Inspections; Gun Control Permits; Lottery Licenses; Miscellaneous Inspections; Vendors Fees; Public Trustee Management Fees; Insurance Agent Licenses; Game Licenses and Fees; Timber Permits; Quarry and Timber Fees; Medical Transportation User Fees; Campground Fees; Lodge and Outfitters Fees; GED Exam Fees; and rental revenues.

- b) For all other revenue and recovery sources the average tax and recovery rates for the Current Fiscal Year and for the base year shall be specified on an ad valorem basis, except in those cases where it is agreed by the Designated Representatives that the tax and recovery rates cannot reasonably be specified as an ad valorem rate using the generally accepted measure and definition of an ad valorem rate. (An ad valorem tax rate is measured as a percentage of the value of the tax base subject to taxation.)

**4. Calculation of Average Tax and Recovery Rates**

The average tax and recovery rates for a Fiscal Year shall be calculated as the average of the tax and recovery rates in effect in the respective Fiscal Year, weighted by the number of months the rates were in effect. For this purpose a tax change made at any time during a month shall be considered to have been in effect for the full month.

**5. Decimal Places**

All calculations pertaining to this Agreement shall be calculated to an accuracy of five decimal places (i.e. 6.234 percent = .06234).

ANNUAL KEEP-UP FACTOR

1. "Annual Keep-up Factor" for a Fiscal Year is equal to the ratio of:
  - (a) the sum of the products of:
    - i) each of the revenue bases for the total of the ten provinces for the immediately preceding Fiscal Year; and
    - ii) the National Average Rate of Tax for the corresponding revenue bases for the Fiscal Year; to
  - (b) total revenues to be equalized for all provinces and all revenue bases in the immediately preceding Fiscal Year; where the revenue bases, national average rates of tax, and revenues to be equalized in the Fiscal Year in question are as defined in the *Federal-Provincial Fiscal Arrangements Act* and the *Federal-Provincial Fiscal Arrangements Regulations*, except as specifically noted in paragraphs 2, 3 and 4 following.
2. Where the definition of a revenue base differs between the immediately preceding and the Current Fiscal Year, the revenue base for the immediately preceding Fiscal Year in paragraph 1(a)(i) above shall be measured in accordance with the definition used for the Current Fiscal Year.
3. In the case of the Personal Income Tax Base, the value of the revenue base shall be measured by Basic Federal Tax for the sum of the ten provinces, from line 1 of computation Table 1 for the Personal Income Tax Base, in the Department of Finance (Canada) Publication, *Provincial Fiscal Equalization*, both for measuring the revenue base in paragraph 1(a)(i) and the national average rate of tax in paragraph 1(a)(ii).
4.
