

07 May, 1998

Mr. James Rabesca, MLA  
North Slave Constituency

Dear Mr. Rabesca;

I am writing to ask that you and your colleagues in Legislature provide adequate funding so that our schools may continue to do an outstanding job in educating our young people.

Over the past few years, education budgets across the North have been slashed without regard to the cost of the quality of education our students receive. The result has been large class sizes, reduction or elimination of support for special needs students, and an increase in multi-graded classrooms. As well, many of our schools are experiencing incidents of violence and verbal abuse every year with decreasing resources to deal with this matter. The deteriorating conditions make it very difficult for learning to occur.

Although the Dogrib Region has made many positive strides in promoting education, there is much more work to be done to ensure that this progress is not lost. We urge you to work on behalf of education to make sure our students have access to proper resources and our schools have proper staffing, both professional and paraprofessional.

Money is well spent when it is used to help children become healthy and productive members of our society. Let's make education a top priority for the next sitting of the Legislative Assembly.

Masi cho,
